Volunteers Clean Roadways of Snow

CLAVIER, January 24 (Special) A volunteer effort of 150 men... The roadways are now clean and clear.

WHY SUCH SPEED?

THE Evening Times has some questions it would like answered on the matter of this proposal to issue gasoline tax anticipation notes...

HOME, SWEET HOME

Just as darkness was coming down he rapped at the front door. The thermometer was scoring zero. The ground was covered with snow.

WHAT'S IN THE MEDICINE?

ROBERTSON, January 24, 1930. A large crowd of local citizens gathered for the departure of the Robertsons Monday evening.

THE TIP

NOTHING HOLDS ABOUT TEMPERATURE AT BOISE... The coldest January night since valley has last three days.

Then on December 12, 1929, Mr. Wood appeared before the roads committee of the house of representatives in Washington, D. C., and gave testimony that Idaho's program for 1930 had already been made, based on federal funds to be received for the federal fiscal year ending July 1, 1931.

"Believe me," said he in tones marked by sincerity, "I'll sure be glad to get back to Portland. It's a wonderful thing to have a home. I've been thinking about this home business on this trip of mine. When I get back to Portland and get a job I'll be mighty happy."

ALL DOGS MENACE STOCK RAISED CITY S. D. Jan. 21, 1930. Bands of wild dogs are roving the territory and devastating sheep.

Stubborn motors that say

"No" when they're cold

.. start quickly, purr smoothly on "DRY" gas

SOME cold morning - when you are in a hurry - you'll discover what's the matter. "Grid, whine, growl," goes the laboring starter. "Gurgle, sigh, wheeze," goes the flooded carburetor.

BLOW YOUR BREATH ON A COLD MIRROR... that's what happens to "wet" gasoline in a cold motor - it condenses in droplets on the cylinder walls. "Dry" gas, on the other hand, stays vaporized better and therefore burns more cleanly.

Now we are informed that since the federal aid program has been enlarged, Idaho must go into debt to insure meeting the larger program.

"It's a wonderful thing to have a home," the man of the house repeated, in the words of the youthful pilgrim, "I'll say!"

FISK MEANS MILEAGE

Tougher Materials and A Better Design Whenever you want the best service and the most mileage for your money, you will get it from a FISK ALL-CORD, no matter what price you pay.

Are the common people of the state of Idaho a bunch of yokels of so little intelligence that they must sit by and permit a revolution to be attempted in the name of financing a highway building by a department that has changed fronts on this important matter almost every night?

FROM THE PUBLIC MORE WINTER BITES... Editor, Idaho Evening Times: I have read A. W. Donaherty's list of birds found in our state. I want to add several more which we find with us.

What will be the difference in cost? Front Boise comes the statement that some politicians and some district having selfish regional motives oppose the note proposal. The inference is that Boise has suddenly established a new standard of generosity and open heartedness to guide all other communities. Why? How come?

Best Editorial of the Day... Americans have reason for pride in the title borne by Secretary of State Stimson, head of the American delegation to the London arms conference.

The state of Idaho is trying to make a revolutionary change over night in one of the state's most vitally important activities, the building and financing of roads. It has attempted to "rush act" in its efforts to get the proposal adopted. The tactics used are crude, undignified, unbecoming to the state and in effect an insult to the intelligence of the people of Idaho.

It was a presentation of the United States in the attitude that people themselves would have ordered. It was the big leadership of the American delegation that the whole country, except professional and other war-makers, will enthusiastically approve.

Tough - Sturdy - Safe - Saving

THE New Firestone Oldfield Tire is one of the many achievements directly traceable to the Firestone supremacy in the tire field.

Consider the many advantages of the New Firestone Oldfield. These tires are not "second-line tires." Their high quality is equal to other "first lines" by actual test. Finer cotton means a stronger and better carcass. More rubber between the plies gives better protection to the cords, longer life and greater flexibility.

Fashions

Over An Accessory Projected for the Spring Wear

By FRANCES DAGLE

(Copyright, 1930, by Style Sources)

NEW YORK (UPI)—While the fashion for clinging clothes is unquestionably a craze now, all this is in color that may be watched through the next season. The new color scheme is a departure from the usual attention. The remark will probably be made that "it is always talked about at this time of the year" and this is true. The color is being given for its practical acceptance. The gray influence in fashion has been strong. Gray is talked of for footwear and the dominance of beige, the other light neutral, is definitely making its mark in the contrast of color. At least one neutral shade is desirable, and this is deemed an argument in favor of gray. With its use, it is particularly smart and unusual. The navy blue and gray combination is undoubtedly the most successful. Altered with purpose, it produces a particularly satisfying effect. The lighter shades of gray are particularly desirable, and dispiriting a certain amount of the hardness of other tones.

It is also interesting to note that while some manufacturers have no confidence in gray in solid effect, they acknowledge its influence by including it in many of their white goods a delicate trim of gray combined with black, or a black gown with gray and white trim.

It is a color with a certain demure quality which might be associated with the feminine trend in fashion. It is a color that is fact that it will be used a great deal in the coming season. It is a color which is continually emphasized, due to its versatility and beauty. It is a color which is being used in a variety of ways.
