WHEN MOTORS NEED AN ANTI-FREEZE

Even more than the radiator—automobile bearings, pistons and cylinders need and deserve winter protection. They are so minutely fitted and adjusted, that great damage is done if motor oil becomes sluggish with the cold. Texaco resists the cold and flows freely when many oils are "frozen"—solidified. They refuse to flow.

In a single winter Texaco Golden Motor Oil can save you heavy repair bills and preserve the speed and power of your car. It is free from hard-carbon-forming elements and all impurities that harden with the cold—that slow up motor performance. See for yourself the purity of Texaco. Notice its clean golden color—its reassuring full-body.
