

Carnera Meets Severe Test But Wins With a Knockout

**ITALIAN FIGHTER
BATTERED IN MIX
WITH HUGE NEGRO**

Ace Clark Was Winning
Easily Until Carnera
Staged a Comeback
and Finished His Man

PHILADELPHIA, March 4 (UPI)—Primo Carnera's circus troupe today looked at the world through red-colored glasses. The Italian, who was the star attraction of his American tour and received all due as to his courage and ability to take punishment, was beaten by a man he could not even see over his "stupendous" knuckles over Ace Clark, Philadelphia heard with one eye and cringed with another. After the first round of the start of his American tour and received all due as to his courage and ability to take punishment, he was beaten by a man he could not even see over his "stupendous" knuckles over Ace Clark, Philadelphia heard with one eye and cringed with another. After the first round of the start of his American tour and received all due as to his courage and ability to take punishment, he was beaten by a man he could not even see over his "stupendous" knuckles over Ace Clark, Philadelphia heard with one eye and cringed with another. After the first round of the start of his American tour and received all due as to his courage and ability to take punishment, he was beaten by a man he could not even see over his "stupendous" knuckles over Ace Clark, Philadelphia heard with one eye and cringed with another.

The bout with the 6-foot 6½-inch, 284½-pound Clark provided the top entertainment of the first night of his career. Carnera took terrible beating and was hardly able to move around when he reached the ring again. Clark, with a vicious left hook to the body and a right to the chin which felled the bout after 2 minutes and 30 seconds, had Carnera down. Jack's last gave Primo a hoisting lesson and except for two knockdowns in the fourth had all the best of the fight until the knockout. The doctor now says Carnera's knockout in the fourth bout because it fresh for the fifth and probably blinded Carnera with a black eye, which caused him to close his left eye.

Ernie Woolley to
Fight in Ogden on
March 10, Report

Ernie Woolley, Twin Falls' lightweight, will battle Eddie Kid Ross of Casper, Wyoming, at Ogden on March 10. It was buried today. Woolley has been forced out of the light game since his fight with Melvin McCallister in the middle of the heavyweight match at Ogden yesterday landed a blow that fractured Woolley's jaw. The doctor now says Woolley may return.

Fighters in the main event and the semi-final of the March 12 card here have all been signed. Harry Lewis, the tall new Westerner, in the top round again, goes to the New York Kid of Omaha in the semi-final. The New York Kid has victory

At the End of Scott's Heavyweight Hopes.

Here's the first telephone of the Boston Kid is sleeping away as the referee Lou Mizanis turns Scott from a neutral corner. NEA by Western Air Express.

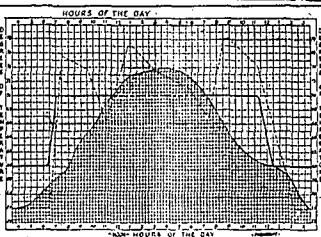

been knocking the boys down around Salt Lake City.

For the preliminaries, a tentatively arranged card calls for a six-round bout between Nelson and Eddie Kid Ross.

Jimmy Durcey of Hazelton, The "Hammer," is still undecided on the matter, however. The curtain is up on the fourth round of the fight after an intermission.

Fighters in the main event and the semi-final of the March 12 card here have all been signed. Harry Lewis, the tall new Westerner, in the top round again, goes to the New York Kid of Omaha in the semi-final. The New York Kid has victory

Uniform Indoor Temperature Insurance Against Spring Colds

Texaco Bowlers
Win from Market

The Texaco bowlers took third place in the indoor temperature insurance against spring colds market five last night in the city league contest. The scores were:

Idaho Wool Men
to Market With
National Group

PONATILO, Idaho, March 1.—(UPI)—Waiting for the arrival of the National Wool Marketing Board to take form in this state, Idaho's 17 textile wool mills are preparing to handle more than 1,000 bales of wool during the coming year. Most of the woolen mills are reported favoring the national marketing plan and it is believed that a large percentage of Idaho's wool will be handled through federal "pool."

Officials of the Idaho Wool Growers Association, a plant in cooperation with the federal pool, and through the medium of local newsletters, county agents are taking steps to enter the marketing plan.

Local News in Brief

McBride Slates
in Farm Property

She has agreed to share in the property of the late Edwin Hinsler, according to a decree recorded in the district court here Saturday. The widow will receive one-third, one-half of the net value of the farm, which has three daughters and five sons will receive one-twelfth each. The farm consists of 160 acres of land in this country, with a house and garage valued at \$2000 and each of the other shares \$500, according to the decree. Walter Parry and Thomas of Twin Falls were attorneys in the case.

Taco New? Ben John
Lindell Starts

Two new men arrived in Twin Falls, the latter part of last week, and have taken over their duties as members of the staff of the Idaho Falls Tribune. They are Alvin Klute, 24, Alvin Harboon, 21, and E. W. Gerebach, 23, both fine men.

PAINT SALE

We buy McMurtry Paint and Muresco Kalsomine by the carload and can save you money on your paint bill if you consider quality. One gallon of our best paint weighs 20 pounds and contains 75 per cent lead and 25 per cent zinc.

While some other paints contain only 25 per cent lead and weigh only about 17 pounds to the gallon, many dealers will tell you the weight doesn't count but nobody knows that 12 pounds of lead to a gallon will be better than 7 or 8 pounds. Also, if you want edge paint, we have it at half price.

McMurtry House Paint, 50 gal. lots \$8.10 per gal.
McMurtry House Paint, 5 gal. lots 2.50 per gal.
McMurtry Barn Paint, 5 gal. lots 1.10 per gal.
Mall Order Paint, 5 gal. lots 2.00 per gal.
Great House Stain, 5 gal. lots 1.10 per gal.
Pure Linseed Oil, 5 gal. lots 1.20 per gal.

We carry Muresco Kalsomine in bulk—buy what you want—bring back what you have left. We loan you a brush, FREE. Let us estimate you Painting, Kalsomine and Paper Hanging.

THE CUTOFF WOULD HELP

A RESIDENT of Buhl was in the Evening Times office the other day, and during the course of a conversation he expressed a lively interest in the work done by this newspaper looking toward construction of the Minidoka-Buhl extension to the main line.

"Several years ago I shipped quite a lot of livestock from Buhl," this man said. "On more than one occasion I have left Buhl with a carload of hogs on the morning freight bound for Portland. Quite often if business was rushing it would be almost night before we got out of Twin Falls. We usually made better time after we got out of Twin Falls, but several times I fed hogs at Glens Ferry because my 36-mile limit had been reached by the time I had reached there."

In other words, to the necessity over the Minidoka-Buhl east to Minidoka and thence west, it required 36 hours for a livestock shipper to get as far west as Glens Ferry. Bear in mind that this time was slowed up materially by reason of the fact that the haul was made by local freight as far east as Minidoka. The fact still remains that because of the preliminary haul east to reach the main line, most of the time 36 hours was spent going east, or away from the shipping destination.

By highway it is 72 miles from Twin Falls to Glens Ferry, and from Buhl it is only 56 miles to the first feeding stop this shipper had to make. In other words he spent 36 hours getting 56 miles nearer market than he had been when he left home!

This is only one example of the disadvantage which this rich district of Idaho faces on westbound railroad transportation. The westbound haul for Twin Falls county shipping points would be shortened an average of 100 miles to tidewater by extension of the Minidoka-Buhl branch to the main line. In other words, we could have a railroad distance of 200 miles to Portland by construction of the cutoff, instead of the present distance of 701 miles.

In respect of the saving in rate to shipper that might be effected by the direct connection westward with the main line, the added convenience which in the case of livestock shipments means money by reason of saved time, would be a bonus. A direct connection would also add vastly to the convenience of passengers bound west. As it is now, there are few families which do not buy passenger tickets from either Bliss or Shoshone at some time during the year or which do not take friends in their car to one of these points to make direct main line connections.

A GOOD SHOWING

SINCE the first of the year country children who bring cold lunches to schools in Twin Falls have had the opportunity of hot lunches in the three grade buildings, Bickel, Lincoln and Washington. The work is under the auspices of the Parent-Teacher association.

For the price of 20 cents per pupil per week, it is possible for the children who bring cold lunches to have a hot dish to supplement their own food. This added dish may be a vegetable soup, coca, or some other nourishing food. Its particular virtue is that it is warm.

The P. T. A. offered to furnish the hot dish free to any children not able to pay 20 cents a week. The funds for supplying the needs of children in this category were procured from the association's share of proceeds from health seals during the Christmas season.

The popularity of the hot lunch serv-

ice is attested by the fact that approximately 200 pupils have availed themselves of it. Of this number, about one fourth, or approximately 50, have had the hot lunch by reason of the funds of the association. The large number appreciated it sufficiently that they paid for it.

Next year the present plan is to extend this feature to include pupils in the junior and senior high schools. The new gymnasium-auditorium will be available as a place for serving the luncheons. Those in charge of the work declare that the hot lunches have been practically self supporting, except for the contribution from the association for those not able to pay. Interested country people have contributed supplies for the lunches in several instances.

This is good work. The fact that a great majority of present day adults may have managed to attain their growth on the cold lunches of their schooldays does not detract from the value and advisability of hot lunches for the present generation of school boys and girls. Dairy cows used to give little milk in the winter and "picked up" only when grass came, and hens laid most of their eggs in the spring. This is a newer and better day.

A WAY TO HELP

THE campaign to produce the necessary funds to insure construction of the American Legion memorial building goes slowly ahead. The various towns on the big committee are doing

the work as rapidly as they can find the time, and a very good start has been made.

Some of those whose contributions are likely to be relatively heavy are out of town. The solicitation in a

sense awaits them. The wide appeal such a memorial has affords plenty of reasons why everyone should have a part in making this project a reality. A movement has been started for group contributions. Employees of a company may well make up a purse for the memorial campaign. Some groups have already done this. The idea has much to command it, and affords everyone an opportunity to help a hardship on any. There

is no better way to spend 36 hours getting 56 miles nearer market than he had been when he left home!

Clark Wood, editor of the Weston, Oregon, Leader, says the buyer of a drink is not equally guilty with the seller. The seller, according to the usage of Weston, sells at a profit, but the buyer has to drink at a loss.

Best Editorial of the Day

AN ASSET

Pasco's "Tribune"

On the 10th of April occurs an anniversary

that of the birth of Jim Mervell, the fine gentleman well known to most local people. He died a short time ago, within a

year of his hundredth year. It has been suggested he contributed to an observance of the "covered wagon" period of the west. In other words, the building and making of the old Oregon Trail.

It is a movement well worth such support and attention. The pictures of these things standing first for blazing the trail toward the west. Many things come within the mind. Many things are visualized, mostly for amusement.

The Oregon Trail will always be associated with the personality of one of its first travelers, Meeker, and therein we may well pay tribute and keep the page clean with fond remembrance.

In these more practical days, however, when the great roadways have become an entity of value to the nation, and incidentally to the state of Idaho—in which state much of its historical history is written in silent rock and blood and energy—we are prone to go into legislative and other avenues of more or less constructive energy, and seek to perpetuate the things created.

That is our present move. We have the wonderful

task of the Oregon Trail. Practically it is our main artery of traffic to the northwest. We have been led to believe the trail is the way of plain and ordinary life. It is not so.

Studious of rate and unscrupulous road

west south of Pocatello amply testify to this statement, and traffic diverted in consequence,

the result being the antiquity of a trail that has not been kept in repair since

as opposed to 1860. In some parts it is no better than it was when Ezra Meeker made his initial trek across the state to Oregon. For

years it has been a "show" to drive

but it is important to realize in case

of that is large to see that this great and treacherous trail is maintained along with the nation that

now yearns to immediately be cleared.

If nothing else can be done to keep the trail

in repair, let us at least keep it clean.

B P W NATIONAL WEEK MARCH 15

Public Relations Banquet to
Olimax Activities Planned
By Local Club for Week

Twin Falls business and Professional Women's club will begin its national federation in the annual observance of National Business and Professional Week this week, March 8 to 15, corresponding with hundreds of clubs throughout the United States in carrying on in a degree their programs of activities for the week by the national federation. Committees have been formulating plans to conform with the general program of the club. Mrs. Johnson, a report of the monthly business meeting and dinner at club rooms last evening.

The theme of the week, "Business Cooperation," will be used. Most of the program will be centered on constructive community improvements. The climax of the week will come on Friday next when the evening session of the club's annual banquet, participated in by the business and professional men of the city.

On Sunday morning, March 9, the club will attend in a body the morning services at a local church, to be announced later. In the afternoon the club will

have a public service at the community center on Saturday evening.

Candidate for Mardi Gras Queen

Give Orders in Yacht Show

"Shipshape" when true worth has been established will share hours in ruling over the Los Angeles Boat Show in conjunction with the fourth annual national women's sailboat championship at Los Angeles. McMurtry, left, artfully yachtsman in her wetsuit, and a member of the crew of the "Jillie," vicequeen in last year's race for the King of Spuds trophy, Loretta Tahsall, right, is national women's outdoor motorboat speed champion.

THOMAS ADVISED

(Continued from Page One)

ing the predatory animals, including bobcats and to get organized for the year. He called his talk by thanking the members of the Southern Idaho Fish and Game association since its start in 1919 for the work it has done in the field which is part of its conservation program. He concluded by urging all persons to join the association during its membership drive and to encourage others to join.

Mrs. May Mark and R. V. Jones, president of the women's service corps of the Idaho Fish and Game association, were present.

John Evans of Caldwell gave a talk to those attending last night, telling the origin of fishing tackle for the past 50 years. The first fishing rod ever invented, he said, was invented in 1915, he said, giving advice to anglers. Mr. Evans told them not to abuse fly rods to the point of breaking them. He also advised them to keep the guides in good condition to relieve strain on the rod and damage to the line, keep the point varnished and put a thin coat of oil on the line to expand it to ten pitch heads.

Mr. Evans outlined how leaders were obtained from fish farms in Sweden, about 1915, and the secret singers, was told by his first instructor at the University of Vienna. He advised them to keep the guides in good condition to relieve strain on the rod and damage to the line, keep the point varnished and put a thin coat of oil on the line to expand it to ten pitch heads.

Reuben Hodelin, a fisherman, said Mr. Evans' talk was excellent and that their value depends on their skill. He told of how dealers were gathered from all over the world for the manufacture of wet and dry flies and noted that the 25th of the series was in the lobby of the hotel for examination during the evening.

GIVE TALKS

R. P. Purry, a fish and game student at the University of Idaho, gave a brief talk. Mr. Purry spoke of the duty of the student to the state and urged conservation of fish and game.

"One of the many things Idaho has is wonderful hunting and fishing and we should do all we can to protect and maintain it," he said.

He advised the hunting and fishing in Idaho open to as many as we can, so long as we can," he urged. "By testing, we can determine what we can do. Mr. Hodelin took of two or three fishing

tips he had learned, his talk being humorous and entertaining.

W. H. Smith of Twin Falls was masterminded at the conclusion of the Southern Idaho Fish and Game association since its start in 1919 for the work it has done in the field which is part of its conservation program. He concluded by urging all persons to join the association during its membership drive and to encourage others to join.
