

CARNERA VICTORY WILL BE PROBED BY COMMISSION

The hollow victory of Carnera, Italy's challenger for the heavyweight championship, over Frank Hughes, the first step toward a fight which will be investigated by the California athletic commission today or tomorrow.

Charles Truism, commissioner with jurisdiction over today's California, announced early today that purpose of the two fighters had been held up pending the inquiry and he hoped to hold it as soon as possible.

Truism said he doubted if many spectators, and a surrounding, would attend the fight in the sixth round when Carnera was behind on points and was expected to win.

Truism said he doubted if many spectators, and a surrounding, would attend the fight in the sixth round when Carnera was behind on points and was expected to win.

All of which the only one I picked the Giants to win the National League pennant last year, and I am very sorry for the small man on his beat.

"You picked the Giants," harked E. H. and they have the most looking outfield in the league.

"How can you pick the Giants," bristles Lawrence T. "when the Cubs have improved so immeasurably over last year that the National League now isn't even going to be close?"

Picking the Plavers Others point to the fact that McGraw is rather the hopes on the "Big League" and a couple of fair left-handers; that he has a leading hole at second base you could drive an ox-cart through without fear of being flung; that the team has the necessary punch at bat; and that McGraw is getting very old and hasn't the old steam in the boiler as of yore.

OUR BOARDING HOUSE

EGAD, THIS IDLENESS AND INACTIVITY WILL DRIVE ME MAD IF I MUST HAVE WORK TO DO! YES, WORK! SOMETHING THAT REQUIRES GREAT MENTAL AND PHYSICAL EFFORT! I WILL REJECT A SKYSCRAPER OR BUILD A BRIDGE!

YOU HAVE HIM IN A TRANCE, PROFESSOR, BUT SWITCH HIM OFF THAT CLASS OF WORK! WAVE TH' FINGERS ON HIM! BEAT SOME RUGS, OR CLEAN UP TH' BACK YARD!

THAT I CAN'T DO! HIS MIND IS THE TYPE THAT THINKS IN GIANTIC SIZES AND BIG TERMS! I WOULD BE EGOTISTIC, HYPOCHRISIT, HE DETESTS A SMALL JOB!

ARRESTED IN GRAVE

LONDON, (UP)—Arthur Neal, grave digger at the Whitechapel cemetery, was arrested on the first of the Queen was a month or so earlier than usual.

WINTER WHEAT REPORTS GOOD

Department of Agriculture Reports Crop 86 Per Cent of Normal on April 3d.

BOISE, April 13 (Special).—Winter wheat in Idaho had a condition of 86 per cent of normal on April 3d, according to a report from the department of agriculture. A year ago reported condition was 80 per cent, while two years ago it was 85 per cent. This year's condition is also 4.7 points above the 10 year average. April condition of 86.7 per cent. Much of the crop was planted last fall in dry soil and later than average due to the summer and fall drought. The December 1, 1929, condition of 77 per cent was in comparison with the ten year average of 87.4 per cent. However, there was a fairly good snow cover during the winter, which together with frequent rains this spring should result in about an average per cent of wheat killing. The best rough estimate of production this year will be around 2,400,000 bushels. The 1929 production was 11,140,000 bushels. The probable production of winter wheat in Oregon, Washington and Idaho, based on April 1 outlook, is around 42,000,000 bushels compared with 45,822,000 in 1929. The conditions of the Oregon crop April 1 was 86 per cent, and Washington's only 79 per cent of normal.

U. S. Condition Low
 The condition of the United States winter wheat crop April 1 was only 77.4 per cent of normal in comparison with 82.7 per cent a year ago, and at a ten year average of 80.9 per cent. The indicated probable production of winter wheat in 1930 is 12,000,000 bushels compared with 15,232,000 last year and an average for the 5 years 1923-1927 of 547,250,000.

Fruit Prospects
 A preliminary survey of fruit prospects in Idaho this year indicates that apples, pines and cherries will be about a normal crop but peaches and apricots were badly damaged by the low January temperatures.

A large percentage of the buds in the main fish peach district was destroyed. For the United States as a whole, however, that the peach crop has been more or less damaged by low winter temperatures.

COUNTY OFFICIAL IS SERIOUSLY ILL
BOISE, April 13 (Special).—Word has just been received by relatives that Isaac Gunnudsen, for nine years a member of the board of county commissioners of Cassia county, has suffered a stroke of paralysis, at Long Beach, where he went several weeks ago for the benefit of his health. The right side of his face and throat are affected and it is thought that his eyesight is in grave danger of being involved. Gunnudsen has already resigned and his place is being offered to many persons.

Mr. Gunnudsen came to Durley's sons 18 years ago, from Long Beach, where he was president of the Iowa Mercantile company for many years, and with his sons here established the Gunnudsen mercantile company, which was one of the widely known mercantile institutions in the section for many years.

Some two years ago Mr. Gunnudsen underwent a surgical operation at Salt Lake from which he never entirely recovered.

Miss Almira Quinn, teacher at Eastville in the Lewiston high school, and Miss Lois Berry, teacher of geometry and history in the same institution departed for their northern homes, Friday afternoon, after the close of the debating in the state which contest which was held here this week. These young women accompanied the Lewiston teams appearing in the meet, and departed with their happy charges in high gear for the long trek homeward, via motor cars.

Satisfaction of the highway east of Durley has already been started by the highway department, preparatory to oiling in the very near future. The completed "oil" highway from Durley to the Oregon border is expected to be in operation before the close of the year.

Water Shortage Curtails Planting

AMSTERDAM, April 13 (Special).—This locality received a small shower of the rain, which fell on the Salmon project Thursday afternoon. At present the storage of irrigation water at Salmon reservoir is low, and prospects for a long water shortage could not be much worse. Farmers have curtailed planting, putting in less acres than usual.

Mr. G. Paulson, who has had a badly swollen arm, suffering from a tick bite and vaccination, was in Twin Falls Friday to receive a second vaccination. This is making satisfactory recovery.

Mrs. John H. Caldwell, who has been ill for some time, was taken to Twin Falls Thursday, entering the hospital, where she underwent a minor operation the same day. Her condition is reported as satisfactory at the

Bickel Prepares For Roundup Work
 Mrs. Albert Pulster of Durley with her committee, Mrs. Z. Henson, Mrs. E. H. Boden, Mrs. J. C. Harner, Mrs. C. M. Ingber and Mrs. Ethel Gray, are reading out notices to the parents of children who will enter school this fall advising them to register their children preparatory to the physical examination conducted by the Parent-Teacher association existing in the Twin Falls county health office on Tuesday, May 5 to 8. Should any parents fail to register more than a thousand many desiring to operate between Durley and Oden. Nine groups have been announced over the year's registration. It was found that in some localities 25

 SO IS THE PRICE

TO CONSIDER APPLICATIONS
BOISE, April 13 (UP)—Application for the high school lines to operate in southeastern Idaho will be considered at the commission. Applicants: Clark transfer company, which seeks the permission to operate a freight line between Tocatello and Harlow, Idaho; and the National Congress of Parents and Teachers started conducting their summer round-up campaign, urging children to enter school in better health. The parents should cooperate in this project.

TOURISTS AND A HAREM

IT IS MORE, than a little bit interesting to read that the former harem of the sultan of Turkey in Constantinople is being thrown open for the inspection of tourists. To be sure, the inmates have long since been removed; but the building itself, with its maze of corridors, its luxurious chambers and its forbidden courtyards, is to give up all of its secrets for the eyes of the curious.

There was a time—a very long time, several centuries in extent—when an outsider who dared to go within those walls could be sure of gaining for himself a speedy and furlous death. No spot in all of Turkey was more jealously guarded. The terrible Turk had not yet become the sick man of Europe; he was a power in the world, and he ruled his own land with a fierce vigilance.

It is not hard to imagine that a Turkish sultan of a generation ago, told that the infidel travellers would one day stroll through his seraglio at will to see what the place was like, would have died of sheer indignation. But the years bring strange changes to the world, and the tourist, nowadays is a more important personage than the sultan.

Indeed, the tourist is going everywhere; and while some people do not like him very much, except for the money he scatters, it might be said that the arrival of the tourist on any historic spot is in the nature of an announcement that the world is at peace and that the old ways have given place to new ones.

The tourist goes to Constantinople and visits the sultan's harem; and by that act he informs the world that a cruel and barbaric tribe of rulers has vanished from the earth, leaving only empty buildings as symbols of departed power.

He goes to Europe and strolls about the battlefields of Verdun, Ypres and Citefn des Dames; and the world once more gets the useful reminder that the most dreadful war in history is 11 years in the background, with the green grass of peace growing on its shell-plowed battlefields.

He stands on a steamer's deck and sails through the Panama canal; and his mere presence there testifies to the defeat of yellow fever, and the bringing of health to what was once the most terrible pesthole in the new world.

So it goes. The tourist, now about to gaze inquisitively at the scene of the unpeepable Turk's private infirmary, is a sign and a portent. When he comes on the scene, camera in hand and guide book protruding from a coat pocket, you may take it for granted that the world has taken another step forward.

THE TIME TO ADVERTISE

BUSINESS HOUSES should not only maintain their appropriations for advertising and research during the present depression, but should expand them prudently "as prospects warrant," declares Dr. Julius Klein, assistant secretary of commerce, in the current issue of the J. Walter Thompson Company's Bulletin.

"Advertising is inherently constructive, acting as a powerful stimulus to every branch of activity," says Dr. Klein. "It not only keeps goods moving—it inspires confidence. "Good will is a priceless business attribute, but it is one that may sway and droop under the veering winds of public opinion. Advertising can keep it sturdy and upstanding."

There is a bit of advice worth the attention of every businessman. Prosperity will only return when all hands work at it. Advertising is one of the best tools available.

The Evening Times offers advertisers of this vicinity a medium of outstanding value. Housewives, who do nearly all the buying, read the evening paper carefully at an hour when they have the leisure and feel the inclination to read. Regular Times advertisers get results.

TRAVELLING BY AIR

IT IS BECOMING more evident every day that our airways are going to take an increasingly large slice of the passenger transport business as time goes on.

The National Air Transport announces tentative schedules for a 140-mile-an-hour service between Chicago and New York, with big passenger planes covering the 730 miles in six hours and 20 minutes and making two stops en route. New legislation now pending before congress, providing that air mail carriers be paid for their cargoes by space instead of weight, and that air mail be placed on the planes of all responsible passenger lines where time can be saved, is expected to aid the passenger transport development. Colonel Paul Henderson, vice-president of National Air Transport, says:

"The United States has left all civilized countries behind in mail development and this plan will insure its continued leadership."

The blend that revolutionized smoking

THE INCOMPARABLE BLEND of Camel Cigarettes is probably the most important discovery in the history of smoking. It made cigarette smoking popular. Camel changed the smoking habits of the nation and has given pleasure to more millions of people than any other cigarette.

This exclusive blend assures in Camel a smoothness, a mildness and a mellow fragrance that cannot be imitated. It preserves all the excellent qualities of the choice tobaccos of which Camels are made and melds them all together into a delightful harmony of smoke pleasure. It sets Camel apart as a cigarette of distinctive character and provides for Camel smokers the very highest form of smoking luxury.

CAMELS

BUILDERS OF THE TWIN FALLS COMMUNITY

Painted Furniture Grows Steadily in Public Favor

The popularity of painted furniture, growing constantly each year, has already influenced Twin Falls home-makers and each spring finds more women assigning the color of their living room decorations and their homes with bits of painted furniture—bricks, vases, and in many cases, entire suitcases, bookshelves and chairs for the breakfast room, according to W. A. Moon of Moon's Paint and Furniture store.

Influenced primarily by the color fashions now prevailing in nature in the spring, the amateur painter cannot go very far afield in color selections. Greens, blues, oranges, yellows, grays, and browns can be employed without restraint, as does nature. Especially adapted to painting or breakfast room furnishings are the green and orange and green and ivory combinations which have enjoyed a prolonged vogue.

In the smaller pieces of furniture, such as book stands, medicine chests and the modern variety of those things our grandmothers called "washbasin wheres" on were exposed to view their numerous drawers which varied from costly veneer to well-nigh worthless corals, Oriental or color combinations may be faulted to a greater degree, and may even be a bit drastic.

Time was when the eating family, books in hand, would crowd around the library table,

Plants Do No Harm In Sleeping Rooms

The belief that plants should be removed from sleeping rooms at night is entirely without foundation, according to Dr. A. F. Wood, director of scientific work in the United States department of agriculture. In many hospitals it is a regular practice to remove flowers and plants from the rooms at night, because it is thought that they are in some way injurious to the patients.

Instead of plants being harmful, they are beneficial in Doctor Woods. During the day they give off oxygen and moisture and take up carbon dioxide. At night these processes slow down and small amounts of carbon dioxide are given off. But a whole greenhouse full of plants would not give off enough carbon dioxide to noticeably affect the composition of the air.

The only occasion for removing plants and flowers from sleeping rooms is in cases of poisonous plants and in cases of people who suffer from hay fever. In these cases, explains Doctor Woods, plants and flowers should not be in the room at any time.

Rehearsing "Shipman," the new production being staged at the Idaho Theatre.

leading candidates for a first-string berth next fall.

The Webfoot forward will easily will average 200 pounds. Spears has the following candidates from which to pick his first regular: Joe Jansen, 212; George Christensen, 204; season, 220; Marlon Kall, 146; (understudy), 215; Carson Madsen, 212; Harry Bates, 210; Auster Colbert, Sherwood Hillman and Bill Morgan, 205 each; Irv Schultz, 182; Edie, 182; Jack Hooper, 175; Henry Healy, 162; Edie, 162; Waddy Archer, 115, and Jack Kelley, 125.

Peck's list of the candidates for "Doc" should find a forward wall that will be as heavy as any in the West Conference race next fall. The backfield, although only one weighs over 200 pounds will still be solid.

Included in the veterans who will form the backfield are Al Franzen, 185; half John Lundberg, 170 and Johnny Kitzmiller, 170 and Johnny Lundahl, 155, (quarter), 154; center, 150, and full-back, 150, 140.

With this group of linemen the Oregon eleven next fall will have a comparatively early schedule, which includes the playing of a night game with Drake in Chicago, October 3.

Dr. Sneers will whip the Webfoot's spring practice by a number of games. He will try to win in plan the fundamentals of his style of football in the players.

School Repairs Are Now Planned

Bids for a new roof on the Hickory school and a new roof over the auditorium on the Washington school were called for at a meeting of the Twin Falls school board last night Monday night. Those desiring to bid must submit plans, specifications and estimates by 10 o'clock by the next school day.

Seven rooms of the high school, Lincoln and Hickel schools will be improved this summer and concrete sidewalks laid on each of the Hickel and outside window sash on the Lincoln school will be painted. High school will be painted. High school will be painted.

The junior high school playground will also be sanded this summer. An offer of pay and five per cent interest for the \$20,000 gymnasium bid the matter was called pending bids on the gymnasium plans.

CHIEF OF POLICE THROWS FEAR IN GANGS IN PARIS

By STEWART BROWN
United Press Staff Correspondent
PARIS, (UP)—Jean Chappelle, general and stout statured Chief of Police who sits like a mighty dictator upon the police force of Paris, claims with pride that Paris is a city without crime.

"Paris has its crimes, he admits, but they are crimes committed by individuals and not by organized groups. The methods used here are generally the same as in other cities, machine guns, and bomb methods reported in the United States.

Marcellin, the Chicago of France, has a high record for murder and robbery but it is all done on an unorganized, "high jacking" is a novelty in France, although occasionally a gang of six or a dozen men will agree to divide their spoils in return for certain "bookings" tickets on specified territories.

The American of Paris tremble before Jean Chappelle's blunt policeman. French policemen are sweet with the halos that touch with the men and they are allowed considerable liberty in dealing with suspects. An "arrêté" in Paris is recruited from 410 provinces so they will know no friends to please or groups to bow before when they patrol the city.

This system makes the average Paris policeman a bitter enemy of the criminal and despite his low salary he is one of the happiest persons in France to bribe. They are treated like soldiers and the criminal is considered their enemy. That is one reason, Chappelle explains, why most of the crimes committed in France are extremely solved.

"The number of crimes has fallen a steady decrease in Paris and in the provinces but so far the police are unable to trade growth of gangsterism in France. As long as they murder a person for 50 cents but he would never dare to offer a

SUICIDES BODY GOES TO IOWA

The body of Fred Ruze, 61 year old Iowan farmer who early Monday committed suicide by taking poison, left on this morning's train for Des Moines, where funeral services will be held. Mr. and Mrs. Ruze lived in Keokuk before moving to Idaho about two years ago. Mr. Ruze had been engaged in the grain commission business there. Mrs. Ruze is accompanying the body.

An autopsy was performed on the body last evening to determine the kind of poison causing Mr. Ruze's death. Analysis of the internal organs is now in progress but a definite knowledge of the kind of poison will not be available for two or three days. Several kinds of rat poison were found on the Ruze premises and it is believed he used one of them.

Leaders Discuss Work of Scouting At Meeting Today

Committee members and leaders of boy scout work in the Twin Falls Council area of Boy Scouts of America met at the Chamber of Commerce to hear and confer with Walter Hayes, associate regional scout executive from Spokane. Much business was shown at the meeting by scout work and program being presented.

Mr. Hayes and E. Russell Scott, area scout executive, left late this afternoon for a visit with scout leaders at Jerome, Wendell and Gooding. They will attend a meeting of the board meeting at Shoshone tonight.

Mr. Scott and several other Twin Falls scouts will be attending a morning for Portland where they will attend a course of instruction at Camp Meridian. They will return April 22.

OREGON GRIDIRON SQUAD IS BEEFY

By WILLIAM TURNBOW
United Press Staff Correspondent
SEASIDE, Ore., Apr. 15 (UP)—Dr. Clarence W. Spears, new University of Oregon football coach, says he has a beefy team that will average 200 pounds to place in the Coast Conference.

"Doc" Spears has been sending the Webfoot grid aspirants through "spring" practice during the last few weeks and it appears that eleven will not lack weight.

Joe Jansen, a transfer from West Point, tops the candidates in weight. He tips the scales at 215 pounds and will be one of unchanged today.

National Guard Gets Inspection

Fifty men out of a total enrollment of 63 turned out for federal inspection of Company E, Twin Falls unit of the Idaho National Guard, last evening. The inspection was conducted by Lieutenant C. B. Heath, instructor of the Twin Falls company. It is commanded by Captain H. E. Leitch. Accompanying the inspecting officer was Colonel F. C. Hummel, commander of the Idaho National Guard Engineers. Lieutenant Colonel H. G. Lantierbach of Hansen, Major J. L. Holgren of Twin Falls and Captain H. H. Fritz, Twin Falls member of the state staff, also stood the annual inspection.

The unit will be inspected tonight and the Kirby's medical unit will be inspected Wednesday. The company will be inspected to the Twin Falls quartermaster last night that outdoor square practice would start April 27.
