OPERETTA GIVEN FOR JUNIOR HIGH

Alternate cast of the junior high school opera, "The Toreadors," repeated last night at 10 p. m. today for junior high school pupils.

The same group will repeat for adult audiences at 8 p. m. tomorrow.

Connelly, dance and the singing of lullaby songs pleased the school audience this afternoon.

Erwin Wile, manager.

The two tramps disguised as the renowned bull fighters, Senora Whackee and Swallow in the persons of Bob Jones and Arthur Bulbert delighted the audience with their voracious appetites and aside remarks.

Erwin Bagley as Senor Dolorio, the proud father trying to marry his twin daughters to the bull fighters, was convincingly portrayed.

The best of his first performance in the role of the father and the clearness of the girls' voices was noted for Pat Graves as Benita, Norma Dickay as Juanita, Olive Wells as Dolores and Julia Williams as Maria.

The true lovers of the twins and eventual victims in the romance were Clarence Dudley as Pablo and Charles Crana as Juan.

175 in chorus.

The leading roles were ably supported by the 175 chorus voices and the music was created by those which were performed against the setting of a Spanish garden.

Hilma Sweet repeated the excellent performance in the role of the twin girls. She will appear also in tomorrow evening's version.

Schools certain to compete are Burley, Fall, Twin Falls and Kimberly. Rupert and Castelfield also are expected to enter.

Judges will be District Judge J. W. Porter, and Frank L. Stephan and W. Orr Chapman, prominent local attorneys.

Mr. Emerson will preside and George Anthony, fifth district commander, will award the prizes.

Winners in the oratorical and essay events will receive \$7.50; second place in each will be given \$5, and third place \$2.50.

Admission is free and the public is invited to attend, Mr. Emerson stated.

District victors will qualify for the state contest, probably April 15. Girls have not yet been selected.

Topic for the competition is the constitution of the United States and problems that face the country today.

Complete travel information will be provided for association members and other tourists. Maps and the AAA service will be available.

The association office will offer a full line of motor car insurance, and adjustments on collision claims will be made by Milner from the office here.

Headquarters have been set up in the Union Motor building temporarily because that concern, Burley, is the district manager.

He plans to add additional help and secure a separate location when the work commences.

The office being in the Union Motor's AAA sign will be moved out of the city.

Worked in California.

Milner, whose wife is a native of Twin Falls, has been affiliated with the Automobile Club of Southern California for several years.

He left that group to come to Twin Falls about Jan. 1 to establish his residence here.

Italy Believed Best Prepared to Face War

IL DUCE ABLE TO MOBILIZE FORCES FOR EARLY BLOW

(Editor's note: Italy probably has the most able war machine in Europe, Stuart Brown, manager of the Home Bureau of the United States today in another dispatch on the armed strength of the Fascist powers. Having gone through the Ethiopian war, Mussolini could make his army, navy and air force in 12 hours.)

By STEWART BROWN
United Press Staff Correspondent.
(Copyright, 1938, United Press.)

ROME, March 24 (UP)—If war should be declared this afternoon, Premier Mussolini would have 2,000,000 men on the march by Sunday night and would darken the skies of Europe with 3,000 combat planes. Italy may not be the strongest military power in Europe, but she undoubtedly is the most fast. She had a dress rehearsal for the next war when she invaded Ethiopia. She would try to swing into the offensive quickly and deal a knockout blow before slower nations could mobilize.

Every Italian knows what is expected of him when the bugles blow. Every able-bodied man employed on public transportation systems would go to the colors and women would support them. Army reserves would stream out of barber shops, factories and stores. Women virtually would take over the industrial and commercial life of Italy. With incredible speed, Il Duce would put 7,000,000 men under arms, and 450,000 tons of fighting craft would be steaming into the Mediterranean on errands of destruction.

Fast Transportation
Tourists comment that Italy is filled with good highways and that railroads, many of which have four tracks, run on time. Those improvements were not made solely to accommodate tourists; troops can move along the highways and railroads just as fast as travelers. Italy thinks, plans and builds in terms of war. Any person who erects an office building or a dwelling is required to include in his plans an underground shelter for protection in event of air raids. The people now are eating bread that contains from 10 to 20 per cent corn or rice in preparation for the day when the wheat supply may be reduced by an enemy blockade.

Italians, disciplined by 15 years of Fascism, make these sacrifices willingly just as women dropped their gold wedding rings into the

NEW MEMBERS FOR HONORARY

Initiation rites in Beta Sigma, national scholastic honorary for high school students, was to be conducted this afternoon. Presiding at the ritual and candle lighting ceremony was Theron Knight, president. All those receiving membership signed the book of the secretary and will be issued membership cards. Dorothy Margaret Smith is secretary for the group.

Gerald Wallace, sponsor, stated that at least 50 were expected to participate in the rites. Membership is open to those students making the semester honor roll.

nation's war chest when Mussolini began his Ethiopian adventure.

Italy is more than a "boot in the Mediterranean" now; she is an empire, and to protect that empire she is expanding her armed forces to challenge Britain's dominance along the water route that Italians call "mare nostrum"—our sea. Apparently most of her reliance will be placed on airplanes and submarines.

Large Air Force
Conservative observers say that Italy now has 5,000 planes, 2,000 of which are transports and auxiliary ships. The air ministry has 5,300 planes in active service and 9,000 more trained fliers could be called out on a day's notice. By 1941, according to trustworthy information, Mussolini expects to have 5,000 combat planes in service, most of them high-speed, long-range bombers.

Particular attention is being paid to submarines, apparently on the theory that they are formidable weapons in the calm Mediterranean.

The nation now has 600,000 regular troops under arms in Italy and the colonies. In addition, there are 200,000 armed militiamen available. Back of this is a vast trained reserve of 5,000,000 and by calling up fresh classes of recruits, Mussolini could add another 1,000,000 to his legions. Italians under Fascism begin marching and drilling as early as eight years of age and no youth ever gets entirely away from the martial spirit.

BURLEY WOMAN FINED
BURLEY, March 24 (Special)—Ruth Anderson was fined \$50 in the probate court Friday after pleading guilty to a charge of disturbing the peace. The fine was later suspended for a period of one year pending good behavior.

CHAPTER VIII. The manly labored young woman who had talked with Papa Anton was in the dressing room when Constance went down to change into her last costume. One of the other girls—the red-haired one with the sultry eyes—lashed and sulky mouth—was saying to her, "How should I know? We thought you'd sent her on a stand-in for Lucille."

When it was over, and Constance had taken off her wedding finery, she found Miss O'Dare waiting for her in the little office of the dressing room. "Before you decide to go into this, Miss Maidwell," she said, "I want you to understand exactly what you are getting into. The wily department of an establishment like ours is no place for people with tender sensibilities. We are taxed to a pretty high tension; and people who are hurried and worried seldom have time or inclination to consider other people's feelings very tenderly."

MEMORIES LINGER ON. Memories of prohibition still haunt the subconscious minds of some Washingtonians. At a recent banquet of the District of Columbia Barbers' association, at which Supreme Court Justice Stanley Reed was guest of honor, the martini cocktails were casually hidden by individuals bowls of flowers which appeared before each person at the head table.

The lamps have been used successfully in hospitals, banks, drug stores, restaurants, bakeries, and manufacturing plants—and also in dairies, hog pens, and hen houses. One of the lamps cut the death rate for chest operations in one hospital, for example, from 5.5 per cent to 2.9.

SLAP FOR BOISE—AND FOR LOCALS, TOO! Dear Pot Shots: The opinion of a Boise girl of us Twin Falls fellows is held in very little esteem by the dandered Mrs. Boise, after all, it is notoriously a thick linn composed of varying degrees of tone and ray-shades...

"That order at your store was a large one, Miss O'Dare—large enough to swallow up my whole salary in a week," she said. "I don't turn up. I was just trying to realize that that job was definitely out when Mr. Anton took me back to my old model. Well—well, I thought, 'Why not, if I can get away with it?'"

ABOUT THE CAPITAL. A guard at one of the side entrances to the capitol, recently found a young man in a suit and glasses who made a big fuss over a hat he had been wearing. He was a senator who made a big fuss over a hat he had been wearing.

Jerome Child's Rites Arranged. JEROME, March 24 (Special).—Funeral services will be held Saturday at 2:30 p. m. at the Methodist church for Kenneth Lee Fulcoimer, four-year-old son of Mr. and Mrs. H. R. Fulcoimer. Rev. Albert E. Martin will officiate.

The greatest boon, of course, will be the invention should do to such highly communicable diseases as the common cold. By use of the lamps in public eating establishments, street cars, meeting halls, and other places where large numbers of people are thrown together, the spread of such diseases should be immeasurably reduced.

FEW LADY BIG SHOTS. Kathryn Kelly, wife of Machine Gun Kelly, and according to some theories the brains of the Druggist kidnaping gang, unquestionably is the star boarder among Bennett's lambs. But Kathryn comes far from being a feminine Al Capone, even though she is a permanent guest.

F. F. A. Discusses Picture, Letters. Regular business meeting of the Twin Falls chapter of the Field Fertilizer of America club was held Tuesday evening at the home of Mrs. J. F. A. Discussed pictures and letters.

Another aspect is the economic angle. The lamps can be manufactured at comparatively low cost. If they turn out to be efficient and practical as the early experiments indicate they will, a new industry will come into being, for every person who can possibly afford one of the lamps will want to own one.

Strife in Sweden. Importance of maintaining an abundance of this plant food in the soil is also seen in the analyses of LEGUME CROPS, such as peas, vetches, and alfalfa, which remove about as much potash as nitrogen and more than three times as much as phosphoric acid. Many soils are being rapidly depleted of available potash by years of intensive cropping. Before serious deficiencies appear, plan a fertilizer program which includes enough of this essential plant food to maintain the fine market quality and satisfactory crop yields upon which profits depend.
