

JIMMY ROOSEVELT DENIES COERCION IN INSURANCE SALES

TERMS CHARGES OF 'BIG MONEY' ENTIRELY FALSE

WASHINGTON, D. C., Aug. 12 (U.P.)—James Roosevelt, eldest son and secretary of President Roosevelt, repelled today with charges of "insulting a cowardly lie" to recent intimations that he had obtained large insurance premiums as a result of his connection with the Roosevelt administration.

In an interview granted a Collier's magazine writer and published in the current issue, young Roosevelt declared that he had stood on his own feet as an insurance broker and solicitor. Since becoming a secretary to the President, he said, he had never solicited nor attempted to solicit insurance, and he had not accepted a single dollar of insurance from anyone, anywhere, anywhere.

"Anything to the contrary," he added, "is a miserable lie."

Reply to Post Story

The interview was a reply to a recent Saturday Evening Post article, "Jimmy's Got It," written by Alva Johnston, who estimated Jimmy's earnings from the insurance business at somewhere between \$200,000 and \$2,000,000 a year. That article had intimated that Roosevelt's insurance firm had obtained premiums from his relationship to the President and his official position at the White House.

The replying Collier's article reproduced photostatic copies of James Roosevelt's income tax returns, showing that from 1933 to 1937, inclusive, his income was:

1933—\$21,714.31,
1934—\$49,167.27,
1935—\$33,553.77,
1936—\$44,668.01,
1937—\$23,824.33.

This, Roosevelt said, was not all derived from the insurance business. Part of it was derived from the sale of writings, and income from a trust fund.

Insurance share

He said that since being employed as secretary to his President-father his \$10,000 government salary had been augmented by a share of the earnings of the insurance firm of Roosevelt and Sargent. There remained on the books of that firm, when he became White House secretary, he said, business that would continue to bring in yearly income.

"I had helped place that business on the books," he said. "So John Sargent and I agreed that I should resign as an officer and director of the corporation and that thereafter the income he and I had enjoyed as partners and bonuses should be paid to us as dividends and we always split the net profit—carry nothing over."

Sounded fine

"That sounded fine until our lawyer showed us that the laws of Massachusetts consider dividends of any kind to be unearned income and taxed such income at a far higher rate than straight salary."

"My lawyer assured me that it was perfectly proper to give my wife irrevocably—irrevocably, mind you—6 per cent of the net profit—anything like that—to give her irrevocably one half of my one-half interest in the Roosevelt and Sargent corporation, which would reduce my state tax by a very small amount, my federal tax too. . . . It was a damned small saving."

Offers battle

He says he did not want to be "naive" or "to seem fably modest."

"Perhaps it's so that my name—the prestige of my father—helped

GENERAL-FUND SPENDING BY SCHOOL DISTRICT AT \$203,391

Exclusive of major increases, which are not regular annual expenditures, the 1937-38 general fund report for the Twin Falls independent school district "was not much larger than last year," according to a 38-page annual report drawn up by Supt. Homer M. Davis.

The total general fund expenditures for the past school year ending March 31, 1938, were more than \$3,000 less than for 1936-37 but was higher than the \$169,355.29 general fund spending for 1935-36.

Bonds Bond Receipts

School receipts for all funds in 1937-38 amounted to \$592,849.07, but \$350,000 of that total came from the building bonds voted overwhelmingly by the taxpayers. Exclusive of that amount, the funds taken in for school use were not as high as in 1936-37, when receipts were \$255,031.72, or in 1935-36, when the total was \$233,401.83.

The budget for 1938-39 is still in formative stages and will be submitted soon by Mr. Davis to the school board.

Among the expenses for the past year which were not ordinary outlays, and which therefore added items that will not be in the budget every year, were \$2,500 to relieve principals of teaching duties in order to permit full time for administration and supervision; \$3,000 for the grant school textbooks to inaugurate the district-owned book

FISH PLANT FILM EXHIBITED HERE

The United States forest service today had manifested interest in films which were shown here for the first time yesterday and which tell the story of the recent planting of muscogel trout from an airplane as it scooped over Clear Lakes near Buhl on a recent date.

The motion pictures, taken by A. D. McMahon, Jerome sportsman, were shown to a select group at the Kingsbury drug store in Twin Falls yesterday afternoon.

Pictures clearly show the action through which Lionel A. Dean, local pilot, and O. A. Keker of the Idaho Evening Times went at the time of the plant. Dean piloted the plane in the tests, first in the United States, and Keker threw the fish over, using a small thumb of the bag as a target.

The 300 fish planted in this manner, from heights of 100 and 200 feet, all lived. This fact was established by game officials and others in books who were within a few feet of the fish as they struck the water.

The plant was sponsored by the Idaho Frontier club, under the direction of Jack Tinney, president, and Jess O. Eastman, manager, both of Buhl.

Among those viewing the films

yesterday were Charles Bullis, Frontier club sportsman; Burton Perine, manager of the Blue Lakes private fishing grounds; Grever Davis, district game warden; C. C. Kingsbury, L. A. Beidel, Mr. McMahon and Mac Johnson.

During 1937 the number of airplanes manufactured in the U. S. increased 25 per cent over the previous year.

READ THIS LADY'S EXPERIENCE!
TO WHOM IT MAY CONCERN:
Even in my far-away home in Sandpoint, Idaho, I have heard of the marvelous work which was being done with Chan & Wing Chinese Herbs. But I was not until I came to Twin Falls to visit my sister that I had a chance to give them a much needed personal trial.

For over three years I have suffered badly from stomach trouble. It wasn't just an occasional ache but it seemed that each little bit of the day found me in pain. After every meal I felt upset, badly indigestion. And my stomach would bloat and soon filling up constantly. My head ached about every waking hour and it felt like there was a hard, hot brick under my stomach. All these things contributed to the pain from which I could get no relief.

But on coming to Twin Falls, I remembered what I had read of Chan & Wing's work and decided to give them a trial. It took just four weeks with their marvelous herbs to make me feel right as new. And I feel no more upset and indigestion that ever. I should know what can be accomplished with these Chinese herbs of Chan & Wing's.

Very truly yours,
MRS. MOLLIE NELSON,
Rt. 2, Sandpoint, Idaho

Japanese Airplanes Open Huge Offensive on Hankow

BOMBERS BRING DEATH TOLL TO 400 IN 2 DAYS

HANKOW, Aug. 12 (Special)—Japanese airplanes, heralding what was expected to be the biggest offensive of the year-old Chinese war, bombed Hankow heavily today.

First estimates of the casualties indicated they were large, bringing the total in two days of bombings to approximately 400 killed and 800 wounded.

Forty-five planes rained scores of bombs on all sections of the city. The northern section from which thousands of refugees are fleeing is the face of an anticipated Japanese advance on the tri-city area of Hankow, Wuchang and Hanyang was hit hardest.

On both sides of the Yangtze river, flowing out northwestward between Hankow and Wuchang, blocks of river front buildings and crowded huts were destroyed.

10 Killed

At the Kiangnan railroad station, on the northern tip of Hankow proper, the raiders dropped many bombs. Across the river, at Wuchang, Chinese police estimated that 150 persons were killed and at least 200 injured.

The bombs which fell on the bank of the Yangtze came dangerously close to foreign property, including the French concession, the Italian consulate and the Chinese government took this week to fortify and defend in case of street fighting with invading Japanese.

From a distance it appeared that the bombs were falling into the concession, but United Press investigators ascertained that they were intended for the Kiangnan railroad station, a short distance to the north.

Anti-Aircraft Units

Chinese anti-aircraft units along the Yangtze fired round after round at the raiders, but to no avail.

Incendiary bombs set fire to a number of gasoline tanks, some of them believed to have been American-owned, either by the Standard Oil company of New York, the Texas company, or the Shell Petroleum company.

The barracks housing Russian pilots flying in the service of the Chinese air force also came within range of falling bombs.

Chinese officials believed that today's bombing heralded the approach of a new Japanese offensive in the upper Yangtze valley against Hankow, Wuchang and Hanyang—known as the Wuhan district, the military heart of China.

Offensive Continued

(A Japanese army spokesman in Shanghai confirmed that the high command was preparing a major offensive against Hankow, probably to start Monday—Ed.)

The Chinese also were massing for battle. It was expected that the campaign might well be the largest of any attempted by the Japanese since the start of the war.

Before them were about 1,000,000 Chinese fighters, many well-trained, while thousands had been receiving urgent training in the last six months. Hundreds of propagandists were going through the countryside, urging the populace to rise up and fight for their lives and country.

IDAHO LIVESTOCK AT HIGH LEVELS

BOISE, Aug. 12 (Special)—Idaho ranges and range livestock have maintained their unusually good condition.

On Aug. 1, range condition were reported by stockmen to be 98 per cent of normal, a drop of two points from a month ago but 14 per cent above the 10-year (1923-37) average.

The first half of July was moderately cool with considerable precipitation. While the last half of the month saw a protracted period of dry hot weather in northern Idaho which lowered the condition of pastures and ranges in that area very materially, other parts of the state received a greater share of rainfall than the 10-year (1923-37) average. The moisture situation and prospects for fall grazing are better than for several years over most of the state.

Cattle and sheep both are in excellent shape. Cattle condition on Aug. 1 was reported at 98 per cent of normal, one per cent higher than last month and highest on record for this period of the year.

Condition of the range was very good and early lambs have been going to market in good finish at weights above average.

Western ranges generally have a good supply of feed, with the highest condition since 1932. There is fair to good range feed in the Great Plains section that had poor feed a year ago. Livestock is in very good flesh, according to the monthly livestock and range report issued by the bureau of agricultural economics.

Work Progresses On Road Program

GOODING, Aug. 12 (Special)—Seal coating several blocks of city streets in south Gooding got underway here Wednesday.

A crew working with seal coating equipment.

Troy Cox was in charge of the contract. The work is part of a city program to seal coat, oil and repair several miles of city residence streets.

Curbing and ditching is well under way in the WPA project here, according to supervisor Troy Cox. Property owners who are interested in obtaining curbing or ditching are requested to contact E. L. Sillison at the city offices.

The final surface of gravel to be followed in about two weeks with oil paving, was being applied to the recently completed stretch of highway on the Bliss-Gooding route.

The Hoops Construction company moved into this vicinity Wednesday to begin work on the last layer of gravel. An oiling crew will follow in about two weeks to surface the stretch beginning at the Main bridge on the Bliss highway and ending at the college corner on the Wendell-Gooding highway.

WHEAT HARVEST MOVES SPEEDILY

Harvesting of wheat and cutting of the second crop of alfalfa in Twin Falls county are both progressing rapidly with both crops being reported as good. The United States department of agriculture weekly summary of weather and crop conditions shows today.

Generally over the state, the report shows, the week was favorable for harvesting, threshing and combining of grains and these activities progressed without interruption. Grains are in generally good condition over the state and yields are also good. Pastures and ranges are getting dry but are holding up well in most areas and are furnishing ample feed. Good rains would be beneficial over the state and are needed rather badly in portions of the north, according to the report.

In Lincoln county potatoes, truck crops and meadows are fair. Beets are good to fair and other crops are mostly good. Most peas are already threshed.

In Gooding county the week was favorable for most crops with some spring wheat and barley being cut. Grains are being cut in Cassia county and the second cutting of alfalfa is mostly all stacked.

In Camas county spring wheat is progressing rapidly and winter wheat is practically ready for harvest.

The value of a working elephant has dropped from \$7000 to around \$150.
