REBUFFS ACT AS 3RD TERM CHALLENGE TO ROOSEVELT

HOUSE PASSAGE OF RELIEF BILL HURT NEW DEAL

By LYLE C. WILSON
WASHINGTON, June 19 (AP)—Talk of a third term for President Roosevelt boomed today as the administration faced the hard facts of other available 100 per cent New Dealers shrinking to nothing.

Rebuffs from the capitol were more likely to persuade Mr. Roosevelt to run again than to surrender to the conservative wing of the party which has combined with Republicans in congress to vote the New Deal down.

New Deal Hit
The house hit the administration where it hurt last week when it passed a relief bill to curtail presidential authority and abandon some pet New Deal undertakings.

Mr. Roosevelt will have to acknowledge personal defeat when the house passes the 1939 revenue act to eliminate so-called "business irritant" taxes. The bill has the blessing of the President's official fiscal advisers. But it sacrifices the theory of penalty taxes on undistributed corporate surplus funds and, therefore, is offensive to the President and the inner circle of the New Deal.

In the office is a senate battle over neutrality in which the odds are even or slightly against the administration in its effort to obtain more discretion in making optional resources available to belligerents.

FTB Challenge
All these factors—and the partial reverse suffered by the administration in last November's general election—mean Mr. Roosevelt to battle and belief is spreading that he will run again next year. A major factor in this belief is the absolute dearth of an acceptable substitute New Deal candidate whom Mr. Roosevelt could nominate and support with confidence that his policies would be continued.

Nomination of Vice-President John N. Garner would be a triumph of the anti-New Deal Democrats who have rallied around him as the symbol of opposition to major Roosevelt policies. Secretary of State Cordell Hull is being discussed here as the most likely compromise candidate, a man who would have the confidence of traditional party men and yet near enough to the Roosevelt administration to expect a substantial New Deal support.

Farley in Race
Postmaster General James A. Farley is in the running and if he misses first place on the ticket probably would be sought as vice presidential running mate by any Democrat nominated other than the President, himself.

But neither Hull nor Farley would precisely fit the pattern of the man Mr. Roosevelt would like to see in the White House because neither is a part of the New Deal proper. Farley has been the party-organization man, far removed from vital spending, labor and business policies, and Hull has been engrossed in foreign affairs and his reciprocal trade policies.

Elimination
The process of elimination seems always to lead to Roosevelt-for-1940 unless the President is willing to relinquish party control to more conservative men. It has been argued

WASHINGTON, June 19.—Opening of a seasonal anti-trust drive in the building industry awaits only appropriation by congress of the needed funds.

Now pending is a bill which would give the anti-trust division of the department of justice an extra \$500,000. If approved, it would enable the bureau to break a whole series of restraints of trade in the building industry, which have long languished.

Preliminary studies are in progress already. But the anti-trust division has just five men to spare for the task. It wants the extra \$500,000 men on it—to move into a dozen or so more of cities simultaneously and open up the industry to competition.

Opponents of the bill are afraid to bottom. Among such practices, he declares, are the following:

Prices of materials are fixed by the manufacturer. In some cases holders of patents on building materials allegedly control sales methods, and even limit the quantities which may be sold, among those who handle their products.

Basing point and some price systems are common in the building materials industry. In certain industries, a definite share of the business is allotted to different companies, and each is required to supply to any firm which tries to get more than its share by cutting prices.

SCANDAL If it is enabled to do this, two results are anticipated:

First, the "wires" will literally hundreds of indictments.

Second, building prices may be broken all along the line — manufacturers may be forced, as so often, out of this, the justice department confidently believes, there would come the long-awaited breaking of the log jam in the building industry.

Specifically, Turning Around Contractors If the justice department can force the contractors that refuse to abide by these mark-ups. In some cases, distributors boycott retailers who sell appliances direct to the consumer. They are instances where the manufacturer has to pay a distributor a commission when he — the manufacturer — sells an appliance direct to a consumer. In some cases, the distributor had nothing whatever to do with the sale.

IT'S A PRIVILEGE TO LIVE IN IDAHO

Our Mines Produce Much of the World's SILVER, GOLD, LEAD AND COPPER!

and....
Our ELECTRICITY is 33% CHEAPER than the National Average

Idaho is rich in minerals. From the colorful old placer mining days of the Boise Basin and Silver City to the widely extended mining operations of the present day, Idaho's mining industry has been a substantial contributor to the wealth of this state. It leads America in production of silver, stands close to the top in production of lead, gold and copper. Idaho enjoys another important advantage. The home, domestic and residential rate paid by customers of the Idaho Power Company is ONE-THIRD CHEAPER than the average national home and home rate. And that the people of southern Idaho appreciate this advantage is shown by the wide use of electricity on farms and in homes. People of southern Idaho use twice as much electric service as the national average. It is a privilege to live in Idaho—WHERE ELECTRIC RATES ARE CHEAP.

Congress Heading Toward Record Appropriation of 10 Billions

DEFICIT FOR '40 EXPECTED TO BE NEAR 4 BILLION

WASHINGTON, June 19 (U.P.)—Despite efforts of economy advocates in the house, congress was headed today toward a \$10,000,000,000 appropriation record this session.

On the basis of appropriations made and pending, the deficit for 1940, barring unexpected savings and an increase in tax yields, will approximate \$4,000,000,000.

Appropriations last year totaled \$11,361,815,533. Indications today are that congress would reach \$10,000,000,000 or more in its spending before adjourning. That would be somewhat less than the all-time high appropriation, made during the war in 1919, when congress voted more than \$17,000,000,000 at one session.

Appropriations voted so far by the house total \$8,535,352,716, of which \$2,580,000,000 (\$2) was for relief, including \$235,000,000 deficiency funds allowed for the war effort, which will be carried over to carry relief through the current year.

Still awaiting approval of the house is a \$292,695,347 emergency fund for the war effort, which, if approved, would raise the appropriations to \$8,828,048,063. A third deficiency bill also is due to be reported toward the end of the session.

OPPOSE "ISMS," KIWANIANS HEAR

BOSTON, June 19 (Special).—Thousands of Kiwanis delegates and visitors from the U. S. and Canada have arrived here today for the service organization's 23rd annual convention. Four days of business sessions and conferences are scheduled to plan 1939-40 activities for the 2,000 clubs in child welfare, agriculture, boys and girls' work, adult education, etc.

Boston for the first time is host to an international convention of Kiwanis.

H. G. Hatfield, of Oklahoma City, president of the Kiwanis International, is presiding at all sessions. In his annual message he warned against all subversive groups.

"Dictatorship is on the ascendancy," he told delegates. "Even within our borders the seeds of discontent are being sown. Democracy and the democratic conception of government is challenged today as never before. It must be preserved."

Kiwanis must be devoted to constructive service work and oppose Communism, Fascism and Nazism," he said.

"Kiwanis must guard itself against shyness and all trends away from its main objective of service," Fred C. W. Parker, of Chicago, secretary, told the convention.

SENATOR ATTACKS AIR LINE MERGER

WASHINGTON, June 19 (U.P.)—Senator Joseph C. O'Mahoney, D., Wyo., chairman of the national monopoly committee, today attacked a proposed merger of Western Air Express and United Air Lines and warned that he would see that the consolidation is studied thoroughly if it is presented to the civil aeronautics authority.

"This merger has all the earmarks of a mere financial manipulation which can be of no benefit to aviation as a whole, to the employees or the companies affected or the areas which are served by the companies," O'Mahoney said. "The plan would seem to have been conceived purely for the purpose of concentrating control."

He said that reports from Denver, Colo., show that the amalgamation will be accomplished through an exchange of stock, "providing queries as to the extent to which combinations and mergers of airlines should be permitted."

Its second place was the cavalry's headquarters' troop from Caldwell; fourth, Boise headquarters' troop. Moscow's score was 1,131 out of a possible 1,240 while Twin Falls score was 1,072.
