OFFICIAL CITY NEWSPAPER

FRENCH TROOPS CUT NAZI COMMUNICATIONS

Germans Claim Troops Only 55 Miles From Paris

Outcome of Gigantic Battles Uncertain; Death Toll Mounts

Nazi sources in Berlin claimed today the Germans had surged closer to Paris, pushing to Soissons, only 55 miles from the French capital, but this lacked official confirmation.

The German high command admitted, however, the Nazis were now encountering fierce resistance on the part of the British and French and indicated a long struggle might be expected in northern France.

The outcome of the enormous conflict still was uncertain. Scores of major and minor engagements raged from the banks of the Aisne at Rehel to the mouth of the Somme at Abbeville and north in Flanders and Picardy.

With German and allied troops inter-laced and fighting behind each other's lines and across communications and supply routes at dozens of points, military experts said almost anything might happen.

After conferring with Weygand, Premier Paul Reynaud expressed confidence in the outcome. "If we hold for a month," he asserted, "we shall have traveled three-fourths of the road to victory."

Losses Huge Huge losses were being suffered on each side. French sources estimated the Germans had lost 500,000 killed and wounded since invading Holland. A London source placed German casualties on the western front at 250,000. The Germans claimed to have captured 110,000 to 120,000 prisoners.

The royal air force was heavily engaged in the allied effort to extricate themselves from their dangerous position. RAF planes last night bombed most of the line of German communications from Aachen, west to the fighting lines.

German sources claimed the allies had lost 2,000 planes in 12 days fighting. Until the checkered end of the capture of Arras, the German planes were being shot down in great numbers. Their departures were calm and orderly and the exodus did not match the influx of refugees from Belgium and northern France, devastated by the blitzkrieg.

Tribute to Weygand The firm stand of British, French and Belgian forces, especially in the smoking villages of Picardy and Flanders, was a tribute to the "ferocious energy" of Gen. Maxime Weygand, allied generalissimo, who made a plane flight over the confused and inter-laced battle lines of northern France.

The battle in northern France still was raging fiercely and the fate of perhaps 1,000,000 allied soldiers caught in a German trap before the channel ports was undecided.

The German high command said the allied counter-blow had been parried near Arras and that the Nazi wedge pushed to the English channel town of Abbeville had been widened by German units which moved northward from the River Somme toward Montreuil and St. Pol.

This meant a northward sweep of unopposed extent near the channel coast and from the Somme river city of Amiens in an effort to squeeze more tightly the trapped allied armies and to reach the important channel ports of Boulogne and Calais, which is only 22 miles from the shores of England.

Without a record vote, the senate voted today to give President Roosevelt a \$132,000,000 "blank check" to speed army preparations. It rejected a Republican proposal to create a joint congressional committee to supervise his use of it.

PARIS, May 22 (U.P.)—A "chaotic" battle was reported raging in the Cambrai sector tonight as allied forces attempted to break through encircling German lines in northern France after recapturing the town of Arras.

Allied armies caught in the German encircling maneuver in the north were said by French sources to be only 35 miles from the main French forces near St. Quentin, on the southwestern side of the fighting front.

PARIS, May 22 (U.P.)—Civilians began leaving Paris today. Their departure was calm and orderly. Only a few were leaving now, the timid and unattached. They had definite goals—properties in the country and in small Normandy towns.

ROOSEVELT ASKS SHIFT TO GUARD AGAINST ALIENS

WASHINGTON, May 22 (U.P.)—President Roosevelt told congress today that the startling sequence of events abroad—fifth column treachery—made it essential for the national welfare to transfer the labor department's immigration and naturalization service to the justice department, which already is guarding against espionage.

The move, he said, will enable the government to deal quickly with those aliens who conduct themselves in a manner that conflicts with the public interest. He pledged that the action was not designed to impair the legal status or the civil liberties of the 3,000,000 aliens resident here.

Reorganization Order Mr. Roosevelt submitted a fifth governmental reorganization order which will make the transfer effective in 60 days or less unless both houses disapprove. Little, if any, opposition was anticipated.

Mr. Roosevelt said that he had planned no further governmental reorganizations at this session of congress until European developments raised new problems.

"The startling sequence of international events which has occurred... has necessitated a review of the measures required for the nation's safety," he said.

"This has revealed a pressing need for the transfer of the immigration and naturalization functions from the department of labor to the department of justice.

Not Aimed at Aliens "I am convinced... that under existing conditions the immigration and naturalization activities can best contribute to the national well being only if they are closely integrated with the activities of the department of justice.

More effective control over aliens, this proposal does not reflect any intention to deprive them of their civil liberties or otherwise impair their legal status.

"This reorganization will enable the government to deal quickly with those aliens who conduct themselves in a manner that conflicts with the public interest."

FOUR UNHURT IN PLANE CRASHES

POCAATELLO, May 22 (U.P.)—Four persons escaped injury yesterday in two plane crashes here. Both accidents involved small monoplanes. The first crash was caused when the ship piloted by Bert Brown, 20, student pilot, crashed into a power line. Another occupant of the ship, Earl E. Hansen, 36, also escaped injury.

In the second accident Giles Casey, 26, and Mrs. Gordon MacDonald, 29, Missoula, Mont., escaped injury when their ship crashed into a utility pole during a landing.

All four persons were bruised slightly but none were seriously hurt.

M'MARTIN QUILTS FOR ARIZONA JOB

BOISE, May 22 (U.P.)—Dr. H. L. McMartin, state epidemiologist, resigned today to accept a position as director of a public health unit at Phoenix, Ariz. Dr. E. L. Berry, director of the public health department, announced.

British Troops Poised for Nazi Advance

Amd ruins of bombed and shelled buildings, a British anti-tank unit barricades to attempt to stem the Nazi advance in Louvain, but Germany's mechanized might was not to be denied, and British were forced from that position by the Nazi drive. Cablephoto from London.

Senate Group Backs Naval Supply Funds

WASHINGTON, May 22 (U.P.)—A senate naval appropriations subcommittee today approved a record-breaking \$1,458,758,728 naval supply bill, including a quarter-billion dollars cash for new warplanes and to complete warships.

This was done as the senate resumed debate on the \$1,232,264,724 army bill, which will provide for a full peacetime army of 280,000 men, thousands of planes and big supplies of munitions.

Sen. Arthur H. Vandenberg of Michigan, a Republican presidential aspirant, argued on the senate floor that a civilian munitions control board, composed of experts, should be created to facilitate the huge endeavor to re-arm America.

Vandenberg suggested someone like President William S. Knudsen of General Motors should be placed at the head of such a board.

The full senate appropriations committee received the naval supply bill and arranged speedy consideration. The subcommittee granted Mr. Roosevelt a "blank check" fund of \$58,000,000 and then went further than his requests and approved \$54,778,000 to increase the enlisted strength of the navy and marine corps and provide a \$100,000,000 contract authorization for the navy air corps.

MOHAMED MILWAUKEE, Wis. — On the theory all children can't go to the state's northern lakes to fish, the Wisconsin conservation commission is bringing the fish to the kids. Seven park lagoons are being stocked with bluegills, perch, bullheads and crappies.

NORTHAMPTON, Mass. — Stanley Darmofal, jailed for drunkenness, had another charge facing him when he was arraigned. While in jail, police said, he stole a wrist watch from another prisoner.

VIOLENCE MARKS MILKMAN STRIKE

CHICAGO, May 22 (U.P.)—Increased violence was reported by police today after a 12-hour conference failed to settle wage dispute between union milk wagon drivers and dealers.

At least 36 store windows were smashed with milk bottles, bolts and clubs. A truck load of milk was dumped inside the city.

GERMAN BOMBS FALL ON SOUTH BRITISH SECTOR

LONDON, May 22 (U.P.)—German airplane bombs crashed on the rich soil of southeastern England today, in tacit warning that the German blitzkrieg might strike the British isles at any time.

Britons were told the situation in northern France was now worse than at any time in the 1914-1918 war.

The bombs came in the early hours of the morning, all within 1 1/2 minutes, as if some lone German flyer were in difficulty and had jettisoned his bomb cargo.

Twenty-four incendiary and 20 high explosive bombs had been dropped in the same area May 3. But this time the allied armies were fighting with their backs to the wall and no one doubted that if Adolf Hitler could, he would send his air force and his bombing, burning, machine gunning parachute troops to bring war to Britain.

Go To Bed Confident British people had gone to bed last night lulled by complacency by reports that German attacks had been repulsed.

They awoke today to read the allied position was one of extreme danger, that the Germans had thrust to the channel within 70 miles of the British coast, that the British expeditionary force, along with French and Belgian forces, had been cut off from the main French army, that the Germans threatened by their Somme valley drive to deprive France of industrial wealth an even greater extent than in 1914.

Asks No Holidays It was pointed out frankly that with America, the Germans had taken the most important railroad junction in northern France, that in reaching Abbeville the crossing of the Somme had been barred, that in taking Somme valley towns, the Germans must have obtained vast stores of food and fuel calculated to aid them in establishing themselves solidly along the coastline.

Lord Beaverbrook appealed to aircraft workers to forego their weekend holidays and work night and day.

The air ministry called for balloon barrage recruits.

The health ministry appealed for nurses.

The council of industry discussed means of speeding production of munitions as well as airplanes.

TAYLOR RAPS AT 'SPOILS SYSTEM'

BOISE, May 22 (U.P.)—The state industrial action board "acted under the spoils system" in appointing J. C. Tovey as director of the unemployment compensation division, Attorney General J. W. Taylor wrote in an opinion today.

Asked by Gov. C. A. Bottolfsen to determine whether the board complied to the law in appointing Tovey after he failed to pass a merit board examination, Taylor declared the appointment violated state laws regarding civil service.

"The law required the industrial accident board to act under the merit system, but the board very apparently acted under the spoils system," Taylor wrote.

Germans Routed From Arras After Counter Attacks

PARIS, May 22 (U.P.)—Picked French shock troops, thrown into the wild battle of the Somme, have stormed and retaken Arras and, fortifying the south bank of the river, have cut communications of the Germans in the Abbeville area on the English channel, France asserted today.

Gen. Maxime Weygand, new allied commander-in-chief, sent his men into the ruined, smouldering city after a dramatic airplane flight over the German lines yesterday and quick dash to Paris.

As he gave his battle order, British troops, timing their drive with the attack on Arras, smashed into the German flank near Cambrai, in the sector to the southeast.

Premier Paul Reynaud, in a brief, unexpected radio speech to the French nation, said: "I have just seen General Weygand... The generalissimo told me: 'I am full of confidence if everyone does his duty with fierce energy.'"

"Germans Pay Heavily" "The civil population must not allow itself to be frightened by German motorized raids... They are paying heavily for their audacity... If we hold one month—and we shall hold for the time necessary—we shall have traveled three-fourths of the road to victory."

Reynaud said the civil population must remain at work, that any reduction in production weakened France, and he had given orders to this effect to military as well as civil authorities.

Gen. Weygand issued his battle orders in the customary Weygand manner, after his flight over the German lines.

When the Bolsheviki armies were approaching Warsaw after the World War Weygand was sent there. He arrived, looked at a few battle maps for an hour, drew up a plan and gave the order for an attack which sent the Red army rolling back on Moscow.

Mobilizing all its strength, France today permitted women between the ages of 21 and 55 years to join the army for work with the general staff, army corps staff, and in the artillery, engineer, supply and medical services, as a special "women's auxiliary with the military formations."

Well-informed French army sources made estimates which implied that the Germans, as Reynaud had said, were paying a high price for their blitzkrieg. The German losses in wounded and killed were put at perhaps 500,000 since the invasion of Holland, with a probable proportion of one killed to seven wounded. It was insisted the allied losses were but one-fifth those of the Germans.

In the Arras battle, it was asserted, the French troops, plunging into a wild melee that covered miles of ravaged plains of Picardy, hit the dangerously small motorized forces which the Germans had left to hold the city and quickly knocked them out.

Reports said the Germans were chiefly machine-gunners, who in cooperation with paratroopers, had gone through the countryside with torch and bomb.

The Germans had entered Arras late Monday. They had failed properly to organize their positions, it was asserted, and they were quickly overcome.

Town in Ruins The battered British expeditionary force had left Arras aflame after a desperate, losing fight in the (Continued on Page 2, Column 5)

LONDON CONFERS WITH PRESIDENT

WASHINGTON, May 22 (U.P.)—Aired Mc Landon, Republican presidential nominee of 1936, conferred today with President Roosevelt on national problems growing out of the new World War.

BABCOCK HEADS IDAHO STOCKMEN

BOISE, May 22 (U.P.)—A. R. Babcock, Arco stockman, today headed the Idaho Cattle and Horse Growers' association, succeeding Max Cohan, Armo.

Other officers elected at the closing session of the state convention are Rowland J. Hayes, Boise, first vice-president, and Walter Lemon, Lewiston, second vice-president. Date for the 1941 convention will be set later.

Communists and Police Battle at Anti-War Rally

NEW YORK, May 22 (U.P.)—About 3,000 Communists and sympathizers demonstrated last night against any United States involvement in the war. They were dispersed by mounted police.

There were scattered fights between some demonstrators and foot police, and several persons were injured by policemen's night sticks. No arrests were made.

'Typical' Co-ed

The Pacific northwest's "Most Typical Co-ed" is Marjorie Gwin, 18, freshman student at the University of Idaho, chosen at the annual Sophomore carnival at the University of Washington, Seattle. She won over four other contestants from colleges in that area.

Late FLASHES

PARIS, May 22 (U.P.)—United States consular offices, including passport visa departments, were ordered today to transfer to Bordeaux and Nantes from Paris. The embassy staff remains.

BERLIN, May 22 (U.P.)—German military quarters claimed today their forces now have a 31-mile foothold on the English channel and asserted they are closing with irresistible force around allied armies in northern France.

Fighting continues desperately, the Germans said, in both Flanders and Artois, especially around Ghent and on the upper Scheldt river.

However, the German quarters predicted, "resistance will be overcome in the next few days" as far as the allied armies of the north are concerned.

WASHINGTON, May 22 (U.P.)—Without a record vote, the senate voted today to give President Roosevelt a \$132,000,000 "blank check" to speed army preparations. It rejected a Republican proposal to create a joint congressional committee to supervise his use of it.

PARIS, May 22 (U.P.)—A "chaotic" battle was reported raging in the Cambrai sector tonight as allied forces attempted to break through encircling German lines in northern France after recapturing the town of Arras.

Allied armies caught in the German encircling maneuver in the north were said by French sources to be only 35 miles from the main French forces near St. Quentin, on the southwestern side of the fighting front.

PARIS, May 22 (U.P.)—Civilians began leaving Paris today. Their departure was calm and orderly. Only a few were leaving now, the timid and unattached. They had definite goals—properties in the country and in small Normandy towns.

Premier Paul Reynaud's announcement the Germans had taken Amiens, 65 miles north of Paris, had started them off. It and when the Germans drew closer, the movement was destined to grow. In these days of blitzkrieg, it might even become a panic.

But for the moment, those refugees pouring into Paris far outnumbered those leaving. Railroad stations labored under a two-way stream of humanity—

INDUSTRIALISTS MAY HEAD U. S. DEFENSE PROGRAM

THREE MEN MAY BE OFFERED JOB AS COORDINATORS

By RONALD G. VAN TINE
 WASHINGTON, May 22 (AP)—White House Secretary Stephen T. Early indicated today President Roosevelt may name three presidential assistants to act as coordinators and liaison men in expediting the national defense program.
 Early specified no names and did not say definitely the coordinators would be assigned to the executive assistant posts. But he said the three positions, each paying \$10,000 a year, are open and might be filled by Mr. Roosevelt's assistants in the White House.
 Some prominent industrial figures as President William S. Knudsen of General Motors would be brought here as a coordinator of the defense program in view of the fact the biggest difficulties appear to be in speeding up production of planes and munitions.

1941 Goal Set
 Under legislation being pressed toward enactment, the immediate aviation goal for the next year is around 18,000 planes for the army and navy—the first step toward the 50,000 Mr. Roosevelt wants.
 Admiral Harold R. Stark, chief of naval operations, asked the house naval affairs committee today to approve immediately a bill authorizing the navy to build up its aerial arm to at least 10,000 planes. He said the need is urgent; that recent events have given "wistful thinking a rude jolt." Quite definitely, he said, "it can happen here," referring to such an eventuality as a blitzkrieg.
 Stark told the committee that the only way to assure peace in the world is to make nations desiring peace much stronger than those desiring war.

"Invincible Navy"
 Chairman Carl Vinson summed up the immediate goal for the navy as making it "invincible in the air, invincible on the surface and invincible under the surface."
 Vinson added it was understood officially that when the navy air expansion authorization becomes law President Roosevelt will ask a deficiency appropriation exceeding \$100,000,000 to start the air base construction and pilot training phases.
 President Roosevelt outlined his policy on the defense program at his press conference yesterday by declaring the emergency would produce no millionaires, no strikes in defense industries and no weakening of the social gains achieved during the New Deal.
 He pledged that neither capital nor labor would profit heavily from the defense program.

Novel Published by Jerome Author

JEROME, May 22 (Special)—John L. Gould, former justice of the peace of Jerome, today received a wire from the Falcon Press at 274 Madison avenue, New York City, that the manuscript, "The Way of the North," which he sent them a short time ago, will soon be published.
 The book will be placed on the market in about 60 days, it is believed.
 It is an historical novel, containing facts and true experiences of the frozen north. Publishers said the book may have screen possibilities. In the book are contained true experiences of the great Alaskan gold rushes, which Mr. Gould lived during the first settling of that colorful territory.
 Other item of interest was word received this week from Margaret Nelson, Avon House, New York City, that Mr. Gould's poems, "Easter," "Cooperation," "Working Together" and "Pioneers," had been accepted for publication and will be placed in the book of contemporary poets, "The Poetic Voice of America."

News of Record Marriage Licenses

MAY 22
 Thomas Edward Musgrave, 22, and Margaret Eleanor Caldwell, 22, both of Twin Falls.

Births

To Mr. and Mrs. William Hranac, Hansen, a son, Tuesday at the Twin Falls county general hospital maternity home.

Funerals

HUSTEAD—Funeral services for Charles Husted, for many years a resident of Twin Falls, who died May 17, will be conducted at 10:30 a. m. Thursday at the Reynolds funeral home, Rev. Mark O. Cronenberg of the Christian church officiating. Interment will be in Sunset Memorial park.

News in Brief

Guest Visits
 Mrs. Mamie Cooper is here from Clovis, N. M., the guest of her son and daughter-in-law, Mr. and Mrs. E. W. Cooper.

Teacher Visits
 Miss Gladys Wilson, who has been teaching in Soda Springs, is here for an extended visit with her mother, Mrs. George Adams.

To California
 Mr. and Mrs. W. Burgman and granddaughter, Miss Shirley Berkeley, are leaving tomorrow for Los Angeles for a month's visit with relatives and friends.

Croesus Club
 Croesus club will meet at the home of Mrs. Lulu Junker, 1217 Sixth avenue east, Friday at 2:30 p. m. Roll call responses will be maiden names of the mothers of members. Mrs. Bertha McVey will be leader.

Bousmans Visit
 Mr. and Mrs. George Bousman, San Diego, Calif., formerly of Twin Falls, left yesterday afternoon for Colorado following a brief visit with Mr. and Mrs. L. W. Collier and other friends.

Addresses Grange
 John Trendy, north side Pomonca Grange master, will speak at the Twin Falls Grange meeting this evening at 8 p. m. Musical program will open at 8:30 p. m. under arrangement of Mrs. Thomas Speedy.

Republican Session
 Substantial Twin Falls delegation will journey to Buhl by auto caravan tonight for the Young Republican club rally to be addressed by E. M. Rayburn, Filer, according to leaders in the club. The meeting will be at 8 p. m. in the Mercer cafe.

At the Hospital
 Miss Sharon Higbee, Mrs. J. F. Geisler, Mrs. Ray Pool, Twin Falls; Miss Betty June Gorrell, Castleford; Mrs. Bonnie Colbert, Eden; Miss Tina Cappel, Portland, Ore., have been admitted to the Twin Falls county general hospital. Patients dismissed include Mrs. Elmer Schweder, Buhl; Mrs. Kenneth Parsons, Mrs. R. L. Schwartz, Twin Falls; Mrs. Clinton Dougherty and infant, Filer; Walter Robertson, Hansen; George Holloway, Hazelton.

No. 1 Pen Woman of P. T. A. Comes Back From Trips
 No. 1 "pen woman" of the National Congress of Parent-Teacher associations has returned to Twin Falls.
 Mrs. John E. Hayes is not only national publicity chairman, but is chairman of the editorial committee for the national education magazine, which is practically the same as being editor.
 Mrs. Hayes, as retiring first vice-president of the national organization, attended state conventions at Arkansas, South Carolina, Alabama and Washington and the national convention at Omaha, Neb., since leaving Twin Falls in the early spring.
 She was at Omaha from May 1 to May 11, attending pre-convention committee meetings and other sessions, in addition to the convention itself.
 She has also made two visits to national headquarters in Chicago and recently attended the Washington Mental Hygiene association conference in Seattle, Wash.

Trade Emissary Will Visit Here
 Seeking to cement industrial amity between the Los Angeles market and the Twin Falls county area, M. J. Brown, domestic trade commissioner of the Los Angeles Chamber of Commerce, will confer in Twin Falls with C. O. C. officials June 11.
 Brown will contact leading businessmen, will meet with the Chamber of Commerce and will offer results of his survey of economic conditions in southern Idaho.

Funeral Held for Schwartz Infant
 Michael Ralph Schwartz, infant son of Mr. and Mrs. R. L. Schwartz, Twin Falls, died early yesterday afternoon at the Twin Falls county general hospital, a few hours after birth.
 The parents, the grandparents, Mr. and Mrs. O. A. Schwartz and Dr. and Mrs. J. G. Toolson, all of Twin Falls survive.
 Funeral services were held at 9 a. m. today at St. Edward's Catholic church. Father H. E. Heilmann officiating.
 Interment was in Twin Falls cemetery, under the direction of the White mortuary.

SECT APPEALS CASE
 Ten members of a religious sect have appealed probate court sentence on a peddling charge, and transcript of papers in the matter went to district court this afternoon. N. P. Fudlner, Ogden, and nine other members of the sect were each fined \$50—suspended for one year on condition that all refrain from violating the state law against peddling without a license.

Arrive Thursday
 James and Evelyn Wynn, both of San Francisco, will arrive in Twin Falls Thursday evening to visit with their father, Patrick Wynn, and with brothers and sisters here.

Veterans Meet
 Veterans of Foreign Wars will meet at the city park bandshell at 8 p. m. today in regular session, officials announced this afternoon. Routine business will be transacted.

Here From Seattle
 Miss Ruth Hanscom is here from Seattle, Wash., the house guest of Mr. and Mrs. Edmund L. Turner, Jr. Miss Hanscom is a former University of Washington student.

Official Visits
 Dr. E. L. Berry, state director of public health, spent the early part of this week conferring with Dr. L. C. Kroetcher, director of the district health unit. He also inspected the farm labor camp south of the city.

Missionaries Speak
 Alva and Louise Walker of the Belgian Congo and Peru will speak at a missionary meeting Friday at 8 p. m. at the Assembly of God tabernacle, Second avenue and Fourth street west, according to Rev. B. E. A. Hoffman, pastor. Lantern slides will be shown.

RAF Planes Fire on Nazi Troops
 LONDON, May 22 (AP)—Royal air force pilots reported today that they successfully attacked fast-moving German columns moving north on the main road from Abbeville yesterday.
 One column was made up of lightly-armed vehicles escorted by a strong force of motorcycle outriders. The RAF pilots said they blasted at the column with bombs and also attacked a second German armored column which was discovered partially hidden in the woods near Abbeville.
 At the same time the air ministry said large formations of the royal air force attacked military objectives Tuesday night in Rhenish Prussia.

Non-Support of Infant Claimed Against Father
 Accused of failure to support his 10-month-old daughter, Richard Sparks, Twin Falls, was to be brought back from Payette this afternoon by Deputy Sheriff Edward Hall.
 Complaint against Sparks was filed in probate court by Mrs. Ada Sparks, his wife.
 The offense is an indictable misdemeanor. If Probate Judge C. A. Bailey finds reasonable cause he must bind Sparks over to face the district tribunal.
 "I am a Belgian girl and this is my sister. Franche. We're going to the country," she said.
 The arrival of every train was welcomed by a rush of French doctors and nurses down the tracks, stopping at every compartment window and asking "any sick or wounded in there?"
 If there are wounded, they are taken from the rear cars.
 Some refugees sleep sitting upright. Old men lean against the walls and doze and children drop off to sleep on their feet with a protecting arm around them to keep them from falling.
 Few of them wept.

Landlady Seeks Rent, Board Bill
 Asking probate court judgment for \$261.33 plus interest as board and lodging bill asserted due over a period of more than two years, Santa Bilbao, operator of the Bilbao rooms, 448 Main avenue south, filed suit today against Jess Gabica, Twin Falls.
 The complaint by the boarding house landlady says that Gabica still owes her that amount as result of room and board he received at \$30 per month while a bachelor, and at \$45 per month for himself and his wife after he married.
 Attorneys for the landlady are Chapman and Chapman and Tom F. Alworth.

Parents Make Long Journey to Attend Salmon Graduation
 SALMON, Ida., May 22 (AP)—Graduation exercises at the Shoup grade school will be held next week, and the parents of the 11 pupils enrolled are expected to set some sort of record for long distance travel to attend the ceremonies.
 The pupils have been traveling distances ranging from 30 to 60 miles to attend the tiny school in the Idaho hills.

REPORTER SEES GERMAN DRIVE
 (From Page One)
 At his headquarters outside Brussels, Reichenau told me the fighting so far had been only preliminary to the decisive battle.
 "We have won the first tricks but we have yet to meet the body of the enemy," he said.
 "I can imagine our forward march being halted for a while now, and that the next few days will see hard fighting, for Weygand (the allied commander in chief, Gen. Maxime Weygand) will surely give orders to every man to stand his ground."
 "I need not say, however, we look confidently to the future."
 Reichenau said he talked frequently with Adolf Hitler by telephone, and gave Hitler periodic reports of troop movements.
 "He is not only the political but the military leader of the German people in the full sense of the word," Reichenau said of Hitler.
 Germany has no illusions about this war, Reichenau said, and is indulging in no unjustifiable celebrations in advance.
 "We know a greater battle must come," he explained. "We will prepare for it and win it."
 Asked to make some sort of prediction as to the probable course of the remainder of the war Reichenau said:
 "I can not prophesy anything about the end of the war. I was four and one-half years in the World war and there were then many false prophecies."
 He said, however, Germany was determined to win and this determination was backed up by outstandingly good morale among the German troops.

CIVILIANS START TO LEAVE PARIS
 (From Page One)
 The railroad stations and at refugee barracks for transportation to the country.
 A typical refugee was 10-year-old Louise Holert. She sat on a wooden bench in one of the stations, breathing the odors of disinfectant, hot soup, bread, wine and massed bodies. Louise's baby sister sat on her lap, fondling a cardboard airplane.
 "I am a Belgian girl and this is my sister. Franche. We're going to the country," she said.
 The arrival of every train was welcomed by a rush of French doctors and nurses down the tracks, stopping at every compartment window and asking "any sick or wounded in there?"
 If there are wounded, they are taken from the rear cars.
 Some refugees sleep sitting upright. Old men lean against the walls and doze and children drop off to sleep on their feet with a protecting arm around them to keep them from falling.
 Few of them wept.

Seen Today
 Sleeping bat, on side of Bank and Trust building and within reach of pedestrians, slumbering peacefully as scores of curious stop to look. . . Grass growing at corner of Main avenue and Shoshone street. . . No less than nine persons standing on downtown corner and giving their versions of what's going to happen in the war. . . Big sign on front of lodge building—getting general facial massage for Elks' convention next month. . . Bicycle parked bravely in automobile parking spot on Main avenue, much to annoyance of hopeful motorists who rush to dart into opening. . . And Jerry Cristman wearing wilted white gardenia.

FRENCH ATTACKS CAPTURE CITIES
 (From Page One)
 city's streets. Houses and cross roads had been fortified and anti-tank barriers thrown up in the streets. But the Germans had proved too strong and after a day and night of fighting, the British had been forced out.
 At Amiens the Germans were 65 miles from Paris. The whole Amiens area, it was reported, was a wild melee among individual units.
 British and French troops were fighting running battles, back and forth, against German tank and motorcycle units. But the bulk of the German forces was not yet involved.
 A French source disclosed the French had blown up bridges over the Somme at that point, and had entrenched themselves strongly on the south bank—a threat to the entire German wedge westward to the channel.
 "Thousands upon thousands of French reinforcements poured into battle areas under new instructions and strengthened the allies along the German flank."
 Informants here believed the German motorized blitzkrieg units might now be in dangerous position in their narrow corridor, an estimated 60 miles, almost from the main body of their army behind the Scheidt river.

12 PAY FINES ON PARKING CHARGE
 An even dozen motorists today paid fines of \$1 each after appearance in municipal court on charges of overtime parking, police records reveal.
 E. W. McRoberts, W. A. Flower, Hamer Adams, Emmett Hood, C. E. Jacoby, Cleo Cantrell, Ray Mathison, L. Prevo, J. A. Johnson, Delta Gernia, George F. Erwin and W. H. Burkholder.

 At his headquarters outside Brussels, Reichenau told me the fighting so far had been only preliminary to the decisive battle.
 "We have won the first tricks but we have yet to meet the body of the enemy," he said.
 "I can imagine our forward march being halted for a while now, and that the next few days will see hard fighting, for Weygand (the allied commander in chief, Gen. Maxime Weygand) will surely give orders to every man to stand his ground."
 "I need not say, however, we look confidently to the future."
 Reichenau said he talked frequently with Adolf Hitler by telephone, and gave Hitler periodic reports of troop movements.
 "He is not only the political but the military leader of the German people in the full sense of the word," Reichenau said of Hitler.
 Germany has no illusions about this war, Reichenau said, and is indulging in no unjustifiable celebrations in advance.
 "We know a greater battle must come," he explained. "We will prepare for it and win it."
 Asked to make some sort of prediction as to the probable course of the remainder of the war Reichenau said:
 "I can not prophesy anything about the end of the war. I was four and one-half years in the World war and there were then many false prophecies."
 He said, however, Germany was determined to win and this determination was backed up by outstandingly good morale among the German troops.

RAF PLANES FIRE ON NAZI TROOPS

LONDON, May 22 (AP)—Royal air force pilots reported today that they successfully attacked fast-moving German columns moving north on the main road from Abbeville yesterday.
 One column was made up of lightly-armed vehicles escorted by a strong force of motorcycle outriders. The RAF pilots said they blasted at the column with bombs and also attacked a second German armored column which was discovered partially hidden in the woods near Abbeville.
 At the same time the air ministry said large formations of the royal air force attacked military objectives Tuesday night in Rhenish Prussia.

CIVILIANS START TO LEAVE PARIS

(From Page One)
 The railroad stations and at refugee barracks for transportation to the country.
 A typical refugee was 10-year-old Louise Holert. She sat on a wooden bench in one of the stations, breathing the odors of disinfectant, hot soup, bread, wine and massed bodies. Louise's baby sister sat on her lap, fondling a cardboard airplane.
 "I am a Belgian girl and this is my sister. Franche. We're going to the country," she said.
 The arrival of every train was welcomed by a rush of French doctors and nurses down the tracks, stopping at every compartment window and asking "any sick or wounded in there?"
 If there are wounded, they are taken from the rear cars.
 Some refugees sleep sitting upright. Old men lean against the walls and doze and children drop off to sleep on their feet with a protecting arm around them to keep them from falling.
 Few of them wept.

Parents Make Long Journey to Attend Salmon Graduation

SALMON, Ida., May 22 (AP)—Graduation exercises at the Shoup grade school will be held next week, and the parents of the 11 pupils enrolled are expected to set some sort of record for long distance travel to attend the ceremonies.
 The pupils have been traveling distances ranging from 30 to 60 miles to attend the tiny school in the Idaho hills.

Landlady Seeks Rent, Board Bill

Asking probate court judgment for \$261.33 plus interest as board and lodging bill asserted due over a period of more than two years, Santa Bilbao, operator of the Bilbao rooms, 448 Main avenue south, filed suit today against Jess Gabica, Twin Falls.
 The complaint by the boarding house landlady says that Gabica still owes her that amount as result of room and board he received at \$30 per month while a bachelor, and at \$45 per month for himself and his wife after he married.
 Attorneys for the landlady are Chapman and Chapman and Tom F. Alworth.

Funeral Held for Schwartz Infant

Michael Ralph Schwartz, infant son of Mr. and Mrs. R. L. Schwartz, Twin Falls, died early yesterday afternoon at the Twin Falls county general hospital, a few hours after birth.
 The parents, the grandparents, Mr. and Mrs. O. A. Schwartz and Dr. and Mrs. J. G. Toolson, all of Twin Falls survive.
 Funeral services were held at 9 a. m. today at St. Edward's Catholic church. Father H. E. Heilmann officiating.
 Interment was in Twin Falls cemetery, under the direction of the White mortuary.

SECT APPEALS CASE

Ten members of a religious sect have appealed probate court sentence on a peddling charge, and transcript of papers in the matter went to district court this afternoon. N. P. Fudlner, Ogden, and nine other members of the sect were each fined \$50—suspended for one year on condition that all refrain from violating the state law against peddling without a license.

Seen Today

Sleeping bat, on side of Bank and Trust building and within reach of pedestrians, slumbering peacefully as scores of curious stop to look. . . Grass growing at corner of Main avenue and Shoshone street. . . No less than nine persons standing on downtown corner and giving their versions of what's going to happen in the war. . . Big sign on front of lodge building—getting general facial massage for Elks' convention next month. . . Bicycle parked bravely in automobile parking spot on Main avenue, much to annoyance of hopeful motorists who rush to dart into opening. . . And Jerry Cristman wearing wilted white gardenia.

FRENCH ATTACKS CAPTURE CITIES

(From Page One)
 city's streets. Houses and cross roads had been fortified and anti-tank barriers thrown up in the streets. But the Germans had proved too strong and after a day and night of fighting, the British had been forced out.
 At Amiens the Germans were 65 miles from Paris. The whole Amiens area, it was reported, was a wild melee among individual units.
 British and French troops were fighting running battles, back and forth, against German tank and motorcycle units. But the bulk of the German forces was not yet involved.
 A French source disclosed the French had blown up bridges over the Somme at that point, and had entrenched themselves strongly on the south bank—a threat to the entire German wedge westward to the channel.
 "Thousands upon thousands of French reinforcements poured into battle areas under new instructions and strengthened the allies along the German flank."
 Informants here believed the German motorized blitzkrieg units might now be in dangerous position in their narrow corridor, an estimated 60 miles, almost from the main body of their army behind the Scheidt river.

12 PAY FINES ON PARKING CHARGE

An even dozen motorists today paid fines of \$1 each after appearance in municipal court on charges of overtime parking, police records reveal.
 E. W. McRoberts, W. A. Flower, Hamer Adams, Emmett Hood, C. E. Jacoby, Cleo Cantrell, Ray Mathison, L. Prevo, J. A. Johnson, Delta Gernia, George F. Erwin and W. H. Burkholder.

ADDITIONAL MEN NEEDED IN ARMY

With a view to bringing the field artillery and signal corps up to full peace time strength, authority has been received from headquarters at the ninth corps area in San Francisco to accept for these two branches of the service, it was announced here this afternoon by Sgt. Frank Morris, officer in charge of the local army recruiting station at the city hall.
 Men between the ages of 18 and 35 years, single and without dependents, of good character and able to meet the physical requirements for enlistment will be accepted. However, it was pointed out that applicants for the signal corps must be high school graduates or have the equivalent of a high school education.
 Sgt. Morris declared that enlistment in the signal corps offers an excellent opportunity to men interested in radio, radio repair, telephone switchboard operators and maintenance and other means of communication, to gain valuable experience and training in this type of work. Enlistment in the field artillery offers an opportunity to all for mechanical and technical training. Men enlisted for the signal corps will be assigned to Ft. Lewis, Wash., while men enlisted for the field artillery will be forwarded to Camp Ord, Calif., where the third division recently completed maneuvers. Camp Ord is located in the vicinity of Monterey, Calif., and the historic Bay of Monterey.
 Full particulars regarding the vacancies can be secured by writing or contacting Sgt. Morris at the city hall in Twin Falls.

TURKEY

Twin Falls police force didn't fare so badly last night—at least not most of them. They dined on turkey, because it was Ted Goeckner's birthday anniversary.
 Mrs. J. O. Pumphrey and Mrs. Owen Buchanan assisted Mrs. Goeckner in serving. Pinocchio was the diversionist, but prize winners are not announced.
 Members of the police department and friends who were invited to help celebrate were Carl Gillette, Chief of Police Howard Gillette, J. O. Pumphrey, Charles Slack, Virgil Borden, M. E. (Pete) Rountree, Kenneth Barclay, T. G. McCoy, Lee McCracken, Robert Winterholer, Perry Brewington and Charles Larsen.

Rudolph Rites

BURLEY, May 22 (Special)—Funeral services for Mrs. Floyd Rudolph will be held Friday at 2 p. m. at the first ward L. D. S. church. Bishop Sidney Larson will officiate. Interment will be in Buhl cemetery, under the direction of the Payne mortuary.

W. KLOPPENBURG CALLED BY DEATH

William L. Kloppenburg, 436 Walnut street, resident of the Filer district since 1927 and of Twin Falls since 1933, died at 10:30 a. m. today at the Twin Falls county general hospital.
 He was a member of the Masonic lodge at Evely, Ia., and with his family attended the Methodist church during his residence here.
 The body rests at the White mortuary pending funeral arrangements.
 Mr. Kloppenburg was born April 12, 1888, at Keystone, Ia.
 He is survived by his wife and three children, Marion, Lowell and James Kloppenburg, all of Twin Falls; another daughter, Mrs. H. W. Zimmerman, Focattello; his mother, Mrs. A. L. Kloppenburg, Oakland, Calif.; two brothers, Glen Kloppenburg, Twin Falls, and Walter A. Kloppenburg, Storm Lake, Ia., and two sisters, Mrs. Cliff Kauffman and Mrs. Emma Robinson, both of Oakland, Calif.

Ex-State Senator Honored by Rites

SODA SPRINGS, May 22 (AP)—Funeral services were being arranged today for Charles B. Wilson, former state senator and state representative, who died yesterday after a brief illness.
 Wilson, who served one term as Democratic national committee member from Idaho, was 85. He suffered a cerebral hemorrhage.

LOSSES MINOR IN 3 AUTO CRASHES

Three automobile crashes, all of a minor nature, were recorded in Twin Falls yesterday evening and this morning, records at the police station show.
 First crash came at 4:45 p. m. yesterday and was in the 100 block on Main avenue south. Mrs. B. J. Staley, Kimberly, told officers she had double parked her car and that it was crashed from the rear by a car being operated by M. G. Ramsey, Twin Falls. Damages were slight.
 At 5:58 p. m. the second mishap occurred and involved cars operated by Hugh Paddock, Twin Falls, and Dorothea Hagler, route two. Miss Hagler is reported to have driven her machine into the rear of Paddock's car.
 About 11:30 a. m. today at the alley in the 100 block of Third avenue south, cars operated by Bill Allen, route three, and W. C. Honold, Twin Falls, crashed. Damages amounted to an estimated \$8.

Speed Wins in a Race, But Slow Burning Wins My Vote in a Cigarette.

I smoke Camels. Camels are extra mild, extra cool—and their slower burning gives me extra smoking.

TOWNSEND UNITS IN SESSION HERE

A joint session of members of both local Townsend club councils will be held at 8 p. m. today at the bandshell in the city park. It had been announced by officials.

Exact nature of topics to be discussed at the special meeting was not revealed but officers said it was an "urgent matter." All members of each of the councils are urged to be present.

Both club No. 1 and club No. 4 met in regular session, the former at the city hall and the latter at the courthouse.

Former State Auditor Harry Parsons was principal speaker at the city hall session while plans for membership drives and social activities were discussed at the courthouse session.

At the No. 1 club meeting, discussion was also held upon the plan of sending a delegate to the national convention at St. Louis June 30 through July 4 but decision on the matter was reserved until next week's meeting.

Albion Graduates Receive Diplomas

ALBION, May 22 (Special)—Graduation exercises of Albion high school were held in the high school auditorium Friday evening.

Program included invocation by Prof. F. E. Howard, memorial by senior class, class will by Elaine Card, class prophecy by Glenn Clark. Salutatory was by Virginia Downs and valedictory by Ruth Tremayne. Other numbers were, poem, Lyle Jolley; junior response, John Averill; graduation address, Joseph Payne; presentation of class, Supt. A. L. Dohs; presentation of awards and diplomas, J. Vard Chatburn, chairman of school board; benediction, Prof. Howard; processional and recessional, Katherine Sears.

Class roll was Elaine Card, Glenn Clark, Virginia Downs, William Fries, Ada Goodman, Lyle Jolley, Roma Sorenson, and Ruth Tremayne. Class flower was scarlet pimpernel; class colors scarlet and silver.

Each senior presented his parents with a red carnation. Little Lamar Hager, Virginia Gray, Louis Henry and Velma Goodman were dressed in caps and gowns and carried in the basket of diplomas, which were handed to the seniors.

HEYBURN

N. C. Lowry and Charles Goff spent a few days fishing in Wood river.

J. M. Whiting was a business visitor in Boise last Friday.

Mrs. Lee Alexander was called to Los Angeles last week by the death of her brother, Ralph Gill.

Mr. and Mrs. Drainsfeld, Denver, Colo., last week visited at the home of Mr. and Mrs. Carl Merz.

Miss Julia Sabitt returned to Weiser to school Sunday.

Mr. and Mrs. Agner Jensen returned to Payette Sunday after visiting at the home of Ida Croft.

Mr. and Mrs. Eldred Brower returned Sunday to Nyssa, Ore., after visiting a week at the home of relatives.

Harold Hunter went to Idaho Falls Sunday to shear sheep.

Mrs. Lester Taylor, Mrs. Margaret Parler and Miss Georgia Patterson, Los Angeles, Calif., visited Sunday at the home of Mrs. Jeanetta Walsh.

A large crowd from here attended the quarterly conference at Rupert Sunday.

Adeline Ernest and Francis Pratt, Emmett, arrived Friday to spend the summer at the home of their grandmother, Mrs. Mary Skinner.

Hansen Circle to Observe Flag Day

HANSEN, May 22 (Special)—Invitation to all citizens of Hansen and surrounding territory is being extended by Sherman circle, Ladies of the G. A. R., to join them in observance of flag day Friday, June 14, at the Hansen village park, at a basket lunch at 7 p. m. Plans were made at the meeting of the circle Friday.

Among other business plans were also made for decoration of graves of patriots dead at the Twin Falls cemetery, for which persons of the community wishing to donate flowers, are asked to bring them to the home of Mrs. Hattie Houchins the afternoon previous to Memorial day. There bouquets will be made for early morning placement on May 30.

Past presidents of Lincoln circle, Eden, Dan McCook circle, Twin Falls, and Sherman circle, Hansen, will be entertained by the local circle Tuesday, May 29, at the home of Edna Bailey beginning at 2 p. m. Memorial Sunday, May 26, at the Hansen Community church will be observed by the circle, with Rev. E. L. White being asked to deliver the special address.

Mrs. J. B. Lewis received the white elephant.

June 1 Deadline To Certify Crops

BURLEY, May 22 (Special)—Farmers who desire to certify grains, alfalfa and red clover should file their application at the Cassia county agent's office before June 1. W. W. Palmer, agent, has announced.

Fields that will be eligible for grain certification are those which have been planted with certified seed and fields that will be eligible for alfalfa and red clover certification will be those planted from blue or purple certified stock.

Cost of field inspection for grain certification is \$2 and for alfalfa and red clover it is \$3, which must accompany application. Producers, to identify seed sown, should bring the certification tags which were on the seed bags at the time of purchase.

Proceeding July 1, applications for bean and potato certification must be filed. Certified bean seed must have been used and potatoes from which a sample was sent to the Aberdeen station preceding March 1. Every grower of certified potatoes need not have sent this sample, but if the producer sent the same, this qualifies the grower. These samples of potatoes sent to Aberdeen were divided, part being sent to Lewiston where they were planted early and can now be observed for disease and growth characteristics.

MATRIMONY

The 337th couple to be united in marriage by Justice of the Peace H. M. Holler today was "on the sea of matrimony."

Married yesterday by the justice was Glen H. Cleland, Nevada City, Calif., and Goldie L. Martin, Delano, Calif. Witnesses were Reese M. Williams and D. E. Ryan, both of Twin Falls.

COLOR HARMONY

Harmonizing of colors, not just in individual rooms, but throughout the house, is recommended by interior decorators. In designing one new home, a decorator selected a wheat tint for the color-kote insulating panels used on the walls, and then chose harmonizing tints for rugs, draperies, upholstery and wall mirrors.

Railway Official Sues for Damages

JEROME, May 22 (Special)—Claiming he suffered permanent injuries when he was struck down by an automobile here Oct. 28, 1939, James S. Dell, Pocatello, freight conductor, has started suit for \$50,000 for physical injuries which he claimed were permanent against William Andrus, Jerome resident.

Case was first started in the fifth judicial district in Bannock county, but upon demand for a change of venue the case was returned to Jerome where it is scheduled to be heard before district senior Judge T. Bailey Lee, presiding judge in district court here. Date for hearing has been set for Wednesday morning, May 29, at 10 a. m.

Dell claims in his suit that he was struck down by a car operated by Andrus, as Dell was engaged in switching operations for the Union Pacific railroad on the crossing west of the city. He further contends

that he has suffered permanent damage and is unable to resume work as a result of such injuries. Anderson, Bowen and Anderson, Pocatello, are the plaintiff's attorneys. Representing the defendant are attorneys Parry and Thomas, Twin Falls.

has been set for Wednesday morning, May 29, at 10 a. m.

THURSDAY SAFE DAY
COLUMBUS, O. (AP)—Columbus accident statistics for 1939 show that Thursday is the safest day to drive here. Last year 768 accidents occurred on that day, but only three fatalities.

Wonder whatever became of....?

Did his classmates lose track of him? How could they? He was the sort of friend that all of us would want to keep... mostly because of his understanding slant on life and people and things. He was active in athletics, yet his studies never suffered... nor did overwork cheat him of recreation and relaxation. Light-hearted, yet serious when problems faced him... always master of his worries. He avoided idlers, but added constantly to his circle of sincere friends. He was courageous without being reckless, confident without being cocksure... moderate in all things. Everybody said he'd make good... He has.

If you, too, like everything in moderation, you'll like Budweiser, the Beverage of Moderation. You can count upon it anytime to be a pleasant companion and, when you entertain, Budweiser is a Perfect Host.

Live Life... Every golden minute of it... Enjoy Budweiser... Every golden drop of it

ANHEUSER-BUSCH Makers of the World-Famous Beer

Budweiser

A Beverage of Moderation

WE MAKE THIS CAP TEST: Look in Budweiser's bottle cap. A thin aluminum disc in every one. Many laboratory tests have proved that the disc provides a perfect seal and prevents air and cork particles from entering the beer. Another expense—but Budweiser's goodness must have every protection we can give it.

YOU MAKE THIS TEST: Drink Budweiser for five days. On the sixth day try to drink a sweet beer. You will want Budweiser's flavor thereafter.

• SERIAL STORY
— ROMANCE AHEAD
BY TOM HORNER

DANGER

YESTERDAY Larry threw away his clothes, posed as a cowboy, and got a job on Colonel Miles' ranch. Monnie is determined to get rid of him. She plots with Barnes, the foreman, to lure Larry to a shack by the black horse. Larry is thrown.

CHAPTER IV

LARRY was on his hands and knees, shaking his head, as Barnes reached him, pulled him to his feet.

"Sorry, kid. You're not hurt!" Barnes led Larry to the corral tank, pushed his head under water. Larry came up spluttering.

"I'm all right, how's the horse?" Larry tried to grin. Barnes pounded him on the back. Larry knew he had been framed, put up on a snaky horse, without warning. He might have broken his neck, might have been kicked and seriously injured, might have got a foot caught in a stirrup and been dragged. He wanted to swing on Barnes, but the hand on his shoulder was friendly. This was Monnie's idea—her way of paying him back. Barnes was just taking orders.

"You'll be all right in a minute," Barnes said. "Guess that saddle don't fit?"

"Saddle's all right—So am I!" Larry straightened, turned to face the girl. She was still perched on the top rail, laughing at him.

"Cowboy—you need wings!" she shouted at him.

Larry turned back to Barnes. "Catch that black again. I'll ride him this time."

LARRY approached the horse more cautiously the second time. Nostrils distended, ears back, legs widespread, the black waited. Both horse and rider knew that this ride would be worse than the first.

Larry grabbed the cheekstrap, pulled the black's head close. He set his boot firmly in the stirrup, reached for the saddlehorn. Then quickly, surely, he swung into the saddle. His right foot found the stirrup, and he was seated firmly before the black head went down.

Right arm swinging, Larry took everything the black had to offer. Crashing pitches, spins, sunfishes. Larry clung to the saddle as if he were glued there.

The black was mean, but he was a smart horse. He knew when to quit. After a dozen futile attempts to get rid of Larry again, the horse quit pitching, was ready to go to work. Larry rode over to Monnie.

"Next time, pick a really tough one," he said. "Hope you've enjoyed the show. I have!"

He dismounted, slipped through the corral bars and walked to the

• BRUCE CATTON IN WASHINGTON

By BRUCE CATTON
Evening Times Washington Correspondent

WASHINGTON, May 22—Intensive development and settlement of Alaska is being brought nearer by the European war.

Strategists agree Alaska is vital to U. S. defense, since it lies across the shortest air route to Asia and commands the "great circle" steamship lane of the north Pacific.

But a suitably defended Alaska must be able to stand alone. It must have farms, industries, people; it must have a "great circle" steamship lane of the north Pacific. But a suitably defended Alaska must be able to stand alone. It must have farms, industries, people; it must have a "great circle" steamship lane of the north Pacific.

Steffansson, famous Arctic explorer, says American must decide whether to develop Alaska in earnest or be prepared to surrender on demand... and the administration is beginning to feel the same way.

A significant indication in the bill just introduced by Senator King of Utah, this bill would enlist private capital in "public purpose corporations" capitalized at not less than \$2,500,000 each and empowered to establish settlements, exploit resources and set up industries.

Some government control would be involved. Industries that would compete with established industries in the states would be barred. Mining or lumbering operations would require interior department approval. At least half of the settlers in any new project would be required to show American citizenship; the rest might be refugees from European dictatorships, carefully selected and admitted outside ordinary quota restrictions.

This bill has been warmly endorsed by Secretary Ickes. It won't come up for action this year, but it nevertheless points the way.

The Weary Old Story of Death

So now they are dying again in Belgium. The battle rages where it raged 1800 years ago, and perhaps long before that, in the "cockpit of Europe."

Caesar, whose Commentaries have plagued generations of school children, wrote: "Of all these the Belgians are the bravest, because... they are nearest to the Germans who dwell beyond the Rhine and with whom they are continually waging war."

In Caesar's day there was plenty of "lebensraum," or living-space, for all the scattered and barbarian tribes. And today there is living-space in Europe and in the world for all, if the peoples of the world could only bring themselves to see it.

There lies the tragedy of the present war. The Germans had a case. Their need for "lebensraum" was real, in the sense of a broad region which could function together in close economic affiliation. In this sense, Canada and the United States are part of the same "lebensraum." They are an economic unity in a broad sense. But each remains entirely independent politically. There is no political pressure on either side of the border. The economic unity is natural, unforced, and unpolitical.

Germany might have taken this path. The opposition aroused by "anschluss" or customs and economic union with Austria was due not to the thing itself, but to the fact that everyone knew it meant political and military union as well.

At Munich Germany was given a free hand. She could then have settled down quietly to develop her economic "lebensraum" in southeastern Europe peacefully and in a non-military manner, gradually reducing the army which was giving all Europe the jitters, and creating by free cooperation and mutual advantage the economic living-space she needed.

But Tacitus, writing of the Germans 1800 years ago, noted this thing: "Without being armed they transact nothing, whether of public or private concernment."

And the German quest for "lebensraum" took the familiar pattern. Instead of going to neighbors with mutual advantages to be freely accepted, she went with the threat of planes and tanks. And what has happened is the only thing that could have happened. Some day the war will end. And then the problem of economic living-space for 80,000,000 Germans will be back where it was before Munich, when Europe made its last frantic effort to solve its problems by wits instead of war.

That effort failed. Hitler's effort to force his own one-sided solution by blood and bomb will fall. Only a peaceable and voluntary rearrangement of Europe offering decent economic living-space for all can offer hope for the future.

Youth Finds Jobs

The National Youth administration has never in any of its varied enterprises done more for young people than in Illinois, where it has helped 12,000 of them to find jobs.

In a five-week campaign, the state NYA, headed by Mary Stuart Anderson, put young people at work on the job of hunting a job. The NYA distributed 23,000 pamphlets containing helpful suggestions, ideas, and tips on job-seeking. Mass meetings were held, and the help of employers and potential employers was enlisted.

Returns from young people who joined in the campaign, not all of whom were connected with NYA, indicated that 12,000 had landed some sort of a job.

The campaign was so successful that national headquarters of the NYA is recommending the plan to the other 47 states, realizing that the best help is always the help that helps someone to help himself.

The New World Grows

Population is growing much faster in the new world than it is in Europe.

Prof. Raymond Pearl of the Johns Hopkins university, one of the leading American authorities in population trends, told the American Scientific congress that this was true. But he also suggested that it follows that the American nations should consciously make their plans with this fact in view.

The European war will once again decimate population growth there, for dead men breed no sons. The very countries locked in struggle in Europe today are feeling the lack of the sons who should have been born directly after the World war, but who were never to exist.

Population growth in the western hemisphere is more than seven times that of Europe, reports Professor Pearl. The growth and progress of the new world is only beginning.

EMBARRASSING MOMENTS—BASEBALL STYLE!

Dear Pot Shots:

Speaking of first impressions, let's ponder the mental handicap that may or may not exist for one younger named Moran, a brand-new pitcher just signed by the Cowboys. Moran was working out with the Cowboys Tuesday afternoon. Frank Tobin, the managerial biggie, was at the plate as the pitcher whipped 'em over. After a couple throws, Manager Frank yelled to Moran: "All right, cut loose with one."

So the boy did... and whammed a speed ball right into Manager Frank's arm!

—Little Dogie

PS—No. 1.—But I wouldn't be surprised if this Moran gent turns out to be quite a pitcher.

PS—No. 2.—And how hard do you suppose Dick O'Boyle was hurling 'em in practice when Holocast Hughie, the Ponderous Pace (business managerial biggie) stepped up to the plate and rapped out some hits?

PS—No. 3.—Dontcha think you'd better tell this Neal Arlett gent, of the Idaho Falls team, that a certain motion of the hands in relation to the nose is considered a breach of etiquette here when directed at the right field bleachers?

—L. D.

WELL, YOU DONT MARRY A NAME, ANYWAY!

Dear Pot Shots:

Since there's a marriage in the Harry Musgrave family today, I feel it's a good time to bring up a matter of quite some years standing in regard to Mr. and Mrs. Harry themselves.

Harry's a good-humored joker so he can take it.

Anyway, when Harry was being married those quite some years ago, it seems the minister was also well acquainted with others in the Musgrave family. Throughout the ceremony when he should have been asking "Do you, Harry, etc., the reverend unintentionally kept saying "Do you, Walter, etc."

Walt, as who doesn't know, is now country auditor of these parts.

Harry sputtered once in an effort to stop the minister, but couldn't. When the cleric got all finished and found out what the trouble was, he tushed a couple of tushes and refused to go over the ceremony again.

—Hometown Hannah

TAKE THIS, YOU BEARD GROWERS!

Dear Pot Shots:

Let me serve you a neat disillusionment to the Twin Falls whisker growers who have a sneaking hunch they're impressive. This disillusionment comes from the lips of a veritable babe.

Dr. F. F. McAttee's grandson, age one and a half years, is visiting here. He was sitting in the car with his mother in front of a downtown store. Two of our local bearded beauties came up and started talking on the sidewalk in front of the car.

The little boy stared. Then he stared some more, with his mouth open. His mother thought he was going to be frightened and start weeping.

But the youngster just sat back and barked: "Bow wow wow!"

—Jonbee

BABIES, JUST BABIES—AND CORRECTION!

A feminine voice called the social editor Tuesday evening. The social editor had gone home so a nearby reporter answered the call. The lady, name unknown, wanted correction of a statement concerning the incubator baby pictured on the social page yesterday. She wanted it pointed out that the baby is not the smallest one ever born at the local hospital.

The puzzled reporter, not exactly knowing what to do with a statement that somebody is not something, asked Pot Shots to help out.

So we obligingly do penance for the social editor's sin. The baby in Tuesday's picture was NOT the smallest baby born at the hospital. We hope everybody's happy now with this momentous matter settled.

FEATHERED NO LONGER

Dear Colleague:

Calling to mind your ancient history, let me add another definition to the Pot Shots dictionary.

BIRD—Feathered creature that formerly flew in the skies above Europe.

—Professor Phil

MORE OR LESS VITAL INFORMATION

For what use you people may make of it, Pot Shots hereby advises you that a Jitterbug is now tame stuff and the latest is a "Jitterbug."

Definition of a splinterbug, by way of a contest in Milwaukee, Wis., is "a Jitterbug without shoes."

It seems the splinterbugs feel that bare toes give them more grace.

We don't suppose we lead a holy enough life to deserve it, but Pot Shots would like to be around when a splinterbug really picks up a splinter.

FAMOUS LAST LINE

"... Hitler isn't going to invade us, Junior, and you still can't have that 23 rifle."

THE GENTLEMAN IN THE THIRD ROW

HISTORY Of Twin Falls City & County

As Gleaned from Files of The Times

15 YEARS AGO

MAY 12, 1925

A summer course in kindergarten and supervised playground with morning and afternoon classes will be offered under the supervision of Miss Mary Newman and Miss Margaret McAttee.

Twin Falls Lodge A. F. and A. M. entertained Masons and their wives on Wednesday evening in the Masonic temple. The program included illustrations by Mrs. Herman Schuriger; illustrated songs by Koehler, leader; with George Duncley as accompanist; violin numbers, Miss Margaret Phelps; piano numbers, Miss Charlotte Vogel, and vocal solos, Miss Flo Cook and Miss Jeroma Kirvanek.

27 YEARS AGO

MAY 12, 1913

The district meeting of the Daughters of Rebekah will be held in the hall over the Idaho Department store Wednesday, June 11. The meeting will be attended by delegates from Buhl, Piler, Twin Falls, Kimberly, Burley, Heyburn, Acquia and Albion.

Albion Men Give Grange Program

ALBION, May 22 (Special)—At a recent meeting of Albion Grange regularly, a Mother's day program was put on by the men of the Grange under the direction of the executive committee.

Program consisted of a duet, "Sitting in the Twilight," by J. Vard Chaburn and Professor A. L. Dobbs; reading, "College Oil Cans," Howard Haller; song, "Mexico Way," by Little Marna Haller.

Reading, "It Isn't the Things You Do," was given by Edgar Burgess; guitar duets, "Dark Hawaiian Eyes" and "Honolulu March," Delwin W. Johnson and Carl Parley; solo, "Beat It," by Carl Parley.

Each mother was presented with a carnation. Refreshment committee was J. H. Mahoney, Willis Sears and F. G. Butler. Next meeting will be May 28. Program will be an safety campaign.

Plans are being made for the county Pomona Grange, which will be held in Albion Grange hall Saturday, June 1.

LOVE, COURTSHIP AND MARRIAGE

By ERNEST R. AND GLADYS H. GROVES

Noted Authorities on Marriage Relations

What is the purpose of the engagement? By publicly announcing their decision to become husband and wife, the couple remove themselves from the turmoil of courtship, with its uncertainties and secrecy.

They can now go on more calmly, sure of themselves and of each other, to take the next step toward marriage. So long as they were not committed to each other, the possibility of a break-up hovered on the horizon. Some new person might come along who would carry off the loved one. In spite of solemn vows, privately said, one knew that many others had believed in the same thing.

Both get a foretaste, now that the engagement has been announced, of the reactions of friends and relatives to their union. Opposition may be so strong that either one may want to break the engagement. Or the same amount of opposition may only drive the two closer together. They may have expected trouble, and be surprised to find none; and this very lack of opposition may take some of the zest out of their alliance, for one or both.

Being accepted lovers, they find it easier to arrange to be together, not bothered by other people. Privacy is often their ally, and they have a chance to get to know each other well.

Many things they want to find out, as to their marriage expectations, their own and each other's marriageable qualities. In this they will fare better, and learn more, if they do not let their mounting dependence on physical nearness cloud their judgment. They need to know that each responds to the other, emotionally and physically. They also need to keep their heads clear, that they may still give each other a final stamp up before taking the next step into marriage.

HIGHLIGHTS FROM LATEST BOOKS

POSTAGE STAMP THAT PUT PANAMA CANAL IN PANAMA

Even if postage stamps mean nothing more to you than the best method of getting a letter to a friend or a check to a firm to pay a bill, you'll find Mauritz Halgren's "All About Stamps" (Knopf, \$3), a delightfully interesting book. It is a stamp collector's bible. Halgren has missed little, if anything, in his story of the postage stamp. He goes beyond the inauguration of penny postage in Great Britain 100 years ago, discusses early mail delivery in ancient Rome, China, even among American Indians. He analyzes the urge to collect, cites a few reasons for pasting the tiny labels in volumes in the following excerpt:

Postage stamps are not only a part of our everyday life, and not only an interesting suggestion of exotic lands and strange nations among which we might like to go adventuring; they have, both individually and collectively, broad and often fascinating historic interest such as is rarely found in other collectible objects.

According to an old philatelic story, it was the Montomoto stamp of Nicaragua, depicting a belching volcano, that persuaded the congress of the United States to put the Panama Canal in Panama.

Another informs us that in 1860 Charles Connell, postmaster of the then British colony of New Brunswick, put his own portrait on a new five-cent stamp. The people of New Brunswick were convinced that this effort at self-publicity was to be a first step toward the establishment of a dictatorship with Connell at its head. They promptly got rid of Connell and soon thereafter drove him from the colony with their ridicule and criticism.

More recently two United States stamps, one of them portraying General Sherman, the other showing General Lee with a star shining from his collar, deeply wounded the feelings of many unscrupulous collectors in the Deep South. They took the business as a calculated insult to the Confederate cause, talked darkly of re-opening the Civil War, but ultimately compromised with a boycott of the two stamps.

SHOSHONE

Mr. and Mrs. George Harrison left Friday for a two weeks visit with relatives in Colby, Kas. Mrs. Harrison's mother, Mrs. L. L. Moore, accompanied them as far as Lu Junction, Colo.

Mrs. W. E. Nye, Sweetgrass, Mont., has been here the past week visiting Mr. and Mrs. Ben Walker.

Mr. and Mrs. F. J. Haruda left last week for Omaha, Neb., where Mr. Haruda will attend summer school at Creighton college.

Frederick the Great despised the German language and ignored German writers, although he was king of Prussia.

WATERPROOFING NEEDED

The increased use of air conditioning makes advisable the installation of waterproofing on insulating sheathing boards which are used on exterior walls, advise Pit-Tex engineers. Asphalt on the boards prevents passage of moisture through walls. The amount of vapor in the air is often multiplied many times by the operation of modern air-conditioners.

QUALIFICATIONS CHIEFLY MENTAL

Settling Alaska is largely a matter of picking properly qualified people, Stefansson believes; and he thinks the qualifications are chiefly mental rather than physical.

"Physically, all races are alike, as far as endurance of sub-Arctic weather goes," he says. "Two of the best men I ever had in the north were South Sea Islanders. Peary's best traveling companion was Matt Hanson, a Maryland Negro. It's the mental attitude that counts."

Settlers should, primarily, be people who are deeply desirous to live in Alaska. If they are refugees from oppression or other hardship, so much the better—then they'll be willing to stand pioneering, and won't all the time be thinking how much more comfortable they'd be if they went back home."

HAZELTON

American Legion fifth district convention was held here last week in the high school building. One hundred fifty-three delegates served at the banquet. Department Commander Homer Hudeston, Boise, and Department President Georgia Forman, Pocatello, were among those present.

Diplomas were presented to 18 seniors at the high school Thursday at the completion of their four years' work. D. L. Brashears, Boise, was speaker.

Rev. and Mrs. Charles Hawley left this week for Rochester, N. Y., where he will attend as a delegate the Presbyterian general assembly. They will be gone about three weeks.

Hazelton grade school girls participating in Jerome county track meet at Eden last week won the basketball game from Russell Lane 9 to 4. Hazelton boys were defeated by Dixon.

Miss Irene Studevant, who has been a teacher in Hazelton grade school for the past two years, will go to Mullan for the coming year. Eighth grade class met at the Frank Heistand home for breakfast and presentation of diplomas, after which they left for a trip to Boise.

Mr. and Mrs. J. E. Wilson returned last week after an eight months' visit with relatives and friends in Iowa and Indiana.

Edward Bush, formerly of Oklahama, died at his home here following a long illness. Funeral services were held in Jerome Thursday. Mrs. Lamar Simmons has returned from Utah where she attended the funeral of her mother, Mrs. Peter Peterson.

Presbyterian services will be conducted Sunday in the absence of the pastor by a gospel team from the College of Idaho. Rev. James Millar will be in charge.

Three new grade teachers have been hired from the following year. The grade school faculty will be as follows: Principal, Ernest Albertson; Boyd Earl, Norma Biggs, fifth and sixth grades; Kathleen Coleman, third and fourth; Florence Ibeckie, primary.

Miss Betty Detweiler, a freshman at the University of Idaho, has been elected to Sigma, a national women's honorary organization, according to word received.

Mrs. William Detweiler returned Monday from Moscow, after spending Mother's day with her daughter. Several Hazelton citizens are on jury duty in Jerome this week. They are Fred Lutz, John Gottert, Ernest Reed and Wallace Christopherson.

Practically all farmers near Hazelton are cutting and planting potatoes this week.

25 MILLION PEOPLE

Stefansson believes Alaska could be developed to support a population of 25,000,000. In climate, soil and topography, he points out, it is much like Scandinavia and Finland.

"Alaska's agricultural possibilities haven't been touched," he says. "There is a great deal of excellent wheat land in the Thana and valley, near Fairbanks. Further south the soil is good for all kinds of market gardening. There is plenty of fine grazing land for sheep and cattle."

"Alaska has all kinds of minerals—coal, copper, oil, tin, to name but a few. It might not be economic to exploit those fully now, but skeleton enterprises should be set up."

Pinochle Party At Armes Home

FILER, May 22 (Special)—Dr. and Mrs. R. Armes gave a nicely arranged buffet supper and pinochle party Friday evening for 18 guests. The quarter supper tables were centered with bud vases of painted daisies, a lovely bowl of full bloom roses centered the buffet, table and quantities of lovely purple iris were used for room decoration.

High pinochle score prizes went to Mrs. Earl S. LaHue and Dr. Newberry and low score prizes to Mrs. George Erhardt and Ed Reicher.

THE GENTLEMAN IN THE THIRD ROW

GERMANS SLOWLY SQUEEZE ALLIED ARMIES INTO TRAP

NAZIS EXPECTED TO HOLD MILLION MEN IN BELGIUM

By JOSEPH W. GRIGG, Jr. BERLIN, May 22 (AP)—The high command said today German troops were slowly squeezing allied armies trapped in northern France and Belgium by driving northward from the river Somme, but that fierce resistance had been encountered on the historic World war battlefields of Flanders.

Germans predicted the German breakthrough to the channel soon would destroy allied armies of perhaps 1,000,000 men in the north, but the high command communique issued at Adolf Hitler's headquarters in the field indicated a desperate and perhaps a long struggle was ahead for control of the channel ports from which an attack would be launched on England.

The communique claimed progress, however, including:

An advance northward along coastal railroads from Abbeville to the mouth of the river Somme, against Montreuil, 20 miles away and half way to Boulogne.

Northward Thrust

A similar northward thrust from the Somme at Amiens toward St. Pol, on a line parallel with the Abbeville-Montreuil drive.

Fierce fighting against the British in Flanders (in the center of the German trap) and the repulsing of an allied attempt to break through the trap by a counter-attack, led by British tanks, near Arras.

Heavy aerial bombardment of the Belgian port of Ostend and of the French ports of Dunkirk, Calais, Boulogne and Dieppe. These are the rear doors through which the British and other allied forces trapped in the north might retire, and the official news agency said that Germany's air fleet had orders to "destroy" the "retreating" British either in the ports or on their ships.

Successful Attacks

The high command said the German air force yesterday had made successful attacks, especially on the enemy's rear communications lines.

The communique said the allies lost 120 planes, including 35 shot down in air battles and 1 brought down by German anti-aircraft guns. Ten German planes were missing.

The railroad stations at Compiègne and Orel were set afire, the communique said. (The World war armistice was signed in Compiègne forest).

The communique also said that in French and Belgian harbors and off the coasts, the German air force had destroyed one cruiser and 11 merchantmen or transports.

German speed boats, attacking the French channel ports, sank one enemy auxiliary cruiser, it was added.

The communique said the Germans had captured 35,100 Dutch, Belgian and French prisoners and taken a powerful Belgian fort at Neufchateau, near Liege.

Marion Talley, Daughter, Home in West

Marion Talley, opera singer, and her daughter, Susan, 5, arrive at Los Angeles to make their home in California. Miss Talley won the custody of her daughter after a long court fight with her husband.

JAYCEE HEADS TO BE INVITED HERE

Idaho's new state Junior Chamber of Commerce president and the outgoing leader will both be invited to attend next Monday evening's general membership meeting of Twin Falls Jaycees, the board of directors announced today.

Charles R. Stark, Jr., Nampa newspaperman, is the new president. Ben Johnston, Preston attorney, was leader last year.

The local board decided to invite the pair to make presentation of the Gelsenbler plaque to the Twin Falls group. The award was voted at the state convention in Jerome for the outstanding Twin Falls Jaycee recreational project.

CASTLEFORD

Jeanette Shelton organized a 4-H sewing club last week for the girls north of Castleford. Name of the new club is the Happy Seamstresses. Members are Virginia Wachter, Ella Dana, Jeroma Zach, Evelyn Reed, Elnor Selma, Della Goodwin and Maxine Wechtrie. Virginia Wachter was elected president.

Mr. and Mrs. Wesley Flynn and son, Don, Sacramento, Calif., have been visiting Mr. and Mrs. Walter Tschannen and family and other relatives and friends. They were accompanied to Idaho by S. W. Foresberg and S. H. Finnenbothm, also of Sacramento.

Seniors spent the week-end in Salt Lake City on their sneak. They went in Fritz Bybee's school bus and were accompanied by their adviser as well as Mrs. August Peterson and Mr. Bybee.

Miss Marian Du Jardin, who has been attending business college in Salt Lake City, is visiting her parents, Mr. and Mrs. Herman Du Jardin.

Mrs. Earl Hudson was hostess to Bid or Bye club last week. Prizes were awarded Mrs. Fred Ringert, Mrs. Walter Tschannen and Mrs. Guy Kinyon.

Castleford teachers enjoyed a steak fry at Shoshone falls last week, and afterwards attended the show.

D. D. Gibbs gave a talk on education at Buhl Kiwanis club luncheon last week. Marion Darrow sang "Morning", Norma Jean Darrow sang "At the Balalaika", and Dorothy Brown played a piano solo, "Ben Hur's Chariot Race."

Mr. and Mrs. Roger Erb will teach at Lucerne next year.

Tonneau rug wear can be reduced considerably if the floor covering is kept clean. Methodical vacuum cleaning is the remedy. It is the grinding action of the dirt that causes rug threads to be cut. Give particular attention to the spots where the footrest touches the carpet.

SHOSHONE WILL BACK ARCO ROAD

SHOSHONE, May 22 (Special)—Discussion of the meeting of Southern Idaho, Inc., held at Buhl Monday night occupied the greater part of time at the Monday noon meeting of Shoshone Chamber of Commerce with the chamber reaffirming its stand to designate only one road, that one being the Arco-Richtfield project, as its goal to work toward for the coming year.

G. R. Maxwell and Harry Pultzer attended the meeting as representatives of Shoshone chamber.

Upon an inquiry about the Shoshone ice caves it was brought out that the guide at the cave had been paid WPA funds but this has been discontinued, however, he was still living there and conducting visitors through the ice caves for just the amount received from appreciative persons.

A report was given from the committee on the potato cellar and it seems that no financial backing can be secured unless the farmers are willing to sign a three-year contract.

Judge Howard Adkins reported that the Red Cross chapter had been asked to secure \$300 as the Lincoln county quota for relief in Europe.

The chamber president, Dr. F. H. Howard, asked the members to give consideration to the idea of forming a builders and trade group for Shoshone.

Breeders to Show Cattle in Burley

BURLEY, May 22 (Special)—Definite action was taken by Holstein breeders in Minidoka and Cassia counties this week to hold a "Black and White Show" at Burley on June 14.

Action was made at the conclusion of a tour last week to interview breeders relative to the show and encourage Holstein breed activity. The tour was made by 25 stockmen.

Stops were made in Cassia county at the breeders' places of R. H. Jacobs, H. T. Jacobs, L. A. Gillett and V. Whipple, all of Declo; H. C. Bortz, Floyd Wolfe, G. A. Good, Howard Allen, G. R. Congleton and Perry Trout, all of Burley. Stops made in Minidoka were at the farms of Edwin Ames, Heyburn; Frank Maracle, L. A. Jensen, Joe Giesler, L. A. French and Charles H. Harger, all of Rupert. County Agent W. W. Palmer directed the tour in Cassia county, and County Agent C. W. Dalglish directed the Minidoka county tour.

Today at 8 p. m. a meeting will be held in the Cassia county agent's office, at which time definite committees will be set up to put on the show. All breeders are invited to attend the meeting.

MILES J. BROWNING, INC. Buick Dealer

ALBION

Born to Mr. and Mrs. Perry Whyland Monday at Cottage hospital in Burley was a son.

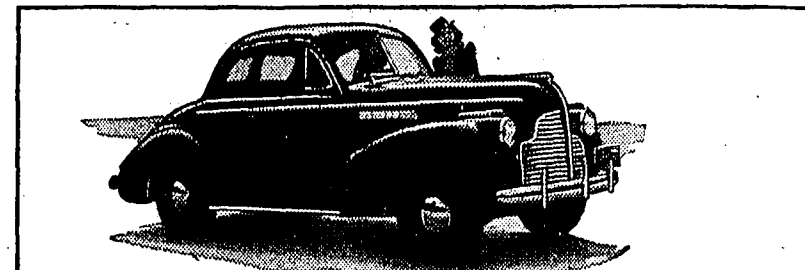

Mr. and Mrs. Walter Clark and daughter, Bernice, and Mr. and Mrs. Charles Wickle attended the graduation exercises of Miss Ruby Clark and Miss Dorothy Wickle in Logan last week. The young ladies graduated from Budge's Memorial hospital in Logan, Utah.

Order of the Eastern Star held its regular meeting in the Masonic hall Thursday. After the business meeting a memorial ceremony was put on by Miss Marguerite Sears, Mrs. J. B. Chaburn, Mrs. J. H. Mahoney, Mrs. V. E. Neyman, Mrs. F. E. Woody, Mrs. Fred Hagar, Mrs. Anna Gray, Mrs. Barbara Albertson, Mrs. Sadie Sears, Mrs. Bill Felman, Mrs. Marion Crystal and Mrs. May Anita Johnson. Mrs. Marlan Crystal gave a talk on things the new members should know about the chapter. Refreshments were served by Mrs. J. H. Price and Mrs. Maye Anita Johnson.

Mrs. N. N. Nash entertained Ladies' Aid society at her home Friday afternoon. Next meeting will be at the home of Mrs. George Conkhle.

Mr. and Mrs. R. H. Snyder left for Soda Springs Friday to deliver the graduation address at that place.

Mrs. Roy Harris was honored at a pink and blue shower Thursday at the home of Mrs. Mary Harris by Mrs. Albert Bell, Mrs. D. C. Harris and Mrs. Mary Harris.

Wouldn't it be tragic if you missed it!

JUST suppose that down the street a dealer had an automobile so close to your heart's desire that it might have been made to your own specifications.

Wouldn't it be tragic if you passed up that honey—just because you didn't inquire what the prices actually were?

Here and there that's happening, we fear. Happening because people who want Buicks aren't getting the actual facts.

Maybe you didn't know that there are five 1940 Buicks at five different price ranges.

That every one of these has a big, husky, straight-eight engine electrically balanced after assembly by Buick's own exclusive process.

That soft, stout coil springs are found on every one—that every one has recoil-mounted Knee-Action, finger-flick transmission, bona fide Buick styling—features literally counted by the dozen.

Buick prices begin at \$895* for business Coupe (Illustrated)

Sales are hitting new highs—so Buick dealers are ready to make swell deals.

"Best buy's Buick!"

Donald Martyn Wins Scholarship

College career scholarship of \$500 for the University of Redlands, Redlands, Calif., has been awarded to Donald Martyn, Twin Falls high school senior who is also the school's choice for state competition for the Oglethorpe scholarship.

The award at Redlands university would be distributed over a period of four years, as long as he remained in the upper fifth of the class scholastically. In high school he ranked sixth in his class, according to Edward Rogel, principal.

He is son of Mr. and Mrs. A. S. Martyn, Twin Falls. State winner in the Oglethorpe scholarship competition will compete for the northwestern states division of the seven scholarships offered by the school, and results will not be known until mid-summer.

Club Hears History Of Memorial Park

SHOSHONE, May 22 (Special)—Ladies of Shoshone study club met Friday in Mary Gooding memorial park for an anniversary picnic. Mrs. A. E. Vredenburg reviewed the history of the park, from its beginning 11 years ago until the present time. It was presented to the village of Shoshone on May 17, 1929, by the club, and since that time has seen the addition of several parcels of land and swimming pool besides various plantings.

Shoshone study club is the oldest women's service club in Lincoln county and the second oldest in Idaho. Mrs. D. Sid Smith, Mrs. A. E. Vredenburg, Mrs. B. A. Mabbutt and Mrs. Paul Haddock were committee in charge of picnic arrangements.

GOODING FIREMEN CAPTURE TROPHY

GOODING, May 22 (Special)—Gooding firemen captured the demonstration trophy as a feature of the 18th annual convention of the Southern Idaho Firemen's association, held here Sunday. The convention drew representatives from Burley, Jerome, Hatley, Rupert, Wendell, Glenns Ferry, Filer, Gooding and Twin Falls.

The business meeting was held in the morning at the courthouse with fire inspection the main subject for discussion. Improper electric wiring of many buildings was discussed.

W. C. Bissell, Gooding, was toastmaster at the banquet held at 1:30 p. m. Program for the banquet consisted of talks by Eric Whipkey, Gooding; Seth Harper, councilman from Burley; Chief Zeke Bartlett of Twin Falls; Chief Maggerts of Filer, and representatives from other towns present.

Harry Solomon, Gooding, first secretary of the organization, which was started Oct. 29, 1922, also spoke. E. L. Stilson, Gooding, was the first president of the association.

The program also included special

music by the state school orchestra. In the afternoon various teams competed in the demonstration in which three links of hose were thrown out and one from the center replaced. Gooding firemen won the cup by accomplishing this feat in 59 seconds.

NO PHONE CALL COSTS 15-CENT TELEPHONE CALL THE DIDN'T MAKE COST HARVEY DUKES 45. DUKES WAS FINED FOR DISORDERLY CONDUCT AFTER POUNDING ON THE TELEPHONE COMPANY BUSINESS OFFICE DOOR AND THEN SCALING A FIRE ESCAPE TO ENTER THE OPERATORS' ROOM. HE SAID HE WANTED TO MAKE A TELEPHONE CALL.

Pair Leaves on Extended Trip Following Double Ring Rites

Dignified in its simplicity was the wedding at 10 o'clock this morning of Miss Eleanor Caldwell, Twin Falls, daughter of Dr. and Mrs. G. H. Caldwell, Yarrington, Nev., and Thomas Edward Musgrave, son of Mr. and Mrs. Harry Musgrave.

The double ring ceremony was solemnized by Rev. E. L. White, Methodist minister, at the home of the bridegroom's parents, 147 Lincoln street, vows being pledged before the fireplace, the mantel of which was banked with the flowers of the season. Blending bouquets were grouped about the arched living and dining rooms.

Only immediate relatives witnessed the ceremony. Among them, were the parents of the bride and bridegroom and Mrs. Hattie Hendricks, Twin Falls, and Walter Musgrave, sr., filer, grandmother and grandfather of the bridegroom.

The bride selected a dusty pink sheer wool afternoon frock for her wedding, with which she wore blue accessories. A corsage of orchids completed her wedding ensemble.

She carried the handmade lace wedding handkerchief of her mother as a touch of sentiment, and wore a cameo necklace, belonging to the bridegroom's mother, as her "something borrowed" good luck charm.

Her maid of honor, Miss Aileen Groome, was frocked in a gray ensemble worn with rose accessories, and her flowers were gardenias.

Gardenias corsages also complemented the costumes of Mrs. Caldwell and Mrs. Musgrave. Mrs. Caldwell wore a black crepe princess style afternoon gown with touches of turquoise and a black hat.

For her son's marriage, Mrs. Musgrave wore a black dressmaker suit with white accessories and a black and white hat.

Wedding Breakfast

Following the ceremony, a wedding breakfast for 12 was served at the home of Mrs. A. C. Victor.

The tiered wedding cake, braced with orange blossoms, centered the table, flanked on either side by tall white princess tapers. Bridal place cards marked each cover.

Later in the day, Mr. and Mrs. Musgrave left on a veritable "story book" wedding trip, planning to motor leisurely throughout the east, the south, New England and parts of Canada, and to return to Twin Falls about July 1.

On Extended Trip

Their exciting itinerary includes Toronto and other points in Canada; the New York World's fair, Washington, D. C., and Florida cities.

En route to Canada, they will visit relatives of the bride in Chicago. They will also be guests of relatives of the bridegroom in New England. They will return from Florida by the southern states route.

Mrs. Musgrave was graduated from high school in Wheaton, Ill., and later took a secretarial course at a Wheaton business college.

Mr. Musgrave received his diploma from the Filer high school. He is associated with his father in the operation of Harry Musgrave's Merchandise Mart.

Marjorie Carlson Inspires Clever Bridal Courtesies

As a pre-nuptial courtesy for Miss Marjorie Carlson, Twin Falls, Mrs. M. A. Bishop, Jerome, entertained at a charmingly arranged linen shower recently. Miss Carlson will be married to Luther Evans, Jr., Twin Falls, early in June.

Springs flowers were used to decorate the rooms and as small nosegays favors for each guest.

After the desert luncheon, served at small tables, bridge was played with prizes going to Mrs. Sam Hatmaker, Miss Jean Overfield and Mrs. Harold Carlson.

Later in the evening the hostess wheeled in a tea table laden with many lovely gifts for Miss Carlson.

Present in addition to the hostess and the honoree were Mrs. L. O. Evans, Mrs. W. W. Wright, Mrs. Lester Powell, Mrs. Clifford Evans, Mrs. Harold Stenley, Mrs. Earl Smith and Miss Kathryn Pool, and Miss Dorothy Evans, Twin Falls.

Mrs. C. J. Carlson, Mrs. L. M. Zug, Mrs. Bob Williamson, Mrs. Frank Daley, Mrs. H. Streed, Mrs. R. Lee, Mrs. Harold Carlson, Mrs. Sam Hatmaker, Mrs. Pat Burns, Mrs. J. B. Overfield and Miss Jean Overfield and Miss Annabelle Zug, Jerome.

Margaret Vance To Wed in June

ALBION, May 22 (Special)—Dr. and Mrs. Arthur Vance, Provo, Utah, announced the engagement of their daughter, Miss Dorothy Margaret Vance, to Bert R. Rooker, son of Mr. and Mrs. John A. Rooker, Bellevue, Ida.

The marriage will take place early in June at the Latter Day Saints temple in Salt Lake City.

Mrs. Poindexter Feted at Shower

Mrs. Martin Poindexter was the inspiration for a pink and blue shower Tuesday afternoon at the home of Mrs. Ray Shepherd.

Mrs. Robert Turnpseed was co-hostess. Mrs. Jay Rugg, Duhl, and Mrs. F. E. Williams and Mrs. Ethel Plummer, Filer, were out-of-town guests.

Happily Marrieds on Honeymoon

Putting their luggage into their car preparatory to leaving on an extended trip to Canada, New England, New York and Florida are Eddie and Eleanor Musgrave, who became "Mr. and Mrs." at a double ring ceremony this morning. Mrs. Musgrave was formerly Miss Eleanor Caldwell. (Times Photo and Engraving)

Hostess Gives Party For Fiancee of Son

Charming among the pre-nuptial courtesies which have honored Miss Helen Severin, whose marriage to Elmer F. Ross, will be solemnized Wednesday, May 29, at the home of her parents, Mr. and Mrs. H. A. Severin, was the bridge luncheon presided over by Mrs. E. C. Ross this afternoon at her home on Walnut street.

Mrs. Ross is the mother of Miss Severin's fiance. She presented the honoree with an attractive gift.

Garden flowers in yellow and blue formed the decorations for the three quartet tables at which luncheon was served. Room trims were also in the two colors.

Contract bridge was the diversion of the afternoon. Present in addition to the honoree and the hostess were:

Mrs. Severin, Mrs. Ed Colbert, Mrs. A. P. Senior, Mrs. Robert Haller, Mrs. A. F. Oslund, Mrs. C. F. Wurster, Mrs. J. E. Tomlin, Mrs. J. H. Glandon, Mrs. Bruce Glandon, Mrs. Harry Ryan, Twin Falls, and Mrs. L. G. Hill, Filer.

Calendar

Needlecraft club will meet Friday at 2 p. m. at the home of Mrs. W. T. Seal, 529 Third avenue north.

Catholic Women's league will meet Thursday at 8 p. m. at the parish hall. Reports from each district, received at the deanery in Shoshone, will be given.

Evening Guild of Ascension Episcopal church will meet for dinner at 6:30 p. m. Friday at the parish hall. Mrs. Guy Ryman will be in charge of the arrangements.

F. M. club will meet at the home of Mrs. E. H. Maher Thursday at 3 p. m.

Leid-A-Hand club will meet Friday at the home of Mrs. Lena Pomeroy.

First ward Relief society of the L.D.S. church will meet at 2 p. m. Thursday at the church parlors with lesson leader, Mrs. Mary Wright, conducting the social service lesson on happiness. Musical numbers will also be presented.

Women's Friendship class of the Methodist church, scheduled for Friday, May 24, for a 1 p. m. luncheon has been postponed until Friday, May 31, because of a death. Mrs. Frank Holman and Mrs. Alice McDonald will be assistant hostesses.

First District Nurses' association will hold a special meeting at 8 p. m. today at the Rupert general hospital. Those wishing transportation are asked to communicate with Mrs. Elizabeth Smith or Mrs. Robert Haller. Results of voting on the proposed eight-hour schedule will be announced and Miss Mary Ann Reber, president, will give a report on her recent trip to New York City.

Three Couples Marry

SHOSHONE, May 22 (Special)—Nyle Swanson, Rheiffeld, and Esther Sjober, Jerome, were married by Justice H. M. Holler, Twin Falls, Donald Dale Hutchison, Hill City, and Lorena Cox, Fairfield, obtained a license Saturday and were married the same day by Probate Judge Howard Adkins. Friday William B. Hnote, Shoshone, and Oka Hines, Pocatello, obtained a license.

Lemon Juice Recipe Checks Rheumatic Pain Quickly

If you suffer from rheumatic or neuralgic pain, try this simple lemon juice recipe. Get a package of Hot-Ex Compound, mix it with a quart of water, add the juice of a lemon. Often within 48 hours—sometimes overnight—splendid results are obtained. If the pain does not quickly leave you, Hot-Ex will cost you nothing to try. Hot-Ex Compound is for sale at recommended wholesalers and good drug stores everywhere.

Courtesy Series For Mrs. E. Fish Ends at Dinner

Final of a number of courtesies which have honored Mrs. E. Fish, formerly Miss Clara Koster, was the smartly arranged dinner for 12 at which Mrs. John S. Feldhusen entertained last evening.

Striking arrangements of iris and pansies formed the decorative details. Guests were seated at a single table for dinner. Contract bridge followed.

Mrs. Jessie Husted received women's high score prize, and men's honors went to Russell Northrup.

Leaving for Moscow

Mrs. Fish was presented with an attractive gift. She is leaving Saturday for Moscow, accompanied by her niece and nephew, Bobby Lou and Johnny Koster, Idaho Falls.

Clever in all details was the dinner party at the Wilson party house in Kimberly last week, planned as a complete surprise to Mrs. Fish by the 24 members of the Lincoln school faculty, where she has taught for the past several years.

Bidden to the apartment of Miss Sarah McQuaky for an informal dinner, she was greeted shortly after by a traffic cop, who informed her that he had a traffic violation against her at Kimberly.

She was escorted by "the law" to that place, but instead of facing the judge, was transported to the party house where co-educators greeted her with the customary "Surprise, surprise!"

The hostesses carried their fun even farther, using the name of the honoree as the inspiration for their decorations.

Gold Fish Decor

Centering the dinner table was a large bowl of gold fish, and at either end were smaller replicas of the centerpiece. Designs on the place cards were repetitions of the theme.

Two lovely gifts were presented to the honoree. Variety games were played.

Farewell Party For Lee Jordans

Mr. and Mrs. John P. Kinney were hosts at a 7 o'clock dinner last evening, honoring Mr. and Mrs. Lee Jordan, who left with their family today for Oregon to make their home.

Mr. Jordan has been associated with the Kinney Wholesale company for the past 12 years. Guests were employees of the company and their wives.

Snowballs and iris formed the central decoration for the single table at which 28 guests were seated.

At contract bridge Mr. and Mrs. Harold J. Groves won honors.

The guests of honor were presented with a farewell gift.

Bellevue Student Among "Top Ten"

UNIVERSITY OF IDAHO, May 22 (Special)—Evelyn Williams, Bellevue, was selected one of the 10 outstanding senior women on the Idaho campus by Theta Sigma, journalism honorary. The announcement was released in the annual Theta Sigma edition of the Argonaut, student newspaper.

Miss Williams is national president of Cardinal Key, senior women's honorary. Member of Delta Delta Delta social sorority, former advisor of Sigma sorority women's honorary, and former editorial secretary of the Gem of the Mountains, yearbook.

Other women selected in the "top ten" were Rachel Braxton and Margaret King, Boise; Willean Shaver and Margaret Marcus, Kellogg; Jean Cleveland, Kootenai; Jean Cunningham, Spokane; Pae Harris, Idaho Falls; Maxine Miller, Nez Perce; and Virginia Tweedy, Caldwell.

Officers were elected during the meeting. They are Mrs. E. J. Step-Ken, president; Mrs. Ward, vice-president; Mrs. George Sandholtz, secretary; Miss Clara Billiar, treasurer. Outgoing president is Mrs. Charles B. Beymer.

Seminary board members are Mrs. Florence Benson, chairman, Mrs. J. E. Langenwaller and Mrs. John Kimball.

Nineteenth study lesson completed was on the World war and its consequences. Mrs. Step-Ken led discussion. Reports were given by Mrs. Kimes, Mrs. Langenwaller, Mrs. Ward, Mrs. Sandholtz, Mrs. R. P. Brewington, Mrs. Bert Sweet, Mrs. Milton Powell, Mrs. O. C. Hall, Mrs. Harold Lackey, Mrs. J. W. Marshall, Mrs. Harry Smock, Mrs. Harry Ball and Mrs. Annette Boone.

MEMORIAL DAY OUTING SCHEDULED

Orators of the Moon or San Jacinto, Nev., will be destination of the Berean class of the Church of the Brethren on Memorial day, according to plans for an all-day outing made Sunday at a pot-luck dinner at the home of Mr. and Mrs. Marion Holloway.

At the Sunday meeting devotionals were led by Charles Ronk, and Mrs. Frank Holland conducted business. Pitching horseshoes was enjoyed by the men during the afternoon while women visited.

On Sunday, June 9, the class will meet at the home of Mr. and Mrs. Vernie Melton.

B. P. W. "Post Convention" Treat

Distances were so short between Boise and Twin Falls that Miss Margaret Hickey, St. Louis, Mo., extreme right, national education chairman of the National Federation of Business and Professional Women's clubs, was able to attend a no-hostess luncheon at the Rogerson hotel this noon, arranged in her honor. She was national speaker at the state convention which closed yesterday in Boise. Photographed with Miss Hickey are, left to right, Miss Frances Schermerhorn, new Boise club president, and Miss M. Izzetta McCoy, Twin Falls, state president, who were among those who met Miss Hickey upon her arrival in Boise.

National Capital Friendship Leads Couple to Altar

BUHL, May 22 (Special)—Miss Margaret Turnpseed, Pocatello, and Harold E. Harper, Quantico, Va., were united in marriage Wednesday evening at the country home of the bride's parents, Mr. and Mrs. Robert Turnpseed, in the Springs district southeast of Buhl.

The single ring service was read by Rev. G. W. Downing at 7:30 o'clock and in the presence of relatives and a few close friends. The couple stood in the archway between the living and dining room. The home was lovely with a profusion of spirea, honeysuckle and tulips.

The bride is a graduate of the Buhl high school, she taught in the Twin Falls Business college three years, was employed in the state house at Boise with the law enforcement office three years and spent one year in the office of the Federal Power commission in Washington, D. C. For the past eight months she has been employed in the biological survey department in Pocatello.

The couple met while the bride was in Washington, D. C. Mr. Harper is with the navy government department in Washington, D. C.

Mr. and Mrs. Harper left Wednesday evening for a short honeymoon trip to Boise and Sun Valley.

EULALIA CRANE HONORED AT SHOWER

Handkerchief shower for Miss Eulalia Crane in token of farewell followed a steak fry at Shoshone falls Saturday, held by primary board of Twin Falls L. D. S. stake.

Miss Crane, teacher in Bickel school, will not return next year. The shower followed group singing and games led by hostesses, Miss Crane, Mrs. LaVon Briggs and Mrs.

Dorothy Hopkins Guest of Honor At Bridal Party

Co-hostesses at the miscellaneous shower arranged last evening for Miss Dorothy Hopkins, Jerome, bride-elect, were Miss Helen Capps, Miss Charlotte Ruhhart, Miss Irene Lopez and Miss Cecilia Dennis.

The pre-nuptial courtesy for the former resident of Twin Falls took place at the home of Miss Capps.

At "Hollywood" Miss Hopkins and Mrs. Catherine Magee won honors, and at "Contract" prizes went to Miss Florence Grigg and Miss Luella Tinsley.

Peonies predominated in the setting of springtime flowers. Refreshments were served buffet style.

Present in addition to the hostesses, the honoree and the prize winners were:

Miss Dorothy Hollifield, Miss Mildred Smith, Miss Vi Rude, Miss Margaret Jones, Miss Margaret Brown, Miss Ynes Alastra, Miss Esther Slack, Miss Peg Leichter and Miss Helen Groves.

Diploma-Getting Significant for Trio of "Grads"

Classmates who started school together in Twin Falls 12 years ago in Washington, school will see each other graduate this month, although only one will graduate Thursday with Twin Falls high school seniors.

Miss Patricia Hodgkin, daughter of Mr. and Mrs. J. L. Hodgkin, now a student at Queen Anne high school, Seattle, Wash., accompanied by Miss Annette Thompson, of the same school, is visiting Miss Mary Frances Bates this week, and will attend graduation Thursday evening.

Friday the three girls will leave for Seattle, where Miss Hodgkin and Miss Thompson will graduate June 12.

Miss Hodgkin is president of the Girls' league in her high school, and Miss Thompson is treasurer. Yesterday they conferred with officers of the Girls' league of Twin Falls high school in an informal discussion on organization and finances. In the Seattle high school are 4,100 girls.

The friends have visited each other frequently since Miss Hodgkin moved away from Twin Falls several years ago, and have long planned to see each other graduate.

L. M. Ainsworth

Besides board members guests were Mr. and Mrs. Bill Johnson, Mr. and Mrs. Zeke Bartlett and Mr. and Mrs. Larry Matson. Before going on the outing, members met at the home of Mrs. Briggs.

Camp Mary Lois Schedules Picnic

Only meeting until September for Camp Mary Lois, Daughters of the Utah Pioneers, will be the annual jubilee picnic up Rock creek canyon Sunday, June 16, which families of members will also attend. In charge is Mrs. Juanita Hull.

Committee reports on the jubilee were made Monday at the home of Mrs. Thomas Speedy at the final meeting of the season. Four county officers, Mrs. Emma Luke, Mrs. Jane Bell, Mrs. Maude Mobley and Mrs. Iris P. Orchard were present.

During the program at which Mrs. Parker Richards, president, Mrs. H. H. Jensen conducted the exercises. All sang "When You and I Were Young Maggie," followed by prayer by Mrs. Lulu Atkinson.

Mrs. Edith Whitehead discussed the memorial fund. Mrs. Pearl L. Brown read the history of her grandmother, Mrs. Julia Parks Lindsay. Mrs. Harriet J. Finch gave the lesson on love stories of early pioneers. Group singing of "Juanita" and "Drink to Me Only With Thine Eyes" concluded the program.

A social hour with refreshments served by the hostesses followed.

Those who attended dressed in pioneer costumes were photographed in the gardens of the Speedy home.

ORCHALARA CLUB MEETS FOR DEMONSTRATION

Mrs. Amy Villa, Idaho Power company home economist, discussed "Making the Most of Small Electrical Appliances" when she addressed the Orchalara Home Demonstration club Monday.

The meeting was held at the home of Mrs. Ralph Taylor. Group singing of "America" opened the program. Guests of the club were Mrs. Ruth Reed, Mrs. Dick Leach and Mrs. Fomroy.

Mrs. Taylor and Mrs. Will Hubert served refreshments at the close of the evening. Mrs. Pearl Parish will be hostess at the next meeting of the club.

BRITAIN MUSTERS RESOURCES UNDER DICTATORIAL MOVE

LONG-RANGE BILL PLANNED TO GIVE FULLEST POWERS

By SIDNEY J. WILLIAMS
 LONDON, May 22 (AP)—Great Britain mustered its entire resources of men, industries and treasure under dictatorial powers today to meet the "grave peril in which the nation stands."

The government presented to parliament for immediate passage a far-reaching bill giving it full dictatorial control over all men and material resources of the country to meet the German threat.

The measure provides:

- Full government control over all industry and commerce with absolute powers to dictate production, close down factories or even destroy property where and if necessary.
- A 100 per cent tax on excess profits.
- Complete powers to draft labor, diverting it and employing it as necessary for the national defense.
- Control over national banking facilities.

Action Necessary

All persons and all property in the British Isles to be at the full service and direction of the government.

This drastic action, Maj. Clement Attlee, member of Winston Churchill's inner war cabinet, told commonsense is necessary to throw the entire power of Great Britain behind the war effort and to meet the "grave peril in which the nation stands today."

All of Britain's manpower, and all of her vast industrial and financial resources must be placed at the disposition of the government without a moment's delay, he declared.

The government seeks control, Attlee said, not just "over some persons of some particular class of the community but over all persons rich or poor, employer or worker, man or woman and over all property."

Attlee asked that the house acquiesce in the unusual procedure of rushing the bill to passage in a few hours "in view of the grave peril in which the nation stands today."

The time has come, Attlee declared, when "we must mobilize the whole resources of the country. Every private interest must give way to the urgent needs of the community."

"Need All Our Weight"

"We must throw all our weight into the struggle. We cannot know what the next few weeks or even days will bring forth, but whatever may come we shall meet it as the British people in the past met and overcame their dangers."

Attlee told commonsense he was not asking for these extraordinary powers in any "spirit of panic" for there "is no need for panic."

"The result of the battle," he said, "we cannot know, but it must be clear to all that the next few weeks will be critical. Our ruthless enemy is throwing everything on the scales to force a victory but we are resolved that he shall not succeed."

The measure was endorsed by the major parties in commonsense and agreement was reached to speed it to passage. The lone dissenter was William Gillies, Communist member, who charged that it "represented a deliberate effort on the part of the ruling class to conquer the working class."

THUNDER of WAR

By United Press
BUCHAREST—The Rumanian general staff today announced additional reserves are being called up for service.

BOME—Foreign Minister Count Galeazzo Ciano went to Albania today to inspect work undertaken there after the Italian occupation.

BERLIN—Travelers returning from The Netherlands said today that German bombers had taken only 20 minutes to level most of Rotterdam and kill hundreds of its people.

AN ENGLISH SEAPORT—With Britain and her allies fighting with their backs to the wall in France a contingent of Canadian troops arrived in England today.

BERLIN—Responsible German quarters claimed today that German troops thrusting southwards in the direction of Paris had reached Soissons, 55 miles from the French capital. There was no official confirmation of the report.

AACHEN, Germany—Allied airplanes raided Aachen a few hours early today, leaving a number of homes in ruins and at least one person dead.

BELGRADE—Diplomatic sources said today that Italy had inquired about Jugoslavia's military measures.

STOCKHOLM—The semi-official news agency reported today a series of violations of north Swedish neutrality by "dozens of German airplanes."

SINGAPORE—Straits Settlements—A Bangkok dispatch reported today by King Amara Mahidol, 16, of Thailand (Siam), would leave Switzerland soon for France and afterward he would go either to the United States or to Thailand to continue his studies.

BERLIN—The high command said today German forces at Narvik were still holding out against superior enemy forces.

MOOSE, before submerging their heads to feed on aquatic plants, drop their ears at an angle which prevents water from entering.

Carpentier World Wars Apart

Sergeant Georges Carpentier with Kronprinz, a German shepherd he captured while thrice being decorated for bravery in World War I. Right as he appears today back in the uniform of French air force at the age of 46.

BURLEY

A marriage license was issued May 18 to Theron L. Jensen, 23, Inglewood, Calif., and Marie Walters, 18, Burley.

State Auditor and Mrs. Calvin E. Wright visited Friday with his parents, Mr. and Mrs. Lee A. Wright. Thelma Johnson filed suit this week for divorce from Albert Johnson, charging intemperance. She asks custody of two children and \$30 per month for their support.

Iris Bartholomew entered a complaint for divorce from Lee Bartholomew on charge of mental cruelty. She seeks custody of two minor children and household furniture.

Mrs. Donald McInlin and daughters returned Sunday morning from Welsler where they spent a week with relatives. Her mother, Mrs. Odessa, returned with her for a visit.

Loyal workers division of Christian Aid met Thursday at the church. A nominating committee was named to select candidates for the coming election. The program consisted of reports on the biographies of several Bible characters. Mrs. Lee Wright served refreshments at the close.

Mrs. Cleve Allen and daughter left Monday morning for Glenns Ferry to visit her mother, Mrs. Hinkley.

Members of the Minnie Camp Fire group held their "bacon and egg" hike Saturday morning. The girls hiked to Burley Municipal park and prepared their breakfast with two girls working together for their honors by cooking the meal on a hot stove.

Blue Triangle Guild gave a surprise kitchen shower Thursday afternoon at the home of Mrs. Herbert Canine honoring Mrs. Leslie Donnan, who is moving to Twin Falls to make her home. The program centered around flowers and Mrs. Steelsmith gave a reading, "My

Garden." Barbara Mae Burns presented each member with a bouquet of flowers, giving a short poem about the flowers and she gave them out. Mrs. Glenn Wyatt, who has been president of the group for the past two years, was presented with a gift. A group of children, led by Lavonda Gilchrist, gave a short skit.

Mr. and Mrs. C. H. McDonald and daughter, Judith, and Mr. McDonald's mother left Friday morning for Montana to visit relatives.

Lora Rawson, Rupert, won first prize in the Elks Americanization oratorical contest held last week, and became eligible to enter the state contest at Twin Falls in conjunction with the Elks convention June 3, 4 and 5. Opal Manning, DeLo, received second place, and Evelyn Shockey, Burley, won third.

Volunteer fire department and wives and friends attended a meeting of southern Idaho firemen's association at Gooding Sunday. Next meeting of the association will be at Rupert in October.

U. of I. Executive Speaks to Grads

Busy schedule of commencement addresses and other work has kept President Harrison C. Dale, University of Idaho, busy on his current southern Idaho tour.

Last night the university executive addressed Hollister high school graduates; Monday he spoke to Kimberly's graduates. He left this area today for Malad, where he gives the commencement talk Thursday night. Thereafter he will leave Idaho for Chicago in connection with university affairs, returning for the Vandal commencement in June.

King Mtsea of Uganda, Africa, is reputed to have had the largest harem in the world. Seven thousand wives were in his seraglio.

PAIR RECOVERING AFTER ACCIDENT

A young brother and sister, injured yesterday morning when their car left highway 30 near Murtaugh and overturned, were in "fairly good" condition at the county general hospital today.

The two are Tina Capple, Detroit, and Charles Capple, Portland, Ore. Both are about 25 years of age. They are suffering shock and minor injuries.

The car they were operating, a new 1940 model which was apparently the property of J. Chikoks, 1110 Southwest Second avenue, Portland, was practically demolished.

Exact cause of the crash could not be learned as condition of the two made it impossible for officers to question them. Investigating the crash was Sheriff L. W. Hawkins and Perry Brewington, of the state police force.

PAUL

Mrs. Walter Short and Mrs. Glen Short were hostesses to Y. M. C. club and contract bridge club jointly at Club cafe in Rupert Thursday. Mrs. Charles Easton won high score for the bridge club and Mrs. Clyde Greenwell high for Y. M. C. club. After the games a luncheon was served in the main dining room.

Miss Dona MacRae was hostess to Girl Scouts Thursday at the home of her parents, Mr. and Mrs. Angus MacRae. There were 12 members present, including the guardian, Miss Ruth Grohowsky. Games were played and picnic refreshments served on the lawn, after which they went to Paul where a skating party was enjoyed.

Miss Frances Hardin, daughter of Mr. and Mrs. Allen Hardin, was pledged to Theta Sigma, women's journalism, honorary of University of Idaho at Moscow last week. Pledges to the honorary are chosen on the basis of scholastic work, personality and professional attitude. Miss Hardin, who has conducted a feature column in the Argonaut, student newspaper, during the past year, served as feature editor of the special Theta Sigma edition published Friday.

Southern Idaho Tells Nation About Magic Valley Offerings

No less than 25,000 "invitations" to visit southern Idaho, view its wonders and share with residents of this section the thrill of fresh air and wholesome surroundings, were off the press today.

The "invitations" are in the form of illustrative booklets which were printed by the Times-News commercial department for Southern Idaho, Inc., the regional Chamber of Commerce whose members will see to it that they are distributed where America's "traveling public" will "eye" them and then travel through this section.

Color Cover

With a cover of yellow, trimmed in red, the booklets term Southern Idaho the "Sunland, Funland, Farmland" section of the United States and the paradise of the inter-mountain west.

Illustrative pages inside the attractive cover are in red, green and black. The initial page tells, in few words, the story of what the Magic Valley has to offer. These words are: "Name It, Mr. Tourist! Southern Idaho Has 'Em All!'"

Receiving special mention in the booklet, through individual pictures, are the lava flow at the Craters of the Moon, the Twin Falls-Jerome rim to rim bridge, Lake Cleveland, fishing on Wood river, and a typical southern Idaho farm scene.

Maps Help

In the center is a map of the area illustrating the various points of interest and showing how easily accessible they are to the tourist. Artist's sketches on the map make it easy to find "where it is." In addition to this illustrative map there is another map showing the entire state but outlining the southern Idaho district and urging tourists to follow highways 93 and 30 through this section.

The booklet points out that the area is foremost among the outdoor playgrounds of the nation, and adds that it also boasts one of the richest agricultural districts in the country.

Publication of the booklet was sponsored by Southern Idaho, Inc., in order to attract more tourist travel to this section. With war raging over most other sections of the world, tourist travel "at home" this year is expected to reach new high levels.

Maps in the booklet were drawn by artists of the two newspapers, the Idaho Evening Times and the Twin Falls News, while pictures were taken and engravings made by the newspapers' photographers and engravers. It was printed on the Times-News commercial presses.

IRRIGATION CUTS STORAGE TOTALS

Both the American falls reservoir and Lake Walcott showed drops in the amount of water stored, a comparison with figures of last week and figures received here today in a report from Lynn Crandall, watermaster, show.

Jackson lake showed a substantial gain over the same period, going to 629,920 acre feet from 610,920.

American falls reservoir, at the present time, is impounding 1,654,810 acre feet against 1,593,010 a week ago and Lake Walcott now holds 94,840 against 95,160 last week.

Precipitation during the past week was light. At Snake river a total of 30 of an inch of precipitation was recorded and at Ashton it showed 24 of an inch.

BRITAIN'S PLANES RAID IN GERMANY

LONDON, May 22 (AP)—Heavy British air attacks on German communications lines in Germany and Belgium last night were reported by the air ministry today while swarms of British planes patrolled the home skies on lookout for German bombers.

"Large bomber forces of the RAF throughout last night heavily attacked dense traffic moving over the enemy's communication systems," the air ministry's announcement said. "Objectives included railway junctions, marshalling yards and bridges over a wide area in Ger-

many radiating eastward from Aachen.

"Similar targets in the immediate rear of the battle areas also were heavily bombed, notably roads and bridges across the Meuse in the region of Namur and Dinant (Belgium)."

It was said British bombers and fighters today did their "utmost to harass German troops and mechanized forces in northern France."

MARKS

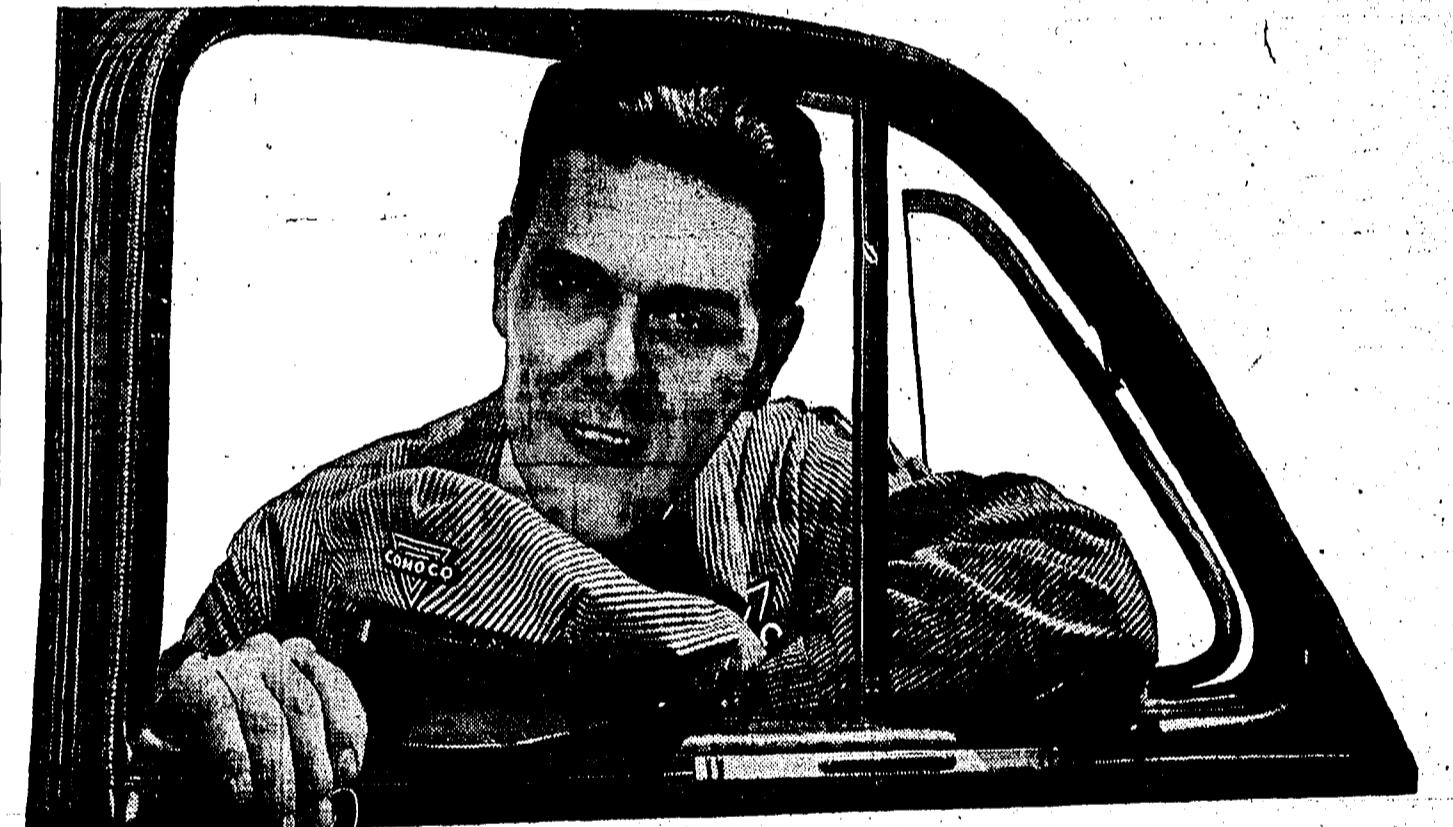

Few people know that temperature variations cause the plaster marks on certain walls. The marks are the result of moisture and dust depositing on the cooler plaster over the laths. Rising heat in the rooms penetrates ceilings more easily between the laths. One way to avoid these marks is to use broad sheets of insulating plaster base under the plaster.

COWBOYS GUN FOR FOURTH PLACE POSITION

Twin Falls Beats Idaho Falls in Series Opener, 4-2

By HAL WOOD
Evening Times Sports Editor

Out of the cellar and with a chance to climb higher in the standings any time they can win a game and the Pocatello Cardinals lose, the Twin Falls Cowboys will ride at Jaycee park again tonight against the Idaho Falls Russets.

The Cowboys will be seeking their second win after disposing of the Yankee farmhands here last night by a 4-2 count — through the combined efforts of Pitcher Stu Holdhusen and Outfielder Tommy Beitia.

Another new hurler will be on the mound for the Cowboys tonight when Damon Hayes, who pitched for Lewiston last year, goes against his teammates. Hayes was signed to a contract with the Cowboys last night and was immediately given a shot at Idaho Falls.

Strikes Out Nine
Manager Ken Mayer will start either Al Emmertson or Ed Smith as the Russets seek to even the series standings.

Last night Stu Holdhusen struck out nine and allowed only seven hits in turning back the Idaho Falls club. He was in trouble in nearly every inning, but he managed to pull out without too great damage as his teammates gave him perfect support.

The Cowboys got away to what looked like a big start when, after Bishop was out, Al Marchi singled and Tommy Beitia lashed a double down the right field line that was so hot it was past First Baseman Buddy Bates before he could get his hand out to stop it.

Bob Stagg then drew a walk to fill the bases, but Tommy Canavan popped into a double play.

The Cowboys got a run in the second when Endress singled, and Mullens was safe on a fielder's choice that erased Endress. Walker then came through with a double to score Mullens.

Two in Seventh
One more came in the third after two were down. Stagg drew another walk, Canavan was hit by a pitched ball and Endress singled again—a "bloop" and back of second base.

The Cowboys added two more in the seventh when Beitia hit a towering home run over the right field fence with none on base. Stagg filed

out to deep center, but Tommy Canavan connected for a triple and scored on Mullens' single.

Russets Score
The two Russet runs came in the first of the eighth when Rocky Blatto led off with a single. Mike Roser drew a walk, but Oldenberg fanned. Mayer, who had replaced Sheldon McConnell in the lineup after the latter had been injured, singled to score Blatto and scored himself a moment later when Fornl singled. Bill Beard grounded out to end the uprising.

The Russets went down in one-two-three order in the ninth, and the Cowboys were out of the cellar. Besides Beitia's two hits, Ernie Endress drew a pair of singles and Mayer got two singles—the only men on either squad to get over one hit during the evening.

Boise Narrows Bees' Lead in Pioneer Race

(By United Press)
The Boise Pilots closed in on the Salt Lake Bees in the Pioneer league baseball race last night and the battle narrowed so that only three and one-half games separated the first and last place teams.

The Pilots chalked up a 4-2 victory and the gap between first and second places was cut to a half game. Jack Mentz hurled the victory for the Idahoans.

At Pocatello, the Cardinals went on a seven-run scoring rampage in the first inning and coasted through to a 11-7 victory over the hard-hitting Ogden Reds. The victory kept the Cardinals in fourth place—a half game ahead of the Twin Falls Cowboys.

The Twin Falls club, in a cellar scrap with Idaho Falls Russets, checked up a 4-2 victory over the invaders in a well-played game. Only one error was made during the contest, but extra baseblows, including a triple by Tommy Canavan and a home run by Tommy Beitia decided the issue.

Yanks Come to Life To Drub Indians; Dodgers Beat Cubs

By GEORGE KIRKSEY

NEW YORK, May 22 (U.P.)—Joe Cronin may be having a little mental anguish over the Red Sox' pitching staff these days but there's one fellow who doesn't cause him a moment's worry—15-year veteran James Emery Foxx.

After all these years, Foxx (he's only 32, having broken into the majors at the tender age of 18) still is considered by the majority of American league pitchers as the league's toughest man to pitch to in the clutch. Recently a few of them have thought otherwise and walked Ted Williams to get at him.

They are soft-pedaling that stuff now because Foxx hasn't slipped a bit. In fact he's a better ballplayer physically and mentally than he was last year. Foxx's appendectomy last September, something he had been postponing for years, has figured importantly in his grade start this season.

For the second straight day Foxx yesterday hit a homer with the bases loaded and paced the Red Sox to an 11-8 victory over the Tigers. It was Foxx's 11th homer and increased his runs batted in to 38 in 98 games.

At the rate Foxx is going he can smash the major league and American league runs batted in records to smithereens.

The Red Sox were outthru by the Tigers, 16-11 but they hit four homers to Detroit's two and that meant the ball game. In addition to Foxx's Jackpot Ted Williams, Doc Cramer and Bobby Doerr hit for the circuit, the latter with two on. Denny Galehouse blew a lead and for the 12th straight time the Red Sox had to call in a relief hurler. This time it was Emerson Dickman who protected the lead and won his fourth victory, which increased the Red Sox margin over the Indians to two and a half games.

Yanks Break Loose
Yankee power, stilled by Bob Feller and Al Smith, exploded in the face of four Cleveland hurriers and the world champions beat the Indians for the first time this year, 10-2.

Fighting back with two late rallies

teams, the CCC club scored a victory, but since that time the Cedar Draw club has won three games in a row.

COWBOYS

vs.

IDAHO FALLS

RUSSETS

DIAMOND DUST FROM THE COWBOY CORRAL

It was the annual "straw hat" night at Jaycee park last night and the way the Cowboys went after the new spring toppers was a joy to behold.

With the fans hollering "win yourself a straw hat, Al," Mr. Marchi promptly obliged by singling. It took a double to get the next head piece, so Tommy Beitia promptly pounded out a two-base knock and two hats were gone.

After missing on two double play balls, it looked like Tommy Canavan, the "fancy Dan"—as the boys call him—was going to be without a topper. But he stretched in the seventh to make a triple and got his.

However, before that Tommy Beitia had clinched his second hat of the evening by pushing out a homer over the right field wall.

The other hat went to Frank Mullens for scoring the first run. There were also straw hats offered for the first sacrifice and the first double play, but the Cowboys failed to collect these.

Members on the Russet and Cowboy baseball teams didn't know it, but there was a scout for the New York Giants in the stands last night.

His name was Frank Brazil and he was doing a little ivory hunting for Bill Terry and family.

Brazil will look over Pioneer league talent—he saw some of the Salt Lake series here—and this week-end will take a look at the College of Idaho vs. Willamette series at Caldwell. He will probably be back in this territory Sunday and take a look at some of the South Central Idaho league games.

Brazil, incidentally, is an old friend of Manager Frank Tobin of the Cowboys and the pair once roomed together while playing professional ball in the Pacific Coast league.

As a matter of fact, they were at one time traded for each other, Brazil coming to Seattle and Tobin going to Portland. Brazil was a third baseman.

Last year he managed Memphis in the Southern association—an A-1 league.

They still continue to come and go at Jaycee park—the baseball players, at least.

Let's be added to the Cowboy roster is Damon Hayes, who did a very creditable job of hurling for the last-place Lewiston Indians in 1939.

Hayes was plucked up as a free agent after being released by Idaho Falls and will get a shot at "troveng" tonight. His record in 1939 shows that he won 14 and lost 10 for the Indians and hurled 21 complete games.

However, on top of that, he gives the Cowboy club a badly needed pinch hitter. Playing utility white not hurling for the Lewiston club last year, he appeared in 59 contests and batted .342. He got six doubles, two triples and six home runs while knocking in 40 runners.

Meanwhile, the Cowboy head wranglers have their lists set to get the signature of Frank Manchester, another hurler released by Boise, on the dotted line.

And the only hope is that he turns out half as good as has Dick O'Boyle, who has won three in a row since turning from Pilot to Cowpuncher.

The outfield situation will probably remain the same for tonight, but Dick Wake will be back in centerfield for the final game of the series and that means that Ted Walker will probably be benched—and draw his release.

Vern Reynolds' arm fails to show improvement, and the chances are he will be left at home when the Cowboys leave on their next road trip. That will leave Mullens, Wake and Beitia for the outfield patrol.

Beitia, incidentally, is recovering nicely from his hand injury and for the first time in two weeks the swelling has shown a tendency to go down. The result is that a proposed operation on the hand to clean out a blood clot has been abandoned.

Middleweight Title Row May Be Ended

NEW YORK, May 22 (U.P.)—Promoters Mike Jacobs of New York and Nate Drukmann of Seattle are believed to have reached a working agreement whereby the nine-year-old middleweight title dispute can be settled this summer.

Drukmann has rights upon the title services of Al Hostak who is recognized as champion by the National Boxing association. Jacobs has similar contracts with Ceferino Garcia, recognized by the New York commission, and challenger Ken Overlin, who meet in a title scrap at Madison Square Garden tomorrow night.

If Garcia, the 11-5 favorite, wins tomorrow night, he is expected to fight Hostak at Yankee stadium in July, and they probably will have a return bout at Seattle in September. If Overlin wins, he probably will fight Hostak at Seattle in June, and the Seattle victor will get a light heavyweight title shot at New York in September.

Rainers Beat Oakland as Padres Lose

(By United Press)

San Diego clung to its scant half-game lead in the Pacific Coast league today because the second-place Oakland club took a thumping from Seattle's Rainiers while the Padres were being nosed out by San Francisco's Seals.

Dick Barrett for Seattle turned the Acorns back with two hits to gain a 4 to 0 victory, his sixth in seven starts. Lloyd Christopher got one sound single and Hugh Luby a scratch bunt for the only blows off Barrett.

Los Angeles climbed into sixth place at expense of Sacramento when the Angels turned back the Solons 4 to 2 behind Lee Stine's six-hit pitching.

Hollywood was on a hitting spree and sailed into Laska, Master, Specco and Harrell for 17 hits and an 8 to 6 win.

San Francisco staged an eighth-inning rally to nip San Diego 6 to 4.

Four-Team Golfing Tournament Set At Burley Sunday

BURLEY, May 22 (Special)—Burley golfers and golfing fans will get a chance to see some of the finest amateur and professional shotmakers in the intermountain area in action here on Sunday when teams from Ogden, Idaho Falls and Pocatello take over the local course.

The visitors will be matched in a four-team match with Burley across over the fine local lay-out—claimed by many to be one of the best courses in the state. A special feature of the day will be a match between the professionals of the four cities: Ernie Schneller of Ogden, Chick Carried of Pocatello, George Orillan of Idaho Falls and Jim Edward, Burley. Play in the tournament gets under way at 10 a. m.

Social

Helen Stockton Marries in Boise

JEROME, May 22 (Special)—Miss Helen Stockton, daughter of Mr. and Mrs. H. S. Stockton, prominent North Side pioneers, was married at Boise, May 19, to Joe L. Adams, Boise, son of Mr. and Mrs. Charles E. Adams.

The single ring ceremony was performed by Rev. J. P. Fisher at the Methodist parsonage in Boise.

The bride was beautiful in a street length frock of bantam gold with tan accessories. She also wore a shoulder corsage of talisman roses. Present were intimate relatives of the two families.

Mrs. Adams was a graduate of Jerome high school class of 1936. Choosing as a vocation, nursing, she attended the St. Alphonsus hospital where she was graduated in September, 1939 and received her state diploma in December, 1939.

Mr. Adams has been a resident of Boise for the past 12 years. He received his high school education at Coffeyville, Kan. He also attended the University of Idaho, southern branch, Pocatello.

Following a short honeymoon trip the couple will live in Boise where Mr. Adams is employed. Mrs. Adams plans to continue nursing.

U. S. AMBULANCE DRIVERS MISSING

PARIS, May 22 (AP)—The ambulance field service, in an announcement today said four American drivers and two ambulances had disappeared during the battle around Amiens but it was not known whether they had been killed or captured.

The missing men were identified as John Clement, a Harvard University graduate whose home was in Boston; Donald Coster, Princeton graduate who lived in Montreal; George F. G. King, Cambridge graduate of New York; and Gregory White, Syracuse university graduate who lived in Vermont.

Four other American volunteer drivers still were missing after having been under bombardment in the Ardennes sector where Anne Morgan, sister of J. P. Morgan, was directing activities of the civil relief committee.

Utah Rite Weds Green, Van Orden

BURLEY, May 22 (Special)—Mr. and Mrs. Leon Green, recently married couple, returned to Burley last week to make their home. Mr. Green having been named again to have charge of the summer recreation work in the city.

Bride was formerly Miss Gwen Van Orden, teacher in the Southwest school for two years, and Mr. Green has been Burley Junior high school physical education director for three years. The couple was married Saturday, May 11, at the home of the bride's aunt in Bountiful, Utah.

Mrs. Green graduated from University of Idaho, southern branch, and has had one year of extension work. Mr. Green has his master's degree from the University of Idaho, Moscow.

CAMP FIRE GIRLS

MORNING GLORY

Morning Glory group of Blue Birds met at the home of Barbara O'Halloran. Stories were read. Sewing for dolls was done. Refreshments were served.

WATANAPO

A nature hike was held by Watanapo group of Camp Fire Girls Saturday, to Rock creek canyon, where the girls ate lunch, cooked over an open fire. Mrs. Alfred Wollschlaeger and the guardian, Mrs. N. O. Johnson, accompanied them.

IYOPTA

Girls worked on headbands at a meeting of Iyopta group of Camp Fire Girls last week at the home of the guardian, Mrs. H. G. Hayes. Previously they had entertained mothers at tea. Shirley McDowell and Marilyn Heinrich played piano numbers, Beverly Olson and Gloria Wilson sang "Annie Laurie," and Emma Holmes, Gladys Hyde and Beverly Olson sang "My Old Kentucky Home."

WACANIPOO

A swimmer at Nat Soo Pah was enjoyed by Wacaniya group of Camp Fire Girls Saturday after meeting at Washington school. Mrs. Gordon Day, guardian, accompanied them. Iah Bah and Evelyn Morris planned a treasure hunt and conducted it.

Next meeting will be a council fire in Kiwanis room at Shoshone falls Friday at 7:30 p.m. It will be the final meeting until next fall.

Jerome

Mr. and Mrs. H. S. Harper and two daughters, Shirley and Dorothy, Fayette were guests last week of Mr. and Mrs. DeWitt Quereau, Jr. Mr. and Mrs. Harper had been attending the Democratic convale in Twin Falls.

Mrs. S. D. Burks and daughter, Evelyn, left Friday for Virginia and other states. They will be absent for about six weeks. Mrs. Burks will visit with relatives.

County extension agent Eugene V. Whitman is among those attending the county agents' conference in Moscow this week. Mr. Whitman and son are visiting relatives there.

Mr. and Mrs. Ralph Shawver and grandson, Ralph Adams, Gooding, left last week for a vacation trip to Oklahoma and Missouri where they will visit relatives. Accompanying them are Mrs. Ben Diefendorf and daughter, Ruth, who will visit at Kansas City, and Miss Dorothy Wilson, high school instructor, who will visit during the summer at Traer, Ia.

Buhl

Dr. and Mrs. J. H. Murphy, Twin Falls; Mr. and Mrs. Wayne Hudelson, Gooding, and Mr. and Mrs. James Pence, Buhl, were guests at a dinner party at the Lawrence Van Ripper home Thursday evening. The group attended the graduation exercises at the high school. Miss Billie Lou Van Ripper was one of the graduates.

Mrs. Tom Hejmanek entertained members of the Lucerne Social club Wednesday with Mrs. Haught, Mrs. Lehman and Mrs. Black as guests. Mrs. Myrtle Brewer conducted a clever guessing contest and awarded the prize to the hostess. During the business meeting plans were made for the men of the district to begin work on the improvement of the school lawn.

Drinkers Punished

JEROME, May 22 (Special)—Four persons appeared this week before Police Judge Clark T. Stanton on charges of drunkenness. In each case the defendants admitted guilt. They were Theo. Gardner, who was assessed a fine of \$5; Francis Kinney, who in lieu of amount of the fine was "floated" out of town; Floyd and Orville Clark, who in default of the amounts of their fines will reside in the county jail for the customary seven and one-half days.

In mid-ocean the gravitational pull of the moon draws the water between 2 and 3 feet away from the earth's surface.

Deed: H. W. Barry to W. Earl, \$10, lots 4 and 11, block 108, West Lawn Subdivision, Buhl.

Barrymore Club Arranges Party

JEROME, May 22 (Special)—Twenty-six members and special guests were present at the annual spring luncheon given in honor of the past presidents of the Barrymore Civic club Friday.

The occasion was arranged at the home of the present president, Mrs. Dell Rigby, by all the members of the club to honor the first president, Mrs. Naomi Lavens. Mrs. Marie Snyder, Mrs. Elizabeth Smaral, Mrs. Mary Greenfield, Mrs. Lina Bush, Mrs. Marie Miller, Mrs. Beulah Diehl, Mrs. Elizabeth Heasler and Mrs. Lizzie Peterson, past presidents.

Following the luncheon where large guests were served from two long tables centered with vases of spring blossoms, a program was presented with the numbers being announced by Mrs. Peterson. Mrs. Wenona Gulick read a short selection in honor of the founding of the Barrymore Civic club, which was begun ten years ago last November.

Group singing of "Janna's" and "Old Black Joe" was participated in, followed by two readings by Mrs. Arthur Chatterton. Mrs. Tineley Lamm, of the Lamm Floral company gave an interesting talk explaining plantings of perennial flowers, arrangements of outdoor dining rooms, and proper methods of insect control of flowers. Mrs. Lamm also displayed a book containing perennials and shrubs which thrive in Idaho.

Gift exchange of Pollyanna was held, as the closing feature of the program. A business meeting, concluded the afternoon.

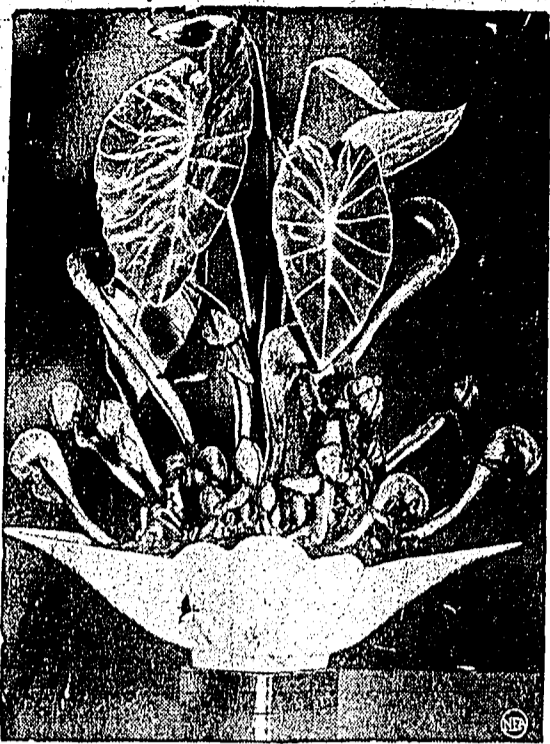

VARIETY OFFERED IN HOBBY EVENT

Photographic and artificial dog collections were added this afternoon to the varied displays for tonight's "hobby lobby" program at the Twin Falls recreation center. The exhibits form the second major event in open house week of federal service projects.

Dr. J. N. Davis will exhibit his collection of photos, and Mrs. Edythe Koons will show her collection of artificial dogs accumulated over a three-year period. Director Vernis Richards of the recreation department said.

Other hobby displays announced earlier include Mrs. Alice Penning's 12-year collection of stamps including about 15,000 commemorative issues. Oil and pastel work by Miss Hazel Malone will be shown, as will such hobbies as stone collections, dolls, china, coins, etc. Any resident may exhibit his hobby and may explain it briefly to the open house throngs starting at 8 p. m. today. Exhibitors were asked to have their hobbies at the recreation center, 302 Third avenue north, by 7:30 p. m.

Artistry in Plant Life

This effective arrangement of Imperial Taro and California pitcher-plant took first prize in "arrangement for window of modern room" at the National Flower Show.

NAMES in the NEWS

By United Press

Chairman Martin Dies of the house committee on subversive and un-American activities, said Soviet Russia has "a large, well-organized spy system at work in this country getting military and industrial secrets."

The Dionne quintuplets, already veteran movie actresses, won't start broadcasting for a couple of years at least—because of their inability to speak English.

Dan McDonald, 102, the world's oldest living member of the Masonic lodge, died at Hollister, Calif., yesterday.

Sally Rand says the girls at her "nude" ranch at the San Francisco fair this year will go Balinese and wear "microscopic sarongs" and stunted South sea flowers.

Rev. Edwin McNeill of Cleveland told the northern Baptist convention at Atlantic City that action of President Roosevelt in sending Myron C. Taylor as an envoy to the Vatican was "noble in aim," but "injudicious."

Postmaster General C. G. Power has been appointed Canadian air minister, a new full time cabinet post. Detectives have been assigned in London to guard Princess Elizabeth and Margaret Rose, in view of the danger of parachutists.

When blond Marie Friesen, 22-year-old Seattle model, sued Billy Rose, aquatic entrepreneur, for \$20,000 charging he and his talent scout had slurred her beauty and photogenic qualities, she got quick action. Rose settled the action out of court by giving her a contract to appear in one of his shows.

Mayor F. H. LaGuardia of New York, asked concerning reports that he might become assistant secretary of the navy said "forget that. It's too hot!"

Mrs. Cecilia Lorre, wife of the actor Peter Lorre, was awarded personal judgment for \$8,500 against Mrs. Maud G. Davis, whose automobile collided with Lorre's 18 months ago. Lorre was awarded \$300 damages to his car.

Movie Actor Walter Brennan, winner of two academy awards, left Hollywood today for his home town of Swamscott, Mass., after an absence of 20 years, to "reminisce."

BUHL

Mrs. Laura Farlinger was elected president of the Old Times club recently at the home of Mrs. Peter Kruse on the Clear Lake road. The Old Times club is composed of 12 members all of whom have lived in Buhl for 25 years or more. Mrs. Frank Thatcher was elected secretary. Bingo was the diversion of the afternoon. Mrs. Amanda Nelson received high honors and Mrs. Maud Stahlman the consolation.

Mr. and Mrs. Harry Leveke and daughter, Ruth, and Mrs. F. Thatcher drove to Ketchum last week-end where the Levekes visited their daughter, Betty, who is nursing at the Challenger inn. Mrs. Thatcher visited her daughter, Mrs. Calvin Winkler.

Little Patsy Hougard returned to Boise this week with her mother, Mrs. Melvin Larson. Patsy has lived at the home of her grandparents, Mr. and Mrs. Fred Black, for the past five years.

Miss Marian Dujardin, Salt Lake City, is home for a visit with her parents, Mr. and Mrs. Herman Dujardin.

Mrs. John Dana has received word of the birth of a son to Mr. and Mrs. Jerry Vasko at Silver Hill, Ala. Mrs. Vasko was Mildred Dana.

Mrs. Oscar Green and Mrs. Ray Nisewander were guests at the meeting of the Double M. Contract bridge club Thursday. Mrs. James Sholdis served luncheon with the 12 appointments at one table. Mrs. Green received the high honors and the consolation was given Mrs. Lawrence Van Riper.

The Cedar Draw Community club met Wednesday at the school auditorium with Mrs. Amanda Rutherford and Mrs. Efra Brckell as hostesses. They had the children of the school present the short program of songs, readings and piano solos. Because of the graduation exercises at the school early in the evening they disbanded early. Mrs. Stanley Donar and Mrs. Kistler were club guests.

MUSICA'S AIDES GET SENTENCES

NEW YORK, May 22 (U.P.)—Federal Judge Grover M. Moscovitz today sentenced seven former associates of the late Philip Musica, ex-convict swindler who engineered a gigantic fraud against the McKesson and Robbins Drug company to prison terms ranging from one to three years.

Those sentenced included three brothers, two brothers-in-law and one associate of Musica's criminal past, all of whom pleaded guilty, and a former vice-president of the \$88,000,000 drug firm in charge of accounting.

The charges ranged from violation of the federal securities and exchange act through mail fraud and conspiracy, all in connection with a \$21,000,000 infraction of McKesson and Robbins assets which Musica, posing as the respectable "F. Donald Coster," president of the company, engineered through bogus subsidiaries for purposes of fraud.

In passing sentences Judge Moscovitz commended the government for undertaking the prosecutions and congress for enacting the securities and exchange act.

Those sentenced were George Dietrich, 2½ years; George Vernard, three years; Robert Dietrich, 1½ years; John O. Jenkins, one year; Leonard Jenkins, one year; Benjamin Simon, three years; and John M. McGloin, one year.

2 Men File for State Positions

BOISE, May 22 (U.P.)—Announcements they would seek nomination in the Republican primaries were issued today by Stewart Campbell of Boise and James W. Keating of Harrison.

Campbell will be a candidate for state mine inspector and Keating for secretary of state.

Brother Killed

JEROME, May 22 (Special)—John Peterson, Blackfoot, who was fatally injured Sunday and whose wife was killed in the same auto accident, was a brother of Mrs. William H. Booth, Jerome.

Mrs. Booth left immediately for American Falls on receiving news of the accident.

Burley Man Weds

JEROME, May 22 (Special)—Robert L. Young Burley, and Genevieve Smart, Soda Springs, were united in marriage at the Baptist parsonage on Monday night. Mr. Young is an instructor at Soda Springs. The couple will spend a honeymoon traveling during the summer months in a trailer home. Miss Harriet Russell and Mrs. Elva Kaurin were witnesses to the ceremony.

JEROME

Mrs. Albert E. Martin was honored guest at an attractively arranged shower given at the home of Mrs. A. L. Pyle Friday. Co-hostesses were Mrs. Pyle, Mrs. H. L. Morris and Mrs. Betty Gill. Forming a pretty setting for the occasion was the garden of Mrs. Pyle, where guests assembled. Pink and blue color scheme predominated in the table decor. Mrs. Martin received a number of lovely gifts and at the conclusion of the afternoon refreshments were served.

Twenty-one women from Jerome attended the meeting of the P. E. O. Sisterhood at the home of Mrs. H. E. Gundelfinger in Hazelton Friday evening. A buffet supper was served. Seasonal flowers in attractive arrangement decorated the rooms. Mrs. W. F. Willis, Mrs. William N. Hardwick and Mrs. Leonard Young participated in an interesting program. They spoke on the following respective countries, Chile, Brazil and Argentine.

Mrs. Charles Wellerth received low score at golf Friday where 12 members of the Jerome Country club enjoyed the day, followed by a breakfast at the Wood cafe.

Hi-Land sewing club met Friday to honor Mrs. William G. Phoenix, retiring Parent-Teachers association president, a pretty spring luncheon was arranged by the executive board members recently at the attractive suburban home of Mrs. Aloys Hot Co-hostesses were Mrs. Hof. Mrs. Sam Esklin, Mrs. John Stelle, and Mrs. G. Y. Williams. Sixteen were seated at tables centered with spring roses in bud vases and individual place cards marked each cover. Completing the spring theme, white aprons were combined with orchid irises to decorate the rooms. As a token of appreciation for her past service, Mrs. Phoenix was presented with a flowering crabsapple. Mrs. Dana Messenger, a past member of the executive board was also presented with a flowering quince as a parting gift. Mrs. Messenger has moved to Burley to make her home.

At the home of Mrs. Ed Eoff. Fifteen members were present. Refreshments were served.

BPW Invited to Hold Convention At Kellogg Next

BOISE, May 22 (U.P.)—Delegates to the Idaho convention of Business and Professional Women's clubs returned to their homes today after receiving an invitation to hold the next meeting in Kellogg.

At the closing sessions Mrs. Eula Morris, Coeur d'Alene, Mrs. Ina Nelson, Salmon, and Mrs. Bess Swan, Orofino, were elected to the board of directors.

MEDICAL INDIGENT AID WIDESPREAD

Wide scope of the indigent assistance given by Twin Falls county doctors was partially indicated here this afternoon in a summary showing work of the county physician for April and charity help extended by five of the 24 medical practitioners in Twin Falls county.

Report of the county-financed work of Dr. J. H. Murphy, county physician, shows:

Office calls—289.
Hospital calls—158.
House calls—27.
Major operations—6.
Minor operations—8.
Obstetrical cases—9.

The five private doctors who answered the county physician's request for indigent summary showed this total for April:

Office calls—258.
Hospital calls—70.
House calls—4.
Major operations—3.
Minor operations—2.
Obstetrical cases—5.

The county physician had requested the 23 other doctors to report their charity cases as part of a move to determine accurately the scope of the indigent work now being done by the medical profession in this county. Determination of that scope, it is felt, would offer a future yardstick for charting indigent needs.

WILLKIE GETS BIG VOTE IN JERSEY

TRENTON, N. J., May 22 (U.P.)—Utilities executive Wendell Willkie was given a large but so far untabulated write-in vote on the New Jersey presidential preference ballot, returns from yesterday's primary showed today.

District Attorney Thomas E. Dewey's name was the only one printed on the Republican presidential preference ballot and the vote for him was heavy, but Willkie led all other write-in choices.

State Senator Robert C. Hendrickson held a 12,000 vote lead over former Gov. Harold G. Hoffman in their race for the Republican nomination for governor.

Secretary of the Navy Charles Edison, candidate for the Democratic gubernatorial nomination, and James H. R. Cromwell, candidate for the senatorial nomination, were unopposed.

5th ANNUAL BETTER HOMES EDITION

**BUILD
REMODEL
REPAIR**
in
1940

Building interest is hitting a new high in Twin Falls . . . never before has there been such activity . . . such an urge on the part of thinking persons to live in a better home! Twin Falls may well be proud of this fine activity—an activity which brings real wealth and prosperity and security to any community. And now comes ideal building weather! If you haven't planned to build, remodel or repair in 1940, start now! Your dealers in every phase of the business stand ready to help you help yourself to better living! It costs so little to live in a better home that your family deserves every bit of attention you can give to such a project. Think it over—and THEN ACT! When 1960 rolls around you'll be glad you had foresight without the disappointment that only hindsight brings. It's your move to BUILD, REPAIR or REMODEL!

**YOUR BUILDERS . . . BUILDER'S SUPPLY FIRMS and MATERIAL COMPANIES
ARE READY TO AID YOU!**

RFC ENCOURAGES PRIVATE LENDING

Measures designed jointly by the Federal Housing Administration and the Reconstruction Finance Corporation to encourage private lending institutions in making loans on low-cost homes were announced today by Jesse Jones, federal loan administrator.

Stewart McDonald, Federal Housing administrator, informed Mr. Jones that the FHA had revised its regulations effective January 1, covering insurance of Class 3 Title I loans up to \$2,500 to be used in financing the construction of new homes.

Mr. Jones thereupon announced that the RFC Mortgage company stands ready to purchase these loans from lending institutions, thereby furnishing a market outlet for this type of financing paper and enabling more lenders to make loans of this kind.

Up to \$2,500 Loans for financing new homes under Title I may be obtained up to \$2,500, or the cost of construction, whichever is less. Borrowers under this plan need only own a lot free and clear, representing at least 5 per cent of the appraised value of the completed property; or as an alternative, the house may be built on leased land when the borrower has an investment of 5 per cent in the completed property.

The maximum financing charge includes 4 1/2 per cent interest, an annual service charge of 1/2 of 1 per cent, and mortgage insurance premium of 1/2 of 1 per cent on the original principal.

To insure sound construction and protect buyers of homes, the FHA after January 1 will make at least three inspections on all homes financed with loans insured under this section of the Act. These inspections already are made on homes financed with loans insured under Title II. Homes financed under the new regulations, furthermore, will have the benefit of the same minimum construction requirements and property standards as are applied to properties under Title II.

The small home provisions under Title I are designed to make home financing under the FHA more flexible. A smaller equity requirement now needed under Title I, and the FHA will waive the question of the borrower's credit risk up to the institution making the loan. The Title I loans have a maximum maturity of 15 years.

The RFC Mortgage company will buy these Class 3, Title I loans bearing 4 1/2 per cent interest and a service charge of 1/2 of 1 per cent, provided the entire proceeds are used to finance new homes. These mortgages will be bought from institutions originating the loans which establish to the satisfaction of the RFC Mortgage company sufficient financial responsibility and their qualifications to service the loans. An office or branch of the institution must be situated within 100 miles of the mortgaged property.

Common Boards Reduce Expense Of Wood Walls

Some of the most different, newest, and best looking interior rooms in the small, but smart new homes going on the market today have inexpensive wood walls produced from low-cost common boards. Their use takes a home out of the "just another house" class and they may be installed at no more cost than a good plaster wall covered with paper or paint.

Common boards in most species of wood seldom cost more than 10 to 12 cents per foot, but when installed and finished to the builder's taste they are far richer than wall paper.

There are scores of ways to apply board or sheathing-type paneling and the cost varies but little. It may be applied horizontally, vertically, or a combination of these two methods may be used.

One of the advantages of this type of wood wall is that the householder is not continually called upon to re-paper or redecorate, as the wood wall finish is more durable than paper or paint. A wood wall can easily be applied over existing plaster in homes.

Here's a Hideaway for Mother and Dad When Youngsters Stage Party

NEW YORK—Sometimes a bigger family problem than what to do with small children while dad and mother entertain, is what to do with dad and mother when the children are in their teens and have a bit of entertaining of their own to do.

When confronted with this "parent problem" the modern decorator first tries to figure out a way to establish a second living room—either upstairs or down.

Falling this, she simply gives orders to de-formalize the dining room and set it up to play two roles for the family instead of only one—a place to sit and read or write as well as a place to eat.

Looks Like Living Room In the dining room illustrated here, comfortable modern walnut furniture, bleached to fawn tone, makes the room look like, and serve the purpose of a living room. Yet it provides every convenience needed in a dining room in which eight may be seated.

In the corner group of cabinets there is space for silver and linen, pottery and glass, a few books—even a writing desk. The walnut table, closely resembling a trim library piece, opens out to twice the size shown with ample room for two covers on each of its four square sides.

The walnut arm chair is one of a pair comfortable enough for mother and dad or Mary and her beau to spend the evening in. At either side of a low walnut cabinet buffet on a wall not shown are matching side chairs with open backs and upholstered seats.

Against a small wall opposite this door a folding card table is bleached walnut with its back leaf up is used as a serving table at mealtime; a game table at other hours.

The "parent problem" is solved on somewhat less grand scale by a decorator who simply puts one small living room group of furniture into a dining room furnished in the traditional manner. In the corner near the largest window, she places two comfortable but not gigantic, easy chairs with a table between.

On the table is an excellent reading light, space for a book or two, ash trays and the like.

Away From Conventional Plans Naturally, to inject a living room grouping into a small dining room to make it more original looking and a spot which will be used by the family between meals, as well as at mealtime, you'll have to get rid of any notion that the table must stand permanently in the center of the room.

And why must the other big piece be a standard buffet instead of a chest which gives the effect of a living room piece? Why must there be a bowl of fruit and two candlesticks on buffet or serving table?

In other words, why must your dining room look like every other dining room in the world?

HOME BUILDERS SET NEW RECORD

WASHINGTON, D. C.—The FHA ended the year 1939 with more than three billion dollars worth of home financing insurance on its books, Administrator Stewart McDonald announced today.

Approximately \$900,000,000 of this insurance was written during 1939, establishing a new FHA record.

Through the FHA nearly 12 million persons have been enabled to improve their housing standards and conditions, in accordance with the declared purpose of the National Housing Act.

The year just ended produced the largest volume of residential building since 1929, approximating 450,000 non-farm dwelling units. Final figures probably will show that the number of single-family homes built during 1939 exceeded the 1929 number. During 1939, approximately 600 new single-family homes were started each working day under FHA inspection.

The present outlook for home construction in 1940, Mr. McDonald declared, is excellent, judging by the volume of applications for mortgage insurance being received.

Whether this will continue throughout the year presents a difficult problem of forecasting in view of the disturbed world conditions. If the present trend is maintained, the volume of home construction during 1940 should exceed that of 1939.

The three billion dollar total of mortgage insurance now recorded on FHA books includes approximately: Small home mortgages numbering 405,000, amounting to \$1,975,000,000. Property Improvement loans numbering 2,330,000, amounting to \$605,000,000. Large-scale housing projects numbering 265, which provide approximately 30,000 dwelling units, with the mortgages amounting to \$112,500,000.

As a retreat for mother and dad when the offspring are entertaining, could there be a more delightful spot than this modern dining room in fawn tone walnut, arranged as a living room? Colors are plum, beige and turquoise, with bright pottery and copper for accenting notes.

FARM BUILDING LIST COMPILED

The Federal Housing Administration has compiled a partial list of farm improvements, repairs, remodeling, new buildings, and other items which are eligible for financing under its Property Improvement Credit plan.

Funds for such repairs, alterations, and improvements to farm homes and properties may be borrowed from private financial institutions qualified by FHA. There are nearly 5,000 such institutions in the country, FHA officials report.

Following is a partial list of repairs, alterations, and improvements, together with new structures, which may be carried out on farms under FHA's Property Improvement Credit plan:

New buildings: Small house, barn, dairy barn, poultry house, stock sheds, machine shed, garage, silos, granaries, corrals, storage sheds, tenant house, farm office, roadside stand, tourist cabins.

More home comfort and beauty: Built-in kitchen cabinets, sun porch, additional rooms, closets, plastering, papering, painting, landscaping, restocking (interior and exterior).

Masonry: Foundations, walks, drives, steps, barn floors, troughs, stalls, chimney, fireplace, basement.

Electrical system: Farm power plant, wiring, lighting fixtures and outlets, extension from main line.

Heating system: Modern central heating plant.

Water supply: Windmill, power plant, cistern, hot-water heater, well, pumps.

Plumbing: Flashing, drains, pipes, sewage disposal, kitchen sink, modern bathroom.

Carpentry work: Floors, roofing, siding, steps, doors, storm doors, new screens, windows, weatherstripping, shutters, fences, platforms, insulation, partitions.

Paint: House, inside and outside; barn; service buildings; other structures.

FHA ASSISTS IN HOMES BUILDING

WASHINGTON, D. C.—Construction and sale of thousands of sturdily built and architecturally attractive modern homes are being made possible this year through the "streamlined" financing facilities offered by the 1940 program of the federal housing administration, it was announced today by Stewart McDonald, administrator of the national housing act.

Mr. McDonald issued this statement on the eve of what in many sections of the country is the active building season. He pointed out, however, that in other areas where such activity is on an all-year basis, the experience of the first few weeks of 1940 was bearing out his prediction. Technological, financing, and marketing factors now combine for perhaps the first time to make possible the inexpensive yet sound small house.

Here's Trend in Newest Twin Falls Residences

What are the tricks of the building trades this season? It shouldn't be difficult to find out, what with all the new houses going up, the countless friends "just looking over some plans" and the old-time dwellings getting "facial lifts" and all manner of improvements made on their interiors.

Convenient-plus are the milk receivers being installed in numerous homes. Some even have indicators to tell the milkman whether it's "quarts or pints" today, and some have automatic locks.

They are placed in the outside wall and open into the kitchen. Just one more addition to the quantities of cabinet accessories that make homemaking a pleasure.

To Encourage Beauty And what a challenge to perk up and be more beautiful are the built-in bathroom units that are replacing the medicine cabinets in many of the newer houses.

A large four or five foot mirror is installed above the wash basin; cabinets are built in on either side, and a cabinet door covers the space below, shutting off the plumbing from the view, and giving the owner one more dressing table, as it might be regarded.

And have you noticed what's happening to "the clothes closet" these days? More and more wardrobes are being built — more commodious, more convenient. One architect said the other day, when queried while he was inspecting a house in the process of construction that most of the homes he is building have at least one or two wardrobes.

They come cedar-lined in many instances, which is devastating news to the moths—the blitzkriegers of the insect world.

These Types Rate As you walk about the residential district, surveying homes in the making, you are definitely impressed with the "roof cutting" that is being done.

In most cases, it isn't like cutting off a nose to spite a face. Minimizing the roof projection of a house is just another way of streamlining, you'll notice.

Dutch Colonial, Cape Cod, California bungalow, Old English and Colonial homes continue to be the vogue, those types adapting themselves so suitably to this section of the country.

Hardware is smaller, more attractive, you will note, as you inspect the new homes. All casings are smaller, too, and individual in design. Shoe racks in closets are set in flush and plastered round-about.

Storm windows, modern variety, are as tricky as those stunts that are done with mirrors. They are double glassed with half-inch space between the panes, and in addition to the advantages of old-time storm windows, will not steam in cold weather.

Corner cupboards that lend distinction to a dining room and set off so admirably the household pride in china and silver, are being constructed on a larger scale than formerly in Twin Falls, the contractors will tell you.

The compactness of the built-in kitchen has at last reached perfection, but have you observed the leaded glass panes that are coming into use in the kitchen of today?

"Cove ceilings, slab doors, fireplaces entirely fronted by mahogany with mahogany mantels as well; all doors and windows weather striped," these are the words that comprise the vocabulary of the architect, the contractor, when you start asking him about his work.

BATHROOMS NOW FEATURE COLOR

Bridal gowns, white elephants, lilacs, and more may be classified under things white, but don't let yourself be caught dead adding bathrooms to the list. If you're a smart modern person, you want to be credited with some imagination and individuality, and the surest way to gain this prestige is to color your ideas with rich blues, reds, and greens, and let them materialize in a powder room.

The use of glass and mirrors, with the wide selection of modern waterproof wall coverings which serve as a background to distinctive plumbing fixtures, makes it possible to plan a splendid bathroom, the Plumbing and Heating Industries Bureau say.

Boards can form a cafe au lait background for deep brown water closet or lavatory, with brown moire curtains at the windows and deep blue linoleum on the floor. Or a distinctive tone can be introduced by having a vitreous china lavatory of blue, and the linoleum of brown.

If the powder room is on the north side of the house, brighten it up with lemon yellow washable wall paper, and accent it with plumbing fixtures of apple green. Structural glass is another smart new wall material suggested in a wheat colored shade to reflect maroon fixtures. Add maroon towels monogrammed in buff, and tan linoleum on the floor, and your powder room will elicit admiration and applause.

In rooms inclined to be dark glass brick is used effectively. This always makes an excellent bathroom, setting, and tile-like materials are popular and inexpensive.

Beyond the importance of being dramatic in powder room decorations, however, is the necessity for having plumbing fixtures that are beyond reproach. In planning your powder room, consult an experienced master plumber who will recommend fixtures of an established manufacturer. Water closets particularly should be purchased with a thought to long-life and trouble-free, quiet operation.

Lavatories, either of vitreous china or enameled cast iron, are on the market in a wide range of styles and colors to satisfy the most discriminating homeowner. Besides beauty and grace of construction, the new lavatories offer utility features in slab space over the bowl for a wide shelf-back for toilet articles. Towel racks of chromium are attached to slender chromium legs, and integral soap dishes allow for water drainage.

The cost of clog in the fixture is the least part of a plumbing installation. For this small extra cost, the first floor powder room may be made into the most attractive room in the house.

HEALTHY AIR Every tenet of good health is served by air conditioning systems designed by experts of the air conditioning industry. Steady cooling, dehumidifying, cleaning and scientific circulation are provided for in systems now available.

BATHROOMS NOW FEATURE COLOR

Bridal gowns, white elephants, lilacs, and more may be classified under things white, but don't let yourself be caught dead adding bathrooms to the list. If you're a smart modern person, you want to be credited with some imagination and individuality, and the surest way to gain this prestige is to color your ideas with rich blues, reds, and greens, and let them materialize in a powder room.

The use of glass and mirrors, with the wide selection of modern waterproof wall coverings which serve as a background to distinctive plumbing fixtures, makes it possible to plan a splendid bathroom, the Plumbing and Heating Industries Bureau say.

Boards can form a cafe au lait background for deep brown water closet or lavatory, with brown moire curtains at the windows and deep blue linoleum on the floor. Or a distinctive tone can be introduced by having a vitreous china lavatory of blue, and the linoleum of brown.

If the powder room is on the north side of the house, brighten it up with lemon yellow washable wall paper, and accent it with plumbing fixtures of apple green. Structural glass is another smart new wall material suggested in a wheat colored shade to reflect maroon fixtures. Add maroon towels monogrammed in buff, and tan linoleum on the floor, and your powder room will elicit admiration and applause.

In rooms inclined to be dark glass brick is used effectively. This always makes an excellent bathroom, setting, and tile-like materials are popular and inexpensive.

Colonial Influence

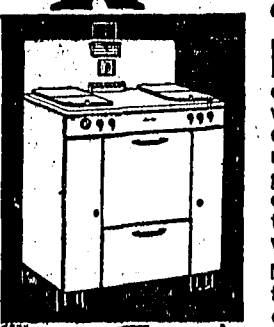

The colonial influence is apparent in the latticed windows, shutters and simple, iron balustrade of this house, typical of hundreds being built in all sections. This one in Memphis, Tenn., is heated from two units sunk below the floor level, one for the living room and dining room and the other for bath and bedrooms. Closet space is unusually large but there is no basement. The 25-year mortgage granted on this house is for \$4,400, the house is valued at \$4,800. Complete monthly payments are \$26.31.

ALTERNATING COLORS For a gay effect, the ceiling of the basement game room may be finished in alternating strips of color—kote "tile" in contrasting colors.

WOOD IN U. S. The United States has approximately 180 useful species of timber. Most other countries have only five or six types of commercial trees.

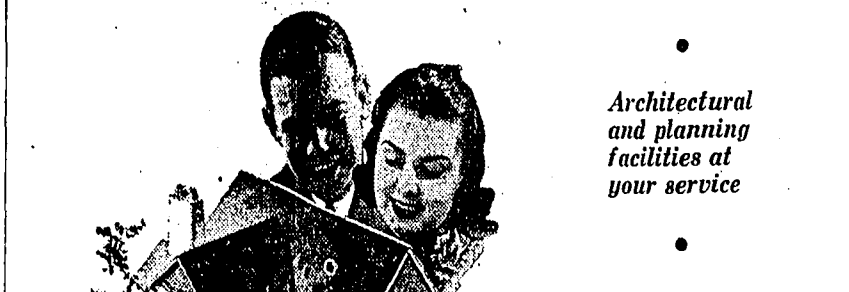

COOKS LIKE MAGIC!

It's truly magic the way this new Magic Chef Gas Range cooks your meals just right—without fuss or trouble. Burners light instantly, without matches; the Hi-Lo burner gives any heat for top-stove cooking—the Red Wheel controls the oven just as you want it. Magic savings of time, energy, food and fuel. And most magic of all is the price! A beautiful new range with Magic Chef convenience features formerly found only on the more expensive models.

SEE THIS SENSATIONAL NEW LOW PRICE MAGIC CHEF RANGE NOW ONLY \$99.50 Only \$5 per month Other 1940 Magic Chef models at new low prices.

LIQUID GAS & APPLIANCE CO. 426 Main Avenue South

Dull Wallpaper Softens Glare

Kitchens, like small children, are sometimes so bright as to be annoying. When a housewife finds this to be true she can offset it by using a dull-finish wallpaper with interesting patterns.

The new paper comes in water-resisting material which does not have to be scrubbed and which gives a homey effect that is sometimes missing in modern cook rooms where all pots and pans are concealed in built-in cabinets.

Vegetables, too, are on the wallpaper now. Their cheerful colors provide welcome contrasts with too much shiny whiteness.

HAVE THE HOME you've always wanted!

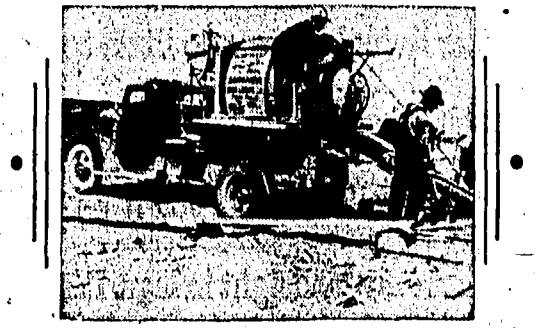

There's no time like the present for building... the weather's just right, and better still values are right, too! Now you can make small investments in a home of your own to realize large profits in the years to come! And as you plan, you'll learn you can depend upon our services to bring you the most for your money in building materials! From shingles to concrete a Tri-State product brings the promise of more for your money!

Build, repair or remodel with quality products found in our yards. Permanence depends on quality—buy right!

Ready Mixed Concrete Is Stronger

Because It Is Mixed Longer

Twin Falls Phone 430 Buhi Phone 265

Sumner Sand & Gravel Company

Modern Home Builders use ready mixed concrete for less waste, no muss and better results. Walks, foundations, driveways, won't crack or crumble when built with better mixed concrete. Basements stay dry.

DIARY KEPT 76 YEARS LONDON — Britain's champion diarist, J. J. Jackson Barstow, Deputy Lieutenant of Somerset, who faithfully kept a diary record for 76 years, is dead at the age of 96 at his home at Weston-super-Mare. The first entry in his diary, on Jan. 1, 1862, tells how he fell through the ice.

ARCHITECTURAL STYLES Research reveals that architectural styles are not created arbitrarily as is the case with most styles for wearing apparel. Climate, customs, topography, construction methods and many other elements united to create, out of the years, the basic styles of home construction which we know today. For example, the Cape Cod type of house developed from the need for more floor space on the steeply pitched roofs of the sleeping loft. Elizabethan and Tudor English homes were built with steep-pitched roofs because of the rainy climate in the regions of their origin, while the heavy oak frames were needed to hold up the stone roofs of the times.

HEAT INSULATION CALLED ECONOMY

One of the newest and most fascinating terms in the home builder's language is heat insulation. Because of its importance to comfort and heating economy, it is a term which should be understood by every person planning to build or remodel a home.

Strictly speaking, any structure which has ever protected man from the elements has contained a measure of insulation, for insulation is merely that quality in a building material which keeps heat or cold from passing from one side of a wall to the other.

In the modern sense, however, the word insulation refers to a material which has an unusually high heat resistance and which is especially designed for the job of keeping out uncomfortable temperatures and keeping in desirable ones.

Types of Insulation

There are four general types of insulation: rigid or structural, fill, flexible and reflective.

Rigid insulation includes various types of structural insulating boards, which are manufactured from wood or cane fiber. The raw material is first reduced to a pulp, after which the fibers are cooked and washed, thus removing all soluble matter. The clean fibers are chemically treated with water proofing material, so that the finished board will be highly water resistant throughout its entire thickness.

The fibers are then felted into large sheets and dried. In these operations all water is removed. The final step is cutting and trimming the boards to the finished sizes.

These boards can be used in many ways in building. They replace other materials and provide not only insulation but extra structural strength and interior decoration.

The other types supplement rather than replace ordinary building material and are installed solely for their insulating values. Fill insulation comes in a mass and is poured or blown into the open places between the inner and outer walls. Flexible insulation is an adaptation of the fill type in which the insulating material is held together in bats or blankets by paper or other binders. Reflective insulation is the use of metal or foil with shiny surfaces which reflect the radiant heat.

The rigid board comes in building board, lath, roof board, sheathing, tile and plank, classified as to its uses and dimensions. The sheathing and lath replace wood lumber of those types. The building board, tile and plank are available in many rich surface textures, decorative treatments and designs and combine utility with beauty for interior finishes.

Adds Structural Strength

The outstanding characteristic of insulating board is that it contributes both structural strength and insulating value and sound absorption. This combination is important in two respects, first, because it may be used where it serves both as a structural material and as an insulator, and second, the structural qualities tend to perpetuate the insulating value because insulation board is not readily compressed.

Besides providing greater comfort in both summer and winter, insulation saves fuel, makes possible the use of a smaller heating plant, and absorbs sound.

The added cost of installing rigid insulation is small, because it frequently replaces other building materials. Insulating sheathing, for instance, can frequently be installed as cheaply as wood sheathing, due to simpler installation and less waste. Its insulating value, thus, is obtained free.

Thick Insulation For 'Cold Room'

The "frigidarium" or "cold room" of the ancient Roman can be economically duplicated on a modest scale in the 20th century home, according to insulation engineers.

Wall-off a basement room with double-thick insulation, they advise. This can be done with one of the many color-panels now offered. Tints include ivory, wheat, apricot, sky blue and apple green. The double protection will keep the basement room cool all day.

Drapes and Rugs Furnish Basis For Proper Decorative Lay-out

NEW YORK—Important interior decorators agree that if the rug and curtains in a room are absolutely right, the business of finishing it—getting slip-covers, lamps and other accessories—is not too difficult. They even go a step further, admitting that the right curtains and smartly chosen slip-covers can make up for lack of beauty in a rug which you don't like but simply can't replace at the moment.

If the rug is figured, draperies must be plain. Too many patterned fabrics make for a confusing effect. If the walls are plain, consider figured draperies. But if you have flowered wallpaper, the plainer the curtains, the better.

Generally speaking, over-curtains should be lined and weighted. Plain inexpensive saten in a neutral shade is most popular for lining. Glass curtains need no lining, of course, and only the draw varieties are weighted.

The greatest single mistake you can make is to have skimpy draperies at a window. Use material no less than 40 inches wide at 36-inch windows. Fifty-inch material is even better. In formal rooms, bottoms of over-curtains may touch the floor. Or they may be from three to ten inches longer than necessary and allowed to lie on the rug in soft folds. In the average room, however, over-curtains just miss touching the floor. They should be no more than one inch from it, however.

Glass curtains, whether of the draw, tie-back or straight-hanging varieties also must be full enough and long enough. It is advisable to use materials which are guaranteed not to shrink more than one per cent in washing.

Practically all over-curtains are pleated at the top. So are many glass curtains. They should be as carefully made as the lining with as little as possible of machine stitching showing. Fixtures, whether simple poles or more elaborate cornices, should be of first quality. Cheap poles, haphazardly put up, have a tendency to sag in the middle. When they do, the entire room takes on a don't-care-no-body-lives-here-anyway air.

Slidings are glass curtains and over-curtains put on the same rod. For the former, simple poles are fastened across the top of the glass inside the window. The latter may hang from poles above the window, from underneath a cornice made of wood, glass or mirror or may be tacked to a special wood fixture.

The wood fixture to which modern over-curtains or pleated or plain valances may be tacked usually is a board, three-quarters of an inch thick and four or six inches wide. One edge is nailed to the wall above the window. Over curtains are tacked to the outer edge. This makes them protrude a few inches and achieves a graceful effect. Furthermore, with the over-curtains slightly away from the window, there is ample space for pulling blinds up and down.

Draperies, lamps and accessories as well as furniture are available at bargain prices during spring sales in the home furnishings departments.

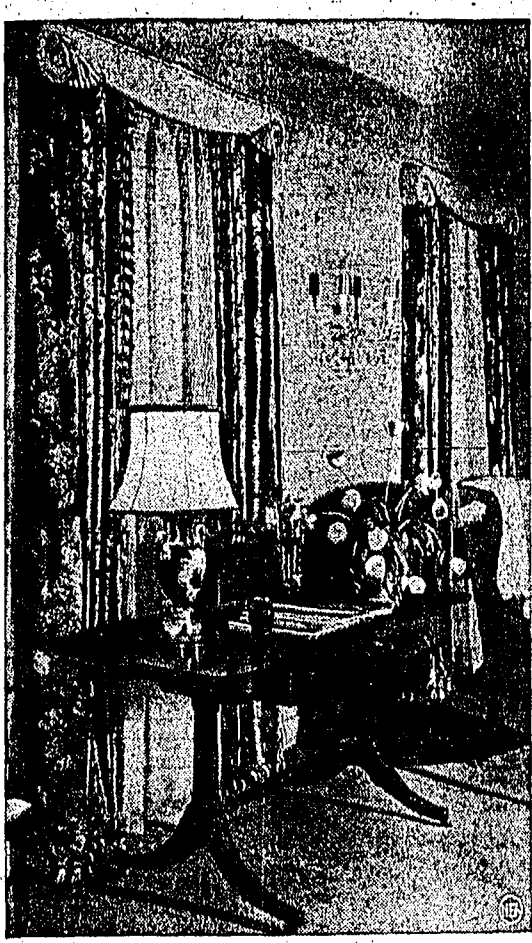

Closets Converted Into Cedar Chests

Any ordinary clothes closet can easily be made into a spacious cedar chest through installation of a cedar lining, which imparts an odor pleasing to humans but repellent to moths.

Among the cedar linings being manufactured today are those which, in new-home construction, are said to cost little more than ordinary lumber or lath and plaster.

In many kinds of cedar lining no finish is needed, as varnish or paint destroy the aromatic qualities. For maximum protection the lining should be applied to the closet floors and backs of doors as well as to walls and ceilings. Doors must fit tightly.

Where the closet of an old home is to be lined with cedar, it is often advisable first to apply furring strips over lath and plaster.

Graceful, lacquered cornices conceal the tops of these straight-hanging, printed draperies of the type easily available in home furnishings departments during midwinter sales. A two-inch band of fringe—varied to harmonize with the shades in the draperies—is used on inside edges and at the bottom.

Musical Shower Curtains Boon to Bathroom Baritone

New shower curtains, with words and music of the latest popular songs inscribed in water-proof ink, are a boon to the singer in the shower who is forced to improvise after the first few notes, says the Plumbing and Heating Industries Bureau.

The new musical curtains may be changed at intervals thus enabling the singer to increase his repertoire for the benefit of his audience, if any.

Many smart new accessories are available for the shower over the tub or in a separate metal leak-proof compartment. There are telescopic shower curtain rods of lustrous chromium which can be tucked away neatly when not in use. Latest innovations is a small metal track concealed in the ceiling from which the curtain is suspended without visible support.

Among the many innovations in showerheads is a new fitting which provides the bather with a perfume shower. A gadget attached to the showerhead holds a bath tablet or a few salts and thus the water is perfumed as it leaves the shower head.

Another innovation is a shower head mounted on a tube equipped with a ball and socket joint so that the stream of water may be directed on the body of the bather from any angle.

Available for the bathroom in the new house or the bathroom to be modernized are showers to fit every budget, new and more economical showerheads, improved valves and controls, metal pre-fabricated shower cabinets, swanky glass shower enclosures and doors, and grabbers for safety.

No other item of plumbing equipment is made in such a variety of styles and is offered at such a wide price range as the shower.

Any showerless bathroom can be modernized with a shower regardless of whether the tub is of the leg type or the built-in style, the bureau points out.

Showers are available for the built-in tubs that can be fitted to the wall in a few minutes by an experienced plumbing contractor. No changing of the piping in the walls or marring of the plaster or tile is necessary. All that is required is the replacement of the spout on the tub with a new spout equipped to receive the shower riser. With the setting of two screws in the wall to anchor the fixture, no installation is complete.

Instead of the huge showerheads 6 or 8 inches in diameter in vogue years ago, the modern shower is equipped with a midjet head only two and one-half inches in diameter. Concentrating on the bather, the tiny head uses from 25 to 50 per cent less water with consequent economy in fuel for heating water. The midjet shower heads may be adjusted to give a stream of varying intensity, and are practically non-clogging.

Many tubs are now made with an integral seat thus offering the bather the luxury of a shower while seated.

In order to insure the trouble-free performance of shower equipment, installation under the direction of an experienced plumbing contractor is advisable.

The administrator attributed the year's decline in monthly payments to the reduction to 4 1/2 per cent in the maximum interest rate permitted on FHA-insured mortgages and to the trend in the building industry toward the production of more low-cost houses. The figures include amortization of principal, interest, and mortgage insurance premium; they exclude local taxes and hazard insurance.

The average monthly payment, as distinguished from the median payment, on new home mortgages in 1939 was \$28.52. This compared with \$30.00 for 1938, \$35.33 for 1937, and \$37.44 for 1936. Both the median payment and the average payment were approximately \$2.00 less on insured mortgages used to finance the purchase of existing homes.

Mr. McDonald also commented on the fact that 40 per cent of the families buying or building new homes and more than 80 per cent of the families buying homes a year or more old with FHA-insured loans were making payments of less than \$25 a month.

He pointed out that the building industry is aiming this year to produce houses in much larger volume than in the past, which are suited to the needs of families who cannot afford more than \$25 a month for home financing, exclusive of taxes.

The total number of families buying new and existing homes for \$25 a month or less in 1939 was 93,072.

The figures used by Mr. McDonald refer to homes financed under Title II of the National Housing Act. In addition, there were 10,763 homes financed under Title I of the act with loans of \$2,500 or less. Monthly payments on these loans vary in accordance with maturities, but on a 15-year basis, the present maximum term, the payments would be about \$17 a month for a \$2,000 loan.

SOIL SHORTENS LIFE OF CLOTHES

Given two identical new shirts, why is it that one may long outwear the other?

There are many answers. One is the wearer's occupation. If, for instance, he does work which requires the use of both arms there may be friction which weakens the fabric across the back. If he wears stiff collars the points may wear out the shirt where they touch and rub. Any activity which puts a strain on clothes contributes to their wear.

The wearer's habits affect the shirt's life span. If a shirt is worn soiled for more than a day without washing, it will wear out much sooner than if it is washed often. Seen under a microscope, it is evident that the dirt which collects on clothing contains particles which chafe and rub, causing threads to weaken. Then too, perspiration, as well as many kinds of spots and stains, rots fibers and causes them to wear. Washing saves wear on clothes from soil and perspiration.

Of course, washing involves a certain amount of friction. Is that friction enough to justify the theory still held by some that frequent washing is hard on clothes?

With a view to answering that question the American Institute of Laundering has conducted many experiments. One, for example, was focused on two brand new shirts. One shirt was worn under normal conditions and then washed, worn again and washed again, over and over. The other, identical in every respect, and laundered repeatedly without wearing, lasted more than four times as long. The stain of perspiration and the action of soil and the action of soap far exceeded the strain caused by the friction in the wash.

Much of the friction in washing is reduced if clothes are washed before they get too dirty. The less soil, the less the need of rubbing. Rubbing is further reduced when generous quantities of soap are used in the first place, and more soap added during the washing to keep the lather brisk. When given half a chance, soap does most of the work.

INTEREST SHOWN IN MODEL HOME

The lumber industry—supporting cornerstone of the Pacific northwest's fast-growing economic structure—has received a tremendous impetus in the nation's building markets through a much publicized model home which is co-sponsored by 37 lumber and allied associations from coast to coast and is receiving wide recognition as "The House of the Decade."

Such joint action on the part of the ponderous manufacturing and merchandising sections of the lumber trade is without precedent and, combined with the fact that the model home is adaptable to every climate and incorporates the very latest in home building techniques, has appreciably spurred building activity throughout the United States.

Named the Certigrade Californian, as House No. 1 of the project was recently completed and dedicated in Studio City, California, it is of all-wood construction and is the lumber industry's answer to the age-old and perplexing problem of most efficient home building.

A variety of northwest forest species went into the structure. Douglas fir was used for wall stud-ling and bracing, West Coast hemlock for roof sheathing, red cedar shingles for roof and sidewalls, Douglas fir plywood for flooring, and pine for interior walling.

A distinctive feature of the model home is that it comes in three separate floor plans, each designed to fit into a distinct climate. Plan A is for use in the warm climates of the south, Plan B is intended for temperate zones such as the Pacific northwest, and Plan C is being used in the extreme climatic sectors.

Hugh Herbert, famous film comedian and mayor of Studio City, officiated at the dedicatory ceremonies of House No. 1 in the Southern California city. A large group of lumber industry notables attended the opening.

Plans for the structure are available from local retail lumber dealers through the National Plan Service, Chicago.

Lack of Closet Space Tops 'Pet Peeve' List

Those features of a home—or lack of them—which hit home owners most were recently polled by a building magazine, with the purpose of providing suggestions for the contractor and builder.

Lack of closet space was the complaint voiced most often, with an inadequate supply of electric outlets second in unpopularity.

Uneven distribution of heat was a "pet peeve" voiced by many owners, while other complaints included poor kitchen arrangements, drafts, rooms that provide no wall space for furniture, and rooms that lack sunlight.

Families with children complained about lack of space for keeping toys, and a universal complaint about inefficient hot-water heaters was voiced. Garage doors that don't work followed, with a house that is difficult to care for getting feminine votes.

Other items on the list of grievances included refrigerators that are not large enough to store the family food supply, drain pipes that clog, lighting fixtures that glare, basements that flood every time it rains, garages that are too small, pipes that rust, dark hallways and stairways, screens that rust, and badly flowing water.

The Property Improvement Credit Plan of the Federal Housing Administration can be used to correct most of these grievances. Money is obtained from qualified lending institutions.

DOORS, WINDOWS REQUIRE REPAIRS

Sticking doors or windows usually require refitting or repair, and with the arrival of warm weather the home owner will find the ideal time to make repairs of this nature.

Doors and windows should also be checked for the following points: Doors out of plumb, requiring refitting or new hardware; advisability of replacing wood panels with glass in doors; defective locks, chains, or bolts, requiring repair or replacement; acquiring extra keys for various locks; broken or defective window cords and pulleys needing replacement; replacing broken window latches or other window devices; cracks around window sash and doors requiring weather-stripping.

REPORT REVEALS BUILDING TRENDS

Linoleum Cuts Breakage Loss On Drain Board

Linoleum, once confined chiefly to floors, has branched out in the home and is now regarded as an attractive and practical surface for sink tops and drain boards. Because of its resiliency, it reduces clutter and retards breakage of dishes.

Linoleum may be used to restore life to many efficient but drab and discolored sinks. On drainboards or other areas where water is spilled or splashed, the success of the installation depends almost entirely upon the quality of workmanship in making the seams and edges tight and waterproof.

INVESTMENT NOTE

The fuel savings effected by a thick insulation in side walls and roof, will return in fuel savings annually one thousand per cent more than a U. S. government baby bond, yielding 2 1/2 per cent.

Almost half of the new homes accepted for Federal Housing Administration insurance in 1939 were fire-room houses, it is shown in a report of FHA activities for the year.

Other interesting construction trends revealed in the report were: Four out of five new homes securing FHA-insured mortgages had garages.

Three in 10 properties had garages of two or more car capacity. Over nine-tenths of the new homes contained four to six rooms, and less than 1 per cent had more than eight rooms.

The average new single-family home accepted for insurance was valued at \$5,530 and was built on land valued at \$785.

On two-fifths of the new homes wood was used as the material of exterior construction.

Brick homes accounted for three-tenths of the new-home total, most of which were brick veneer. Stucco, singly or in its several combinations, constituted the third most important exterior material with a total of one-fifth of all new homes.

Check YOUR Roof

DOES IT ACT LIKE A Sieve?

An old worn-out roof is about as much protection as a sieve. A new roof will save you money on your fuel bills and help keep your home cool during the hot months to come. Be assured of satisfaction by using CERTAIN-TEED—long lasting, fire resistant, wind-proof and available in a large assortment of suitable colors.

A Successful Adaptation

This Cape Cod adaptation is one of the most successful to come into FHA offices. Notice the dove-cote on the garage wing and the low fence ending in a carriage lamp, both characteristic of earlier day homes in New England. Windows in the kitchen, dining-room and living room look out to a river valley in Connecticut. They catch the morning sun, in the afternoons are in the shade. The living room opens onto a porch looking out over the valley. Easy front access to the garage is provided but the garage has been set back from the front of the house pleasantly. House and lot are valued at \$6,300, and mortgaged for \$5,600. Monthly payments—with interest, principal and mortgage insurance—are \$32.20. The mortgage is for 25 years.

Your most important asset in the task of careful building

Check of Light Installation Aid To Home Safety

In planning a new home or the modernizing of an existing home the owner should make a careful check of the light and power equipment. Such a check is doubly recommended in old dwellings, where the installations may have become worn or damaged as well as out-of-date.

your inquiry brings no obligation to buy!

ADEQUATE WIRING NEEDED ON FARM

Because of the many and varied uses of electricity on the modern farm, adequate wiring needs demand special attention. It is the committee on the relation of electricity to agriculture.

Draw Plans In planning either the original electric circuits or additional extensions of electricity on your farm, the first thing to do is to draw a plan of the entire area which you will electrify. Put in the wiring that you will use. Then draw in your proposed extensions.

Here Are Hints Here are some hints for insulating wire. Adequate wiring will make possible the convenience and use of time and electricity which arise from poorly planned or poorly installed wiring.

First necessity, of course, is one, often more than one, very light, good, strong ones, with reflectors mounted on a high pole and other on the pole itself and the other at the house. This light facilitates chores and serves as a protection against marauders.

Lighting poultry houses has proven extremely practical, and where electricity is available the few farms that do not have their poultry houses wired, many farmers have regretted it.

One important fact that farmers are discovering is that a heavy duty motor is mighty handy around the barn for chopping and grinding feed, silo filling, and many other duties.

Heavy Duty Circuit A heavy duty circuit with weather-proof outlets at convenient points around the yard allows many jobs to be done more easily and safely.

Adequate wiring on the farm saves time and money and increases the value of your farm property. If you are planning new electrification or the extension of your present service, now your installation carefully and you will receive the greatest benefits from it.

It is always best if there is a short and direct "line of march" from the laundry to the outdoor drying yard and if this can be brought about by making an opening through a present partition it will simplify the act of getting the wash out to the drying breezes.

There should be a place to store washing supplies and a place to retrieve the damp pieces after they come from the washer. This can be the sorting table, particularly if it is put on casters.

There is no reason for any basement laundry room to be just four grey walls and a floor. Develop the possibilities in lighting fixtures placed strategically in the room, on the floor, wall, and ceiling. White is a good color for the walls, and a white ceiling will reflect as much light as possible.

Work out your color scheme by tinting the door and window trim and by hanging attractive curtains at the windows. Some laundry rooms have colorful roller shades and venetian blinds.

The laundry room can be actually one of the most attractive and comfortable rooms in the home. An adequate amount of light is required in a little quantity and a very small expenditure of time and money.

A new aviation motor, five-cylinder, 40-horsepower, for the airplane, is a little more than that which the whole motor is unusually light, quiet.

TESTS SHOW WORTH OF INVESTING IN WIRING This study by the United States Federal Protective Laboratory at Madison, Wis., has shown conclusively that wire sheathed with insulating material is worth the extra cost.

A new aviation motor, five-cylinder, 40-horsepower, for the airplane, is a little more than that which the whole motor is unusually light, quiet.

PLANNING KEY TO LOW-COST HOME

The building or buying of a house involves for the average person a large investment and one for which he is entitled to good construction and full value for every dollar expended. Most people plan the purchase of their houses many months in advance—reviewing past experience, posting themselves on features of design, consulting with other owners and then weighting all the evidence.

Home building is a fascinating undertaking in which careful planning and consideration for features of enduring worth will yield large returns in the form of lasting satisfaction. To build these values into a home is not too difficult. It is a matter of selecting, through proper design, the features that secure these values and then of taking care that they are properly installed.

The key to a well built low-cost home is an efficient shape, an efficient floor plan, a minimum of time-consuming and expensive detail, and adequate equipment.

A fairly large home built of a durable but inexpensive type of construction, such as wood, and equipped with sound, medium-cost, necessary accessories, will cost less and give greater satisfaction than an elaborately planned small home built of an expensive type of construction with expensive mechanical equipment.

The first consideration should be a good shell, and the home-building project should be approached from a shelter rather than a "gadgets" viewpoint.

Costly bathroom fixtures, kitchen equipment, light fixtures, wall decorations, heating facilities, the cost of landscaping, laundry equipment, and the cost of accommodations for your automobile will very often spell the difference between building and not building.

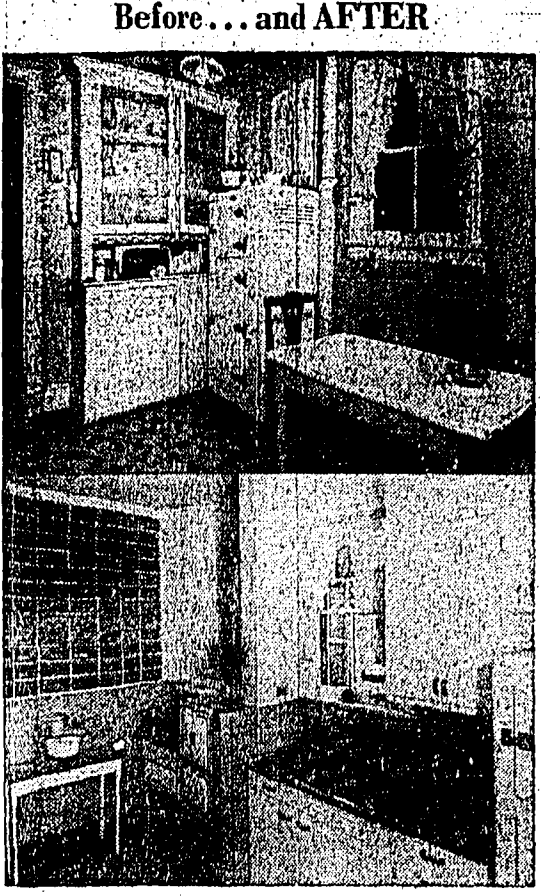

Modern mechanical conveniences are highly desirable, but fortunately they are not necessarily an integral part of a building. Garage facilities can be added to the homestead subsequent to its construction at no increase in cost. It seems logical, therefore, to give serious thought and consideration to the things we can do without when the attempt is made to balance the cost of a house and the family budget.

Plan for the body of your home first... then add refinements as the budget permits.

Hints on How to Cut Cost

No matter what size home you are going to build, sooner or later you will be faced with the problem of "cutting the cost." It is better to make savings in small items than to reduce the size of the house. Space is more important than fine finish, built-in improvements and gadgets. A few suggestions as to how you may "cut" the house which has turned out to exceed your budget:

- 1—For screen savings use the galvanized half-window length kind. You get such a lot for your money.
- 2—There is such a thing as a magazine-feed boiler... worth examining if you are economically minded and will be burning coal to heat your house.
- 3—Plate glass is expensive. Consider using plain window glass. Nine-tenths of the world won't know the difference.
- 4—If your land is dry... use concrete blocks instead of poured foundation. Another saving.
- 5—Good wood-frame construction is cheaper than stone or masonry. It will last as long as you live... and longer.
- 6—Wood shingles cost less than heavier roofings and the house does not have to be so heavily built to support a single roof.
- 7—Locate the fireplace so that the chimney serving your heating plant will also carry the fireplace flue.
- 8—On the second floor insulate only the ceilings... bedrooms require less heat than living quarters.
- 9—Floors offer an opportunity for real savings. There's a lot in the finishing... and many of the best examples of fine homes today are floored with short lengths which take beautiful finishes.
- 10—Stairs are more economical built between partitions.
- 11—Eliminate gingerbread trimming on the exterior of the house. Keep it simple and let the proportions of the building make it beautiful, not the fretwork.
- 12—Dear to the heart... and the pocketbook... are recessed radiators. Maybe this is one place to sacrifice preference for economy. You can always have them built in later.
- 13—Rough plaster left gray makes an interesting wall texture. Or you can finish-plaster a spare room and leave the floor laying for later on.
- 14—Sliding for the outside of the house comes at various prices. Some of the best looking kinds are the least expensive.
- 15—If you are burning coal now, but some day hope to have automatic heat, you can most economically wire for the thermostat while the house is being built.

The federal housing administration's property improvement credit plan provided the way for making the major part of the constructive changes in this kitchen. The installation of glass blocks furnished an entry for additional light; the building of the small partition obscured the former unsightly drainage, and the built-in cabinet and trim sink afforded added neat lines, all conducive to ease and dispatch in the preparation of food. The financing for most of the changes in this "before-and-after" revelation was done through a financial institution qualified under the property improvement credit plan. There are nearly 5,000 such financial institutions throughout the country.

Boise FHA Office Accepts 900 Loans for Insurance

The Boise office of the Federal Housing Administration during the year 1939 received from approved mortgagees 1,116 applications for insurance of loans to be secured on home properties under Title II of the National Housing Act, totaling \$3,845,500. Of these applications received 900 loans totaling \$3,852,200 were accepted for insurance. The cases accepted for insurance in 1939 was an increase of 43% compared with the year 1938. Most of this increase is credited to the last half of the year. Sixty-one percent of these loans accepted for insurance in 1939 were secured on newly constructed homes and 39 per cent of the loans were secured on existing properties. The total volume of mortgage loan applications under Title II accepted for insurance by the Boise office is 2,905 totaling \$9,237,700. This total includes applications from Idaho and four counties in Eastern Oregon, the territory served by the Boise office. Three properties have been conveyed to the Federal Housing Administrator. Two of these properties have been sold. Fourteen incomplete applications were on hand at the close of the year. Throughout the country to Sept. 30, 1939, the Federal Housing Administration has accepted for insurance 536,970 mortgages totaling \$2,249,238,227.

The proceeds of Title I loans insured by the Federal Housing Administration are mostly used to repair, remodel, and build additions to already completed buildings. For the year 1939 to December 1, 2,238 loans were made to Idaho people under Title I totaling \$912,319.71. From the beginning of operations to November 1, 1939, the Federal Housing Administration has insured 12,520 loans to Idaho people under Title I of the National Housing Act, totaling \$4,471,827.69. 2,296,363 loans totaling \$945,077,781.41 were insured during the same period throughout the country.

Money for loans insured by the Federal Housing Administration was more fully available during 1939 than in previous years, though the rate of interest on insured mortgage loans under Title II was reduced during the year from 5% to 4 1/2%.

The objective of the Federal Housing Administration to improve housing standards and to make homes more available will continue in 1940 with special emphasis placed on providing suitable homes and satisfactory rental quarters for families of smaller incomes. Regulations are now being adjusted to make loans on homes and on rental properties more acceptable to people of smaller incomes and at the same time more attractive investments for lending institutions.

During 1939 the Boise office of the Federal Housing Administration was authorized by the Reconstruction Finance Corporation to accept applications for loans from small businesses.

CONDITIONED AIR FOR EFFICIENCY

The effect of correctly installed air conditioning on human efficiency, notably with respect to business and industrial operations, is conclusively shown in a nation-wide survey recently conducted by two well known research organizations in collaboration with a leading manufacturer of air conditioning equipment.

Regarding on the findings of this survey, the Air Conditioning Manufacturers association announced that the study covered all types of business establishments, including department stores, retail stores, beauty and barber shops, restaurants, hotels, office buildings and banks.

Air conditioning, it was revealed, was responsible for less fatigue on the part of employees in 94 per cent of the cases recorded. A tendency to make fewer errors was shown in 57 per cent of the interview. Ninety per cent of the workers questioned said they were able to accomplish more work since air conditioning was installed. After experiencing air conditioning, 69 per cent said they would prefer it in any future place of employment.

Generally speaking, the survey showed, employees to be happier, healthier and far more efficient. It was shown, too, that retail sales jumped upward in places where air conditioning was installed, and new customers were attracted.

HOME LOANS FOR IDAHO SET MARK

WASHINGTON, D. C. — A total of 1,663 home loans amounting to \$1,621,170 were made in 1939 by the insured savings and loan associations in Idaho, making it a banner year for home financing in that state, it was announced today by Nugent Fallon, general manager of the Federal Savings and Loan Insurance Corporation.

These figures compare with 797 loans valued at \$1,535,255 in 1938. At the close of business December 30, 1937, insured associations in the state, which now number eight, had total home mortgage loans on their books amounting to \$6,432,720.

An end of 1939, 8,871 savers were listed by the associations, as compared with 8,102 a year before. Total savings increased from \$3,465,100 to \$4,114,410 in the same period, or \$659,310. Such savings are fully protected against loss up to \$5,000 per saver by the Insurance Corporation here, a federal government instrumentality.

Assets of these locally owned and managed thrift and home-financing institutions, which operate under state charter or federal charter, grew \$30,310 in 12 months, the total increasing from \$8,830,850 to \$7,970,160.

Insured associations in Idaho are located in Boise, Coeur d'Alene, Idaho Falls, Lewiston, Nampa, Pocatello and Twin Falls.

MODERN HOUSES BETTER PLANNED

Every house in the United States over 10 years old is an out-dated house. Though still hale and hearty, in comparison with the best modern construction, it is less efficient in plan, has fewer conveniences, less provision for sun and air and is less adaptable to modern furniture and living habits.

Three outside influences have speeded its obsolescence—the automobile, the radio and the increasing use of mechanical household equipment.

Faiths of Four Counts

As a result, the house that was new in 1930 is unable to meet the demands of a 1940 family. It will fall on four counts: (1) plan, (2) equipment, (3) beauty and adaptability, and (4) comfort. Briefly described, these are:

(1) **Plan.** The modern house is a better planned house. The garage, once tucked into a corner of the backyard—reminiscent of stable days—has now been attached to the house where it is not only more convenient, but leaves more space for garden and recreation.

Extra bathrooms are another recent and universally admired addition to the average house.

The 1940 house is also a sun-and-air house. More windows, better arranged, give it light and air that was common only to the "sun porch" of the 1930 house.

(2) **Equipment.** Electricity and mechanical equipment have given a new world of leisure to the modern family. Frequent base outlets, washing machines, thermostatically controlled stoves and automatic heating equipment have helped to lighten housework and improve family health and comfort.

Atmosphere Control

The development of automatic heat, for example, has removed the tedium of furnace tending and permitted better control of heat. Insulation, besides stepping up both winter and summer comfort, has stepped down winter fuel bills.

(3) **Beauty.** Today's average house is a better looking house than that of 1930. It is closer to the ground, and roofs are lower and more graceful.

The modern home is also more colorful. Front doors and shutters have been enameled in jewel-like colors, and roofs have taken on new youth and attractiveness with varicolored shingles.

(4) **Comfort.** The modern house is a more comfortable house than the house of 1930. Today, both winter and summer comfort are insured by the use of automatic heating and air-conditioning equipment and by the use of insulation, such as mineral wool, in the exterior walls and roof. In winter months, it is no longer necessary to get out of bed in a freezing room, rush to the basement and stoke up the fire; in summer it is no longer necessary to turn and toss in bed with the temperature in the nineties. The increased efficiency of such equipment combined with a good insulation save enough on fuel bills and cause such a tremendous increase in comfort that the improvements more than pay for themselves.

Better built, better planned and more attractive, the house built in 1940 is far ahead of that built in 1930. Careful remodeling of the older house, however, can bring it smartly up to date; can add years to its useful life and greatly improve its appearance, so that it, too, will serve better the interests and needs of a modern family.

Shelves Help to Conceal Radiators

Book shelves the same height as the radiator, built on either side, will help to conceal it.

When possible, the bookcases may extend across an entire wall. When the radiator is at one end of the wall, a cupboard may be built at the other end for balance. One row of books above the radiator will conceal it further.

Funds with which to make such additions may be obtained from financial institutions qualified by the Federal Housing Administration under its Property Improvement Credit Plan.

How's the Roof Over Your Head?

How long is it since you examined your roof? Why not take a good look today!

Are any shingles missing, badly worn, or cracked? Is the plaster on your walls water marked? That's where roofing trouble shows. Leaks trickle down between the walls—then redecorating often costs more than a new roof!

Let us send a competent man to examine your roof. If repairs are needed we will give you a free estimate on FLINTKOTE materials. See these handsome shingles today. Their low price will surprise you.

New Lights Now Aid Kitchen Work

In this re-lighted kitchen, a new "adaptor" unit provides generous cheerful illumination, while above the kitchen sink, a tubular luminaire bulb supplies extra light where it is most needed.

By JEAN PRENTICE

Like a gloomy day, a shadowy kitchen can depress one's spirits and make work go slower.

Young brides and experienced homemakers alike, however, are sometimes puzzled by the question of what to do about a poorly lighted kitchen. I have several "bright ideas" to suggest, with the accompanying photograph as a guide.

Before this kitchen was inexpensively re-lighted, a bare bulb was used at the ceiling. It was a glaring spot of light up above, and yet the young woman had to work in her own shadow when she stood at the cupboard with her back to the light. In place of the bare bulb, a new inexpensive ceiling "adaptor" fixture was substituted. Many manufacturers make these fixtures. They can be installed in any single ceiling outlet, with a simple twist of the wrist.

No rays of light come through the silvered end. Instead, nearly all of the light is sent up to the ceiling, and reflected into the room.

Shadowless light reaches every corner of the room. The common kitchen complaint of working in one's own shadow is thus eliminated.

Another new idea that helps to make this kitchen cheerful is the side lights. Above the kitchen sink is a luminaire bulb in a bracket. This was attached beneath the shelf, and connected to a nearby outlet.

For the range, breakfast table or sink, I'd like to suggest as another alternative one of those clever little lamps which may be pinned to the wall. With one of them you can tell exactly how much salt you are adding to the cooking food.

TIPS ON SPRING REPAIR SURVEY

In surveying the home preliminary to making spring repairs, it is wise to begin with the basement and conduct the inspection in a systematic manner. Among the points which should be taken into consideration are:

1. Examine the foundation walls for cracks and observe whether mortar in joints is loose or has fallen out. The floor should be examined for cracks or signs of disintegration, and any evidence of leakage through the walls or the floor should be noted.
2. If there are wooden sills on top of the walls, see whether they are sound and whether cracks between wall and sills are caulked to keep out moisture and cold air.
3. See whether there is fire-stopping on the sills between floor joists and, if so, whether it fits snugly, especially around pipe openings.
4. If the basement is not sealed, the joists can be examined for signs of sagging and warping. These defects often occur because the support or bridging is not sufficient. Look for possible shrinkage on the framing.
5. See whether there are signs of damage in posts, sills, joists, and other woodwork caused by termites or other destructive insects. Also look for evidence of dry-rot, especially in sills or at ends of joists adjoining masonry.
6. Make sure that all exposed water pipes are protected from freezing, especially if located under a porch or in some other unheated space.
7. If there are floor drains in the basement or garage, see that there is sufficient water in them to maintain a seal in the traps.

A VERY few DOLLARS PER MONTH

WILL FIX UP YOUR HOME

Why put up with crowded living conditions—why put off needed repairs—when only a few dollars a month will pay for a complete remodeling job on your home?

We will gladly cooperate with you and your contractor in helping you with plans and ideas that will bring new beauty and new comfort into your home.

Design Small Home For Future Addition

Every home building project means a repetition of the age-old battle between the desire for a large, commodious home and the budget. Many people are inclined to think of a completed small home as a fixed unit. This is not necessarily true. A home, especially a lumber-built home, may be so planned in the beginning that numerous additions, added at different times, will still produce a harmonious and efficient whole.

If your building budget is small, build a complete small home as the first unit of the larger, more attractive house, which is your ultimate ideal.

With wood construction, windows are easily converted into doors, and harmonious additions are inexpensive. Be sure, however, that you can see in your original plans the physical possibilities for each step in the enlargement of the house.

Be sure that your lot provides enough space to accomplish the additions without violating building restriction lines. Be certain the contemplated future additions do not block off needed light in some existing rooms. One of the most attractive features of many early Colonial homes, now used as patterns for new construction, is a succession of wings producing a long house.

A good house will last a lifetime. It is not economical to discard a location you like and lose the benefit of development work done on shrubs, yard, and trees because the house you have is too small. Money is often lost in the exchange of a used house and the cost of disposing of an old house and constructing a new, larger one will far exceed the cost of well planned additions to the old one. Grading, seeding, shrubbery, and yard development account for a substantial proportion of the cost of a new house. Additions to an old house provide more space without duplicating this operation.

BLACKBOARD

The "handwriting on the wall" problem of growing youngsters can best be met by installing a small blackboard on one wall of the children's room. A glass blackboard is not block off needed light in some existing rooms. One of the most

New Low Building Terms say "You CAN Own this Home!"

Here's the "low down" on new low building terms in a nut-shell: The FHA plan now permits construction of homes up to \$2500 with little as 5% down.

These liberal terms, combined with the COMPLETE Building facilities of Boise Payette's Budget Building plan, make it easy to build and pay for a 2-bedroom home, like the one shown here, even though your income may be small.

Build With "Family Protection"

This is an optional, protective feature, obtainable only at Boise Payette. Makes your payments for you in case of accident or illness—gives family title to home in event of death or permanent disability.

★ REMEMBER—BUILD YOUR HOME FIRST ★

SPACIOUS ROOMS GAIN POPULARITY

The new design in apartments is effecting a merger of many rooms and discarding others, thus providing fewer rooms but with more light and spaciousness.

Even at the "best address" in the metropolitan centers, few separate dining rooms are being provided. Instead, the dining space becomes an ell off the large living room. Neither are playrooms provided any more, because the children spend the afternoons at nursery schools and supervised playgrounds. A feeling of space is obtained by use of clean lines, wide plain archways, door and window frames.

Long horizontal lines are accentuated on the walls, some of which are of pastel insulating panels, and others of which are of plaster applied directly over the insulation.

ARCHITECTURAL STYLES LISTED

Federal Housing Administration has no preference among architectural styles, requiring only that the style used be well executed and in general in conformity with the surrounding homes. For architectural treatment may often reduce the value of a soundly constructed home, even to the extent of making it unsalable.

Architectural styles popular in America include:

Styles Explained

Colonial: The early New England homes were built by craftsmen who learned their trade in England. The difficulty of obtaining many materials resulted in simple and restrained style. Modern Colonial homes follow this early tradition.

Georgian: Early southern planters imported architects from abroad to design formal homes in the Georgian style known in Europe. Sophisticated homes of great refinement resulted.

English: The picturesque, rambling type of house first used in rural France and later in England during the time of Elizabeth is known as English Tudor. The English home has low graceful lines and interesting surface textures.

Modern: The term "machines for living" is often applied to the flat-roofed, severely plain homes designated as "modern." Designed primarily for utility and convenience, they reflect the modern attitude in building. These homes are popular in France, Germany, and the Netherlands, as well as in the United States.

Touch of Formality

French: There is a touch of formality in our modern French houses, reflecting the high culture of the period from which they sprang.

Norman: A man's home is still his castle, as modern homes in the style of the ancient Normans prove. The tower is a interesting detail.

New California: Low-pitched roof, long horizontal lines, and rambling design, reminiscent of the early ranch homes, characterize this new California style.

Monterey: One of the most attractive of the current California types, warm and friendly in spirit, a union of the Colonial with the early Californian architecture.

Here's How to Decorate Your Home Economically in Summer

NEW YORK—To the modern housewife, spring housecleaning means a great deal more than re-arranging closets, throwing away piles of odds and ends which have accumulated in attic and basement, taking down the heavy draperies and putting winter clothes away in moth balls.

She does all of these things, of course, but, more importantly from the aesthetic point of view, she does a thorough re-decoration job.

When she finishes, her home for the summer months is not just clean and bare. It's clean and handsome. The scenery within the four walls of each room is completely changed. By exchanging the heavy silk bedspreads and draperies for frothy cotton ones, she gives a bedroom a new, charmingly fresh look at a negligible cost.

By putting away bric-a-brac, moving the table out of the center of the room into the bay window, and replacing the painting over the buffet with a tall vase of tall, lasting greens (such as huckleberry), she creates a new face for the dining room at no cost at all.

Use Same Print

At little expense, the living room furniture gets new slip covers, the windows gay, light curtains. For these, she chooses cool colors—hard blues or soft, grayed ones; soft blues, lemon yellow, peach or icing pink. The materials are guaranteed not to shrink more than one per cent when washed. She looks on the savings to make sure of this guarantee.

The trend in decorating circles at the moment is to use a great deal of one material in a room. Draperies and several slip covers may be of the same print, with the remaining slip covers in harmonizing plain material. If there is figured paper on the walls, however, draperies should be plain. In this case, the print used for slip covers should contrast sharply in size of pattern with the size of pattern in the wallpaper.

Base Color Scheme

The most satisfactory way to decide on a color scheme for any room is to select the print first. Insist upon being given a large swatch of it. Use it as a color chart guide, choosing plain materials to match or harmonize perfectly with the shades in the print. Get swatches of these, too. Take all of the samples home and play around with them in different lights for a day or two before making a final decision.

If you have a lovely painting or a handsome screen which supplied the warm color scheme for the room during winter months, it might be interesting to work out a summer color scheme from the cooler, lusher, overlooked tones in the picture. The brown and golden yellows which were highlighted in the painting by the winter slip covers may be no more charming than the picture's cool greens that may be picked up equally dramatically by a green and white floral summer slip cover print.

(From Lord and Taylor, New York) Washable draperies and slip-covers in a splashy floral print give this room an air of cool comfort for summer. Using one print for curtains and for several slip-covers is a new theme in decoration. In this case, the print is used on three windows, on a low seat at either side of the fireplace, and on a divan on the wall opposite. It's practical to make slip-covers of material which won't shrink in washing, of course.

Variety of New Gadgets, Colors Provide Charm

Home was ever like this. Romantic gadgets are still used to lend necessary charm and interest to the home.

To refute the assertion that the modern home is an efficient shelter—but nothing more—architects point to the number of romantic touches that makes today's house just as endearing as the legendary rose-covered cottage.

A number of such "do-nothing" gadgets make living in a house more fun, they claim. Since most of them add little or nothing to its cost, they are frequently and liberally used in even the most inexpensive homes.

One of the first to strike the eye—in this case, the ear—is the doorbell chime, a resonant ear-pleasing substitute for the jangle of the ordinary electric bell. Illuminated house numbers are another touch—and a boon to evening visitors.

Picture windows are becoming increasingly popular. They are large expanses of glass that capture a lovely outdoor view and make it a part of the wall decoration.

Even the kitchen, once so physiologically efficient, is being warmed with gay colors and scroll cut plate rails. The bathroom, no less, has been livened with scintillating mirrors and cavoring marine life painted on the walls. Even closets have felt the touch of the wand and are being painted in deep, jewel-like colors and fitted with quilted backs and ruffled shelf edging.

SELECT CORRECT TYPE OF ROOFING

The exterior of a house might be referred to as the dress and the roof as the hat. Every woman knows that no matter how smart, how effective, and becoming a dress may be, the ensemble will fall dismally flat, fall utterly to achieve the result attempted if the hat is wrong.

In order to be sure that the "hat" of your house is not wrong, and also that it is the type best suited to design and purpose, it is advisable in the case of an existing home as well as one still in the contemplated stage to consult with an architect before deciding on the material to be used.

Copper roofing, although adaptable to all kinds of architecture, is usually associated with the more formal designs such as Regency, Greek Revival, and Georgian. Wood shingles are typically American and go best with houses that are likewise essentially American. They are especially well suited to replacement projects, as they may be applied easily over old roofing.

Asbestos shingles are popular due to their high degree of fire resistance. Slate roofing, which in some sections is almost as inexpensive as shingle roofing, wears well and is also fire resisting.

Asphalt shingles and shingle strips are economical, durable, and fire resisting. They come in a variety of colors and, like wood shingles, are best suited to informally designed houses.

The roofing is versatile, being made in either shingles or in Spanish barrel form. Shingle tile is appropriate for Colonial, Georgian, English, French, or modern architecture. In the barrel form it is generally used with Spanish or Mediterranean architecture.

SPRING 'FIX-UP' LIST PREPARED

Spring brings its annual "fix-up" season to the home owner. In recognition of the necessity for a reference guide to the points in a home needing special attention now, Federal Housing Administration officials have prepared a list.

The list, while not all-inclusive, gives a handy guide for home owners and others for checking their individual homes and property holdings with the object of definitely ascertaining just what is needed to prepare for spring and summer.

Under FHA's Property Improvement Credit Plan, amounts may be borrowed from private financial institutions qualified under the plan.

The list of items in a home which should be inspected now, as prepared by FHA, follows:

Roof, chimney, chimney cap, etc.
Flashing, exterior trim.
Gutters, downspouts.
Roof sheathing.
Dormers.
Weatherstripping.
Exterior walls—siding, brick, shingles, paint, other protective coverings.
Porch, bench, transom, doors, columns.
Steps—brick, wood, concrete, tile.
Grading and landscaping.
Walks and drives.

Interior
Attic ventilation, attic room.
Wallboard, plaster, etc.
New closet space, shelves, etc.
New outlets, new wiring.
Flooring—wood, tile linoleum, etc.
Plumbing fixtures.
Paints, wallpaper, interior decorations.
Built-in bookshelves, cabinets, cupboards, etc.
Fireplace mantel, flue, etc.
Joists and subflooring.
Interior trim.
Recreation room, laundry, workshop.
Heating plant.
Rafters, studding.
Doors, new hardware.
Electrical fixtures.
Lath.
Sheathing and insulation.
Blinds, shutters.
Garage, tool space, workshop, etc.
Stairway—treads, rails, balusters.
Foundation walls.
Basement floor.
Drain tile.
Footings.

Serve Summer Meals on Porch

The house with either enclosed or open rear porch really comes into its own during the summer months.

For informal luncheons or dinners the porch makes a lovely setting with the background of a garden. Porch furniture either in inexpensive wire rattan or wrought iron will prove to be more satisfactory than the more expensive upholstered formal furniture.

SMALL-HOUSE VALUE

The present small house, properly supervised as to materials and construction, of correct design, and fitted with modern devices for living comfort, is an efficient unit and carries the greatest value in history, especially when measured against its durability and low depreciation rate, according to a recent statement by a leading building material manufacturer.

It is reported the sales have ordered 8,000 planes from American factories for delivery by next fall.

BATH GRAB-BAILS
Safety experts are urging builders to be sure that bath-rooms are equipped with bath-rails for tubs. They point out that 3 per cent of home accidents are falls in bathtubs or showers. There were over 44,000 accidents in homes during the four years from 1934 to 1938.

SAVE TIME! TROUBLE! MONEY!

INSTALL A WATER SYSTEM

and have running water for every farm need!

Running water on the farm is a convenience that makes farm life really modern. In the house, the barn and everywhere you need it—just turn the faucet and have water. Jacuzzi Injector Pumps and pressure systems for deep or shallow wells are manufactured by a company with 25 years experience. For complete information on a pump for your farm and home water system see

Jacuzzi Pumps in Twin Falls

Let Height, Design and Woods Rule Table Choice

What do you know about buying those occasional tables that play such a big part in making a room liveable?

Height is an important factor—particularly in tables on which you will place reading lamps.

Such tables should average 28 inches in height, says Paul MacAllister, director of House of Homes, an exhibit of arts and crafts, in New York.

Height is not the only factor in your tables, however. Design and woods used are also important.

If your decorative scheme follows definite period—such as Victorian—you won't want the most modernistic of tables in it, you'll "moderate the modern."

If you have some fine, old family pieces chance are most of it will be in darker woods, so you won't want to go in much for bleached woods in your additions. Mahogany or walnut make good choices since the more conservative designs, that fit in with the widest variety of furniture, usually are found in those woods.

If, on the other hand, you're starting from scratch and want to go in for unusual tables, there are all sorts of things for you to look at. Some of the most unusual things I have seen, for instance, include:

A nest of three tables in pickled oak with hand-woven raffia tops in neutral color. The top table might be used as a coffee table, the other two for ash trays, cocktails or what have you.

An oblong coffee table with ceramic legs fired in gold. A layer of heavy beveled glass fits over a gold-leafed top.

A bleached mahogany tea table with a glass top through which you can see your tea service on the shelf underneath. You could also put flowers on top, magazines underneath.

A backgammon and chess table with tubular metal legs. The figures are etched in black on the mirrored top, which is reversible. And, definitely a luxury item, wrought metal table with a square base and a fifty-inch oval top. The glass top is etched in multi color metal-leaf. The rim and base have an antiqued gold-leaf base.

COLOR VARIETIES GAINING IN HOME

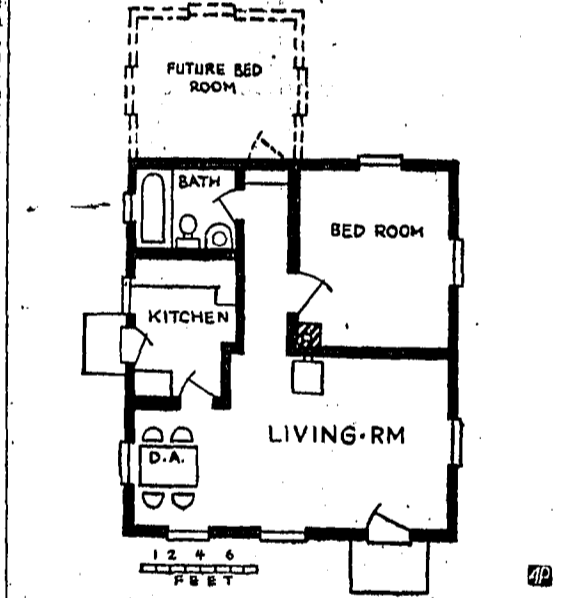

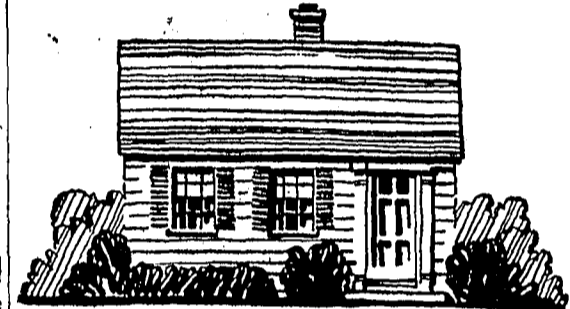

Interior decor of 1940 is taking in a wider palette. A greater variety of colors is being used in new homes, with particular emphasis on colors which are mixed with white and purified.

"Best sellers" in colors for walls are ivory, wheat and green, according to a recent report, with wheat moving into the top trio within the past year. The trend has been away from the vogue for primary colors of several years ago.

But if you don't particularly care for the trends as reported from elsewhere, Twin Falls builders and contractors—not to mention paint establishments—can offer a boundless variety of colors in the best of taste.

MONTREAL SAVES ON SNOW
MONTREAL—Unless the snowfall during March and April is double the average for the month, Montreal's snow removal bill will be \$380,000 less than it was a year ago, according to city hall estimates.

This 'House With a Future' Allows for Extra Bedroom

Here's a grow house designed for the family which wants to add just one bedroom in the future. The dining alcove is planned with a wide entrance into the living room to give a greater feeling of space. A door in the rear hallway of the original plan allows entrance to the future room, indicated by dotted lines. Cost of the basic house in an average mid-western community would be about \$2,015. The future bedroom would cost about \$340. These figures do not include the cost of the lot, range, architect's service and similar items. They would run to about \$750. Although figured for lowest costs, this design meets rigid requirements.

Adequate Wiring

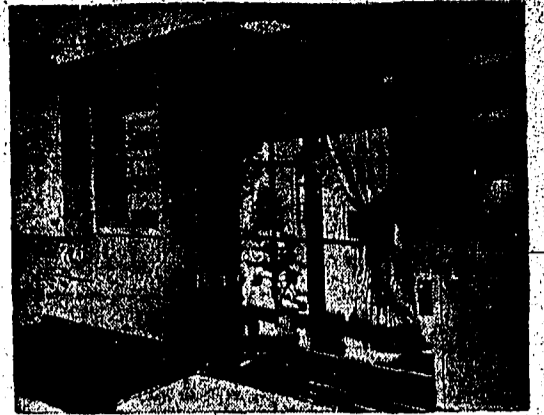

Is Essential to the Modern Home

A Kitchen With Character

Beauty, simplicity, and efficiency are combined in this kitchen. Efficiency is achieved by arrangement of equipment. Simplicity by the utilization of handy, built-in features. Beauty by employing oil-silk curtains and cheerful, red-dotted wall paper. The paper is washable and thoroughly practical for kitchen walls. It tends to tone down the glare created by the shiny surfaces of cabinets, sink, and refrigerator.

DWELLING RENT CONDITIONS
Rents for single dwellings and heated apartments are stationary in 68 per cent of 203 cities and towns, according to a survey recently completed.

CONCEALED
Concealed nailing is being used with the new color panels offered by the insulating board industry. The nail heads are hidden in the beveling of the boards.

TWIN FALLS 1939 BUILDING TOTAL ALMOST HALF MILLION

Inaugural Third Of 1940 Exceeds Last Year Level

Twin Falls Building Summary

Here are the building operation totals for Twin Falls for the year 1939 and for the first quarter of this year, as taken from official city records:

	New Dwellings	All Other New Construction	Repairs and Remodeling	Total
FOR 1939				
Jan.	18,000		1,000	19,000
Feb.	25,700	50,000	975	76,675
Mar.	19,625	4,050	10,235	33,910
April	15,250	22,650	9,950	47,850
May	17,435	175	2,610	20,210
June	51,450	3,450	1,298	56,198
July	16,975	6,175	1,835	24,985
Aug.	18,800	10,100	10,362	39,262
Sept.	45,900	300	5,485	51,685
Oct.	13,850	350	3,975	18,175
Nov.	26,000	29,915	10,850	66,765
Dec.	14,300	600	6,450	21,400
Totals	\$283,335	\$127,765	\$ 65,915	\$477,015
FOR 1940				
Jan.	10,680	233	6,275	17,188
Feb.	9,475	33,985	11,950	55,410
Mar.	83,940	38,400	6,935	129,275
April	33,100	24,000	4,915	62,015
Totals	\$137,195	\$ 97,518	\$ 30,975	\$264,538

Building totals in Twin Falls for 1939 reached \$477,015, one of the best years in recent history—but 1940, with but four months passed, has a total of \$264,538 for the first third of the year, or \$105,538 ahead of the average four-months period for the year just passed.

These facts were revealed here after a study of the records maintained by City Clerk W. H. Eldridge. Eldridge makes regular reports to the federal government concerning building activities here and, during specific months of various years, Twin Falls has led all Idaho cities and towns.

During 1939, records show, Twin Falls maintained its position as a city of new homes with \$283,335 being expended for this purpose. This year, with only four months passed, the outlook is even better with no less than \$137,195 having been expended for this purpose—and there still are eight months to go.

March on Top
Greatest single month for home building during the past 16 months proved to be March, 1940.

During March there was \$83,940 put up for new home construction. Highest month during 1939 was recorded in June when \$51,450 was expended in this bracket.

Fact that the month of March totaled so much more than any month of 1939; and the added fact that it was "early" in the building season, tends to show that there is little doubt that total expended for new homes this year will far outdistance that expended during 1939.

In January of this year the new homes constructed were valued at \$10,680 while in February it was \$9,475—and then came the March spurt which sent the figures soaring to now high levels. Total for April came to \$33,100.

Other new construction in Twin Falls (excluding homes) has not lagged in the race. Records show that the amount expended in this bracket rose sharply from only \$233 in January to \$38,400 in March, the April total being \$24,000. Total for the year to date is \$97,518 (first third) against the quarter average of 1939 of \$33,506.

Likewise records reveal that remodeling and repair work is also forging ahead of the 1939 averages. It rose to \$11,950 in February, stood at \$6,935 in March and \$4,915 in April. Despite the drop shown in March and April the amount stands at (first third of the year) \$30,975

against the quarter average for 1939 of \$10,005.

Commercial Buildings
In downtown Twin Falls three new store buildings have been completed or are under construction at the present time. At the corner of Second avenue north and Second street, a \$25,000 garage building is being erected on property which has never been used for any purpose since the city started.

All this, observers point out, tends to show that Twin Falls is forging ahead in the building line at a swift pace.

By way of comparison, the following building total figures for recent years are listed. All are official:

1935	\$315,998
1936	458,126
1937	881,463
1938	360,500
1939	477,015
1940*	264,538

(* first four months).

Mere Novelty Not Valuable Feature In Home Designs

Mere novelty in a home, whether in plan, structure, or exterior appearance, which is unrelated to underlying economic, social, or climatic factors is not apt to have a long duration, in the opinion of housing officials.

Similarly, they advise, novelty in exterior appearance which is unrelated to logical developments in plan or structure is likely to earn the same fate.

"In witness of this," pointed out Administrator Stewart McDonald, "we have such sporadic attempts to influence style as the Art Nouveau of the 1890's and the exotic decorative mode brought to brief prominence by the Paris Exposition of 1900.

"On the other hand, where the unconventional modes do make possible a more thoroughgoing expression of a way of life which has already found expression in the plan of the house, their vitality will be more enduring. Thus one could hardly imagine architectural forms more suited to a period of expansion and extravagance such as characterized that following the Civil war than those then in vogue."

Gay Prints Prove Popular With Mrs. America at Spring Sales

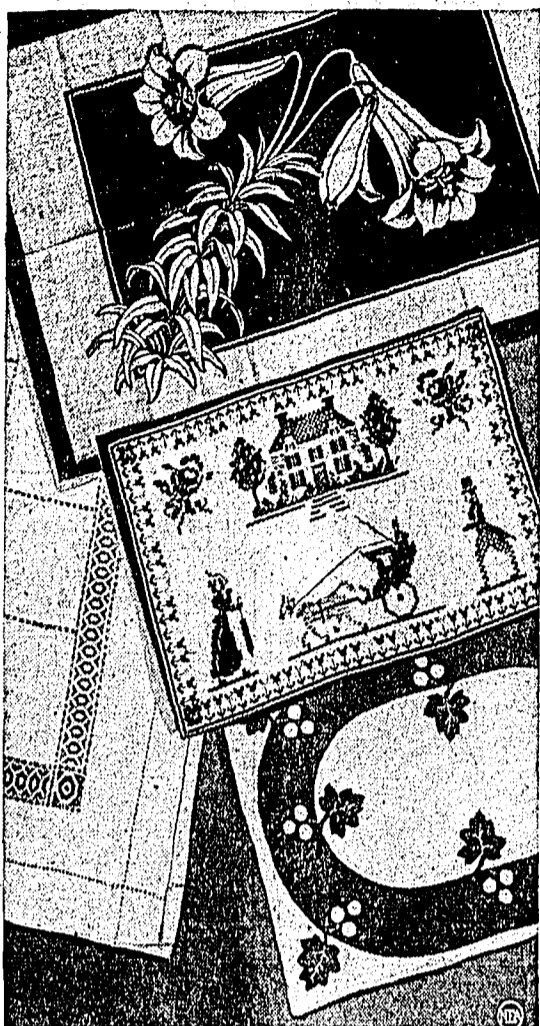

NEW YORK—This is the time when Mrs. America takes advantage of the traditional "white sales."

She fills in the blank spaces in her drawer of table linens, replaces those towels and bedspreads which are beginning to look pretty threadbare, adds to her linen closet a few glamorous items as well as the necessities.

This year, gay printed table linens for informal entertaining and family meals will strike her fancy. There are handsome damask cloths and lavishly embroidered luncheon sets in pristine white linen at attractive prices, of course, but the colored ones are the news in the "white sales" departments.

A navy blue luncheon set with center runner, place mats and napkins may be monogrammed in red or white. Pale, shell pink organdy circles are applied in the corners of the pieces in a dark gray linen luncheon set. A yellow linen bridge cloth and napkins are embroidered in brown and orange. Pale green cocktail napkins have tiny rust glasses embroidered in the corners.

Many linens purchased during sales will be put away for future use or future gifts. From the experts come these suggestions for one who intends to store linens—and all are applicable to household linens already in use.

Typical of the new and lovely linens on display to tempt thrifty "white sale" shoppers are these smartly designed pieces. Included are a pure linen luncheon cloth, left, with simulated Swedish handweaving; a linen damask lapkin, the oblong napkin, at top; a luncheon set place mat in sampler design, center; a place doily (bottom) from a luncheon set of linen with organdy inserts.

Now's the Time To Arrange Your Summery Things

It isn't too soon to look ahead to the summer months, and to plan accordingly.

If the spreads and draperies you put away in the fall, to say nothing of whatever slip-covers may have gone into retirement, have reached such a stage that you don't like to think of using them through another season, this is a good time to arrange for new ones.

Summer fabrics are in the stores now. At the first opportunity choose what you need. Then, before the distractions of the outdoors arrive again, make the draperies and the spread that a bedroom sorely needs, and the slip-cover without which the living room sofa surely will look worse and worse.

Favor gingham, cottons in general, because washables make living simpler any day in the year, and especially in summer. There is satisfaction, too, in having only to drop curtains into the household washer, run them through the ironer, to make them bright and fresh again.

But start now.

In business districts of representative American cities, legal curb parking space has shrunk from one-third to one-half in the past 10 years.

RIGID INSULATING BOARD

RESISTS LEAKAGE OF AIR

Structural insulating board is practically impervious to air leakage under ordinary conditions. The amount of infiltration directly through insulating board products, when used in combination with other materials, usually is insignificant even at high wind velocities. This factor is reflected in the lower heating costs of board insulated homes.

BETTER CLOSETS

One important mark of the modern home is the banning of "hole in the wall" closets. New homes are being built with closets which not only have storage facilities worked out with engineering exactness but which also have beauty and charm. These small rooms have automatic lights which flash on when the door is opened, and are adequately ventilated. Attractive backgrounds are selected of paper, color insulation panels or fabrics.

Built Last Year ...

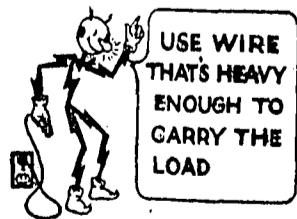

BUT IT NEEDS RE-WIRING ALREADY!

SAVE

When You Build or Re-model

by Adequate Wiring

Don't decide the size wire to use by present needs alone. Every family adds to their electric servants over the years. Wire that is heavy enough now may be too light later—and will cut down the efficiency of your appliances.

It's a sad awakening to discover that the "dream home" you spent so many hours planning is out of date already. You'll save money by checking the wiring carefully—Is it as modern as the rest of the home?—does it provide enough convenience outlets in every room for lights and appliances?—is the wire heavy enough so you can add more lights and appliances later? Re-wiring is expensive. See a competent wiring contractor before you decide.

IDAHO POWER
Electricity...Does So MUCH—Costs So LITTLE!

WATER SOFTENER CUTS SOAP BILLS

Soft water is a satisfying convenience all the year round, the plumbing and heating industries bureau says.

On wash day in mid-winter clothes are as fluffy, white and clean smelling as the sun-dried summer laundry, when softened water is provided in the home. In addition, softened water cuts the annual soap and cleanser bill in half, because it makes a rich, plentiful suds with less soap. It gives alkalis and laces longer life by washing out all the dirt from the fibres of the materials.

Soft water protects the natural texture of the skin, which is inclined to be chapped and roughened by winter weather. The prickly rashes and blemishes which appear on the skin of small children are avoided when the water in the home is conditioned by an improved water softener.

Water softeners are available on the market from small portable softeners that can be attached to any faucet, to automatic softeners for the entire water supply to the house. These softeners condition the water by filtering it through a layer of zeolite and gravel. Zeolite has the unique property of taking out calcium and magnesium from

Code for Testing Boilers Adopted

Protection of the interests of the purchasers of heating equipment is the chief objective of a code for the testing and rating of boilers which has just been adopted by the Institute of Boiler and Radiator Manufacturers.

The adoption of the code marks a forward step for the boiler and radiator industry in that it provides a standardization formula for measuring the output or performance of steam and hot water boilers.

All boilers which are measured and rated according to code will be designated with an emblem for the information of the public and heating contractors and wholesalers.

The significance of the code to the consumer is the fact that boilers tested in conformity with the code will be rated according to their performance. Thus the homeowner will be assured of adequate boiler capacity.

The development of the rating program of the Institute of Boiler and Radiator Manufacturers has had the support and assistance of the National Bureau of Standards, the Federal Housing Administration, and the American Society of Heating and Ventilating Engineers.

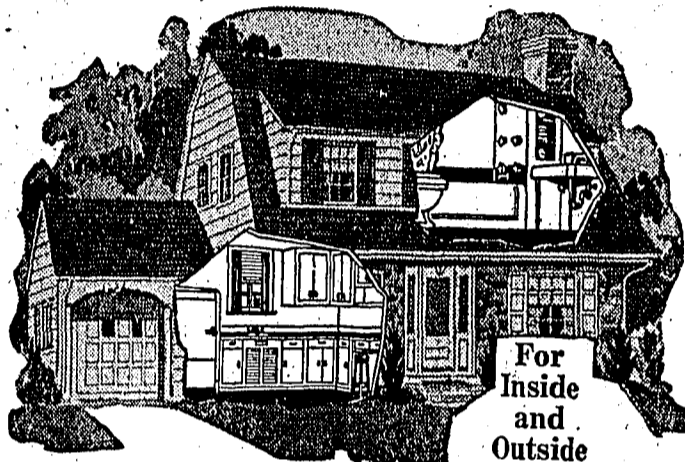

The hard water and replacing it with soft water sodium salts. This action is instantaneous and automatic, according to the bureau.

HEALTH MENAGED BY OLD PLUMBING

The plumbing of many older homes is obsolete and inefficient, introducing the family to a health menace and at the same time causing dissatisfaction with the home. Owners of homes which were built 10 or 15 years ago should check the following points in their plumbing systems:

1. Clogged drains needing attention.
2. Leaky faucets requiring washers, tightening, or new parts.
3. Defective flush valves in water closet requiring repairs or replacement.
4. Covering for water pipes or other precautions to prevent freezing.
5. Installing refrigerator drain-pipe and trap to replace pan.
6. Installing water-heating equipment, water softeners, etc.
7. Replacing worn-out or worn-out fixtures with newer types.
8. Providing additional bathroom or lavatory and toilet.
9. Providing toilet and shower in basement.

Some patent soul has figured out that there are 30,000 separate pieces made use of in building the average American home.

Builders Depend on Kregel's

- For Paint
- For Tools
- For Plumbing Fixtures
- For Builders' Hardware

Of course there are hundreds of related items such as Fairbanks-Morse water systems, Muresco and building materials... but when it comes to remodeling or building Magic Valley people depend upon Kregel's for their hardware needs.

Keep your home in repair and the depreciation is much less. Now is the time of year when the weather is on your side! It'll cost you less.

PAINT

MOORE Paints Compare in Price — Quality

HOUSE PAINT	ENAMELS
Oriental Outside House Paint, per gallon \$1.95	Interior Gloss Enamel for Walls and Woodwork, per gallon \$3.35
Egyptian Outside House Paint, per gallon \$2.85	Per quart Dulamel Eggshell Enamel for Kitchen, Bathroom, etc., per gallon \$3.35
INTERIOR PAINT	
Sani-Flat Washable Paint for Walls and Wood Work, per gal. \$2.65	Per quart Utilac 4-Hour Enamel \$4.35
Per quart 80c	Per quart \$1.25

Utilac Enamel
Utilac gives woodwork and furniture a rich, popular satin-gloss finish usually obtained only by rubbing. Covers in one coat... flows so smoothly that it is almost impossible to do a poor job with Utilac. Dries in four hours.

'Grow House' in Modern Style Designed for 2 More Rooms

An outside designed in the modern manner is the feature of this basic house. It has casement windows, horizontal lines, and a flattened roof. Dotted lines indicate the two future bedrooms. Entrance to the new rooms is made easily through the small hall to the bath. Cost of the basic house runs about \$1,800, based on figures from an average mid-western community. This is exclusive of lot, range, architect's service, and other such items, which would add about \$750. The two future bedrooms would cost about \$550. This house, like others in the series, is built of clipboard slides with brick casing on the chimney, and with asphalt shingles. It meets with federal housing administration requirements, means of the federal housing authority.
