100 Americans Feared Missing After Egyptian Liner Is Unreported in South Atlantic Crossing

Ship Overdue in Trip From Brazil To African City

NEW YORK, May 19 (UP)—The loss of 323 lives, including those of upward of 100 Americans, was feared today with word that the Egyptian passenger liner Zamzam had been sunk "due to enemy action" in the south Atlantic.

The old 8,299-ton steamer carried 203 passengers and a crew of 120 when it sailed from New York March 20 for Alexandria, Egypt, by way of Recife, Brazil, and Capetown, South Africa.

Of these, 24 were young Americans, of prominent families, who had volunteered as members of the British-American ambulance corps to serve as ambulance drivers with the British forces in the middle east.

The British-American ambulance corps indicated that it had no hope for its members.

"This is a terrible blow," said William V. C. Ruston, president of the British-American Ambulance Corps, Inc. here sent letters to relatives of the 24 Americans notifying them that the Zamzam had safely reached Capetown, South Africa, April 21.

Today the ambulance corps headquarters said the notification was based on a mistaken assumption and described it as "extremely unfortunate."

Egyptians and 10 British officers, including Capt. William Gray Smith, her master.

A brief dispatch came through the radio from London that "some members, at least" of the party of American ambulance drivers had been lost, and that the ship was sunk "due to enemy action" in the south Atlantic.

The British-American ambulance corps announced that the ship had reached Recife safely, had been taken from there soon after April 10, bound for Capetown, and never had been sighted since.

Suit Would Prevent Selling of Bonds to Buy State Buildings

BOISE, May 19 (UP)—The Idaho supreme court today had under consideration an affidavit for writ of prohibition to prevent State Treasurer Myrtle P. Enking from selling a \$550,000 bond issue to finance a construction program on state buildings.

The suit will serve as the first test of a constitutional amendment adopted at the 1940 election which restricted investments for state educational funds.

The writ of prohibition was sought by F. H. Kinyon, Boise, "on behalf of all taxpayers of the state."

In his affidavit, Kinyon alleged "there is no authority under law of the state of Idaho for purchase of the bonds" because of the amendment limiting the type of investments which might be purchased with state educational or endowment funds.

The bond issue was approved by the 1941 legislature for construction of buildings at the University of Idaho, university of southern branch at Pocatello, state penitentiary, state industrial training school and other institutions.

SOLON ASKS U. S. TO NEGOTIATE ON FRENCH COLONIES

WASHINGTON, May 19 (UP)—Rep. Francis Case, R. S. D., today introduced a bill to authorize Secretary of State Cordell Hull to negotiate for acquisition of French possessions in the western hemisphere.

The bill would authorize acquisition of the islands of Martinique, Guadeloupe, St. Pierre, Miquelon in the Atlantic; Clipperton island in the Pacific; the province of French Guiana in South America; and "such ships, airplanes and cargoes as the French government may care to sell."

Under the act of Havana, adopted by the American people in 1902, the United States could take temporary possession of the French areas in this hemisphere in any emergency in which their status was threatened.

In event the United States recognized the "free French" regime of Gen. Charles de Gaulle, which it is prepared to do in event of a complete break with Vichy—it might make arrangements with him for protection of these areas.

Responsible officials do not expect any open break between Vichy and the U. S. at this time.

The motors wouldn't start. The crew was tinkering with the engine of one. A stoppage in the anthracite industry became effective today although the union had issued no formal strike call. An agreement expected to be reached by the end of the week.

It was expected the tentative agreement would be signed tonight by the union and operators after last minute details had been ironed out during the past few days.

MISSING SHIP ON ROUTE TO SUEZ

WASHINGTON, May 19 (UP)—Government officials today anxiously awaited official reports of the fate of the neutral passenger liner Zamzam on the route to Suez that American ships would take with supplies for Britain's north eastern armies.

Not only were U. S. officials concerned over the reported loss of approximately 100 American lives, but they were perturbed that the reported "enemy action" occurred on the route to Suez, which has been regarded as safe for neutral traffic.

Diplomatic sources wondered if the Zamzam incident might be interpreted as a German warning to the United States of what to expect along the path to Suez.

WASHINGTON, May 19 (UP)—The justice department will continue to detain 200 aliens in the United States until all of questionable status are taken into custody. Officials said the aliens were held under the status of approximately 1,000 to determine their status.

# Draft Coincidence Flood Piles up As Board Sends List of 92 Oddities

The odds against "one-number" draftees may be one in 9,000—but the Twin Falls county area No. 1 board made to Washington today a "selective service" magazine for draft boards, stating that Twin Falls resident Archie A. Baker had the same serial and order numbers, 722.

Approximately 20 additional letters arrived from various parts of the country this morning. The whole flood was in response to a one-paragraph item in "Selective Service" magazine for draft boards, stating that Archie A. Baker had the same serial and order numbers, 722.

YOU BET I SMOKE CAMELS. THEY BURN SLOWER AND SMOKE EXTRA MILD

135 POUNDS—but they say the "Texas Mustang" has the greatest swing in golf. And to champion Ben Hogan, Camel's extra mildness is mighty important. Important to any smoker... to you... no matter how much you smoke... because this extra mildness is in the smoke itself. After all, it's the smoke you smoke.

And Camels give you less nicotine in the smoke than any of the other 4 largest-selling brands tested... 28% less than the average of the other brands. Even if you're only an occasional smoker, you'll find Camel's extra mildness—extra freedom from nicotine in the smoke—can add to your smoking enjoyment. Switch to Camels now!

"Liking Camels the way I do, it's well to get that EXTRA SMOKING PER PACK. That's ECONOMY!"

EXTRA FLAVOR ALWAYS HITS THE SPOT. THAT'S WHY I DON'T TIRE OF SMOKING CAMELS

AND CAMELS SMOKE SO MUCH COOLER, TOO

THAT CAMEL FLAVOR is something very special," says Ben Hogan (above). Yes, too-fast burning in a cigarette creates extra heat in the smoke... dulls flavor and fragrance. Camels burn slower, give you a cooler, more flavorful smoke... and less nicotine (see above).

# Keystone of Happiness Outlined for Graduates

By FRANK ELLSWORTH

"Your success and your happiness, if you find them, will never come through the possession of this or that thing," Rev. Roy E. Barnett told the senior class of Twin Falls high school last night at the baccalaureate services in the high school gymnasium, as he spoke on "The Holy Grail High Way."

"There is no treasure which you can discover or capture once and for all, to be put in a safety deposit box, where you can go periodically to admire it, or to be thrilled or healed or blessed by it. Your success and happiness will come, if they do come, as a result of the way in which you follow the quest of your Holy Grail."

A desperate and war-ridden world now is reaching the consequences of men's false assumptions that any man or nation can ignore the moral requirements of God and get away with it, Rev. Barnett said.

### Decide What Is Right

He told the class that judgment and determination will be called into action both to decide and to do what is right and avoid what is wrong. There will be times when to be on the right side will be gloriously right, he asserted, and to be on the wrong side will be tragically wrong.

"Pray God, therefore, that you may never lose your moral judgment and fall prey to the temptations so common to mankind. Right and wrong are real. Wrong brings ultimate defeat and failure; right brings ultimate victory and success. Right is right and wrong is wrong, and no amount of rationalizing and philosophizing can take them out of the warp and woof of God's requirements for you and me," he said.

### Closing Words

In closing, Rev. Barnett said: "Faith is creative. It actually brings things into being that did not exist. It solves problems; it removes mountains. It is a rope, placed in your hand, which you throw upward to God with the assurance that He is going to grasp the other end while you draw yourself toward Him by means of it. "With God and right and faith at your disposal, go forth to succeed and be happy."

Presiding was Supt. Homer M. Davis. Prelude, "Entrance of the Stars" and the professional and recreational, "Praise Ye the Father," were played by the combined high school and junior high school orchestra, directed by Richard R. Smith. The high school mixed chorus,

under the direction of Miss Marjorie Albertson, sang "Verdant Meadows," Handel, and "Pilgrim Chorus," Wagner. J. W. Richins of the E. D. S. church, gave the invocation and Rev. Barnett read the Scripture.

### Benediction Offered

Benediction was offered by Rev. L. D. Smith of the Nazarene church. This service was the first of a series of events for the 240 seniors during the last week of school.

Today's schedule includes breakfast in the Methodist church, class day program in the high school auditorium and a dance for the entire student body at the American Legion hall. Tuesday evening the Junior-Senior Parent-Teacher association is giving a dinner-dance for the graduates in the high school gymnasium.

Final event is commencement exercises Thursday evening.

### DEALER ASSUMES HUDSON'S AGENCY

Appointment of LaVern Strong as Hudson motor car dealer for Twin Falls was announced here this afternoon.

Showrooms for the new Hudson company will be at 402 Main avenue north and the concern will be known as the Strong Service Sales.

Strong, who is well known in automobile circles in Twin Falls, came here in 1919 and has been in business for the past 17 years. Official opening of the new motor concern was today.

This afternoon Strong pointed out that in the lowest price field Hudson offers a new 92-horsepower Hudson six on a 116-wheelbase, with a longer, lower body of new design, increased performance and economy and an extensive list of refinements and improvements. A still lower priced model, the Hudson six traveler, with the same power and wheelbase, completes the company's entries in the lower price ranges, but above this lowest priced line is a new 102-horsepower Hudson super-six, with a wheelbase increased to 121-inches and a further group of 1941 advances. Third line is the moderately priced but luxurious Commodore series.

Another new innovation in Hudsons, which should be of particular interest to farmers, is the convertible row chisel which can be changed from a pickup truck to a wrecker in one minute.

The plane, flown by Lieut. Col. A. Kincaid and Capt. S. B. Mask, was en route from Seattle when high winds and storms, including rain, and snow over scattered portions of this section of Idaho, made a landing necessary.

"Market" Cemeteries

In medieval times, European markets often were located in cemeteries. Cemeteries, as well as churches, were places of sanctuary for those seeking relief in time of war, fire, famine. Here they were protected from all harm by church law. So many persons lived in cemeteries, as a result, that regular market places were established in them.

### COST OF LIVING FOR U. S. CLIMBS

WASHINGTON, May 19 (AP)—The federal reserve board and the bureau of labor statistics reported today that it is costing the average American more to live than a month ago.

A labor department survey reported a one per cent increase in retail prices of staple foods in the first half of May.

The reserve board reported sharp advances in wholesale commodity prices in April and the first half of May. Increases were most pronounced for agricultural commodities, the board said, "reflecting in part the prospect of legislation raising federal loan rates for basic farm crops."

The board found increases in prices of petroleum products, coke, leather, textile yarns and fabrics, and building materials. It reported a decline in April industrial production resulting from curtailment and the Ford Motor company work stoppage.

The labor department's survey of 19 foods in 18 large cities showed: Sugar up one-half cent per pound; butter, prevailing season brand by advancing in 17 of 18 cities; pork chops, up an average of one cent per pound; navy beans, up two cents a pound; eggs up an average of 7 cents per dozen.

No. 29 of a Series

**It's always the SORE thumb that sticks out...**

Odd, isn't it—the way everybody notices the sore thumb?

It's the same way with the retailing of beer. Everybody knows about the one undesirable place...everybody seems to forget about the thousands of worthy, while retailers who operate clean, decent, law-abiding establishments.

To protect the good name of beer, we of the beer industry want the few... but noticeable... "black sheep" retailers eliminated.

That's not all. Such retailers endanger an industry that brings important economic benefits to the community. Right here in Idaho beer provides employment for 5,276 persons, supports an annual payroll of \$5,665,101 and contributed \$249,021.00 last year in state taxes.

This state, too, has an important stake in the beer industry's purchases—for materials, equipment, and services—from more than 100 other industries.

You can help us protect these benefits in two ways—by (1) patronizing only the law-abiding places where beer is sold and (2) by reporting any irregularities you may observe to the duly constituted authorities.

# U. S. WILL TRAIN BRITISH AVIATORS

WASHINGTON, May 19 (AP)—U. S. army air corps schools will be used to start early next month a new program to train 4,000 British pilots in this country annually.

Officials said a plan approved by the war department provides: 1.—Immediate use of primary and basic training facilities at private civilian flying schools that now are training U. S. pilots under air corps contracts. This would get the program started.

2.—The British will contract with half a dozen of these schools to build new facilities for them. The U. S. army will supply planes and equipment, while the British will pay for instruction and other personnel. The army's share will be furnished under the lease-lend program.

3.—Advanced training at the U. S. air corps' three major centers at Maxwell field, Ala.; Moffett field, Calif.; and Randolph field, Tex.

Officials emphasized that the British fliers, expected to be drawn from all parts of the empire, will enter the schools as "civilians" and not as RAF members in order to comply with U. S. laws.

# NAZI COMBINATION PLANS ATTACK ON U. S., SAYS WICKARD

## SECRETARY HULL MAPS POST-WAR AIMS OF NATION

By Lyle C. Wilson  
WASHINGTON, May 19 (UP)—Secretary of State Cordell Hull's statement of post-war objectives was followed today by another cabinet officer's charges that Germany is seeking a combination of nations to attack the United States.

Secretary of Agriculture Claude R. Wickard uttered that warning in a nation-wide broadcast from Hutchinson, Kan. He said any dictatorship combination would be answered by "armed might."

Hull and other speakers in a week-end of extraordinary oratory insisted that Great Britain is the only nation that the United States must win and will see that our weapons reach the British in time.

Wickard, like Hull, emphasized the self-interest of the aid-to-Britain policy. His speech was designed to be a hard headed appeal against mid-western isolationism.

Without mentioning the word "convoy," Wickard urged again that we see that the goods get there. He expressed confidence that the people of Texas, Oklahoma, Kansas, Nebraska, and the Dakotas were determined to do what needs to be done.

Calm Odds Against  
"Some persons are saying that the odds against us are too great," he said, "but we'd better pipe down and keep quiet. Wickard said, "I don't think that there are many of those persons or that they amount to much. The events of recent days give me proof that the Nazis are haltingly trying to form a combination of nations to attack us. I know what the answer of the American people will be to that. The answer to any dictatorship combination aimed at the United States will be something like the Nazi understanding-armed might."

He warned against "what would happen if Germany gained control of the British, French and Italian navies enabling transport of men and machines to the western hemisphere faster by the Atlantic ocean than if that body of water were dry land."

Hull outlined his peace aims here, asserting that it is none too early to lay down at least some of the principles by which policies must be guided in the post-war world.

It was learned that the administration considered Hull's address of great significance on two counts, first because of the outline of peace aims, and second, because of its emphasis on the necessity of maintaining Great Britain to ensure our own security.

Hull's address was in connection with the celebration of the trade week. President Roosevelt joined the foreign trade observance with a week-end statement that totalitarian powers would make foreign trade "merely another weapon for ruthless aggression and subjugation."

## SENATOR'S WIDOW RAPS COLUMNISTS

WASHINGTON, May 19 (UP)—Newspaper columnists today were accused by Mrs. Ernest Lundeen, widow of the late Minnesota senator, of using "vile slanders" to deliberately and falsely challenge the integrity and patriotism of her husband.

She charged in a radio speech last night that Walter Winchell, syndicated columnist, had slandered her husband by repeatedly suggesting her death—that he was not a loyal American.

"This statement is malicious and atrociously false," she said, "his record stands in contrast—and it is an imperishable record of true Americanism."

She charged that Drew Pearson and Robert S. Allen, co-authors of the "Washington Merry-Go-Round," cooperated with Winchell in "spreading these lies."

She emphatically denied a Pearson-Alton assertion that two agents of the department of justice were on the plane with Lundeen when it crashed and carried him to his death, and that they had been assigned to "watch him."

She read a letter from Attorney General Robert H. Jackson, saying that the senator was under investigation at the time of his death and that any charges against him would be true. Assurances that G-men were not assigned to "watch" Lundeen also were written by J. Edgar Hoover, chief of the FBI, Mrs. Lundeen said.

## Mediterranean Developments Point to Nazi Drive for Oil

Developments in the eastern Mediterranean region point increasingly to a German drive, first for control of the oil fields, then for the Suez canal and the British naval base at Alexandria.

French-mandated Syria and Independent Iraq already are involved; Turkey and Russia are potential bidders and Russia are potential bidders. The British navy's interest in the region is also apparent. The British navy's interest in the region is also apparent.

The declaration shows the seriousness with which Britain views the Turkish attitude. The British ambassador to Ankara probably already has made representations to the Turkish government. The near east will fight aggression.

From the British viewpoint, aside from Turkey the attitude of the Arab world is of primary importance. The Syrians want and have long wanted independence. They dislike the French and do not trust Britain as a savior. There is considerable sympathy for them in other Arab countries.

The axis powers have been busy disseminating propaganda and the troublesome grand mufti of Jerusalem, in exile, is ready to help foment an Arabian "holy war" against the Jews.

The attitude of the French commander in Syria and Lebanon makes it difficult for the British. The high commissioner, Gen. Henri Dentz, has proclaimed his intention of fighting against "aggression."

But the French force in Syria is not formidable, probably not more than about 20,000 men, and their morale is questionable. The British have an undisclosed number of men and a good air force in Palestine and Trans-Jordan, to the south of Syria. Gen. Wavell, according to Prime Minister Churchill, has some 500,000 men in north Africa. In addition, the crumbling of the Italians in Ethiopia should shortly release an excellent force of south African, Indian and other empire troops for duty at any threatened point.
