Faithful Dog

Peggy, 7½, of Frank-Stein, Borested Fatal Accident

Faithful to the last was the large German police dog of Frank M. Steiner, who was shot yesterday on Shoshone street when a car came to him.

It was Peggy who revealed the tragedy, giving first notice of the harm which had befallen her master.

Justin Doolittle, engine hater in the Union Pacific yard, says that the dog came to him in the early morning hours and received little attention. At the time Doolittle was near the engine house, he saw the dog's second appearance, and accused Doolittle of curiosity.

The engine tender said he suspected some harm had overtaken Steiner, so decided to follow the animal.

The latter led him directly to Steiner's body in the snow on Shoshone street, but Peggy stood guard and objected to Doolittle touching Steiner. On account of the dog's powerful size her rights went undisputed, and the group which soon gathered was impressed with the effective work of the faithful friend of the dead officer.

THE SLAUGHTER CONTINUES

Killing of Frank M. Slater here in yesterday's hit-and-run offense brings to two the number of patrolmen who have met violent death in the line of duty in this city within two years, and makes a total of four officers so killed in this county—three of them within two months.

Tom Russell, merchant patrolman, was murdered following a service station hold-up here Feb. 6, 1934—shot in cold blood as he pursued a fleeing robber. The community was horrified.

On Nov. 25, Fontaine Cooper, state traffic officer, was shot down on the highway near Buhl, confessedly by Douglas Van Mack, who says he also fired fatal bullets into the body of Deputy Sheriff Henry C. Givens, whose death took place 13 days later. The state and northwest were horrified.

And now another patrolman has been killed—victim of violence just as fatal in its consequence as it committed in the manner other officers were slain. The result is most terrifying.

The tragedy brings to two the number of auto fatalities in the county since the first of the year, chalking up for the first two weeks of the year a fifth as many such deaths as took place during the whole of 1935.

Other auto accident fatalities here, for the most part, have been those which come under the head of carelessness. But the one which took the life of Frank Slater involved a person engaged in enforcing the law, and in addition, was committed by a hit-and-run driver, a circumstance which brings the case into the criminal class.

To say that the tragedy is deplorable, is beside the point. Guilt must be established and swift punishment imposed. This sort of thing cannot go on. Life is too valuable. The slaughtering of officers of the law constitutes a record unworthy of the community.

With a new air-conditioned bed, it is said, blankets can be kicked off in the winter. Now for a machine that will spray crumbs between the sheets.

WAR LOANS VS. NEUTRALITY

The House of Morgan has issued a statement denying that this country went to war in 1917 to protect the allied loans which Morgan had floated in this country. The statement points out that so few persons were interested in allied loans that the loans could have had only a small influence on the sentiment of the country as a whole.

This, of course, is true enough, as far as it goes. What needs to be added is that these loans were the means by which we tied our fortunes to those of the allies long before we declared war.

We developed an enormous burst of prosperity, all it due to allied buying. For that reason, we got ourselves into a position where genuine neutrality was impossible.

When the moment of decision arrived, our minds were made up—although we did not realize it at the time.

This was the damage the loans did. They made it certain that we would take sides in spite of ourselves. That is why the country wants to see such loans flatly prohibited in the case of future wars.

A possible comeback, if the girl friend selecting from the menu begins to get out of hand, might be, "What's this, a Jackson Day dinner?"

TELEVISION AROUND CORNER

It is exceedingly interesting to note that the labyrinthine obstacles in the way of television have finally been removed, and that all that keeps us from enjoying this newest miracle of science on the same basis as the ordinary radio is a network of commercial problems.

So the Federal Communications Commission reports to Congress. It points out that equipment for extending the range of man's sight to the same extent that his hearing has already been extended has now been perfected.

Actual extension of large-scale television to the ordinary home, however, must wait until the complex commercial problems involved are solved.

This, really, is just another way of saying that we shall soon have television. For if anything is certain, it is that the American business community can solve any kind of purely commercial problem you can hand it.

If the scientific hurdles have been passed, the others won't stand in the way very long.

It's an ill wind, etc., and American Automobile association managers may no longer be bothered by farmers seeking corn-hog checks.

A COMMON GUY
Mister J. P. Morgan, though he is a top-of-the-line tough, never has just a common guy.

Even as you and you at the club, investigating Morgan's biz, you see a pipe he drug and drug—Applied the embers on the rug—Hamilcar.

THE CAR DOOR IS ALWAYS THE TEST!

TEA DRINKER
(For Mr. Wiley Dodds)
I write to tell you what I think. Of fellows using tea. An afternoon drink.

The he-man sex should have the guts to stay out. Of feminine cuts.

"They drink their liquor straight—They work all day—And stay up late."

All this you do And do quite fine. From smoking to drinking And "feeding in."

But it's a damn good man who can drink tea sense. To know that TEA isn't made for you.

For it's only a sissy, it seems to me. Who drinks a beverage Such as tea.

So though you're smart, and a good news thinker. To me, and Scotty's. You're just a "tea-drinker."

With All My Love

By Mary Raymond

Like all she wanted was his love. Like all she did.

He looked up, feeling a surge of pure relief. But it was not for him. It was Miss Faine at the office, asking if he could come down immediately. There was work to be done, work that had to be done, work that had to be done.

Scott found the older man sitting at his desk, his arm in a sling. Dr. Osborne's secretary had called and said that you can see. Slipped on some damn steps. This sprained arm is going to put the rest of your life in jeopardy.

"I'm sorry to hear it, Mr. When did it happen?"
"Early this morning. The worst of it is there's a likelihood somebody got to perform."

"What's the matter with you?"
"I've got late last night. Had an emergency call."

"The 'bad' Dr. Osborne was working with a person named 'You see, Stanley, I had a long way to go to get to you."

"Strange that one could go about business with a sprained arm. Scott's pulse leaped. It was the professional instinct, availing opportunity and waiting to be used."

"You're sure you're up to it?"
"As a matter of fact, I have a good deal of experience with this kind of thing. People who are perfectly willing to put the case in your hands."

"What's the operation?"
"A boy, five years old, is suffering from a condition which is called 'What's the operation?'"

"The boy is bringing him by plane. If you feel you want to take it, go ahead. But if you don't, I'll have to refer the case to Dr. Osborne."

"I'll do it," Scott said. "I'm all right. Don't worry. The boy is bringing him by plane. If you feel you want to take it, go ahead. But if you don't, I'll have to refer the case to Dr. Osborne."

FAVORABLE HOG TREND-FORECAST

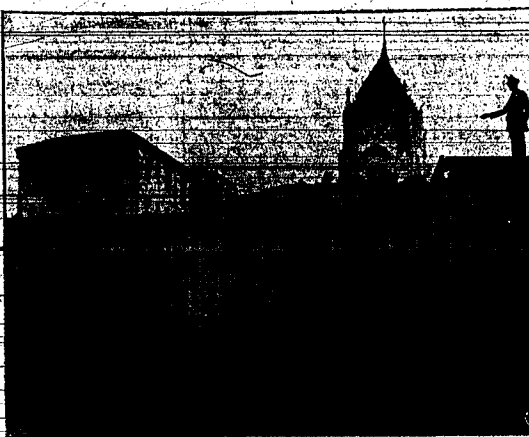

Situation Will Stay Cheerful Until Near End of Year, Experts Say

MOSCOW (Special)—The hog situation as a whole is expected to continue favorable at least until into this year, it is indicated by the University of Idaho agricultural economists in studying the 1935 outlook.

Summary of hopes for slaughter in the current marketing year (ending September, 1936) are expected to be even smaller than the supplies in the marketing year just closed. The 1935 spring pig crop was 10.6 per cent below the 1934 spring pig crop and 40 per cent below the average of the spring crops of 1929 and 1933. Stocks of pigs on hand October 1 were the smallest on record for the 20 years that storage figures have been compiled, being 47 per cent below the average of the last five years.

Improvement in consumer purchasing power during the coming year is expected to increase the demand for hog products. The outlook must feel that present conditions greatly encourage expansion of the hog industry, a point producers should keep in mind in planning their operations for the end of 1936 and later.

SAN FRANCISCO SLIDE PERILS COLLEGE AND NUNS

San Francisco college for women, and 25 nuns, residing there, were imperiled Christmas night when the west section of Lone Mountain in San Francisco slid away. The slide started within 40 feet of the college west dormitory, and photo shows how close the college buildings were to destruction.

ELFORD, O.—(Id.)—When Elvira high school seniors staged "The Haunted House," their coach, Miss Nina Baker, advanced the mystery element by keeping the cast in ignorance of the solution until the final line of the play.

BEAN PRODUCERS ADVISED TO CUT

Production Throughout Nation Should Drop If Prices Is To Stay Up

MOSCOW (Special)—Bean producers over the country as a whole will need to cut acreage about 35 per cent under the 1935 acreage order to assure reasonably good prices, it is indicated in the 1936 outlook report. The 1935 acreage was 16 per cent above the five-year average.

As a result of this large crop, the surplus to be carried over into competition with the 1936 crop may exceed 20 per cent of a normal year's supply.

Most of the increase in the 1935 crop occurred in Michigan, Colorado and New Mexico, say University of Idaho agricultural economists in analyzing the outlook. The Idaho crop of 1,344,000 bags was "almost identical" with last year's crop, and nearly 14 per cent below the average of recent years.

In 1621—

This picture shows how the Jamestown Colonists exchanged tobacco for brides. They paid "120 pounds of the best leaf" for transportation of each future wife to come in the New World from England.

In 1936—

And here is a picture of the modern auction warehouses of today where the same type of leaf tobacco is sold on the open market to the highest bidder.

There is no substitute for mild, ripe tobacco to make a good cigarette—and there never will be... and that is the kind we buy for Chesterfield Cigarettes.

In the tobacco buying season Liggett & Myers Tobacco Co. buyers will be found at 75 markets where the Bright type of tobacco is sold, and 46 markets where Burley and other types of tobacco are sold.

All these tobacco men are trained in the tobacco business, and are schooled in the Liggett & Myers tradition that only mild, ripe tobacco is good enough for Chesterfield Cigarettes.
