

TRADE REATHES BENEFIT APPLES

Fruit Men Receive Help From
Roosevelt Pact, Idaho's
Sole Importer

By RALPH W. OLINSTEAD
WASHINGTON, (Special).—The Idaho delegation urged Secretary Hull to bargain for concessions on apples in his proposed trade negotiations. In a letter addressed to Senator Dore on May 21 Secretary Hull states that in every case of the fruit trade agreements heretofore negotiated, some specific benefit has been obtained for American apple exporters.

The trade agreement with France permits additional French imports of American apples of up to 405,000 bushels.

Every effort to encourage the prospective fruit trade agreement with Great Britain, Secretary Hull says.

"You may be sure the every effort will be made to obtain effective concessions for such of our agricultural export products as might be sold in that country in larger quantities if the restrictions were reduced."

Tariff and trade concessions on apples which are considered of direct benefit to Idaho have been obtained from Japan, Belgium, Holland, Sweden, Canada, the Netherlands, Switzerland, Colombia, Honduras, Nicaragua, Guatemala, France and Finland.

To prevent serious erosion damage to recently burned-over land along the Clearwater river and to the Clearwater National Forest, the CCC and the forest service are sponsoring a "receding" or "retreating" project. The project is to be carried out in the Clearwater National Forest, which has been favorably reported on by the secretary of the land.

Some concern is being expressed by the department of interior, the department of conservation, which recently slipped through the senate. The chances are about 2 to 1 that the bill will be defeated in the house.

DINNERS FORCED ON ZOO'S PYTHON

Eight Strong Men Necessary
To Make "Blondie" Dine
Once a Month

ST. LOUIS (AP).—Although "Blondie," 10-foot python, has spent nine years in the St. Louis Zoo, she continues indignantly to refuse food, and consequently has to be removed from her glass-enclosed "jungle scene" home once each month and forcibly fed.

Removal is accomplished by eight men well versed in python body aims and trick holds. Kreger, M. J. Lantz, cautiously enters the cage, and flips a towel around the snake's head. He seizes the python behind the jaws and drags it through the cage door. Attendants seize sections of the powerful body and trail after Lantz.

Planned to Floor
Within 30 seconds "Blondie" is pinned to the floor—seven attendants on board.

After feeding, the python's teeth are examined and occasionally a little dental work is required. Armed with forceps, cotton and antiseptic, the dentist explores the reptile's upper and lower jaws for loose teeth which python may try to shed.

The work completed, "Blondie" is carried back to the stage.

James K. Allen Is
Named College Dean
GOODING, June 1 (Special).—James K. Allen, who holds a master of arts degree from the University of Idaho, and for the past two years a member of the Rupert high school faculty, has recently been chosen dean of Gooding college.

Mr. Allen's new duties at the college will consist largely of field work during the current summer months and instruction in education, philosophy and freshmen English during the school year of 1936 and 1937.

The south's southernmost city is Pando Armas, at the extreme end of Patagonia, on the Miraflores of Magellan. During the winter months it has only two hours of daylight.

CONTRACT BRIDGE

By William E. McKenney

FORCED TO BID SLAM

By Wm. E. MCKENNEY
Secretary, American Bridge League

It's tough luck for a bridge player when his intended sacrifice at a contract is known by his opponents, and they are pushed into a slam contract, which he is forced to fulfill. In such a case the player has not looked far enough ahead in the bidding, where he may find further sacrifices too expensive. But hope springs eternal that defeat is likely to follow a slam contract unflinchingly undertaken.

In today's hand, South and his partner were willing to sacrifice themselves to a non-vulnerable game, but East and West hoped to prevail that by securing a small sacrifice. The result was a slam bid, made by means of a clever end play.

A six heart contract could have been defeated four tricks, and East felt that there was a good chance to beat the slam.

West's opening lead of the five of hearts was ruffed by declarer. The right of clubs was led from the closed hand and won with the jack in dummy. A heart was returned and ruffed.

Again a trump was won in dummy and the last heart was ruffed in declarer's hand. Next the ace and king of diamonds were cashed and South's last diamond was ruffed in dummy.

Declarer now had the stage set for the final play. Hearts and diamonds were eliminated from both dummy and declarer's hand, and now a small spade was led from dummy and the queen finessed.

The next play was the one that caused the contract to go wrong.

South is playing the contract at six hearts. What card should he play from dummy on the opening lead? Next the ace and king of diamonds were cashed and South's last diamond was ruffed in dummy.

Declarer now had the stage set for the final play. Hearts and diamonds were eliminated from both dummy and declarer's hand, and now a small spade was led from dummy and the queen finessed.

The next play was the one that caused the contract to go wrong.

South is playing the contract at six hearts. What card should he play from dummy on the opening lead? Next the ace and king of diamonds were cashed and South's last diamond was ruffed in dummy.

Idaho Interest in New Farm Program Is High

By DEAN E. J. IDINGS
Director, University of Idaho
Agricultural Extension Service
The educational program to give to the thousands of new farmers of Idaho an opportunity to know about the new national agricultural conservation plan is well along. For many of the county and community educational meetings have been completed. The amount of interest the farmers are showing in the new program indicates that a large number may decide to carry it into effect in Idaho.

The apparent reason for this interest is because the new program is in line with the type of farming followed in more parts of the state than did the A. A. A. The new program was definitely built around specific agricultural commodities which were important in the world export market. The new program does not consider the commodity so much as it considers the conservation of the soil, the basis not only of all agriculture but of all civilization as well.

Principles Simple
The principles of the new program are simple. The soil is the basis capital from which the welfare of the nation is drawn. It is assumed that the farmer as the steward of that basic capital has not been able to supply under the critical economic conditions of the present day. The new program is designed to keep in a high state of fertility that soil, the basis capital from which the welfare of the nation is drawn.

Accordingly crops are classified into two broad general types—those which deplete the soil and those which improve the soil. Examples of crops which deplete the soil are wheat, corn, cotton, and soybeans. Examples of crops which improve the soil are alfalfa, clover, and legumes. The new program is designed to keep in a high state of fertility that soil, the basis capital from which the welfare of the nation is drawn.

Stated without technicalities, that is the essence of the program to encourage crops which help the soil. Naturally, however, there are certain technical points that have to be decided, both in the classification of crops under conditions as they vary from state to state and in the actual administration of the program.

Idaho farmers are finding the new program somewhat simpler to figure than the old program. Instead of having to memorize a considerable number of terms and theories of soil science, they are asked to work it out on a work sheet, as it is called, with pencil and paper, acting down to the appropriate space the number of acres of this or that crop which they are producing. The county agents are cooperating with the individual farmers and with the community and county committees in this work.

Illustration
A simple illustration indicating the application of this new agricultural conservation program to a general plan. Let us assume an 80-acre irrigated farm the soil depicting crop, such as wheat, potatoes, corn and beans, total 30 acres. The remaining 50 acres made up of roads, house, alfalfa, and the farmland itself, are classed as neutral.

In order to receive the maximum soil conservation, or Class I payment, the farmer must divert an acreage equal to 15 per cent of his soil depicting base into soil conserving crops in 1936. The soil depicting base in this illustration is 40 acres, and 15 per cent of this would be six acres. Let us assume that this farmer will have only 34 acres of soil depicting crops, or a diversion of six acres which puts him in line for his maximum conserving payment. The rate per acre for this payment averages \$10 for the nation as a whole. Each farmer will have a rate, depending upon the productivity of that particular farm. Establishment of the rate for a farm will be done by the committee elected by farmers participating in the program. Assuming that the yield is average and that the rate is \$10, this farmer would be in line for a grant of \$60 for diverting six acres into soil conserving crops out of his total depicting base.

Class II Payments
He would also be in line for what is known as the soil building, or Class II, payment. He earned this second payment by planting soil conserving crops in 1936. The rate per acre for this type of payment is established by the administrator of the program, and the total payment may not exceed \$1 an acre times the acres of soil conserving crops in 1936. In this example, assuming the rate of payment for seedling alfalfa is \$2.75, this farmer would receive a total of \$165 for his six acres of soil conserving crops.

Behind the Scenes in The Brown Derby—the Famous Rendezvous of the Hollywood Celebrities
The chef is putting the final touches to a Lobster Thermidor, while the waiter is preparing the glass of champagne for the Hollywood party to dine and to enjoy Camels. In the glamorous life of Hollywood, Camels play a major role. The supreme mildness and flavor of their choice tobacco have made Camels an outstanding favorite. As Mr. Robert H. Cobb, the man behind The Brown Derby's success and host at one time of another to every great personality in Hollywood, remarks: "Camels are the choice of a great majority of our patrons."

STOP PRESS! These minutes as the reporter works to beat the deadline: "It's a life of irregular hours and meals," says Peter Deluca, newspaper editor. "It's the way Camels make food taste better and set better with me."

SPRINT CHAMPION of the U.S., Willie Hinesman (right), has spun around the boards against the last lap against the "I jellish my food," he says. "Camels! They help my digestion to proceed smoothly."

Camels are made from finer, MORE EXPENSIVE TOBACCOS... Turkish and Domestic... than any other popular brand.

FAMOUS LONDON HOTEL TO FALL

Historic Landmark Will Pass
As Modern Building Goes
Up on Site

LONDON (AP).—Architects of London's beloved old landmarks (familiar to thousands of Americans) the Hotel Metropole on Northumberland avenue off Trafalgar Square, is to be razed to make way for a modern office building.

The Metropole where King Edward VII gave lavish dinners when he was Prince of Wales and which was taken over by the government during the World War as headquarters for the ministry of munitions, will vanish during the summer.

It was reported that the syndicate which intends to build the modern block of office buildings on the site overlooking the Thames paid approximately \$1,500,000 for the property.

"White Elephant"
Sir Francis Twiss, managing director of the Metropole, said that the place had become a "white elephant" because the district for the fashionable hotels has moved toward London's West End, almost Hyde Park.

The Metropole is one of London's oldest hotels. It came before the Cecil and the Savoy and when it was built in the 1850's it was regarded as one of the most up-to-date in Europe.

After the war the government gave the owners of the Metropole a grant of \$215,000 for each year's business suffered during the time it housed the ministry of munitions.

One of London's first cabaret shows, "The Midnight Folies," was staged at the Metropole when it reopened after the war.

Lost Ring Found
WELLINGTON, N.Z. (AP).—A ring lost in a chicken coop 17 years ago was recently found. The ring was lost by Mrs. Ray Ash in 1924 she moved from the farm. Recently it was found by the present occupants of the farm who recognized the initials of Mrs. Ash.

The head of Halley's comet is much larger than the earth. On May 5, 1910, the length of the comet's tail was reported to be 37,000,000 miles.

CAMPAIGN OPENS

W. P. Whitaker to Speak Here
Tuesday at 8 P. M.

It was announced today in connection with the scheduled address here Tuesday night of W. P. Whitaker, Vice-President of the Democratic Party, that there will be a number of other well-known Democrats on hand to take part in the meeting.

Mr. Whitaker will speak at Legion Memorial hall at 8 p. m. according to R. A. K. Satterthwaite, one of the speakers.

One of London's first cabaret shows, "The Midnight Folies," was staged at the Metropole when it reopened after the war.

For Digestion's Sake...
SMOKE CAMELS

Smoking Camels stimulates the flow of digestive fluids... increases alkalinity

Life sometimes pushes us so hard that we feel too worn-down really to enjoy eating. Hurry and mental strain reduce the flow of digestive fluids.

Smoking Camels increases the flow of digestive fluids... alkaline digestive fluids... so vital to the enjoyment of food and to good digestion.

Enjoy Camels... for their cheering "lift"... for their aid to digestion. Camels set you right!

UNDER THE BIG TOP, Watching Miss Dorothy Herbert of Ringling Bros.-Barnum & Bailey, you marvel at her poise and daring. Miss Herbert says: "I smoke all I want—get anything I care for. Camels make food taste better and digest easier."

STOP PRESS! These minutes as the reporter works to beat the deadline: "It's a life of irregular hours and meals," says Peter Deluca, newspaper editor. "It's the way Camels make food taste better and set better with me."

"BLACK LEGION" DEFIES NATION
The news from Michigan about the "Black Legion" reads like a very bad dream; and the most dream-like thing about it is the fact that morose hoodlums who dedicate their organization to violence and murder insist that they are furthering "100 per cent Americanism."

Reports that the group has 135,000 members in Michigan, and has been responsible for two or three dozen deaths seem too fantastic to be taken seriously. Indeed, the whole business is too fantastic to be worth talking about if it were not for this one fact—

The times are so unsettled, and the future is so cloudy that no American who loves his country can afford to remain silent when a group, which seeks to enforce its will by blackjack and revolver appears on the horizon.

These precious stragglers from Detroit apparently had no guiding principles other than a general devotion to the policy of interfering in their neighbors' lives—a sort of glorified officiousness which is nothing but the spirit of the small town busybody turned canorous.

That they have been able to enlist a large number of people in their organization merely indicates that there are more fools in the land than we ordinarily suppose.

But in any group of this kind there are seeds of great trouble. The seeds may never sprout, but they are there; and the time to make sure that they land on stony ground is now, before some unexpected current in American life provides more fertile soil for them.

There was a time when Mussolini's Fascists looked no more important or influential than this so-called "Black Legion" now appears. There was a time when Hitler and his pugnacious lot no more of a figure in German life than these gentlemen of the black robes now cut in American life.

In Italy and in Germany, certain powerful interests discovered that they could use an unprincipled band of terrorists who would stop at nothing. They made the discovery before the rest of the foreign citizens could rally the nation's inherent decency, and what happened thereafter is a matter of bloody record.

There does not seem to be any danger that this Michigan gang will have a similar apothecosis. But the time to speak out against organized mob violence is now, when it first sticks up its head; now, when all decent people instinctively feel a revulsion against it.

We need to remember that no group which uses the whip and gun can possibly be "100 per cent American"; that no organization such as this one in Michigan can possibly play a useful role in our United States; that no outfit can tolerate in this country a gang of thugs and torturers.

As long as we remember those simple truths, there will be no danger that these night riders will progress beyond the point where the cops, the courts, and the psychiatrists can handle them.

PILLAR OF SOCIETY
It is significant that the juvenile court judges of the county are seriously considering the organization of a national association of members of their profession, in an effort to improve the work of this particular judicial branch.

The juvenile court was created to meet a special need in our social structure. Unfortunately, however, Judge Harry L. Eastman of Clarkston, has continued to concern itself only with its immediate needs and problems, and has neglected to develop a clear-headed philosophy of its place in the social welfare pattern.

It has been said repeatedly by social workers and criminologists, judges and attorneys that the work of the juvenile court is of first importance in crime prevention. Any move to improve this vital unit of government is heartily welcome.

CIVILIAN "INSURANCE"
One million Boy Scouts are lending the nation in a drive to build up in the Federal Bureau of Investigation at Washington, the largest and most valuable civilian fingerprint collection in the world.

Division of the Scouts to add their prints to the already voluminous file is a step toward the day when the distinguishing marks of all able-bodied citizens would be regarded voluntarily for protection against kidnapping, loss of memory, or mistaken identity.

Department of Justice officials already report that the civilian file now started has proved of infinite value in countless cases. It is certainly desirable that the public contribute to building up this civilian file. In a sense, it is a kind of insurance.

"Dionne quintuplets are learning to speak French." It must be hard for them to understand why the little pig cried "Yes, yes, yes, all the way home."

One of the drawbacks to belonging to that Black Legion seems to be that if you wanted out you would have a knot

GROVER DAVIS WARNED YOU ABOUT ROLLY WATERS!
Looking back at the results of my fishing expedition over Memorial day, I give you this old fish story.
Treat—myself fish asseredly existing in Idaho streams.
Yours truly,
—Professor Phil

ANOTHER OF THE SAME
I am a honest man so I will admit that the size of the biggest trout which I managed to catch and be measured with a ruler which was only 10 inches long.
—do not get that warden after me neither because I took the doggone thing back in the water.
—Piccolo Petty

ADVICE ON CIRCUS DAY
To all and sundry who expect to attend the circus tonight, come rain, shine, snow or whatnot.
1. Bring peanuts for the elephants.
2. Bring peanuts for yourself.
3. Bring cash for your ticket.
4. Bring a pillow to sit on.
5. Bring your sense of humor.
6. Bring a large supply of "ohs" and "ahs" for the lion and tiger acts, the acrobats, etc. If you don't "oh" and "ah" at these, you're not considered up to snuff among circus appreciators.
7. Bring your Sunday suit and most refined appearance to eliminate any chance of being mistaken for one of the clown.

BECAUSE WE'RE SLIGHTLY
bailed up from energetic exertion and exercise acquired over Memorial day, we didn't get around to picking the winner in the Pot Shots contest. As for our lack of enthusiasm, it was a foregone conclusion that we would be our own worst enemies and select the winner.

WE FOUND SEVERAL MORE
what this country needs more than anything else in the world is a good citizen. So we've decided to give you one more week on the same theme, with a twist. The winner will be the person who will send the half-dollar away from our Pot Shots treasure.

BUT NOT A WORKING DAY!
I have yet to find anyone who won't agree that this country needs a 36-hour work week. Every day of the week, to say nothing of the month and year.
—Always Sleepy

VERY ENERGETIC BUSINESS
THESE VACATIONS!
Well, I'm back from my two-day holiday and I expect to receive the next mail. After that, I'll be back for another month of vacation, and I'll be receiving from that for another month of vacation. Then there'll be labor day, with more recuperation, etc. etc.

AND MOISTURE ON CIRCUS DAY
I have yet to find anyone who won't agree that this country needs a 36-hour work week. Every day of the week, to say nothing of the month and year.

LINDA
I have yet to find anyone who won't agree that this country needs a 36-hour work week. Every day of the week, to say nothing of the month and year.

PAUL MALLON'S NEWS BEHIND THE NEWS
An Exclusive Evening Times Daily Report on the Fast-Moving Events in the Nation's Capital By an Expert Interpreter and Commentator (Copyright, 1935, by Paul Mallon)

ABOUT THE SAME
WASHINGTON.—No news is usually the best news for business, and there is no news in the business circles this month. The current of self-generating demand for heavy goods like steel, autos, cement and plate glass is continuing. It was stimulated considerably in April and during the first half of May because the floods caused orders to pile up. This is what forced industrial production up to 160 per cent in April and is keeping it at about 90 for May. If you level this year and consider the figures for the first five months of this year as a whole, you will see these broad general facts:

Factory employment has not improved since the first of the year, but payrolls have. Production has been very near normal (average 1925-29) since the first of the year. Employment and payrolls are 83 per cent normal and payrolls are 100 per cent. Sales are good, farm and food prices somewhat cheaper, industrial prices firm. The railroads are doing about 70 per cent of normal business. Building is coming back, but not fast, and there is nothing like a boom in the steel industry. In fact, building now is only about 40 per cent of normal.

REINFORCEMENT
This is one summer Jack Canis, the vice president, will not spend his money on the method of improvement toward the road and real method of political campaigning. The house refused to take any more of the present campaign. Mr. Roosevelt will be a more effective orator than some they now have.

ECONOMY
A perennial pet economy is the elimination of useless army in the administration, but nothing is done. It is recommended in the Hoover administration, but nothing is done. It is recommended in the Hoover administration, but nothing is done. It is recommended in the Hoover administration, but nothing is done.

CHAIR
These deductions stick out on the monthly business chart of statistics collected by the government, which follows: Each figure is based on 1925-29 averages as 100. Except in cases where noted. The figures are adjusted for seasonal variations.

WARFARE LOOMS IN COAL SECTOR

Bootleg Miners Union Voices
Threat If U. M. W. A. Takes
Companies' Side

By JOHN F. FRANKISH

POTTSVILLE, Pa., (AP)—The possibility of open warfare involving the anthracite region—the Independent Miners association—and the United Mine Workers of America looms over the peace of Pennsylvania's lower hard coal fields.

Earl Humphrey, president of the association of 30,000 men who earn a livelihood by taking anthracite out of makeshift shafts sunk in the property of major coal operators, has delivered an ultimatum to the U. M. W. A. following reports that the union may aid coal companies in stamping out "bootlegging."

Humphrey said his men would picket every colliery in the region if union miners made a "deal" with operators to help fight the bootlegging industry. Previously the U. M. W. A. never had supported the independents, but its attitude had been passively friendly.

Strife isn't new. Humphrey and bloodshed are not new to the hard coal region. In the recent slandering of the United Anthracite Miners of Pennsylvania, there were frequent outbreaks between members of that union and the United Mine Workers. Strikes have been bitter.

Three persons were killed last month in the mysterious "Good Friday" shootings at Wilkes-Barre. One of the victims was Thomas J. Maloney, former president of the disbanded United Anthracite Miners.

The present crisis is a question of economics rather than of politics. The U. M. W. A. cooperates with the operators to stop the alleged theft of approximately \$30,000,000 worth of anthracite annually, more jobs would be opened up in the mines.

Must Find Work
If bootlegging is eliminated, work must be found for the thousands of men—and women, children and children—who would be deprived of their only means of livelihood.

Gov. George H. Earle has indicated that the commonwealth is making an effort to work out a plan to give lawful employment to the independent workers, but details have not been disclosed pending a decision on its constitutionality by Attorney General Charles J. McGortell.

Floods Retard Miners
Disastrous March floods which swept this section forced many of the bootleggers to abandon workings, but they are expected to sink new holes in preparation for further activity during the slack summer season.

Coal bootlegging, which is confined almost entirely to three counties—Schuylkill, Northumberland and Columbia—began early in the depression. Industry curtailed production and men were laid off at the collieries. Many miners had to means of heating their homes and the large companies permitted them to mine and carry home enough coal for personal needs. Gradually the men began to take hold of the extra loads for relatives and friends.

Then they began to trade anthracite for food and clothing. Thus an industry was born which today produces approximately 4,000,000 tons of coal annually.

At first the major companies paid little attention to the activities of the bootleggers, but soon trucks began to carry the illegal product to Philadelphia, New York, Baltimore, Washington and other eastern cities to compete on the market with legitimately mined coal.

SILK BANDEAUS
NEW STYLE NOTE

Paris Couturier Offers Novel
Idea for Evening; Rain
Cape Transparent

By MARY FENTRESS
PARIS (AP)—Schiaparelli, always full of surprises, has a new bag of tricks in her mid-summer collection. For evening she pushes the hair right back from the forehead with a silk bandeau which she calls a "Liane."

Cloves are in vogue; sheer striped muslin, organza, tulle or flower prints in soft shades and they are often fastened with a large clasp at the shoulder which can be pulled up to form a cape. Evening gowns have planked laces and hangman's hoods and there is an all-night evening cape, full and hooded, of a pale pink shade. The evening maidenhair is transparent and is draped over a printed evening dress.

The daytime silhouette retains the high, slender waistline and concentrated, interlaced, under the chin and at the shoulders. Dresses fasten with amusing buttons shaped like tiny lanterns, gingerbread pies and slitt tassels. Some dresses have printed handkerchiefs which are tied into low knots as accessories while others are closed with the usual Schiaparelli zipper.

Materials are particularly amusing. One print is scattered with fat little elephants and coconut trees and is shown in white and black on pale pink and pale blue. Another crepe in printed with a little thermometer where red mercury runs from "indifference" at the bottom of the scale to "passion" at the top. Still a third shows radio stations across waves, and airplane flying across the material.

George Rogers Clark Will Be Paid Country's Tribute After 157 Years

VINCENNES, Ind.—Graciously today where there was only a rough log fort 157 years ago.

The Wabash, which in that spring of 1778 spread an icy blanket of flood about the region, is spanned today by a broad and monumental bridge.

On June 1, or soon thereafter, the President of the union of 130,000,000 people will stand and dedicate a memorial on ground where George Rogers Clark and his rugged, freezing band of frontiersmen won an empire for their compatriots.

The graceful circle of marble which is the center of the Rogers memorial park stands exactly where Fort Sackville once assured British domination of the western country.

Audacious Feat
It was the determined and audacious feat of young Clark, then only 25 years old, in taking Fort Sackville and Vincennes, Kokoske and Cahokia from the British that changed the history of the American people by opening the west to their expansion.

For 10 years local committees worked to raise a suitable memorial to Clark and his men. But not until congress appropriated \$1,750,000, Indiana \$650,000, and Vincennes and Knox county \$250,000, was the present dream made true.

In a lovely park reclaimed from riverbed slums and factory refuse, the memorial was designed. The Lincoln Trail bridge, built in 1933, and the ancient cathedral church and French cemetery adjoining, are all united in the design for the memorial park.

Center of the memorial park is the classic marble memorial itself, uniting the tribute of sculpture, architecture, and painting. It is a cylindrical 85 feet in diameter and 71 feet high, designed by Frederic H. Brown. Around the entablature is carved "The Conquest of the West, George Rogers Clark and the Frontiersmen of the American Revolution." An ornamental cornice with a star represents each of the 48 states.

A single entrance, guarded by heavy bronze doors, gives entrance to a marble and limestone interior.

In the center of the room stands a heroic bronze statue of Clark as a young man, by Herman MacNeil. Covering the lower walls is a series of powerful murals by Ezra Winter, telling the story of Clark.

Rosevelt to Officiate
President Roosevelt plans to dedicate the memorial on June 1, but the date may be set ahead if the progress of Washington business is slow.

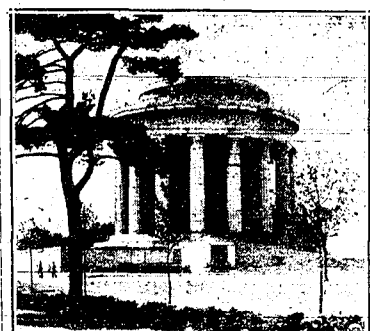

Since it was then that the bluegrass lawns of Vincennes felt secure from attack and sent most of his troops back to Detroit. But Clark was determined to march down the Wabash in the dead of winter, with only about 170 men.

The Wabash was at flood, its icy water spreading over miles of territory about the fort. Wearied to death, hungry, ill-fed, and ill-equipped, Clark's men fought for three days, shouldering dead in the icy water.

Orders Attack
Clark ordered his six-foot-two sergeant to hoist the 14-year-old drummer boy to his shoulders and lead the advance.

Clark's night attack on Fort Sackville, Clark deceived Hamilton force from such men as were put already in the Continental army and forced the fort's surrender.

He raised and drilled a little of the United States will add his band of 150 men, and marched against Kaskaskia, Prairie du Rocher, and Cahokia. He won

To George Rogers Clark, the marble memorial shown above is soon to be dedicated at Vincennes, Ind. Situated in a beautifully landscaped park on the site of old Fort Sackville, the memorial is to be dedicated by President Roosevelt.

DIRECTOR WARNS OLYMPIC SQUAD

By GEORGE KIRKBY

PHILADELPHIA, June 1 (AP)—Directors of the Olympic games in London unless they check their present enthusiasm before it develops into a serious case of over-enthusiasm.

London, England, has each of the United States track and field team predicted today.

Our athletes already are working themselves into the same frame of mind as the 1928 team. We must not let our enthusiasm get so far ahead of our brains that we will only our boys looking forward to the Olympic as a push over. When the post race was over, we had won only one individual running event.

We're facing a real battle at Berlin and it will take a sound of athletes in their best mental and physical shape to win the inaugural title.

over the French occupants, and secured the neutrality of the native Indians.

Final Triumph
But Hamilton, the British governor at Detroit, who had won the hatred of all the Indians by his practice of paying Indian bounties for scalps of murdered frontiersmen, knew that Clark was actually weak. He marched down from Detroit and retok Vincennes.

Since it was then that the bluegrass lawns of Vincennes felt secure from attack and sent most of his troops back to Detroit. But Clark was determined to march down the Wabash in the dead of winter, with only about 170 men.

The Wabash was at flood, its icy water spreading over miles of territory about the fort. Wearied to death, hungry, ill-fed, and ill-equipped, Clark's men fought for three days, shouldering dead in the icy water.

Our Best Wishes to the PARISIAN LAUNDRY

Twin Falls, you will be proud of this new business and a credit to your town.

We appreciate the opportunity to have lived in the heart of the community and for this building.

Palace Sand and Gravel

COMPANY

Phone 301

Welcome and Good Wishes PARISIAN LAUNDRY

We join with the rest of the citizens of Magic Valley Empire, in welcoming your modern plant to our midst, and wish you success.

We are gratified in being able to assist in making yours one of the most modern, equipped industries in Southern Idaho; by supplying the following equipment, each being the last word in refinement:

IRON FIREMAN

Pneumatic Spreader Automatic Coal Burner

This being an entirely new principle in automatic coal burning, combining the desirable features of Powdered Fuel Burners with Iron Fireman economy and dependability, we know your steam generation will be low in cost and more dependable in supply, than by any other method; we trust that every user of high pressure boilers will see this new development while visiting your plant.

FRIGIDAIRE WATER COOLER

will insure your employees and visitors, cool, refreshing water at all times, assuring more pleasant working conditions and contented employees.

FRIGIDAIRE FUR STORAGE

And now, Milady need have no fear of moths ruining her luxurious fur garments. With Frigidaire on guard, the moth can no longer continue its way.

Again we say, we are gratified to have assisted in making yours the modern plant it is; we compliment you and wish you well.

HOOD SEES WPA ROAD HELP HIGH

Director Outlines Benefits for Farmers and Cities in Program

BOISE (Special) City and country will be brought closer together through the basic construction work accomplished under the works progress administration farm-to-market road building program, J. L. Hood, state WPA director points out.

Emphasis on the farm-to-market road program is upon providing farmers with a sound roadbed surfaced with nearest available local materials. Included in the program is road and street construction work in villages and small towns serving as agricultural shipping points, Hood said.

"That it was necessary to devise work plans for those unemployed and on relief in the country and small town areas is evident from the fact that a study conducted indicates that many rural households and small town households receive some form of public relief."

To date 585 miles of road in Idaho have been under WPA construction. Of this total 122 miles were new construction while 453 miles received repairs and improvements such as grading, repaving and surfacing.

Work on bridges of all types and sizes have been completed. Some were across rivers, others small creeks and irrigation ditches.

Swinging more into the construction and will be completed soon.

Earnings of workers on secondary roads, feeder roads and bridges have totaled \$13,400 since beginning of the program. More than 2,000 man hours were devoted to the work. The sum of \$141,608 has been spent for materials, supplies and equipment on highway road and street projects.

The peak of employment in the program was reached Feb. 22, 1936, when 2,600 men were working.

State WPA continues after June 30, much of the work done will be on farm-to-market and mine-to-market roads.

Bridge will be played with Mrs. C. W. Crump as assistant hostess. Prizes will be E. Harris and Miss Denny Telford.

GLAZED SUN SUITS BEAT OLD SOL

Glazed paper sun-tan slips which permit the wearer to attain a smooth even tan without discomfort of sunburn is the latest beach find at Bel Monte, Calif. Leading exponents are Nikke LaMontagne and Dorcia White.

Your Baby's Health

By DR. MORRIS FISHBEN

Editor, Journal of the American Medical Association, and of Hygiene, the Health Magazine

The baby's mental development is especially significant, because the type of mind indicates the activities which the child may undertake. A child with a quick mind will be equipped in due time with the ability to think quickly.

Frequently such children will become their parents' burden, because they are likely to call this type of child nervous, while actually its reactions are a part of its character.

A child with a slow mind will be interested in activities that require concentration, but not speed. There are still other children who seem to care little about learning and whose minds are definitely superficial in character.

Parents should study the traits of their child and make the most of the kind of mind that it has.

By the age of five months, some babies will resent interference with their activities. This is an indication that training is necessary.

At the end of the sixth month, the baby will sit for a moment without support for its back, reach for things that it wants, and point on the furniture.

When the baby gets old enough and strong enough to be playful, it needs even more attention than it did previously. During the seventh, eighth, and ninth months, the baby is able to express its satisfaction in various ways, and becomes more interested in sounds, so that it enjoys bells and pounding.

At the eighth month, the mother will usually discover that the baby will suddenly discover that the baby will play peekaboo and can be taught to clap its hands.

This usually creates a great sensation in the home, but not nearly

so great as that which occurs during the ninth month, when the baby suddenly starts to crawl or to sit up alone, when it learns to "wave 'bye-bye'" and to tell its family by the tone of its voice that it is pleased or satisfied.

A 10-month-old baby will recognize its own name, and, by the age of one year, other names as well.

Shower Given For Buhi Bride-Elect

BUHI, June 1 (Special)—Complimentary to Miss Sophie Royce, a bride-elect of June, Miss Dorothy Cunningham and Mrs. Fred Ringert entertained at a magnificent shower Friday at the Ringert home. Little Belle Fred Ringert, nephew of the bride-to-be, and Jimmie Dale Bullock drew a large pink and white gift-laden bag upon into the room and presented it to Miss Kynpatria. Following the opening of the gifts, auction bridge was played, with high score prize being won by Mrs. Margaret Ringert and second high by Miss Verna Young. Good-luck.

Thief Takes Sink

WANCOUVER, B. C. (U.P.)—Canada's most brazen thief has been found here. Shortly after Paul Harre opened his hardware store, the thief entered and stole a kitchen sink. A few hours later he returned and offered to sell it back to Harre.

UTAH AGRICULTURE GAINS

SALT LAKE CITY (U.P.)—Substantial gains in recovery of Utah agriculture is reflected in the increased amount farmers are paying on their farm mortgages, Allen T. Sanford, Utah director, national emergency council, said here.

RUSSELL LANE

The Flying Fingers 4-H club met Tuesday at the E. C. Montgomery home to reorganize. The following officers were elected: President, Marjorie Bails; vice president, Irene Brenna, secretary, Margaret Montgomery; reporter, Mary Bodenhamer; song and yell leader, Dora Huetig; Mrs. Charles Sumner is leader. PARISIAN LAUNDRY OPENING FORMALLY WEEK FROM TODAY

Ready For Public Inspection On
Thursday of This Week

Twin Falls' new Parisian laundry and dry cleaning plant in the 700-block on Main avenue south, will be open for public inspection Thursday of this week between the hours of 3 and 6 p. m. and 8 and 10 p. m., and will open formally for business a week from today, it is announced by M. E. Tolliver, president of the company.

Construction and installation work are practically complete, the industrial establishment having been equipped with the most modern of new laundry machinery, Tolliver states.

The large brick building has been under construction since early spring and is said to embody all the desirable features of a laundry plant.

Meets to Manager

Named as superintendent of the institution is H. M. Metcalf, a former Twin Falls resident, who has been at Burley for the past several years. Leonard Bruce is to be route superintendent, and in charge of the dry cleaning plant will be C. L. Milam. Office head will be Miss Blanche Detwiler.

In addition to the laundry and dry cleaning departments, the concern is stocking its linen supply and fur storage facilities.

Occupying three lots, the building is 80x110 feet in dimension, is of brick and steel construction and, by the use of steel arches, provides a large space devoid of upright posts. Two additions increase the plant size to nearly 110 feet square.

Tolliver states that because the plant is entirely new and was built expressly for the purpose for which it is to serve, it is as complete and modern as any similar institution in the west.

Latest Equipment

Equipment includes six large washers of the latest type, a mangle iron weighing 12 tons (two large rollers, a modern shirt-ironing unit, four garment presses for wearing apparel, and a dry-cleaning plant which, it is promised, will introduce an entirely new method in that industry in Twin Falls.

There will not be a linenshaft or pulley in the plant, Tolliver says, explaining that each of 28 pieces of equipment will be operated by individual motors.

Automatic Devices

A large water-softening plant will serve the huge steam boiler which is equipped with an automatic stoker and water supplies.

Seven new trucks are ready for operation in serving the Parisian territory. The territory immediately adjacent to Twin Falls will be opened first, the management states, the balance of the territory in south central Idaho being in line for service also.

1½-inch insulation

The roof of the large building which has 1½-inch insulation, will be brilliantly lighted, and a separate balcony will provide rest room and dining room facilities for the employees.

Fur Storage

A fur storage department occupies the basement space under the office. The storage room is insulated and the walls have a thickness of six inches. Correct temperatures will be maintained by automatic cooling equipment.

All help employed will be local residents, Tolliver states, adding that to operate at capacity will require up to 60 to 65 persons. Construction of the building was under the direction of Carl Roberts, an employee of Tolliver's since 1912.

COLLEGE YOUTHS ASK OWN ISLAND

HONOLULU, U.S.—In an effort to solve for themselves the present economic condition in the United States, three Kalamazoo boys have applied to the Honolulu chamber of commerce for an uninhabited island in the Pacific. They are Denver J. Todd, Earl H. Piersen and Frank B. Tompkins, members, according to their letter, of the 1930 class of Kalamazoo college, Michigan, and charter members of the college chapter of the Shave the Wealth Society. Their letter reads:

"Feeling ourselves unable to cope with the present day industrial situation and being dissatisfied with the economic order in this country, we would like to locate on a small island where we could live unhampered by the present competitive system."

John Hamilton, secretary of the chamber of commerce, in his reply, pointed out that it would be difficult to get away from the American economic system in any island in the Hawaiian group, as they are all under American jurisdiction.

STAINLESS STEEL

STEEPLEHILL, Eng., U.S.—Stainless-steel-ship and stainless-steel-bridge have been brought within the range of practical possibility by a manufacturing process invented by P. F. Gordon, Sheffield steel expert. Gordon says the process will reduce stainless steel production costs by 50 per cent.

C. OF I. SUMMER SESSION JUNE 9

Seven Regular Instructors
And Two Visitors Will
Be On Staff

CALDWELL, June 1 (Special)—Summer school classes at the College of Idaho, for terms of six and eight weeks, will begin Tuesday, June 9, under the direction of S. S. Walsh.

Seven regular instructors of the College of Idaho and two visiting faculty members, Miss Judith Mahan of Boise and Dr. James R. Garner of the Northwest Nazarene college at Nampa, will be included in the summer school teaching force.

Miss Mahan, who's music director in the Boise public schools, will teach music classes in the summer school while Dr. Garner, who is dean of the junior college at Northwest Nazarene college and professor of social science, will teach history during the summer school session.

Mostly six weeks. With the exception of science courses, which are for a period of eight weeks, the summer school classes will conclude at the end of six weeks.

Instructors in the school, in addition to the visiting faculty members, will be Mrs. Anna E. Eick, English; Dr. H. H. Hayman, economics, sociology; W. J. Mahan, mathematics, physics; Miss Margaret F. Nichol, home economics; J. H. Robby, chemistry; Harold Tucker, biology, zoology; and the director, Mr. Walsh, who will teach the education classes.

When certain rivers in South Africa dry up in summer, a curious kind of fish called mudfish, makes itself a nest in the mud and waits for the river to fill with water again.

Formal Opening

Thursday June 4—3-6 and 8-10 P.M.

NEW MODERN PARISIAN PLANT

Pictured above is the newly completed home of the Parisian Laundry and Dry Cleaners. Designed from the start and built by expert laundrymen this splendid \$100,000 structure replete with the latest in modern machinery and equipment to economically and satisfactorily serve the needs of this community. When operating at full capacity this institution will furnish steady employment for 60 or 65 people.

SUPERINTENDENT AND MGR. ROUTE SUPERINTENDENT DRY CLEANING DEPT. OFFICE
H. M. Metcalf Leonard Bruce C. L. Milam Blanche Detwiler

YOU ARE INVITED

We take pleasure in issuing a cordial invitation to you and your friends to visit our plant on Thursday, June 4th, 1936 from 3 until 6 in the afternoon or from 8 until 10 in the evening. We want you to see for yourself this, the most modern and up to date Laundry and Dry Cleaning Plant in the state of Idaho. Come — be our guests.

MUSIC

FLOWERS FOR THE LADIES

REFRESHMENTS

Open For Business Mon. June 8

On Monday, June 8th our plant will be open for business to serve the immediate Twin Falls territory with a complete family service for both Laundry and Dry Cleaning and a complete commercial Linen supply. Balance of the territory will be open as soon as possible. Just Phone 850 and a routeman will call.

LAUNDRY

Here are two things we want you to know about when your family washing is sent to us. All family washing is washed separately and is NOT marked with unightly pen and ink marks. It comes back to you as fresh and clean as when new. Every gallon of water that is used in our plant is filtered and softened with minerals. It is just as soft and pure as rainwater. Your clothes will last longer and look better when they are washed with soft water.

Phone

FUR STORAGE

We believe that our plant boasts the only modern Fur Storage in this part of the state. Our Fur Storage is not just a room to hang furs in, but is a scientifically designed Fur room that was built by expert fur men and will be taken care of by people who know how to properly care for valuable furs. Just Phone 850 and our driver will call.

DRY CLEANING

We are proud indeed that we have been able to secure the exclusive use of the famous "Sanitone" method of cleaning for Twin Falls. This latest type cleaning system is licensed to only first class plants, and is nationally advertised in all the leading women's magazines and we know that you will be delighted with the results when your clothes are cleaned by this entirely new, superior system. Phone 850 and our routeman will call.

THIS CURIOUS WORLD

By William Ferguson

Although Jupiter is the planet of the sun's family of planets, it never is seen as brilliantly as Venus, because it is much farther from us. It has a diameter 11 times that of the earth, yet it can be seen in daylight only under extremely favorable conditions, and then only by persons with exceptional eyesight. Venus, however, can be seen clearly in daylight, at times.

GIRL PLANS 2ND LAKE SWIM TRY

Sudden Squall-Halts Effort
In Salt Lake, Escort
Boat Upsets

SALT LAKE CITY, Utah, June 1.—Miss Cunningham, 25-year-old former San Francisco endurance swimmer, plans today for her second effort to swim the 11 miles between Antelope Island and Black Rock in Great Salt Lake despite near disaster during her first attempt at the distance.

As the storm increased in intensity, the girl's strength ebbed. With seven and eight foot waves rolling across the lake, she was hauled from the water near exhaustion.

A sudden gust of wind and lashing waves upset one of her three escort boats, hurled four persons, one a young nurse who swam part of the distance with Miss Cunningham, into the salt-heavy lake water.

Immediate rescue because of the storm, the other two craft hurried for shore and the Salt Lake county sheriff's office "one-hour navy" hastened to the rescue.

Four in Water
The four shipwreck victims were Adrian Smith, 23, and Lynn Madison, 21, University of Utah students; Miss Helen Woodhead, 21, graduate nurse at a Salt Lake City hospital; and Marlow Brannigan, 27, Salt Lake Tribune sports writer.

After four hours' submersion in the lake, lashed by a heavy gale and drenching rain, the four were rescued, near exhaustion, bruised and battered, by the patrol boat "Sheriff No. 1," piloted by Deputy Sheriff George Knapp.

All were near complete recovery today.

Miss Cunningham said she would begin training immediately and make her new record attempt as soon as conditions permit.

FOREIGN MARKET CENTERS CLOSED

By United Press
All primary European, South American and Egyptian markets remained closed today for the Whit Monday holiday.

The London gold and silver markets, the only major markets open Saturday, also shut down for the day.

The markets generally will re-open tomorrow, with the exception of those in Egypt which will be closed for another holiday.

THEATERS

ON STAGE SHOW PROGRAM

The Olympia is presenting tomorrow a fast-paced program of out-of-the-ordinary entertainment, the stage is what is considered everywhere as the year's most sensational stage attraction, "The Olympia Revue." It has eight headline acts, a company composed of stars, girls, music and comedy. On the Olympia screen will be the thrilling drama of the automobile industry's death-defying test pilots, "Speed." Featured in the cast are Vma Maciel, Anne Stewart, Wendy Barrie, Ted Lewis and Ralph Morgan. Regular prices will prevail for this program.

AT IDAHO

Showing today at the Idaho Theatre is "The Moon's Our Home," with Henry Fonda and Charles Butterworth. The program includes a Chic Sale comedy, cartoon and news. Coming Wednesday the Idaho presents as its regular mid-week return hit Wallace Beery in "West Point of the Air," with Robert Young, Matthew O'Sullivan, Lewis Stone, and Robert Taylor.

Sea Level Farms

DAVIS, Cal. (AP)—Sea level isn't a handicap to agriculture, according to Dean Hutchinson of the college of agriculture, California State University, Long Beach, who has been below sea level to a mile above, he says.

G-MAN STORY

When gangsters slay his brother, a G-man, Richard Dix, gives up his unethical practice as a criminal's "mouthpiece," and, taking up the dangerous vocation of his brother, sets out to track down the guilty mob. Such is the story which is unraveled in RKO Radio's gripping screen feature, "Special Investigation," starring Dix and featuring lovely Margaret Calhoun, showing at Uncle Joe's today and Tuesday.

12 LOCAL GRADS AT U. OF IDAHO

Seven from Nearby Cities on
List for Diplomats at
Moscow

MOSCOW, June 1 (Special).—Twelve students from Twin Falls and seven from nearby towns will be the caps and gowns as part of the largest class ever to graduate from the University of Idaho at its 141st annual commencement, June 6, 7 and 8. This year's parade of graduates will number 374, the university registrar reports. The record-breaking number 302 will receive their bachelor's degrees and 57 their master's degrees.

Commencement activities begin with Alumni day, Saturday, June 6, featured by a historical banquet to commemorate the fourth anniversary of commencements at the University of Idaho. Dr. James A. MacLean, third president of the university, and three living members of the university's first graduating class have been invited as guests.

Bishop Will Speak
Baccalaureate services Sunday will begin commencement proper. Bishop Titus Lowe of Portland, Ore., will preside at the baccalaureate session.

To Dr. Alexander MacLean, former president of Amherst college, and now director of the Center for Social Service at San Francisco, goes the honor of commencement speaker to the largest graduating class in the history of the school.

The 12 Twin Falls students who are included in the University of Idaho's 141st graduating class and the degrees that will be conferred upon them follow: Alfred Charles Dunn and Winston Irving Jones, bachelors of arts; Esther Mae Wollman, bachelor of science in home economics; Edmond L. Turner, Jr., bachelor of science in agriculture; Earl Letty Smith, bachelor of science in civil engineering; Donald Ernest Hanch, bachelor of science in electrical engineering; Paul Everett Jones, bachelor of science in education; Mary Ellen Brown, Marion Edna Graham and Jackie Burton Gray, bachelors of science in business; and Donald Merle Murphy and Horace Jennings Shipman, masters of science in agriculture.

Campus Activities
Among Albia Brown's campus activities were: class secretary for her freshman year, associated students' secretary for her sophomore year, and vice-president of Spang women's service organization, her second year. Haasch was general chairman of the engineers' show the first of May.

Hansen students who will graduate are: Frederick Russell Osgood, bachelor of arts, and Howard Chester Hubbard, bachelor of science in education.

The students from Kimberly and the degrees they will receive are: George Thomas Turner, bachelor of science in forestry; Dorothy Inez Requa, bachelor of science in education; and Lewis Ambrey

RID OF RUDY

Testimony that her life with Rudy Valle was a series of emotional climaxes won by Rudy Valle, daughter of Police Chief Webb of Santa Monica, a divorce in Los Angeles court. The uncontested decree ends litigation which began in 1931.

The two Murtough students and their degrees are: Clifford Curtis Evans, bachelor of science in education, and Dagoberto Valle Starkey, master of science in education.

Man must remain within 32,000 feet of the earth to breathe without artificial aid. At 20,000 feet, it is impossible to read and write properly.

U. S. SCANS IOWA VOTE AS 'STRAW'

Choice of G. O. P. as Senate
Nominee May Show New
Deal Status

DES MOINES, Ia., June 1 (AP).—Voting of Republicans for a nominee for U. S. senators was watched closely today as a possible indication of New Deal strength in the "blount" farm belt state.

Sen. Lester J. Dickinson sought re-election against six opponents on the basis of his bitter opposition to the Roosevelt administration. Democrats predicted his defeat as a left-handed endorsement of the New Deal.

Gov. Clyde L. Herring opposed Congressman Hubert Ulrick, for the Democratic nomination for senator.

There was no presidential preference vote. The Democratic state convention has endorsed President and Mrs. Raymond Sloan, Jerome Roosevelt, and Republicans voted to send an unopposed delegation to the national nominating convention.

Reservoir Award

Granted by Ickes

WASHINGTON, June 1 (Special).—Secretary of the Interior Harold L. Ickes announced today award of the contract for cleaning Island Park reservoir site on the upper Snake river reclamation project in Idaho to the Nevada Construction Co. of Nevada, Reno, on its bid of \$66,890.

The successful bid was the lowest of five received and opened May 28 at the bureau of reclamation office at Ashton.

rites held for ESTHER SLOAN, 22

JEROME, June 1 (Special).—Father Velma Sloan, 22, was drowned at Hillsboro, Ore., while swimming May 28. She had been visiting there for two weeks.

Funeral services were held from the Baptist church Sunday, with the Rev. Carl Stephens officiating. Burial was in the Jerome cemetery.

Surviving are her parents, Mr. and Mrs. Raymond Sloan, Jerome; four sisters, Eva, Lavina, Mary, and Dorothy; one brother, Charles, and grandmother, Mrs. E. J. McGee of Fargo, Oklahoma.

Chop suey, which originated in the United States, is exported to China in large quantities. Seattle, Wash., is one of the greatest exporters of the commodity.

Twenty-three of the 86 men signed the Declaration of Independence had attended college.
