THE IDAHO CITIZEN

VOLUME 8. TWIN FALLS, TWIN FALLS COUNTY, IDAHO, TUESDAY, AUGUST 23, 1927 Number 16

CROSSING THE OCEAN DEATH AND TRIP TO EUROPE NEWS FROM BOTH SIDES PERHAPS WE COME BACK

Written on the Aquilana on the way to Paris, by way of Cherbourg, leaving New York just after midnight yesterday morning.

You take your "last dinner" in New York, friends are more or less sorry to see you go. That's the death agony you all through.

When Columbus started, they told him he would fall over the edge of the globe.

When the Phenicians, ancestors of many energetic Jewish citizens, first sailed from the Mediterranean, through the Straits of Gibraltar, past the gigantic rock and into the Atlantic ocean, friends thought that was the end of them.

Now crossing the ocean is like going from New York to Chicago. You hear from your friends on both sides of the ocean.

Science has conquered this little ocean, intelligence has made it familiar, cleared out sea sickness, taught us, we need not put wax in our ears to shut out the singing of sirens, convinced us, so, our sorrow, that no mermaids are waiting to pick us up when we fall overboard.

LOCK MATING PROGRAM HERE NOW UNDERWAY

John T. Montgomery Overseer Testing of 15,000 Fowls Belonging to 82 Owners in This County in Campaign

Eighty-two chicken fanciers in the county are registered with the office of the county assessor. A flock-mating program now underway in this county.

The work, in this section, is in charge of John T. Montgomery, assistant in the poultry extension department who is doing most of the work.

A Bottle Per Hen The blood of each fowl goes in a separate little glass bottle, labeled with the bird's band number.

When the Phenicians, ancestors of many energetic Jewish citizens, first sailed from the Mediterranean, through the Straits of Gibraltar, past the gigantic rock and into the Atlantic ocean, friends thought that was the end of them.

Science has conquered this little ocean, intelligence has made it familiar, cleared out sea sickness, taught us, we need not put wax in our ears to shut out the singing of sirens, convinced us, so, our sorrow, that no mermaids are waiting to pick us up when we fall overboard.

When Columbus started, they told him he would fall over the edge of the globe.

Death Comes to Mr. Vogeler, Utah Seedman

Business acquaintances here will be shocked to learn of the sudden death in Salt Lake a week ago Saturday of A. H. Vogeler, 70, prominent seed man of the west and founder of the company that bears his name.

Mr. Vogeler was one of the founders of the Filtr Seed Company, whose headquarters are now in Salt Lake City, and was president of the Jerome Milling & Elevator company.

Funeral services for Mr. Vogeler were conducted in Salt Lake Thursday under the auspices of the Elks lodge.

LESS DEMAND ON WATERS OF SNAKE, REPORT

Darlington Reveals Latest Situation Regarding Flow of River Above Here—Predicts Heavy Carryover

"Irrigation demands on Snake river are now on the decline," said Superintendent E. B. Darlington of the Bureau of Reclamation last week.

"With a large proportion of the crops being harvested and the advent of cooler weather, the need for application of water to the fields is not nearly so urgent as it was a week ago."

"The same situation prevails in the upper Snake river valley. The use of water above American Falls has dropped off nearly 2,000 second feet."

"The storage supply at the three reclamation reservoirs of Snake river shows comparatively little depletion."

SET DATE FOR VOTING ON NEW CANAL CONTRACT

Proposed Irrigation Project of American Falls District No. 2 Will Come up to Voters September 17

Directors of the Gravely Unit project at Gooding Tuesday, named Saturday, September 17, at the date for voting on the proposed contract between the project and the federal government, a copy of which was received last week.

After a discussion of the proposed contract the directors passed a resolution deploring it to be satisfactory, and instructed Secretary D. H. Sullivan to submit it to the secretary of the Interior for his approval.

Directors of the project are eager to get the contract before the settlers as soon as possible in order that the full amount of the federal appropriation made by congress in last session may be available for actual construction work.

Dedication of American Falls Dam in Plan

Following a year of successful operation of the American Falls dam, the chamber of commerce of that city, now proposes to hold the dam twice as before at a statewide celebration September 28.

As the construction of the dam presents an achievement of vast and far-reaching importance it is believed there will be wide-spread interest in the event.

By the time the celebration is held the dam will have been fully completed and it is believed attendance will rival that of the cornerstone laying celebration on July 13, 1925.

WEATHER OF STATES GOOD NEWS REPORT

Current Review of Crop Conditions Continues to Show General Satisfactory Situation

The summary of weather and crop conditions in Idaho for the week ending Tuesday, August 16, is as follows:

North Idaho — Clear skies and moderately high temperatures prevailed most of the week, though showers on Friday halted harvesting to some extent in the Camas Prairie district.

Southwest Idaho: The first few days of the week were warm, but the latter part was cool with fairly frequent showers.

Southwest Idaho: The first few days of the week were warm, but the latter part was cool with fairly frequent showers.

HERE IS ONE OUTSTANDING RESOURCE OF IDAHO IDAHO mines produce more than \$32,000,000 annually, the principal metals being lead, silver, gold, copper and zinc. The state ranks fourth in the United States in the production of silver, supplying one seventh of all the silver mined in America.

New Highway South Gets Added Impetus The right-of-way to land leading south from Rogerson to the Nevada state line in the path of the proposed new state highway, will be purchased or condemned at once, according to a decision reached by the state board of highway commissioners in session Saturday.

Charge Embarrassment — Officers of Owyhee Valley, California, banks, closed recently, are charged with embarrassment of \$800,000.

Set Date — Saturday September 24 has been set as the day when property owners of American Falls district number 2 will vote upon the contract of the federal government for the construction of the Gravely Unit project in the Shoshone-Grovidy district.

Name Kipians Head — Judge Raymond L. Kipians of the state supreme court was elected governor of the Utah-Idaho Klu Klux club at the annual convention held in Idaho Falls last week. Ogden was chosen as the next convention city.

Fire Takes Two Town of Eden Misfortune again has struck the town of Eden, located northeast of here on the first segregation of the North Idaho tract, and Thursday last resulted in the burning of a land mark there.

We Have with Us Today O. J. JOHNSON Fifteen years have been spent in Twin Falls by O. J. Johnson of 616 Blue Lakes boulevard.

DADDY'S EVENING TALE

Mary Graham Bonker

MRS. POUTER PIGEON

You may think it very strange, but there was once a little rabbit named Pigeon.

You see his mother was very friendly with Mrs. Pouter Pigeon.

What is the Trouble?

reach of bigger animals who may want to injure me, and I might be eaten up and I don't want to be eaten up.

Sometimes She Adds A Contrasting Jacket

They became very friendly and attached to one another.

And then when the little bunny rabbit was born his mother said:

"Now I shall name him Pigeon after you, Mrs. Pouter Pigeon."

And Mrs. Pouter Pigeon strutted about and said:

"You have not only saved my life but you have been paying me a fine compliment."

And you know that pouter pigeons love to be flattered.

In fact, a little praise is good for every one.

But I haven't told you about little Pigeon's adventures.

One day, when it was nice and sunny and warm he thought he would go for a walk.

So off he started, and it was not long before he found the most wonderful clover field.

There were just quantities of the clover, enough to enable his mother to give a dinner party and invite all his friends to it, and he left enough in the field so they could come back for more.

So that was a very happy adventure.

So that was a very happy adventure.

She Knew Sheep

A city young woman went out to teach a country school.

The class in arithmetic was before her. She sat down on one side of a wall and ten sheep on one side of the wall and one jumped over, nine sheep would be left.

"Then up jumped a little two-headed daughter of a farmer:

"No sheep, teacher, no sheep."

"Oh, oh, cried the city young woman reprovingly. "You are not so stupid as they think you are."

Then she saw ten sheep on one side of the wall and one jumped over, nine sheep would be left. "Don't you see?"

"Not not not!" retorted the child. "If one sheep jumped over the others would jump after. My father keeps sheep."

Then, seeing the puffed look on the teacher's face, the little two-headed explained apologetically: "You know arithmetic, but I know sheep."

Please, Pardon Me

Little George's mother had carefully trained him to say "please" and "thank you."

This suited very well until one day he heard some one say, "Please, pardon me." He was much taken with this new expression and used it upon all occasions.

One morning when his mother was stepping out of the house for a few moments, she remembered George was to go to his smaller brother Roger.

"All right, mother," George replied. "It'll be good to Roger. If I hit Roger, I'll say, 'Please, pardon me.'"

House Not Used to Her

Aunt Sue took George home with her for a few days. It was her first visit away from home and the second day, as he was sitting at the table, he began to cry.

"Why dear, what is the matter?" asked Aunt Sue.

"I don't like this house. It's not used to me, and my house isn't like this."

Could Spell a Word?

Teacher—"Can you spell rabbit?"

Reader—"Sure, w-o is a wolf?"

Just Dying of Curiosity

By Albert T. Reid

Idaho is Well Equipped to Handle Produce of Season

Never before in the history of Idaho has the handling of farm produce been on such a high plane of standardization as it is at the present time, and the result is a better market for the farmer and a more thorough understanding between producer and consumer.

The state of Idaho has established grades for apples, beans, cantaloupes, celery, cherries, grapes, hay, lettuce, melon, onions, peas, pedregado alfalfa, seed, peaches, potatoes, prunes, seed potatoes, and small seeds.

Cooperative Business... Tabled Quickly

Approximately 1,000,000 farmers in the United States belong to cooperative marketing and purchasing organizations, according to a report of 10 years of farm organization growth issued July 30, by the department of agriculture.

The full text of the statement follows in the 10 years from 1916 to 1926 the number of farmers' marketing and purchasing associations, and the amount of business handled by the associations, is as follows:

Bean Growers!

At a meeting of the Board of Directors of the Southern Idaho Bean Growers' Association Saturday night they decided to fix the date for taking in new members for this year's crop not later than September 1st.

The membership has increased over 25 per cent since the first of this year and it is now time that we have some idea as to amount of crop we will have to sell.

If you are thinking of joining the Association in time for this year's crop, it will be necessary to do so in the next two weeks.

C. R. DEWILDER, Manager

Less Demand

(Continued from Page One)

about July 30 was \$2,655,000 acre feet, far more, of course, than have ever been in storage before on Snake river, on account of the filling of American Falls reservoir for the first time.

The high hold-over in prospect introduces new problems in the management of the reservoirs. It has been the practice in the past to fill them on the spring flood and draw them to low stages during the irrigation season.

THIS WEEK

(Continued from page One)

of the universe when the work here isn't finished.

We are only twelve thousand years from the late Stone Age, not two hundred years from the stone coach and saddlebag.

A simple idea like putting the eye of a needle in the point instead of the back end made the sewing machine possible and freed millions of women from slavery.

Standardization of varieties of products was the first step to be taken and this has resulted in the elimination of undesirable varieties.

The potato industry is on a firm footing with Noted Gen. Bursell and Irish Cobblers, and great strides have been made in producing these varieties in the state.

Many farmers, however, belonged to more than one association so that the total number of farmers served by cooperative associations in the United States is estimated at 1,900,000.

The associations from which the department has obtained records for the cooperative business in 1925 to the amount of \$2,400,000,000, probably half as much of which amount represented sales of farm products, while the rest represented purchases of farm supplies.

Seventy per cent of the total was handled by cooperatives in 19 states chiefly cooperative listed by the department as follows: Minnesota, 22.2 per cent; Wisconsin, 18.8 per cent; California, 12.1 per cent; Illinois, 10.1 per cent; Michigan, 9.5 per cent; Iowa, 8.8 per cent; Wisconsin, 8.8 per cent; New York, 8.8 per cent; and Kansas, 8.8 per cent.

IF YOU WANT THIRLES AND LAUGHS - SEE "ROOKIES"

"If you want to laugh and thrill alternately, a good place to go both is at the Ophelia Theatre."

"Rookies," a Metro-Goldwyn-Meyer comedy is being shown. The picture, which was made with the cooperation of the government, is laid against a background of life at one of Uncle Sam's military training camps for civilians.

CHILD DIES, RESULT SUNDAY'S ACCIDENT

Evangelina Yaden, aged 11 years, daughter of Mr. and Mrs. Frank E. Yaden residing three-fourths of a mile north of Washington school on Blue Lakes boulevard, died Sunday evening as the result of being struck by an automobile, in front of her home, early Sunday afternoon.

Death is attributed to a fractured skull and other injuries, the girl having been struck by the passing car when she got out of a machine on which she had been working at the Washington school. The accident occurred between 12 and 1 o'clock.

The right side of the girl's head is said to have been crushed when she was thrown by the pavement by the impact of the car. She was traveling in the same direction as the standing automobile, and she never regained consciousness.

Drivers of the machines involved are prosecuted over the occurrence, which friends of the family Monday asserted was unavoidable.

Aside from her parents, the stricken child is survived by a sister and six brothers.

The KITCHEN CABINET

(By 1927 Western Newspaper Union) The play of it is that, so far as we are concerned, most of the beauty of this new way to use water. We have no time to look at it, and enjoy it.

Special Good Things - Fortunately we are not all alike in our tastes. Food of one kind is especially fond will not be used by all.

Handwiches - Thinly chop four hard-boiled eggs, then pound them to a pulp with two tablespoons of butter, adding gradually...

Spice Pudding - Stir one cupful of sugar, a half cup of butter, one egg, one-half cup of milk, one-half cup of flour, one-half cup of strained apple sauce, a fourth of a teaspoonful of salt and the juice of lemon.

JEROME

D. W. Salladay left Tuesday for Homer, Idaho, where he will make his future home. En route he will stop at Hutchinson, Kansas, to visit a sister whom he has not seen for a long time.

Mr. and Mrs. Fred Varnum and children returned home Thursday night from their trip through California and Mexico where they have been traveling and visiting friends and relatives for the past three weeks.

Howard Qualley is making his daily trip here leaving for the coast by the train, where he will be employed while teaching in Washington, D. C.

Mr. and Mrs. Christ Christensen have left Jerome to look for a new home in California.

The new service station being built by Turner and Stanton is almost completed and will be ready for business in a few days.

Flaming, Rev. C. E. Tate, Rev. L. A. Plummer and Rev. O. L. Johnson and their families went to Hagerman Valley for a fishing trip and an outing with their baskets for a picnic dinner.

HAZELTON

Mrs. L. E. Webb was a Wednesday visitor at Twin Falls.

Mrs. J. E. Berry returned Thursday from Lava Hot springs, where she has been taking the baths.

A birthday party was given Monday evening for J. M. McDaniel at the home of D. S. Ball.

Mr. and Mrs. A. J. Slatler and children here returned from Utah where they attended the funeral of Mrs. Slatler's mother.

C. H. Taylor of Jerome has taken over the barkeep position formerly held by P. H. Talbot.

At a town meeting Monday night the date for Hazelton's annual Fall Festival was set for September 13.

George E. Barkley left Sunday for Boise where he will consult with physicians at the Veteran's Hospital.

Mr. and Mrs. Orville Christopher were Twin Falls visitors Friday evening.

Mr. Geo. P. Wylie is visiting in Rupert at the home of her sister.

Set Date For Plan Rodeo

The proposed contract involves the building of a 70-mile gravity canal from Miller to Shoshone and the purchase of four hundred thousand acre feet of storage space in American Falls reservoir.

At Tuesday's meeting John Thomas was elected president of the rodeo and W. J. Tappier, vice president. Sid Smith of Shoshone was appointed to succeed the late Fred W. Gooding as a member of the committee.

Weather of - cool with light rains, which stopped threatening; making 60 to 80 bushes, all other crops fine; applied in excellent condition.

Kimberly - Local persons here from camping and vacation expeditions include Mrs. James Gellaly and son Frank and daughter Hazel from Shoshone.

Mr. and Mrs. A. L. Campbell are entering Mr. and Mrs. J. A. Schivers and son of Phoenix, Arizona.

Mr. and Mrs. A. R. Campbell have been visiting Mrs. Silverthorne's parents, Mr. and Mrs. A. D. Sartwell.

MAROA

The Maroa Woman's club held its annual picnic for the husbands and families at the Bath park Sunday, August 21.

Mr. and Mrs. E. J. Malone left Tuesday morning for a ten day tour of Yellowstone park.

Mr. and Mrs. S. G. Diehl, Angus Mae Diehl and Mr. and Mrs. L. H. Brown said family are back from a camping and fishing trip on the Big Snake and South Fork of the Boise river.

Miss Pearl Quinn of Twin Falls is visiting this week at the home of Mr. and Mrs. F. A. Brown.

J. N. Blakely, via the owner of a new Chevrolet truck.

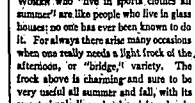

Mr. and Mrs. R. H. Williams and family who have been guests at the H. Brown ranch left Friday for their home at Phoenix, Arizona, via Portland and California.

Mrs. Leonard Brown entertained Friday evening in honor of her son Wilbur's birthday. Those present were Miss Vermina and Wanda Peterson, Miss Maxine Gardner, Miss Betty Love and Miss Ethel Grindy.

Miss Lucille Jennings has returned from a few weeks' visit to California. Her brother Cecil Jennings returned with her to visit his parents.

The Maroa Woman's club will hold its junior picnic at the fair grounds Thursday, August 25.

The Newest Flowers Are Shaggy

Women who live in sports clothes all summer are like people who live in glass houses; no one has ever been known to do it. For always there arise many occasions when one really needs a light frock of the afternoon, "shaggy" variety.

Try the Clifton for commercial printing.

How They Stand

Table with 4 columns: Club, Won, Lost, Pct. Rows include Pocotello, Sait Lake, Ogden, Twin Falls, Idaho Falls.

### TRAVELING NOW AND THEN

This country, as everybody knows, has more miles of railroad track than any other country in the world. Something that ought to make railroad managers and their stockholders think is the fact that "common carrier" motor omnibus lines have more miles of bus routes than railroad have rail lines. Two hundred and seventy thousand miles for the buses, 257,000 miles for the railroads.

When airplanes begin competing with the railroads and buses the situation will be more complicated. Children in the schools now will tell THEIR children: "I remember when my father used to travel long distances in the railroad train. When he went to California he had to sleep two nights on the train."

### YOUNG MEN

In a bank vault in Tokio lies \$500,000 worth of solid gold, nobody knows who owns it, nobody claims it. Many a young man will say, "I would do anything to get that \$500,000 in gold, that nobody claims."

Young gentlemen should remember that in their own brains, in their resources of patience, common sense and energy, \$500,000 in real money and more may be found if they want to work. They needn't do "ANYTHING" to get it, just work and be steady.

### SAFETY-CONDITIONS IMPROVING

A colored boy was asked recently which manner of travel he preferred, railroad train or airplane. His answer was like this: "Railroad for mine, when anything happens on a train, there you are; but when anything goes wrong with the airplane, where are you?"

All of which brings us to the point: there are not so many air accidents as is generally supposed. In fact accidents are few indeed in regular established routes. The accidents we hear of are largely in military, competitive and exploratory aviation.

Since the creation of the bureau of aeronautics, the Department of Commerce has been collecting statistics that are particularly interesting to the public. While incomplete, the least that can be informed, seems a great deal, namely: that in commercial aviation the percentage of safety is already high, with a better record in prospect.

According to government experts, commercial flying accidents are on the way to zero. In a recent survey it was found that 100 American flying concerns in a total of more than 6,000,000 miles flown had only two fatalities, one which was a passenger, the other a mechanic. On British air lines the percentage of safety has increased so much as to make possible lower insurance rates on air traffic than the surface transportation.

From 1918 to 1922 inclusive, on the United States transcontinental air mail route, 138,000 miles were flown to each crew fatality. From 1922 to 1925 inclusive, the per fatality increased to 789,110 miles. In 1926, the transcontinental route was covered with only one fatality in 2,292,278 miles flown.

Hitherto many of the machines used in commercial flying have been of old war time types, now being gradually replaced by better and safer planes. What is more, rigid government regulations, lighted airways, licensing of pilots and inspection of craft—these and other safeguards are fast coming into vogue, at least in the United States, and they are expected to make the air increasingly safe for the flying public.

### COMMISSIONER HULL IS WRONG

As a close neighbor of Canada and as observers and beneficiaries of the orderly and sympathetic relations thus far maintained between the United States and Canada, it will be impossible for the people of the Northwest to become enthusiastic about Commissioner Hull's proposal to extend the immigration quota restriction law to the Canadian people.

Commissioner Hull advances his project as one for Canada's benefit, because Canada has been alarmed in recent years by the number of her citizens who have migrated to the United States.

But this is a Canadian not an American problem. So far as the United States is concerned there is absolutely no need to fear that we shall acquire more of the Canadian population than is good for us. No higher type of immigrant is available. All of those who wish are welcome to come.

And as to the Canadian problem of retaining her people, Canada will thank the United States government not to meddle in a domestic situation.

Idaho has an open-door for her neighbors of the great Northwest.

How about a law to suppress those who are always for new restrictive laws?

Prohibition Chief Lowman says Uncle Sam has enough whiskey on hand to last seven years for medicinal purposes, which is still news for the bootleggers.

The National Dentists' Association is told that there are only 20 sets of perfect natural teeth in all of America which indicates that the dental business is a howling big success!

Well—everything has been said and done at Geneva. We mean said.

Well at least—Chicago is turning from machine guns to boxing gloves. Civilization advances.

The man with real values in the merchandise he is selling does not have to stick his foot between the partly opened door and jam it.

## Press Comment

### MAKING IDAHO SAFE FOR SEARS, ROEBUCK AND CO.

(Buhl Herald)

Over two hundred sacks of mail containing nothing but Sears, Roebuck and Co. catalogues were released from the postoffice at Pocatello yesterday to southern Idaho towns. Two hundred and thirty more sacks of the same mail were released on the same day from the Nampa post office with a similar destination.

The taxes this company pays to support the civilization of southern Idaho are milk, Churches, schools, colleges, hospitals, highways must take care of themselves as far as this company is concerned. State, county and municipal governments must furnish their own officers and do their own policing to make southern Idaho safe for Sears, Roebuck and Co.

### Oakland Pioneers—With Proved New Mechanical Features

Pontiac, Mich., August 22—An entirely new motor car which really is not new at all, is the new model presented by the new Oakland All-American Six, in which the American public is finding so much of interest today. For while the All-American Six is new to the public, both in point of engineering advances and in the brilliant performance to which they contribute, it is old in point of service. Having undergone hundreds of thousands of test miles at the General Motors Proving Ground in Oakland and every new capabilities thoroughly, long before it was publicly announced.

The Oakland All-American Six, which the public is admiring and buying today, illustrates aptly the evolution of a motor car. Tentative models of the All-American Six, designed to provide the 45hp performance and reliability demanded by the American people, were familiar sights on the roads of the Proving Grounds many months ago.

Here, in actual operation, Oakland engineers learned exactly what might be expected of the car in the hands of the public. The tests to which they subjected were far more rigid than any the public ever could impose. Each test car underwent thousands and thousands of miles of grueling punishment on heart-breaking grades, on rough and rutty dirt track, on brick roads, and on the speedway, demonstrating its possession of those qualities which the public was known to want.

The resulting motor car, Oakland engineers are convinced, is fully up to the highest American standard. It is large and roomy, with ample head and foot room. Its big 212-cubic inch displacement engine is a marvel of

smoothness, power, and reliability. Oakland's "rod" and Oakland getaway are greater than ever before, and Oakland's well known ability to hold high speed all day without harm is still further enhanced by a new oiling system. New upholstery and hardware inside, and new and resplendent Duco on the bodies, round out the list of attractive Oakland features, and their lower prices clinch the argument decisively.

The owner of an Oakland All-American Six, like the owner of a Pontiac Six, enjoys the comfortable assurance that there is not a single unfriended feature in his entire car. Everything has been subjected to tests more stringent than he can imagine.

A list of the refinements and advances in Oakland's of other years is the owner's assurance that those of today will be permanent, because proved before adoption.

Such a list would include counter-balanced crankshaft with harmonic balancer, Duco finish, mechanical four-wheel brakes, full automatic spark, rubber silenced drive and rubber insulated chassis, all-beam hood lamps with foot control, and many other. Several of these advances were still further improved in preparation of the All-American Six, but none, it will be noted, were abandoned.

The value of the General Motors Proving Ground is the Oakland Pontiac owner is obvious from these facts. He is driving, not a test car on whose possible deficiencies in performance future changes will be based, but a thoroughly tested and proven car, whose present and future performance is assured by endless trial, and whose sponsors after it with the unqualified statement that it has no deficiencies, even when examined in light of the highest American standards.

MOST MEN ARE HERE MACHINES JUDGING BY THE WAY WOMAN DRIVE THEM-

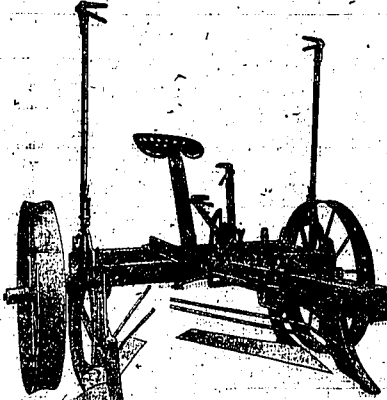

**Children Cry for Fletcher's CASTORIA**

MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in urine and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. L. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

# BAILOR BEAN HARVESTER

This machine is particularly adapted for the harvesting of Soy Beans, Cow Peas, Mexican Beans and similar crops grown in rows, and is entirely constructed of metal. The extra strong construction with every important improvement has made this one of the most popular implements ever designed by the Bailor Cultivator company.

The frame is of heavy steel and malleable rigidly braced throughout, and is adjustable. The shear beams are made of heavy cast iron, with 35 inch chilled steel shears bolted on with two countersunk bolts.

The vine turners are of the floating type and will turn either large or small vines successfully. The depth can be regulated by the two side levers which enable the operator to either cut the vines at the surface or two inches below the surface.

The pole is controlled by two levers. One lever swings the pole sideways and the other vertically eliminating neck weight and side stress.

The wheels are 30 inch having 8 inch concave tire. Comes equipped with doubletires and neck-yoke. Weight 550 pounds.

## Important-read

If you intend to harvest your Beans with a Bailor Harvester. It is most important that you place your order within the next ten days. To insure delivery. Otherwise it will be too late.
