A REVIVAL OF HOPE.
PROSPERITY FOR FARMERS.
IMPORTANT "CROP NEWS."
NATURE'S WISDOM.

There is revival of the hope that President Coolidge will consent to a second session this year. Everybody knows he meant it when he said "I do not mean it." Everybody knows he means it when he says he does not want any of his friends to lift a finger to nominate him.

But the old scandal makes a difference in the situation, and everyone of intelligence reserves the right to change his mind.

Criton "Pickers and trippers," regarding human beings with machines are now working in northern Texas.

This is good news. Prosperity for farmers depends on machines. The farmer with the vintage products what Ford did with automobiles.

In the Gary rolling mill half a dozen men roll out steel that ten thousand could not have produced with old sledge hammer methods. No human hand touches the iron, until a tall Young Scandinavian man, his right eye alone along the finished rail, checks the quality of the steel. He straightens it. Machine dig the ore, put it in ships, unload it, handle it, sell it.

See men, some day, will run a 100-acre farm, and multiply its output. Don't be weary of over-population.

The infant death rate is down in Pennsylvania and New York. In fact, the most important "crop news" this year.

Consider Nature's limitless freedom. Mr. Ringling shows you this year a spectacle weighing four tons that can set out 400 million of berries, at one meal.

OUTLOOK FOR WATER SUPPLY IS EXCELLENT

The water bureau office gives resume on snow conditions in Idaho for March.

A resume of the snow conditions in the elevated regions of Idaho has been made for March by C. L. Norquist, meteorologist at the weather bureau office at Boise, extracts from which are given here, indicating that the irrigation supply for this season is on a round basis:

On the mountain slopes and frequent rains removed the snow cover from the lower slopes and open, unprotected flats. At the close of the month the snow fields were less extensive than is normal for the season, but the snow remaining at higher elevations is generally well held and well watered.

A heavy general storm that crossed the state in late March now has melted and the snow cover, but in this portion has not melted and will not doubt go quickly with the first warm spell. Most sections of the ground under the snow is well covered. The rapid melting of the snow caused a rapid rise in the streams, which in some localities threatened to reach flood proportions before the runoff was checked by heavy weather at the close of the month.

Bear River Drainage
Monoprice: Much precipitation greater than normal, some increase in snow cover during the month. All snow melted, well watered. Full of moisture; ground not frozen and well watered.—J. C. Sauter.

Upper Snake Drainage
Barley: Warm weather of March took off practically all the foothill snow; stream rose rapidly; a general rain the last week melted 4 to 6 inches on the foothills and from 12 to 16 inches on the high plateau. Snow is very wet; outlook for water supply excellent.—S. S. Stewart.

Snake Drainage
March: Snow cover about normal; much precipitation; snow melted; snow cover somewhat less than obtained at this time last year.—W. H. Miller.

Lower Snake Drainage
Idaho: March snowfall, 2.4, compared with an average of 2.4 in the same month in 1922, which was about one-half the average of 4.35. March rains added 0.2 to 1.2 inches of snow at higher elevations. (Continued on Page Three)

STEWART BOY IS REPORTED BETTER

For the reason that no new cases have come to light, it is confidently expected that the public quarantine placed in effect here Thursday for 10 days because of the development of a case of contagious meningitis, will be lifted soon.

Encouraging reports continue to come from the Twin Falls county hospital regarding the condition of Bob Stewart, 16, son of Mr. and Mrs. S. C. Stewart.

This young man, who is a member of the freshman class of the Twin Falls high school, was stricken with the disease Thursday morning.

POMONA ORANGE MEET SATURDAY

County Commissioners Address Meeting at Filbert Committee Nixed

Grange members met in Filbert station in regular session. About eighty members were present.

In addition to the station business there was a committee appointed to investigate a wage being made by the cannal at the point where the high line and the low line separate. This wage, which is doing much damage, was caused by blowing out a dike in the canal near that place.

The committee is to find facts and report at the next board for their consideration. The Salvation Army then held a little service and took up a collection. The county commissioners discussed the county hospital and some budget matters for two hours.

The ladies of the Pomona Grange had prepared a lunch for the Sabbath. Arthur Lanning, the county commissioner, was the only stranger.

GIPSON WARNS AGAINST PESTS

Inspector Advises Residents of City to Comply With Rulings

Practically all elm and maple trees as well as fruit trees, in the city of Twin Falls are badly in need of spraying but much credit is due the city commissioner in their effort to save the magnificent shade trees which Twin Falls prides itself on. The city commissioner says that they are justly proud, says Edgar W. Gipson, district horticultural inspector. Continuing he:

"In order to handle the situation the city has invested money in the spraying outfit and is adequately equipped to thoroughly spray any size tree in the city. As this is done at cost, property owners and city citizens may take advantage of this service, as heretofore no spray outfit has been available to thoroughly spray the trees.

"However, my attention has been called to the fact that some property owners either through ignorance or the fact that their trees were infested or through selfishness, have refused to have them sprayed to take care of their trees.

"The attention of all such owners is called to the fact that state law makes it the duty of the city to protect all owners of trees and shrubs to keep them free from insect infestation. If they refuse to have them sprayed, they are liable to other health Smith, commissioner, and a citation may be issued to either the spraying has been delegated, in order that they may be able to handle them in the proper protection against these pests. Only about a couple of weeks remain for this spraying to be done and cooperation is urged, so there may be no conflict between property owners and state and city authorities."

HISTORIAN BETTER
Word from C. S. Walcott, who writes the "Effect" in the Evening Star, is greatly improved in health. They left here last December.

John W. Graham is known as the pioneer historian of this section, and the author of two books of reminiscences of early days.

WELCH NAMES COMMITTEE OF SPUD GROWERS

Turner, Twin Falls; Potter, Kimberly; Weaver, Filbert; and Abbot, Ball, on Statewide Body

BOISE — Appointment of a statewide committee, composed of 22 representative potato growers from all over Idaho, was announced Thursday morning by John S. Welch, commissioner of agriculture.

The appointment of this committee is one of the most important steps in the marketing of Idaho potatoes. The committee will be organized at Duratele last Friday. At this morning the committee will be organized by John S. Welch, commissioner of agriculture.

The committee is to find facts and report at the next board for their consideration. The Salvation Army then held a little service and took up a collection. The county commissioners discussed the county hospital and some budget matters for two hours.

DEATH THURSDAY OF Kimberly Lady

Mrs. Ida B. Steedholm, 69, wife of J. R. Steedholm of Kimberly, died Thursday night at her home in Kimberly.

Funeral services were conducted at the Kimberly Christian church Sunday afternoon by J. Elliott Ship, with burial in the Twin Falls cemetery.

Ag Students Take Part in Judging Events

A judging contest among South-Hughes students in agriculture was conducted at Jerome Tuesday by William Kerr, state director of vocational education, and E. Lattig, of the University of Idaho.

Winners in the various events were: Seed Judging—Filer, first; Jerome, second; Burley, third. Seed Judging—Filer, first; Jerome, second; Burley, third. Seed Judging—Filer, first; Jerome, second; Burley, third.

2 DAIRY TOURS DURING MONTH OF MAY HERE

Jersey Exhibit in This County May 11 and Holstein Show Will be May 23, Says Fourt

A series of Holstein and Jersey cattle tours will be held in southern Idaho during May and June. It is announced by D. L. Fourt, director of the university extension service. There will be tours in which farmers of various districts will visit various agricultural exhibits in the county.

The Jersey tours will take place May 10 in Minidoka and Cassia counties, May 11 in Twin Falls county, and a spring tour about May 15 and 16 in Payette, followed May 17 by a show for all breeds.

A general dairy cattle show will be held May 28 at Rexburg and June 2 at Malad. Officials of the northwest Jersey and Holstein associations will conduct the tours under the auspices of the extension division.

MEMBER OF CITIZEN STAFF TAKES KANSAS CITY BRIDE

At St. Louis, church Saturday, Miss Margaret St. Huff of Kansas City was the bride of Glenn H. Kennedy of this city. The service was performed by Rev. H. H. Keyser, and the couple was attended by Mr. and Mrs. Thomas McWhain.

Following the ceremony the bride party was entertained at a wedding breakfast at the Bogert, and a luncheon at the Hotel Idaho. Mr. Kennedy came here several weeks ago from Billings, Montana, and is in charge of the Idaho branch of the newly-married couple are at home at the Columbia apartments.

NEW CROUCH PLANNED

Announcement is made of the prospective opening in Twin Falls next Saturday of an O. P. S. Grocery store.

The quarters on Main avenue, formerly occupied by the Boston store are being fitted up for the new establishment.

McNary-Haugen Bill Passed by Senate in Close Vote Last Week

Borah and Gooding Split on Measure—Expect House to Also Pass Bill But Coolidge Veto is Predicted

WASHINGTON — The McNary-Haugen farm relief bill has passed the senate by a vote of 53 to 23. Borah of Idaho voted with 13 other Republicans against the bill, while Gooding, of Idaho, voted with the majority for the bill. The vote at the last session was 47 to 39.

The bill as it passed the senate carries features similar to the former bill which was vetoed by President Coolidge. Before coming to a final vote on the bill, the senate rejected, 61 to 5, a substitute by Senator Brookhart, republican, which would have provided for a direct government subsidy up to \$200,000 to meet losses incurred by farmers in marketing their surplus crops.

The five supporting this measure were Idaho's Borah and Hays, republican, and Idaho's Hays, republican, and Idaho's Hays, republican. This vote came while a number of senators were absent from the chamber as they came straggling in, several voted for the Brookhart proposal, only to change their vote later after they discovered their error. This caused laughter in the chamber and gallery and led Senator Borah to remark that he did not count his vote.

Elmer Renke, 17 Dies in Portland

The body of Elmer Renke, age 17, who died in Portland Saturday afternoon arrived here Monday on the noon train. The body is at the funeral home. Burial services will be conducted Wednesday afternoon at 2:30 o'clock at the funeral home. Mr. and Mrs. Renke of Clover, after which services will be conducted at the Lutheran church by Rev. William H. Birtel will be in the Clover cemetery.

DEMOCRATS TO BANQUET

At the invitation of the Twin Falls county Jefferson club, is being prepared for May 5, commencing the Louisiana purchase.

RECONSIDERS

W. J. Young, county prohibition agent, has reconsidered his decision to resign from that office.

Wool Growers Lay Plans for Big Ram Sale

Preparations for the annual ram sale of the Idaho Woolgrowers' Association are underway, according to the current issue of the association bulletin which reports that at a meeting of the association held at Pocatello Monday, March 21, this year, Idaho has shipped 700 cars of lambs, 416 of which were in the wool. The total number of lambs shipped in 1922 was 570 cars, with 457 wool and 112 wet. Two years ago the movement was 680 cars, with 481 wool and 199 wet. The Idaho Woolgrowers' Association is the largest branch of the breeders industry, reports C. W. Hickman, animal husbandman with the experimental station of Idaho college of agriculture. Statistics compiled by the U. S. Department of Agriculture show that during the period January 1 to March 21 this year, Idaho has shipped 700 cars of lambs, 416 of which were in the wool. The total number of lambs shipped in 1922 was 570 cars, with 457 wool and 112 wet. Two years ago the movement was 680 cars, with 481 wool and 199 wet. The Idaho Woolgrowers' Association is the largest branch of the breeders industry, reports C. W. Hickman, animal husbandman with the experimental station of Idaho college of agriculture. Statistics compiled by the U. S. Department of Agriculture show that during the period January 1 to March 21 this year, Idaho has shipped 700 cars of lambs, 416 of which were in the wool. The total number of lambs shipped in 1922 was 570 cars, with 457 wool and 112 wet. Two years ago the movement was 680 cars, with 481 wool and 199 wet. THE IDAHO CITIZEN

SEMI-WEEKLY PER YEAR, \$2.50

A semi-weekly newspaper published on Tuesday and Friday of each week at Twin Falls, Idaho, by the Citizen Publishing Company.

The Idaho Citizen has the exclusive rights in this community to all NEWS, FEATURES AND ADVERTISING SERVICE OF THE PUBLISHERS AUTOCASTER SERVICE OF New York City

Entered as second class mail matter at the postoffice at Twin Falls, Idaho, under the act of March 3, 1879.

The Idaho Citizen is an authorized medium of publicity for the agricultural cooperative organizations of the great State of Idaho, including the Farmers' Grange, International Cooperative Dairy Association, Idaho Egg Producers' Association, Idaho Wool Growers' Association, Southern Idaho Bean Growers' Association, Southern Idaho Beef Growers' Association, Idaho Turkey Growers' Association, Mountain States Honey Producers' Association, Twin Falls County Horticultural Society.

CITIZEN PUBLISHING CO., 263 Second Avenue North, Twin Falls, Idaho, Phone 172

WHY BRING THAT UP?

The secretary of state is calling upon the newspapers of the state to aid him in determining what shall be put on the 1929 auto license plates.

This is a pretty big order for the newspapers. To begin with the two will agree on what would be the most appropriate design. Some would want a picture of the state's most famous product: Senator Bill Borah; but politics would be charged in that instance. The Citizen would like to invite its readers to make suggestions if they have any.

At first blush, it occurs that license plate are designed for the specific purpose of revealing a serial number, the name of the state and the year of issue. To have this information cluttered up with potatoes and such is confusing.

True it is, the plate this year has attracted much publicity in out-of-state newspapers, but whether or not the plates themselves have actually been of benefit to the potato industry of Idaho is problematical.

Advertising is a great business, and this idea of putting names and shapes of Idaho's products into the license plates is designed purely for advertising.

Just because a thing is unique, or unusual, or queer is not sufficient evidence that it is good advertising.

This newspaper regrets it is unable to offer any clever ideas for Mr. Lukens' plates. The old-fashioned stock design, it is believed, would suit most auto owners.

Along with the regular ballot, the eight amendments to be voted upon, and the ballot on whether this county shall sell or keep the county hospital, there might be included another little referendum reading something like this: "Shall Idaho use auto licenses or billboards on cars in 1929? Answer Yes or No."

Our laconic reply to Mr. Lukens' kind invitation to pass the buck from his shoulders to the newspapers is "Why bring that up?"

All of which is submitted in kindest spirit of friendly suggestion.

FORESTRY PROBLEMS LOOM BIG

There is still no satisfactory solution of reforestation problems.

So many factors of civilization depend on the forests that it would be impossible to imagine a civilized country that could exist without proper forest facilities. The vast amounts of wood-pulp used yearly for newspaper purposes, for one thing, make the preservation of our forests a crying necessity if culture is to be fostered in the years to come.

The President of the University of Wisconsin, Dr. Glenn Frank, recently expressed himself forcibly on the matter of reforestation: "The fault lies," he said, "in patent medicine minds which look for a panacea that will provide an immediate cure for our problems."

"There are no pink pills for pale forests. Conservation means more than the planting of a few trees: It involves sweeping reform. We must make good the mistakes of the pioneers who left us a heritage of denuded forest lands as well as a heavy-minded tolerance for exploitation of the soil."

Dr. Frank has expressed himself rather strongly, but there seems to be a great deal of truth in what he said. Surely a mighty problem like that of reforestation cannot be solved by tiny dribbles of effort here and there.

It seems to us that concerted action and a thorough national program, carried out to the letter of the law, is necessary if our forests are to be preserved.

The forestry situation must be kept always in the fore of public thought, lest the depreciation of our forests lead to serious consequences.

Blue laws make a lot of people see red.

Anyway, those New Year's resolutions didn't do any harm.

Where there's a will, there's always a lawyer to break it.

A yawn killed a man in Kentucky not so long ago and he probably was just bored to death.

Any woman can keep a man guessing, particularly when she begins making hand signals from the car ahead.

It's easy enough to catch 'em young these days, but it's a strong yellow to treat 'em rough and tell 'em nothing.

A news dispatch says that "stinging mosquitoes are being propagated in France," and it loads one to wonder if they sting too, over there.

These "kill blasts" you read about in the papers can't be so still, after all, since by the same papers they occasionally shatter windows.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says the paper for such sense in your '42 you should feel for the paper which has been a leader for so many long years in a dance every day right here at home.

WE SEE BY THE PAPERS—

By J. H. S.

We announce triumphantly that there was a typographical error in the issue of the Saturday Evening Post for the issue of April 7, last week. If you will look closely at the cover of the weekly mailed at the top of page 108, you will be able to detect that the word "the" has been knowingly misspelled as "t" in the headline.

It gives the writer much pleasure to point out this brazen inaccuracy, for after reading The Post for a quarter of a century this is the first time he has been able to find such an error. But there it is, just as plain as the nose on your—on such a face. We are framing the page for the benefit of "Hooligan" Thomases.

Now if you ever see a typographical error in this newspaper, stop and consider: The Saturday Evening Post makes them, too. It really is an error, but there are some publications, it seems, that carelessly make them once in a great while!

Oakley Herold—The Herald is smaller than usual this week. Reason for excuse?—the paper is temporarily without a paper cutter. The paper-cutter knife was sent to Salt Lake City last week to be sharpened—and it hasn't come back yet.

Talking about the hair, styles in permanent waves, what this country needs most is for someone to invent a permanent shave!

ROGERSON

ROGERSON, April 13.—L. A. Waters went to Boise Wednesday and brought Mrs. Waters home. She spent a lot of money and has about a week with her daughter there.

This portion of the country continues to have much wind and April showers.

The construction of the new service station is progressing nicely. The foundation is made and the tanks and pumps are now being installed.

Mrs. Hemby and children moved away from Rogerson Tuesday.

Mrs. Avis Hinch of Boise has come to Salt Lake. Her mother, Mrs. Mary Miller at the McMillan hotel. Mrs. Lynch left Thursday for a visit at the Fred Winter's ranch at Three Creek. Her husband is assisting Fred Walters with jump work.

Husband and Wife

If husband puts his collar on the bureau at night and I can't see the clock.—H. McD.

WIFE HITS YOUR HUSBAND DOOR

Beet Pulp is Good Feed

But you won't have any beet pulp unless you are growing it. Beet pulp is no more expensive. Saw an acre of carrots for your livestock. We have the seed. The cost less.

PLAY UP IDAHO (Idaho Statesman)

The secretary of state is now considering the design for next year's license plates for motor cars. The secretary got many bouquets and many brickbats for the present design. The bouquets were largely for the idea of advertising Idaho by its potatoes, the brickbats because the plate gave the impression that Idaho was a big state.

The Statesman thinks the plate about the ugliest one in evidence. It looks like a job of mud in a puddle of bile. If we want to advertise on these plates, it would seem that the best way to show that we are proud of the name Idaho, acknowledged to be the most beautiful of any of the states' names, would be to bring out the name Idaho in big letters and cut out the spinach.

TO BE REGRETTED (Stampa Leader-Mirror)

There will be general regret that the Teton coal mines in Southeast Idaho have gone into the hands of a receiver. These mines are the only coal mines in the state and there was very general hope that they could be worked as cheaply as the Utah and Wyoming mines and eventually supply the state with a home product. However, the mines are sold and if they contain any coal, which doubtless proved to be no greater expense, there will be opportunity for Idaho peep, but instead must be obtained by education. He added that the union general draft would do more to maintain peace than any other legislation. This legislation is essential to the welfare of the state and the only kind of a draft that would prove effective is one in Idaho, and there will be very that will treat the nation's general hope that the receivership may be only temporary and that in the world some only men were conscripted, and the other two factors were permitted to profect under the guise of providing the mine of war for their country in time of stress.

THE UNIVERSAL DRAFT (Burly Bulletin)

In his address to Legislatures of Idaho at Shoshone last Friday, National Commander Edward E. Spinfurth emphasized the major actively this year in the program worked as cheaply as the Utah and Wyoming mines and eventually supply the state with a home product. However, the mines are sold and if they contain any coal, which doubtless proved to be no greater expense, there will be opportunity for Idaho peep, but instead must be obtained by education. He added that the union general draft would do more to maintain peace than any other legislation. This legislation is essential to the welfare of the state and the only kind of a draft that would prove effective is one in Idaho, and there will be very that will treat the nation's general hope that the receivership may be only temporary and that in the world some only men were conscripted, and the other two factors were permitted to profect under the guise of providing the mine of war for their country in time of stress.

OPPOSITION OF THE UNIVERSAL DRAFT (Idaho Statesman)

This condition of affairs should not be tolerated, especially in war time, when every resource should be placed at the disposal of the government. Theoretically the universal draft is sound, and its adoption would tend to discourage war because of eliminating all profiteering. However, it is essential that such legislation not only affect men, power, but also include capital and industry on equal terms.

With such a law in this country, impartial to all classes, and the proper education of future generations

Why may see a substantial reward for its efforts.

WHY SINGLE OUT THE 15TH AMENDMENT (Arco Advertiser)

Wonder why someone always picks on the 15th amendment as a football for conventions and gatherings to kick around. At the Republican convention last Tuesday an attempt was made to have the party declare in favor of the enforcement of that law. A similar effort, we are told, was made at the Democratic convention in Blackfoot.

A party's promise of law enforcement should, it would seem, suffice not only regarding the 15th but other amendments and laws. When conditions reach a point where individual mention is necessary, it might be well to call by name a few others also.

ENFORCEMENT QUEEN

Photo shows Mrs. Leona J. Schenck, of New York, who has set a new world's record for endurance swimming, remaining afloat for thirty-six hours. The former record of thirty-one hours was set by Edith Johnson of England in 1926.

100,000 bush fund to Stimulate (Idaho Statesman)

doomed to failure because of the indifference or opposition of big Republicans. It is a fact that such men as President Coolidge, Mellon, Hoover, Butler, Lowden, Dawes and others in that class are more apt to be silent than to speak.

Set New Air Mark

Two spring secrets that are time-savers for the home-maker may be summed up in these few words: Prepare foods beforehand when ever possible, so all the busy work is done during the "cleaning-up" part of the day. When you are to serve, use not only lift lifts, dishes out of the oven or refrigerator and place them on the table. Use the coffee pot, the rice cooker, the rice, meat loaf, cutters and tap-leo desiccator lend themselves well to this scheme.

Another short-cut is offered by the compartment plate. Meat, potatoes, a green vegetable and a salad can be served in separate compartments. Then when dessert is in order there is but one dish to remove from each place. This adds tremendously to the efficiency of a meal, and makes easy, pleasant service for all concerned.

HAM AND CHICKEN EN CASEROLE
In a well-buttered casserole put sliced chicken and ham. Mix cream sauce, cover with grated cheese and crumbs and brown.

EGGS
Amber, emerald and rose-colored eggs of jelly are the latest thing in the nest. To make them, "blow" the contents from uncooked eggs and use an egg with paraffin. Dissolve flavored gelatin in soup; when cool pour into egg shells and allow to set.

DOES YOUR OVEN SCORCH CAKES?
If bread, cakes and biscuits have a habit of scorching in your oven, try a small pan of salt under the lens and note the improved baking.

MILK BRIGHTENS SILVER
The silver will be much brighter if you wash it in the water in which it is washed.

WHEN THE PANS STICK
Never scrape a scorched pan. First sprinkle baking soda over the spots and set aside for a while. The soda will loosen up and the pan may be easily cleaned.

FOR SPARKLING WINDOWS
A few drops of vinegar mixed with the water when washing windows gives a fine brilliancy to the glass.

PICTURES INVADE THE KITCHEN!
Since kitchen is a cooking equipment have become in vogue, pictures have come into the kitchen too. Cheery scenes in the kitchen, a glimpse of a well-tended garden, a holiday at the beach, perhaps. They help considerably during working hours.

Murtaugh
A daughter was born to Mr. and Mrs. D. J. Roberts, Friday, April 13.

The regular session of the M. J. S. Student Body was held Friday morning in the gymnasium in the auditorium with the president, Grans Smith, presiding. The Juniors had charge of the program.

New Chandler is Proving Popular
The new Chandler car is proving to be one of the most popular cars that ever came into Twin Falls. It is being sold in large quantities.

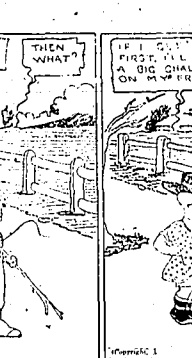

Miss Lou Tolman had charge of the program for assembly, Friday, April 13, which consisted of several songs, including "The Silliest Fox" by Margaret Lindan and "The Girl Who Came to Supper" by Mrs. J. R. Boyle.

PSOLAM, HEALS QUICKLY, IT'S SO CONCENTRATED
Psolam is so full of gentle, healing medication that it begins to act the minute it touches any sore, burn, scratch, insect bite, skin disease, sunburn, and so on.

Charleston Dance Contest Judged By England's Leader
Miss Leslie Sutton, chief judge of the Charleston contest for England, writes: "Very unique position in the dancing world today would never have been occupied had we not taken the proper care of our health."
