JOINT REPORT OF OPERATIONS IN FUNDS
of Twin Falls County, Twin Falls, Idaho, from April 8, 1928, to July 8, 1928, both inclusive.

**EXPERIMENTAL
WORK IN TWIN
FALLS GROWS**

Crops in County Closely Inspected for Certification Under Direction of State and Federal Officials

The growing of beans has attained such a degree of expansion that other districts in Idaho and other sections have applied to officials here for information regarding the industry. These requests became so frequent that the county agent, B. E. Brownell, in cooperation with Ralph Britton, former assistant extension agronomist, wrote and published an extension bulletin on "Bean Production in Fertilized Idaho" during the last year.

This will be used with other such bulletins as sent out by the extension department of the state university to all who are interested in this form of agricultural activity.

Experiments have been conducted in this territory during the year in an effort to discover the causes of diseases of the bean plants and to eradicate the trouble. To this end, Walter Pierce, assistant plant pathologist connected with the extension division, carried on experiments during the year which are expected to be of value in the further development of the industry. Pathologists from the U. S. department of agriculture also conducted surveys in Twin Falls county, as the basis for additional experiments along this line.

The investigations carried on by Mr. Pierce included the following: 124 Great Northern selections for mosaic resistance.

- 25 into selections for mosaic resistance.
- 5 Strains of Refugee.
- 8 Strains of Refugee Stringless Green Pod.
- 8 Strains of Burpee Stringless Green Pod.
- 30 Great Northern and Refugee Hybrids.
- 6 Robust and White Imperial Hybrids.

The following six compounds were tested for value as bean seed treatments:

- 1. Copper carbonate, 3 ounces per bushel.
- 2. Semasan.
- 3. Dipdul.
- 4. Boyer Dust, 2 ounces per bushel.
- 5. Boyer, Special Dust No. 100.
- 6. Boyer, Special Dust No. 101.

Twelve Great Northern plants and 200 tomato plants were treated under cages for susceptibility and resistance to curly top, with field test undertaken by Nell Jensen as cooperator on the use of Semasan-treated bean seed.

This represents part of the experimental work carried on in Twin Falls county the past year in the interest of better crops of beans, peas, potatoes, grains and other products. Methods of growing as well as the development of

Mother Gets Life
Mrs. Etta May Miller, of Lansing, Mich., mother of ten children, of whom one is blind, was sentenced to life imprisonment on charges of selling liquor.

plants that would prove immune to the diseases common here have been the goal of these investigations.

Since practically all the potato growers in the county receive certified seed from districts having a higher elevation than Twin Falls, three farmers in the more remote dry sections conducted experiments and applied for certification but adverse circumstances occurred and none of the fields could be certified. From 85 to 100 cars of certified potato seed are shipped in every year from districts that can successfully produce the required product.

Vernon Patch worked in the county for six months during the summer under direction of L. D. Haeder, assistant extension agronomist, certifying grain and seed to see that only the best product is given to the commercial market.

This work, in done under the crop improvement program of the extension division of the agricultural department of the state university. Standards are rigidly adhered to, as a result of which Twin Falls county products that are exported have attained a high standing on the general market.

Women's Work

(Continued from Page One).

fundraising work. When some of them requested instruction in basketry, a class was organized with Mrs. S. C. Ore in charge. These women also took some clothing work. The project in general was conducted by Mrs. C. B. Conrad, four meetings having a total attendance of 110, with 35 attending the classes in basketry.

Mackay—100-foot cement dam built across Lost River just below Mackay dam.

Shoshone—Hatterasake curve on highway two miles south of this place will be eliminated soon.

Wendell—New highway being opened eastward and westward and bordering this place.

Friends of The Citizen, having legal notice to print, will confer a favor by ordering them inserted in this publication.

THE NEW FORD CAR

Now On Display

Showing Complete Line of All Models

MODEL A CAR SPECIFICATIONS

Engine—Four cylinder "L" head, cast en bloc. Piston displacement, 200.5 cubic inches. Bore, 3 3/8 inches; stroke, 4 1/4 inches; horsepower rating S. A. E. and N. A. C. C., 24.03; brake horsepower, 40 at 2200 RPM.

Transmission—Standard selective sliding gear type, three speeds forward and one reverse. Gears and shafts of chrome alloy steel, heat-treated for hardness.

Clutch—Multiple-dry-disc. Long-wearing wire and asbestos composition facing. Completely enclosed and protected.

Brakes—Six-brake system, fully enclosed. Four-wheel mechanical, internal expanding shoe type operated by service pedal. Drums, 11 inches in diameter. Width of brake shoes, 1 1/2 inches. Separate emergency brake on rear wheels, operated by hand-lever—internal expanding band, full energizing. Length of band, 28 3/4 inches; width, 1 inch.

Camshaft Bearings—Five, all 1 9-16 inches in diameter. Length, No. 1, 1 1/4 inches; No. 2, 3/8 inch; No. 3, 2 inches; No. 4, 7/8 inch; No. 5, 1 inch.

Valves—Carbon chrome nickel alloy.

Crankshaft Bearings—Three main bearings, all 1 1/8 inches in diameter. Length, front and center, 2 inches; rear, 3 1/8 inches.

Connecting Rod—Steel forging. Lower bearing rabbitt, 1 1/2 inches in diameter by 1 3/8 inches long. Piston pin machined seamless steel tubing; full floating type.

Carburetor—1-inch vertical. Choke and needle adjustment rod on dash. Hotspot intake manifold.

Steering Gear—Three-quarters irreversible, worm and sector type with roller thrust bearings on worm shaft. Gear housing steel forgings, welded, steering column steel tubing welded to gear housing, making sturdy one-piece unit. Ratio 1 1/4 to 1 to give easy steering.

Oiling System—Gear pump delivers oil to reservoir in valve chamber providing constant gravity flow on crankshaft and front camshaft bearings. Other engine lubrication by splash system. Oil pump driven from spiral gear on camshaft. Oil level indicator rod, oil filler on left side of engine. Capacity, 5 quarts.

Ignition—Battery, coil and distributor; new Ford mechanical design which eliminates high-tension cables to spark plugs. Theft-proof ignition lock.

Cooling—Centrifugal water pump in cylinder head on shaft which also operates fan. Tubular radiator, two-blade airplane propeller type fan 16 inches in diameter, driven by adjustable "V" belt. Capacity, 3 gallons.

Fuel—Gravity feed from welded steel tank built integral with cowl. Capacity of tank, 10 gallons.

Springs—New transverse semi-elliptic, both front and rear, chrome steel.

Instrument Panel—Satin-finish nickel, mounting speedometer, gasoline gauge, ammeter, ignition lock and lamp. Choke and carburetor adjustment rod at right.

Control—Steering wheel, 17 1/2 inches in diameter. Gear shift lever in center. Emergency brake in center. Spark and throttle control under steering wheel; horn button and light switch in center of wheel. Foot accelerator.

Rear Axle—Three-quarter floating type. New design all-steel housing. Axle shafts special Ford carbon manganese steel, differential gears integral with shaft. Spiral bevel gear and pinion. Roller bearings throughout. Gear ratio, 3.7 to 1.

Front Axle—Chrome alloy steel forging, "I" beam construction; reverse Elliott type; adjustable taper roller bearings for wheels.

Drive—Torque tube. Exceptionally heavy radius rods. Lights—Double filament headlights, combination tail and stop light. Dash light on instrument panel.

Equipment—Houdaille hydraulic shock absorbers, Triplex shatterproof glass windshield, speedometer, gasoline gauge, ammeter, ignition lock, dash lamp, automatic windshield wiper on closed cars, rear view mirror, combination tail and stop light, high pressure grease gun for lubrication of chassis, tool equipment, tire pump, jack, oil level indicator rod on engine, horn, spare steel-spoke wheel.

Tires—Balloons, 30x4.50 standard on all passenger cars.

Wheelbase—103 1/2 inches.

Wheels—Ford steel-spoke wheels standard on all passenger cars.

Turning Radius—17 feet; circle 34 feet.

Tread—56 inches.

Road Clearance—9 1/2 inches.

THE IDAHO CITIZEN

SEMI-WEEKLY FEB YEAR, 1928 A semi-weekly newspaper published on Tuesday and Friday of each week at Twin Falls, Idaho, by the Citizen Publishing Company

AUTOCASTER NEWS SERVICE Entered as second class mail matter at the postoffice at Twin Falls, Idaho, under the act of March 3, 1879

The Idaho Citizen is an authorized medium of publicity for the agricultural cooperative organizations of the great State of Idaho, including the Farmers' Grange, Internominal Cooperative Dairy Association, Idaho Egg Producers' Association, Idaho Wool Growers' Association, Southern Idaho-Bean Growers' Association, Southern Idaho Beet Growers' Association, Idaho Turkey Growers' Association, Mountain States Honey Producers' Association, Twin Falls County Horticultural Society

CITIZEN PUBLISHING CO., 233 Second Avenue North, Twin Falls, Idaho, Phone 172

BETTER FARM FLOCKS

The farm poultry industry now ranks in the billion dollar class, and is the sixth agricultural commodity in value in the United States, according to Harry A. Lewis, president of the National Poultry Council. In line with the increasing importance of poultry and eggs as a source of income to the farmers of the nation, Mr. Lewis and several leading poultry authorities, recently called upon General Earl, director of the Federal Budget Bureau, to ask for larger appropriations in 1930 to solve new problems arising in the industry.

This is an indication that chickens on the farm cannot any longer be treated as a side issue, but should be considered one of the principal "crops," and the one most readily convertible into "ready cash." Last year approximately \$1,181,000,000 was the farmer's net income from poultry and eggs, which ranks them well above wheat, oats, fruit, potatoes and a long list of other farm products so far as actual monetary return is concerned.

It is on this basis that the National Poultry Council appealed to Uncle Sam for more funds to secure improved methods of poultry keeping which may assist the farmer in obtaining still larger profits from his poultry flock. The first step to greater profits from farm poultry is in increased egg production, according to poultry authorities and farm bureau agents. Hens must lay from 140 to 170 eggs per year to return a good profit to their owners. The principal trouble lies in the fact that the average farm hen now lays only 70 eggs a year, which is not enough for the farmer to realize an adequate profit in return for the labor and feed he expends.

In a drive to assist in bettering the quality of stock on American farms, leading hatcheries of the country recently united under the slogan, "Hatchery Chicks for Greater Profits," pledged to produce profit-making stock at fair prices. Because the great growth in the hatchery business in recent years has enabled the poultry industry to attain its present size, leaders in this field are looking to hatcheries as the most logical source of better farm stock for the future.

MAN AND HIS SILLY GARB

How man laughs and sneers at the silly dress or undress of the modern girl and woman! Ignoring the fact that many medical authorities claim the modern woman to be less subject to cold than her male counterpart, man insists that her garb should be garbed while his is to stay forever.

Yes, if more men expected to retain his self-justified smile, he should never investigate the whys and the wherefores of his present attire.

Why the row of useless buttons on the coat sleeve? Once men wiped their noses on said sleeves, and tailors sewed these nose tormentors to break a nasty habit. The habit was broken but the buttons linger on—as souvenirs.

Why the long trousers? A wise tailor courted the favor of an English king with deformed legs by inventing something that would hide the deformity. The king is dead, but the king still lives in effigy—upon the limbs of some billions of modern men.

Why the neck-tie? A wide one was once used as a handkerchief. Occasionally it presented an unpleasant appearance so a new type of handkerchief was invented—and the tie narrowed to its present form.

Why the shirt-tail? Why the shoe-lace? Why the stiff collar? Why the warm summer hat? Why the fourteen or eighteen pockets? In fact, why the self-bestowed praise of man when speaking of his clothing? Man insists that he wants to wear the things he now wears, but send him off on a fishing, boating or camping trip and as soon as he is out of sight of his fellow men he slips into the clothing that he really appreciates.

But don't ask him the reason. It's a difficult question to answer.

SCIENCE AND THE FARMER

Science is perhaps the greatest help of the farmer. One out of five prominent scientists in America, Secretary of Agriculture Jardine points out, are engaged in work of an agriculture-chemical nature.

As the result of the extensive scientific agricultural work going on, the percentage of tuberculous cattle has been reduced from 4 to 2 in the last decade.

It seems that a great percentage of the new inventions and discoveries have to do with the farm. Scientists are interested in the agricultural problems of the nation more than in almost anything else.

That is not surprising, agriculture being the great industry that it is. The surprising thing is that being such a great industry, and drawing the attention of the leading scientific minds of this era, it has been unable to obtain creating a favorable plan of distribution and marketing of its products.

"The old-fashioned restaurant is passing away" says a news item. So are its customers.

A man in Chicago who punched a bill collector on the jaw was acquitted. And yet they say there is no justice in Chicago.

It costs five times as much to be buried as it did twenty years ago. No wonder we have so many Scotch centenarians now.

Mothers of school-children in Youngstown, O., ask the police to protect their sons from girls who try to flirt with them. And who's to protect the police?

A prediction has been made that soon dresses will be sold in the 5 and 10 cent stores. Considering the amount of material that goes in them now, it doesn't seem an unlikely development.

A Two-Dollar Dinner for Six

Between the feasts of Thanksgiving and Christmas the careful housewife works in a few frugal meals. Here's a substantial and tasty dinner which will fully satisfy six people at a cost of only two dollars:

- Mock Turtle Soup
Spaghetti with Cheese and Tomato Sauce
String Beans
Bread and Butter
Asparagus Salad
Peach Halves with Cream
Demi-tasse

NE merit of this meal is its saving of labor. All three of the hot dishes need only to be heated and served. As to prices, two cans of mock turtle soup cost 14 cents each and you can buy three cans of spaghetti with cheese and tomato sauce for a quarter. A can of string beans costs 27 cents, a loaf of bread 10 cents, Asparagus for the salad costs 2 cents a can, lettuce 10 cents, and sufficient mayonnaise, 5 cents. A can of peaches costs 23 cents and a small bottle of cream, 20 cents. The soup coffee for six persons at 40 cents a pound costs 6 cents. The total cost, \$1.94, leaving 6 cents for left and minor ingredients. The food can be obtained at prices quoted at sale in the cheaper stores throughout the country.

CASTLEFORD Miss Pearl Jones of Spokane, is spending the week at the E. D. Logan home.

Mrs. Laura Lynn, of Boise, spent the week with Margaret Thomas and other friends. The local scouts enjoy a party at the school house Friday evening. Dairy refreshments were enjoyed by 20 guests.

The members of the girls and boys basketball teams will put on a banquet Monday evening, December 31, in the M. E. Church. There will be a charge of 50c per plate and funds are to be used to buy suits.

Funeral services for the 17-month-old baby of Mr. and Mrs. J. H. Zimmerman, who passed away Friday of double pneumonia, were conducted at the M. E. Church in Paul Sunday afternoon by Rev. White. Interment in the 2nd cemetery. This community extends their sympathy to these bereaved parents.

George Clement left Thursday for Cleveland, Ohio to visit relatives. Winifred Fryer left Friday to spend the holidays with her parents at American Falls.

Laurie D. DeJardin is spending the holidays at Emmet with his parents. G. E. Ulrich were Christmas dinner guests of Mr. and Mrs. C. R. Ulrich of Twin Falls.

The banquet given by the M. E. Church in Paul Sunday afternoon, both socially and financially. T. S. Smith as taught two lots of A. E. Heller in the east part of town. Laurier DeJardin, son of S. A. Brabb has the contract. Mr. and Mrs. Smith will take rooms at the hotel until their house is completed. Laurier DeJardin, son of S. A. Brabb is moving to the tenant house at the George Voecker place.

Mrs. S. E. Harp and two children left Friday for Boise to spend the holidays with her parents and Mr. Harp who had gone to Boise on Tuesday and had submitted to a tonsil operation on Thursday at the veterans' hospital.

Joe-John Schiller's will confined in the Twin Falls County hospital suffering from a relapse of the flu. Fred Singer is attending college at Laramie, Wyoming, came home Saturday for the holidays. The Ladies Aid will meet Thursday January 3 at M. E. Church. Mrs. F. E. Hastings and Mrs. R. L. Elliott, hostesses. Leader, Mrs. G. M. Putnam; subject, Early Church History, John and Charles Wealey. Helen Putman, who is a student at St. Mary's school, Boise arrived home Friday to spend the holidays with her parents Mr. and Mrs. G. M. Putnam. Mr. and Mrs. E. W. Kinyon are retained Mr. and Mrs. Arthur Houk and family and Grover Kinyon of American Falls at Christmas dinner.

"Hatchery Chicks for Greater Profits" is the slogan of a national hatchery organization whose members are pledged to fair deals with customers, and better chicks—through improvement of their egg sources.

Durley—Average yield of apron peaches per acre is approximately 11.47 in this vicinity.

CASTLEFORD

The families of H. E. Hammercup, S. A. E. Beem and G. C. Beem were dinner-guests Christmas day of Mrs. S. A. Beem. Green Allen, who is a student at the university at Moscow, is a guest at the home of his parents, Mr. and Mrs. V. A. Allison.

Mr. and Mrs. W. M. Bunce and family were dinner guests Christmas day at the L. L. Breckenridge home near Vestula, California.

Ora Aman, student at the university at Moscow, is a guest at the home of relatives. Dr. and Mrs. H. J. Good and family were Christmas day dinner guests at the C. H. Fox home.

Mr. J. D. Staats left Friday by train for Helena, Montana to spend the holidays with relatives. The families of G. H. Shearer, E. S. La Hoo and A. A. Newberry were dinner guests Christmas day at the Ray L. Shearer home.

Mr. and Mrs. T. E. Moore are entertained at dinner Tuesday for Mrs. and Mr. J. D. Staats and son Clarence and the family of Clinton Chapman of Wendell.

Mrs. Nat. Brown entertained at dinner Christmas day for J. D. Staats and family. Mrs. C. E. Rutter is at the county hospital recovering from a recent operation.

Kenneth Main is recovering slowly from peritonitis following an operation for appendicitis. Wholesaling rough is prevalent in Filter, there being a number of children suffering from the malady.

The Filter Women's club held a meeting Wednesday, December 19 with a pot luck luncheon prepared. A program consisting of a number of recitations was given and was called the "Cycle of Music."

Mr. and Mrs. Ira Lancaster are parents of a daughter, born December 16 at the county hospital. Miss Bernadette Greiser and Helen Doud, who are attending the College of Idaho are home for the holidays.

The Future Farmers' carnival, provided a most enjoyable afternoon for those who attended Wednesday evening. The annual football banquet of the high school boys was held Monday evening with over forty guests seated at a delicious dinner furnished and served by the domestic science class instructor at the high school. Talks were made by G. H. Shearer, W. Nuzum, Elmer Adkins and J. V. Waro. Everett Shockley acted as toastmaster and short talks were given by Donald Greenwood, Robert Barton, Harry Butler, Vernon Hahn, Ralph Shearing, Earl Smith, Ralph Hostetter, John Williams, John Harshbarger. John Harshbarger was elected captain for the coming year.

Ray L. Shearer left by train Thursday for Colton, Illinois, where he will spend the holidays. Instructors in the rural high school, who have left Filter for the holidays are: Henry Powers and David Betts, who went to Salt Lake City; Miss Maudel Wein left Saturday for Oakland, California.

RODENT WORK IN CO. GROWS

Strychnine Used by Many Farmers for Killing Bird and Animal Pests

Rodent and pest control constitutes one of the most active and important items in the work of the county agent during the year just closed. Poison was liberally used for the purpose of ridding the farms of undesirable animals such as rock chucks, ground squirrels, field mice, rabbits and sparrows.

Forty-three farmers of the county used 108 ounces of strychnine for the destruction of field mice and ground squirrels. Strychnine was used by 57 farmers in the territory, but had experienced mixed results, so no demonstrations were necessary.

For the killing of rock chucks which infest the areas along the banks of the Snake river, a great amount of strychnine was used. In some instances, 35 ounces of strychnine were used by 22 farmers.

The bodies of rabbits that ran on the wild areas of the Salmon tract constitute one of the worst pests farmers have to deal with. The campaign has been carried on persistently, 96 farmers using 238 ounces of strychnine for the destruction. This work has been greatly aided because the rabbits have a good value at this time of year, making greater income for their capture. A number of boys and men have made a good income trapping and poisoning the animals in different parts of the tract.

A market for the skins is to be found in Twin Falls where two men operate a small establishment. They purchase rabbit carcasses at about five cents apiece, skinning them themselves, and they also pay a price for skins that are brought in.

One demonstration was held during the summer in selling poison for sparrows. Forty-two farmers mixed poison for birds, 18 farmers receiving strychnine for this work at the time of the demonstration.

While not connected with the county agents work, trapping and poisoning of coyotes and other predatory animals also continues as an active enterprise by many ranchers. The recently organized predatory animal board appears to be through hunting, trapping and poisoning, the coyotes are being rounded up all over the tract.

Blacksmith Inventor

Frank Wilson Lambert, 73, a Blacksmith of Omaha, has invented a curved end with claims will revolutionize aviation.

Lambert is building an airplane in which he plans to make a flight to Paris next year.

The State We Live In

By BYRON DEFFENBACH, State Treasurer

A WOMAN, A DEER, AND SEVERAL SKINS

The holiday season in Idaho brings to mind this story. Once upon a time, long ago, before the world was made, there was what is now Idaho. An Indian hunter spent his Christmas in the awful mountain wilderness below Water on the Snake.

November had found him a woman, with her half-bred husband and two children, traveling with a party of over 30 white men. Near the present Grandview they struck north across the desert, coming finally to where South Lake now is. Here the woman caught the hunter's eye. He thought "How fine near the mouth of the Snake, crossed the Payette and the Water, leaving a record that the water was cold. It is cold yet, in November."

On down the Snake's east side, a freezing, wailing, clanking, howling, entering the Seven Tons. A canyon 7,000 feet deep on the Idaho side. One of the Snake's thirty creeks one mile in four. The big river runs for 20 miles through a box of rock; open top, vertical sides, bottom of swirling foam. Professor Laney says that to this day "travel along the river is practically impossible." And yet five feet of the party went on to the Pacific.

The detachment to which the family belonged started back to the river, leaving the Seven Tons in the hands of the white men. One morning the leader called the husband, "Fete, he is a horse. We have more to cover skins or old moccasin ones."

Mr. Mr. Hunt," said the French-Canadian, suddenly. "The woman; she is not in the condition to walk in the snow." In this regard the hunter supported him. They would start, he said, or draw him. If it were to be first, it was by securing to the old rule, "woman and children first." Next they went.

So on back to Water. Eight days, falling from weakness, up and on again. Across the Snake in skin canoe, the channel running with ice. "The accused mad spirit," they named it, they left it on Christmas Day.

One morning the half-bred said to Hunt: "You go on; we catch game here today." He and the four-year-old walking; then the skeleton horse carrying the squaw with her infant in her arms, the two-year-old swinging in a blanket at her side. All unconcerned.

The baby brought good luck. Dogs, traps and traps were laid and caught. Next day the men insisted on celebrating; they feasted on the cold meat. It is recorded that they ate and danced. It was New Year's day, January 1, 1912.

The baby was on the fifth. He probably judged the whole country by the Seven Devils and so figured what the use. The conclusion is still reasonable.

The horse was stolen at the Dalles and was passed from history. The woman's terrific career was just beginning.

But that is another story.

Wendell Caldwell Egg Producers Association recently shipped carload turkeys from here valued at \$2,000.

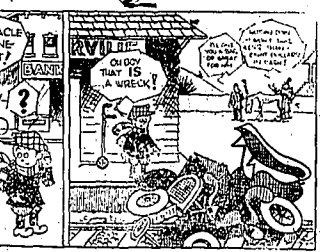

Plans Inauguration

Lieut. Col. U. S. Grant, Jr., U. S. Army Corps of Engineers, is chairman of the Committee on the program for the inauguration of Herbert Hoover as President next March.

THE FUMBLE FAMILY

HELP YOURSELF

By E. COURTNEY DUNKEL

DOSING FAILS TO DESTROY VERMIN

Many farmers and practitioners have believed it possible that spraying domestic animals with a mixture of kerosene and turpentine would protect their animals from external parasites. However, the verminous dealers, particularly in the country business, have played on this belief. The practice is to take the material in a jug, mix it with the material, and then proceed to spray the animals. Many believe that the parasites are either washed in this way or else that a complete coating is induced which makes the food unpalatable to the parasites and causes them to leave. Veterinarians have found that a mixture of kerosene and turpentine will not kill lice, ticks, and mites. The United States Department of Agriculture has issued warnings against these remedies, and many cases have forced the owners to cease drenching and using the verminous material.

Dr. Charles H. H. Dyer, "Director of Internal Medicine of the University of California," has issued a warning against the use of kerosene and turpentine. He says that these materials are highly toxic and will cause the death of the animal if used in large quantities. He also says that these materials will cause the death of the animal if used in small quantities.

Utah Turkeys Sold

The Utah turkey pool of 500,000 pounds, just sold in large eastern cities, was more than double that of last year. It filled 23 cars and sold for \$226,000. It was the only western pool that sold for cash and brought the highest unit price of any pool sold. Ten cars are yet to be sold. Mike White has brought 500 1/2 cents; 200 White hens, 35.5; Rocky Mountain turkeys and old toms, 27 cents a pound.

Proper housing is one of the most important factors in poultry keeping. See that hens are protected from winter draughts, and they'll repay by laying eggs you can turn into winter profits.

Best of cooking American fashions \$160,000 annually, which makes a nice little pot of butter, oil, where is your little chicken tonight?

Canning Now a Science

Dr. A. W. Hering, formerly associated with the National Association Laboratories at Washington, D. C., has collected all the data on the subject and published a book of 1200 volumes from the year 1850 to date, some of which were prepared from manuscripts prior to the Christian era.

In a communication quoted by Dr. Hering in the "Canning Trade" Dr. Hering says in part: "I am convinced that the art of preserving food by heat and holding it in a hermetically sealed container, scientists have been working on every aspect of it, and consequently have become a science. Scientists have not only done this, but they have done it in a way that is of great value to the world. Dr. A. W. Hering, formerly associated with the National Association Laboratories at Washington, D. C., has collected all the data on the subject and published a book of 1200 volumes from the year 1850 to date, some of which were prepared from manuscripts prior to the Christian era."

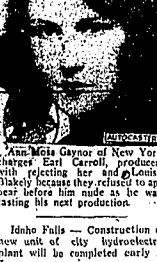

Impetus Given

(Continued from Page One)

planted on 12.1 acres. The work of Mr. Sower and County Agent Broadhead has been very effective during the year just closed and to further the enterprise of planting farm forest it is planned to hold meetings during the winter to increase the interest in farm forestry.

One of the biggest advantages of this as recommended by Mr. Broadhead and Mr. Sower is that the trees will do just as well on poorer soils and areas that are otherwise wasteland, bringing an added value to the farm. The landward counties now being planted will eventually bring in income from commercial sales as well as serving the various local needs of the farm.

Evenly killed, a who has been an actress since the age of eight months, is now in "talkies" - the youngest girl star of the screen to have a speaking part.

Idaho Falls - Construction of new unit of city hydroelectric plant will be completed early in January.

The intense cold of the latter part of last week is reported to have affected over streams around Silver creek above Shoshone which do not usually freeze due to the perpetual warm springs in which they find their source. For this reason, these streams have become frozen.

what it was in the fall when feeding began. Last week 24 carloads carrying 904 head of yearlings and weaner calves were shipped to Grand Island, Nebraska, where they will be finished for market. Fourteen more carloads were sent to Centa, Oregon. In this shipment were 207 cows and 88 calves. There are still about 2100 head of Hereford stock at the Weathers farm, all to be shipped soon for finishing in the yards at Grand Island.

BEEF CATTLE SOLD

The herd of beef stock fattening at Sand Springs farm at Weathers is now reduced to about half Grand Island.

GEESE STUPPED

A carload of 1800 geese and 500 ducks were shipped by L. Bailey of Wendell to Twin Falls last week where the birds were frozen in preparation for shipping to the California market. The geese had an estimated average weight of 12 pounds each, the duck being worth \$2000. Six dollars has previously sold ducks and geese this fall in connection with blind sent out by other growers of this county.
