How to Raise Poultry

By Dr. L. D. LeGear, V. S., St. Louis, Mo.

MUST-FOWL QUARTERS
BE FOUL QUARTERS?

A Little Time and Less Money Invested in Proper Housing Facilities Will Be Rapidly Repaid by Increased Production in Healthier, More Successful and Greater Egg Production.

Editor's Note—This is another story in a series of 52 stories on poultry raising written by the author of the book, "How to Raise Poultry," Dr. L. D. LeGear, V. S., St. Louis, Mo. The entire series will appear in this paper. Our readers are urged to read them carefully and clip them out for future reference.

"Hatched men," as the egg-raising avocadeille performer has his better half, but with a great many people who wish to raise poultry, the first question that would be hard to answer is, "How to raise chickens?" The answer is, "To raise them in the best manner possible." The first thing to do is to provide for the proper housing facilities. This is a matter of fact, for the hen is a creature of habit, and she will not produce to the best of her ability unless she is comfortable and secure in her quarters.

As a matter of fact, the hen is a creature of habit, and she will not produce to the best of her ability unless she is comfortable and secure in her quarters. The first thing to do is to provide for the proper housing facilities. This is a matter of fact, for the hen is a creature of habit, and she will not produce to the best of her ability unless she is comfortable and secure in her quarters.

My ideal poultry house, for the ordinary third roof, open front type, that admits plenty of sunlight and plenty of fresh air at all times without drafts and excess heat. It should be 20 to 25 feet wide by 10 to 15 feet deep. The height should be 6 to 8 feet in the rear, tapering to 4 to 6 feet in the front. There should be a trap door 10 to 12 inches wide, about the north wall, under the roof that should be closed during the winter months and open during the summer months.

The openings in the front of the house should be all the same height. The height of the openings should be 4 to 6 feet in the rear, tapering to 4 to 6 feet in the front. There should be a trap door 10 to 12 inches wide, about the north wall, under the roof that should be closed during the winter months and open during the summer months.

By having the north wall of the house all the same height, the height of the openings should be 4 to 6 feet in the rear, tapering to 4 to 6 feet in the front. There should be a trap door 10 to 12 inches wide, about the north wall, under the roof that should be closed during the winter months and open during the summer months.

Every poultry house should have a trap door 10 to 12 inches wide, about the north wall, under the roof that should be closed during the winter months and open during the summer months.

Every poultry house should have a trap door 10 to 12 inches wide, about the north wall, under the roof that should be closed during the winter months and open during the summer months.

Bride of Prunty

The couple recently engaged daughter of the Crown Prince of Sweden, is to become the bride of the Prince of Wales, according to reports from London.

HEINTS FOR THE HOME

By NANCY HART

The average rural family consumes almost five tons of food annually, or to be exact, 9,371 pounds, according to the figures of the United States Census Bureau. Of this amount the average man consumes 2,177 pounds, or slightly less than one-quarter of the family's food. (This small percentage was as much of a surprise to us as the fact that the average rural family consumes almost five tons of food annually.)

Clam Fritters
A Great Summer Dish
Mix a batter using 1 pint flour, 3 beaten eggs and 1 pint milk. Heat until full of lumps, then add 1/2 pint cut-up mince, clam and juice. Fry batter in your usual butter. Serve served with 1/2 pint stewed tomatoes.

Serving Left-Over Rice
Cold rice may be re-heated by steaming and treat as a substitute surrounded with carrots and peas.

All your danger is in discord;
Therefore be at peace henceforward,
And as brothers live together,
—Longfellow.

FAREWELL, SHERLOCK HOLMES:

Sherlock Holmes is dead. Sir Arthur Conan Doyle has again announced that he will never revive this world-famous character.

But not only is he dead in fiction—the Sherlock Holmes type of detective is now seen as doomed in fact.

Baffling mysteries are no longer to be solved by cleverness. They are to be unraveled by scientific experts relying upon standardization methods of precise identification.

Before the National Conference of Weights and Measures at Washington, William Souder of the Bureau of Standards, some weeks ago made predictions that would eventually take all the romance out of criminal hunting.

He showed how the most cunning criminal of the future will be discovered through super-microscopes that will bear his identity from a typewritten document, a pistol ball, a cartridge shell or a signature.

The coming out and dried methods may take some of the thrill out of the accounts of the exploits of detectives on the trail. But they may eventually reduce crime to a minimum by making discovery virtually certain.

MARION TALLEY'S MODEL FARM HOUSE

Not only has Marion Talley, famed opera star who announced she was giving up her career to enter agricultural activities, actually bought a farm, but she has decided to build a farm house to serve as a model for wives in the Kansas wheat belt.

Miss Talley's 360-acres near Colby, Kansas, are level, treeless, unbroken, with rich black dirt everywhere. It is ideal land for wheat.

In the immediate vicinity of her farm, Charles M. Talley, her father, and wooded her mother, Mrs. Talley. Soon Miss Talley will begin to build her house on the ground she has purchased, and it will be equipped with all modern conveniences, especially in the kitchen.

Miss Talley hopes she can prove to Kansas farmers that their wives might just as well have the comforts and labor-saving devices of their city sister. She plans to visit among them encouraging the comforts and conveniences of new housekeeping methods.

We want to wish Miss Talley great personal success in the operation of her farm. And express our admiration for her spirit of helpfulness in desiring to make her house a model for others.

"FARM RELIEF IN IDAHO"

(Hoard's Dairyman)
While the congress of the United States has been whittling away on political farm relief during the past eight years, the farmers of Idaho have been increasing their orders for butter tubs, cheese shipping boxes, and eggs cases.

In 1921 the quantity of butter shipped was 49 cases, cheese 85 cases, eggs 13 cases, and poultry 12 cases—a total of 159 cases. In 1922 the shipment of these products had increased to 547 cases of butter, 421 cases of cheese, 219 cases of eggs, and 196 cases of poultry—total 1,383 cases.

Concerning this increase in the production of food products, R. A. Smith, supervisor of agriculture, Union Pacific System, says: "No industrial development in Idaho in recent years has been marked as that of dairying and its allied industries and none has been more profitable to producers in the industry."

Significant with this increase in production is a corresponding increase in bank deposits in the state and in decrease in borrowed capital. In 1923 the total deposits of state and national banks of Idaho were \$81,012,600; in 1922 the total deposits were \$97,254,900, an increase of 20 per cent. The total loans of national and state banks declined from \$87,495,000 in 1923 to \$48,810,700 in 1922, or more than 45 per cent in 6 years.

Increase in bank deposits and decrease in borrowed capital, however, do not tell the whole story. Idaho farmers and others are not putting all their income into bank deposits and the retirement of mortgages. In 1924 agricultural steel received at cities and towns in Southern Idaho amounted to 1,524 tons; in 1927 to 6,486 tons. Furniture purchases increased from 591 tons to 1,838 tons during the same period. Lumber, shingles, and lath increased from 48,870 tons to 71,925 tons; agricultural implements increased from 3,278 tons to 8,929 tons; and gasoline and kerosene increased from 70,905 tons to 107,914 tons.

Coincident with this remarkable increase in dairy production were the cooperative efforts by the agricultural extension service of the University of Idaho; the state department of agriculture, and the Union Pacific System beginning in 1921. We congratulate the farmers of Idaho on their willingness to follow sound leadership in the solution of their problems and commend the practices that have made substantial progress for them. Other farmers who have not of encouragement."

The State We Live In

By RYON DEFFENACHE, State Treasurer

PROPAGANDA

If it were possible to bring about a concerted effort of our people to that end, the State of Idaho might be made famous for its natural marvels. These essays have called attention to the results of advertising by other States of things of interest, such as the Kentucky Caves, The Garden of the Gods, and the Grand Canyon.

The tourist drives along our highways within gunshot of interesting natural manifestations, not knowing of their existence. At the junction of the Twin Falls Highway with the road leading to the Balanced Rock should be a prominent sign pointing the way to that remarkable natural curiosity. This is but one of a thousand places which should be similarly indicated.

But a state is something more than an area having certain natural scenery and resources. In a higher sense, a state is a group of people bound together by mutual interests and a common history. The spots and trails famous in our past should be commemorated by monuments, and the relics of our early days should be preserved. In this work we are far behind our neighboring states.

In Montana the Lewis and Clark trail is clearly marked. Streams and mountains bear names prominent in early history and numerous monuments commemorate the heroes of past events.

There is in the state of Oregon an active and efficient organization known as "The Trail Seekers' Council" whose avowed purpose it is, "to encourage young people to search for and commemorate historical places, relics, traditions and personages; to arouse interest in, and increase knowledge of local history and to stimulate patriotism in young and old."

In eastern Washington the Monaghan statue in Spokane, the Columbia and Whitman monuments at Walla Walla, and a number of others, stimulate the love of its people for their state by keeping before them the images of past celebrities.

Idaho does not respond readily to movements along these lines. We have a history not less eventful and striking than that of our neighbors, but we are forgetting it. Our public monuments are few and far between. The equestrian statue of Washington by Ostner, at Boise, is our most striking memorial of this kind.

The present movement for the rehabilitation of the DeSmet Mission should have the hearty support of patriotic Idahoans. The trails of Lewis and Clark and of the Wilson Price Hunt expedition should be adequately marked, as should the spots prominent in the story of the discovery of gold.

The University of Idaho is making an effort to collect and preserve portable relics of our past; the State Historical Society at Boise invites correspondence with reference to interesting features of the state's history. Both of these public spirited enterprises should have the hearty support of our citizens.

Test Mental Telepathy by Radio Waves

NEW YORK—An effort to determine through radio broadcast whether there is such a thing as mental telepathy and thought transference is an experiment planned by the National Broadcasting company for Thursday night. A national network of radio stations will be used.

Arrangements have been completed for the exclusive service of 2000 radio stations. The experiment is being conducted by the National Broadcasting company for Thursday night. A national network of radio stations will be used.

After a brief introductory address, the first test will be for listeners to relax, clear their minds of other thoughts and sit with pencil and pad available. Then, at a given hour, he will concentrate on one thought. A minute later he will concentrate on another thought and the third and last thought will follow at another minute interval.

Radio listeners will be requested to write down their impressions received during the 30-minute period of attempted transference and communicate the writing to the National Broadcasting company for check.

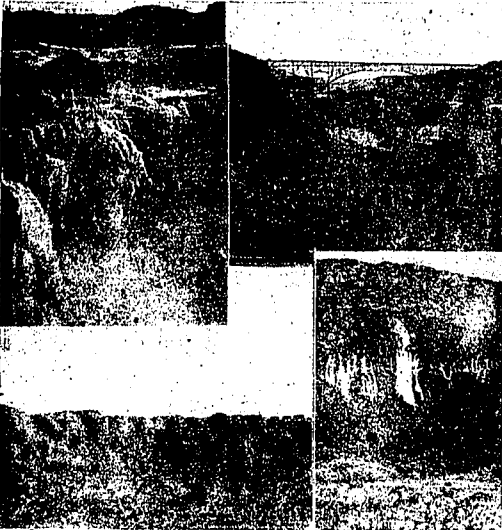

Filer Woman Dies Suddenly

Mrs. Charlotte Fleming, 35, of Filer, was found dead Tuesday morning near noon by Mrs. O. M. Bussey with whom she has visited recently. She was wearing a ring for her home, saying she would be back within a few minutes, when she did not return in half an hour. Mrs. Bussey went to look for her and found her lying on the ground.

Sunshine Bad For Ricketts

WASHINGTON—Figures held to indicate that lack of sunshine is the direct cause of ricketts children and that undernourishment is not a contributing cause. It has been compiled by the U. S. health department.

VIEWS ALONG OLD OREGON TRAIL IN THE TWIN FALLS SECTION

Upper Right—View of Thousand Springs. Daily output would supply New York City. Lower Left—Shoshone Falls, 52 feet higher than Niagara Falls.

Lower Left—One of Idaho's alfalfa fields. Average annual production 9 tons per acre. Idaho fruit east to west and along country over for the agricultural products raised and shipped to world markets. Beans, potatoes, fruit, sugar beets, dairy products, apples, peaches, pure water, and livestock—all proper on the Twin Falls tract.

Upper Right—View of Thousand Springs. Daily output would supply New York City. Lower Left—Shoshone Falls, 52 feet higher than Niagara Falls.

Lower Left—One of Idaho's alfalfa fields. Average annual production 9 tons per acre. Idaho fruit east to west and along country over for the agricultural products raised and shipped to world markets. Beans, potatoes, fruit, sugar beets, dairy products, apples, peaches, pure water, and livestock—all proper on the Twin Falls tract.

Just above the "Big Bridge," as it is called, is the Hansen bridge, the highest suspension bridge in the world, and between the two bridges is Shoshone Falls fifty feet higher than Niagara and often known of them and is willing to devote just a little from the heat-falls tract.

Nature has played many pranks down the canyon are afforded from near Jigglyman on the Old Oregon Trail. The Snake river in this part of the state flows from the manufacturers of Western Auto batteries have taken into consideration that most cars are equipped with extra driving light, cigar lighters, electric windshield cleaners and other devices, and Western Glants to meet these extra demands.

Wizard batteries have been sold by the Western Auto Supply company stores for many years and during this time we have supplied western car owners with what we firmly believe to be the most economical storage battery on the market.

Performance of these two popular makes of batteries has won for Western Auto, thousands of friends. Each year an increase in the number of automobile owners of the car and its equipment. Under capacity batteries soon lose their usefulness and break down under heavy strain.

"Additional savings can be made by trading in old batteries on new, fully warranted Wizard or Western Glant batteries. The saving will buy something else that will help to make the trip more enjoyable."

For Butler Wrappers call THE IDAHO CITIZEN—Phone 172.

Washburn Gives Points Needed in Good Battery

When buying an automobile battery the car owner should make sure that he selects one with and partly great enough to furnish properly his car and its accessories with ample and dependable electrical energy, advises H. W. Washburn, local manager of the Western Auto Supply company.

A storage battery should have sufficient capacity to furnish power for all of the electrical units of the car," says Mr. Washburn. "When it becomes necessary to buy a new battery, it is also unwise to replace the old one with one of the same size and capacity and it is recommended by the car manufacturer, rather than one which does not have sufficient capacity to supply to the needs of the car and its equipment. Under capacity batteries soon lose their usefulness and break down under heavy strain."

"Additional savings can be made by trading in old batteries on new, fully warranted Wizard or Western Glant batteries. The saving will buy something else that will help to make the trip more enjoyable."

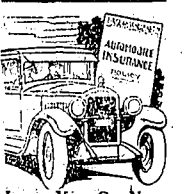

For Butler Wrappers call THE IDAHO CITIZEN—Phone 172.

FARM TROUBLES COMING FASTER THAN REMEDIES

Expert Points Out Evolutionary Changes Which Increase Complications of Agriculture.

WASHINGTON, D. C. In agriculture, during recent years, "basic difficulties have not been removed, where no new complications are continually being thrust into the picture," says Dr. Edwin C. Moore of the Institute of Economics, Washington, D. C. in a chapter on "Agriculture," written for the committee on recent economic changes of the president's unemployment conference.

Some of the difficulties which have developed for the farmer, Dr. Moore finds, include: Increasing competition for our export trade in livestock and cereals; Slow recovery of industrial nations formerly our customers; Changes in dietary habits, which in turn affect the demand for certain products; Immigration and other factors restricting demand; The spread of power farming, replacing draft animals and curtailing demand for agricultural products still further; There have been other difficulties, which affect not the demand but the supply side. Dr. Moore points out: Those difficulties are: More land coming into use and more intensive use of land under cultivation; Increased efficiency of farmers, arising from widespread education in efficient farm practice, which has led to increased productivity; Increased productivity of the farm worker, though farm machinery which overbalances the effect of workers leaving agriculture.

Difficulties in the field of distribution, also adversely influencing the price return to the farmer, include: Higher freight rates, partly offset by motor and water transportation; Increases in many handling and ceiling charges; Higher costs of labor, maintenance and facilities in the processing, storing, repacking and processing goods on their way to the consumer.

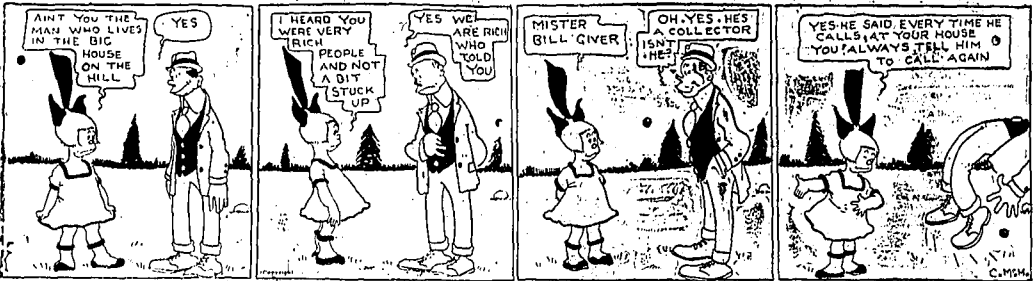

Since the world war, tractors on farms increased from 80,000 to 850,000. The number of horses and mules declined from 10,000,000 to 10,000,000. This change has released some 16,000,000 acres of hay and grain land and has upset long-entrenched methods of crop rotation—a problem as yet unsatisfactorily solved.

The tractor, furthermore, has speeded up the rate of progress on the farm. Power farming has permitted greater economies in the production of staple agricultural products. Dr. Moore says it is bringing about much larger-scale operations.

In wheat farming the "combine" or harvester-thresher has given economic advantage in farms of fifty acres and this, formerly, some profitable units ranging from 200 to 50,000 acres. "Combines" increased from 1000 in 1923 to 11,221 in 1927. This apparatus holds prospects of revolutionizing trends in wheat production, as savings of as much as 20 cents per bushel in production costs are made.

The "combine" and the accelerated harvest period have increased the need for storage, or supply, moisture damage and glut prices. Cooperative marketing in various commodities, has brought improvement in standardization, processing, transportation, market distribution and merchandising. It has been "signally unsuccessful" in the perception of the relation of supplies to prices and in the adjustment of such supplies upon a satisfactory price basis, and Dr. Moore doubts as to how far individual interests will be sacrificed to the welfare of the whole group. These movements condition "the later part of the organization effort, and their failure.

County Agent Gives Report on Lamb Pool

A report on the second lamb pool sent out by Twin Falls county agents two weeks ago was issued by County Agent R. E. Rossard Monday. The first pool and the second gained top prices on the market, according to statements received at the time. Another pool will be assembled and shipped before long, the agent said. The returns from the car of pooled lambs which sold in Omaha Monday, June 24th, are as follows: Local weight of lambs 20,230 lbs. Wt. at Omaha, 18,870 lbs. (1 lamb lost). Local weight of ewes 1,010 lbs. Wt. at Omaha, 950 lbs. Local weight of wethers 900 lbs. Wt. at Omaha, 920 lbs. Local weight of bucks 770 lbs. Wt. at Omaha, 708 lbs. Total 23,000 lbs. 21,450 lbs. Per cent shrink on lambs, 6.7. Total cost of shipping \$20.85 (foreign \$201.04; local \$2.50). Expense of clipping per C. W. T. \$1.23—net price on lambs per pound on our own local weights \$11.52 with the usual 1 per cent shrink. Net per cent received would have been \$11.85.

Detail of shipment follows:			
172 lambs, weight	12,250 lbs.	@ \$14.00	\$1,715.00
80 lambs, weight	6,550 lbs.	@ \$12.65	702.07
1 lamb, weight	60 lbs.	@ \$11.00	6.60
\$23,055.07			
6 ewes, weight	770 lbs.	@ \$ 8.25	6,352.50
2 ewes, weight	180 lbs.	@ \$ 3.00	5.40
\$ 63.52			
7 wethers, weight	850 lbs.	@ \$10.00	\$ 8,500.00
1 wether, weight	90 lbs.	@ \$ 7.00	630.00
\$ 9,130.00			
1 buck, weight	90 lbs.	@ \$11.00	\$ 990.00
2 bucks, weight	180 lbs.	@ \$ 8.00	1,440.00
2 bucks, weight	420 lbs.	@ \$ 4.00	1,680.00
\$ 3,110.00			
\$27,665.09			

EXPENSES: Foreign Freight (including terminal charges) \$ 219.34; Marine Insurance in Yards 22.72; National Meat Board Fund 15.05; LOCAL: Weighing 2.50; NET ON SHEEP \$2180.83

Man Injured By Explosion
Harry S. Cowling is recovering in Twin Falls county hospital from injuries suffered Monday afternoon when a spraying outfit which he was fixing to spray weeds on his farm southeast of Kimberly exploded. The spray machine did little damage, but the broken machine cut his face severely. Running out of spray, he retreated to the house and was sitting Monday evening and was sitting for a few days at the U. S. Stephens. It was during this operation that the outfit blew up, spraying Mr. Cowling with small bits of the metal.

Filer
Mr. and Mrs. H. W. Padgett arrived by auto from Elly, Nevada, Monday evening and are staying for a few days at the U. S. Stephens. Mr. Padgett is a brother of Mrs. G. G. Williams and daughter of Mr. Stephens.

Candidate

Mrs. Frank Woodrow Sayer of Boston, Mass., daughter of the late President Woodrow Wilson, who is reported will soon be "nominated" as a candidate for United States Senator.

A notice of general dining was given for the Frank J. Keenan court Friday on the 3d. The court was completed by October 1. Three were these other bidders: friends of his who had gathered to wish them well in their new work at Rome. Friends of Mr. and Mrs. Merwin Wallace will be pleased to learn that a baby girl was born at their home in Arco, June 24. The mother, prior to her marriage was Margaret Potter, daughter of Mr. and Mrs. G. W. Potter.

On Sunday evening members of the Elmer Epworth League motor to Wendell and conducted services at the Wendell Methodist church. Rev. C. E. Helton of Wendell at the Sunday evening service. The Methodist Ladies Aid met Tuesday afternoon at the Elmer Hawkins president over the business session.

Contract For Siphon Is Let

The Western Engineering Corporation of Seattle was awarded the contract at Shighone Tuesday for construction of a new siphon on the South Gooding tract. It will be located about two and a half miles south of Gooding, replacing the present wood siphon which has been in need of replacement for some time. The low bid was \$19,500 for 3600 feet. The new siphon will measure 78 inches in diameter compared with 60 inches for the present one, providing for a

Dairies Are In Good Condition

Dr. F. T. Harris, city dairy inspector for Twin Falls, extended to private herds during the last month, he reported to the city council Monday night. Heretofore only those provisions which for unsuitable use have been inspected on the plan. The herds are in good health and the inspection showed no unsatisfactory conditions, he said.

The Arrington, Cleveland, Dietrich (Gut), Griffin, Kaylor, Hemphill, Stearns, Touchback and Thurg districts were reported, and the T. E. Jones, Jersey, Model Jones, Model Dairy, Kilder and Huter, Kilder and Young distributors were included in the list. During the last month the inspector reported that 300 head of cows, 172-cattle, 84 veal and 41 lambs had been slaughtered for the local meat market.

Dairy inspections by Dr. F. T. Harris, city dairy inspector for Twin Falls, extended to private herds during the last month, he reported to the city council Monday night. Heretofore only those provisions which for unsuitable use have been inspected on the plan. The herds are in good health and the inspection showed no unsatisfactory conditions, he said.

Small Profit

Specials, when offered by a grocery store, are oftentimes termed "bait" and in reality that is what they are. The average grocer who advertises or offers specials on certain days is proceeding on the theory that if he can pull the people in to his store on these few items, he will make upon his price sacrifice by selling them a lot of other items at a big profit. The O. P. Skaggs Store does not follow this theory. It offers profit to each item, enabling their patrons to save every hour of every day in the week or at any time they need to buy foods. This surely is fair to the buying public.

Less Potatoes Better Prices

Estimates of potato planting reductions seem to promise a more satisfactory market for Idaho spuds this coming season than last year, according to local dealers and growers. The figures given out by the Bureau of Irrigation district show 6800 acres planted on the south side of the tract as against 6860 for last year. For Printing Phone 172.

COUNTY PROSPEROUS

The close of the fiscal year Saturday for the United States shows a balance of \$1,155,000,000 in the treasury and the public debt reduced to \$1,051,000,000. The reduction during that period was \$274,000,000 compared with a reduction of \$207,000,000 last year. This indicates a prosperous condition for the country in the opinion of Secretary of the Treasury Andrew Mellon.
