WHEN A BOY KNOWS MORE
THAN HIS FATHER

Sometimes a boy does know more than his father.

One would have been a very different story if Abe Lincoln, age sixteen or so, had been guided by the wisdom of Thomas Lincoln, age thirty-six.

"Now Abe," we can imagine him saying, "don't waste time reading those books. Reading never does me any good, and what was good enough for me's good enough for you."

Lincoln knew more than his father. It was a divine dissonance that led him to close his ears to the man who had brought him into the world, and upon his heart to the vision that was to help him conquer the world.

The boy who has not some firm convictions and a willingness to defend them, even against the arguments of those older than himself, is not likely to amount to much.

But there must be convictions, not mere prejudices, not selfish impulses or passions.

I know two men who "know more" than their fathers.

One boy is the office manager of a large manufacturing concern and his salary is \$10 a week.

"Better go on in school," said his father to him when he was seventeen years old. "Better go to college; better not all this education you can waste you have the chance."

But the boy quit school and went to work.

"You are that man!" said the president of his concern to the other day. "There is a man who might have become general manager of this business if he had had a college education. His salary might have been \$20,000 a year instead of \$10,000. He respects his work, and his father's advice."

He "knew more" than his father. But his boyish obstinacy is costing him \$18,000 a year.

"Keep yourself clean, my son," said the father of another boy. "You'll never regret it. And some day you'll thank me for this."

But the boy knew more than his father. He knew that every young man who is worth his salt must know his wild oats.

So he sowed right merrily.

I saw him the other day. He came to me about getting a job.

"I could not give him a job; no man could. God knows what will become of him."

YOUTH is the mainspring of the world.

Its insurgency, its impatience, its eagerness to try the untried and do the impossible, drives the world forward in spite of the conservatism of age.

Fortunate are those of us who recognize the divine importance of youthful exuberance and conservatism, and yet know how, gently and appreciatively, to temper it with the ripper judgment of added years.

WENDELL DAIRY GROUP ELECTS

About 100 members of the Wendell Cream association met in special meeting last week and re-elected Robert Edwards and C. E. Shoup as directors for two-year terms, with J. W. Condie for a three-year term. R. W. King and R. O. Ward are holdovers. Ward was endorsed for reelection as the Wendell representative on the Jerome Cooperative creamery board.

The association went on record in favor of a higher tariff on butter substitutes. Each man present was urged to write to Idaho's congressional representatives to request their support for this.

Manager Roy D. Smith of the Jerome Cooperative Creamery told the Wendell dairymen that butter prices have recovered from 24 to 36 cents a pound and that the milk level will not be below the average 10 cents a gallon at this time. It will continue upward to a higher point than 10 cents at present.

HANSEN MAN IS REELECTED BY T. F. DAIRYMEN

Resolutions Demand Higher Oleo Licenses and Canein Tariff to Protect Dairymen of Gen State.

Clyde Walker of Hansen was reelected for a five year term as director on the Twin Falls dairymen's group at Filtr and three resolutions were adopted. No one opposed Mr. Walker who has served for a year in this office of the late E. M. Woods of Kimberly.

The resolution committee reported through F. L. Atkins. The first cent condoleances to President Gustav Kuehn of Idaho who is in the hospital.

The second reaffirmed the dairymen's stand in the campaign for encouraging federal use of butter instead of substitutes. The bill passed by the legislature last year was declared ineffective because oleo sales had increased more than butter sales. Montana's law calling for a higher license than the 400 Idaho licenses on retail oleo don't work.

The third resolution called for the repeal of the law which allows dairymen to sell their milk at a lower price than the price paid for it.

The dairymen's group also passed a resolution to provide for a 10 cent tariff on oleo milk voted down after several had said it would be impossible to get such a tariff.

An amendment to provide for a 10 cent tariff on oleo milk was voted down after several had said it would be impossible to get such a tariff.

The dairymen's group also passed a resolution to provide for a 10 cent tariff on oleo milk voted down after several had said it would be impossible to get such a tariff.

"Hands Up" GIPSON THINKS FRUIT DAMAGE HERE'S LIGHT

No Evidence of Killing So Far, But A More Thorough Test May Reveal Effects of Frost.

Preliminary tests made by Edgar V. Gipson, district horticultural inspector, indicate that no particular damage was done to fruit by the light frost which fell during the week beginning January 17. He said there seemed to be no evidence of serious damage by cutting open buds, peach, cherry and apricot trees, and upland orchards.

Mr. Gipson said that the frost which fell during the week beginning January 17. He said there seemed to be no evidence of serious damage by cutting open buds, peach, cherry and apricot trees, and upland orchards.

BEAN EXPORTS TAKE SUDDEN UPWARD TREND

Farmers Reconciled to Low Price and Begin to Unload. Inspectors Increase Greatly This Year.

Bean shipments began to pick up the first of last week presumably due to the farmers' decision of unloading the produce in anticipation of higher prices that do not materialize. Edgar V. Gipson, district horticultural inspector, reported that he had been unusually busy inspecting the outgoing shipments. His work in this respect was increased to an additional extent because more beans are being loaded for the inspection service.

This latter, he said, is largely due to the greater proportion of number two and off-grade beans in the 1929 crop. Having received a minimum of 15 cents a pound last year and with expectation last fall of receiving at least as much for the present crop, farmers found themselves in a still more unfortunate situation because of the inferior quality to get an accurate accounting of the quality of their beans.

Inferior Beans Increase

Mr. Gipson has been inspecting the beans shipped by local shippers to brokers in central distributing points who hold the product for eventual marketing. Those inspected have gone directly to market from the local shipping points.

The greater proportion of second-grade beans this year is indicated by the fact the price differential between number one and number two beans has been from 10 to 20 cents on the 1929 crop, the inspector stated. The present differential is 35 cents.

Bean prices had prevailed for several weeks at \$4.60 for number one and \$4.25 for number two but a sharp drop in prices occurred, putting number one at \$4.25 and \$4.00 for number two. Some local dealers were reported unloading beans for some time preceding the stimulation that started last week. No particular reason was given for the increased shipments, dealers said.

Weather Belies Mr. Ground Hog

Following a rain which lasted through Wednesday night, the sun in this section has practically all day springing and the warm rays of a spring sun this day belied the predictions of Mr. Ground Hog Sunday that six more weeks of winter were in store.

HAYES MAKES STATEMENT TO CANAL MEN

Urges Cooperation Through-out the System and Says This Project May Provide New Devices.

Manager John E. Hayes of the Twin Falls Canal Company has been the increasing number of trained men drafted into the cooperative association to help out agriculture on an economically sound basis. At the same time, Hayes has reached its peak of development. Atkins said the number of people who are not willing to pull out confidence in their cooperative leaders is decreasing every year and that this has made possible the cooperative advancement that has been made.

Another Dig Movement

Another big movement has been the increasing number of trained men drafted into the cooperative association to help out agriculture on an economically sound basis. At the same time, Hayes has reached its peak of development. Atkins said the number of people who are not willing to pull out confidence in their cooperative leaders is decreasing every year and that this has made possible the cooperative advancement that has been made.

Before presenting the resolution drawn by the resolution committee Atkins spoke on the farm boys' method of financing. He said Twin Falls county people and lowered him with various positions including that of representative wheatearers here on the northwest regional association. He said that the boys' method of financing was the thing in actual operation to pay much attention to the boys' method.

He reminded the dairymen that the producers can get into the cooperative association and secure a federal farm loan. He said that the boys' method of financing was the thing in actual operation to pay much attention to the boys' method.

ATKINS PRAISES SINCERITY OF FARM LEADERS

Declares It Biggest Forward Movement of Cooperative Agriculture and Is Bringing Success.

Increasing confidence on the part of association members in the leaders of their organization is the biggest forward movement in cooperative agriculture today declared Frank L. Atkins, field, at the annual meeting of the Twin Falls County Dairymen's association at Filtr, Tuesday.

He said this in answer to an inquiry about how the directors of the dairy cooperative economy have been the increasing number of trained men drafted into the cooperative association to help out agriculture on an economically sound basis. At the same time, Hayes has reached its peak of development. Atkins said the number of people who are not willing to pull out confidence in their cooperative leaders is decreasing every year and that this has made possible the cooperative advancement that has been made.

THE IDAHO CITIZEN

A weekly newspaper published on Friday of each week at Twin Falls, Idaho, by the Twin Falls Printing Company.

Entered as second class mail matter at the postoffice at Twin Falls, Idaho, under the act of March 3, 1879.

TWIN FALLS PRINTING CO., 202 Second Avenue North, Twin Falls, Idaho. Phone 172.

Effective February 1, The Citizen resumed once a week publication. It has been determined that weekly publication in this field is the most satisfactory for advertisers, and it is hoped, for readers.

Publication date will be Fridays, the paper going to press at noon Thursdays.

Nothing will be sacrificed from the readers' standpoint under the new arrangement, and all subscriptions will be adjusted on an equitable basis.

The Citizen now will be better than ever prepared to care for its constantly increasing commercial printing department and promises a bigger and better newspaper.

Opportunity is here taken to express high appreciation to the splendid subscription clientele of this newspaper, to the consistent and loyal advertisers, and to patrons of The Citizen's job department.

Nineteen-thirty holds much promise for the Citizen and for the agricultural region of which Twin Falls is the center.

LYING ADVERTISEMENTS

The Federal Trade Commission has taken another step toward truth in advertising. It has obtained from a prominent cigarette manufacturer the promise not to use any longer a class of misleading statements to the general effect that smoking its particular brand of cigarettes promotes health and helps women to keep slender.

The advertising complained of was particularly flagrant. "Testimonials" signed by actresses and motion picture stars were published, which were themselves untruthful and, in some cases, the supposed authors had never been before they were published, although they accepted money for the use of their names. The actresses, the Commission reports, "were not cigarette smokers and did not stay slender through the smoking of the respondent's cigarettes."

"In truth and in fact," says the Trade Commission, "health and vigor to men, slender figures to women, and reduction of flesh in all cases, will not necessarily result from the smoking of respondent's brand of cigarettes."

Whatever may be anyone's personal ideas on the subject of cigarettes, the fact remains that their use has become so welsh universal that nobody any longer takes seriously the occasional efforts to punish either the sellers or the smokers. But the claim that cigarette-smoking is beneficial to health is absurd on its face, and to attempt to uphold such a claim by lying "testimonials" is a kind of sharp practice which makes one wonder how much truth there is in the contention that modern business, especially "big" business, is conducted on higher standards of honor than it once professed.

EVERYDAY MIRACLES

The younger generation accepts as commonplace things which those who can remember the time when there were no telephones, no electric lights, no phonographs, no automobiles, no motion pictures, no airplanes, no radio, no submarines, still regard as somewhat miraculous, when they stop to think about them.

Fifty years ago when anyone suggested the possibility of any of these things the universal answer was "It can't be done." A hundred years ago if anyone had been rash enough to predict any of them society would have looked him up in a madhouse for his own protection. Two hundred years ago they hanged men and women who were merely suspected of doing things which are matters of everyday experience now. A hundred years before that the Church was excommunicating and sometimes executing men for daring to suggest that such things were possible.

Suppose, for example, that someone had reported to the Spanish Inquisition to the witch-finders of Salem that some man was sitting in a chair in New York, in the space of forty-five minutes, first talked with a man in London, then sent a message through the air to a point near the South Pole, from which the message was repeated to another man who was at that moment flying like a bird a hundred miles away and a couple of miles up in the air; that the man in the sky had replied to the message; and the man in New York had received the reply, all in three-quarters of an hour.

Witchcraft! Sorcery! Black Magic! The pious authorities of our earlier day would have seen the handiwork of the Devil in such a manifestation as that which happened on January 22nd, when Captain Ralphy called up London on behalf of his friend Admiral Byrd to inquire what assistance the British whaling fleet might give in breaking a way through the ice floes to let the Antarctic explorer's relief ship get through, then passed the information on to the Admiral. Yet the news report of this occurrence passed almost unnoticed.

We have got out of the habit of attributing such things to either Divine assistance or the machinations of the Devil. We boast of them as achievements of the human mind. But the greatest men of science today affirm their belief that the human mind derives its almost limitless power from some source which all of the experiments have not disclosed.

We are performing new miracles so fast that it seems as if there must soon be an end to human progress. Science says "no" to that. Mankind has hardly begun its upward flight in the conquest of matter, time and space. In the laboratories new discoveries about the properties of matter, far beyond any that have yet been applied to human needs, await the engineers who will translate them into machines and devices which will enable us to ascend even higher toward the stars of our ultimate destiny.

The new "baby" automobile-promised for next Summer will be only five feet from the ground with the top up, it is reported. Not low enough. What this country needs is a car that can run under a ten-ton truck that is hogging the road.

WHAT OTHERS SAY

Reading some Idaho papers it is to laugh. 'Spoke it's the same everywhere. Last week we laid said all papers which contained editorial allusions to the prohibition fight. The writer is fairly well acquainted with Idaho editors, their life-records, follies and habits. One very prominent paper contained a very virtuous editorial severely exhorting anybody who would not subscribe to the Volstead act that paper there are the gentlemen who are the editors of the Idaho Citizen. I have read the editorial and between the three the editorial column is written. All three write dry and live. Another paper contained similar matter and the editor there is a very temperate gentleman, just like the three above described, probably never intoxicated in his life and never known to refuse a drink. Another—but why say the last two are typical.

Why can't editors be honest? Why can't editors possess the courage of their convictions? Every American woman the name believes in the enforcement of the law. But that belief does not preclude an editor of opinion that the law itself is not a good law. Of course it is a fact that the minute such an editorial expression is made, that instant the organ becomes classed as a "wet" paper. The editor is unfortunately usually true. That is merely a result of the intolerance of the temperance.

We'd dearly like to see every editor with about a quart of fabled truth serum that was to revolutionize the course of justice a year or so ago. Think of it! What a revolution such an inoculation—if effective—might produce in our job-and-subject alone.

VOTE TODAY

Voters of Independent school district No. 1 will go to the polls today to determine whether or not bonds in the amount of \$20,000 shall be issued to complete the present high school building.

Despite the fact that taxes are notoriously too high, and the voting of new bonds certainly will not reduce taxes, a sane and business-like analysis of the proposition seems to warrant a favorable vote on these particular bonds.

School facilities must be provided and future needs must be anticipated. The school board is asking the taxpayers to permit the construction of additional quarters, which the promise will be done economically.

If anyone opposed to the bonds issue will just inform himself of the present needs, it is believed he will very quickly realize that the issue should be unanimously supported.

Go to the polls today and vote for what the school board asks.

THE NEED OF DIRECT LEGISLATION

(A Contributed Editorial by James D. Whelan)

The practice of taking referendum votes by the United States Chamber of Commerce, the Idaho Chamber of Commerce and the Twin Falls Chamber of Commerce on matters of interest to their members and to the welfare of the nation, state or community cannot be too highly commended; as it promotes discussion and expression of opinion on the part of participants not otherwise possible. Both friends and foes of the Baldrige-Wood road program today declare, no doubt sincerely, that they desire to get a complete expression of the will of the people on the proposed plan. This is commendable, and, while the machinery for taking such expression is limited, it should be used as far as possible, and doubtless will be.

All of which recalls the fact that we should have some form of local initiative and referendum whereby all legal voters including the great mass of citizens not affiliated with any organization, might on occasions like the present, express themselves in an authoritative way. The word "authoritative" is used advisedly, since a purely advisory referendum, while effective at times, usually arouses less interest than one where the voters feel that their decision carries with it the force of an irrevocable mandate.

In some states, where due care was not taken to see that only those legally qualified might sign petitions for initiation or referring of measures, an undue number of irrelevant proposals have on occasion been submitted at general elections to the confusion of voters. But where laws were so drafted that a limited number of really vital questions were submitted at special elections there has always been really intelligent discussion and voting. It is not here intended to indicate any opinion either way in regard to the road program under consideration or to suggest that action on the same should be, or should not be, taken until a new legislature has been chosen. The point is: direct legislation would be very handy at this time to determine after a reasonable period of discussion what the people want.

A few years ago, Democrats and Progressives both favored this sort of system, but the Progressive party has faded and the Democrats have recently apparently lost interest in it. Still, one cannot help but wonder if the plan works well, as it clearly does, in various organizations in Idaho, why a conservative form of it might not operate if enacted into law. Such law cannot be enacted in time to meet the present emergency, if it is such, but there will be other emergencies and crises from time to time, and the providing of a safety valve in anticipation of these might be well.

(January 30, 1929)

Uncle Si Tinklepaugh says Ruth McCormick can go to the Senate if she wants to, for all he cares, but it seems to him there's enough old women there now.

PARROTS

Parrots have come in for a lot of unfavorable publicity lately because of a strange disease which has attacked several parrots and has been attributed to infection brought by these birds from South America. Physicians and health officials say there is no danger of catching "parrot fever" from a bird which has been in the family for any considerable time. The parrot is probably the most intelligent of all birds, and the fact that it can be taught to talk makes it almost a human companion. And, like human beings, parrots develop various attachments to such a degree that they often play away and die when separated from their particular friends. Don't let anybody tell you parrots just learn a few parrots are suspected of being disease-carriers.

FEMINISTS

Ganna Walicki, the Polish singer who has been married to two American millionaires, has convinced the U. S. Customs Court that a married woman can have a legal residence separate from that of her husband. That same Ganna from paying duties on French furs imported from her Paris home, thought her husband lives in Lake Forest, Illinois. This decision is hailed as a great victory by the ultra-feminists, whose purpose in life seems to be to break up the American home and put married life on the plane of the cheapest flit life. Because this "modern" idea runs contrary to the most deeply ingrained views of the majority of it is a bit of pity, which is probably what Ganna and the ultra-feminists want. But it is by no means a foregone conclusion that the American family life is in danger. Home and babies and a husband with a good job are what the overwhelming majority of American girls still want in marriage.

STYLE

The fur coats and silk stockings worn by the American stenographers who accompanied the delegates from this country to the Naval Disarmament Conference at London, made a greater impression on English newspapermen than anything else about the delegation. London's smartest working girls dressed "smartly." The young women from the different delegations in Washington who were taken over to do the clerical work for the delegation were not picked for their beauty but solely because they were the most efficient. They were all well dressed and "smart" in manner and appearance that we do not realize that nowhere else in the world do any of the ultra-fashionable and actresses on the whole wear the latest styles in clothes.

LINCOLN

Appreciation of Lincoln's greatness is felt today throughout the Nation both North and South. In his own time even the South did not appreciate him. Dr. Gerrit Shaw, the distinguished Editor of the Review of Reviews, brings this out graphically in a new book which is the most complete collection yet made of the newspaper clippings, pamphlets and other printed representations of Lincoln during his life to fame and his tributes of the White House.

LIGHT

Fifty years from now the world will regard the discovery made in our time about light as one of the most scientific advance of all time. Light cures disease, cures cancer, cures produced in various ways by artificial means. Ordinary window glass keeps the heat of the sun out of the house. New kinds of glass let in the sun's rays even modern houses will be equipped with the new glass and illness will be less common.

Light has brought comfort of both mind and body. An English writer has proved that exposing young pigs to ultraviolet light for ten months multiplies their farrow-meat at 25 per cent. A French scientist recently fed the straw-colored fruit of the half the normal time, using artificial light. They cost \$5 apiece, but the time will come when they will grow in the North by artificial light as cheaply as now in Florida.

Most cures on sale are in the hands of the "What the Well-Dressed Automobile Will Do for You" man.

Indigestion Relieved QUICKLY. The Fully Vegetable Pepsogen is a powerful active in its digestive action. Offers one of these little pills after meals or at bedtime will do wonders, especially when you have overindulged or are troubled with constipation. Remember they are Dr. Carter's Little Pills. Small, young and old can take them. All Druggists See and the real value of Carter's Little Pills.

This is the Age of Woman's Success in Business

Mrs. Sarah Barclay
in Forest

Miss Mary Dillon

Mrs. Alice Foote MacDonnell

Mrs. J. K. Bowman

Mrs. George R. Van Nabe

Mrs. Therese Helman

Mrs. Marie Ryan

Mrs. Eva Le Gallienne

Here are eight women who have proved their equality with men by their success in operating great New York business enterprises. Mrs. Van Nabe heads one of the largest theatrical establishments in the world. Mrs. Marie Dougal operates a chain of high-class restaurants. Mrs. Dillon is President of the Brooklyn Borough Gas Company. Mrs. Ryan's business runs to \$100,000 a year. Mrs. Le Gallienne manages New York's most successful theatre. Mrs. Helman heads the Theatre Francaise, which produces the city's best plays. Mrs. Bouffant is president of a large advertising company. Mrs. De Forest manufactures varnish on an international scale.

KNOCK

MISCELLANEOUS DELICACIES

RICE CUSTARD SUPREME

1 lb. shelled coconuts
2 eggs
2 cups milk
1 teaspoon salt
1 cup sugar

1-2 cups cooked rice
1/2 teaspoon vanilla

Beat the eggs thoroughly, yolks and whites together. Add the milk, salt and sugar, stir in the rice, coconut and vanilla, and turn in a hot baking dish. Place in a pan of hot water and bake twenty to thirty minutes in a moderate oven—about 350 degrees F.

MARMALADE FRENCH TOAST

2 eggs
1/2 teaspoon salt
1 tablespoon sugar
1 cup milk
6 slices bread 4-5 inch thick
Orange marmalade

Warm—put hot. Add vanilla and dissolved jacket tablets. Turn at once into freezer can, let stand in a warm room until firm, then cool and add eggs, whipped. Pack in ice and salt and freeze.

APPLE MARMALADE

6 oranges
3 lemons
9 apples
9 cups sugar
3 cups water

Pare and slice apples and cover with lemon juice. Wash oranges, and cut into thin slices. Cook slowly on rim of hot water and steam for about 1 1/2 hours. Strain lemon juice into sterilized glasser or jars, and seal when cool.

COFFEE PUNCH

An unusual beverage which never fails to delight guests in any season.

THE YOUNG LADY ACROSS THE V

Heat eggs; add salt, pepper and milk. Spread bread with orange marmalade; put slices together to make sandwiches. Spread butter on one side until softened, and cook on a hot, buttered griddle until deflated; browned; turn, and brown on other side, and serve. (1/2 loaf; fat or lard.)

Twin Falls County Rejects Baldridge Highway Proposal

Governor Threatens Special Session of State Legislature

Increase of the tax on gasoline one cent per gallon will be the principal business of a special session of the Idaho legislature, it is declared by Governor H. C. Baldridge in a statement issued today in connection with the proposed "speeded up" highway program. The reason for this increase, the Governor pointed out, is to raise funds to match more than \$1,000,000 of cooperative funds which are available this year and which will be lost if not matched by the state.

The legislature will be asked to do other things in connection with the whole program but they are in the nature of amending existing laws. A law already exists authorizing the state treasurer to issue treasury notes in authorization of gasoline tax. All the Governor is asking the legislature to do in this connection is amend that law so it will be workable; that is, so any treasury notes issued may be paid back over a five-year period instead of a six-months period.

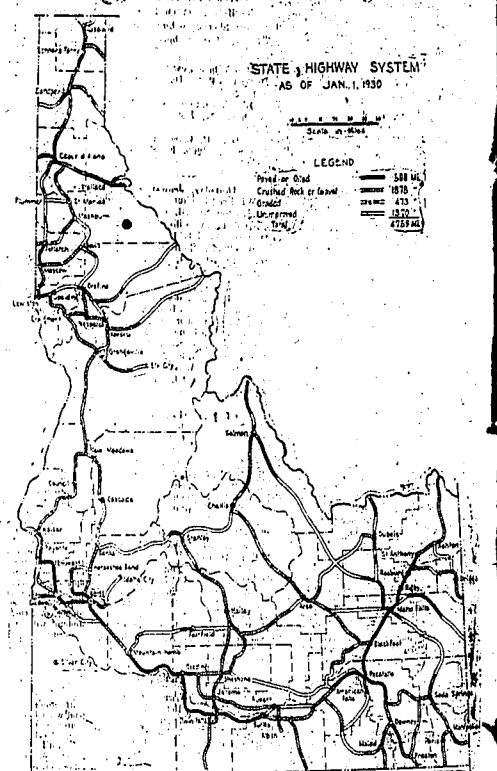

The legislature cannot authorize the issuance of treasury notes covering the larger or "speeded up" part of the program. The attorney general has held that for the law makers to do so and pledge the full faith and credit of the state behind them would be unconstitutional.

This part of the program, however, does contemplate asking the legislature to pass an act which would submit to the vote of the people at the next general election, November 1939, the question of whether or not this part of the program should be continued. So that the special session, the Governor points out would, if called, make financial provision only for the year 1936.

If the "speeded up" program is carried through the five-year period counties and highway districts now levying a property tax to raise funds to match federal aid, will be relieved of this tax and all the new roads built by the state will be taken over and maintained by the state.

At present there are 4250 miles of highway in the state system. The following table gives the construction status of this mileage now and as it will be January 1, 1936:

	Jan. 1-1930	Jan. 1, 1936
Miles paved or oiled	688	2742
Miles crushed rock or gravel	1878	1032
Miles graded (not surfaced)	478	0
Miles unimproved	1320	486

2 GROUPS VOTE AGAINST ROAD BOND PROJECT

THREE GROUPS CONSIDER NEW ROAD PROGRAM

Twins in Ada county and some others which have no bonded indebtedness.

The Buhl Rotary club considered it unfair for Twin Falls to help build other roads in other popular counties after it has built its own roads with its own exclusive funds. If the state would take over this county's bonded indebtedness, the Buhl men agreed, this county would support the program because the heavy tax burden would then be more evenly distributed, but Governor Baldridge and Commissioner Joe Wood don't intend to do that. Hence Twin Falls county's attitude is: "We have bonded ourselves heavily to build roads here and to support the Baldridge-Wood program would simply be taxing ourselves all over again to build good roads in other counties that have not done so."

Commissioners of the Twin Falls highway district and the Buhl Rotary club voted the last night to vote unanimously against the Baldridge-Wood highway improvement program. The highway district will not approve tax millage, three million, one million nor any other large amount for that purpose, declared J. T. Windle who was chairman of the board last night.

He and the other two commissioners, Robert Ray, chairman, and J. E. Winsa, voted down all three propositions included in the program and also voted the recognition of a special session of the legislature to consider the matter.

Reasons given for this action were identical with those expressed by the Buhl Rotary club. Twin Falls county, officials of both groups said, has been bonding it heavily during the last few years for road construction and virtually every mile of main road in the county is now either oiled or hard-surfaced. Moreover, the county has only a few dollars of unexpended Ada as the heaviest taxpayer tax authority in the state. Because this county is not bonded, it gets back only a small proportion of the money paid out.

According to Judge J. M. Shank, secretary of the Buhl Rotary club, Twin Falls county paid \$450,000 in gas tax money two years ago but received back only \$15,000. Idaho county paid \$25,000 in two years and got back \$75,000 for road building purposes.

He said the Buhl highway district has bonded itself for \$600,000. The Buhl highway district has bonded \$400,000. Twin Falls highway district has bonded \$1,250,000 for building roads. Two million dollars have been expended in the highway system here and the county consequently has nothing to gain by voting for the Baldridge-Wood program.

World Help Isolated Counties

Windle, chairman of the Buhl Rotary club, said he is willing to help some of the isolated counties get bonded roads but it is not willing to build roads itself with taxes to build

roads in Ada county and some others which have no bonded indebtedness.

Moreover, the county has only a few dollars of unexpended Ada as the heaviest taxpayer tax authority in the state. Because this county is not bonded, it gets back only a small proportion of the money paid out.

According to Judge J. M. Shank, secretary of the Buhl Rotary club, Twin Falls county paid \$450,000 in gas tax money two years ago but received back only \$15,000. Idaho county paid \$25,000 in two years and got back \$75,000 for road building purposes.

He said the Buhl highway district has bonded itself for \$600,000. The Buhl highway district has bonded \$400,000. Twin Falls highway district has bonded \$1,250,000 for building roads. Two million dollars have been expended in the highway system here and the county consequently has nothing to gain by voting for the Baldridge-Wood program.

World Help Isolated Counties

Windle, chairman of the Buhl Rotary club, said he is willing to help some of the isolated counties get bonded roads but it is not willing to build roads itself with taxes to build

roads in Ada county and some others which have no bonded indebtedness.

The Buhl Rotary club considered it unfair for Twin Falls to help build other roads in other popular counties after it has built its own roads with its own exclusive funds. If the state would take over this county's bonded indebtedness, the Buhl men agreed, this county would support the program because the heavy tax burden would then be more evenly distributed, but Governor Baldridge and Commissioner Joe Wood don't intend to do that. Hence Twin Falls county's attitude is: "We have bonded ourselves heavily to build roads here and to support the Baldridge-Wood program would simply be taxing ourselves all over again to build good roads in other counties that have not done so."

Commissioners of the Twin Falls highway district and the Buhl Rotary club voted the last night to vote unanimously against the Baldridge-Wood highway improvement program. The highway district will not approve tax millage, three million, one million nor any other large amount for that purpose, declared J. T. Windle who was chairman of the board last night.

He and the other two commissioners, Robert Ray, chairman, and J. E. Winsa, voted down all three propositions included in the program and also voted the recognition of a special session of the legislature to consider the matter.

Reasons given for this action were identical with those expressed by the Buhl Rotary club. Twin Falls county, officials of both groups said, has been bonding it heavily during the last few years for road construction and virtually every mile of main road in the county is now either oiled or hard-surfaced. Moreover, the county has only a few dollars of unexpended Ada as the heaviest taxpayer tax authority in the state. Because this county is not bonded, it gets back only a small proportion of the money paid out.

According to Judge J. M. Shank, secretary of the Buhl Rotary club, Twin Falls county paid \$450,000 in gas tax money two years ago but received back only \$15,000. Idaho county paid \$25,000 in two years and got back \$75,000 for road building purposes.

He said the Buhl highway district has bonded itself for \$600,000. The Buhl highway district has bonded \$400,000. Twin Falls highway district has bonded \$1,250,000 for building roads. Two million dollars have been expended in the highway system here and the county consequently has nothing to gain by voting for the Baldridge-Wood program.

World Help Isolated Counties

Windle, chairman of the Buhl Rotary club, said he is willing to help some of the isolated counties get bonded roads but it is not willing to build roads itself with taxes to build

Dairy Report Shows Growth Is Consistent

The report of Manager Roy D. Smith, public relations cooperative Creamery, at the annual dairyman's meeting in Pella, Tuesday, showed big gains in all branches of the industry. But he said it is more difficult each year to make such a good report because the previous year's gains were so big.

Last year, he reported, the Buhl plant delivered 238,144 pounds of whole cream butterfat and 185,144 pounds of whole milk butterfat, totaling 423,288 pounds, a 17 per cent gain. The Twin Falls county association delivered 740,602.12 pounds of butterfat compared with 616,100.25 pounds in 1934, a 21 per cent gain. This month \$187,048 in 1935 and \$168,874 the previous year.

Prices Lower Elsewhere

He said that during the butter fat slump the November, 1935, more showed Montana prices were 38 cents, Nebraska 37 and Kansas 36 while in Idaho where marketing is through cooperative associations the December price was 47 cents a pound net of cream and 35 cents on milk.

Members of the association here earned \$40,760 pounds of cream butterfat during the year, a gain of 3643 pounds. The year produced about 300,000 pounds of fat, a 10 per cent increase over the previous year, increasing the total income by half a cent a pound and entirely paying for the equipment purchased.

When this equipment was established last year the creamery

expected to tell the product out. The local market was not so good as the national market. The reason for this, he said, was that the national market was taking it all and now he only said an investigation showed worry is that the creamery would produce enough of this product for the local patrons this year.

The creamery produced \$35,000 worth of ice cream compared with \$11,000 worth in 1934, a large gain. The Twin Falls plant. The creamery also handled 142,000 pounds of poultry besides 142,000 lbs. of cheese and sweet cream.

He said he considered the Buhl plant delivered 238,144 pounds of whole cream butterfat and 185,144 pounds of whole milk butterfat, totaling 423,288 pounds, a 17 per cent gain. The Twin Falls county association delivered 740,602.12 pounds of butterfat compared with 616,100.25 pounds in 1934, a 21 per cent gain. This month \$187,048 in 1935 and \$168,874 the previous year.

Buhl Fails in Efforts to Install Municipal Power

Buhl city will be prevented from installing a Diesel engine generating power plant to provide electric power according to a decision of the Idaho supreme court Saturday. The court thereby made permanent the temporary restraining order issued several months ago to Grant Miller, taxpayer of Buhl who opposed the efforts of the city council to establish the electric power equipment.

The court based its decision solely on the grounds that the \$90,000 indebtedness involved in the contract exceeded the annual revenues of the city. The court had ruled previously on a similar proposition for Council d'Alene.

Started Several Years Ago

Buhl city officials had proposed to contract with the Fairbanks-Morse company for installation of the generating plant. The question has been argued ever since the community voted \$65,000 in bonds for a new distribution system several years ago, failing at that time to complete the project.

One of the chief questions involved in the arguments was whether the pledging of revenues from the operating plant to buy the machinery obligated the city to purchase of the plant.

Miller was represented by Frank L. Stephan of Twin Falls, former attorney general. After his restraining order was granted, a number of the interests intervened, including the Buhl citizens, represented by Shad L. Hodgins, Twin Falls; the Idaho Power company represented by Hawley & Hawley, Boise, and other intervenors represented by C. G. A. Divillos, Buhl. The Fairbanks-Morse company was represented by Roy L. Black, Pocatello, another former attorney general.

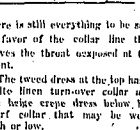

"VERY LATESTS"

By MARY MARSHALL

Many things that we have thought impossible have come to pass in the realm of fashion. We have submitted, at last for a time to the realm of long skirts. We may not like them and probably don't—but we are beginning to feel that the skirt that gives a glimpse of the knee is decidedly demode. We have returned to the normal waistline and women who have lost the slenderness of youth are listening to the correct makers or correct counters to see what aid they can get in that quarter.

We have accepted clothes that are decidedly more elaborate and often less comfortable than those to which we have become accustomed, but so far we have held out against a return of high collar. All feelings, they say, come back in the course of events and possibly this only a matter of waiting to see a return of day clothes that fit up to the chin. Several times in the last few years dress-makers have tried to launch high collars. We were even assured that the two-piece suit would be out of the question if women did not accept clothes with high collars. Most women, however, find that whatever clothes may gain by the high neck line they certainly lose in the waistline.

Here and there, among the new fashions, one sees something that suggests a higher neckline for day. time dress. It is the very exception; within this sort of thing scarf collar that may be worn is becoming. But for most of us high or low.

there is still everything to be said in favor of the collar line that leaves the throat exposed at the front.

The trend dress at the top has a white linen turn-over collar and the beige crepe dress below has a white scarf collar that may be worn in becoming. But for most of us high or low.

When Hunger Conquers Fear

Severe cold coupled with heavy snow sends the deer to the farms in quest of food from the haystacks. The doe, which Alvin and Rose Rogers of Speculator, N. Y., are feeding while Rose looks on surprisingly, has overcome its fear of people and does, driven by the stronger urge of hunger.

Rev. C. C. Curtis Goes To Portland

Rev. C. C. Curtis left here Friday for Portland, Oregon, where he will be minister of the pension fund of the Christian church. He submitted his resignation as head pastor several weeks ago, effective May 1, and in order to start his work without delay he was granted a leave of absence during the remainder of his period here.

The pension fund enterprise is something new with the Christian church, having been approved at the last two conventions. Rev. Curtis has been interested in it and joined the staff for the north-west which includes Oregon, Washington, Idaho, Montana and northern California.

He came to Twin Falls May 1, 1926, from Fort Worth, Texas, and had previously held pastorates in Idaho. Mrs. Curtis is also an

ordained minister and was pastor of the church at Meridian and of another in Oregon while she attended school at Welles College, where she has the distinction of having performed a marriage ceremony for her mother and for her sister, the latter also being a witness at her mother's recent wedding. Mrs. Curtis has been active in various civic affairs in Twin Falls. She will leave after school.

Rev. Curtis is credited with having lifted the local church into debtors' court, supervising construction of the new \$70,000 building and putting over various improvements with the organization here.

Would Aid Old Mining Day Pay

W. G. Dissell, Gooding lawyer, has asked the California state board of pardons to allow him custody of William (Big Billy) O'Connor, who was sentenced in 1924 to five years in prison for complicity in a \$100,000 jewelry store holdup in San Francisco.

The Gooding man and O'Connor were friends in the early mining days. O'Connor is said to have only two months to live as he is afflicted with tuberculosis. Mr. Dissell wants to take him to some favorable place in California where he may spend his last days in the sunshine. The board of pardons took the request under advisement. O'Connor refused to tell where he had hid \$100,000 of the jewelry that was stolen.

Moving Time For Many Local Firms

February is moving month among Twin Falls business establishments.

The Day-Nash company has moved to the Lavering theatre building formerly occupied by the Idaho-Amburn Co.; the International Produce company has moved its principal office to the former dehydrating plant adjoining the old Lincoln creamery building; the Nelson-Jenkins Chevrolet Co. have occupied the entire building in which they are located on west Main, utilizing the former quarters of the Day-Nash Co.; the Brannock-Schultz store has moved into the former H. C. Cash grocery building and the Sanitary hardware shop has also moved to this location and the O. K. Barber shop has taken the former location of the Sanitary on Broadway north.

There are numerous other changes either in process or in contemplation.

Funerals

OWENS—Wilton Mitchell Hunt will conduct funeral services at 2 P. M. today for S. A. Owens, father of twelve living children, who died Monday at his home here.

BRONAUUGH—Word is received of the death in San Diego several days ago of Mrs. Frank Bronauugh, one time resident of Twin Falls. She had submitted to an operation after several months illness.

NETCALF — C. W. Netcalf, resident here for 21 years, died Monday and the body was taken to his former home in Ganseville, Utah, for burial. He is survived by several children.

RANKIN — Rev. E. Temple Starkey of the Baptist church conducted funeral services Wednesday for Clara Rankin, 16, who died of hays fever while saving her two year old brother from the family's burning home at Harleton. She is survived by her mother, Foster-father and three sisters.

FIELD—Rev. James Miller conducted funeral services Monday for Mrs. Margaret Field, 68, who is survived by two daughters and a sister here.

regional and the national units of each community group. If farmers will take full advantage of the new farm plan of cooperative marketing they can revolutionize their industry, he said.

He related that ten years ago he represented Twin Falls county on a farm organization which borrowed from the government at that time, with \$100,000 expense for storage. The present farm board plan is different, the farm board loaning from 75 to 80 per cent of the funds needed for marketing farm products, payable with interest from 2 1/2 to 4 1/2 per cent in 20 years time. The other 20 per cent of the funds is to be raised by the local units and will be repaid immediately.

FOR BUTTER WRAPPERS, CALL The Idaho Citizen.

FORMER LOCAL RESIDENT VICTIM OF PNEUMONIA

Funeral services were conducted at Paso Robles, California Monday forenoon for Mrs. Elsie E. Thompson, wife of W. D. Trager. Mrs. Trager died unexpectedly Thursday night as the result of pneumonia. She is survived by her husband, two sons, Bruce, 6, and John, 16, two daughters, Dr. J. H. Goudley, Woodstock, O., and Mrs. S. Goudley and by a sister, Mrs. Jancuska, Shiloh. The latter two attended the funeral.

Mrs. Trager was a former resident of Twin Falls, being the daughter of the late Dr. John Goudley, physician master of the First Presbyterian church of this place. She had numerous intimate acquaintances in this locality who were shocked at the news of her sudden passing.

Frederick Stone is history At home there is an emerald which was sent to the pope from Peru after the conquest of that country by the Spaniards. In Egypt fleecy cat skins, antelope skins, have been found recently in the tombs of the pharaohs. The conquerors of Mexico found many beautifully wrought stones among the fountains and engraved with images from an early epoch of their history. The mythology of ancient India contains numerous references to precious stones and they are frequently mentioned in the songs and ballads of that people.
