

**WILL START A
NEW BANK HERE**

Oklahoma Man Investigates the Finances of City

HIGHLY PLEASED WITH CONDI

J. A. Kidd, of Lennaph; Okla.
Will Apply for Charter from th

J. A. Kidd, for eighteen years engaged in banking in Leannaph, Oklahoma, has been in this city for several days this week looking over the field for a bank. In an interview with the Times Mr. Kidd stated that the Twin Falls country looked good to him and that he considered the field large enough for another bank. He authorized the Times to state that he would apply for a charter and begin organization as soon as the state granted the same.

It will be the intention of Mr. Kidd

to interest local capital in the bank and the amount of capitalization was fixed. The bank's estimates hereafter were consulted in the matter. It was stated that it would be at least fifty thousand dollars and that available capital would be forthcoming to make it one hundred thousand if necessary.

Mr. Klidd, who is accompanied by his wife and niece, has some very firm recommendations as a business manager from the bankers of his section and should prove a valuable addition to the business circles of the city.

At present there are no applications for charters for banks in this city besides the present one, which will go forward this week.

LAW IS AGAIN CONSTRUED
No Limit to Amount of Liquor Private Individual May Have.

A great deal of confusion has been created in the matter of the amount of liquor a private individual may have in his possession, this confusion being brought about by the following account of the case of *John J. Hirsch*, a resident of the city of Chicago, the legislator at the recent session of the legislature. The confusion was caused by the fact that the amount of liquor permitted to be possessed by an individual by the state druggists' association, which stated that the amount of liquor permitted to be possessed by an individual was one gallon and the amount of beer was limited to one case of 24 quarts bottles.

Now, it develops that the law was amended and there is no limit on the amount of liquor an individual may have in his possession, and the law provided that this be put into effect.

ADDENDUM TO REPLACE STAIRWAY

Citymen Will Replace Demolished Structure at Falls.

In less than a week from the wrecking of the stairway at Bloomingdale,

by the landslide, steps were taken to replace the structure with a more substantial one. The new building was estimated the improvement among the big business men, asking only one dollar from each citizen to help defray the cost of the five hundred dollars—will replace the one destroyed with a stately and securely anchored to the rocks and a concrete repeller to the action of last week.

Every citizen will be asked to help to build the new building. The new building is not approached get busy and bring your dollar in to some of the banks to the Commercial club.

GOES TO GRAND LODGE

C. J. Hahn Will Represent Local Lodge at Rochester.

C. J. Hahn, cashier of the T. F. Falls Bank and Trust company, this morning to attend the Grand Lodge, B. F. O. E., which will convene at Rochester, N. Y. from local lodge.

Mr. Hahn goes as the representative of the local lodge. He was accompanied by Mr. J. H. Smith, Mr. J. H. Smith and will be joined in the east by Mr. J. H. Smith, Mr. J. H. Smith, Mr. J. H. Smith and Mr. J. H. Smith.

With him a large number of the Twin Falls badges which he will distribute to the Grand Lodge. The badges are very handsome and show the famous Twin Falls spout in all its glory.

THE HIGH COST OF LIVING

Leading Democrats Not Sure When Tariff Will Help People.

(Special Correspondence.)

Washington, D. C., June 29.—Letters and telegrams which they have been receiving from their constituents in all parts of the country, making inquiry as to the reason the Democratic party has not yet reduced the cost of living, in accordance with its platform and campaign promises, have aroused President Wilson and the Democratic leaders to explanations and more promises.

Some of the letters which are reaching the leaders frankly state that instead of reducing the cost of living, which is as high if not higher than ever, the party seems to be determined to take equipment away from the working people by removing the tariff protection that kept wages in this country higher than in Europe.

The fact is being held up to the Democratic party by congress, that it came into power on a promise to reduce prices, and that now the tariff bill is being burdened with non-essentials over which there is being wasted in wrangling, while products in which the masses are interested are being neglected.

Underwood Not Optimistic.
Majority Leader Underwood, whose name the new tariff bill, scheduled to answer the query of the critics as to what progress has been made by congress towards lowering the cost of living, and when these reductions would be made, said:

"To put out in detail the reductions in the tariff bill, which would reduce the cost of living, would take many hours. But I will say that we have either placed every footstep on the free list or halved the present tariff upon it. Meat and bread are placed on the free list. These are commodities in which the masses are certainly interested."

"The tariff on sugar has been reduced twenty-five per cent, and if the bill is passed in the form in which it went to the senate will be entirely eliminated within three years. This present reduction, I think, will probably lower the price to the consumer one-half per cent per pound."

"As to when these reductions will become effective no one can say. The bill must first pass the senate, and I do not think that there is any doubt that it will. It will then go to the president for his signature and immediate effect."

"No one can say, however, what benefits will result to the general public from these reductions. The tariff will be lowered on all articles, but the reductions must be considered before one can say what saving the consumer will enjoy. There is no doubt that many products will be materially lowered in price, but the lowering of the tariff may not in some cases result in any change in the prices made to consumers."

Clark Falls to Explain.

Speaker Clark replying to the same query propounded to Mr. Underwood, remarked:

"The entire tariff bill that passed the house would have to be analyzed

to answer the questions. This measure as it went to the senate effects a reduction in practically everything used by the consumer. Whether the senate will improve upon it, or even pass it, yet remains to be seen."

"As to the length of time that will elapse before the benefits of the reductions will be enjoyed, one cannot make answer until it is determined how long it will take the senate to pass the bill and then one must pause still further to find out how long it will take the president after it is made law to become effective."

Representative John J. Fitzgerald of New York, who is generally considered to be probably the foremost member of the Democratic party in congress, the tariff, and what the Democratic policy with regard to legislation on this particular subject will result in, when approached, replied:

"I do not care to make any statement on the subject or enter into discussion of it."

Smith Wants Positions for Idaho Men.
The enactment of the last session of congress of a law providing for the valuation of the property of common carriers makes necessary the employment of a large number of men throughout the United States who are equipped by education and training as structural engineers, civil engineers, inspectors of cut equipment, electrical engineers, inspectors of motor power, railway signal engineers, mechanical engineers and so on.

Congressman Smith, who has been urging the appointment of several Idaho men, has been advised by the U. S. Civil Service Commission that examinations will be held July 21st and 22nd, at Boise, Portland, and Moscow, to establish eligible lists from which appointments will be made.

Experience will be a large factor in determining the grade which the applicant will receive. It must be shown, by each applicant that he is of good moral character, temperate habits, active, intelligent, of good social standing, and of good speech and manner, and qualified to address and confer with railroad officials, as occasion may require. Persons between the ages of 25 and 50 only are eligible. Full information and appropriate blanks will be furnished upon application to the U. S. Civil Service Commission.

The resolution, recently introduced by Senator Smith of Georgia, authorizing the president to appoint a commission consisting of nine men which duty it shall be to consider the need and report a plan, not later than December first next, for national aid to vocational education, has been favorably reported to the committee on education and labor by the committee on agricultural and forestry.

The members of the commission will be paid their actual traveling expenses while on duty, but not more than \$5000 in any one year. This resolution meets with my hearty approval and I intend to do everything in my power to secure its adoption."

PLEASANT VALLEY.

Pleasant Valley, Ida., June 27, 1913.

Mrs. M. W. Johnson, who was taken to Dr. Morgan's hospital last week, is improving fast and will soon be able to be around again.

We regret very much to see the Johnson family move from the valley, as they were one of the most highly respected families and loyal good neighbors in our community.

Mrs. William McCarthy returned home Friday from the Twin Falls hospital, where she spent the past few weeks in a severe illness with typhoid fever under the care of Dr. Wilson. We are very glad to see Mrs. McCarthy able to be among us again.

The fall at Mr. W. M. Johnson's place last Friday was largely attended. Mr. Johnson's horses, cattle, sheep and hogs were among the best in the country and all brought high prices.

Mr. Frank P. Johnson of Buhl, was here to attend his brother's sale.

Mr. Howard finished cutting his hay crop, which is the best hay crop in the valley. Stacking is the next on the program with him.

Miss Connie Praeli has been on the sick list the past week.

Two young men were driving down the steep grade at McPherson's last week when their team became unmanageable and ran away. One of the young men was thrown from the buggy with such force that it is said he landed in McPherson's nest on the willows. When the other young man came to a stop, he found himself on top of the ground and under the buggy.

Mr. Oleen of Hansen, has been looking after his farm interests in the valley the past week.

John Hansen and Miss Madge Athol attended the dance at Rock Creek last Friday.

It is said that the June wedding bells are soon to ring for one of our most popular, prosperous and busy young farmers. The young lady with whom he will share his way through life is a very popular and highly accomplished young lady who is worthy of his heart and hand. She has won the admiration of all who know her by her grace, beauty and intelligence.

We welcome these worthy young people to make their home in the valley. In settling down the stream of life in their little back range with just room enough for two, this was what Casey said Sawyer said so to.

OHIO BREAKS RECORD

Coal Production for 1912 Valued at More Than \$47,000,000.

The production of coal in Ohio in 1912 reached the record-breaking figure of 24,527,727 short tons, valued at the mines at \$47,076,573, an increase of 9,747,741 tons and \$5,369,436 over the figures for 1911, according to Edward W. Parker, of the United States Geological Survey.

The rapid advance which the coal mining industry has made in Ohio in the last 15 years is shown by the following figures, the production in that time having nearly tripled:

Production of coal in Ohio from 1897 to 1912, in short tons:

| | |
|------|------------|
| 1897 | 12,196,942 |
| 1900 | 18,888,159 |
| 1903 | 24,328,103 |
| 1906 | 27,731,640 |
| 1909 | 27,339,611 |
| 1911 | 20,769,886 |
| 1912 | 24,527,727 |

The largest output previous to that of 1912 was in 1910, when an account of the labor troubles in Illinois and Indiana, Ohio coal was in strong demand and production increased over 6,530,000 tons, namely to 24,298,808 tons. This figure was exceeded in 1912 by 229,920 tons, and as the industry in 1912 was not influenced by the abnormal conditions that existed in 1910, and as the increased production over 1911 was attended also by advances in price, the coal mining business in Ohio may be said to have been fairly satisfactory. After the suspension of mining, on April 1, the employees were granted an advance in wages amounting to between 5% and 5 1/2 per cent, which partly accounts for the advance in the price of coal and partly for the advantage derived by the operators from the favorable conditions affecting the industry. The agreement on which the wage advance was granted is to be in effect from April 1, 1912, to March 31, 1916.

The chief factors in stimulating the production of coal in Ohio in 1912 were (1) big farm crops and the resultant prosperity in agricultural districts; (2) a general increase in manufacturing, particularly in iron and steel, in which Ohio ranks second among the states; and (3) the labor troubles in the Ohio Creek and Point Creek districts of West Virginia, which reduced competition with and stimulated the demand for Ohio coals in the lake trade.

According to the United States Bureau of Mines, the fatalities in the coal mines of Ohio in 1912 numbered 133, of which 125 were underground, 4 in shaft, and 4 on the surface. Of the deaths 72 per cent, or 96 in all, were due to falls of roof; 6 deaths were due to falls of coal; 18 to haulage-way accidents; 6 to premature blasts, etc.; 2 to electric shock, and 3 to other causes. Only one death was due to an explosion of gas.

Fewer men were employed in the coal mines of Ohio in 1912 than in 1911, but there was a marked increase in the number of days worked. The number of men employed in 1912 was 45,677, who worked an average of 283 days, against 46,635 men for an average of 179 days in 1911. The average production per employee was 758.3 tons in 1912, against 688 tons in 1911. Ohio continues to lead in the percentage of coal mined by the use of machinery. In 1912, out of a total of 2,524,727 short tons, 25,752,84 tons, or 86.2 per cent, were machine-mined.

Polish Imports Nearly \$15,000,000.

The importation of "potash salts" for consumption into the United States in 1912 is estimated to be 123,713,164 pounds, valued at \$10,692,285, according to W. C. Phalen, of the United States Geological Survey. This importation is expected to be a marked increase over the potash salts entering the United States. To it should be added the importation of kainite and "manure salts," including "double manure salts." The imports of potash salts of these classes amounted to nearly 700,000 long tons, valued at more than \$1,000,000. The imports for consumption of materials entering largely into the fertilizing industry, plus the domestic phosphate rock, reached the total valuation of over \$16,000,000. These statistics in detail, together with others showing the condition of the German potash and salt industry, are given in the Geological Survey's report on potash just issued as an advance chapter of the volume "Mineral Resources of the United States for 1912."

The investigations of the Geological Survey in 1912 into sources of potash salts in the United States included a continuation of deep drilling in Nevada, begun in 1911; a continuation of the collection of samples of rock-salt brines and bitterns and of the study of the salt industry of the United States; the examination of various dried or partly dried lakes, playas, flats, or marshes in several of the western states, both within and without the Great Basin, including Arizona, California, Nevada, New Mexico, and Nebraska; the investigation of deposits of potassium nitrate in California and Montana; and the investigation of occurrences of similar in Arizona, Colorado, and Nevada. Information on all these investigations has either been published or is in process of publication by the survey.

Mr. Phalen's report contains abstracts of papers on sources of potash published by the Bureau of Science by private individuals during 1912, as well as sections on potash salts as a by-product in the manufacture of Portland cement, and on the utilization of a pulp at Cardiff and Terminal Island, Cal.

The report may be obtained, free of charge, by addressing the Director, U. S. Geological Survey, Washington, D. C.

INTEREST TO SWINE BREEDERS

Timely Article in Howard to Plague and Cholera.

SWINE PLAQUE.

Swine plague is no like hog cholera that it is impracticable to distinguish between the two.

Swine plague is generally regarded as a lung affection and hog cholera as a disease of the intestines. Since the general measures for controlling hog cholera are the same as for controlling swine plague, the two diseases may be discussed together. The latest investigations regard the two diseases as being caused by the same inviolable germ.

HOG CHOLERA.

Aside from the general fact that hog cholera is caused by a minute inviolable germ, there are many factors which may render a herd more susceptible to the disease.

They are: A change of feed, general unhygienic sanitary conditions in the hog lots, damp or cold sleeping quarters, dirty drinking and feeding troughs. Of course, these factors do not directly cause hog cholera, but they lower the vitality of the hogs so that they become easily infected when exposed to the disease producing germs.

How the Germ Reaches a Herd.

The germ is always present in the bodies of affected hogs. It is always found in the excretions from their bodies so that the pens, yards and everything coming in contact with the excretions is contaminated. It may get in a herd of healthy hogs many ways. Sick hogs may escape from a neighboring herd. New stock showing no symptoms may bring it. Always keep new stock in a pen by themselves for a while until you know absolutely that there is no disease among them. Purchasing hogs that have apparently recovered from hog cholera. Healthy hogs going over the same route as sick animals have every opportunity of becoming infected. Since the organism is found in the urine and faeces of sick hogs, it is an easy matter for an attendant in contact with the excretions to carry it to neighboring herds on his feet. Stock buyers who visit all the hog lots in the country can easily carry it in this manner. Crows, hawks, buzzards, sparrows, dogs, rabbits, etc., may easily spread the disease. The stream that runs through an infected farm may carry it to a healthy herd. Everything that comes in contact with the sick hogs becomes contaminated with the germs. Remember that the ways for spreading the disease are legion and that the means of eradication are few. The keynotes of them all is cleanliness, written in big letters.

Symptoms.—The symptoms vary in different forms of the disease. Briefly they are in the following order: First symptoms—Loss of appetite, vomiting, inflammation of the membranes of the eyes and nostrils, together with the excretions of the animal may be constipated, but diarrhoea generally sets in within a short time and the discharges from the rectum are of a grayish color or streaked with blood, often offensive. Diarrhoea may be absent in some cases. Temperature increases, the animal becomes restless, purplish blotches are often found on the skin in the region of the flanks and the abdomen and also on the ears. The animal gets weak, lies hidden in the little and will rise only when forced to do so. After rising, it may walk, usually swaying or reeling behind it. It will go only a short distance, then stop for fifteen or twenty minutes. Death occurs in from four to seven days. In the subacute and chronic forms the hog may linger from seven to 21 days. In order to be sure of the disease, a post-mortem examination should be made.

Post-Mortem Appearance.—The following table shows the organs which should be examined when hog cholera is suspected. A description of the appearance of the organs in cases of cholera is given after each organ. It must be remembered that all of the post-mortem appearances may not be found in one hog. Those in the skin, large intestine, small intestine, spleen, kidneys and lungs are the most diagnostic.

Skin.—Red or purple discoloration along belly and between the hams. Ulcers may appear on the skin cracks and ears show.

Large Intestine.—External congestion and internal congestion with hemorrhagic spots in the acute form and ulcers in chronic cholera.

Small Intestine.—External and internal congestion, hemorrhagic spots, hemorrhagic spots. Seldom ulcers.

Kidneys.—Pale or dark in color, with reddish-black spots on the external surface. May resemble a turkey egg in appearance.

Spleen.—Enlarged, black, friable. Sometimes resembles black jam.

Liver.—Seldom any visible changes. May be enlarged and congested.

Stomach.—Congestion on mucus lining in varying degrees of the acute form.

Bladder.—Congestion and hemorrhagic spots on mucous surface.

Lymphatic Glands.—Carrying degree of congestion from pink to dark in color.

Lungs.—May be covered with hemorrhagic spots of red or brown color, varying in size from a pinhead to half dollar. Complete hardening of parts of the lung occurs. Pus may form and adhesions to the chest wall sometimes take place.

Heart.—Sometimes shows small areas of congestion of the base.

General Preventions.—There is no cure for hog cholera. It may be prevented, however, in several ways. The germ may either be kept away from the hog or the hog's resistance to the germ may be increased. Even if the disease is not present in the herd, disinfect thoroughly once in a while. Clean up and burn all litters in the lots and houses. At the first outbreak separate the healthy hogs from the sick and put them in new quarters. Disinfect in a compound solution of cresol—1-100 in water, or some similar disinfectant. Disinfect pens and sheds with a chlorinated lime solution (1 lb. chloride of lime to 3 gal. water). Every part of the sheds and pens should be covered and the work given 24 hours to perform its work before allowing any animal to go into the sheds. Use good worm powders and treaters to remove the general health of your herd. Serum inoculation has passed the experimental stage and has proven itself adequate in the

prevention of disease if properly made and inoculated.

A GOOD TONIC.

Wood charcoal.....1 pound
Sulphur.....1 pound
Sodium chloride.....2 pounds
Sodium bicarbonate.....2 pounds
Sodium hyposulphite.....2 pounds
Sodium sulphate.....1 pound
Aptomony sulphid (black anti-mony).....1 pound

Experience has shown, however, that this medicine does not to be regarded as a cure or preventive in the true sense of the word, but it is, nevertheless, a very good, constant powder. This powder is mixed with the feed in the proportion of a large tablespoonful to each two hundred pounds weight of feed and treated and should not be given oftener than once a day. This medicine cannot be relied upon to prevent the occurrence of disease except in so far as it improves the general health of the hogs. Therefore, even though this remedy be used, attention must be given to quarantine and sanitary measures if the disease is to be warded off when in the neighborhood.

ADVANCE IN MAKING COKE

Originally Wasted By-Products Are Valued at as Much as the Coke.

It is now 20 years since coke was first manufactured in by-product ovens in the United States. By this process all the products of the coal are conserved—first of course the coke, but also large quantities of coal tar, ammonia gas, and other constituents. It is asserted that in the by-product coke plants of the present day the by-products pay the cost of the process—that is, that the coke is clear gain. The old method of coke-making, by means of the beehive oven, which is in fact still largely in use, allows all these valuable by-products to waste absolutely.

The first plant using the by-product or retort type of oven was installed at Syracuse, N. Y., in May, 1893, according to Edward W. Parker, of the United States Geological Survey. This pioneer plant consisted of 12 Semet-Solvay ovens and produced in that year 2,350 tons of coke. The plant has since been increased to 40 ovens. The second by-product plant to be constructed was one of 60 Otto-Hoffmann ovens at Johnston, N. H., from these small beginnings the by-product branch of the coking industry has grown steadily, new plants being added each year until at the close of 1912 there were 5,561 ovens of this type in operation and the production of retort coke for the year was 11,045,499 tons, a little more than one-fourth of the total output. The making of by-product coke has materially developed along other lines, in that the simple building of new ovens and increased production. The ovens of the present day or larger, higher, and wider than those installed in earlier times. The charging capacity of the original ovens at Syracuse was 4.1 tons of coal and the time required for coking was 24 hours. Even at that time a yield of at least 50 per cent in coking time was obtained compared with beehive practices which required 18 hours for the production of furnace coke and 72 hours for the production of foundry coke.

The Semet-Solvay ovens of today hold at the average about 16 tons of coke. The exact capacity depends, of course, on the specific gravity of the coals used. The original 60 Otto-Hoffmann ovens at Johnston had a charging capacity of about 5½ tons each. The latest installation of United Otto ovens at Mayville, Wis., in 1912, have an average capacity of 10.33 tons of coal each. The coking time has been materially reduced, so that excellent furnace coke is now made in 16 to 18 hours. The development of modern mechanical appliances has also gone much to forward the efficiency of the retort oven and to reduce the labor necessary per unit of output. The same crew of men who 20 years ago were required to handle 25 of the small ovens and who were carbonizing say 110 tons of coal a day are able with modern equipment to handle 60 or more of the larger ovens, coking 1,900 tons of coal a day. This represents an increase of about nine-fold in the tonnage carbonized per man employed. These developments have been accompanied by marked improvements in by-product recovery in the manufacture of ammonia and other by-products. Twenty years ago the only ammonia recovered was in the form of crude liquor running from 12 to 15 per cent ammonia. Now coking plants are producing ammonia liquor ranging from crude through the different grades required for the manufacture of fertilizers, explosives, etc., to the production of almost chemically pure ammonia, at one operation. Still another marked development in by-product oven practice is in the utilization of the surplus gas to the illumination of cities and towns. In the earlier days the ovens produced only a small and irregular quantity of surplus gas of varying quality. Today by-product ovens in the United States are selling from 40 to 1 million cubic feet of gas a day for illuminating purposes. Almost the entire supply of gas in some cities is derived from retort ovens. The cities which are especially mentioned are Boston, Mass.; Camden, N. J.; Indianapolis, Ind.; Duluth, Ohio; Baltimore, Md.; Houston, Texas; South Chicago, Ill.; and Milwaukee, Wis.

Until 1908 the Semet-Solvay and United Otto (Chicago) ovens held the entire field of retort-oven practice. In that year, however, the Illinois Steel Co. constructed at Joliet, Ill., 140 Koppenhagen by-product ovens. This plant was doubted in the following year and a number of other plants of this type have since been constructed in different parts of the country. In 1909 construction was begun on 300 Dillor ovens at South Bethlehem, Pa., but they had not been put into blast at the close of 1912. During 1912 a bank of 22 Klomke ovens were completed at Muncie, Ind. At this plant all the gas from the ovens is supplied to the city of Muncie. The ovens are heated with producer gas made from bituminous coal. Two recent installations of Semet-Solvay ovens, one at Waukegan, Ill., and the other at Indianapolis, Ind., are constructed on the same plan.

LIVE NEWS FROM DUHL.

The Twice-a-Week
TWIN FALLS TIMES
and a Pair of Handsome Nickel
Plated

Self Sharpening Scissors

The scissors are not a cheap makeshift, but are warranted to stand good hard usage and give service at all times. Think of it.

The Twin Falls Times (Twice-a-Week) \$2.00
Self Sharpening Scissors.

ALL FOR \$2.00

You have the advantage of getting live news twice-a-week from the only semi-weekly paper in this county—you have the news fresh at the time when it is news, not after it has come filtering down to you from one to seven days old. It is a distinct advantage to you. You have the benefit of a newspaper that has been a constant boosting medium for the entire county. Besides getting a clean, newsy paper fit to go into any home you are helping to support a paper that is honest in its attempts to accomplish reforms in this county.

Remember that it is the Twice-a-Week Twin Falls Times

DEMAND THIS LABEL
On all of Your Printed Matter. It
represents Good Workmanship, Good
Wages, and Good Conditions.

The Times desires to call the attention
of the farmers and road owners
of this county to the splendid work
done on the highway leading from this
city to Park. A road hard as pave-
ment and nearly as smooth was the
verdict of the people who made the
trip to Urichville and Thousand
Springs last Sunday. Most of the
credit for the splendid road can be
given to the split road crew which
was used shortly after the rains of
last week, when the top dirt was still
soft. The rest of the road overseers
of the county should take a lesson
from the work done on that one high-
way and prepare to give similar ser-
vice in their own districts. The split
road crew has filled a mission in the
upkeep of roads that should not be
overlooked. The cost is less than any
other apparatus and upon the roads
are rounded at the center, can be used
to keep the surface free from ruts and
allow free drainage on the rounded
surface. The ranchers' along the
township line road are to be congrat-
ulated upon the work done and the
example set for the rest of the county.

The general opinion of every visitor
in this city on viewing the great
growth of the city and the wonderful
crops being grown in the surrounding
tract, is that it is a most wonderful
tract. In nearly every case the vis-
itors express a desire to locate here.
Yet in spite of this opinion on the part

of the visitors it is very common talk
among natives to decry the city and
tract and to throw cold water general-
ly. The result is a half-hearted spirit
of boasting on the part of those who
are satisfied with the conditions here.
The Times would suggest to those who
are disgruntled and disappointed with
conditions that they take a trip to
the other cities and towns of this
state and of the west in general and
see just what is being done elsewhere.
Let them go out and look for loca-
tions in other places until satisfied
that Twin Falls looks better to them
than any other section. It will be
much to renew their boasting spirit
and stop cold water throwing for all
time. If, however, they find a more
ideal location, let them go there and
give that city their support. But if on
the other hand they are still unwilling
to leave Twin Falls they should turn
to boosting at once. In plain lan-
guage, if they don't like the tract and
city, let them go out and make room
for those who do.

TO TAX MAIL ORDER HOUSE SALES.

A bill has been introduced in con-
gress calling for an internal revenue
tax of the total amount of sales of mail
order houses through interstate com-
merce. Leading wholesalers say this
tax is too small. While such a tax
would be a protection to the retail
stores it would not be sought primary-
ly as a protective measure. There is
a real basis for such a levy as a fair
contribution by these houses for their
great traffic.

Under present conditions, probably
none of these concerns pays a fair
proportion of national burdens.
The retail merchant pays a stiff tax
because he must keep a large assort-
ment of goods on hand. The public
will not buy his goods "unsight and
unseen." People demand a change to
see them and a considerable quantity
so that they can select from various
styles and prices. The merchant thus
carries much tangible property, which
the assessor sees, and which he taxes.

By clever advertising the mail or-
der house escapes the usual necessity
of business, that the purchaser be
shown the goods. The purchaser buys
on faith from strangers. The propo-
sition of goods kept on hand is very
small compared with what the retail
merchant keeps. The assessor cannot
find much tangible property in east-
ern books. What the mail order
house pays of course varies with the
laws of different states. But the na-
tionable property on hand must be
very small in proportion to the busi-

ness done and the profits thereof. It
seems only fair that such houses
should pay a liberal excise tax.
Otherwise they enter into competi-
tion with the retail merchant without
the handicap of taxation which he
must always carry.—Freemont Times.

NO CANADIAN DREADNOUGHTS FOR ENGLAND.

The boast heard frequently in Lon-
don lately is that "we've got the
ships, we've got the men, we've got the
money too," has become obsolete since
the naval race with Germany began,
so much so, in fact, that the admiralty
has found it necessary to appeal to
her dominions beyond the seas. In
the case of Canada she seems to have
appeared as far in vain, for Mr. Bor-
den's naval bill, which embodied a
proposal to give the British admiralty
three first-class battle ships, has been
thrown out by the Canadian senate.
The senate has a Liberal majority and
acted under the instigation of Sir Wil-
frid Laurier, ex-Liberal premier, and
Sir George Ross, the Liberal leader in
the senate. Sir Wilfrid, whose policy
is to build such ships in Canada
and run them in Canada, involving a
delay of six or seven years, has thus
closed a victory, and the whole ques-
tion of Canada's part in empire de-
fense is involved in a struggle be-
tween the senate and the dominion
house of commons, which passed the
bill. The Conservative organs assure
us that Mr. Borden has one of two
courses to take. He must either ap-
peal to the people in a general election
or attempt to force the bill through
immediately by action to limit the ven-
ue of the senate, just as Mr. Asquith
by his parliament act has dealt with
the British house of lords. Each
Conservative paper as the Winnipeg
Telegram express great indignation
against Sir Wilfrid Laurier and his
followers, and we read:

"Separation from Great Britain and
the establishment of a republic in Brit-
ish North America is the obvious im-
mediate purpose, the declared object, of
Sir Wilfrid Laurier. We have, now
reached a crisis that is of vital im-
portance to the Dominion and to the em-
pire. The policy of the Liberals is a
direct challenge to the loyal Britishers
of Canada."

Another leading Conservative organ,
the Ottawa Evening Citizen, does not
take such a despairing view of the sit-
uation, but contends with advis-
ing the referendum—or a new ar-
rangement of the senate so as to make
it a more representative body. To
quote its editorial:

"The Borden naval bill will proposed

the appropriation of \$35,000,000 for
the construction of three dreadnoughts to
be used by the British admiralty for
naval defense. It was a specific pro-
posal, allowing of no alternative save
the future disposal of the ships, and
that was necessarily left to the future.
Hence the referendum might in all
justice and consistency have dealt
simply with the affirmation or nega-
tion of the particular project. The sim-
plest wording would have been some-
thing like this: 'Are you in favor of
the passage of the Naval Aid Bill?' • •
If the majority do not favor that pro-
posal, it can hardly be recognized as
wise or prudent legislation. Hence,
while it would have been possible to
have put several propositions con-
cerning naval action before the people,
it is yet to be shown why more than
the one involved in the particular act
should have been submitted or acted
upon. A referendum of simple affir-
mation or negation would have served
the full purpose of determining whether
or not the people of Canada stood
behind the Prime Minister."

"They do stand behind the prime min-
ister, declares the Montreal Herald,
one of the most powerful organs in
the Dominion, which professes to be
liberal, but is pronouncedly Conser-
vative in the support it gives the Con-
servative minister's naval policy. It
denounces in no hesitating way 'Can-
ada's Failure' in the matter of the
ship grant. The first lord of the ad-
miralty has announced his intention to
cancel the three ships which the Cana-
dian Liberals desire to build. The
London Times editorially relates as
follows the measures taken by Mr.
Winston Churchill, in view of Cana-
da's refusal to aid the British navy:
"Mr. Churchill stated in the house
of commons yesterday that 'the situa-
tion brought about by the rejection of
the Canadian naval aid bill requires
immediate action in order that the
margin of naval strength necessary
for the world-protection of the empire
may be adequately maintained for the
autumn and winter of 1915 and in the
spring of 1916.' To meet this situation,
he announced that orders had already
been issued to insure the commence-
ment of the three contract ships of
this year's program at the earliest pos-
sible date."—Literary Digest.

ductive house would naturally want
to know. Will be all the "drummers"
you'll need for your boarding house.

When the man for whom you thought
to work has an opening for you, you'll
find the news in the "help wanted"
ad.

NEWS FROM JARBIDGE

Mining and Other Happenings of the Camp Are Told.

Jarbridge, Nev., June 23, 1913.
Each day's development strength-
ens the conviction that Nelson and as-
sociates, on the Arizona L group, are
in the making of one of the big and
rich mines of the Jarbridge district. In
the lower tunnel, according to the ve-
lain is getting better defined, and the
ore richer, as depth is gained. The
rich ore is coming in in bunches and
strata, varying from 4 inches to 10
inches in width. There are several
such streaks now in the face of the
tunnel, making the whole block as a
broken down average up to excellent
grade of millable ore. Panicles from
picked specimens made during the
week indicate values of \$500, or better
than the ton, and if the improvement
continues as depth is gained it is pos-
sible that a sizable body of ore that
will stand cleanup will be developed.
Panicles indicating values around \$200
are common. Even from a white talc
that looks anything but like ore one
can get a long string of colors in the
pan. Most of the vein matter is very
soft, but some of the quartz is fairly
hard as the tunnel advances.
There are two features of the Arizona
development that are especially im-
portant and gratifying. The first is
that the gold is just as free as that of
the Sullivan and Winkler, 1200 feet
higher, and the values are there also.
The question of the veins continuing
to great depth and carrying their val-
ues is always a pertinent one in every
camp. The second feature is that it is
now proven that the veins continue
above the tunnel, and carry high
values on both sides. This shows the
strength of the fissuring. It is the
first time that ore in place has been
found crossing the vein. Ore in the
Flaxie. On the right hand side there is
a body of fine, soft quartz, with
less than 10c of gold, but will un-
doubtedly be better than \$50 per ton
judging from panicles. Owing to the
absence from camp of Joe O'Byrne,
the Flaxie engineer, no assays have
been made recently, so definite values
cannot be given. Notwithstanding the
fact that the high grade at this de-
point, Manager J. J. Smith, who has been
pleased with it as any place in the
mine. There is at least 6 feet of very
good ore here, and with the bulk of
the vein getting richer at this point,
the lowest workings—253 feet from the
surface—there is every reason for
contentment. The waste will not be
sunk another 50 feet, from which

point more drifting and crosscutting
will be done.

A man claim, on which a strike
was recently made, is getting a little
better with every foot of development.
In the 7-foot vein there is about two
feet of ore that shows good values in
the pan. Very rich float has been
found on the claim, but it is not yet
sure that it came from the vein opened
up. An assay of \$52 was secured from
a little. The boys have just finished
one piece of this float by Jim Duncan,
but others who are not interested in
the property have gotten much better
assays. Angus McDonald, one of the
owners, is in charge of the work.
The crosscut from the 400-foot tun-
nel on the Success, now out 70 feet,
has gone through a very hard rib of
pyrite similar to that encountered
on the upper level shortly before the
tunnel was cut. It was not expected to
get the vein for some distance yet,
but one of the miners now believes the
next 5 feet will open it up.

At the Legitimate tunnel is in the
70 feet and it is still following the
stringer which was picked up at the
start. All the red oxidized iron pans
are full. The boys have just finished
a good wide trail from the Flaxie
Legitimate to the Alpha.

At the Buckeye they are drifting on
the vein which was opened up in the
lower tunnel. The drift is in 8 feet
and there is about 2 feet of ore that
ton in the neighborhood of \$3 per
ton.

STOMACH UPSET?

Stomach Upset?
—It Quickly and Surely Ends Indi-
gestion and Stomach Distress.

Distress after eating, belching of
gas and undigested food, that lump
feeling in the stomach, headache,
tiredness and lack of energy, are
warning signals of self-order stom-
ach. Now—at once—is the time to
stop this distress.
At-once Stomach Tablets is the rem-
edy. They are absolutely harmless.
Get a fifty cent box today. They use
surely and quickly stop stomach dis-
tress and improve and strengthen
the digestive system so that what you
eat is converted into nutrition and the
body is properly nourished.
Money back if not benefited. Skeel-

Swim & Aldrich

Mrs. C. O. Stockelager arrived in the city today from her home in Boise and will remain for some time visiting with friends.

Orrin and Frederic Hill of Boise, arrived last Friday for an extended visit at the home of Mr. and Mrs. O. B. Fuller.

Rev. J. V. Hawk was in Twin Falls yesterday from Boise on business in connection with the Children's Home Finding society.

Mrs. C. H. Canpin and the children came over from Twin Falls last week on visit with relatives in Jerome—North Side News.

E. A. Wilcox, commercial agent for the Great Shoshone and Twin Falls Light and Power company, returned Friday from a business trip to Salt Lake City, Utah, and points in southern Idaho.

Mr. and Mrs. L. M. Custer and son Will, Mrs. L. M. Zug and Mrs. Frank Clem were in the city yesterday from their home in Shoshone on a short business tour. They made the trip by auto and made the run from Shoshone to the Shoshone falls in one hour and a half.

After the regular meeting of Twin Falls Homestead No. 1114, B. of A. of last week, the members held a memorial service in honor of their departed dead. The first on the program was a duet by Messrs. G. W. Archer and Mr. C. G. Smith, who were greatly enjoyed by all present. The memorial address was read by a member of the lodge.

Mr. and Mrs. C. L. Smith were in the city the last of the week from their farm near Buhl, looking after business affairs. Mr. and Mrs. Smith are from Rock Creek, Iowa, and they were here looking after improvements on their farm. They are more than pleased with the country and the tract has made since their last visit.

G. W. Gault and Henry Whitlow were in town today from Buhl, yesterday morning to answer the charge of being drunk and disorderly, which was brought against them by the police department. After considering the matter for a short time they concluded that they were guilty and were assessed \$15.00 each, which they paid.

Miss Jennie Combs left the latter part of last week for a two month tour of Europe. She will call from New York with a party of friends this week.

Miss Florence Barber, who has been spending the past two days at Rock Creek yesterday, after having spent the week end as the guests of Miss Burt Wall.

Miss Helen West returned yesterday from Seattle, Washington, where she has been attending school and will spend her vacation on the home farm near Kimberly.

Ralph Smith will leave tomorrow morning for Iowa, where he will visit with relatives for a couple of weeks. Mr. Smith has not been home for more than five years.

Miss A. E. Blissett, daughter, who has been visiting Mr. and Mrs. C. H. Booth for several days, returned to their home in Twin Falls, Wednesday evening—Burley Advocate.

The regular monthly meeting of the C. W. B. M. auxiliary of the Christian church, will be at the home of Mrs. J. A. Wyatt on 3rd avenue West, Thursday afternoon at 2:30. All members are urged to be present.

Mrs. E. B. Heinicke and son John expect to leave tomorrow night for Seattle, Washington, where they will be accompanied by her mother, Mrs. J. H. Dettler, and sister, Emma, who will spend the summer at Hollister—Smith Co. (Kas.) Pioneer.

Topsy, single drivers for ladies, at Dooley's Livery. June 24

The Times wishes to thank Mrs. J. C. Livingston for a basket of fine ripe cherries, which she left at this office yesterday.

Miss Josephine Nielson entertained at a most delightful breakfast last Friday morning at the home of her sister, Mrs. Herman Dews, on Blue Lakes Boulevard. Covers were laid for twelve young ladies at a beautifully appointed table. A color scheme of yellow and white was carried out in the menu, the hand-painted place cards and the decorations, the table having for a center piece a low bowl of yellow and white roses, and the other rooms being profusely decorated with the same flowers.

Mrs. M. W. Kunkley and Mrs. W. F. Pike, were at home to a large number of ladies at the home of the latter last Friday afternoon. Part of the ladies, with their sewing, enjoyed a Kensington, while the remainder of the group devoted the time to progressive five hundred, at which Mrs. Pike won the prize for high score and Mrs. L. F. Morse prize for second high. Later refreshments were served at the close of the afternoon, the hostesses being assisted by Mrs. A. L. L. Swin. On Saturday evening, the same ladies, together with their husbands, entertained forty ladies and gentlemen at cards, five hundred furnishing the amusement. Mesdames G. P. Davis and M. J. Snyder, winning the ladies' prizes for high score and Mr. M. J. Snyder, the gentlemen's. Miss Beth Hamilton assisted in serving delicious refreshments at the close of a jolly evening. The spacious rooms of the Pike home were lavishly decorated with pink roses on each occasion.

Miss Burt Wall was hostess at a most enjoyable party last Saturday afternoon at her home on Seventh avenue East. The affair was given in honor of her guest, Miss Pauline Davis, of Pueblo, Colo. Forty-five young ladies, many former friends of Miss Pauline's, were present. Drawing paper and pencils were furnished the guests and each tried to prove her skill at card and art and, good indeed, were the products that the judges found themselves unable to choose the winner and six young ladies drew for the prize, which was captured by Miss Margaret Conway. The guest of honor received a souvenir spoon to carry away as a memento of the occasion. Vocal and instrumental music were also enjoyed, the Misses Vest Thomas, Margaret Wilson and Pauline Davis furnishing the music. During the afternoon punch was served by Miss Charlotte Wilton in the dining room, which was beautifully decorated with June roses and other flowers. Later delicious refreshments were served by the hostess.

Kimberly, Idaho, June 28, 1915.

The Kimberly lodge, I. O. O. F., held their memorial services Sunday afternoon at the Methodist church. Rev. James Lettich of Aurora, Idaho, delivered the address. Rev. Lettich is a very enthusiastic Odd Fellow, and his sermon was enjoyed by a goodly number of Odd Fellows and Relatives, as well as a number who were not members of the order.

The Misses Belle and Margaret Newberry were visiting with friends and relatives a few days last week, returning to their home near Eden, Mont.

The play given by the Kimberly orchestra last Friday evening, was a grand success, a plethora of money being raised as well as a very enjoyable evening for all those present.

The characters were well represented and the music rendered by the orchestra was exceptionally fine.

Rev. James Lettich preached at the Methodist church Sunday morning.

N. W. Swearingen made a trip to Albion the first of last week on business.

W. H. Spence and W. F. Breckon drove to Twin Falls Saturday afternoon on business.

Mr. and Mrs. Vanderpool, Mr. and Mrs. Redhead, Mr. and Mrs. Lauder, and a number of the Hansen people who attended the Odd Fellow services Sunday afternoon.

Messrs. Alexander, W. F. and J. W. Swearingen were Twin Falls visitors Saturday afternoon.

J. E. Halferty and G. B. Byard and families, left Tuesday morning on a fishing trip to the Little Wood river. They expect to visit at the home of Harry Masie at Hay Spur. Mr. Masie is in the employ of the state and has charge of the fish hatching at that point.

While the recent rains have damaged to some extent the first cutting of alfalfa, it has done a world of good to the beets, peas and small grain in this vicinity.

Joe Fitzsimmons returned Saturday evening from a trip to Albion, where he went to assist Mrs. Minnie Hardin and Mrs. Stewart to get located for the summer.

Mrs. Geo. O. Bremer left Monday morning for St. Louis, where she will visit for several days before going to Portland and Seattle, where she expects to spend the summer visiting with Mr. Bremer and mother.

R. J. Evans and family, H. Aldrich and family, O. Johnson and family, R. Williams and family, Gen. Tyson and family, Frank Tyson and family, W. A. Gill and family, E. U. McIntire and family, F. Hager and family, J. E. Ebercrance and family, and Mrs. T. Brown and family, and the Messrs. B. F. McMillin, Allen Hudson, J. E. Hager and B. McMillin, spent Sunday at the Shoshone falls. A picnic dinner was served and all report having had a good old Kansas visit.

Mr. and Mrs. P. J. Bringle were visiting with Mr. and Mrs. Hoover Sunday afternoon.

W. R. Summers, road overseer, is busy these days putting in cement culverts and dragging the roads after each rain.

The Kimberly ball team crossed bats with the Burley team Sunday afternoon, winning in a victory to the local team.

A Salmon forty for development of gold and silver. Also a 40 acre tract, one year and cash for clearing, etc. Address X., Hollister, Idaho.

FILER NEWS.

(Filer Journal.)

Tom Harris, was a Twin Falls visitor
 Monday.

Karl Hogen left for Mountain
 Home last Saturday.

His nephew was a Twin Falls visitor
 Monday.

Ray Taylor was on the sick list
 Sunday evening.

Mr. and Mrs. Taylor were Twin Falls
 visitors last Friday.

J. D. Fisher is building a new house
 north of the track, 28x25.

John Mitchell, the butcher, returned
 to Boise last Saturday evening.

Julius Strauss and John Sumner
 were Twin Falls visitors Sunday.

Lots of strawberries are being
 raised out of Twin Falls this year.

A bouncing baby girl was born last
 Sunday to Mr. and Mrs. H. L. Austin.

Harry Hammerquist returned from
 his South Dakota visit the first of the
 week.

Joe Fehrenbacher, a brother of
 Frank, has a visit from his home near
 Chicago.

Mr. and Mrs. Shearer, accompanied
 by Mrs. Holens, were Twin Falls visitors
 Monday.

J. P. McClure, wife and baby, of
 Sandy Lake, Pa., a brother-in-law of
 W. M. Hume, is visiting here.

At present the weather is a prob-
 ability in a very short time. The mat-
 ter will be decided in a few days as
 the weather from Wisconsin will be here
 to look the first of the week.

It sounds good to hear the Filer
 brass band once again. The orchestra
 informs the Journal that the boys are
 lining up fine and will soon be heard
 in the bandstand, where all may en-
 joy the pleasure of brass music once
 again.

Filer people will regret to learn that
 J. E. Wood will soon sever his con-
 nection with the C. A. Love store, as
 he has been offered a position in a
 large mercantile store. The Wood
 store will be managed by Filer, where
 they have made many friends, and
 the best wishes of all will follow
 them to their new home.

Mrs. C. White of Colfax, Wash.,
 mother of Mrs. T. D. Comer, arrived
 in Filer last Friday for a visit at the
 hotel home. Mrs. White is 75 years
 old and came over the trail and Ore-
 gon trail in 1853. She has lived in
 the west ever since and has seen the
 wonderful changes that have been
 wrought in that time. Five years ago
 she visited this tract, and was amazed
 at the change in the tract in that short
 time. In 1853 she was the first to
 little did she or anyone else think at
 that time that the day would ever
 come when this section would be the
 flower of the nation.

Henry Brown was in town last Mon-
 day.

Shelton & Hill shipped a car of
 sheep Monday morning.

F. W. Schwamb is here looking after
 his extensive ranch interests.

Sumner's sheep for the first time
 of sheep from Peavine, Monday.

H. E. Doolittle of Oden, was a guest
 of the Filer hotel last Saturday.

Sumner's miner and family returned
 last Saturday from a three weeks
 visit to Kansas. S. D. McElroy and
 family took care of the ranch during
 the miner's absence.

Guy Carlson has accepted a position
 at the Kirk Murray barber shop. Mr.
 Carlson is a first-class barber from
 Nebraska. If he proves his good
 barber as he is a barber he will cer-
 tainly be a find.

Mr. and Mrs. Patton, late arrivals
 from Kansas, have rented the Joe
 Wood property and will make Filer
 their home. They were here two years
 ago and were very impressed with the
 country that they have decided to lo-
 cate here permanently.

P. P. Davis, father of the Davis
 Bros., who has been residing with A.
 Davis, will leave shortly for Wash-
 ington. Mr. Davis will return in the
 fall and go into the business of an
 extensive scale. Mr. Davis is no doubt
 the oldest man here in the United
 States who has been actively con-
 nected with the business for 75 years.

W. P. Shinn, director and secretary
 of the Deep Well company, accompa-
 nied by his wife and family, were in
 Twin Falls Monday before the dis-
 trict court attending to the winding
 up of the company's affairs, the city
 according to the ownership of the
 well. The affairs were liquidated and
 the company passed peacefully out of
 existence.

Last Saturday at three o'clock the
 alfalfa meal mill was sold at referee
 sale. There was a good attendance
 at the sale. There were two bidders—Col.
 Aiken of Twin Falls and E. P. Brown
 of Filer. The mill was finally knock-
 ed down to Mr. Brown for \$3,200. That
 this property went for that price is known
 to all, but it seems that it is a hard
 proposition to make a stock company
 proposition with. This company was
 formed to raise from the business for
 who engineered the proposition. The men
 of a wheel within a wheel from the
 start. They never had the confidence

of the stockholders, and sought to use
 the business for their own personal
 advantage. Later on the stockholders
 commissions given the officers to sell the
 meal, etc. Now that the mill has
 passed into other hands perhaps
 it is best to let the matter rest. The
 main quiet. However, let none of the
 men who had a hand in the wrecking
 of the property of the stockholders
 think that none knew of the deal-
 ings that led to the wreckage of the
 property. In the hands of Frank
 Brown the mill will probably be suc-
 cessful of whatever he undertakes.
 Filer people who lost their money in
 the mill are not at all faulted in re-
 sponse to the hands that it has.
 C. P. Swindler of Boulder, Colo., was
 in town last Saturday.

Joe Price is building a new house on
 his acre across the track.

Frank Uhl of Sharon, Pa., one of
 the owners of the Filer water power
 company, accompanied by other offi-
 cials of the company, were here the
 first of the week looking over the
 tract.

The Filer Hardware Co. report that
 judging by binder twice orders they
 have already looked that that where
 crop promises to be an exceptionally
 large one. They say that the farm-
 ers as a rule are very optimistic about
 the crop and that the heavy rain and
 recent damp weather has considerably
 benefited the grain, wheat, of course,
 being a detriment to our farmers who
 are having a dry season.

E. V. Johnson of the Salmon tract
 probably has the distinction of having
 purchased the first stock of alfalfa
 in this district, and that was when
 John Johnson was a Twin Falls visitor
 Monday.

Ray Taylor occupied the M. E. pul-
 pit Sunday evening.

Preparations for the early arrival of
 his family to take up their permanent
 residence on the Salmon.

John Crocker and John Crocker, Jr.,
 of Filer, Id., partners of Brown
 Brown, were here this week looking
 after business matters. Mr. Crocker
 says that the first of the week the
 alfalfa meal mill and this means that
 under the management of Brown,
 Crocker & Co. that it will be a suc-
 cessful business. Mr. Crocker says
 that the mill will be a blessing to
 all within hauling distance. The
 mill is a splendid property and cannot
 be sold but win under proper manage-
 ment.

MARKET REPORT

North Portland, Ore., June 27, 1913.
 Cattle: 125; calves, 278; sheep,
 278; sheep, 489; horses, 23.

Cattle market steady to strong all
 the week. The demand for calves has
 been about the average in quality, the
 bulk selling \$7.75 to \$8.25. Several
 loads of California grass cattle sold at
 higher prices. The steers in this mar-
 ket brought \$7.75, the heifers \$8.00,
 and the calves \$8.00. Outlets have
 been very good and the market seems to
 be very sound. There is a poor
 demand for stockers and feeders on
 account of the high water, which con-
 dition will be eliminated in the near
 future.

The box trade surpassed all records
 since 1910 for a single week. Prices
 advanced about 50c in seven
 days. Market opened strong Monday
 at \$5.00, which was a 20c gain over the
 previous week, and by Friday an
 equally light market was selling at
 \$5.00. Receipts have been very light
 but buying has been on a large
 scale and the supply was quickly ab-
 sorbed.

Transactions in the sheep house
 have been few due to the light receipts
 and the demand for mutton. Ex-
 ceptionally fine carcasses are worth \$1.75 to 5c,
 and ewes \$1.50. The lamb trade is in
 very fair shape and prime fat spring
 ewes and lambs are selling at prices
 ranging from \$5.00 to \$6.75.

The following sales are representa-
 tive:

| No. | Weight. | Price. |
|-----------|---------|--------|
| 41 Steers | 1150 | \$8.75 |
| 42 Steers | 1050 | 8.50 |
| 43 Steers | 1100 | 8.10 |
| 44 Steers | 1080 | 7.90 |
| 45 Steers | 950 | 8.00 |
| 46 Cows | 1130 | 8.00 |
| 47 Cows | 1100 | 8.00 |
| 48 Cows | 970 | 7.90 |
| 49 Calves | 220 | 9.00 |
| 50 Steers | 1100 | 8.50 |
| 51 Steers | 1150 | 8.50 |
| 52 Steers | 1100 | 8.50 |
| 53 Hogs | 207 | 9.00 |
| 54 Hogs | 211 | 8.90 |
| 55 Hogs | 211 | 8.90 |
| 56 Hogs | 211 | 8.90 |
| 57 Hogs | 211 | 8.90 |
| 58 Hogs | 211 | 8.90 |
| 59 Hogs | 211 | 8.90 |
| 60 Hogs | 211 | 8.90 |
| 61 Hogs | 211 | 8.90 |
| 62 Hogs | 211 | 8.90 |
| 63 Hogs | 211 | 8.90 |
| 64 Hogs | 211 | 8.90 |
| 65 Hogs | 211 | 8.90 |
| 66 Hogs | 211 | 8.90 |
| 67 Hogs | 211 | 8.90 |
| 68 Hogs | 211 | 8.90 |
| 69 Hogs | 211 | 8.90 |
| 70 Hogs | 211 | 8.90 |

NOTICE OF SHERIFF'S SALE.

Twin Falls Land and Water Com-
 pany, Plaintiff, vs. William F. Bohrendt,
 and Mrs. William F. Bohrendt, hus-
 band and wife, Defendants.
 Under Order of the Court of Sale
 and Decree of Foreclosure issued out
 of the District Court of the Fourth
 Judicial District, State of Idaho, in
 and for the County of Twin Falls,
 dated the 25th day of June, 1913, in
 the above entitled action, wherein The
 Twin Falls Land and Water Com-
 pany, Plaintiff, and William F. Bohrendt
 and Mrs. William F. Bohrendt, hus-
 band and wife, were Defendants, a
 decree was entered. Plaintiff obtained a
 decree of Foreclosure and Order of Sale
 against the said Defendants, dated the
 25th day of June, 1913, which said de-
 cree was on the 10th day of May, 1913,
 duly recorded in Record Book 2, at
 page 569 of the Records of the said
 District Court, and an order was made
 to sell all that certain lot, piece or parcel
 of real estate, situated in the County
 of Twin Falls, State of Idaho, and
 described as follows, to-wit: The
 Northeast Quarter of Section 18 in Township 10
 South of Range 15 East of the Boise
 Meridian.

Together with all and singular, the
 tenements, hereditaments and appur-
 tenances thereto in anywise belonging,
 or in anywise appertaining.

NOTICE IS HEREBY GIVEN, That on
 Thursday, the 27th day of July,
 1913, at 10 o'clock A. M. of the said
 day, in front of the Court House door
 in the City of Twin Falls, County of
 Twin Falls, State of Idaho, will, in
 obedience to said Order of Sale, sell
 all the above described property, at
 public auction, to the highest bidder,
 for cash, lawful money of the United
 States.

Dated this 27th day of June, 1913.

H. C. VASQUEZ, Sheriff,
 County of Twin Falls, Idaho.
SWEETLEY & SWEETLEY,
 Attorneys for Plaintiff, July 1-22

**NOTICE OF MEETING OF COUNTY
 BOARD OF EQUALIZATION.**

MAKERS OF AMERICAN HUMOR

MAJESTIC RANGE

No. 1. "LEARN ONE THING EVERY DAY"
Copyright, 1923, by The Associated Newspaper School, Inc.
It is said of Josh Billings that his first writings did not win wide attention, but that after he changed his spelling the American public began to take notice, and soon his popularity as a humorist was great. When he was writing regularly for the Century Magazine under the title "The Black & White," Dr. J. G. Holland, then editor, insisted upon printing his epigrams in correct fashion. Mr. Shaw accepted the mandate, but continued to compose his contributions in his own peculiar misspelled way.

Like most of the early American humorists, Josh Billings was a Jack-of-all-trades. He tried coffee, life, but gave it up before completing a course at Hamilton college. He was successively farmer, steamboat captain, real estate agent, and inventor. This latter pursuit he followed in Poughkeepsie New York. He was born in Lanesborough, Massachusetts, on April 21, 1818; but his wanderings carried him West and back again, and finally he died in Monterey, California, on October 1, 1885. One of his later wanderings was due to the fact that he took to the lecture platform and here achieved considerable success. Mark Twain was one of his associates in his lecturing days.

No. 2. "ARTEMUS WARD (Charles Farrar Browne)"

About fifty years ago a slender, modest appearing man edged his way hesitatingly out upon a London lecture platform before a large audience of phlegmatic Brits, and with every evidence of falling courage and embarrassment proceeded to poke fun at the Tower of London and every cherished British tradition. This was Artemus Ward. His winning personality and the contrast between his apparent shyness and the extravagance of his statements won him instant success in England. They loved him for his "nerve," and they took to the quality of his humor, which in its balderdashness and absurd exaggeration was distinctly American.

Artemus Ward was the first American contributor to "Punch." He wrote that periodical many letters, which were read with delight throughout England. In fact, his success abroad was much greater than his had achieved at home, and there was tragedy in his death, which came very soon after he began his work in England, and just as he was reaping some reward for many years of struggle. For Browne was like most of our other early humorists, in that he was a rolling stone.

Artemus Ward, like Josh Billings and many other contemporaries, developed an extravagant system of spelling. As we of this generation attempt to read his works at any length, we find less to amuse us than in the writings of Josh Billings. For instance, he lacked the subtlety of philosophy that Josh Billings possessed. Yet his fame in his own day was greater than that of Billings.

Charles Farrar Browne was born in Waterford, Maine, on April 25, 1834, and died in Southampton, England, on March 6, 1887. He was a printer, a journeyman printer, and traveled from one end of the land to the other following his trade. The true humorist must of necessity have a wide knowledge of human nature, and these early writers, in that he was a rolling stone.

No. 3. "BILL NYE (Edgar Wilson Nye)"
An original and amusing letter of resignation, written in his capacity as postmaster of Laramie, Wyo., to President Arthur, first brought Bill Nye to public notice. Somehow a copy of this letter escaped from the president's files, and, as Nye says, "was copied from Japan to South Africa and from Jerusalem to a given point." Bill Nye

disproves the assertion that a reputation as a humorist will keep a man out of public office. In addition to the postmastership at Laramie he was postmaster of the place for six years, and might have held other offices within the gift of the community had he so wished.

Edgar Wilson Nye was born at Shirley, near Moosehead Lake, at the northern end of Maine, on August 26, 1850. When he was two years old his parents moved to St. Croix county in northern Wisconsin, and he there received a thorough common school education. He chose the law for a profession, and was admitted to the bar; but chance brought him a position as reporter on an evening paper at Laramie City, Wyoming Territory. This was lasted for only a year. He then practiced law for a time, and was elected justice of the peace and later postmaster.

Bill Nye was a busy, hard working

1818; but his wanderings carried him West and back again, and finally he died in Monterey, California, on October 1, 1885. One of his later wanderings was due to the fact that he took to the lecture platform and here achieved considerable success. Mark Twain was one of his associates in his lecturing days.

In the quality of their humor, Mark Twain in his earlier writings and Josh Billings had much in common. Extravagance of statement and radical absurdity of ideas were the chief constituents of the output. "I am an old and too respectable to be a phony humorist," said Josh. And the American public of his day placed confidence in his consistent extravagance of assertion and gladly refused to believe him.

Many of the humorists of the war-time period resorted to the trick of queer spelling, and as we translate their writings into ordinary speech today we are likely to find little but that amusing in it. Josh Billings can stand translation. His epigrams are always good, and there is a vein of philosophy underlying his humor that is true to any age. In this he often reminds us of that first American humorist, Benjamin Franklin, and, like Franklin, Billings created an almanac that ran for several years and was crowded with fun and philosophy so thoroughly mixed that the reader could not tell where one left off and the other began. Listen to his description of laughter: "Anatomically laughter, lifting to the second or third floor all over, and showing it principally in one spot. Morally considered, it is the best exercise of the body, and it is the most effective of the 10 commandments. Theoretically considered, it can out-argue all the logic in existence. Practically considered, it is the friend of the soul; but I don't intend this essay for laughing in the lamp, but for laughing on the half-sheet."

Artemus Ward loved to refer to himself as a showman. Next to his famous lecture on his visit to the Mor-

man, his descriptions of his traveling show, and the greatest popular success. "My show at present consists of three moral fables and a Kangaroo (a harmless little animal—would make you hurt yourself to death to see the little cuss jump up and squeal)," he writes to a country editor, and in the same letter he adds, "I am anxious to show your informant that I shall get on strike off up to your apron of fire. My political sentiments are, with you exactly. I know they do, because I never saw a man whose didn't. Respectively yours, A. Ward, P. S. You scratch my back & I'll scratch your back."

Bill Nye was popular as a lecturer. He had a delightfully frank personality, and his simplicity of manner and hatred of sham won him a host of friends. Nye never wished to be considered a phenomenon. For some time James Whitcomb Riley and Bill Nye shared a "Laramie" humor. It was a matter of time for the lecture platform and a highly successful combination. In 1877, Nye married Clara Frances Smith. They had two sons and two daughters. On February 22, 1896, he died near Asheville, N. C. With his death there passed away the old school of American humor; for he had carried into this generation the style of absurd extravagance and exaggeration that was characteristic of Josh Billings, Artemus Ward, Orpheus Kerr, and the fun makers of wartime.

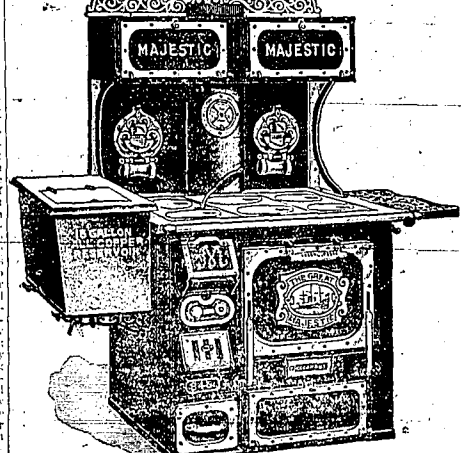

In each issue of The Times three different human interest stories will appear. You can get a beautiful facsimile reproduction of the above pictures with five others, equally attractive, 75¢ a dozen in advance, with this week's "Mentor." In "The Mentor" a well-known country story of the week. Readers of The Times and "The Mentor" will know Art, Literature, History, Geography, Travel, and even exquisite pictures. On sale at the Liberal Stand and Clock Book Store, Price, Ten Cents. Write today to The Times for booklets explaining The Associated Newspaper School plan.
