All Skin Remedies Fail?

Have you tried all the advertised skin remedies without success? Have you sought medical treatment in vain? And you still suffer from that irritating itch, that horrid, unsightly skin disease?

Do not despair. Come to our store and we will GUARANTEE YOU INSTANT RELIEF. We will let you have a full size bottle of the D.D.D. Prescription for Eczema, a simple, antiseptic wash, on our positive guarantee that unless

it stops the itch AT ONCE it will cost you not a cent. You owe it to yourself to take advantage of this offer. We are confident it will succeed or we could not afford to make the offer. D.D.D. is a penetrating liquid that kills and washes away disease germs, leaving the skin smooth and healthy. A 50c bottle is enough to start the cure of the most obstinate cases of Eczema, Psoriasis and allied diseases. D.D.D. soap is a valuable aid. Ask us about it. Bedford Drug Co.—Adv.

SUGGESTIVE QUESTIONS

On the Sunday School Lesson by Rev. Dr. Linscott for the International Press Bible Question Club

Sept. 21, 1913.

(Copyright, 1912, by Rev. T. E. Linscott, D. D.)
The Golden Rule (Temperance Lesson). Ex. XXIII.

Golden Text—My little children, guard yourselves from idols. 1 John 5:21.

(1) Verse 1—Were these Israelites trusting more in Moses than they were in God? Why?

(2) How long had Moses been absent? (Ex. XXIV:18.)

(3) What was the real cause of these people wanting gods to be made for them?

(4) Upon which would you say the average professed Christian places the

greatest practical dependence, and why, his fellow men, money or God? (5) Verse 2—Which is the greater idolatry or folly, and why, for women to wear gold rings in their ears or to melt them into images to represent God?

(6) How do you account for it that Aaron so readily complied with the request of the people to make them gods of gold?

(7) When a pastor sees that the influential majority in his church is bent upon card playing, dancing, tippling, smoking and other worldly or sensuous things which do not make for spirituality, what should he do?

(8) Which needs the more money, to serve God with all our hearts or to follow a fashionable religion and the gratification of our sensuous nature?

(9) What is idolatry and what are its evils?

(10) Verse 7:8—What proportion of those who are nominally converted never leave their temporary sins?

(11) What is the culpability of the sin to ascribe to other causes the

blessings which come direct from God?

(12) What was it a sign of that these people took the glory of their deliverance out of Egypt from Jehovah and gave it to idols?

(13) Verse 9:12—Did God actually want to destroy the people, root and branch, or did he want it to test the faith of Moses? Why?

(14) Taking this conversation as literal between God and Moses, which would you say shows the fairer or more statesmanlike spirit? Give your reasons.

(15) What arguments does Moses use to persuade the Lord from destroying Israel?

(16) If God appears to us to be harsh in his providence or to do things contrary to our reason will he take it in good part if we in a proper spirit protest? Why?

(17) Verse 13:11—What is a fair and respectful argument for Moses to remind the Almighty of his covenant, and is God pleased with us when we quote him his own promises? Give your reasons.

(18) Verse 15:20—Did Moses do well or ill to get angry and to break the tables of the testimony? Why?

(19) What can you say for or against the destruction of so much valuable gold?

(20) When money is invested in that which is working the ruin of the people—like the liquor traffic, for example—is it the duty of the government or not to confiscate the property in order to save the people? Why? (This is one of the questions which may be answered in writing by members of the club.)

(21) Verse 21:35—Is there an account of a great slaughter through the sin of idolatry. What is the extent of the annual slaughter of the liquor traffic?

(22) What are the chances of individuals or nations escaping the consequences of their sins?

Lesson for Sunday, Sept. 28, 1913.
Review—Deliverance and Obedience.

THE SILO FOR ECONOMIC PRODUCTION.

By Edgar H. Clark.

With modern changes on the farm you will see a desire on the part of progressive farmers to improve their places with all conveniences that tend to either lessen labor, lower expenses or add to the productivity of their land or stock. Under these conditions the silo, combining as it does all three of these very important features and having behind it the endorsement of the United States government and state experiment stations, is making rapid progress and at no distant date will establish itself as one of the necessary equipment on every farm where cattle are kept.

Many farmers say, "We do not doubt that the silo will make feeding handy during the winter. But will it pay? Will not its cost and filling more than offset all its advantages?" Is winter about the only work we have to take care of our stock. Our time is not valuable as we would be idle otherwise. And then what about the food value of silage? We do not intend to invest in a silo simply because it is handy. We want to know just how it will make money for us.

The answer in a nut shell to all such inquiries is that silage can be produced for about \$2.00 per ton and is worth \$6.00 to \$8.00 in feeding value. There are other advantages in feeding silage which should be explained to those not familiar with it. Mr. C. H. Hittman, formerly of the Kansas State Agricultural College, gives \$2.00 a ton as an average estimate for the total cost of production, that is cultivation of the corn and filling the silo. In figuring this cost it must be remembered that the cost of cultivation, cutting and hauling will be the same whether fodder or silage is fed. Prof. A. L. Racker of the Nebraska station, figures the total cost of silage at \$1.95. As stated before, however, many farmers prefer to bring the fodder in from the field during the winter when there is no other work. The filling of the silo then is the only extra expense. Every farmer who feeds corn fodder from the shock knows that a large part of its food value is lost through exposure to the weather. With the silo in use this loss is eliminated. The silage is completely protected from the weather.

In the matter of economy of space it is well to remember that a ton of silage occupies less space than one-tenth as much space as a ton of hay. This means that a shed or loft holding one hundred tons of hay must be about ten times as large as a silo holding the same amount of silage. The farmer who is expecting to build storage for feed will find it much cheaper to construct a silo. Then there is another advantage. The demand for hay has made its market price very high. By using silage in the ration the consumption of hay will be lessened and the farmer may put the larger part of the money usually spent for hay to the account of silo cost. The original investment on the average size silo is from \$300 to \$500. This size will hold over 100 tons. There is a net profit of \$2.50 per ton in the silage at a net profit of \$2.50 to \$3.00 for each ton it is filled.

We find then that the original investment in building a silo does not require a large expenditure of money. It only requires good management and conserving resources already at hand.

The cost of maintaining a silo is small. A coat of paint when built and afterwards as needed is about the only expense. The silo is built of a much better grade of wood than the average house or barn. Its iron parts should be of the best material, and if it is properly set up there is no need for many repairs.

The succulence and palatability of silage is an important factor which must not go overlooked in considering its feeding value. Its approach to fine pasture means much to the dairyman who realizes that without this feed he has an enormous shrinkage in milk when the cows are taken off pasture and put on dry feed.

The demand for cream and butter during the last few years has been so great that no farmer can afford to ignore this important part of his work. And as the highest prices are now being paid for winter milk, owing to the scarcity of green food, is

GOOD telephone service depends largely upon mutual courtesy. The telephone is more useful to those who talk—as if face to face, for civility removes difficulties and facilitates the promptest possible connections.

As in other intercourse, it often happens that two or more people wish to talk with the same person at the same time. Without courtesy confusion is inevitable, and the confusion is greater when the people cannot see each other.

The operators must be patient and polite under all circumstances, but they will do better work if they meet patience and politeness on the part of telephone users.

The Bell Telephone Service enters intimately into the social and business life of each individual. The best results come through the practice of mutual courtesy.

SECURING EGGS IN WINTER

Farmer Has Discovered That It Is Profitable to Have Commodious and Comfortable Houses.

The farmer has become wise to the fact that it is possible to have winter eggs, which no longer is an idle dream, as was the belief in the days of our forefathers. The farmer, too, has discovered that it is economy to have commodious, comfortable winter houses, and that for success there must not be a single mongrel permitted on the place. He has even gone a step farther and "invested" in incubators and brooders that he may devote a part of the winter months to profit instead of comparative idleness.

In short, he has in operation a complete poultry plant, and it has proved to be the best crop on the farm. That the farmer makes the most of it for the fact that he has the proper facilities.

The purebreds of the present day are so superior in utility that no seldom comes across a flock of cross-breeds, and the one that keeps mongrels is out of the class that is making a success.

The fanciers of today deserve the credit for this change. It was due to their skill that health, ruggedness and practical qualifications became a part of the make-up of their breeds. So sharp has become competition in this line that the breeders of different varieties are working for egg records and are competing in preference to show requirements. Even the American Standard of Perfection has modified the laws of breeding so that utility will not be sacrificed. Truly we have entered an era when poultry becomes the food food instead of the show bird.

It has been proved that, properly bred, pure bloods are more prolific layers, give a more uniform size and are more resistant to disease. They measure more uniformly and give better carcasses, and utilize the food consumed to better advantage, than is the case with either cross-breeds or mongrels.

COST OF MARKETABLE MILK

Increasing Price of Feeds and Labor and Sanitary Conditions Are Held Responsible.

The people of cities who complain about the high prices of milk may be interested in knowing what it costs to produce and distribute good marketable milk. An investigation made by the dairy department of the college of agriculture, Ohio State university, shows that the average cost of milk in Ohio is about 25 cents, or 6.25 cents per quart, allowing 3,200 pounds per cow per year as the average milk production. This takes into consideration the cost of feeds, labor, interest on investment, maintenance, insurance, taxes, etc. When the average milk production per cow is increased, the above figure are greatly reduced and there is a fair profit in the dairy business. However, it is the average producer, who keeps average cows, the increasing cost of feeds and labor, and the demands for sanitary conditions that are contributing to the high prices of milk.

SHELVES FOR STORING FRUIT

Much Waste Can Be Prevented by Construction of Racks as Shown in Illustration Herewith.

A well-ventilated rack for storing fruits and vegetables in the cellar will more than pay, in the prevention of waste through decay, for the cost of its construction. A tier of racks should be built up in a part of the cellar far removed from the heating plant, and, if possible, shut off from it by a light partition, says the Householder.

The racks or shelves should be made of strips of two by two-inch boards, nailed together in frames, to fit on movable wooden pegs inserted in holes bored at intervals through

the upright ends. The frames should be covered with slats, spaced apart at least half an inch. Between these spaces the air can circulate freely at all times to absorb the surplus moisture. The articles can be laid on these shelves without danger of crowding. The movable pegs in the end pieces permit of easy adjustment of the shelves at any space apart, or the entire removal of some. A separate rack can be made for fruits and another for vegetables, if desired. Both fruits and vegetables kept in such places will last indefinitely.

A repetition of your want ad may bring a better offer for that second-hand article.

DEVICE FOR HOLDING BAGS

Pair of Metal Bars Connected Pivotal Form Rectangular Frame in Which Sack Is Fixed.

A device for holding a bag open and at the same time holding it above the ground—on a fence post, for example, has been invented by a North Dakota man. It consists of a pair of metal bars that are pivotally connected. The short ends of the bars are bent in to form spurs, like the tongs, and

Bag Holding Frame.

The long ends form a rectangular frame in which the mouth of the bag is fixed. A strong spring joins the long ends near the pivotal point. When the outer ends of the bars are spread apart the inner ends spread also and can then be made to embrace a post. When the device is let go and the spring contracts it grips the jaws against the post and holds the apparatus in horizontal position with the mouth of the bag open.

HANDLING THE FLOWER POTS

Box With Castors Attached Will Be Found of Great Convenience When Cleaning Room.

(By I. M. SHEPHERD.) A box for plants resting on castors may easily be drawn away from the window on cool nights in winter, and pushed back the next morning.

These castors are also a convenience when sweeping about the window. Any woman who keeps house-plants in her room can herself make two or three window-boxes, legs and all, picked up from where carpenters are building.

These boxes, of course, are used mainly in windows that are kept for the saving of plants for spring, and yet they can contain an assortment of flowers, which, banded back of a window, give an effective picture of beauty to the passer-by as well as to the inmates of the room.

For a small window, and one from which you must get light for the room, be sparing of the plants. There is nothing pretty in a dark room, the

Removing Plant From Pot.

case of which is the window literally hung and placed full of all manner of foliage.

It is such a mistake to fill a window so full of plants and vines in the winter that one can neither get light for reading nor sight of the prettier world outside. A few plants in a small window, artistically arranged, is a much better economy.

And is there anything more dismal than a window stuck full from top to bottom of little green cuttings in tin cans or any old pot? Where is the beauty?

LEFT THEM BOTH GUESSING

"Information" Added Little to the Small Amount of Knowledge Young Matrons Possessed.

Two young matrons, who are sisters, keep house in their old family homestead in Kansas City, Kan. Recently their cook left them. While neither had much experience in cooking, yet they decided to take charge of the kitchen. They bought three cook books. For Sunday evening lunch it was determined to have sauerkraut and spare ribs. Several friends were asked to in.

The kraut and ribs were put on the fire to boil. Suddenly it occurred to one of the "cooks" that she did not know how long the combination should cook. She asked her sister. She didn't know. They consulted the cook books. Each gave this instruction: "Cook until done." They were in despair. One of the husbands happened to drop into the kitchen. He saw that some "it" was wrong. He asked, and was told.

"That ought to be easy to find out," he said. He stepped to the telephone and called: "Information, please."

In a moment a gentle voice came over the wire: "This is information. What is it, please?"

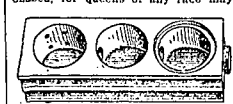

"Information, can you tell me how long sauerkraut and spare ribs should boil?"

Without a moment's hesitation the silver voice replied: "Certainly. Cook until they are done."—Kansas City Star.

EQUIPMENT FOR A BEGINNER

Most Important Consideration in Purchasing Colonies of Bees Is Their Healthfulness.

(By E. P. PHILLIPS, Ph. D.) It is desirable to begin bookkeeping with a small number of colonies. In purchasing these, it is usually best to obtain them near at home rather than to send to a distance, for there is considerable liability of loss in shipment. Whenever possible, it will be better to get bees already domiciled in the particular hive chosen by the beekeeper as the best, but if this is not practicable then bees in any hive or in box hives may be purchased and transferred. It is a matter of small importance what race of bees is purchased, for queens of any race may

Queen Mating Cage.

be obtained and introduced in place of the original queen. In a short time the workers will all be of the same race as the introduced queen. This is due to the fact that during the season worker bees die rapidly, and after renewing they are replaced by the offspring of the new queen.

A more important consideration, in purchasing colonies of bees is to see to it that they are free from disease. In many states and counties the state inspectors of apiaries who can be consulted on this point, but if this is not possible even a novice can tell whether or not there is anything wrong with the brood, and it is always safer to refuse hives containing dead brood.

The best time of the year to begin beekeeping is in the spring, for during the first few months of ownership the beekeeper can study the subject and learn what to do so that he is not so likely to make a mistake which will end in loss of bees.

Judge Hughes as a Jester.

Shortly after Governor Hughes of New York was elected the second time, after bitter campaign, a lawyer from New York came to see him and was told to go to the executive mansion in Albany. It was the first time the lawyer had ever been in the official residence of New York governors, and, after Hughes came into the room, the visitor said: "You have a handsome place here." Yes, Hughes replied, "but I had a hard time getting the landlord to renew the lease." Saturday Evening Post.

—Rising to Higher Life.

The Hindus have a theory that after death animals live again in a different form; those that have done well in a higher, those that have done ill in a lower grade. To realize this they find a powerful incentive to a virtuous life. But whether it be true of a future life or not, it is certainly true of our present existence. If we do our best for a day, the next morning we shall rise to a higher life; while if we give way to our passions and temptations take with equal certainty a step downward toward a lower nature.—Lubbock.

Practical Horseshoeing

AT THE

Pioneer Horseshoeing and Repair Shop

Owing to the falling off of the freighting business, I have more time to attend to practical shoeing of badly-rattled horses and quarries to stop all interfering by the use of practical shoes, or refund your money. All repair work will be given prompt attention at prices that are reasonable.

When there's a place for you in the boarding house in which you'd feel so much at home that life "would grow doubly worth-while" you'll find the news in someone of the "Boarders Wanted" ads.

When the opportunity to step right into a better position, with doubled salary comes, you'll be in line for it if you watch the classified ads.

If you want to tell the people what bring you results.

When the apartment, which might almost have been planned and designed for you, becomes available to you, the news will be found in the "To Rent" columns.

Notice For Publication of Time Apportioned For Proving Will, Etc.

In the Probate Court of the County of Twin Falls, State of Idaho.

In the matter of the estate of William D. McCabe, deceased.

Pursuant to an order of said court, made on the 5th day of September, 1912, notice is hereby given that Saturday, the 20th day of September, 1912, at 10 o'clock A. M., at said court, at the court room of said court, at the county house in the city of Twin Falls, county of Twin Falls, Idaho, has been appointed as the time and place for proving the will of said William D. McCabe, deceased, and for hearing the application of Laura McCabe for the issuance to Walter McCabe of letters of administration with will annexed when and where any person interested may appear and contest the same.

Dated September 5th, 1912.

(SEAL) J. M. SHANK, Probate Judge.

Serial No. 09615.

NOTICE FOR PUBLICATION.

Department of the Interior, U. S. Land Office, at Halley, Idaho, September 2, 1912.

Notice is hereby given that Nettie E. Lamberson, publisher of the Twin Falls Times, Idaho, who, on January 27th, 1911, made homestead entry serial No. 08463, for S. E. 1/4, Section 28, Township 31 N., Range 18 E., Boise Meridian, has filed notice of intention to make final commutation proof, to establish claim to the land above described, before John F. Hansen, U. S. Commissioner, at Rock Creek, Twin Falls County, Idaho, on the 25th day of October, 1912.

Witness my hand as witness: Jack Cassidy and Wade McLaughlin, of Hansen, Twin Falls County, Idaho; Will Hall and Frank Cooper, of Murrough, Twin Falls County, Idaho.

NOTICE TO THE OWNERS OF LOTS AS HEREINAFTER DESCRIBED.

You and each of you are hereby notified that the assessment roll for sidewalk improvement to cover the cost of construction of sidewalks in front of, abutting on, or adjacent to the lots as hereinafter described, has been filed in the office of the city clerk of said city of Twin Falls, Idaho, and that the city council of said city will meet in the council room over the First National Bank in said city on the 25th day of September, 1912, at eight o'clock P. M. on said day for the purpose of hearing and considering any and all objections that may be made as to the justness and correctness of the amounts so assessed.

The respective amounts charged against each lot, together with the owner or reputed owner of the same, the number of feet of such sidewalk constructed and the description of the property are as follows:

Lot.	Owner.	No. Ft.	Assmt.	Enk. Fees.	Total.

NOTICE.

Notice is hereby given, that in conformity with the authorization of the special election called and held for that purpose in said school district on the 6th day of August, 1912, the Board of School Trustees of School District No. 34, Twin Falls County, State of Idaho, is about to issue and sell the coupon bonds of said district in the sum of \$412,000. Said bonds will be issued in denominations of \$500.00 and of \$250.00, dated November 1, 1913, bearing six per cent interest, and payable semi-annually and will mature January 1st, 1933. The proceeds of said bonds will be used for the purpose of providing a school house in said district, with all necessary furniture, desks, black-boards, globes, charts, outfitting, etc.

Notice is further given that said Board will sell said bonds at said school house in said district, Rogerson, Twin Falls County, Idaho, on the 23rd day of September, 1912, at the hour of ten o'clock A. M.; that said bonds will not be sold for less than their face value, and that the Trustees are authorized to reject any and all bids and to sell said bonds at private sale if they deem it for the best interest of the district, and all moneys arising from the sale of said bonds must be paid forthwith into the treasury of said Twin Falls County, and be immediately available for the purposes aforesaid.

W. C. POND, Clerk of Board of School Trustees.

NOTICE.

Notice of the time fixed for hearing objections to special assessments for the purpose of defraying cost and expense of construction of a good and sufficient sewer system in Local Sewerage Improvement District No. 5, of the city of Twin Falls, Idaho.

To the owners of property in Local Sewerage Improvement District No. 5, of the city of Twin Falls, Idaho.

You are hereby notified that the assessment roll of special assessments against the property in Local Sewerage Improvement District No. 5, of the city of Twin Falls, for the purpose of defraying the cost and expense of the construction of a good and sufficient sewer system in said Local Sewerage Improvement District No. 5, as made out and certified to the city council of said city by the committee on streets and the sewer committee, in said Local Sewerage Improvement District No. 5, is now on file in my office, the date of filing of the same being September 15th, 1912.

And that the city council of said city has fixed the 25th day of September, 1912, at the hour of 8 o'clock P. M., at said city, at the council rooms in said city, as the time at which they will hear and consider objections to said assessment roll, in the proceedings in making such assessments, or the amounts levied against any particular lot or parcel of land.

The owner or owners of any property which is assessed in such assessment roll, whether named or not in such roll, may, within ten days from the date of the last publication of this notice, file with the city clerk his objections in writing to said assessment roll or to portion thereof.

Dated this 15th day of September, 1912.

Date of last publication September 15, 1912.

STUART H. TAYLOR, City Clerk.

City of Twin Falls, Idaho.

ALIAS SUMMONS.

In the Probate Court of Twin Falls County, State of Idaho.

W. Levin, Plaintiff, vs. Peter W. Kraft and Mrs. P. W. Kraft, his wife, Defendants.

The State of Idaho sends greetings to the above named defendants.

You and each of you are hereby summoned to appear at the above entitled court to be held at the Probate Court room in the Court House in said county in the above entitled cause at 10 o'clock upon the 25th day of October, 1912, and answer plaintiff's complaint on file in said court or plaintiff will take judgment against you as prayed for said complaint.

Said action is brought to recover from you one hundred sixteen \$5.00 Dollars, and interest thereon from July 12, 1912, at the rate of 7 per cent per annum, for goods, wares and merchandise sold and delivered by plaintiff to said defendants at their instance and request, between the 15th day of May, 1912, and the 12th day of July, 1912, of the agreed and reasonable price of \$116.65, and also for the further sum of \$35.00 money loaned by the plaintiff to the said defendants, which said money was loaned by plaintiff, P. W. Kraft, for her use and benefit, which said Peter W. Kraft, promised and agreed to pay with interest on the same at 7 per cent per annum from the 7th day of July, 1912, and costs of suit, all of which will more fully appear from the amended complaint on file herein, a copy of which is attached to this summons.

Given under my hand and the seal of said court this 11th day of August, 1912.

J. M. SHANK,

Judge and ex-officio Clerk of the Probate Court.

BACOCK & GRAHAM,

Attorneys for Plaintiff.

NOTICE.

SPAIN AND GIBRALTAR

"Learn One Thing Every Day"

No. 4. CATHEDRAL OF SEVILLE

Copyright, 1913, by The Associated Newspaper School, Inc.

There is a Spanish proverb that says, "Whom God favors he gives a house in Seville." The privilege of living in that bright, gay city is considered by a Spaniard to be the height of happiness. Other cities are larger, wealthier, or more important politically than Seville; but none holds a higher place in the hearts of the Spanish people.

When in the beginning of the fifteenth century the old cathedral was damaged by an earthquake, a meeting was held to discuss what should be done to restore it. Then one proposed that, instead of repairing the old church, they should build a new edifice larger and more magnificent than had ever been imagined. They planned a cathedral that should make all who saw it wonder at the daring of those who began it. What the public funds would not supply they agreed to furnish out of their own purses.

It took only 117 years to build, which is a short time as old cathedrals go. After St. Peter's at Rome and the Mezquita at Cordova, it is the largest church in the world. It is 414 feet long, 271 feet wide, and 100 feet

high to the top of the nave. The immense pillars, as you look down the church between them, seem to diminish in the distance to the thickness of reeds. Many another cathedral could stand inside the nave of this one.

There are numerous churches in the city, most of the older ones built on the foundations of mosques. The church of La Caridad has a strange legend connected with it. Don Miguel de Manara, the founder and been a prodigal in his youth, a sort of Don Juan, and was known far and wide for his excesses. One night when he was returning home alone he lost his way, and wandered about for a long time unable to find his home. At last he met a funeral procession, and stopping one of the bearers inquired who it was that they were taking to eternal rest at such an hour.

"Don Miguel de Manara," he replied.

Greatly surprised at hearing his own name, Don Miguel uncovered the face and saw that his own features. The procession immediately vanished; but left him so deeply impressed that he turned religious and built a church and a hospital.

No. 5. NIEW OF ALHAMBRA, GRANADA

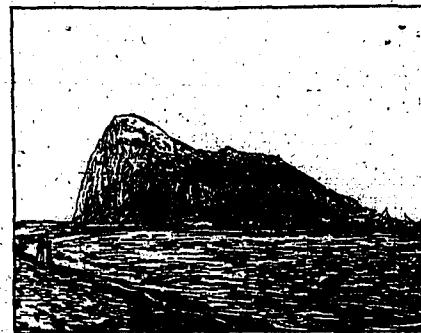

The city of Granada was the last Moorish stronghold in Spain. The usurpers had been driven from province after province, while the power of Castile increased in all the country round. Only the province of Granada held firm. Even there losses in war had so weakened the Moors that their kings paid tribute to the Christian rulers, down to the time of Muley Hassan. He was a proud and cruel monarch, so fond of the dignity his fathers had held that he not only withheld the tribute, but even made inroads into Spanish territory.

A ten years' war followed. Spain determined to drive her enemy out of Europe once and for all. In battle after battle the Christians narrowed Hassan's kingdom, till the people of Granada rose in revolt against the ruler whose bad luck and tyranny made him unpopular. He was dethroned, and the kingdom given to Boabdil, his son. Boabdil was anything more unlucky than his father; for Ferdinand and Isabella pushed their conquest little by little up to the very walls of Granada.

A long siege followed. The Moors, as they lost the power they had held so long over the rich and delicious lands of Spain, tried every trick of warfare without effect. Ferdinand had given orders not to attack the city. He intended to win by starving his enemies rather than by fighting.

No. 6. ROCK OF GIBRALTAR

One night over two centuries ago a Michael's cave, where dawn overtook them, and where they remained all through the next day. As soon as

darkness had fallen again they scaled the wall, surrounded the signal house, and in a few moments overpowered the guard. The British in the fortress never dreamed of danger so close at hand. Ropes and ladders were lowered stealthily over the precipice, and the Spaniards, feeling sure of victory, brought up several hundred men for the attack. If all had gone well, Gibraltar might have been in the hands of Spain again before sunrise; but some part of the work was clumsily done, for British sentries caught the alarm, and a body of grenadiers hastily called together rushed out upon their midnight assailants. Gibraltar was saved for the British. Some of the Spaniards they hurried over the cliff; the rest surrendered and were taken prisoners.

The history of Gibraltar was for many centuries one of siege and capture. The rock was first known to the Greeks and Romans as one of the pillars of Hercules; the other, Mt. Atlas, stands on the African coast. But at that period, when ships hardly sailed out of the Mediterranean, the "pillar" was unimportant to any great nation in war. It fell into the hands of Phenicians, Romans, Carthaginians and Visigoths at different periods in history. Tarik, leading forces when he crossed from Africa, which was therefore called Gabel-al-Tarik (Hill of Tarik), the original form of the name Gibraltar. It fell into the hands of England after the Spaniards and Moors fought over it for centuries.

Once again, in the great siege that began in 1779 and lasted more than three years, England came dangerously near losing the fortress. Spain and France took advantage of British losses in America to open fire on the Mediterranean stronghold. After the garrison of over 6000 men had been reduced to starvation, and only the bravery of General Eliot could keep them together, Gibraltar was bombarded from the mainland. Just when his command seemed lost under the strain of attack and of hardships endured so long, the Scotsman led his troops to the attack, and, taking the much larger Spanish army by surprise, drove them back and burned their fortifications. Again Spain and France attacked from the sea; but Eliot burned their ships with red-hot cannon balls. The struggle was renewed from time to time all during the siege, until at last peace was proclaimed. General Eliot, returning home, was received with the highest military honors for his courage.

England has been offered all of Spain's possessions in Africa in exchange for the one great sterile rock; yet nothing will induce her to give up that hold on the gate of the Mediterranean.

In each issue of The Times three different human-interest stories will appear. You can get a beautiful intaglio reproduction of the above picture, with five others, equally attractive, 22½ inches in size, with this week's "Mentor." In "The Mentor" a well-known authority covers the subject of the pictures and stories of the week. Readers of The Times and "The Mentor" will know Art, Literature, History, Science, and Travel, and own exquisite pictures. Out for the Liberal Stand and Class Book Store. Price, Ten Cents. Write today to The Times for booklet explaining The Associated Newspaper School plan.

ARTESIAN CITY NEWS.

Artesian City, Ida., Sept. 10, 1913.
Miss Bancroft, primary teacher in Murrumbidgee, spent Sunday with Mrs. M. E. Eden.

J. K. Gourley left Thursday for Evanston, Wyoming, where he will visit with relatives.

Frank Terrill, Jr., had the misfortune to break one of the small bones in his wrist this week.

A party of friends surprised Mrs. Will Goodman Wednesday, it being the occasion of her 28th birthday. A good time was enjoyed and delicious refreshments were served. Mr. Goodman received several very pretty presents from relatives and friends.

Roy Hill, who is working on Mr. Crocker's ranch south of the lake, nearly lost his life while attempting to swim across a deep channel just south of the lake. He is now down for the third time before he was pulled out.

Roberta Moyer, who has been visiting in Oakley, is home again.

Boys with 22's and duck hunters armed with shot guns cannot be too careful. Several times in the past few days stray bullets have "just missed" some person, and Mrs. Tracey was actually shot by a 23 bullet. Nothing prevented a tragedy but her clothing, which stopped the bullet.

A dancing party was given Friday night at the home of Orson Strong in honor of Miss Chloee Strong, who has been in Oakley attending institute for the past six weeks and who is just on the eve of departure for her school in Oregon.

Bruce Rose has traded his tract in Artesian City to Tom Rutledge for a tract in Hansen and has moved his family to that place. Mr. Rose has recently been appointed mail carrier for that section.

Mrs. J. R. Gourley has been quite sick this week.

We had our first frost last night. Hope everyone had their tomatoes covered.

W. G. Moyer's separator has arrived and he has engaged Joe Adamson to run it for him.

Mrs. Essie Workman has been helping Mrs. Dave Workman during threshing.

PARISIAN SAGE FOR THE HAIR

Unusually—instinct—colorless—surgery hair made—fluffy—soft—abundant—and radiant with life as one. The Parisian Sage. It comes in 50c bottles.

The first application removes dandruff, stops itching scalp, cleanses the hair, takes away the dryness and brittleness, increases the beauty of the hair, making it very soft and lustrous.

Everyone needs Parisian Sage.

SATURDAY, OCT. 4

BOUNTEOUS CROPS IN IDAHO.

Bank Review Shows Excellent Yields in Sight.

Following is the more recent trade report, respecting Idaho section, as compiled by the National Copper bank of Salt Lake:

Premont, Blingham and Bonnellville counties—These constitute the upper Snake river valley of eastern Idaho, and are so much alike that they should be considered together. A blackfoot banker reports: "Our crops are the best I have seen in the previous years of my residence. Grains and potatoes show the most gain. Krum, has a lighter crop, but a higher quality than last year. Dairying is increasing and conditions were never so good. Shelling, a little further north, says: "Succulent (dry) a third heavier crop than last year. Larger acreage and yield of wheat, both irrigated and unirrigated. Shrimp increase in the local industry. Potatoes will be a record again. (Shelley, blackfoot and Idaho Falls are among the heaviest potato shipping points in the west.) Idaho Falls—Unirrigated grains surpassing any previous year. Crops of high quality and yield. Hogs being raised in greatly increased numbers.

Higby—"Small grains will yield about 20 per cent more than last year. Wheat, oats, barley and corn about 10-15 per cent ahead. We expect the biggest harvest ever in this valley.

Reboux—"The best sugar beet yield ever known here. Irrigated grains breaking all records, wheat averaging a ten bushel gain, and oats and barley yielding high as ever. 100 bushels per acre, respectively. The farmers will deliver 35 to 40 per cent more products than last year, with prices better.

St. Anthony—"Small grains about double last year's. Twenty-five per cent more than last year. Wheat, oats and barley are all up. Idaho Falls reports: "The finest crops for years in both big and little Lost river valleys. The wheat crop will be 50 per cent heavier than last year. Barley, oats and hay almost double. Exceptional potato crop.

American Falls district—An American Falls banker says: "We will bring to market a million bushels of the finest hard wheat. We have the best crop ever produced here. Aberdeen reports "all crops the best we have ever seen. Dairying has doubled in the last year."

Lincoln, Twin Falls and Cassia counties—These were a successful sheep range nine years ago. Today they are rapidly coming under the plow. Richfield—Agricultural crops are better by 20 per cent or more in every crop than ever before. Hauling shows a record crop. Gooding reports: "Small grains have increased about 30 per cent, corn 200 per cent; hogs have trebled and dairying doubled."

Burley—"There will be between 50-

double. The yield in fruits will be 40 per cent more than last year. Payette—Apples and pears are nearly normal in quality and high in quantity. Peaches are good. Payette will export about 750,000 in apples alone. Apples and dairying greatly increasing.

BARNES' BIG SHOWS

Will be in Twin Falls, Saturday, October 4.

Al G. Barnes big three-ring with animal, circus will give two performances in Twin Falls on Saturday, October 4. The coming of this show is affording a great deal of interest and excitement in the city with the little ones but the grown ups, too.

There are 350 animals with the Al G. Barnes circus, each of which is a sight to see. Among them are forest bred lions, twenty altogether, a herd of elephants, a caravan of camels, royal Bengal tigers, panthers, leopards, jaguars, hyenas, felids, monkeys of every known species, dogs and ponies.

Without doubt the most dangerous, death defying, thrilling and prodigious act ever offered to the public may be seen with the Al G. Barnes circus in the act of the world's only act with his twenty men eating forest bred African lions.

One of them and one troupe of royal Bengal tigers in the world may be seen with the Al G. Barnes wild animal circus. They represent an expenditure of \$25,000. The most famous animals were owned and kept for the sole pleasure of the Maharaja of Ceylon until several years ago. A few of the most famous animals to be seen will be that of Mr. Robert Thurnston and his troupe of bears, Capt. Stonewall and his panthers, Prof. Emory and his herd of Shamoos elephants, Miss Ethel Bond and her four educated Arabian stallions which perform in motion with a lion, bear, dog and a monkey. Capt. Dingelhart and Prince Congo, an Orange Outing who does everything but talk. A gorgeous street parade one mile in length, headed by two trumpeting military bands, will leave the show grounds at 10:30 o'clock on the day of the exhibition. Performances will be given at 2 and 8 p. m. The doors are opened one hour preceding the performance.

HANSSEN HAPPENINGS.

Hansen, Ida, Sept. 15, 1913. Those attending the fair last week from Hansen were as follows: Misses Claret, Davenport, Pauline and Laura Hale, Mrs. Leighton and Mrs. Danner. The directors of the fair bank held a meeting Tuesday of last week. Mrs. Emma Harris and daughter were in Twin Falls. Quite a number of the neighbors

Pelmoer will visit other points in the west before returning to Missouri. Charles Colner was in Ogden, Utah the first of the week. Mr. Colner purchased 6,700 lambs to feed for the winter.

KIMBERLY, IDAHO.

Kimberly, Ida., Sept. 16, 1913. E. Cluhorn left Sunday evening for Payette, where he will receive a band of two thousand sheep to be fed on his ranch near Kimberly this winter. Little Mary Summers, who has been quite sick for the past ten days, is improving slowly.

Mr. and Mrs. D. Muesle and family have returned to Kimberly for the winter. Mr. Muesle having and charge of the fish hatchery at this point for the past eight months.

J. E. Severance has moved back to his ranch west of town, having recently resigned as janitor of the school. Miss Mary Hale, Miss and Mrs. Moran and Miss Heffelford, came in from their respective homes Sunday morning to be ready for school Monday morning.

W. H. Turner, who had the misfortune to get his shoulder dislocated a few days ago, was able to go out and able to attend to business again.

Henry Jones of Hottelville, was transacting business in town Friday.

C. Brown was receiving cattle in Hansen Friday for a Portland commission company.

The sugar beet company have been dumping refuse to the city, which will begin about October 1st. W. P. Brecken will have charge of the station west of town.

John W. Hardin and W. P. Brecken made a business trip to Twin Falls Monday.

School began Monday morning with an enrollment of two hundred and seventy pupils. The school board are wondering what will have to be done to take care of the increase which is sure to come within the next week or two. With only eight rooms and eight teachers the average for the first day would be thirty-five pupils to a teacher.

The hog fair was well attended and much money was made. It was a good time. Something like two hundred and seventy dollars was paid out for premiums. The fair committee are already taking three days for 1914.

Kimberly and Piller finished their series of five ball games Sunday at Kimberly. Piller winning. Saturday's game was a score of 11 to 1. Saturday's game was a good one and some fast playing was shown by both teams. Kimberly winning by a score of 3 to 1.

Kimberly won three out of the five games played so far this season. Arrangements are being made for more games, one of which is to be played at Piller, September 27.

The school board have ordered a few small improvements made and around the school building, such as drinking fountains, electric light for each room and some grading around the building.

H. E. Butler says he has grown wheat on the same ground for three years and total yield was over one hundred acres for the three years. Yield 2052 bushels, making a grand total of 3,283 bushels for the three years. It is a large yield to report, let's have them.

O. S. Pomeroy is building a new house on his ranch north of town. J. E. Halford is building a new house. Several potato diggers began work Monday morning near Kimberly.

INSPECTS LOST RIVER PROJECT.

Governor Haines Looks Over All But Deserts Project.

The all but deserted Lost River irrigation project under which there is 80,000 acres of rich agricultural land in three bodies and the failure of which caused those who settled upon the land to move, was inspected by Governor John M. Haines of this state this week while the chief executive was in the southwest, having gone to Idaho Falls to attend the annual Roundup and the Bonnellville county fair. Governor Haines went over the project from one end to the other, looking at first hand information as to the actual condition and to learn everything possible that he could from the actual settlers left of whom he met over half his hold out. He promised, but it was gathered from an interview with him today that he inspected the project and the information with a view of later submitting his views to the land board on a possible solution which might mean the reclamation of the land.

"I propose to go over all of our irrigation projects, inspecting them personally, because I want to see the actual conditions and to talk first hand with the settlers on them," stated Governor Haines today. "I had never before seen the Lost River project, although I had been at the Roundup and had seen parts of the project. On my trip this week to Idaho Falls I took advantage of it to go over the project to another. I talked with a majority of the settlers on the project and then they showed me the ideas of a remedy of the condition on the project might be. I visited with some of them on their farms. One of these located on the Powell tract has had a successful dry farming year, raising dry farm crops of wheat and alfalfa, the return running 60 to 70 bushels to the acre.

"The project is made up of 30,000 acres, making in all a total of 80,000 acres. The Powell tract is the largest and it is certainly a beautiful piece of land, covered to some with heavy snowbrush, partly cleared, and having a good show of alfalfa. It is a very fine piece of land if any looking is needed for irrigation purposes. If water could be delivered to this tract of land it would be a fine thing for the project, they would make fine agricultural lands—Capital News.

When you see the New Automobile Singer with a system of gauges that guides the work. Does six times the amount of work done on the ordinary sewing machine. H. P. Chapp, Twin Falls. Sept 16-19 pd

Men's, Women's and Children's footwear. Prices right.

600 and 60,000 tons of sugar beets delivered at the new sugar factory. Unirrigated is yielding as high as 60 bushels to the acre. Many more crops. The revenue gained from the farms will, in our opinion, be more than double what it has been before.

Report—"Grain, hay and potatoes yielding a record crop. The grain well, with many orchards coming into bearing."

Kimberly—"All crops better than last year. Promise of the best results ever obtained."

Twin Falls—"The acreage and condition of all crops is better than ever before."

Buhl—"Crops very good with a larger acreage than ever before. Jerome—"Crop conditions far better than ever before. Small grain acreage at least 50 per cent greater than in any previous year and will show better yields. The growing of seed beans and peas under contract with eastern seed houses has commenced this year, with 100 acres of crop. Hogs have more than doubled in number. Dairying is particularly profitable and promising."

Ada, Canyon County—Washington county—This district is in the western part of Idaho, on the lower Snake river, and is commonly known as the Idaho-Payette district. It is a territory for a considerable territory besides these three counties, says: "In the sheep industry there has been a most striking gain. This is primarily a lamb producing country, and our lambs, in excellent shape, have come into a high, steady market, giving handsome profits to the grower. Our sheepmen are in better position than they have occupied for several years."

Nampa—"Crops mild, dairying has doubled in 18 months."

Meridian—"Everything of high quality, though some crops short in yield. The number of sheep reported on crop will be at least as great as last year, and in some cases twice as much."

Parna—"Seed crops have doubled this year, and the number of hogs has

women gave Mrs. R. J. Neely a surprise Friday afternoon.

Mrs. Andrew Crawford left Tuesday morning for Appleton, Mo., to visit her mother and sister.

Mrs. J. McCullough spent Sunday in Hilly, visiting relatives.

Mrs. J. A. Felton was called to Kimberly Monday to assist in caring for her granddaughter, who was seriously ill.

Mrs. J. McCullough moved in the house recently vacated by W. E. Smith.

Mrs. E. P. Hinton was in Murtaugh, Tuesday.

J. A. Felton returned home Tuesday from Nysen, Oregon, where he has been for the past two months.

The sale at C. A. Killian's was well attended, with everything sold well.

Mrs. Ellwood and daughter of Ogden, were in Hansen Thursday.

Mrs. Abbie Leighton and son Ralph left Saturday morning for Buxey, where they expect to take charge of the Buxey school.

Wendel Scherrup took first premium on barley and corn and potatoes and Fred Scherrup took first premium on oats at the Kimberly fair Saturday.

Mr. H. Hubbard has been visiting here for the last week. He and his family, for the past month, have been visiting here.

Several from Hansen attended the Nampa fair. Mr. Hubbard and family, for the past month, have been visiting here.

books as most of the books will be disposed of as the county has adopted a new kind.

Lowland, where they will enter school.
