

The plaintiffs state that they have been obliged to cover the banks up with a high wall of concrete and to build a levee on the east side of the river, thus cutting off the water flow in that direction. They urge further "that the United States of America will not make conveyances of the lands of the United States to the state of Mississippi and the levee work is a constructive and a permanent improvement of said lands, and is a project through which Mississippi can be saved."

In conclusion the plaintiffs petition the board to "order the Mississippi levee to be enlarged and restrained from diverting or taking the water from the Salmon River and that a substantial levee be built on the Mississippi river and that a dam be constructed on the same pending the determination of the board of the Mississippi river, and only have an outlet for the water locally, but will be subject to the waters arising from the same, and the board will be authorized to take such steps as it shall deem proper for the relief of that state and the people thereof, and filling made by the state and others, and the board will be authorized to take such steps as it shall deem proper for the relief of that state and the people thereof, and the board will be authorized to take such steps as it shall deem proper for the relief of that state and the people thereof."

 The speakers will be Miss
 Koller of the Home Economics Ex-
 tension Department of the Univer-
 sity of California at Berkeley and
 C. E. Johnson of Gooding, and
 MacHoe, teacher of agriculture
 at the Twin Falls high school.
 A program somewhat similar to
 one at Kimberly will be carried
 at Maroa on the 16th and Duhl on
 the 17th.

In his interview Mr. Chapin says: "I was at all times fully conversant with all the representations that were made to the state and the laws of Idaho provided a basis for the investment of money, and I sold in England some bonds of the United States land board, which the banks failed to pay the interest on these bonds. I came out here to find out why, in order to be able to tell the heads of the banks what they should do."

"I found the situation entirely different from what I had expected. I was told that the state had entered into a contract between the company and the state land board, which contract the state land board is based upon, a contract between the United States and the state of Idaho."

"The state land board is composed of officials, whose other duties take them away from the state, so it is possible for them to give the attention to affairs on the various projects necessary to really know what should

tion hall on Monday, October 27, 1902, the third act is successful; "The Wolf in the Fold" is a masterpiece in order to carry out the superstitious belief of the Canadian forest that when a howl is heard in Indian summer means death for some man before the first snowfall. The scene with the wolves, that bore in this act-for the death of William McDonald, the villainous engineer, which occurred on a dark stage, so dark that the audience who sat in the front row of it. There comes a fearful silence. One is killed—why?—the engineer or the F. Canadian? A math is struck and the scene ends with the death of one of the play, and one of the greatest scenes ever staged.

south of this city, narrowly escaping burning. Too thin, backing to the place allowed the blaze to enter the partition, which caused a commotion for a short time. It was extinguished. Only slight damage resulted, which was promptly paid by the Farmers Mutual Insurance Co., a county organization, which pays its losses by assessments on the members. Enough money was on hand so that no assessment was necessary.

If the sportsmen of Twin Falls county desire anything in the way of fish fry from this state they should get busy and make some demands for the coming year. During 1913 several million of fry were distributed by the state and not one of the big number ever entered a Twin Falls stream. The state even purchased trout for the upper Snake river private preserve streams and went to considerable expense to help stock waters which are not accessible to the public. Twin Falls should get busy and make a strong effort to stock all the waters of this county which are fast being depleted. Unless something is done in one or two years the fishing will have to be cut out for at least two whole years.

Some idea of the status of Idaho irrigation bonds was given straight off the reel last week in Boise when a conservative representative of eastern bond houses gave out some wholesome truths for the benefit of the state land board. He stated in brief that until the state was ready to stand back of every irrigation project within the state that the bonds would be regarded doubtfully by the east. In a word, it was a direct slap at the present management of the Carey act lands under the state land board. In order to fulfill the ideas of the east a strong Carey act commission distinct and separate from the present political system must be put in operation. Such a commission representing the state must be in close touch with the irrigation projects, that its guaranty means that the project is worthy both from engineering and financial standpoints. Statements made by private Carey act projects must be made to conform to strict rules laid down by the state and such statements to contain only truth. Idaho needs a law similar to the Blue Sky law before any more irrigation projects are put on the market. It needs men who are above party politics to administer to the affairs of the most important business of the state. Along with its protection of the bondholders should be greater protection of the settlers on such projects—something that has never been done under the politically managed Carey act land up to the present time.

DIRECTORS AND WRECKERS.

After the disaster on the New Haven Railroad at North Idaho, in which twenty-one persons were killed, the coroner's inquest placed the blame upon the engineer of the telegraph train, and the flagman and conductor of the train which was telegraphed. Now the Interstate Commerce Commission, while not exonerating these employees, extends the arraignment to include the men higher up as well, publishing in its report the names of the route directors as the men whose negligence was responsible for the lack of discipline which caused the wreck. In a passage which, according to the *Baltimore Sun*, "strikes at the very heart of the responsibility for this and many similar disasters," the commission says:

"The directors assumed to dispose of their whole responsibility of the subject by a vote depositing it in bulk upon the president, and thereafter, as far as appears from the records made, no further inquiry and took no further action, although a quick succession of these disasters continued."

"This typifies the whole situation. They assumed the vote was self-enforcing."

"Directors by law are not mere figureheads, nor are their duties confined to the bare direction of the finances of a corporation. They are duty-bound to exercise the highest degree of supervision against the board of directors. In this business they are not divorced from themselves by a mere vote delegating it upon another, unless there is an exercise of the legal standard of care and diligence in supervision to ascertain and know that it is performed."

After tracing the cause of the wreck to "man-failure" all along the line,

from directors to trainmen, the commission urges the immediate adoption of "an adequate system of supervision which will give those in authority data and positive information as to whether or not safety requirements and rules are observed." To quote further from the commission's report: "The direct cause of this accident was the failure of flagman Murray properly to control the speed of his train in order that he could bring it to a stop before passing automatic signal No. 23, and the failure of Conductor Adams to make certain that his train was properly protected. An additional cause was the failure of Engineer Wende to bring his train to a stop, as required by the rules, before passing automatic signal No. 23, which was in the stop position."

While this accident was directly due to failure of engineers properly to perform their duties, the signal system in use was entirely inadequate to safely direct and govern the movement of the large volume of traffic over this line, and there was a deplorable lack of supervision on the part of operating officers; on this account the conditions which led up to this accident were possible."

Nothing that there has been in the past too great a tendency on the part of the boards of directors of banks, of transportation lines, and other great corporations to shift the attention to details intimately connected with the properties which were placed in their care by the shareholders; the New York Herald goes on to say:

"We believe that the time is past when directors can shirk and avoid blame for such breakdowns of management as have so frequently occurred in recent properties, causing loss of millions of dollars to depositors in the case of banks and causing the loss of lives of passengers in the case of the case of railroads. They should direct or resign. Soon they will discover that they must."

Citing facts to show the negligence of the New Haven directors in the enforcement of discipline, the New York Times reminds us that—

"In the thirty-two months that record a long series of New Haven railroad disasters, the report says, there were 153 violations of engineering rules, 100 violations of the rules of the improper flagging. These are offenses each of which, according to Vice President Whaley, constitutes the 'worst crime a railroad man can commit.' There is no adequate punishment for this capital crime except dismissal. But only twenty-nine employees were discharged and twenty-seven flagmen dismissed. At the recent hearing before the commission there was considerable testimony that such violations were a frequent daily occurrence and not usually reported. Yet the directors, who on October 17 last ordered the president to make a searching investigation into the competency of engineers employed by the road, and to leave nothing undone which, in his judgment and that of his associates, would conduce to greater safety in operation of the railroad, failed to demand the strictest discipline of the road for a report presenting the results of their investigation. Instead, disaster followed disaster in quick succession, and the road's official continued to let off men guilty of the worst of railroad crimes."

"The charge is pressed home, and deservedly. Ultimately, the directors of a railroad are responsible for its discipline, especially the discipline that enforces safety to the traveling public."

All agree, however, that whatever the negligence of the New Haven directors in the past, they are now awakening to a sense of their responsibility. Thus we read in the *Brooklyn Eagle*:

"After the Stanford wreck the directors of the road dropped the president under whose administration most of the disasters have been believed, and replaced him by a railroad man of good reputation in the west. The new man had not warned his chief officer before the Wallingford wreck hit him, as fruit of the old system which the Interstate Commission denounces. Since that wreck he has subdivided the superintendent's job, so as to secure closer control between the men and the superintendents, and so that the latter may have an opportunity to exercise their intimate knowledge of the operation of the sections for which they are responsible, and he has secured a large appropriation for a modern signal system on this very section where the wreck happened."

"But even if the New Haven no longer needs this official chastisement, the attitude of the Interstate Commission is no less significant or promising. It means in future to secure safety of operation on the railroads as well as reasonable rates, and there is little likelihood that congress will refuse to confer the power to make its supervision in that direction effective."—*Literary Digest*.

TALKS ON THRIFT

NO. 12—PITFALLS FOR THE UNWARY.

"The little savings bank in the home means more for the future of the children of a family, almost, than all of the advice in the world. It gives them the right start."—William McKinley.

In the last annual report of the postmaster general it was shown that more than 4,000 cases of fraudulent use of the mails by swindling promoters were investigated last year. More than 1,000 of the promoters were arrested, and hundreds were convicted. In the last two years, the report says, these men have robbed the American people of \$100,000,000.

In a recent message to the New York legislature, Governor Sulzer said: "One of the most widespread of public grievances in connection with the purchase of stock arises from false or fraudulent prospectuses, statements, or advertisements regarding corporate securities. Under our law as it now exists it is difficult to bring to justice persons who, by means of false and fraudulent statements, advertisements and promises, deceive and wrong the investing public. These deceptive practices have been attacked under the federal laws, forbidding the use of the mails for fraudulent purposes. I recommend amending the law of this state so as to make it a criminal offense to issue any statement, or publish any advertisement, as to the value of any stock or other security, or as to the financial condition of any corporation or company, knowing or about to issue stock or securities, where any promise or prediction contained in such statement or advertisement is known to be false or to be not fairly justified by existing conditions."

A bill has been introduced into the New York legislature forbidding the publication and circulation of such false or misleading statements, and providing that the penalty should be imprisonment for three years, or a fine of \$5,000, or both. This bill probably will become a law. But it does not and until all the other states pass similar ones, it behooves the people at large to be on their guard against the swindler.

We repeat the advice we gave in a former "Talk": "When you have saved sufficient money to make an investment worth while, consult a banker or newspaper in your community concerning the wise disposition of it. Never put money into any investment offered by a stranger without looking him up carefully and getting sound and unprejudiced advice."

Remember the sold brick lion appears in myriad forms.

THREE BATTLESHIPS FOR NAVY

Secretary Daniels Advocates Use of Less Money Asstark.

Washington—Three new battleships and a proportionate number of submarines and other vessels are the aim of the Wilson administration in shaping its naval policy for the December session of congress.

It became known Tuesday that, in all probability, Secretary Daniels of the naval department would put into effect his principle of "less money and more ships" by advocating the purchase of three battleships instead of the larger part of the appropriations of \$118,000,000 to build three powerful warships—some more than the usual 16,000 tons, 16-inch guns, and a single battleship was obtained after a stormy fight in the last congress.

With the addition of three first-class battleships, naval officials hope the United States will resume its place next to Great Britain in naval fighting strength, passing Germany, which took second place when the United States dropped to third.

While President Wilson never has made any public declaration on the battleship question, it is understood that he favors "an adequate navy." What particularly encourages naval officials to believe three battleships will be forthcoming is a report that in making expenditures, the framers of a bill calculated on \$118,000,000 for naval construction, an increase of about \$8,000,000 over the last appropriation.

If congress should authorize the construction of three battleships, they would be of the same type as No. 33, which has not been named. The object is to secure blocks of four vessels, each having the same speed and fighting ability, so as to permit of uniform division manuevers.

The new ship, like No. 33, would be equipped with 12-14-inch guns, with a displacement of 30,000 tons, and would be of almost equal speed, a compromise between the battle-cruiser type of the British and Japanese navies and the heavy building of low speed of German construction.—*Statesman*.

Flames From the Sea.
Strokers along the Explorator at Opan, Argylshire, Scotland, the other night were met by an unexpected spectacle. Opposite the Alexandra Hotel great tongues of white flames were seen leaping straight out of the sea not far from the beach. The phenomenon continued for about an hour, and drew a large crowd of onlookers, who speculated freely as to the cause. Stones were thrown in upon the flames, but had no effect. No conclusive solution of the mystery could be offered, but it is explained that the apparently strange occurrence was due to a quantity of hydro-carbon, which had been thrown into the sea

IDAHO DEPARTMENT STORE

FILER NEWS.

(Filer Journal.)
A girl was born last evening to Mr. and Mrs. Wm. Buehling.
Wm. Hoag has bought a band of sheep which he will feed this winter.
The Woman's club will meet next Wednesday with Mrs. Sherrill.
The Ladies Aid will hold a bazaar on November 20th. Full particulars later.
The basket ball team at the high school are getting lined up for success.
Juneau Shinn returned last week from a visit to Helena and other points in Montana.
Mrs. Reeves and children visited her sister, Mrs. Erskine, at Twin Falls last Saturday.
J. T. Cartwright was operated on at the hospital in Twin Falls yesterday, and late reports from his bedside are very favorable.
F. D. Brown of Orient, Iowa, father of Ray and Henry, is visiting the boys for a few weeks.
Chas. Allen has returned to Rainer to resume his duties in the Nibley-Channel lumber yard at that place.
Juneau Shinn has left Ben and Hammerquist to attend school. He will work morning and evenings for the J. H. Strauss clothing house.
A daughter of H. C. Davis of Grandger, Wash., is visiting relatives here. She is a guest at the home of Mr. and Mrs. Arthur Baxter.
Mark Cox's household goods will be offered for sale today in front of R. H. Goodpasture's shop. Mr. Cox will remain in Den Moines for a time at least.
Miss Luteala Whitson, daughter of Mr. and Mrs. O. N. Whitson, and Chas. W. Knapp, were married at the home of the bride Tuesday afternoon at 3 o'clock. Rev. Harbaret officiating.
A slow steady rain commenced falling some time during Monday night. The dust was getting a little looser, and the rain came in time to lay the dust and put the ground in condition for fall plowing.
Last Saturday noon work was commenced on the cement walks which are to be laid this fall. The contractors have a large force of men, and if the weather will be good they will soon have the work done.
M. Mogensen has purchased an additional 40 acres across the road from his place from Jas. Fitzgerald. Mr. Mogensen has sufficient improvements for an 80 and it will make him a fine place. Consideration \$125 per acre.
Ed George, the new harrow in the Millins house, has come to stay. He has bought the J. W. Price property across the track consisting of three acres, and will become a Filer booster for the jump start. Mr. Price will return to Pocatello and take his old position with the Short Line.
Raymond Taylor, son of C. B. Taylor (the Filer hotel), has been an American Falls and will have charge of the lunch counter in the hotel. Raymond has had lots of experience in bar work and management of the lunch counter will find him ready and anxious to please on all occasions and at all hours.
Wm. Snellman has moved into a 40 southwest of Filer.
C. A. Love has added a free delivery wagon to his business.
A new restaurant has been opened by C. M. Hassford in the Elms building. The proprietor hails from Kansas and has named the place the Kansas restaurant.
A. J. Ripley, father of the Ripley three, has rented his place here to a Mr. Smith of Bull, for the winter, and will move to Twin Falls, where he has rented a place.
F. C. Graves has sold his automobile to a party in Hollister. Of course he is in the market for a new one and automobile agents must govern themselves accordingly.
Last Saturday night Robt. Miller and family returned from their move to California, satisfied that there is no place like Filer. Mr. Miller thinks he may go on a farm in the spring.
The Twin Falls street sprinkler was returned home Monday. The thanks of Filer people go out to the Mastic Co. for the sprinkler. The Hub City will have a sprinkler of her own, now that its necessity is so obvious.
Emil Sommer has rented the Mrs. Altman place cornering with the Abe Davis farm southwest of Filer. Emil is a good farmer and will have a splendid place on which to show his ability the coming year.

KIMBERLY, IDAHO.

Kimberly, Ida., Oct. 15, 1913.
W. H. Turner was traveling business in Twin Falls Saturday afternoon.
El R. Johnson drove to Hansen Saturday afternoon on business for the Sugar Beet company.
Robert Meadams, son of Sam Meadams, decided he would go home for awhile and on Friday evening purchased two loaves of bread and two boxes of matches from one of the local stores and left town to do this time no trace of him has been found.
Deet hauling has begun again in earnest and the company expects to load from three to five cars per day from now on.
Work on the alfalfa mill is progressing nicely and the management expect to be ready to grind meal in a few days.
Mrs. Elizabeth Truesdale left Monday for Colorado, where she expects to spend the winter.
H. R. Clark's new dwelling is nearly finished, making another substantial building for Kimberly.
Mrs. Joe Fitzmaurs returned home Thursday evening after spending the summer with her people in the east.
W. A. Gill, C. T. Brown, Ben McMillin and T. W. Rice returned from their hunting trip the first of the week. Not much wild game was secured but the buck with the wide horns.
Ray Kenna and family have moved into the new house just south of the postoffice building.
Mr. Baughman of Salt Lake City, is here looking after business in connection with the Kimberly Cattle Co.
Mrs. Gilbert Hurd, who has been

quite sick for some time, is reported somewhat improved.

Mr. and Mrs. E. V. Newcomer visited at the home of Mr. and Mrs. W. F. Swearingen Sunday.

F. E. Huger was up from Twin Falls Saturday evening attending I. O. O. F.

C. H. Upton, delegate to grand lodge I. O. O. F., will leave for Weiser, Ida., next Sunday morning to attend grand lodge.

The Epworth League entertainment Friday evening was a success socially as well as financially. Something over \$14.00 was taken in.

J. A. Schemm and C. A. Fry unloaded a new Driscoll clover huller the first of the week.

The patrons of the Kimberly school should not overlook the school fair Oct. 15th. Some very good exhibits are promised by the pupils of the several classes taking part.

Ralph Kite and J. A. Partridge have purchased the Bremer property in the Pioneer addition.

J. W. Draper came down from Murtaugh Saturday evening, spending Sunday with the home folks.

Mr. Draper has the contract for a fine residence for Mr. Hansen.

Mr. and Mrs. W. A. B. Stowe and Mrs. Stowe's sister, Mrs. Hann, spent Sunday at Shoshone falls and Blue Lakes.

Miss Laura and Pauline Hale spent Saturday and Sunday with the home folks, returning Sunday evening.

Miss Mary Garber went to Twin Falls Friday evening, returning Monday morning to her home.

Mr. and Mrs. Edgar Wilson spent Sunday at the home of their son, F. E. Wilson.

Mr. and Mrs. Lee Ross of Rock Creek, spent Sunday in Kimberly.

Mr. Ben McMillan has let the contract for a large storage basement and will build his residence lot spring, hoping to get a raise in price.

Miss Minnie Horns spent Saturday and Sunday in Twin Falls, returning Sunday evening.

ARTESIAN CITY.

Artesian City, Ida., Oct. 13, 1913.

Mrs. W. G. Moyes, while on a visit to her son in Lyman, Wyo., was unexpectedly called to the death bed of her husband, who died in Ogden.

Mrs. Roy Hill returned Tuesday from a visit to Twin Falls. Mr. Hill is on his way to Alberta, Canada, where he expects to locate.

W. G. Moyes is temporarily laid off from his work on the account of local weather. He has bought 150 acres of land on the Goose Creek irrigation project.

John McMillan and family, and Dave Workman and family, expect to move soon to Kimberly for the winter.

Mrs. Elliott, an aunt of Mrs. Terrill, is visiting this week from Rupert.

Frank Terrill will ship to Twin Falls this week with his motor car.

Ernest Eden is here on a visit with his parents.

George Fredericks of Kimberly, is in Artesian digging his potatoes. He has recently purchased an additional acre tract of Mr. Bauer.

Miss Bertha Noel, county superintendent, was visiting schools in this vicinity this week.

George Adamson and family will soon move from the farm place into the house on the Strong, place in Artesian City.

Mrs. C. E. Howers returned Wednesday from a visit to Ogden.

Mr. Bybee, the county surveyor, was in Artesian on professional business.

It is rumored wedding bells will ring in our neck of the woods in the near future.

PORTLAND MARKET REPORT

North Portland, Ore., Oct. 10, 1913.

Gentlemen: Receipts for the week have been: Cattle, 254; calves, 20; hogs, 4,740; sheep, 8,822; horses, 10.

Beef quotation this week has fallen off considerably, and prices are a shade steadier. Bulk of business was transacted Monday and Tuesday, as receipts since then were inconsiderable.

Prime steers sold in bulk at \$7.50 and cows \$6.50 to \$7.75. A lot of medium grade stuff was offering at the usual discount on choice beef prices.

Swine trade conditions are no uncertain quantity at present and values fluctuated easily. Tons ranged from \$3.75 to \$5.50, and 17 STOPS.

Swine trade conditions are no uncertain quantity at present and values fluctuated easily. Tons ranged from \$3.75 to \$5.50, and 17 STOPS.

None-Building Feeds for Swine.

Here is a list of good none-building feeds: Wheat middlings, bran, soy beans, cowpeas, linseed oil meal, tankage, dairy by-products, etc. This should not constitute over one-fourth of the feed supplied. Or others cheaper in price: Legumes, alfalfa or clover, or rape pasture. The balance may be corn, barley, wheat, kaffir milo, etc. This should keep the pigs thrifty and gaining with the pasture cheapening down the cost.

Legume Seeds.

In reply to a party's question, "What are legume seeds?" Cowpeas, Canada peas, soy beans and peanuts are the legume seeds that are of importance when used for swine feed.

They furnish nitrogenous matter in great abundance and some carry considerable fat. While too starchy cereal grains are the great fattening concentrates, the leguminous seeds furnish nitrogenous matter for building the muscular tissue and organs of the body.

The legume forages such as alfalfa, clover, vetch, cowpeas, soybean and peanut vines, either fed as pasture in the summer or from cut hay in the winter, are not only furnishing protein but are an aid to health and a cheapening of cost of production.—American Swineherd.

MILKING MACHINE IS HANDY

Operation Performed by Compression in Device Recently Invented by Wisconsin Man.

The Scientific American in describing a milking machine, recently invented by O. C. Silsby of Algoma, Wis., says:

"The invention pictured in the illustration in actual use, provides a machine which will cause the milking operation to be performed by compression rather than by suction or stripping; provides a device detachable so as to accommodate it for use in connection with different size cows or

those having different size udders, provide an actuator for the milker which is adjustable in accordance with the size of the teats; and provide a milking machine in which the compression cups are forced and operated so as to stimulate the form and operation of a person's hand in hand milking.

Dangerous to Motorists.

With the coming of spring, it is said, those who own motor cars in a certain section of Massachusetts operate them with considerably speed, not, however, always because of the county ordinances or out of consideration for their fellow citizens' safety. On one occasion two motorists were crawling up a big highway lately a fifteen (then riding with one of them) drove they had formerly gone at top speed. The friend asked why the car was running so slowly.

"Why," explained the driver of the car, with perfect balmy, "everybody's carrying on a gasconade now, and you can't run over a man without risking a puncture."—Lippincott's Magazine.

SOCCER FOOTBALL

Athletes Trying to Work Up Material for Team.

Through the efforts of Mr. Harry Bonell, with the assistance of several local athletes, a soccer football team is being organized in Twin Falls, Sunday afternoon, next, everybody who has ever played, seen or heard of the game and is in any way interested, is urged to be at the baseball park at 2 o'clock to aid the movement. It is hoped a great many will turn out. If sufficient enthusiasm can be aroused an effort will be made to interest the nearby towns, including Pocatello and Boise, to put a team in the field to provide entertainment for the athletic devotees during the winter months. Twin Falls boasts of a large number of young men who have shown proficiency in other athletic sports and it is thought by Mr. Bonell that these interested with him that a good soccer team can be developed in a short time. As it takes eleven men to play it is hoped a large delegation will turn out for the first practice and that the following Sunday a suitable game between two local teams can be arranged. Mr. W. E. Golden, the official "Umpire" will be pressed into service as referee and every effort made to provide a good, clean, winter sport. Everybody come out.

IRRIGATION FACTS FOR SETTLERS

(Continued from Page 1.)

Canal company the prior right to the waters of the Snake river for the first three thousand second feet, over the reclamation project commonly known as the Mindoko Tract, and also, over the Twin Falls North Side system.

On account of other lands under the Twin Falls canal system, our company has made a contract with the United States government for the raising of the dam at the outlet of Jackson Lake, Wyoming, thereby storing ninety-five thousand acre feet for the use of these state lands and, other lands under our system for which water rights have not been sold. This not only gives ample water to provide for the lands not yet sold, but gives us a surplus on which to draw, and assures us at all seasons of the year an adequate water supply for any crops that might be raised under the system.

The Twin Falls South Side system was the first Carey Act project launched and completed. Its success has been due to the richness of its soil and its abundant water supply. All projects launched later and adjoining us have used the progress made by the settlers under this project as an example of what might be done upon irrigated lands in Southern Idaho. This project should not be confused with any other project bearing the "Twin Falls" name as it is distinct in water rights, construction, and management. We believe, and can easily substantiate that we have a good water right as any project in the United States. From experiments performed during a succession of years by government experts, it has been clearly demonstrated that our water right is sufficient for any crops that may be raised in this section. These records are on file in our office; also, with the office of the state engineer; and with the government as shown on the records of the United States department of agriculture and office of experiment stations for purity of water investigations.

This system has been completed, and a new canal is now under advancement of the settlers who are the stockholders of the Twin Falls Canal company.

Yours very truly,
G. E. HARLAN,
General Manager & Watermaster for the Twin Falls Canal Company.

STATE WANTS BETTER LOAN LAW

Local Attorney Named as One of Drafting Commission.

The state has for some time past been set back by the poor loan laws. The present state law is so defective that it has worked out right and many deserving farmers denied what many worthless loans have been made. Governor Haines now proposes to have a drafting commission draft a new law which will remedy all the evils of the present system and allow irrigation land owners a better chance. Attorney M. J. Sweeney has been appointed as a member of the commission and the past week received the following letter regarding his appointment and the duties of the new commission:

Boise, Idaho, Oct. 8, 1912.
Honorable M. J. Sweeney, Twin Falls, Idaho.

My dear Senator: Considerable in-

erest attaches to the question as to whether or not a law could be devised which would improve conditions in this state with reference to the subject of farm loans. The question is prominently before the American people at this time as a result of the trip made through European countries under the auspices of the Southern Commercial Congress, for the purpose of studying conditions which exist abroad in the matter of farm loans and adjusting our laws to the conditions of the foreign countries. It has been suggested that Idaho should have a law on this general subject and one which will apply particularly to conditions on our irrigation projects where in the past it has been practically impossible to secure loans necessary for proper farm development.

In view of these considerations I have decided to name a committee and ask them to make a study of this question with the idea of reporting a bill to the next legislature, should this committee conclude that a law on this subject would be helpful to the farmers of the state. I have decided to ask the following well-known men to serve on this committee:

C. A. Sunderlin, Burley, Idaho.
George Edgington, Idaho Falls, Ida.
M. J. Sweeney, Twin Falls, Idaho.
J. P. Stark, St. Anthony, Idaho.
John Sweeney, Boise, Idaho.

It will be understood, of course, that this service is entirely voluntary and that no funds are available with which to meet any expenses that may be incurred. It is believed, however, that the greater part of the work involved may be carried on by correspondence among the members of the committee, and I have selected men who live comparatively near together in order that they may arrange to meet, if this is found necessary, without incurring much personal expense.

I sincerely hope that you will find it possible to contribute to this committee and that the study which you and the others named may be able to bring to this question will result in the shipping up of some very desirable legislation in the interest of the farmers of this state which may be introduced and enacted into law at the next meeting of the legislature.

I am, designate Mr. Sunderlin to act as chairman of this committee in case of his unavailability. Interest in the matter and his willingness to give such thereto as may be found necessary.

Yours very respectfully,
JOHN M. HAINES, Governor.

UNUSUAL CAREER

National Tribune Pays Tribute to Twin Falls Man.

The following from the National Tribune will prove of interest to many old soldiers in this part of the state, especially to those who are acquainted with the personage referred to: "W. W. Humber, Twin Falls, Idaho, has had a most unusual career. He is the son of a pioneer settler, a farmer, who has his share with such industry and the state wall at Fredericksburg. He was adjutant-general of the

Army of the Potomac on the Wilderness campaign, and commanded the Second Corps in the last operations. Comrade Humber belonged to the 18th S. V., and at Hatcher's Run was shot through the body by three different rifle bullets. Astonishingly he recovered from them for a vigorous career ever since. Educated as a civil engineer, he went west and engaged in mining, and then ran overland stages until the construction of the Union Pacific railroad put them out of commission. He is now the head of the company which runs the stages in the Yellowstone park. He is enthusiastic about Twin Falls and Idaho, thinks they have there, the greatest country in the world, and tells astonishing stories of what they raise by irrigation."—Pocatello Tribune.

ADVERTISING FOR IDAHO

Harlan Magazine Will Open Publicity Bureau in State.

With a view of securing the co-operation and support of the business men of Idaho as well as the entire state, the Harlan Magazine through their Pacific coast magazine, the Sunset, have detailed E. P. Engle as special representative to this section to lay plans for the carrying out of the extensive publicity program that the railroad will give the state.

In speaking of the object of his visit to Boise, Mr. Engle said the railroad company with its magazine was intending to do for Idaho, Oregon and Washington what it had done for California through extensive writings and illustrations in the magazine.

To accomplish this work, Mr. Engle said he will organize the Idaho service bureau, which would be composed of business and professional men with a view of lending all aid possible to the photographers and writers of the company in giving them data and information on the city and state. The service bureau will be organized in each community and the non-composing it will aid the special writers to get the materials for the stories. Each community and state in the state will receive special attention in the magazine. It is expected that the work will occupy about three years.—Statesman.

WANT HOMES FOR CHILDREN

State Home Finding Society Presses Claim on Public.

Rev. O. Christian, field superintendent for the Children's Home Finding Society at Idaho, was a visitor in this city the first of the week and spoke in a number of the churches on the work being done by the society which cares for homeless children and places them in good homes. At present the society has sixteen girls between the ages of 6 and 15 years for whom it desires homes. Fifteen have been placed in good homes. There are between the ages of 6 and 13 are also in need of homes among the good people of the state. Any persons in this

city desiring to adopt or take children on contract for their care and education can secure any information by addressing the matron of the home at Boise. As the society is dependent largely upon private contribution the people of this city are urged to help in every way.

BURLEY-STREVELL CUT-OFF

Salt Lake Commercial Club Working to Get Cut-off Completed.

The Salt Lake Commercial club is making a great stab to secure the completion of the Burley-Strevell cut-off of the Oregon Short Line, that would make a direct line to Salt Lake, and apparently cut Pocatello off that portion of the map, a thing that has not contemplated by considerable. Secretary Farrell of the Salt Lake club has mailed letters to all members of the organization asking for full representation at a meeting that will be held for the purpose of advancing the movement.

The Burley-Strevell cut-off would have the effect of not only opening up a virgin country, but would bring Twin Falls within practically six hours of Salt Lake instead of 16 as at present. As it is now, the entrance to the Twin Falls country is by way of Pocatello, Mindoko and Burley. The new cut-off would bring the direct connection to Salt Lake on the Lucine cut-off of the Southern Pacific.

The letter sent out by Secretary Farrell says:

"Does Salt Lake want a short-cut railroad that will put the rich Twin Falls, Idaho, country within six hours of this market, instead of 16 hours? Quick service at about half the present freight rate? A short cut that will put Utah on the main line to the Pacific northwest of the Idaho Pacific from Granger to Ogden and of the Oregon Short Line from Ogden to Portland that will bring more eastern travel to Utah? The rich country has been bought: \$1,250,000 already spent."

"The Commercial club should help secure completion of this short-cut. Come to the membership meeting at the club Monday night, October 12, at 8 o'clock, to prepare statement to present to railroad authorities."—Pocatello Tribune.

THE BIRD ON NELLY'S HAT

Under New Tariff All Alpacas and Other Plumes Will be Seized.

Washington, Oct. 9.—Alpacas or other bird plumes whose importation is forbidden by the new tariff law must be removed from the hats of incoming travelers and turned over to customs authorities before the travelers leave the country. Secretary McAdoo yesterday ruled because of reports that an article had been snatched from the hat of a woman at New York. The secretary denied that report and Secretary McAdoo said the regulations would be administered with the least inconvenience to travelers. Every carrier will be shown women who bring such articles on their hats.

GOOD CLOVER YIELDS

West End of County to the Front With Banner Crops.

Two good clover seed yields are reported this week from west of Burley. Hest Bonnichsen threshed 177 bushels of red clover seed from 25 acres; Wesley Garmon 91 bushels from 10 acres.

The Herald would like to receive information of this nature from all parts of the tract.—Herald Herald.

IDAHO WHEAT CROP

Less Wheat Raised in Idaho For Year 1912.

Washington.—The department of agriculture estimates that the total wheat crop of Idaho this year will amount to 14,653,000 bushels, as against 14,566,000 bushels last year. Of this amount 4,984,000 bushels is durum wheat this year, as against 4,922,000 bushels in 1912.

E. R. Darlington, water commissioner of the Salmon project, accompanied by Mrs. Darlington, were visitors in the city for a day or two of last week, from Hollister.

D. E. Stoutemeyer, one of the prominent attorneys of Boise, and who is connected with the United States reclamation service, was a business visitor in the city yesterday.

J. U. McPherson, general superintendent of the potato section of the North Western Fruit Growers association, was looking after business in connection with his department in Twin Falls and on the tract the last of the week.

Mr. and Mrs. B. F. Miller of Prescott, Kansas, are visiting with their daughter, Mrs. J. R. Hinton of the Hansen neighborhood. Mr. Miller was in the city yesterday with Mr. Hinton and informed the Times that he was highly pleased with the Twin Falls tract.

Mr. and Mrs. J. W. McDole left Saturday evening for Des Moines, Iowa, in response to a telegram that their daughter, Mrs. Bercombe, was very ill. Mr. and Mrs. McDole and daughter, Mrs. E. E. Brown, left for the east some time ago for the benefit of Mrs. Bercombe's health.

Mrs. B. M. Compton left yesterday morning for her home in South Omaha, Nebraska, after visiting several weeks with her niece, Mrs. E. E. Kell. Mrs. Compton was so favorably impressed with Twin Falls and the tract that she said she would be back here in the spring with her husband to make an extended stay.

Mr. and Mrs. J. L. Vandeusen departed yesterday evening for their home in Nebraska, after spending the greater part of the summer visiting with their son, Sheriff H. C. Vandeusen, and the intention of Mr. Vandeusen to dispose of his property in Kansas and return to the Twin Falls tract and make his home.

Mr. and Mrs. J. L. Vandeusen departed yesterday evening for their home in Nebraska, after spending the greater part of the summer visiting with their son, Sheriff H. C. Vandeusen, and the intention of Mr. Vandeusen to dispose of his property in Kansas and return to the Twin Falls tract and make his home.

Vandeusen, and the intention of Mr. Vandeusen to dispose of his property in Kansas and return to the Twin Falls tract and make his home.

C. J. Cole transacted business in the city yesterday from Burley.

W. A. Ducker was a business visitor in Twin Falls yesterday from Goodins.

C. L. Smith is in the city today from Hollister, looking after business affairs.

W. E. Crandall arrived in Twin Falls yesterday from Jarbidge, Nevada, and will remain for several days on business.

T. G. Wilson, one of the progressive farmers and stockmen of the Milner segregation, was in Twin Falls yesterday on business.

O. G. Zuck, commissioner for the eastern part of the county, is in the city from Kimberly attending the regular meeting of the board.

The Catholic Ladies Aid will give a tea at the home of Mrs. John F. Coughlin, 515 10th Avenue East, Thursday afternoon, October 16.

Mrs. J. B. Hall and son Kenneth returned Sunday evening from California after a six weeks' stay there, having decided to make Twin Falls their future home.

Lee Glass, general superintendent for the Great Shoshone and Twin Falls Light and Power company, left this morning for Dulh to be gone for several days on business.

Mrs. James L. Mea and two children arrived in the city yesterday from Newark, South Dakota, and will spend the winter with W. Z. and J. W. D. Smith, brothers of Mrs. Mea.

Messrs. Sorich and Chapman, the musicians who charmed the people of Pocatello, left for Twin Falls this morning where they went to fill numerous engagements.—Pocatello Tribune.

W. G. Filer and party went through Pocatello yesterday from the Yellowstone country to Salt Lake. While in the party they inspected various water projects and prospective reservoir sites and it is probable that they will visit that part of the state has some of the most significant, as the members of the party are heavily interested in a financial way in Twin Falls water and land projects.—Pocatello Tribune.

A. N. Sprague returned to Burley this morning after spending several days in the city.

S. C. Turnipseed left this morning for points in Wyoming to be gone for some time on business.

Mrs. F. E. Gulliford returned Monday from Jarbidge, where she has been visiting her daughter, Mrs. Ed Benane.

Mrs. James Grossman and son returned Monday evening from Fler, where they had been visiting with relatives.

Deputy Sheriff Ormsby returned this morning from the west end of the tract where he had been on official business.

Miss Mary Morris, who has been visiting with Mrs. C. H. Smith, returned to her home in Dulh, Montana, Sunday evening.

T. D. Connors, one of the progressive farmers of the Fler neighborhood, was a business visitor in the city yesterday.

Mrs. B. Wolfley and children arrived in the city yesterday from Murray, Utah. They will make their home with Mrs. Wolfley's father, M. H. Payne.

A. R. Colwell, of the Majestic Pharmacy, left yesterday evening for Burlington Junction, Mo., in response to a message stating that his mother was very ill.

Joseph Jones, chief of the Oregon Short Line secret service, was in the city yesterday from his headquarters in Salt Lake City on business in connection with his office.

Miss Cora F. Holmes, from Wichita, Kansas, is visiting her uncle, H. S. Braithwaite and family. Miss Holmes is cashier of the savings department of the National Bank of Commerce of that city.

Karl Hale Dixon, editor of the Hollister Herald, and at one time private secretary to former Congressman Henry C. Tamm, was in the city yesterday. He had not looked over general activity in this community for some months, and expressed a large degree of interest in the commercial and industrial progress in evidence. Hollister, he stated, enjoyed a summer and fall of profit and satisfaction to all elements of the community.—Pocatello Tribune.

CONSTITUTION OF GOOD FOWL

Points of Weak and Strong Bird
Characterized by Prof. W. R.
Graham of Ontario Station.

Prof. W. R. Graham of the Ontario station characterizes the points of a weak and a constitutionally strong fowl as follows:

What we want is a good feeder and an economical producer. Generally, a bird with a short, stout, well-shaped beak, a broad head (not too long), and a bright, clear eye, has a good constitution. And I have noticed that when a bird has a long, narrow beak, a thin, long comb and head, and an eye somewhat sunken in the

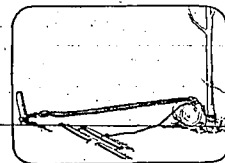

Excellent Type of Meat Breed.

head, it is usually lacking in constitution. Such a bird is likely to have a narrow, long body and long legs upon which it seldom stands straight. There are some exceptions to this rule, yet generally speaking if a bird has a good head the chances are favorable for a good body; and, if it has a poor head, the chances are against it. I have frequently noticed in the rose-comb breeds that a good shaped one is seldom found with a long, narrow comb.

METHOD OF PULLING TREES

Good Team of Horses and Three-Quarter Inch Rope and Tackle Will Do Job Easily.

When we transplant trees taken from our nursery we use the method shown in the sketch for taking up large shade trees. A three-fourths inch rope, eight or ten feet long, is doubled, the ends tied together, and looped around with an extra hitch, writes P. E. Dougan of Pawnee, Okla., in the Popular Mechanics. The tree trunk should be well protected from

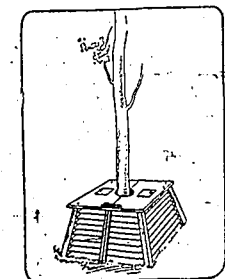

Pulling Trees.

the chafing of the rope with burlap wrapped around it. The next requisite is a roller. We use a hollow log about eighteen inches in diameter over which an ordinary block and tackle is placed as shown. A good team of horses will easily pull a tree three or four inches in diameter, with all its roots.

VENTILATOR FOR FRUIT TREE

Made of Two Sections, Hinged Back, and Doors are Arranged to Allow Access to Interior.

The illustration given herewith shows a fruit-tree ventilator designed to enclose the trunk of a tree at its base as shown. It is made in

Fruit-Tree Ventilator.

two sections, hinged at the back, and doors are carried in the top of each section to allow of access to the interior.

Burbank Spilled a Good Ome. Pushing through the blackberry patch on the hill, a thousand prickly hands were stretched out to hold you back. At every step a wiry bramble wound itself around your ankle or snatched your elbow. Brute force couldn't extricate you. A sort of physical diplomacy, an adroit turning and twisting, the same kind of athletic skill that is required of a half-back on a run in a broken field—that was the game you had to play in order to beat Nature's protective strategy. A game it really was, with the popping, purple berries as the prize. And now Luther Burbank has gone and spoiled it. "After ten years of work," he says, "I have produced a thornless blackberry."

DAIRY NOTES

Kaffir corn always should be ground for cows.

A meaty udder is seldom combined with a good milker.

An occasional soaking in brine will keep the wooden churn sweet.

Dairymen isn't play, but no other job pays better wages for hard work. The dairymen sells a ton of butter, and is out only 50 cents' worth of fertility.

Be sure not to stint the calves and yearlings in the use of straw for bedding.

The longer the calf is allowed to suck the harder it will be to teach him to drink.

The man with four or more cows doesn't save money by not buying a separator.

The cream separator should be firmly fixed on a solid base if good work is expected of it.

In feeding a milk cow a corn ration, reduce the ration at first indication of fattening.

Be sociable with the helpers. It is no belittling yourself, but it is uplifting for the calves and young cattle.

Alfalfa hay and ground oats will put quick growth on fall calves and thus save them through winter in better shape.

Be sure that the cow stables are in good repair before the weather is so cold that the stable must be in constant use.

Don't drop a calf in the fall. It is the one that will drop money in her owner's pocket provided she is given the feed and care she deserves.

PROPER FEEDS FOR POULTRY

Best Rule is to Watch Fowls and Give Them What They Will Clean Up—Milk is Excellent.

Generally speaking, the poultryman need not worry much about feeding formulae. If he will feed about one-third as much corn as all other grains and feed animal and vegetable feeds in connection he will get fairly satisfactory results. Those who are accustomed to compounding rations for laying hens that a ratio of about 1.5 is considered a good ration for fattening poultry of all kinds.

Fowls require the equivalent of about 21 pounds of dry feed for each 500 pounds of live weight. That is, 100 hens weighing 5 pounds each would require about 27 pounds of dry matter each day. If they are given milk, green, or other wet or juicy foods they will require less grain. About 4 ounces of dry matter per day is the quantity required for best results.

The very best rule is to watch the fowls and feed them about all they will eat. It is not a good plan to allow feed to lie unattended. There is no danger of the hens becoming too fat as long as they are kept busy scratching for their feed. It is the fat hen that lays the eggs regularly.

Most Unkind Cut.

She was the wife of a poet, and, to tell the truth, she hadn't a great opinion of him. As Washington wrote, "I wish," she said one morning to her husband, "that you'd try writing prose."

Her husband smoothed his long, flowing locks, and, under these circumstances, cut an easily digestible dinner with little meat, and no acids of any kind.

"Oh, yes!" agreed the wife. "But every now and then I meet people who ask me if I've read this or that you've written, and, really, I'm getting sick of having to pretend all the time. Why can't you write something that I can read?"

Rival of the Potato.

The historic potato has a rival in the dasheen, described by the bureau of plant industry at Washington as "a new root crop for the south." Like the potato, the dasheen has its habitat in South America, but is related to the Hawaiian taro and the half-wild taro of the southern states. The cooked tubers are more nourishing than the potato, tasting slightly like boiled chestnuts. Their edible qualities were thoroughly tested at the last annual banquet of the National Geographic society, and they received a favorable report by the house committee of an influential New York club. Half an acre at Brookville, Fla., yielded last year 225 bushels of dasheens, richer in flavor than baked potatoes.

Nero's Claim to Distinction.

Aubrey Beardsley, the famous artist, once outshone Oscar Wilde, who was the greatest wit and conversationalist that ever lived. He was at a dinner at which both were guests. Wilde talked interestingly to Nero for nearly two hours. When he concluded, Beardsley, who was only a boy, spoke up.

"I am referring to his action of pouring oil on Christmas and setting fire to them," said Beardsley. "Wasn't it Nero who lighted the first fires of Christianity that illuminated the world?"

A repetition of your want ad, at a trivial cost, may be a "lucky investment" if you want to rent some room.

Asked and Answered.

A languid swell was visiting a charming young society lady, and as they sat on either side of the fire his heart was full of a burning desire to say something not only complimentary, but brilliantly dexterous.

So, after revolving the matter in his mind, he said: "Ah, Miss Little, why are those fire-tongs so like me?"

He meant her to guess, or him to tell her: "Because they glow in the service, or were prostrate at her feet," or something of that kind.

Miss Little, looking solemnly down, said she didn't know, unless it was because they had two thin legs and a brass head. He was groping blindly for the front door before she had recovered from the shock of her own folly.

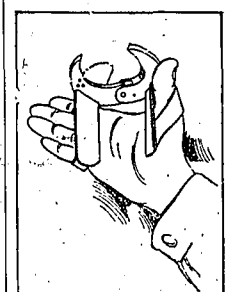

Portuguese Jury Draw Lots.

A new method of administering justice was applied recently at Villa Franca de Xira in Portugal.

RAPIDITY IN HUSKING CORN

Michigan Man Invents Device That Does Work Almost as Quickly as Ears are Picked Up.

It would be amusing if a man could attend an old-fashioned country husking bee with one of these corn husking devices and keep it hidden. He would so far outstrip all the other huskers that they would wonder how many hands he had. A Michigan man invented this device, which consists of a pair of pivotally connected curved jaws, a handle carried by each jaw, and strips on each handle by means of which they may be fastened to

Corn Husker.

the hand. The interior of the jaws are serrated, so that when they are gripped over the husk of an ear of corn they take hold of it and strip it off in a twinkling, rolling the entire husk back at once. One motion is all that is required, and with a little practice a man can husk corn with this device as fast as he can pick the ears up.

Woman's Story.

A lady wrote to 25 friends and told them she was giving a "white elephant" party, and that each guest was to come and bring the absolute best most useless thing she possessed. And the whole 25 women turned up with their husbands!

Another lady was giving what is called a book tea—each guest to wear, pinned on her dress, something to represent the name of some book. The name of each book had been guessed, with one exception.

The lady who still puzzled everyone wore a photograph of her husband on her bodice. One could guess the name of the book she intended the picture to represent, and after they had all given it up," she told them—"Life's Handicap."

False Sore Throat.

If you come home after a hard day's work with a raw, rasping feeling in your throat, which becomes quite painful, do not be deceived into believing that you are contracting a sore throat, and accordingly take medicine for this affection. The throat will often become dry and painful from great fatigue, or from neglect to eat at the proper time. If the subject will drink cup of hot water, or take a tablespoonful of coconut or olive oil, and thereafter lie down and relax for fifteen or twenty minutes, the feeling will, most likely, disappear. The subject, should, under these circumstances, eat an easily digestible dinner with little meat, and no acids of any kind.

Is Golf Scotch or Dutch?

The origin of golf, one of the most popular pastimes in the United Kingdom, has generally been ascribed to Scotland. But this is a fallacy. In fact, however, it is asserted that it is to Holland we owe this game, and that it was brought from Holland to Scotland. For instance, the name "golf" itself is derived from the Dutch word Rolf, meaning a bat or club. "Fore!"—the word shouted before driving off—is derived from the Dutch word "voeren," meaning, in front. From "voeren"—the Dutch word to boot—we get our English word put; and niblick—the Scotch "knibloch," a knob of wood—is derived from the Dutch "knobbe-ischig," meaning knotty.

In the Probate Court, County of Twin Falls, State of Idaho,

In the matter of the estate of Mary C. Woods, Deceased.—Order to show cause why Order of Sale of Real Estate should not be made.

Nick Smith, the administrator with the will annexed, of the estate of Mary C. Woods, deceased, having filed his petition herein praying for an order of sale of all the real estate of said decedent for the purposes therein set forth.

It is therefore ordered by the said court, that all persons interested in the estate of said deceased appear before the said probate court on Friday, the 31st day of October, 1913, at 10 o'clock in the forenoon of said day at the court room of said probate court, at the court house in Twin Falls, County of Twin Falls, Idaho, to show cause why an order should not be granted to the said Nick Smith to sell so much of the real estate of the said deceased as shall be necessary.

And that a copy of this order be published at least once a week for not less than four successive weeks in the Twin Falls Times, a newspaper printed and published in said Twin Falls County, Idaho, and that said publication be completed at least five days prior to said 31st day of October, 1913. Dated September 30th, 1913.

J. M. SHANK, Judge of Probate.

It happened to be the one inscribed "golf," whereas the person was entitled to the maximum penalty.

Sponges Left in Abdomen.

A suit like that brought a few weeks ago by a woman against a physician for leaving a towel in her abdomen following an operation has been brought by a Philadelphia man against two surgeons of the German Hospital staff in that city, for \$10,000 damages for alleged neglect in leaving in his abdomen two sponges following an operation at the hospital. The man alleges that the defendants performed the operation. He went to the hospital on January 14, 1911, and was discharged as cured on March 4. He suffered much pain after that, and went to another surgeon who performed a second operation on the plaintiff, and found in the wound two sponges and other medical material.

Alleged Critic Punished.

A lively scene was created at Aberystwyth, Cardigan, Wales, recently by students from the University College. Adverse criticism of the college Rugby team in a local newspaper brought outrageous punishment down on a student alleged to be the writer. At the close of the morning lectures he was seized by his fellow students and marched to the castle ruins overlooking the sea. There he was bound, and upon his head was poured the contents of a can of syrup, white bags of confetti were hung at him from all sides, until he looked like a human kaleidoscope. Then he was borne on a truck like a trussed fowl through the streets of the town and along the Marino Promenade and afterwards released.

In the Probate Court, County of Twin Falls, State of Idaho,

In the matter of the estate of Mary C. Woods, Deceased.—Order to show cause why Order of Sale of Real Estate should not be made.

Nick Smith, the administrator with the will annexed, of the estate of Mary C. Woods, deceased, having filed his petition herein praying for an order of sale of all the real estate of said decedent for the purposes therein set forth.

It is therefore ordered by the said court, that all persons interested in the estate of said deceased appear before the said probate court on Friday, the 31st day of October, 1913, at 10 o'clock in the forenoon of said day at the court room of said probate court, at the court house in Twin Falls, County of Twin Falls, Idaho, to show cause why an order should not be granted to the said Nick Smith to sell so much of the real estate of the said deceased as shall be necessary.

And that a copy of this order be published at least once a week for not less than four successive weeks in the Twin Falls Times, a newspaper printed and published in said Twin Falls County, Idaho, and that said publication be completed at least five days prior to said 31st day of October, 1913. Dated September 30th, 1913.

J. M. SHANK, Judge of Probate.

It happened to be the one inscribed "golf," whereas the person was entitled to the maximum penalty.

COMMERCIAL CLUB BUILDING

Building in Contact Is Nearing Completion.

The members of the Contact Commercial club are to be congratulated on the energy they have displayed and the progressiveness they have shown in organizing a club on the lines that have been followed out in the undertaking of erecting a suitable club as a permanent home for the organization.

Early in June saw the inception of the organization and since that time the club has started the construction of a modern concrete building 2500 feet and have now it gradually growing and nearing completion. This work was undertaken with a view of furnishing a home where the future activities of the club might be concentrated and with the added purpose of furnishing a place of amusement for the use of the club members. It is estimated that many in minute camps without any other home and place of congregating.

Purity of Ingredients Gives High Quality to HERBST & RAMBO'S CANDIES

Only specially selected, wholesome colorings are used, bearing the Pure Food Label.

Flavorings are the best that money can buy and give the candies a pleasant, distinctive taste—no bitterness.

The best grade sugars used, made especially for high-grade confections.

Herbst & Rambo's high-quality candies cost a little more than otherwise, on account of purity of ingredients, but you get the benefit—the satisfaction of eating the best.

HERBST & RAMBO, Confectioners

to while away the long winter evenings.

The building is to be a work shop also as well as a place of amusement for the club members. It is the best interests of the club and spread abroad a knowledge of the resources of this wonderful district.

The club has recently been incorporated and the members of the club are all those who are members of the organization to boost for Contact and its environment. In this connection it is well and proper that the club should extend their thanks in a formal manner to those outsiders who have become members of the club with a view of lending their moral as well as their financial support to the upbuilding of the Contact Commercial club.

It is the policy of the club to dedicate for all times the building and the ground on which it stands to the community of Contact, without let or hindrance and with the view only of benefitting the community of Contact. It is right and fitting that the members of the club should recognize their need of praise and congratulation, especially those who have donated their time and labor voluntarily to the upbuilding of the club. They should with the single idea of upbuilding and upbuilding the greatness of Contact which will be known as the Contact Commercial club of Nevada and which will be well served to the name.

With the view of the railroad which is now monthly expected to be in construction, thousands of people will come to Contact. Those thousands who have their eyes on Contact and have had them pointed toward Contact for many years. When this time arrives it is the hope and dream of the Contact Commercial club that they will then realize the importance of having such a building as they are now constructing, avoiding the many members and visitors who will be there, dominated by a keen appreciation of the difficulties under which the members of the organization have been working and the work they are doing at the time the building was undertaken.

There is to the Contact Commercial Club and to all the boys' support thereof who have given their time, money and muscle to make the organization an astonishing success. Contact Minor.

If you are in need of anything a Time Want Ad. will fill your want.

EIGHTY MILLION SPENT

Large Amount Spent on Reclamation in West.

Washington, Oct. 11.—Through Frederick H. Newell, chief of the United States reclamation service, Uncle Sam has to date spent more than \$80,000,000 in carrying forward reclamation projects in the west. This money has been expended on 25 great reservoirs, 7,500 miles of canals and otherwise in building up an irrigation system that is the wonder of the world.

"The reclamation service," said Mr. Newell, "is the largest of the federal government in creating homes in parts of the country that would be otherwise waste. It makes possible the development of a civilization possible in the desert areas where the climate is favorable for the best development of plants and animals, but where nature has neglected to supply the one essential of water. The government, working through the reclamation service, is supplying this one lack and thus making available for human use the wonderful factors of sunlight and soil which otherwise would go unused.

"To bring about these results has already expended upward of \$30,000,000 in building large reservoirs in the mountains to hold the flood waters and in constructing thousands of miles of canals to distribute this water to the dry lands. Some of these canals must pass through country where it is necessary to place rock ridges in order to keep the water on a gently flowing grade. In some cases to bring water from one valley across another through a series of tunnels. These have thus been built 22 miles of tunnels, many of them large enough to carry a whole river, and most of them cement-lined. Some of the canals must cross depressions, and there great tunnels, usually of iron or concrete, must be constructed; or, sometimes, the water is allowed to flow down in a great pressure pipe under the intervening valley.

"This work has already been built 25 reservoirs with an aggregate capacity of 8,853,810 acre-feet, that is, sufficient water to cover 4,353,810 acres one foot deep. The service has built 7,500 miles of canals, its excavations of rock and earth amounting to 56,000,000 cubic yards; it has built 675 miles of road, most of which are in country heretofore inaccessible; it has in operation more than 2,300 miles of telephone lines; it has also built and is operating railroads and power plants. Water is now available through the canal systems constructed for the use of the land in 25,000 farms. It is estimated that as a result of the activities of this bureau
