UNIFORM RATES BY COMMISSION

(Continued from Page 1.)

communities in the south and south-east, the savings will be marked. The rates established are said to be lower than those in any adjoining state, and considerably lower than the rates prevailing in the east.

It will be noted, too, an significant that from this time forward there will be but the one set of figures—the commercial rates are cut out entirely. This will simplify the situation and make it much easier for any consumer to know just what he is paying and just why he is paying it.

This schedule does not apply to the Utah-Power & Light company, that operates extensively in the extreme southeastern section of the state. Just why this is not so is not made clear. One explanation is that the Utah concern is operating in a non-competing territory. Another is that it supplies such small communities and that the expense of reaching these small communities is so great that the rate applied to the other companies might not be fair for this concern.

Great good to the public and to the power companies is expected to flow from this action of the state commission. It is believed it is expected to end the ruinous "power war" and it is expected to protect many consumers against extortion—Statesman.

THE REASON FEWER

PEOPLE TAKE "SALTS"

We find the use of salts and other harsh physics is becoming less every year because more and more people are using Rexall's Orderlies, which we and they firmly believe to be the best bowel remedy ever made. They last so much like candy that even the children like them. At the same time they act so gently and naturally that there is no purging, griping pain. They promptly remove the constipation and by soothing and strengthening the bowels, make it less liable to occur again. We have the utmost faith in them. We know what they are made of and the pleasant, beneficial results that always follow their use.

You needn't take our word for it. If Rexall's Orderlies don't help you—if they don't entirely relieve all your bowel troubles—come back and tell us. We'll give you back your money. In west pocket tin boxes: 10c, 25c, 50c. You can buy Rexall's Orderlies only at the Rexall Stores—and in this town only at Steels-Wiley Drug Co. Postoffice corner Twin Falls, Idaho, Adv.

That J. A. Gifford is the good road advocate of this community is not only a rumor at the present time but is demonstrated by Mr. Gifford's permission of the county commission to look after and fix up the road, branching at the northwest corner of the village to north to the local ship line. Mr. Gifford is putting on his big registered Percheron horses to work on this road without any compensation from the county or otherwise, not that registered horses will make any better road than will other work horses, but he feels that it is his duty to show that Mr. Gifford feels that no horses are too good for rough work as the fact that our county has good roads will do as much as any one thing to aid in locating desirable settlers on the tract.

Mr. and Mrs. H. R. Neuman very delightfully entertained twenty-eight of their friends Friday evening. The five hundred score cards were of a very unique design, being little Dutch girls for the gentlemen and Dutch men for the ladies. At the close of the evening a delicious Dutch lunch was served. A very delightful evening was enjoyed by everyone.

The Pennsylvania club was entertained by Mrs. Drgert last Saturday evening. A very pleasant evening was spent at various games—a splendid program being thoroughly enjoyed at the beginning of the entertainment.

HEALTH AND HYGIENE

Why Should the Baby Have Whooping Cough?

Here are the facts in the case—it is hard to see how they can be misunderstood: whooping cough is not a highly contagious disease. It is probably spread only by close contact, such as kissing or inhaling the spray which is thrown from the mouth of a sufferer during coughing. It could be contracted with no great difficulty—and yet it kills ten thousand children and more every year in America. This is almost unbelievable, but nevertheless, it is true. Of all the children under one year of age who have whooping cough, 27 in the hundred die. Of all who have it between 1 and 2 years of age, 11 in the hundred die; of those between 2 and 5 years of age, 3 per cent die; about 5 years of age, happily, the mortality is very low. Yet mothers do not take the pains to protect their children from a disease which kills one in four of every infant under one year that is attacked!

Its Dismal Course.

It is safe to say, however, that no mother whose child has even whooping cough is unprepared for its danger and forgetful of its dismal course.

The most serious complication of the disease is the pneumonia which frequently results from this inflammation, especially in small children, and death when it takes place is usually the result of pneumonia rather than of the disease itself. In most cases, however, the coughing spells become more frequent and more severe up to a certain point, and then gradually

the condition of the child begins to improve and the spells become less severe, and further apart. This frequently comes only after several weeks, and sometimes the child will continue to have occasional paroxysms of coughing followed by the typical "whoop" for several months.

How Can They Be Careless?

With a disease of this severity and with such fatal results in so many instances, how can a mother knowingly expose her child to whooping cough? In the same way, how can any mother who has seen her own child exhausted by "whooping" bring that suffering to others by failing to prevent the spread of the disease? To prevent whooping cough from spreading requires but few things. The all-important item is to keep the victim from contact with other children. A child who has whooping cough should not be allowed to go to Sunday school, to day school, or to the homes of other families, and should not play with other children. Isolation should be enforced in whooping cough as in diphtheria and scarlet fever.

And Have a Good Physician.

In caring for a child which has whooping cough, there is but one safe rule for the thoughtful mother to follow, and that is to call in a good physician and obey his directions. No mother should deceive herself with the idea that whooping cough is an inevitable bane of childhood and requires no medical attention. The danger of pneumonia and other complications is ever present, and the physician should be called early and consulted frequently.

As far as possible, the child should remain in the open air during the sickness, or in a room where there is always an abundance of fresh air. There is no medicine so good as fresh air. In fact, in the largest single factor in the cure of whooping cough, and with it may be ranked abundant nourishing food. The physician whom the mother must call in will probably not order much medicine of any sort, but will instruct the mother to keep the child in the open air, and the physician also direct what food the child is to have.

DEPOT FOR AMSTERDAM

O. S. L. Announces Intention to Erect Depot This Spring.

Amsterdam is rejoicing over the prospects of having a passenger depot and an agent to replace the stationary box car that has been in use during the past few months. The year's budget of the Oregon Shore Line includes a sum to provide Amsterdam with a brand new depot. It has been announced that the work will commence in the near future. It was only a few months ago that this little town received the honor of having trains stop at all, but its growth has been so rapid and shipments from this point so heavy, that the railway company has found it necessary to make this improvement.—Hollister Herald.

CONVICTS ON STATE WORK

State Land Board And Warden Plan To Use Men

Boise, Idaho, March 26.—Idaho launched a new scheme to solve the convict labor problem today when the land board and the prison board, in joint meeting, decided to employ convict labor in the reclamation of 10,000 acres of state land in the Gem irrigation district in Gwyher county, about thirty miles from Boise. This is considered some of the best land in the state; water is available by pumping from Snake river and the state is already taxed for maintenance of the system.

There are now 300 convicts in the penitentiary. It is proposed to place 100 of them in a colony on this land under prison guard and have them clear the sagebrush, level the land, dig the canals and laterals and put the entire 10,000 acres under cultivation. This work now held at \$20 an acre or \$200,000 for the tract. Brought under cultivation it is estimated it will be worth \$100 an acre or \$1,000,000 for the tract. In addition to this increase in value the convicts are expected to produce tremendous crops for the support of themselves and the other convicts. Warden Snook, Land Commissioner Day and members of the land board will visit the Gem district tomorrow and block out definite plans. State laws permit the employment of convicts on public work outside the prison walls, and great things are predicted from the new scheme. It has never been tried elsewhere.—Idaho Falls Register.
