VOL. X. NO. 39 TENTH YEAR. TWIN FALLS, TWIN FALLS COUNTY, IDAHO, TUESDAY, FEBRUARY 23, 1915. SUBSCRIPTION \$2.00 PER YEAR

BUHL MAN GETS POISONED CANDY

Loaded With Strychnine Enough to Kill a Bear

J. C. McCabe RECEIVES PACKAGE FROM MOUNTAIN HOME.

Man Finding Grudge Against Postoffice Suspected of Offense. Postal Authorities Investigating.

A sensational poisoning case has developed at Buhl, which may result in a criminal case celebre.

Acting on the hint, he sent a sample of the candy in the box to the laboratory of the state university.

The authorities are working on the case, and the federal officials are likewise taking a hand in the game.

Successful Meetings Great Crowds at Christian Church Sunday Morning and Evening.

Evangelist C. R. Vawter arrived in Twin Falls Saturday evening.

In his first address Evangelist Vawter said that the service of the Christian church is the most favorable comment made about him.

These evangelistic meetings will continue indefinitely. Everyone is invited.

COMMITTEE.

TWIN FALLS IN MOVIES

Shurtz Film Company Taking Pictures of City and Country.

Representatives of the Shurtz Film Company of Cincinnati, Ohio, are in the city taking motion pictures of the principal places of interest in and around the city.

The work would have been done sooner if the cinema workers had not interfered with the operations.

RUPEERT MAN MURDERS

Kills Woman Who Refused to Marry Him.

Rupert—A double tragedy occurred Saturday night at Mindooka in a small village some 15 miles from Mountain Home.

Mrs. Pittenger, who ran a boarding house here, also owned a dry ranch near Mindooka, cornering on Kimball, and had reached Mindooka on her way home from a visit to the ranch.

At that he reached into his hip pocket for his revolver and shot her in the chest.

Both victims of the double tragedy were killed in the village.

"THELMA"

Well Known Play Shows in Picture at the Laverling Saturday.

The play-gone of Twin Falls will be an opportunity to see a beautiful play.

"Thelma" is a wholesome story read by all students and can be found among the books in the libraries of those who love good, clean fiction.

Richardson, Miss Tallbot, who are bringing "Thelma" to Twin Falls, have placed the characters of the story into the hands of an exceptionally strong cast.

BORAH ASKS FOR LOAN

Fifty Million Dollars to Help the Homesteaders.

Washington, Feb. 13.—Senator W. E. Borah today offered his bill authorizing a loan of \$50,000,000 to a reclamation fund.

Senator Borah also offered his bill amending the law which provides that homesteaders in lieu of building, may establish good faith by making improvements on their land.

Senator Borah also offered his bill amending the law which provides that homesteaders in lieu of building, may establish good faith by making improvements on their land.

MOTORISTS MAY GO INTO PARK

Senator J. H. Brady Working to Open Gateway

GOOD NEWS RECEIVED FROM THE HEAD OF ASSOCIATION

Hundreds of Tourists Will be Through Western States on Their Way to California.

Because of the fair and general activity this should prove an exceptional season for motor cars.

In a communication received from A. G. Bateholder, chairman of the Western Automobile Association.

Washington, Feb. 13.—A. G. Bateholder, American Automobile Association building, Washington, D. C.

FILER FARMER GOES INTO LAWS TOILS

Quarrel Over Boundary Line Ends In Gun Play.

JESSE MOILER ARRESTED FOR ATTEMPT TO COMMIT MURDER

Alleged to Have Fired Several Shots at Neighbors as They Fled From Him.

Jesse Moiler, a farmer residing on a school section north of here, was arrested Sunday evening by Sheriff Kendall on a charge of attempted murder.

The complaint was sworn to by C. D. McKinley and F. C. Ripley, who, together with D. A. and A. McKinley and others, were attempting to establish the boundaries between the Moiler and McKinley farms.

PLEASED LARGE AUDIENCE

Home Talent Company in "The Matchmaker" is Good.

"The Matchmaker," a home talent play staged by the Twin Falls Dramatic Club, under the able direction of Mrs. W. H. McKay Olson, proved most pleasing Monday evening to a large audience at the Laverling.

The company, after only a brief time for rehearsal, was able to surpass in the entire performance a number of stock companies which have appeared in this city.

SHOULD PUSH SUIT

The Times wishes to urge upon the city dailies the need for pushing the damage suit now pending in the courts against the Twin Falls Waterworks company for failure to keep the dam safe. This case has been upon the court docket for four years and as yet never been given a hearing. The Times does not know where the blame rests for the delay while having a strong opinion about it. But at any rate it should go to trial at this time of the absolute need of the city for no case it might as well learn it now as later. If on the other hand it is a case, it might just as well have a good-faith judgment to effect purchase price of the present plant providing the utility commission allows the city to put in a system. The judgment would also have rather a salutary effect on the company in determining its attitude toward a possible sale. Four years is long enough to hold any case on the docket awaiting trial.

NEED A TRAFFIC COP?

The automobile accident, Saturday night, while fortunate in its outcome, should be a lesson to the reckless auto drivers and should spur the city authorities to an attempt to keep the streets clear of traffic. The Times would suggest that in the next two months that an extra officer be employed to watch auto traffic, make the drivers observe each and every road rule or else pay the penalty. Two months of education will save much trouble later. The pedestrians too should be made to observe ordinary rules of traffic and be compelled to stop the sprawling instead of cutting across corners and crossing streets. The autos should be held responsible for all of their auto accidents. The city should be held responsible for all of their auto accidents. The city should be held responsible for all of their auto accidents.

THE RIGHT ATTITUDE OF GERMANY

The right attitude of Germany and England to their untold problems regarding the Peace Plan may be regarded as sitting on a line of right and wrong and for the future a proper respect of the fact carried on our present needs, but it looks as though a little caution in the manner of resolving trouble will not hurt our national dignity in the least. In the past, the warring nations must come to the United States for foodstuffs, supplies and many other necessities of war. The only available supply is here. If such is the case, let the United States declare an embargo on all such stuffs until the warring nations come to their senses. Keep the American ships out of the waters of these warring nations, keep our trade with the accessible neutral nations and in every way try to establish commercial relations with these friendly countries. Tell Germany, England, France and the others that the supplies are here for them. Let them respect their merchant ships here and back. Make them observe all of the international laws which protect American waters. England's use of neutral flags in the war zone will mean nothing to us. It will stimulate down to the warring powers keeping up the fight on their own resources until such time as they must observe our own rules in the zone of warfare. There is nothing gained by courting trouble for the sake of protecting interests which have always sought to subsidize the national power to their own interests. If it becomes necessary for any American vessel to enter the trouble zones then send a convoy to the proper protection.

PHILANTHROPY ON THE DEPENDENT SIDE

Chairman Frank P. Walsh, of the Federal Industrial Relations Commission, who made up his mind some weeks ago that the great philanthropic Foundations like those established by Andrew Carnegie and John D. Rockefeller are fraught with menace to democracy, find by dint of a most questionable investigation that the two eminent founders share none of his misgivings. The appearance of the two multimillionaires before the Commission on the same day naturally interested the New York news editors, who further noted a likeness in the sentiments expressed by the two men as remarkable as the difference in their appearance and manner. When the Rockefeller and Carnegie Foundations were asked for a preliminary statement, Mr. Carnegie was asked his business in 1910-11 as much good as I can. When the colder and more reticent founder of the Standard Oil Company was questioned about the motives and principles underlying the various Foundations he has endowed, he answered, "The sole motive underlying the various Foundations which I have established has been the desire to do a good deed in the service of my fellow man." In reply to questions, the two capitalists added to their assertions of pure motives their confidence that no harm could possibly result from their great Foundations, which are under the guidance of trustees of ability and integrity, both former large employers of labor expressed approval of profit-sharing as a solution of difficult industrial problems, and freely conceded laboring men's right to organize.

THEY ARE MEN WHO ARE WORKING

Over that to get rid of their millions and in a way to benefit the public should be subjected to "grilling" just as if they were conducting their philanthropic enterprises with vicious or other than good motives, seem to be the thoroughness of Mr. Carnegie and Mr. Rockefeller. In New York Times and "The World" take up the contest for the distinguished witnesses and the defense of the Rockefeller, Carnegie and Sage Foundations. And the Independent, in a carefully considered leading article points out that "the history of the great American benefactions of our investigation has been one of unimpeded care to fix the responsibility and to take ultimate responsibility as to both purpose and administration in the hands of the duly constituted Government of the United States." Subject to this limitation, the trustees are, indeed, given great power, but the activities which they are charged to further are of such a nature that the light of publicity and the restraining force of public opinion must at all times fall upon their actions.

ACTIVITIES OF WOMEN

New York has nearly seven thousand women working in the garment and householding departments. Over 50 per cent of the females in the United States are unmarried. Women school teachers in Denmark receive from \$364 to \$520 a year salary. Quebec (Canada) needs a complete bookkeeping establishment in their nursery, where girls entering are taught and trained in the rudiments of bookkeeping.

IN DENMARK THE WIDOW OF A PUBLIC SCHOOL TEACHER IS ENTITLED TO A PENSION

of one-eighth of her husband's average salary during the last five years of his life. The widow is also awarded the Order of the Leopold by King Albert of Belgium, as a reward for her bravery under fire while serving with the Red Cross ambulance.

A DAZED INSPECTOR.

From a backwoods town where a new post office had been established there came complaints that mail was not being sent as promptly as it should be. An inspector went to the town to investigate. He held the postmaster pointed to a mail bag about one-fourth full and said: "Wal, I send the mail out every time I get the bag full. You don't expect me to send it out when it ain't got more'n a dozen letters in it, do you? Soon as I get that bag full I'll send it out all right. I reckon that will be within a week or so, so the way letters ain't comin' in now!"

DATES IN CALIFORNIA.

Date growing is rapidly becoming one of the most promising fruit industries of California, so it is stated in the annual report of the United States bureau of plant industry recently printed for public distribution. Nearly seven thousand date offshoots were imported from the old world states by private growers in the Imperial and Coachella valleys of California during last year. Many of the palms from earlier importations are now bearing fruit.

WHEAT PURCHASE BY SWEDEN.

The Swedish government has decided to purchase 120,000 tons of wheat as a reserve stock of food for the country. This quantity is considered sufficient to last two months and the cost is estimated at \$4,000,000, of which amount \$1,875,000 has been placed at the disposal of a purchasing agent in London. The purchase is the balance of the necessary funds are to be obtained in January and February.

age by Mr. Carnegie's pension system "was only to give him the loyalty to him and his class. The intentions of the donors may be of the best, but the results may be incalculably harmful to the studying generation."

Even more fatal, says Mr. Hillquit, as reported at length in The Call, are the "social-research" activities of the Foundations. "The work so far done by the Russell Sage Foundation is commended. But what we are told, there is no danger. Your price is not reasonable. It is supported by industrial means, and undertaken in ignorance of manual and industrial enterprises." For instance, Mr. Hillquit does not see how social investigators working under such auspices could render an unbiased and completely satisfactory report on labor conflicts. "All things considered, the broad powers which several Foundations enjoy under their charters are sooner said, Mr. Hillquit, "constitute a serious menace to the community."

When Mr. Carnegie was put on the stand he had little to say regarding his endowments, even under persistent questioning. Asked about the possible danger of undue influence upon beneficiaries, he answered, "I can not imagine any injury coming from that." He restated his well-known objection to allowing a matter of dogma or belief in a future life to delay a young man from taking his training for his life. It would welcome efficient government supervision. With apparent reference to both the trustees of his Foundation and the instructors in the institutions, he said amiably: "When you get a lot of able, good men capable of making their fellows conditions better, of elevating the world and helping for all that refined and pure as you can always depend upon an such man." Most of Mr. Carnegie's discourse to the Commission was in a reminiscent vein, and his final word on the labor question was, "I have your name calling you 'Andy' and you can get along with them." He congratulated the heads of the United States Steel Corporation upon their profit-sharing departure, saying that he "considered this the greatest of all steps forward by taking the initiative in making workers and capitalists fellow workers. Indeed, pulling and owning the same boat."

Mr. Rockefeller's testimony, on the other hand, was brief and businesslike. He declared he had "no fear whatever in regard to the Foundations exerting undue influence upon education. The best way to help the laboring man is to give him advice, information and fair wages. Mr. Rockefeller, in his testimony, was particularly insistent and said, "I will be very happy to see the laborers gradually become the owners of these same prosperous businesses to which you refer." Literary Digest.

NEW "HENDRICKS" ALL STEEL GRUBBER

The new All Steel Grubber which we are now manufacturing is the product of an experience extending over a period of more than eight years. We were the first in the field and have spared neither time nor money in our efforts to make the machine of perfect construction. The principle of the first machine made has been maintained throughout, though many improvements have been added. Where wood was once used, steel has taken its place, making a much stronger, noisier and more durable machine.

CONSTRUCTION—The frame is constructed of bar steel one-half inch in thickness ranging in width from one and one-half to two inches, and is simply braced to meet any extraordinary strain to which it may be subjected.

The side beams to which the cutting knives are attached are made of bar steel one inch in thickness and three inches in width while the center beam is made of the same material with an extra inch added to the width. Supporting the frame is a one and three-quarter inch round steel axle formed in the shape of a bale, which acts as a pivot on which the machine is raised and lowered. We place our machine on extra high Stetson Patent wheels made of the best thoroughly seasoned white hickory, obtainable and of sufficient weight and strength to harmonize with the frame and beams. Thus you will observe from the foregoing description that not an item of expense is spared in making our grubber the very best that can be produced.

ADJUSTMENTS—There is a certain satisfaction in being the owner of a machine which is constructed so that adjustments can be easily made. On the New "Hendricks" even adjustments involving the changing of the machine are easily operated by these levers.

TESTS—Our Grubber has been tried in all classes of soil found in the Northwest and has given the best of satisfaction except in places covered with large stones. Small stones and rolling land have but little influence on the ability of the work performed.

DIAPHRAGM—Our five foot machines are made especially for horse power, although they can be used with engines. The number of horses required is governed by the size of the sage brush usually from four to six horses draw them with perfect ease.

The engine power machines are usually constructed to cut a space ranging from six to eight feet in width. A forty horse power steam engine will easily draw two six-foot machines, while a twenty-five to thirty horse power steam engine will draw two eight foot machines.

PAYS FOR ITSELF IN A SHORT TIME—There is no much difference between the present day method of removing the sage brush as compared to the old way of using a grubbing hoe as there is in the one in the present method of harvesting grain and the rear hoe. Likewise the economy is as great in the one instance as in the other.

Today, one man with four good horses and a New All Steel "Hendricks" Grubber perform the labor of ten men. They do it better. Why? Because not a spear of brush is left standing behind the machine, because it takes practically all of the roots and because it thoroughly pulverizes the ground, leaving it level and mellow, which seldom requires more than a light harrowing to make a perfect seed bed.

For a number of years there has been a steady advance in the cost of all material entering into the construction of all classes of farm machinery as well as in labor in building it. Notwithstanding this fact our price has remained the same.

\$100.00 for the 5 ft. horse power machine, F. O. B. Twin Falls.  
\$150.00 for the 8 ft. engine power machine, F. O. B. Twin Falls.

We invite correspondence and will take pleasure in supplying you with any further information which you may desire.

Manufacturers of

Hendricks Sagebrush Grubbers

Twin Falls, Idaho

History of the First Scientific Grubber Ever Built

Being a pioneer by nature and a machinist by trade, I decided some eight years ago to go to the Twin Falls country, which was then being opened for settlement in search of a location in which to establish a business. Like the greater portion of the Intermountain West it was covered with a dense growth of sage brush. To make the land productive the brush had to be first removed, and to do it by hand was the custom in those days, making the undertaking of a discouraging and almost endless task. A more rapid and scientific manner for removing it had to be devised. To the accomplishment of this end the writer immediately began devising his entire time. Innumerable, almost, were the various types of machines designed to cut, grub or remove growing sage brush but all of little or no avail. The best results of a machine embracing strength, speed, durability and economy, that would eliminate all hand energy and perform its work perfectly, was the paramount thought ever present in the mind of the inventor of the "Hendricks" Grubber. The idea of a machine embodying all of the above principles was conceived, and the first successful horse power sage brush grubber built.

A thorough test proved beyond all doubt its practicability and efficiency. Almost instantly the demand for it became so great that it was found it impossible to fill our orders with any degree of promptness. From time to time we have been compelled to enlarge our factory in order to meet the ever increasing demand, and today, although only a few years have passed since the first machine was put into operation, we are pleased to say to our prospective customers that we have hundreds of orders and "hoorders" of the "Hendricks" machine, many of who, without solicitation, have furnished testimonials attesting its merits.

NEW "HENDRICKS" ALL STEEL GRUBBER

The new All Steel Grubber which we are now manufacturing is the product of an experience extending over a period of more than eight years. GOOD INSULATOR FOR TREES

Device Shown in Illustration Here with is Simple and Quickly Placed.—Material is Waterproof.

Part of the telephone linemen's work consists in keeping the wires clear of trees and their branches. The tree insulator here shown is simple and quickly placed. It is a rectangular piece of wood that may be placed on a wire by means of two crosswise grooves deep enough to meet a shallow groove cut in the wire. The wire passes from one crosswise groove

along the face groove and out by way of the second groove, the middle of the insulator, thus held by the wire bearing against the limb or tree without the use of nails or other fasteners. The wood for the insulator is thoroughly waterproofed.

Tree Insulator

STRAWBERRY PLANTS

Get your strawberry plants from the Mr. Kellogg company, branch farm, one and one-fourth miles northeast of Twin Falls, Go out Addison avenue to Varney's corner, then go north one-fourth mile. We have all the best varieties, including the ever-bearing kinds. 25 plants each of three or four of the finest in the world.—Adv.

For Sale or Exchange

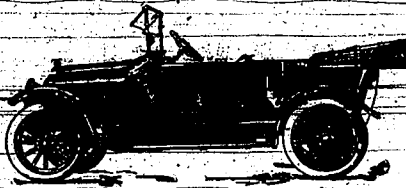

40 acre alfalfa tract, 10 acres of orchard within two miles from Grandview, Washington, the cream of the Yakima country. These standard varieties of apples, pear and peach fillers. More than eight carloads of peaches last year. Write

Moscow, Idaho

64-page book of instruction free with each order. Your order should be placed at once so we may reserve the plants of your choice.

R. M. KELLOGG CO., Clyde B. Hentley, Mgr., box 311, Twin Falls, Idaho. Feb. 18-22 Mar. 5-15 Toric Kryptok lenses fitted and made by the Parrott Optical Company are the finest lenses in the world.—Adv.

# Eight Cylinder King

Price \$1350 F. O. B. Detroit

Before you buy a car wait and see the new King "Eight."—Carload of Kings due to arrive the first part of March.

Distinct advantages of the eight cylinder motor are—

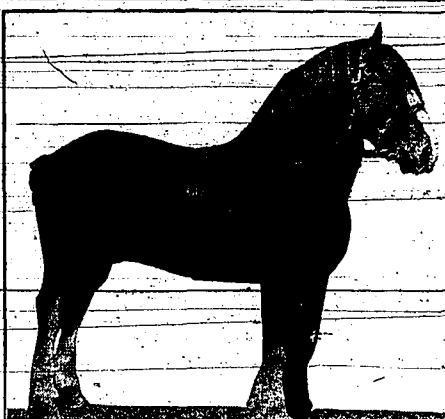

- Economy
- Simplicity
- Accessibility
- Lightness
- Power
- Flexibility
- Speed
- Longer Body with Less Wheel Base

This is not an extremely light car, yet it is not the heavy type, but is just that happy medium that so many car buyers have been looking for, yet with its 40-45 horse power Motor, it is as economical to operate as the medium weight four cylinder car.

### DO NOT PAMPER FARM HORSES IN WINTER

English Shire Stallion

(By J. M. KELLEY.) We are now in the midst of winter weather, and the daily care of the farm teams should be a matter of importance to their owners. This caring for them does not, altogether consist in feeding and watering regularly, although these are the main essentials, and without good feed and an abundance of pure drinking water, the work stock cannot remain in a thrifty condition.

The exercise is a most important one, and one that should never be neglected. I think it is a good plan to turn out all of the work horses every day that are not in actual use, especially on days when there is no "falling weather."

One of the greatest mistakes that a farmer can make is to leave his teams standing in the barn, day after day, and on full feed, as they are liable to suffer from stasis of indigestion, and any of the older stock is very liable to stock up from want of exercise. Then, again, all of them will be more subject to colds than when they are turned out to run around and play in the farmyard.

### SOWS FROM FALL LITTERS ARE BEST

Animals From Prolific Families Are Certain to Make the Best Mothers.

(By W. M. KELLEY.) In selecting breeding sows I prefer to select the pigs from fall litters that are born when they drop their first litter and when allowed to obtain a large part of their growth and development on pasture and forage crops the following summer they arrive at the very best period of development to breed for litters early in the next spring.

Even in wet weather. During wet weather no farmer will want to have the ewes running over his fields. Both the land and the ewes will be harmed if the animals run over the fields in the mud. A pen large enough for the purpose can be provided and the ewes can get their exercise during rainy weather, and after there is no more roughness to be picked out of the fields.

### WE FIT YOU WHEN WE MEASURE YOU FOR A SUIT

The man who puts on the "good front" has the good backing. Come in and order a new suit. The good feeling you will have will be worth more than the new clothes cost; and so sure as you "look better" you will "do better."

Try it. Come in and examine our samples. If you wish, we will aid you in selecting a becoming pattern. Order a suit from us just once; you will be our customer for life.

Stein-Bloch Smart Clothes. Agents for the Royal Tailors—samples now here.

### ALCO CLOTHES SHOP

"The Store of Values"

### HARD TIMES IN THE '60S

People Learned to Practice Economy in the Period Following the Civil War.

When I look after during the hard times that followed the Civil war, was talking about the high prices which the European countries were paying. "People will weather it in some way," she said. "We did in the Civil war days, and prices aren't anything now to what they were then."

### PLAN TO INTEREST FARMER IN DAIRY

While Indifference is Manifested, No Improvement in Material is Expected.

The person who could succeed in getting up some scheme of interesting the average farmer in the dairy business would be entitled to have his name enrolled among the benefactors of the human race.

### TURPINE IS LITTLE USED

Applying Shellac Has Been Found to Have Small Effect in the Open Field.

At the beginning of the war a great deal was said about the newly discovered turpentine shells, which, it was asserted, would kill any sap-sucking all living creatures within a certain radius. Since then surprise has often been expressed why little or no use of this wonderful explosive has been made by the French artillery.

In the first place, turpentine shells have little effect in the open field. They are very easily blown away against windward slopes, forts or dwellings. And so long as the enemy is on French or Belgian soil the risk to French or Belgian civilians would be too great to justify the use of turpentine in the open field.

### ALLAS SUMMONS

In the District Court of the Fourth Judicial District of the State of Idaho, in and for Twin Falls County. Petalita G. Straley, plaintiff, vs. W. J. Straley, defendant.

When the opportunity to step into a better position, with doubled salary comes, you'll be in line for it if you watch the classified ads.

### HOME TRADE NEEDED IN WEST

Co-Operation Between the Seller and Buyer.

As I have stated before, the average western town depends upon its retail stores for life. It is primarily a trading point. Cripple the retail business and you cripple the community.

There are three classes of people given to patronizing the home trade. The first is the progressive merchant. There is the fellow who takes pride in saying that he is independent of the town. He holds mortgages on good farms and owns some bank stock.

### For Sale High Class Recorded Percheron Horses

THE PERILS OF PAULINE Written By Charles Goddard SYNOPSIS Blanford Marvin, wealthy manufacturer of automobiles, has worn himself out by overwork. His son Harry, a young man of twenty-two, who loves his father, but who also wants to see two years of thrilling adventures before marrying, is a reason for his father's condition. Marvin asks to see what his son has written. While Pauline and Harry are in search of a suitable candidate for the first story, Mr. Marvin opens the case of a mummy just received from Egypt. Harry and Pauline, who have been removed the mummy's bandages alone, find that the mummy is still alive. Harry, during a fainting spell, sees the mummy's face and is so terrified that he jumps out of the case, taking a bracelet from her wrist and trying to force it into his hand. He is then taken to a strange man who tells him that the bracelet is a talisman against evil. Harry and Pauline, who have been identified by the bracelet as the mummy's wife, are told that the mummy's name is Pauline. Harry and Pauline, who have been identified by the bracelet as the mummy's wife, are told that the mummy's name is Pauline. Harry and Pauline, who have been identified by the bracelet as the mummy's wife, are told that the mummy's name is Pauline.

V. J. MORGAN, Box 55.

### PERILS OF PAULINE

(Continued from Page 6.)

When we are invited to Sophie McCallan's wedding and Pauline is taken the limousine for some silly reason. They'll not get back; I know they'll not. They never do."

"But, Miss Marvin?"

"Oh don't try to apologize for him. He cares more for his old business than he does for me." He mumbled something about a party, but I'm sorry I forgave him," she flared.

"You are right, Miss Marvin. It is an outrage."

She looked at Owen in astonishment. It was the first time she had ever heard him speak with such a word against Harry. "It's not a word against Harry," it originated here. "I think it is your fault," she declared, glad of a chance to turn her wrath against a person better than the charge of my estate, are you not? You are the one who should see that I have cars and drivers—everyday I want."

"But you know the machines here don't come from the town house, Miss Marvin? They will be here tomorrow."

"Well, even if they do, you know that what my brother does is an outrage. He does everything for the best."

"The tense frame of Raymond Owen hardened. He fixed his eyes upon her face and moved very near to her. Pauline long shrank away from him. "Miss Marvin, Harry is lying to you," she said quietly. "He and your chauffeur have formed a plot against you. Your car will not be back this afternoon at all. ..."

He moved still nearer, his eyes bulging with the intensity of his purpose. Raymond Owen had found his own chance. His enemy had set his own trap and Owen would see that he should not escape easily. The opportunity to break farther the bond of faith and affection between Harry and Pauline had come. "Owen's voice almost rose to histrionic power as he poured out his revelation and his denunciations in the startled ear of Pauline. ..."

"You are mad, I will not listen to you. Let me go."

"Not until you have heard," he declared firmly. And his blazinc eyes hold her.

"As I was passing the door of the garage only a few moments ago," he went on in a rapid whisper, "I saw Farrell at the telephone. He called the private number of Owen's room and Mr. Marvin was sitting here. ..."

"It is a scheme of Harry's to keep you from the wedding—for what purpose, I do not know. It is one of many schemes that have held your life in constant peril. I saw their plan arrested at Farrell's office. ..."

Two hours later the struggle over, she called Margaret, who bathed her and dressed her for the wedding. Pauline returned quietly to the library. "I will be ready to go, she said to herself. "I know I shall know if it is true. I will not distrust him until I know."

Harry Marvin, Owen, tried his best to make good use of the time he had stolen. But the thought of his well-meaning, chivalry was heavy on his mind and it was not until the afternoon confession. After all, Pauline might find a way to go to the wedding. If determined spirit was had to curb. Might he not, instead of having averred the danger, simply have absented himself from the scene of danger when he was most needed? His nervousness increased. He found himself incapable of work, and at three o'clock, to the surprise of his clerks, who had thought his unexpected visit must mean an important conference of directors, he called a taxicab and started for Westbury. ..."

In her face. She merely tightened her belt and sat silent.

"You'll see the first turn to the right," she said. "If you don't, you'll be on the crossroad. He did not slacken the speed."

"It is a sharp turn; slow a little, she cautioned. He did not seem to hear her."

She glanced her hand sharply on his arm. "He drove past the crossroad and the speed up to the last notch. Pauline tried to stand up, but she felt her back with one hand, not even looking at her. He was leaning far over the wheel now, his eyes blazing. She could see the heat of the blood in his temples."

"Stop! Stop! You are on the wrong road! You will kill us! Stop!" she screamed in his deaf ears. She tried again to wrest the wheel from him, but this time he held her fast after she had clung her back. She sat helpless, terrified. She realized now what she had done. She had raised up a Frankenstein for her own destruction. ..."

(To Be Continued)
