The testimony in the Barnes trial against Roosevelt, revealing the political secrets of the party should give food for serious thought to the voters of the party.

There can be no real reform until the political system which created these bosses is completely wiped out of existence. Such destruction is the only way to break the political machine.

It must be evident that political freedom is not a reality as long as the Bosses of America live. The men of honor in this country are the people who are not afraid to speak the truth.

BUY IT NOW The gospel of "buy it now" which is being preached in all eastern centers with the purpose of stimulating industry and the circulation of idle money.

It is not just to criticize many of the men in public life, who, hounded by poverty, have sought to do the will of the people and have, by reason of their poverty, made a part of the despised political system and have, therefore failed.

the financial depression instead of the municipality acting as a paternal assistant to its citizens in time of need.

THE REPLY TO GERMANY

Even those who were inclined to think that Ambassador Count von Bernstorff's recent communication in criticism of our neutrality should have made him persona non grata in Washington profess to be pleased with the friendly reply from our State Department.

Count von Bernstorff's note which was quoted in these columns last week objected to our Administration's policies, chiefly on the ground of acquiescence in British aggression and failure to stop the exportation of munitions of war to the enemies of Germany.

From the Herald: Carl E. Nelson motored to Twin Falls Saturday evening. Mrs. E. W. Hill is visiting friends in Twin Falls this week.

when fully reviewed and comprehended. To quote:

"In the first place, this Government has at no time and in no manner yielded any one of its rights as a neutral to any of the present belligerents. It has acknowledged as a matter of course the right of visit and search and search and the right to apply the rules of contraband of war to articles of commerce."

"It has indeed insisted upon the use of visit and search as an absolute necessary safeguard against mistaking neutral vessels for vessels of war and enemy and against mistaking legal cargo for illegal. It has admitted, also the right of blockade, if actually exercised and effectively maintained."

Reference is made to the unsuccessful attempt to secure mutual concessions from the British and German Governments regarding interference with neutral sea-trade.

"In the third place, I note with sincere regret that in discussing the sale and exportation of arms by citizens of the United States to the enemies of Germany, your Excellency seems to be under the impression that it was within the choice of the Government of the United States, knowing its professed neutrality and its diligent efforts to maintain it in other particulars, to prohibit this trade, and that its failure to do so manifested an unfair attitude toward Germany."

"This Government holds . . . that any change in its own laws of neutrality during the progress of a war which would affect unfavorably the relations of the United States with the nations at war would be an unjustifiable departure from the principle of strict neutrality, by which it has consistently sought to direct its actions, and I respectfully submit that none of the circumstances urged in your Excellency's memorandum alters the principle involved."

No fault, comments the New York Journal of Commerce, can be found with the opening sentences of the memorandum which seem to be addressed by a candid friend to one of extreme sensibility who has been hurt through a misunderstanding of the conduct of that friend toward one who is an enemy of the person aggrieved."

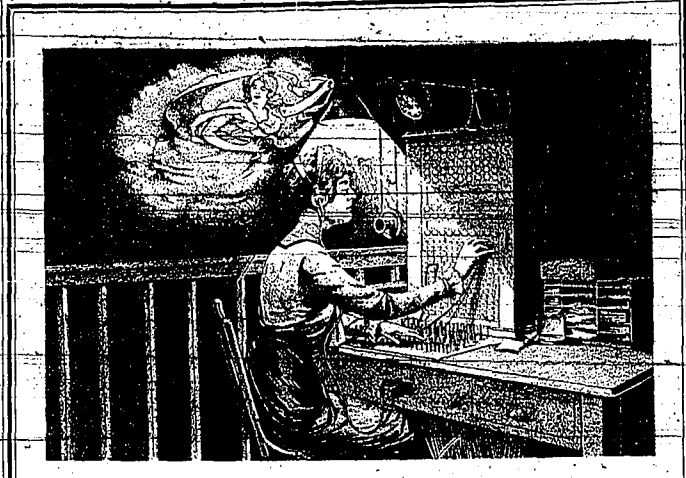

"The note closes with the declaration that the United States Government feels compelled to speak with perfect frankness because 'the friendship between the people of the United States and the people of Germany is so warm and of such long standing, and the ties which bind them to one another in family are so many and so strong.'"

Count von Bernstorff's note which was quoted in these columns last week objected to our Administration's policies, chiefly on the ground of acquiescence in British aggression and failure to stop the exportation of munitions of war to the enemies of Germany.

The Spirit of Service

In the long night vigils of the lonely exchange— In the strenuous turmoil of the busy day— With the builders in the heat of the dusty desert and on the dreary mountain side— With those who battle with the elements in times of devastating disaster— In the loyalty, the faithfulness, the unselfish devotion to duty of all those who minister to your telephone needs— In and through the entire army of telephone workers ever glad to serve— In all, through all and over all broods the gentle, animating and sustaining Spirit of Service.

The Mountain States Telephone and Telegraph Co.

Mrs. C. W. Turner was a passenger to Twin Falls Monday returning Wednesday. Mrs. William McDonald spent Saturday and Sunday with her husband in Hollister. Mrs. Samantha Heck is spending the week with Miss Jane Yeager of Twin Falls. Miss Georgia Sallee is being entertained by her Twin Falls friends this week. Mrs. J. Gafford has been confined to her home on account of illness the past week. Ray Beauchamp of Twin Falls, was assessing property in the Hollister vicinity this week. The Eastern Star lodge held their regular meeting in the auditorium Wednesday evening. William McDonald, of the McDonald Mercantile company is transacting business in Twin Falls. Mr. and Mrs. J. R. Diebolt motored to Twin Falls Wednesday evening to take in the movies. Mrs. Keith Jones and little daughter Rose, visited relatives in Twin Falls the early part of the week. Mrs. E. Edinger and Mrs. Carlold E. Hill spent the week-end with friends in Twin Falls. The new church is nearly complete. A business trip which will probably occupy two or three weeks. Mrs. M. A. Ray has been quite ill the past week and while improving, is still under medical treatment. Elwood Henstock, the son of Mr. and Mrs. James Henstock, has been under the care of Dr. Purrett the past week. J. W. Pratt and family and the J. E. Polman family were guests at the J. S. Tate ranch south of town Sunday. Mr. and Mrs. John Kendrick, of Deep Creek, visited her parents, Mr. and Mrs. J. M. Duffield of Rogerson Sunday. W. A. F. Rismeyer transacted business in Magic City Tuesday and in the evening took in the show at the Lavering. H. H. Carr is on the sick list this week. W. H. Craven is in Boise this week in connection with the Allen case. The new church is nearly complete, the plastering being under way this week. Henry Korthuis and John Workman came business visitors from Amsterdam Tuesday. C. C. Clendenen was unable to attend to business a few days this week on account of illness. Burr Ambary of Twin Falls, was in Hollister Monday on his way to his residence tract west of town. Earl Smith, who has been employed by the canal company, has resigned his position and left Wednesday for Twin Falls. Ole Griesthauser, of Bull, has spent several days this week looking after the D. E. Durley ranch adjoining the Korthuis. Miss Mary Douglas, who is attending high school in Twin Falls spent the week-end with her parents here in Haggard. Misses Marion Ramsey, Junita Hughes and Dr. W. A. Parrott motored to Twin Falls Saturday evening with S. S. Champault.

### SILAGE FERMENTATION

(By W. M. Eaton and J. C. Mason)

The following is a digest under the title of Bulletin No. 79, issued by the Storrs Experiment Station of Storrs, Connecticut. It is, by all odds, the latest and most complete work on the subject of the preservation of silage. Being founded on five years of investigation, by eminent scientists, it is a masterpiece of method, and is authoritative in its deductions.

The bulletin treats principally of the changes which corn undergoes after it has been placed in the silo, and explains the curing process minutely. From the bulletin we learn that the silage is made by the curing process of the silage, which are lactic acid and acetic acid. These acids serve not only as a preservative, but also as a tonic to the animal. The development of these acids is favored by high temperature while the silage is in the perfect preservation of the silage.

The authors explain in this bulletin the silo should be properly constructed out of a non-conducting material. Quoting from a part of their bulletin, on page twelve, paragraph three, we gave the requirements for the proper curing of silage: "The necessary factors are—proper temperature, lack of air, and absence of development of heat in the silage. The lack of air is obtained by close and air-tight walls. All these factors are automatic and are produced by the silage properly constructed wooden stave silo."

In determining the curing of silage at different temperatures, the authors give data on the benefit derived by the higher temperature in the curing of silage, and conclude with the following quotation: "This experiment explains why silage does not keep as well in cement, stone or brick silos. The cement silos are the best, but the acid fermentation in a silo and the acid fermentation is checked, unless the temperature of the air at siloing time is above normal. Another factor is that cement and brick are porous and allow the silage to get wet, which causes it to spoil. The authors also state that the acid and chemical tests are necessary to prove that it is normal silage. The odor of silage is the next best test. In testing the silage produced by different kinds of silos they give the following comment, to explain the reasons why wood makes the best material for preserving the silage: "In the first place, wood is a poor conductor of heat. It conserves the normal temperature at the beginning of fermentation so the proper acid is formed, and prevents largely the freezing of silage. Secondly, silage keeps best against wood and nothing is lost around the edges. In some cases silage in a silo of silage is experienced at the edges. The testing of conduction by using a silo having a number of different materials in the wall, alternating wood, stone, brick, etc., gave the investigator a good opportunity to note the bacterial changes which take place, as enforced by heat or cold, and they conclude their bulletin by the following comment: "When ensilage comes into contact with the brick and the cement surface of the silo and the brick, the heat generated by fermentation is conducted away so rapidly that the temperature does not rise to the height necessary to prevent the development of the organisms of rotting; that is, to prevent rotting."

When the temperature rises to a height sufficient to cause the best development of the organism of fermentation, and to prevent thereby the development of the organisms of putrefaction. The successful preservation of silage may require the development of certain organisms which, by the very fact of their development, retard or prevent growth

of organisms which would be detrimental." Professor Henry, of the Wisconsin experiment station, has also arrived at the same conclusion. In the Breeding Gazette of June 13, 1888, he says: "The silage is a stone silo which is built in the future, an experience shows that a stone wall chills the silage during the curing process, and it does not necessarily insure that portion next to it to a thickness of several inches. It renders it, at least in the judgment of the author, not more favorable in the eastern states to its construction. On our experimental farm at Madison our first silo built in 1884 was of stone, and our conclusions in regard to ensilage were made up from results obtained from this silo; that we put up a wooden structure. I am confident our results would have been worth study to our people than they were."

Their conclusions are as follows: 1. The fermentation of corn silage is essentially the change of sugar into several acids. The most important changes are the conversion of starch of the sugar by lactic acid bacteria into lactic acid. A second change is caused by the action of yeasts on the remaining sugars, changing them into alcohol. The acetic bacteria change the alcohol into acetic acid. 2. The circulation of air is necessary for the proper production and preservation of silage. 3. The circulation of air should be non-conducting to heat and moisture. 4. Mature corn makes silage of better quality with less waste. 5. Silage undergoes a ripening, somewhat similar to the ripening of cheese, which softens the fibre, makes more digestible the protein and adds new and agreeable flavors. This ripening occupies from three to four weeks. 6. A silo is the cheapest form of storage. 7. Any farm product can be silaged, but products with sufficient sugar in the mixture to be fermented into acid to preserve it. 8. The following mixtures also succeed in making silage: Alfalfa and nearly balanced ration; Alfalfa and rye, clover and timothy or wheat or oats, and alfalfa, and corn and rye, peas or soy beans. 9. A round wooden stave silo, taking all things into consideration; of silage, especially legume silage, during the dry summer months, for keeping up the milk flow to its highest point.

### BIRTH NEWS.

From The Pioneer.

C. J. Chamberlain went to Halley Saturday to spend a few days on business.

Thomas Warner, of Twin Falls, was in Bull Saturday.

John G. Jensen went to Twin Falls Sunday evening to visit friends.

Miss Silver went to Twin Falls Sunday evening.

F. W. Westman shipped a carload of hogs to Los Angeles this week.

Mr. and Mrs. Russ Alfred left Wednesday of last week for a trip to Los Angeles.

Mrs. Emily Frier was in Bull from Castleford one day last week.

C. S. Martin was in Bull from Twin Falls on business last week.

C. J. Katina went to Filer Friday to start off his show there again.

Mr. and Mrs. Owsley were in from Idaville on business last week.

Mrs. E. A. Bitton went to Murtaugh Sunday evening to spend a couple of days.

Chas. Smith, H. Hart, W. C. Walters and Herbert Hart went up to Twin Falls Sunday evening.

Miss Horvath, of Murtaugh, came down Saturday to visit Mrs. Kinney, of Castleford.

### BETTER MATERIALS GO INTO OUR BETTER CLOTHES

Yes, and they go into our suits right.

The best tailors in the world make our clothes. They are not slung together by "carpenters" of clothes, but are perfectly tailored by skilled hands.

Better cloth and better tailoring make our clothes "better." We are not offering you a lot of cheap out-of-style suits—but good suits.

Shoes, hats, and all gents' furnishings are new and up-to-date.—Why pay good money for old junk?

## Pure, Sweet Apple Cider

By the Gallon or Barrel  
**25c Per Gallon**

This is the "best" cider that the kind you like to taste fresh from the mill. We have especially prepared this so that it will keep pure and sweet and appetizing, ready for the table. Phone 60, and have a sample gallon delivered to you. We know that it is as sweet as candy.

## Blue Lakes Bottling Works

539 Shoshone Street South

Miss Collette, of Twin Falls, was the guest of her parents Saturday afternoon and Sunday. F. C. Marquardsen was in Twin Falls at a meeting of the district sub-committee on Monday morning after a visit with her sister, Mrs. J. E. Wood. Attorney A. W. Ostrom of the firm of Ostrom and Green, was in Boise on legal business last week. J. G. Adams and wife came in from Memphis, Missouri, Thursday to visit J. Black and will stay for the summer. E. P. Blanton left Wednesday for Clay Center, Kansas, on business and for the purpose of visiting friends. Miss Gorrings, of Oakley, returned here home Monday morning after a visit with her sister, Mrs. J. E. Wood. T. S. Hunter was a passenger to Twin Falls Thursday evening, where he spent a couple of days looking after business interests. C. J. Works and family and E. R. Tillery and family conducted a party that drove to their auto to Hagerman and Malad Sunday. Mrs. E. B. Johnson underwent an operation for appendicitis at the Twin Falls hospital Thursday afternoon, and is reported much better. Mrs. W. E. Hurman conducted Christian services in Bull Sunday afternoon in the place of her husband, Reverend W. E. Hurman, of Twin Falls. Miss Edithette, of Boston, came in Saturday to spend the summer here, the guest of her uncle, B. F. Ratchette, and to look after her property near Bull. Building work has begun on the new warehouse for the Consolidated Wagon and Machine company. The foundation has been laid and the structure will be up in a short time. T. J. Walker, who has been visiting J. S. Johnson at the latter's farm near Bull to the southwest, left for Twin Falls Thursday evening, where he will seek employment. Miss Nellie Gehlman, professional nurse, left Thursday evening for Twin Falls, where she took charge of Mrs. John Hogg, who is very ill with pneumonia. John Hogg, who lives west of town, S. S. Taylor, of Loveland, Colorado, left Friday for Twin Falls, for a short visit with friends, after spending a few days in Bull, as the guest of J. H. Shields and John H. Newbrough. The opening of spring in Bull is reported to be about the same as in California and a short visit in Kansas, that there is no country like southern Idaho.

## Want a Meal

A good, clean, appetizing meal that will make you feel content and happy? If you have never eaten at our cafeteria, you see the food before you buy, you choose what you want, and your meal fits your appetite or your purse—or both. The "cafeteria habit" is the cheapest and the best. Come and see if you do not agree with us.

## THOMPSON'S CAFETERIA

183 Shoshone St. South, Twin Falls.

## Who's Your Baker

Do you know him and his bake shop so that the bread and pastry you buy has the proper sanitary guaranty to insure your peace of mind. You want to be sure that every precaution is taken that the bread is kept pure and clean until it reaches your table. You do not want the taste of the pastry upon the table associated with a grade of doubt as to its cleanliness. We have the pure food products which will make your appetite increase. Give us a trial. Call and inspect our sanitary bake shop.

HAVE YOUR WATCH CLEANED OCCASIONALLY A watch will run without oil or cleaning longer than any other piece of machinery, but it needs both occasionally. DECKER The Jeweler

# Bargain Week

at the

# TIMES

## For Subscriptions

While all the merchants of the city are putting on sales and making it an object for the people to trade here, the Time will adopt the same plan for one week only.

Beginning Saturday Morning  
May 8th, and Ending Saturday  
Night at Six o'Clock, May 15th

We will offer the Twin Falls Times to New Subscribers for

# \$1 Per Year

Old subscribers by paying arrearages to the first of May can renew their subscriptions for

# \$1.00

This offer will positively close when advertised and those who get in at a later date will be obliged to pay the full price of \$2.00 per year.

# ONE WEEK ONLY

### SILAGE FOR SHEEP

With the tremendous increase in the use of silos for utilizing a larger amount of the corn plant and the greater use of silage generally during the last two or three years, there has arisen a great deal of inquiry especially during the present winter as to the value of silage for sheep. Recently silage has come into general use on cattle farms. Now and then a certain food, from the standpoint of cheapness, is becoming more and more apparent, the man who owns sheep is beginning to ask whether he can not share in a good thing too.

Unfortunately, the use of silage for sheep-feeding purposes has been limited out to a limited extent. Few farmers have used it and the Experiment Stations have done little. From all sources of investigation it seems that there is no reason why silage should not find a permanent place in the list of desirable and economical feedstuffs for sheep. The writer has made several runs this winter who have used it with satisfactory results, and one man especially who had fed out most of the winter with silage almost exclusively was very enthusiastic in his appreciation of it. We have not forgotten the men who have had trouble from silage.

There has been a popular conception that silage is more or less dangerous to feed sheep, especially growing ewes. It was thought that it had a weakening effect on the lambs, also that there is likely to be some mortality among the ewes. Such ideas do not seem to be well founded. It is true that such results have been noted in flocks which had silage, but that observation shows that other factors may have had more to do with the results than the silage. At the Station three years ago the ewes which had considerable silage, in fact all they cared for. Also the lambs were not as strong at birth as they ought to have been and some loss was experienced at lambing time, but an excessive amount was allowed and ewes were entirely too closely confined without adequate exercise. Exercise is an absolute necessity for pregnant ewes if satisfactory results are to be had at lambing time. Lack of an experienced shepherd to handle these ewes at lambing time doubtless contributed to the loss. Since that year we have had no bad results.

Back in the fall of 1907 the Indiana Station began an experiment with silage for feeding pregnant ewes. One lot was fed on a mixture of alfalfa, clover hay and grain, while another lot was fed more hay, slightly more grain but no silage. These two lots of ewes were as near alike as could be had. The next year practically the same experiment was repeated, and again in 1909. During the first year the limited amount of silage was fed. The second year, four pounds per head per day, was allowed and as no bad results accompanied either feeding the last year the ewes were given all they would clean up which was practically 4.8 pounds. With all they wanted of silage, no detri- torious results were observed either in the ewes or in the lambs.

As to results from these three years' experiments the authors of the bulletin concerning this experiment say that the general thrift and appetite of the silage ewes was superior to that of the lot fed on grain alone. The ewes, having a quantity of silage, made each year a larger gain per acre than did those on dry feed. The latter averaged five, the three years a gain of six pounds while the silage ewes gained 13.75 pounds per acre. The authors of the bulletin state definitely that his gain was no more fat like corn feeding would produce, but that the ewes were more vigorous lambs. It was a noticeable fact, that right straight through the whole three years, the lambs from the ewes having the succulent feed, i. e., silage, averaged nearly ten per cent larger at birth. As to the cost of silage, the results were as follows: The most economical, while more satisfactory results were obtained. The lambs from these two lots of ewes were all fed out for an early market and those from each lot equally well, gaining nearly a half pound per unit until they were sold.

The general results of this feeding for three years show definitely that the use of silage for ewes, even in large amounts, will not interfere with the health and thrift of the pregnant ewes nor of her prospective lamb. Also the succulence which the silage affords seemed to promote the general health of the ewe, and because of the added health and vigor, the foetal were better nourished, with the consequence that larger lambs were produced. Furthermore the producing of all these satisfactory results did not affect the lambs unfavorably, and the silage ration was more economical.

Accurate data regarding the value of silage in a ration for attending sheep and lambs is scarce, but what is indicated is that it is useful. As far back as the early nineties the Michigan Experiment Station fed some lambs on silage and other foodstuffs. The gist of their findings is to the effect that a mixture of feedstuffs composed largely of a good quality of silage proved a cheap and successful ration for fattening lambs.

The Iowa Station at Ames made some comparative tests of dry-bean roots and silage as roughness in 1906 and 1907. In lots fed the first winter, the silage cheapened the ration considerably. During the second winter the various lots were fed for a long period, 168 days, and the silage fed to eat much silage. The silage lot almost as much grain and hay as the other lots did, and on these lambs feeding was more expensive than was the case with any of the other food combinations. But the average of the two years was favorable to the use of silage as a means of cheapening the ration. The lambs from the lots finished into market topers, but the dressed carcasses showed the silage had a little superior on the hook.

Taking these few experiments then into consideration, and also the general results which various feeders have obtained in practical work, it seems that silage has an important place among the desirable and economical feeds for fattening sheep. It is my opinion that silage can be fed to sheep with satisfactory re-

sults. The use of moldy or frozen silage may cause trouble, but good clean, bright silage can be used with excellent results. This opinion is based partially on observation of flocks which have been fed, and partially on the experiments quoted above. The results to date point toward silage as a cheap and valuable feed for sheep.

Assistant Professor of Animal Husbandry, University of Nebraska.

### KIMBERLY

The Better Babies Contest is a thing of the past, but the interest in better babies will continue, and it is believed that some day. The appreciation of the community is extended to the Ladies Flower Club, under whose able management it was conducted and which furnished not only the incentive but medals and diplomas and much valuable matter and information. The physicians, Drs. Caldwell, Weaver, Congdon, Murphy, Minter, Plamer and Davis, also the nurses Misses Mary Ann Jones, Misses Cracraft, Anderson and Gees gave their services. A very interesting program was given in the school auditorium on Saturday afternoon, following which the awards were made as follows: The bronze medal given to the child scoring the best was given to Harry Stanbury McCoy, of Hanson, who scored 99.

Diplomas were given in Class 2 to Ruth Elizabeth, 94.5; Ruth Elizabeth Lyneb, 96. Class 3 to Harry Stanbury McCoy, 99; Ruth Arlene Wilson, 97; Class 4 to Rudolph Martens, 96.5; Frances Egan, 97; Harold Franklin Hoover, 97.5; Edna Margaret Nowbury, 96.5. The Liberty Bell medals were carried by the following pupils for the last period: grade one, Blanche Weller; grade two, Irma Nelson; grade three, Owen Swerance; grade four, King George; grade five, Willie Willmuth; grade six, Anna Nelson; grade seven, Joy Wright; grade eight, Oliver West; grade nine, Charles H. H. H. Herbert Harding; grade eleven, Clarence Lemp; grade twelve, Kenneth Zuck.

Plans have been made for the close of school as follows: Class sermon, May 16; class play, May 13; eighth grade program, May 18; graduating exercises, May 21.

### ARHESIAN CITY

Mr. and Mrs. Orson Strong and Mr. and Mrs. John Simmons were sight seeing at Twin Falls and Shoshone falls Friday.
