FARM POULTRY FACTS

GETTING MOST FROM TURKEY

If Fowls Are Tame They Will Lay In Improved Nests—Confine Poultry in a Dry Place.

About the last of February, place some old barrels or their sides with straw or leaves in them, around in good places, with a few hens' eggs in them, and, says a writer in Farmer's Guide, if your turkeys are tame they will lay in the nests you have fixed for them, and you will have very little trouble hatching nests.

When the weather is cool bring in the eggs before they are chilled, and if they are turned every day you can save them until the hens are through the first laying, then set one or two, and put the balance under chicken hens, giving all the poulters to the turkey hens, letting the other turkeys all after, second laying, as the first laying is too late to make good turkeys.

A Most Popular Bird.

After the eggs are all hatched leave the mother alone as long as she will stay in the nest. Then confine her with the poulters in a coop until they have learned her call, as they will follow anything of the first day or two after they get strong on their legs, let the mother out after the dew is off the grass, and let her take her babies for a stroll to catch insects, but be sure they are back in their coop before the weather turns cold.

Keep the poulters after the first day, except while it is raining, but confine the hens and let the little ones go in and out of the coops at will.

I feed corn bread and curds with black pepper mixed on them, and feed all they will clean up, at least every two hours, and often when the weather is so they have to be confined. There is a great deal written about feeding young turkeys, and they can be the easiest way out of it when anyone loses turkeys, to tell them they have been feeding too much. But I think it could be often traced to loss of feed with good feed properly fed, it is impossible to feed too much on free range, for they can eat but little at a time, and with their rapid growth and feathering, they cannot make fine birds when they are stunted for feed.

SURPLUS FEED MAKES EGGS

Hens Require Balanced Ration to Be Well Fed—Winter Layer Brings the Profit.

Farmers do not realize that their flocks of hens should be as carefully fed as their pigs or any other stock on their place. Most day flocks are allowed to rustle for most of their living, and if they do not get it, they suffer.

Hens will first apply the feed provided in securing them in good, strong, healthy condition, and then, if there is a surplus, they will use it to supply eggs. Only in the spring, when the reproductive instinct is predominant, will they lay under other conditions. The wise farmer realizes this and feeds his hens all they will eat at all times. There is another thing to take into consideration. We can practically starve a pig with plenty of food handy. Feed a hen on any food containing one element alone, and she will soon be practically starving for some other element it does not contain, and which her body requires. It is the same way with the huffs. They require a balanced ration to really be well fed. Corn, wheat, oats, hay, all contain elements in different proportions, and if they are alternated, and then a liberal supply of meat meal, alfalfa meal, and mineral stuff, such as kelp, are given them, they do not lack any element needed. The result is they are happy, contented, healthy, and will lay the year round if they are of the right breeds. It is the year-round layer that pays the farmer. They have larger records than others that will not lay nearly as profitable, for they do their laying when eggs are lower in price. The winter layer brings the profits.

LIME IN THE POULTRY YARD

Especially Valuable Where Chickens Run—Tends to Sweeten Soil and Destroy Certain Germs.

The best authorities ascribe the loss of eggs in chickens to the loss of calcium through worms and the germ of the eggs running in the ground from year to year. That such ground occupied by chickens with wastes should never be used the second year without renovating. It is always a good plan to be on the safe side and thoroughly lime the ground on which young chicks are to run even though it was not occupied by chicks the previous year.

The best way of doing this is to cover the ground thickly with unslaked lime and spade it in a few inches, then go over it with a roller of some kind to firm it and then sprinkle a thin coating of fine time all over the surface before allowing it to be used by

Large Losses Are Sustained Where Hens and Chickens Are Allowed Free Range.

the chicks. It is also a good plan to use lime freely in the yards occupied by growing chicks or by mature fowls. It tends to sweeten the soil, and destroy certain germs that are more or less injurious. It will be found an excellent plan to sprinkle lime over the poultry yard at least once a month during the entire summer, not forgetting to use it freely in the houses also.

Prevent Egg-Eating Habit. Hens that are fed a well balanced ration seldom resort to egg or feather-eating. Gathering the eggs early, and covering them with straw or clean cloth, will often prevent the habit, as it is usually well along in the day when the hen goes scratching in the nests and perhaps accidentally breaks the egg that gives her a desire to break others.

Truthful Poultry Statement. There is much truth in the statement: 'Don't try to tell the other fellow something about poultry that he doesn't want to know.' He will not believe it if you do, no matter what proofs you may have.

Keep Nests Clean. Keeping the nests clean makes it easier to keep the hens free from lice.

It's "Fruity"
You like the flavor of ripe fruit, don't you? Then chew SPEAR HEAD. There's a fruity chew for you! A rich, mellow, juicy chew with a mellow flavor that stays.

Twin Falls, Idaho

OAKLEY PROJECT GETS WATER

Vineyard Company is Restrained From Monopolizing Goose Creek Supply.

On telegraphic request of counsel for the Twin Falls-Oakley Land & Stock company, representing that the Vineyard Land & Stock company was using more than its share of water from Goose Creek and its tributaries Judge Dietrich, on Friday evening, issued a temporary injunction restraining the Vineyard company from diverting more than one-fourth of the available water supply from those streams. On Saturday, August 14, the Vineyard company, or its representatives, will be given a hearing before Judge Dietrich in Boise. If desired, the effect of the order will be to give the settlers on the Twin Falls-Oakley project one-fourth of the water from Goose creek and its tributaries for irrigation purposes.

Litigation Pending.

In April last, the Twin Falls-Oakley company brought suit against the Vineyard Land & Stock company in the United States court, to establish the priority of its rights to the waters of Goose creek against their use by the Vineyard company. Judge Dietrich has not yet rendered his decision in this case. He is now on his vacation at The Breakers. The Twin Falls-Oakley company represented to the court that the Vineyard company was "hogging" the Goose creek waters, of which the settlers on the Twin Falls-Oakley project are in urgent need.

Counsel for the Twin Falls-Oakley company have asked the court for leave to introduce further evidence regarding the company's water rights at the hearing on Saturday next. They say the Vineyard company never appeared at this hearing but they may bring the question up later by giving the Twin Falls-Oakley company five days' notice.

Prior Rights Involved.

A large number of farmers, whose lands are now under the Twin Falls-Oakley irrigation system, hold water rights on Goose creek granted to them many years before the project was organized, and even prior to the use of Goose creek water by the Vineyard interests. These old rights were turned into the project, the holders taking in exchange contracts for water from the Twin Falls-Oakley project. It is now claimed that there is not more than sufficient water available to supply these prior rights, hence the request for a restraining order.—Statesman.

"A sensible cigarette that's what I want"

There are a number of good, sensible cigarettes on the market—Fatimas are not the only ones.

But Fatimas are the best-liked and best-selling of all the cigarettes costing over 5c.

Of course, your taste may be different—you

may not like Fatimas as well as these thousands of other men do.

But you can't deny that they are *worth trying*—not only for the delicious taste that has made them so famous, but also to see just how **SENSIBLE** they really are—how **COOL** and comfortable to the throat and tongue and how free they are from after-effects.

Clip out these tests and see if you can find any cigarette that meets them as well as good old Fatimas do.

Make this important test today.

Lynne McPherson

TWO TESTS FOR ANY CIGARETTE

The issue of the cigarette—according to the tobacco journal—is up to the smokers. But there are other qualities that you should look for in the cigarette that you are going to smoke. First, it should be a cigarette that will give you a comfortable smoke. Second, it should be a cigarette that will give you a comfortable smoke.

1. The first test is for coolness, which means more comfort in the throat and tongue. Many cigarettes are so hot that they are not sufficient to make you feel any good. If you smoke a cigarette that is too hot, you will find it difficult to smoke. If the cigarette contains a high grade of mild tobacco leaves, combined in just the right proportion, it will always feel cool and smooth both to your throat and to your tongue.

2. The second test is for freedom from after-effects. If the cigarette is so hot that it causes you to cough, or if it causes you to feel any ill effects, it is not a good cigarette. A good cigarette should give you a comfortable smoke and leave you feeling fresh and clear-headed.

Clip out these tests and try them on Fatima

Small Grain Harrowed Until Six Inches High and Corn Treated With Same Implements as Long as Possible—Prevent Evaporation.

Three years ago I took charge of a dry farm. The soil was a good loam containing a great many bowditchers that by a slight drift, at one time when in this section gave large yields but during the dry seasons the crop fell down to six to twelve bushels the acre which was scarcely worth sowing when at harvest time the stock was turned into many of the fields. I began the work of tackling virgin prairie. The neighbors thought I was crazy because I plowed the prairie soil six inches deep and followed the plow with a disk. I have sown because I harrowed the small grain until it was six inches high; because I harrowed the corn every week so long as possible and then plowed it each week with a very small toothed harrow. But they were wrong at harvest time because some of the best gave a return of \$32 the acre, writes Clifford Willis in Denver Field and Farm.

Last year many of the fields in the vicinity were prepared and plowed better than they have been for some time because the farmers saw more bushels as the result and bushels meant dollars. I also had to work on some heavy soil. A part of this land was turned six inches deep while some was plowed only four inches. In each case the disk followed the plow and would have been still better if I had oiled the plow before plowing as I am now doing. Everything possible was done to make a good firm seed bed and also to prevent evaporation. Many people in the vicinity thought it strange that we would harrow our small grain when it was six inches high.

While working in the field stirring the soil, although dry, many of my brother farmers were not even in the field. We have harvested more and better grain than many of our neighbors simply because we kept at work on the job. The best of adobe the corn gave a yield of thirty-eight bushels the acre while four-inch breaking gave a yield of less than thirteen bushels. In cultivating our crops in the dry area we followed these three factors—deep seed bed, a firm seed bed and surface cultivation. In every instance we disked our ground just as soon as possible after harvest and on the corn ground we disked the stubble in order to cut them up and also to make a mulch.

I advise early fall plowing if possible and plow six to eight inches in depth. Fall plowing will prevent the loss of moisture to a certain extent and the soil breaks up easily, but it is certain during the winter without harrowing. I have found by this method that we are able to begin work much earlier in the spring than on late plowed ground. We should also this season just as early as possible so as to form a soil pluck to prevent evaporation. If unable to plow in the fall, I advise early spring plowing so that the capillary connection between the plowed surface soil and the deep strata may be established before the spring rains stop. I believe in deep plowing but do not deepen the seed bed all at once. If you have been in the habit of plowing shallow, only go deeper from one to two inches at a season but always let the soil be eventually get down as deep as possible. I have no patience with the dry settlers who merely scratch the surface and call it plowing.

DIPPING TO DESTROY TICKS

Shepherd of Wisconsin Experiment Station Recommends Sheep Be Treated Soon After Shearing.

"Surprising as it may seem, there are some sheep owners who do not seem to realize the importance of dipping their flocks."

Frank Kleinheinz shepherd of the Wisconsin experiment station flocks, ever mindful of Wisconsin's sheep raising possibilities, was urging farmers to give their flocks the care necessary for them to do well on the superior pastures generally provided for them.

"Sheep which have gone through the winter infested with ticks have certainly suffered day and night from the constant annoyance caused them by these pests," he continued. "Much of the food given the flock went for the support of the ticks."

"After the flock has been sheared, nearly all of the ticks leave the old sheep and crawl on to the lambs where they have more comfortable shelter and fresher blood."

"As the ticks become more numerous the lambs become thinner and the farmers prospective profits soon fade."

Mr. Kleinheinz recommends that both sheared and lambs be dipped as soon as possible after shearing. He has found that it promotes their health, insures better gains, and prepares them to go on the market in the pink of condition, ready to command the highest prices for their ticks.

Any of the good coal tar dips now on the market—if properly used—are satisfactory tick destroyers.

PREPARE FOWLS FOR MARKET

Dry-Picking Method Allowable for Broilers Only—Attractively Dressed—Poiltry Sells Better.

Either scalding or the dry-picking method can be used for fowls intended for market, but for broilers only the dry-picking method is allowable. A chick only a few weeks old is a very tender bird, but if scalded it will be found impossible to pick it without occasionally rubbing a little of the skin on. These spots will darken and give the broiler a sick look. The scalding will also increase the tendency to decay. With dry picking not only will the bird keep much longer, but the natural firmness of the flesh prevents all fear of skinning.

The more quickly a carcass is dressed, the better the chance to sell it to a good trade. Attractively dressed poultry sells itself, while inferior stuff goes begging.

Dry picked poultry will stand larger shipments than those that are scalded. The carcass should be dressed immediately after being killed. To allow the feathers to remain on for several hours with rust on composition.

When scalding poultry for market it is best to first dry-pick the legs so that they will not necessarily be placed in the water and change color. Neither the heads nor the feet should touch the water. The water ought to be as near the boiling point as possible, without boiling.

KEEPS COWS' STALLS CLEAN

Device Shown in Illustration to Prevent Animals From Standing in Gutter With Hind Feet.

The sketch shows a device to keep the cows from standing in the gutter with their hind feet and making a mess in the stall when they step out, their lying down in the mess, writes A. C. Dillon of Lincoln County, Colo., in Farmers Mail and Breeze. Some have the habit where movable stanchions

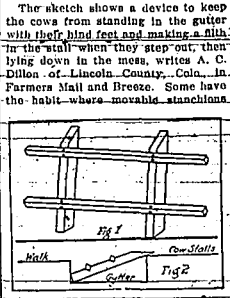

Fig. 1—The Device. Fig. 2—in Use.

are not used. This device works in perfection and sometimes cures cows of the habit.

You will need two pieces of 2 by 4. Cut them to fit your gutter as shown in Fig. 1. Angle off one end so the cows will lie on a slanting corner make two half-diamond cuts in these pieces and set in the cross pieces. These are made of 3-by-3 and are easily nailed. If the gutter is very wide you may have to put in three pieces and use one standing in the gutter will soon find she can get her feet down between the strips. If you have two or more cows that have this trick stand them together.

You can make the strips long enough for several cows and put extra 2 by 4 pieces in to support the strips. Lift the rack and place it back to the wall before turning out the cows. This device effectively cures your cows of the habit.

DAIRY NOTES

Keep salt before the cows at all times.

Regularity in feeding is of supreme importance with the dairy cow.

Keep the floors warm. Cold floors cause much loss in milk in winter.

In salting butter one ounce of salt to a pound of butter is generally about right.

Dairy barn ventilation should be furnished by a system, not by cracks and drafts.

The successful dairyman is the man who puts thought into his work. He is a student of conditions.

Now about those cow stables. Don't forget that a hole in the side of the cow barn means a hole in the pocket.

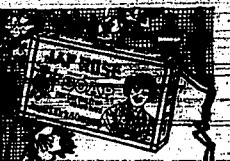

On warm days let the cows out in the yard for a change and to get in the sun. When cold keep them in the stables.

Just can't afford to let the cow lose flesh or get a setback. Remember it costs money to get an animal in good condition.

Many times the cow that does not yield a profit, but the gain is lost as she sits as the manger as the cow that does make you money every day.

Feed cows daily one pound of grain for every bush of alfalfa or silage or corn silage, and two to four pounds of corn silage, and what clover or alfalfa hay they will eat.

Very frequently a cow that is only fat as to breeding and productive capacity will do better in the hands of a good dairyman than a good cow under poor management.

IN THE PROBATE COURT

Of Twin Falls County, State of Idaho, before the Hon. J. M. Shank, Probate Judge.

In the matter of the estate of Clinton B. Ault, deceased, order to show cause why an order of sale of real and personal estate should not be made.

It appearing to the satisfaction of the court from the verified petition of M. S. Hill, administrator of the estate of Clinton B. Ault, deceased, on file herein, that it is necessary and a benefit to said estate to sell the whole of said estate of said Clinton B. Ault, deceased.

It is ordered by the court, that all persons interested in the estate of said Clinton B. Ault, deceased, appear before the Probate Court of the county of Twin Falls, State of Idaho, at the court room thereof, in said county, on the 21st day of August, 1916, at 10 o'clock in the forenoon of said day, then and there to show cause if any they have, why an order as prayed for in the petition, should not be granted to said petitioner to sell the whole estate both real and personal at private sale, according to the terms and conditions mentioned in said petition and to the parties mentioned therein, for the purposes mentioned in said petition.

It is further ordered, that a copy of this order be published at least once a week for four successive weeks in the Twin Falls Times, a newspaper printed and published in said county. Dated this 22nd day of July, 1916.

J. M. SHANK,
July 23-30 Aug. 6-13 Probate Judge.

STATE LAND SALE

Notice is hereby given that on Saturday, September 4, 1916, the following described tracts of land, belonging to the State of Idaho, and situated in Twin Falls County, will be offered for sale at public auction at the Court House at Twin Falls, Twin Falls County, Idaho, at 1:30 P. M. of said day, to-wit:

Terms of Sale: One-tenth of the purchase price and first year's interest on deferred payments, cash on day of sale; the balance in forty annual installments at six per cent interest.

Improvements cash on day of sale. Land sold, subject to harvesting of crops on land leased.

By order of the State Board of Land Commissioners.

GEO. A. DAY,
State Land Commissioner.

Listen!
Get this for what ails you!

JUST about as soon as you get next and try Prince Albert tobacco you'll wise right up that it was made for your taste! And that's no idle dream!

Line up in the row with other men; then you'll sure enough wake up to some pipe and cigarette makin' facts! It's this way—Costs you a dime for a tidy

red tin of P. A. that'll prove in jig time that you never did get such flavor and fragrance, whether you hit a jimmy pipe or roll up a delightful makin' cigarette.

PRINCE ALBERT
the national joy smoke

Puts the half-Nelson on all pipe and cigarette grouches because it can't bite tongues and can't parch throats. And you prove our say-so! P. A. is made by a patented process that cuts out the bite and the parch. This patented process is controlled exclusively by us. Remember this when you hear some of that "as good as F. A." stuff!

Right off the bat you'll get mighty happy if you'll go to Prince Albert like you're on the trail of a best bet. For you never will get honest and true tobacco satisfaction till you get chimney with Prince Albert—the national joy smoke!

Sold everywhere in tippy red bags, 5¢ tidy, red tins, 10¢; also in pound and half-pound tins.

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

METAL MINING IN IDAHO IN 1914

The value of the mine output in gold, silver, copper, lead, and zinc in Idaho in 1914, according to C. N. Gerry, of the United States Geological Survey, is \$4,659,648, against \$3,418,048 in 1913, and \$21,568,217 in 1912.

There was a notable increase and a record production of silver, lead, and zinc, but a decrease in that of gold and copper. The increase in total value was \$1,241,600, due principally to a larger output of mines in the Coeur d'Alene region of Shoshone county, as shown in the accompanying table.

The production of gold decreased from \$1,344,659 in 1913 to \$1,156,315 in 1914, or \$188,344. The gold output from placers was valued at \$700,456, and that from deep mines at \$455,859. Of the placer gold, \$298,389 was produced by dredging. Boise county led in gold output with \$461,387, and Lemhi county followed with \$395,991. These are the counties in which most of the dredging is done. The gold output from mill bullion by amalgamation and cyanidation was \$224,03 ounces, from concentrates \$1,168,48 ounces, and from crude ore smelted \$4,028.28 ounces. Siliceous ores supplied 17,522.69 ounces of gold, copper ores 17,078.55 ounces, lead ores 2,467.11 ounces, and lead-zinc ores—225.78 ounces.

A record production of silver increased the figures from \$989,192 ounces, valued at \$6,933,473 in 1913, to

12,479,516 ounces, valued at \$2,801,172, in 1914. This increase of 24.83 per cent was credited almost entirely to the Coeur d'Alene region. Concentrates supplied 9,946,608 ounces of silver, crude ores 2,612,889 ounces, and mill bullion only 14,787 ounces. Most of the silver, or 8,697,689 ounces, came from lead ores, 3,614,669 ounces from lead-zinc ores, 239,356 ounces from copper ores, and 39,002 ounces from siliceous ores. Shoshone county produced 97.58 per cent of the total, or 12,178,194 ounces. The Hunter district, at Mullain, supplied 1,057,247 ounces; the Lelande district, at Burke and Mica, 5,686,372 ounces; and the Yreka district, at Gardner, 4,387,232 ounces.

The copper output decreased from 6,629,966 pounds, valued at \$1,485,910, in 1913, to 6,445,187 pounds, valued at \$857,210, in 1914. Of the total, Shoshone county produced 7,242,832 pounds and Custer county 2,110,899 pounds. Copper ores were 4,986,206 pounds and a small output came from lead ores and lead-zinc ores. Concentrates contained 3,342,294 pounds and crude ore 3,202,893 pounds.

Records were again broken in the production of lead, which increased from 317,871,945 pounds, valued at \$13,995,366, in 1913, to 348,526,669 pounds, valued at \$15,692,617, in 1914. An increase of 30,654,724 pounds, 97.14 per cent of the total, those in

FILER NEWS

(From the Filer Journal.)

E. H. Snyder spent Sunday in Twin Falls.

A boy was born yesterday to Mr. and Mrs. R. O. Davis.

County Commissioner Carlson was Filer business visitor yesterday.

The Filer Roller Mills has built a large addition to the mill for warehouse purposes.

The Farmers Grain and Elevator Co. have just put in a set of new scales of the latest make.

H. O. Munson and Grover Davis left Monday morning for Caldwell to enter a big horse sale.

Mrs. Jacob Musser has been on the sick list the past week suffering from an acute attack of appendicitis.

Mrs. F. E. Allen is expected home from an extended visit in her old home in Michigan today or tomorrow.

Miss Gertrude Walter returned last Saturday from the hospital. Her many friends are glad to see her in good health.

Mrs. Robt. Miller and sons Orle and Victor left Tuesday for Lava springs.

Mr. Maurer, the new landlord, took possession of the hotel Monday evening.

Miss Clara Storer entertained a number of young people last evening complimentary to Miss Juanita Nobilit, of Cokeville, Wyo., who is a guest of her aunt, Mrs. Pruitt.

Mrs. Jacob Musser did not improve the past week as well as hoped for, and this morning was taken to the hospital. Her daughter, Miss Myrtle, is also expected to be operated on today.

Joe Graham, living northwest of Filer, had the misfortune to have his house and contents completely consumed by fire early Saturday morning. Mr. Graham arose and started a fire in the boiler room and went out to the barn to do his chores. In a few moments he noticed the house on fire, and only had time enough to get his family out, without being able to save a thing. We understand he carried no insurance.

There was something doing out at Bon Hartley's place yesterday morning. The old cow upset a beehive and started the commotion. The bees swarmed all over and then attacked two horses tied to a wagon. By this time Mrs. Hartley's attention was attracted to what was going on, and rushed into and out the house. She, they raced madly to town where they were caught, badly stung all over. Mrs. Hartley was badly stung by the infuriated bees while she was cutting the horses loose.

Mrs. Chas. Costello was a Twin Falls visitor Saturday.

Frank Brown of Twin Falls, was in town yesterday.

Miss Mattie Detweiler was a Twin Falls visitor Tuesday.

This section was visited by a good shower last Saturday.

Edwin Anderson spent Sunday in the immediate neighborhood of Hoyleville.

J. M. Smith returned Monday from California, where he visited the exhibitions.

Postmaster Strenk of Twin Falls, was a Filer visitor for a short time Tuesday.

A number of the young people of Filer attended a recent dance west of Filer Friday night.

We hope every man will take it upon himself to "clean up" before the state pure food law goes into effect.

Rev. Albright and family have moved into their home recently acquired, just south of the city.

Al Holmer is putting in the foundation for the new Mennoite church in the west part of town.

H. H. Schumann and H. J. Weaver returned last Saturday from Oregon where they purchased a few thousand head of sheep.

Harvest is on in full blast and many good yields are reported. One field of alkali between here and Dulit is reported to be 14 bushels to the acre.

The Farmers Milling & Elevator Co. received the first load of new wheat last Saturday. It came from the Salmon area and weighed 11.25 a hundred.

Geo. Truitt returned from the hospital Sunday. While he is still weak from his operation for appendicitis, he is getting on his feet.

A bank collector from Twin Falls contributed \$5 to the city checker Tuesday for helping him to cut up a tree. It was worth double the price to heat his beef.

Prof. and Mrs. Bracken were in town this week making preparations for their home life that they will soon take up in this fair little city—the garden spot of all Idaho.

Janita Nobilit of Cokeville, Wyo., notice of Geo. Truitt, is visiting here. Miss Sarah Louise Brown of Spokane, went in great style "Twin" over Sunday. She had been visiting Miss Nobilit at Cokeville and was on her way home and stopped over for a short visit.

Remember Field Day will be held this year on the last Saturday in September. Be a real hogster and provide plenty of hickory nuts for the entire county what the "hub" can produce. It is up to us because we have the "goods."

Just to make things lively on Field Day, we know a man who will wager that the little mow owned by Earl Murray can hold 100 tons on the track in a half mile race. Furthermore, if the distance is too short, arrangements can be made for a longer one.

Whitely & Richers, the real estate, have purchased 50 feet on Main street, west of Drs. Newberry and Cartney's office, on which they propose to erect a building that will be a credit to any town on the tract. It will be of cement blocks, 50x100 and modern in every particular. It will be an improvement that is needed in Filer and will doubtless be appreciated by the auto boys of this section.

NOTICE OF PUBLICATION

Notice is hereby given that I, Oliver Schoonover, of the County of Twin Falls, Idaho, do hereby certify that I am the owner of the following described land, to-wit:

Section 14, Township 33 N., Range 12 E., 3rd P. M., Boise, Idaho.

(Signed) OLIVER SCHOONOVER,
P. O. BOX NO. 83, SHOONOVER, IDAHO.
Aug. 3-10-17-24.

NOTICE OF PUBLICATION

Notice is hereby given that I, Frank Nolan, was found guilty of the crime of grand larceny in March, 1913, in the district court of the Fourth judicial district, in and for the county of Twin Falls, Idaho, and sentenced to the state penitentiary for a term of 6 Mo., to 2 years, will make an application to the Hon. State Board of Pardons at its next regular meeting after the legal publication of this notice. For an application for a conditional pardon, (Signed) FRANK NOLAN,
P. O. Box 55, Boise, Idaho
August 3-10-17-24.

CALL FOR BIDS

Plans for the erection of two additions 30x40 each to the Training School Building at the Albion State Normal School have been approved by the State Board of Education. Detailed information may be secured from Pres. G. A. Axline, Albion, Idaho, or for reports sent out to the president of the school, on or before August 21, 1914. The board reserves the right to reject any or all bids. Aug 6-12-20

NOTICE TO CONTRACTORS

Independent School District No. 1 of Twin Falls, will receive sealed bids up to eight o'clock p. m., Monday, August 16, 1914, for repairs contemplated on the Dickel school building. Plans and specifications may be obtained from Burton E. Morse, architect, at his office in the Board building. Check for five per cent of the contract price must accompany each bid. The board reserves the right to reject any and all bids. GEO. E. BRYANT, Clerk. August 10-13

NOTICE

All responsibility is hereby refused for the publication of any private or public, incurred by my wife, Elsie Freedman, unless my signed order authorizes such publication.

(Signed) H. R. REDDING,
July 20-27 Aug 2-9

THEY FAILED TO APPEAR

On our hill pulling demonstration last Sunday, none of our competitors put in an appearance.

Was our hill too steep?

Was our rules so severe to comply with? Or do they lack confidence in their goods? We shall let the public draw their own conclusions.

We not only showed the public what the Buick and Dodge cars will do on low gear but also what they will do on intermediate. We believe that we demonstrated Monday that the Buick and Dodge cars possess that great reserve of power which every experienced automobile driver so greatly appreciates.

That great reserve of power which eliminates gear shifting and makes driving a pleasure.

That great reserve of power which brings that ease of mind that comes by knowing that there is no road that can stop you.

One of our competitors sent us word at the close of the contest that if we would give him time enough to fix his cars he would come down and pull with us. Our cars are fixed at the factory. They all pull.

We are ready at all times to show what our cars can do. Let us show you. Our next car load of Dodge cars will be here on the 16th.

A GRADE BRIDGE IS NOT DESIRED

(Continued from Page 1.)

an aerial tramway for moving this hay and grain across the canyon. But this time they could not get an engine strong enough to pull this cable up. This left but one avenue open, and Mr. Humphrey began negotiations with the Oregon Street Line. He found he would have to freight his supplies either to Kimberly or Twin Falls, then by freight to Mindoko and from there to Shoshone, and finally freight it thirty miles from Shoshone to the Butte camp. To Mindoko is practically the same, but the Mindoko to Shoshone is 50 miles, and even after reaching Shoshone he had his supplies twice as far from their destination as at the start. But he found that the double freighting distance, plus the 110 miles of freight distance by railroad, cost less than the professional freighters wanted to take the hay and grain over the grades up and down the Snake river canyon.

Can anything be more convincing of the absolute uselessness of a grade bridge in comparison with a firm level structure? If a professional freighter could not make it pay to haul over such a place, could a farmer do any better? Could his teams pull any greater load, or would they do it with even as much safety as could a man whose business it was to handle horses on any road and under any conditions? As Mr. Humphrey says, they would be just as far from us as ever, as far as moving loads of grain, etc., is concerned. A grade bridge would be all right for a man who just wanted to cross the river, and who had plenty of time to spend on the scenery; and even then such a bridge would not have the attraction that a high bridge would. Mr. Humphrey spoke at the convenience and necessity of a high bridge, where one would cross without fear of losing life or limb, and the unanimous opinion was that it would be much more of a business policy to put in one high bridge across the river than to put in as much in putting in two other bridges and the accompanying grades, whose utility is doubtful, to say the least. A proposition that appeals to mankind as to the proper place to put their money, surely has some merit or it would not have the support of the tax payers. The Hanna bridge has their support, both in petition and in other ways, and Mr. Humphrey says this support is getting stronger every day.

BINDER TWINE.
We still have about half a car of International 3142 twine left and will close it out at 35c. Mail or phone in your orders.

SOCIETY NOTES

Society items for this column will be gladly received by The Times.

Miss Lucille Kelly entertained at a dining party last Thursday evening honoring Miss Doris Cox.
The Country Women's club spent a most enjoyable afternoon last Thursday with Mrs. Chambers living west of town.
Complimentary to Miss Jolene Pauline Fields. The evening was spent at a very pretty dinner-party at the Perrine hotel Saturday evening.
The Wednesday Auction Bridge club was entertained last Wednesday at the home of Mrs. Allen Scelor. Mrs. C. G. Bedford captured the afternoon's prize.
The Morningside club met last Wednesday with Mrs. Pearl Poss. The afternoon was spent sociably and the hostess served delightful refreshments.

Mrs. B. Amundsen, who is leaving Twin Falls soon, was the recipient of a delightful surprise party last week given her by the members of the Country Women's club.
Mrs. Ira Mallory was hostess to the Shamrock club Thursday, August 8th. After a short business meeting the ladies were entertained with music and readings furnished by members of the club. Daily refreshments were served by the hostess.

A number of friends of Miss Francis Fields surprised her at her home Monday evening. The party was arranged by her mother and sister, Miss Pauline Fields. The evening was spent in playing games, followed by dainty refreshments. About 25 were present.

A party of young people chaperoned by Mrs. M. C. Putnam enjoyed an outing at the falls last Sunday. The day was delightfully spent in rowing and swimming. The party included Misses Marguerite and Rosalyn Putnam, Mary Goodell, Thelma Conover, Misses Lottie Egler, Lyle Dreyer, Letty Friedman, Eugene Hart and Joe Putnam.

Miss Margaret Wilson was the guest of honor at a house party given by Miss Olga Brose at the Brose home last Saturday. The evening train for Tinsman, where Miss Brose met them with a hay rack. Upon arriving light refreshments were served and the remainder of the evening was spent in singing and dancing. A delicious waffle breakfast was served on the veranda Sunday morning. A number of young men from Twin Falls joined the party at ten o'clock and proceeded to the foxtrot to picnic. The invited guests were Misses Letty Williams, Dora Wall, Beatrice Co-trander, Leah Chapman, Harriet Warner, Stella Porttist, Fern Costello,

Miss Thomas, Margaret Cooney, Margaret Wilson, Grace Barger, Lola Taylor, Ellen Larson, Mrs. H. Alexander and Mrs. W. C. Dreyer. The party was given by Mrs. Dreyer. The party was given by Mrs. Dreyer. The party was given by Mrs. Dreyer.

A party of young ladies consisting of the Misses Francis Porterfield, Minnie Doss, Mary Towse, Fay Hill, Ethel Hulbert, Vera Pickett, Helen Starnes and Royce May Hulbert returned from a camping trip to Twin Falls on Friday evening. The girls recall a delightful time. They were camped in the afternoon dip in the canyon. Mrs. C. L. Bent was the chaperone and the crowd dubbed themselves the "Crooked Ten" but we rather think it should have been the "Hungry Ten."

WARSAW IS SURRENDERED

Geruans Now in Possession of Polish Capital.

Berlin, Aug. 5.—Warsaw was taken this morning by German troops, according to the official announcement of army headquarters. Yesterday the last of the Russian troops under Prince Leopold broke through the forts of the outer and inner lines of the city's defenses, and rearguard Russian troops made a tenacious resistance. The German arrested under General von Gallwitz advanced in the direction of the road between Lomza, Ostrova and Wyszok and fought violent engagements. The brave, desperate resistance of the Russians on both sides of the road between Ostrova and Itosan was without success. Twenty-two Russian officers and 480 soldiers were taken prisoners. Seventeen machines were captured.
The German cavalry yesterday defeated at Courland a detachment of the Russian cavalry at three points, taking 2200 prisoners. The situation near Ivanogorod is unchanged. The campaign is being continued between the upper Vistula and Bug rivers. German cavalry entered Vladimir-Wolinsk on the Bug.
In the Vosges there have been new engagements near Lingepford.

The fall of Warsaw marks the culmination of the greatest sustained offensive movement of the Pyroppan war. Thrice before the Russian armies knocked at the door of the Polish capital, only to be denied by the strength of its defenses and the resistance of the Russians. Apparently impregnable from direct attack, it was compelled to capitulate before the sweep of the huge movement which threatened to encircle the capital, and with it the Russian armies engaged in the campaign of which it was the star. From the north-northwest, west, south, south-west and southwest, the Austro-German forces have been pressing upon the Polish

capital in a combined drive to force the Russians out of Poland and if possible to break the offensive power of Russia by administering a defeat all along the line. The movement against Warsaw began in May when the Teutonic drive through Galiza began.

RED CLOVER CROP LARGE

A. L. Hurst Gets Three Tons Per Acre. Second Crop For Seed.

That red clover is a paying crop in the Bull county has been proven by A. L. Hurst, who lives three miles south of Bull. He told The Herald reporter Sunday that he cut the first crop of red clover out on an 18-acre field June 25, which made an average of 3 tons per acre, and that the second crop is now ready to cut for hay. However, Mr. Hurst will let it stand longer for seed and there will be full pasture from the third growth. He said that if he raised larger crops here he would yield nearly as much per acre as the first crop and he would get a third cutting besides.
Mr. Hurst and family moved here from Sheldon, Missouri, in the spring of 1914 and he purchased an 80 acre ranch three miles south of Bull, and cleared a part of it for agriculture. He raised in Missouri before coming to the Bull county, but says that he raised larger crops here than he had harvested in the east.
Mr. Hurst said that raising clover for seed is experimental with him, but he thinks he will get a good yield from this crop.—Bull Herald.

LID IS ON LASSEN-VOLCANO

Experts of the Opinion That Lassen Will Remain Quiet.

The recent volcanic eruptions of Lassen Peak, California, the most violent and destructive of which was the outbreak in May, 1916, are reported by Geologist J. S. Diller of the United States Geological Survey, to have reached their maximum. The mountain, thought it will continue to be an active volcano curiously, will not, it is believed, develop into a devastating fury, after the May Vesuvius or some of the Alaskan volcanoes. In other words, old Volcan has clapped the lid down on Lassen.

For several weeks Mr. Diller has been studying Lassen Peak on the ground in co-operation with officials of the forest service and has reported to the director of the Geological Survey as follows:
"The great eruptions of Lassen Peak of May 21 and May 22 spent the energy of the old volcano and put it all out. The effects of the flood on the forest service are turned to good account with many visitors are safe by climbing the peak. It is simply impossible that Volcan is simply con-

serving his forces for a future outbreak, the general indications are that he is closing up the Lassen. Each branch of his laboratory for the season, perhaps with the intention of giving a small exhibit next spring when the snow melts."

—Aug. 10-15

When You Purchase Your Electric Range

Remember the range is merely an incidental—economy in fuel bills, decreased labor and pleasant protection to life and property is what you really pay for. An electric range in your home means no "kitchen worry," less of the nerve-deadening heat and toil. Your kitchen should be as cool, clean and pleasant as any other room in the house. There is no necessity for smoky walls, or the intolerable heat and fire hazard incident to the use of all other cooking mediums.

"An Electric Range for \$11.00 Down and Then \$4 Monthly Payments"

From all angles—safety, economy, cleanliness—the electric range has no equal. Remember the terms—\$11.00 down with \$4.00 monthly payments. An electric range is an investment, one which pays big dividends in safety, health, happiness and convenience every day in the year.

Cooking Demonstration Every Afternoon—Aug. 16 to 21, Inclusive

Give our demonstrator an opportunity to visit you in your home, and tell you about the electric range.
