

THE TWIN FALLS TIMES

VOL. XI. NO. 1 ELEVENTH YEAR. TWIN FALLS, TWIN FALLS COUNTY, IDAHO, TUESDAY, OCTOBER 12, 1915. SUBSCRIPTION \$2.00 PER YEAR

GREATEST CROPS IN HISTORY

United States in Shawe to Feed The World. APPLE CROP OF COUNTY WILL FALL SHORT OF 1914. The Wheat Crop is a Record Breaker This Year (Corn is Still King of all Crops).

WARNER-JENNISON YARD IS SOLD

Boise-Payette Lumber Company Takes Possession. Former Owners of Yard Will Probably Fetch an Interest in Some Other Line of Industry.

SENATOR BORAH GIVES WARNING

Looks to Future of Workers and Farmers After the War. Idaho's Man Says Industrial Reconstruction in Europe Will Require U. S. Without Protective Tariff.

CARRANZA IS RECOGNIZED

United States Will Receive Carranza's Representative. Belief That Constitutionalism Was Strongest and Good Restore Order Influences Secretary Lansing.

COMMISSIONERS SUPPORT FAIR

Forty Acres Near Filler Offered to County. County Will Erect Buildings and Construct Track, If State Laws Will Permit.

FARMER KILLED IN RUNAWAY

E. B. Kyle Meets Instant Death By Being Thrown From Wagon. Accident Happened on Highway Saturday Afternoon.

Washington, Oct. 7.—American wheat this year will produce more than ever produced. With the wheat crop exceeding a billion bushels, the largest ever turned out in one season by any nation, it is the largest ever grown, the government's largest ever report issued today announced preliminary estimates of the crop.

Mr. Warner and Jennison Lumber Company, a local concern composed of T. F. Warner and M. E. Jennison, has sold its holdings to the Boise-Payette company of Boise. Possession was given to the new owners some time last week. The yard will be operated as a part of a string of yards located in a large number of towns in this part of the state. The local manager will be R. W. Updegraff, a young lumberman of experience, formerly in the employ of the Warner-Jennison company.

Idaho's Man Says Industrial Reconstruction in Europe Will Require U. S. Without Protective Tariff. Boston, Mass.—While advocating military aid to the rebuilding of the army and the navy, Senator Borah of Idaho, in an opinion address delivered last Sunday afternoon before a large audience, declared that he prepares for peace time that we prepare for war.

Washington—Recognition of the part played by General Carranza as the de facto government in Mexico was unanimously agreed upon Saturday by the Pan-American conference at the step to be recommended to their respective governments. Secretary Lansing on behalf of the United States government, expressed his intention to recognize General Carranza and the ambassadors of Brazil, Chile, Argentina, and the ministers of Bolivia, Ecuador, and Peru, transmitted Saturday night the decision of the Washington government, as well as their opinions in agreement with it.

The Twin Falls county fair can be held as it was officially launched as the result of the action of the Twin Falls county commissioners in accepting the site offered for grounds by the Filler business men. The Filler citizens have entered heartily into the enterprise and in buying valuable land on the edge of Filler about 40 acres, intentions to make the fair a success.

E. B. Kyle, a farmer living four miles west and one mile south of this city was instantly killed last Thursday evening by being thrown from a wagon. The deceased was unloading some hay from his wagon when the team became frightened and ran away, throwing Mr. Kyle out against a stone fence, fracturing his skull and bruising him in a frightful manner.

What prospects increased as the growing season progressed, and the weather was generally favorable, moved up month by month, so that the crop is a very promising one. Production was placed at 1,002,375,000 bushels. We were told that the weather, however, reduced the quality of wheat, but not so much that much of it will not be available for milling.

Mr. Holmes was run over and severely injured Monday evening about five o'clock by an automobile driven by Mrs. W. C. Campbell. The accident occurred in front of the postoffice and was witnessed by several men who were standing on the sidewalk. As soon as possible Mr. Holmes was picked up and taken to the hospital, where he is reported to be getting along nicely.

Europe, when she emerges from this war, will be industrially at least a new Europe. If nothing else happens that will happen. Just as the organization of the world is being replanned, feeding and clothing of them during the war, we are being taught the value of unity of organization and cooperation, and just as the spirit of unity and organization, the concept of a world government, is being fostered from the fields of war to the peaceful fields of industry, so will it be only on a more tremendous scale, in Europe, that the nations of the world are being organized into a great industrial organization, the national and legitimate result.

Secretary Lansing made it clear that the United States could not grant recognition upon the giving of amnesty or the retirement of other questions as a strictly internal matter. The United States could not grant other subjects have been received (Continued on page 4.)

The following resolution, offered by Mr. M. Sweeney, was unanimously adopted: Resolved, That the county commissioners and the Filler committee be authorized to accept the offer of the Filler business men for a county fair, but that the county commissioners be authorized to accept the offer of the Filler business men for a county fair, but that the county commissioners be authorized to accept the offer of the Filler business men for a county fair.

The Idaho State Chiropractic Convention held at Boise last week. The meeting was called to order at 10 a. m. by the president, Dr. Guy, who presided over the convention. The meeting was a very successful one, and a number of resolutions were presented.

Other Big Crops. Oats will exceed the record crop of 1913 by almost 100,000,000 bushels. Barley will exceed its record by 13,000,000 bushels, sweet potatoes by 6,000,000 bushels and hay by 5,000,000 tons.

Mr. Holmes was riding his wheel to the postoffice and saw the machine coming behind him and endeavored to get out of the way. The driver of the machine was going very slowly, but could not keep from hitting Mr. Holmes. The front wheels passing over his chest and one ankle. Mr. Holmes had the presence of mind to swing himself to the sidewalk. The car, which was escaping him, might have resulted in fatal injuries.

Georgia Jubilee Serenaders. A Colored Troupe Giving Excellent Satisfaction at the Orpheum. For the first three nights of this week the management of the Orpheum has been fortunate enough to secure the services of the Georgia Jubilee Serenaders.

Harvest Home Dinner. Will be Served Friday Evening in Basement of Christian Church. The Ideal Bible class of the First Christian church will serve a Harvest Home Dinner in the basement of the church, Friday evening of this week.

Looking for More Water. Engineers for Bondholders Seeking Water West of Salmon River. Engineers in the employ of the bondholders of the Salmon river project started out early this morning to examine the site for water west of the Salmon river and to run a survey from the Bonanza river across to the Salmon river.

County Agent Chosen. Newton W. Hirsch of California, Comes Highly Recommended as an Expert. Newton W. Hirsch of California, has been tendered and accepted the position of county agent for Twin Falls county. The position was offered him by the county commissioners on the advice of H. W. Hobbins, state agent for Idaho, state state agent for Idaho, state state agent for Idaho.

Chinese Coming. Hundreds of Chinese will appear in Twin Falls, Wednesday afternoon. The Chinese are in an unusually exciting two-part drama, entitled "The Great Train Robbery," at the Grand Opera house.

New Site for Hospital. Commissioners Purchase Ten Acres in Holman Addition. At a regular meeting of the county commissioners, Monday the board purchased ten acres of land in the Holman addition, near the Rock Creek bridge, which will be used for the county hospital.

Opening New Cafe. George Richardson Ready to Do Business in a Few Days. George Richardson, of Boise, has just returned from the East and has decided to enter business again. He has purchased a building on the east side of the Boise Mercantile company and is having the rooms repaired and is having the rooms repaired and is having the rooms repaired.

Paraffin and Sterilized Eggs. Kinney Wholesale Co. 21st St., Twin Falls, Idaho. 10 gal. 6 hoop, each \$1.45 5 gal. 6 hoop, each \$1.15 10 gal. 8 hoop, each \$1.75 5 gal. 8 hoop, each \$1.35 20 gal. 6 hoop, each \$2.75 10 gal. 6 hoop, each \$1.75 10 gal. 8 hoop, each \$2.75 5 gal. 8 hoop, each \$1.75

Auto Truck Line to Buil. William Stanton Will Make Regular Trips Daily and Carry Cream. A truck and passenger auto line running steadily from Bull to Twin Falls, and conducted by Wm. Stanton, made its initial trip Thursday and will go back and forth daily hereafter carrying the cream from here to the county seat, and competing with the railroad in the carrying of passengers.

Meeting of Chiropractors. Dr. Atherton Elected Vice Pres. at Convention Held in Boise Last Week. The Idaho State Chiropractic Convention held at Boise last week. The meeting was called to order at 10 a. m. by the president, Dr. Guy, who presided over the convention.

THE TWIN FALLS TIMES

Published Twice-A-Week, Tuesdays and Fridays, at the Gast-Johnson building, Main Street.

On All of Your Printed Matter, It Represents Good Workmanship, Good Wages and Good Conditions.

ROADS NEED CARE

Unless the county road overseers make a special effort to immediately drag the highways after the next rain much of the costly grading and filling will be practically wasted.

THE RIGHT SPIRIT

The business men of this city took a step last week which will do much toward cultivating a friendly spirit.

PREDICT HIGHER INTEREST RATES

American financiers who have made a study of the money markets of the world are predicting that this nation is not going to escape financial distress along with the war-ridden nations of Europe.

IS AMERICAN STAMINA FAILING?

As a nation we are falling below the highest standard of physical fitness. The wear and tear of modern life is telling on us.

TALKS ON THRIFT

No. 32—THE FARMER'S OPPORTUNITY. I believe that the greatest constructive service the bankers of any city, or any state, or of the nation, can perform at this time, is to endeavor by every means at their command, to impress upon the minds of the people the necessity for each individual man, woman and child striving to practice the virtue of thrift.

OUR PUBLIC FORUM

Ralph Peters On Railway Mail Pay

A controversy has been raging in the columns of the press between the railroads and the Federal Post-Office Department over the question of proper compensation for handling the United States mails.

The first is that the Post Office Department weighs the mails, and re-adjusts the pay of the railroads only once in four years. This compels the railroads to carry the increase in the mail-tonnage during the intervening years without pay—manifestly an injustice in the case of a rapidly growing business.

Now for the remedies the railroads ask: They do not ask to have the mails weighed and paid for separately, as is done in the case of other shippers.

More crops—perhaps the greatest ever produced in this country, government forecasts indicating—\$14,000,000,000 crop yield for 1915.

The humble hen is a first aid to the thrift of the farmer's wife, but the depreciation of agriculture estimates an annual loss of \$40,000,000 from uncleanly and generally spoiled eggs.

The yearly waste of vegetables of all kinds is duplicated by that of fruit. The government specialists estimate that home canning on the farm of what otherwise would be wasted, ought to save at least \$100,000,000 annually.

Buy the children's school shoes is a very important question. One knows that each shoe must contain good workmanship and real honest leather.

Prices Range from \$12.50 to \$35.00. See Our Display of Children's School Shoes.

Boys' School Shoes \$1.45 to \$3.00. Girls' School Shoes \$1.00 to \$2.50.

JUST RECEIVED A SHIPMENT OF WOMEN'S NEW SUITS.

In the much wanted new style effects, some with the desirable fur trimming, others trimmed in military braids, etc.

Women's Suits Priced from \$13.50 to \$27.50. Women's Coats Priced from \$9.50 to \$37.50.

Waists for Fall and Winter. We are showing a very pretty line of fancy silk waists in all the new materials, shades and colorings.

Prices Range from \$2.75 to \$7.00.

Get What You Want at The Idaho Department Store

We believe and our patrons know that the Idaho Department Store carries the largest stock of merchandise in town, and your wants can easily be satisfied here.

Blankets and Comforts, Etc. Hosiery and Underwear. Have you seen our display of blankets and comforts, without a doubt this is the largest display in town.

### How a Bank Grows

A bank's success does not depend wholly upon the NUMBER of depositors upon its books. Its real advancement lies in the growth and material success of the depositors themselves. It is "the dollars on the books" that count—not the number of depositors.

And so we keenly realize that the success of these depositors we have NOW governs our progress. There is no reasonable length to which we will not go in co-operating with our clients for their betterment.

### ELECTRIC LOCOMOTIVES

Chicago, Milwaukee & St. Paul Electric Railway

The biggest electric locomotives in the world are being delivered this week in batches to the Chicago, Milwaukee and St. Paul railway system. They form the advance guard of fifty huge electric engines to be used by the road in operating 440 miles of its transcontinental line between London, Mont., 4169 feet above sea level and Avery, Idaho, elevation, 4484 feet. They will also climb the Rocky mountain alps, 2300 feet and the west mountain summit, 5700 feet.

When these giant machines go into operation, as they will do some time in November, hauling heavy freight and passenger trains through the precipitous ranges of Montana and Idaho, the most ambitious electrification project ever conceived will have safely passed its most difficult stages.

These locomotives are designed to do the work being done at present and rather too expensively by huge Mallet steam engines, two of which are used to haul heavy freight trains up the grades of the Belt and Bitter Root ranges. They are expected to effect an enormous economy in operation.

In fact the purpose of the company in electrification has not been to increase the speed of its trains but to increase efficiency and promote economy in operation.

The new locomotives are of great interest because they are the first to be constructed for railroad service with direct current motors, designed to carry as high a potential as 3000 volts. They weigh 200 tons each and have a continuous capacity greater than that of any steam or electric locomotive hitherto ever built.

One of these machines can "snake" a train weighing 2500 tons up a one per cent grade with its 3440 horsepower and make light work of the job. Two of them can do the same on a two per cent grade.

These monsters are 112 feet 8 inches long. There is nothing about them to suggest the steam locomotive which they will ultimately displace in both freight and passenger service. It is the faith of the designers is well founded. Looking at first glance more like a big mail car than anything else, the St. Paul's new type of engine operates as mysteriously to the average observer as did the first automobiles in the eyes of those used to horse drawn vehicles.

The design is such as to save track wear and tear by minimizing the vertical and horizontal blows drive wheels through use of a separate motor for twin-axle to each of eight pairs of drivers. The drivers are spaced at ten-foot intervals. The drive wheels are 22 inches in diameter.

They are equalized in pair on each side so that each of the four driving wheel trucks on each side is independent. The cut-off for each truck is the full length of the locomotive. Two men constitute a crew, though only one is required to operate the machine. The other is in charge of emergency and to learn his trade.

Here are some of the most striking advantages of the electric locomotive.

It operates with the highest efficiency in the coldest weather when steam locomotives often freeze up.

It returns by "regeneration" a large part of the power used in running up hill during the corresponding run down hill.

It requires inspection once in every 2000 miles of travel, where the steam locomotive must be overhauled at the end of each division.

It uses no coal, requires no water and has no ashes to dump.

It carries no boiler and has no boiler and will run indefinitely at a uniform rate of speed.

It requires roundhouse tinkering to the minimum and needs uniform tonnage irrespective of weather.

It does away with fuel trains and clears the tracks for traffic that pays toll.

The best steam locomotives has to be overhauled after running 100 or 125 miles, whereas the immunity of the electric engine from this necessity—a heavy advantage in operating efficiency.

Steam locomotive waiting at a division point consumes 80 per cent of the fuel it uses in actual service, whereas the electric locomotive when idle consumes only 10 per cent. The fuel of the track from fuel trains is an element of the highest importance, especially in mountainous country where double tracking is often impossible.

The direct current electric locomotive in fact bids fair to revolutionize railway transportation methods because, with the motor to be used in the opening stretch of electrification on the St. Paul road is to be furnished by Hogganau water power company, the most obvious economic resources on its own lands and it appears even now a demonstrable fact that coal can be converted into electrical power and fed to locomotives of the new type more economically than it can be used direct in the production of steam.

The plan of operation includes the general use of a locomotive at each end of a train on up grades approximately 10 miles long over the electrified section of the road. On down grades only the head engine will do the regenerative braking—that is, regenerating power on its reverse and returning it to the wires to be used in pulling the following train.

These locomotives are geared for passenger service in mail trains of 800 tons of 60 miles an hour. The stretch of road to be used by the new electric engine is in the mountainous ranges, where there are long distance grades of from one and one-half to two per cent will be demanded in capacity for use, according to the engineers.

The railway company expects to achieve the same result as through its double-track electric line through the mountainous divisions. It is believed that

the road will get back the cost of electrification, about \$15,000,000, in five years, or at the rate of 20 per cent per annum.

### FILE NEWS

(From the Filer Journal.)  
Miss Virginia Brown is to be hospitalized last week for an operation for appendicitis.

The office turned out new telephone directories this week. They were certainly needed.

Lillian Howk and Miss Phyllis Patton were married in Twin Falls on Wednesday last week.

Harry Hammerquist is home from his eastern visit. While absent he bought a new automobile.

Miss Minerva Stevens expects to leave for Chicago shortly where she will take a course in physical culture.

The Women's club is indebted to Mrs. D. C. Skirer for the lovely flowers provided for the reception Monday night.

It is expected that Leonard Wood will be shortly on his way to Montana where he will take a position with his brother Joe in the mercantile business.

The Birthday club met with Mrs. Beem last Wednesday and was well attended by the members and the usual good time enjoyed by the club.

W. W. Taylor has bought an acre tract on Yukima avenue, just south of O. J. Childs. He will build a bungalow on same in the near future.

"Captives of Kelly," a five part comedy at the opera house tomorrow night. If you appreciate good comedy you should make special effort to see this picture.

Mr. Saturday H. G. Munyan bought a pair of Shetland ponies for his children. They are attracting much attention among the little folks.

Mr. Vandant entertained informally in honor of her mother, Mrs. Kennedy, Tuesday afternoon. The afternoon was pleasantly passed with vocal and instrumental music and social converse. Mr. and Mrs. Kenney, who passed the summer here from their home in California, were guests for their home. This most excellent couple made many friends here during their sojourn who regret to see them depart.

In the Bible the word "LORD" is found 1353 times; the word "Jehovah" 685 times, and the word "God" 2815 times. The word "LORD" is used in the 111th Psalm. The eighth verse of the 137th Psalm is "the middle verse of the 137th Psalm." The 137th Psalm is the longest chapter of Esther is the longest chapter of the Bible. The 137th Psalm is the longest chapter of the Bible.

### PAN-AMERICAN INQUISITION

Will United States Defend the Monroe Doctrine if Attacked.

Washington—Eusebio A. Morales, the minister from Panama, speaking here at a conference on national defense being conducted under the auspices of the Navy league, the National Rifle association and the Council of National Defense, declared that the American republics were watching the preparations of the United States, because he said, upon it depends the defense of the Monroe doctrine. The declaration of the United States that the American continent cannot be the object of conquest or foreign aggression, he said, now faces threatening realities.

"Suppose," said Dr. Morales, "that England and France are vanquished during this war. What will be the fate of our colonies in America? Will the American continent look with indifference upon the occupation by Germany of British and French Guinea, of British Honduras and of the islands which enclose the Caribbean sea?"

"The answer appears to be obvious," Dr. Morales said that the Monroe doctrine faced "threatening relations" and that because of it the United States was intimately bound up with the whole of the American continent.

"In the face of the present situation," he declared, "it would be wise not to persist in the illusion of security which we have had but to create for the defense of the continent and the harmonious development of the American nations an organization which in itself would command respect."

"In this organization there falls upon the United States the preponderant role, not only because it is the most powerful country of the continent, but because it has voluntarily constituted itself the champion of other American nations."

A country at war with the United States, Dr. Morales also pointed out, would desire above all to take possession of the Panama canal and operations which might conduce to that end would have to take place on Panamanian territory. He referred to Panama as "the most strategic piece of land in the world," and concluded by saying that the topic of national defense for the United States was not at all foreign to the interests of Panama.

### SENATOR BORAH

### GIVES WARNING

(Continued from Page 1.)

learned how to mobilize and discipline the capacity and energy of their people. The period following the American war—the Franco-Prussian War—our own civil war—advised us how quickly a people transfer the energy and capacity for their own use from the battlefield to the factory.

**Fight for Markets.**  
At the present time the war products are from competition with the old countries. The former are not only our home market, but in part the foreign market. After the war he will have to fight for his home market. The American manufacturer is in no less advantageous position now. Europe no longer competes with us as she did before and as she will under present laws after the war. We are feeding, clothing, arming and financing vast armies without much competition. It is not altogether an enviable job, but one of which I must not be too stoutly. But when Europe, combined Europe, shall send her men and her women back to the farm and factory and the workshop and the mine, drilled, disciplined, even better for industrial war, then the world will be for the victor, and we are prepared to meet them on the peaceful fields of industry.

**Head to head about the tariff.**  
There will be no neutrality there. You had just as well talk of defending our great sea coast cities against the trained armies and navies of combined Europe with our present army and navy as to try to protect against such an assault—and into the law which will enter along with Europe the South American countries and Canada and Japan—the American laborer, the American farmer and the American manufacturer with our present laws and fiscal policy or even with the formidable tariff-making machinery supposed to be concealed under the undefined, unlimited and unknown powers of the federal trade commission.

**Head to head about the tariff.**  
We ought not about to reduce our tariff laws and without delay. We ought to prepare to mobilize our resources and our people industrially. We ought to have a tariff law which would at least collect revenue from those gigantic industrial combinations such as the sugar trust, which enjoys

our market free; a law and a policy which would evoke confidence, diversity and industry and develop the varied talents of our people. If we expect war shall we not be prepared to feed and clothe and equip our people from within. Germany could have kept her soldiers in the field six months shut off as she was from the outside world, had she not long ago adopted a policy which gave her home market to her producers and developed and diversified the genius of her people in every line of labor, production and manufacture, until she stood industrially equipped for all comers. Do not overlook, in studying the present situation of Germany, the words of Blumenthal and the fiscal policy which followed in 1878. Germany's industrial preparedness was more remarkable than any military preparation. And even if we do not expect war but only peace, shall we fail to protect our workmen and our people as a whole against the conditions which shall sharply confront them when the long, hard pull, which is to follow after the war is over, has begun.

**Head to head about the tariff.**  
"And finally, my friends, let us call up for service some of the old time pride in our country, some of the old time American spirit to which our esteemed president made fine reference in his address to the old soldier, a few days ago. We hear much these days about the Anglo-American, the German-American, and so on and so forth. I sometimes wonder what has become of the old-time spirit of just the plain simple unfettered American. Does any one feel any interest in him? Is there not some concern, some disapproval, some modest and well-guarded contempt for the many who do no other country, no fatherland, but only act along a simple, untraced direction to our own country and undivided fealty to our own flag and for which he feels under no constraint to apologize."

**Head to head about the tariff.**  
"It seems to me we ought to arouse some of the old-time American spirit not with bluster or offense, but with courage, to the end that we may not only be a great and powerful people industrially, but also that we may come to have in truth and in fact a national purpose, a national mind, a national ideal. We do not want a nation composed of groups communicating by radical and foreign feelings. We want one people always behind and loyal to one flag. Let us not care so much whence our immigrants come as the spirit and pur-

pose with which they come. This war must sometime end. Then the era of regeneration will begin. The long, patient climb will be before us and we as a people cannot escape our own and our government will feel the strain. In the work of rehabilitation in which we are to have so large a part; how important it is, how indispensable that we stand as individuals a determined and hopeful people.

**COMMISSIONERS-SUPPORT FAIR**  
(Continued from Page 1.)  
Board proceeded to the consideration of the proposition of the Piler citizens as submitted by their committee which is as follows:  
The people of Twin Falls county as long known as the Schildman and Coffin forty, described as the NW 1/4 of the property of Twin Falls county as long owned by the estate of the late William Ranko is east of the Boise meridian. Said forty to be deeded to the county for the purpose that it remain the property of Twin Falls county as long as it is used for county fair purposes. If at any time the county refuses to use it for the purpose of a county fair, same shall revert to the donor of the land. It is hereby understood by the Piler committee in consideration of this land being deeded to the county board shall improve the land by building suitable buildings for fair purposes, maintain it for the purposes intended, and also build a half mile track and also to build fences, furnish water and other appurtenances that will fully equip the ground for the purposes intended.

### CARRANZA IS RECOGNIZED

(Continued from Page 1.)

from the Carranza government. These guarantees are as follows:

- 1. Foreigners will be protected in their lives and property.
- 2. The Carranza government assumes full responsibility for claims growing out of the revolution and will satisfactorily be met by means of international commissions.
- 3. No one will suffer in his life and property on account of rollover beliefs; all priests and nuns who have not taken part in Mexican politics will be permitted to return and will not be prosecuted. They do not participate in politics and obey the Mexican laws governing the church and state.
- 4. A decree of amnesty is in preparation which will enable all elements, irrespective of political affiliations herebefore, to return to Mexico with the exception of those guilty of complicity in the plot to kill Madero and Suarez, or who are charged with criminal crimes.

**Check on Politicians.**  
A few political leaders who hitherto have opposed the Carranza government will not be permitted to return until the government is firmly established and then only if they will pledge allegiance to it.  
The form in which recognition is to be extended has not been decided. Secretary Lansing said an ambassador might be sent to the Carranza capital, Queretaro, or that there might be an exchange of notes.

**Meaning of Recognition.**  
The recognition of a "de facto" government does not limit the action in any sense, officials explained. The term applies to an authority that arises out of revolution. When a constitutional government is again erected, other credentials will be given to the American diplomatic representatives. In the meantime, the full support of the United States is to be given to the de facto government to hasten restoration of constitutional authority.

**Carranza the Stronger.**  
Secretary Lansing reported to the assembled ambassadors of Argentina, Brazil, and Chile, and the ministers of Bolivia, Uruguay and Guatemala, Saturday, that he had conferred with representatives of the Villa and Carranza factions, and had come to the conclusion that Carranza party possessed military supremacy and territorial capacity requisite for a government. On this point all were agreed.

**Memoranda Filed by Elizco Arredondo.**  
Carranza's representative at Washington, set forth the political program of his government, which includes the convoking of municipal elections at once, and then of a constitutional assembly, to which General Carranza, as fiscal chief, should be appointed. He also outlined the accounting of his handling of the executive power. This assembly will create an executive department by holding a general election.

**Solution of Problem.**  
The recognition of Carranza is confidently looked upon by Secretary Lansing as a long step toward the solution of the Mexican problem. With the recognition the process of reconstructing Mexico is expected to begin. Many officials expressed their opinion that it was possible for the United States to recognize General Carranza, because he, as the first to take arms against Huerta, stands for the principle of the revolution, which the United States has been in sympathy with.

General Villa's followers had hoped that the conference would continue its efforts to persuade Carranza to form a coalition government. What the Villa faction will do is not clearly indicated, but that they will continue the struggle in the field is considered certain, although most of their leadership is at present in Washington, and official reports show that many of their troops have gone over to the Carranza side.

Secretary Lansing will report to President Wilson Sunday what occurred at Saturday's conference.

### COMMISSIONERS-SUPPORT FAIR

(Continued from Page 1.)

After careful consideration the board being fully advised and deemed such action for the public good motion was made by T. E. Moore, seconded by D. P. Albee that the proposition submitted by the Piler committee be adopted by the county board to carry out the provisions of the request. Motion carried unanimously. After further consideration of claims against the current expense fund, recess was taken until tomorrow morning at 9:30 a. m.

### MILITIA COMPANY ORGANIZED

(Continued from Page 1.)

**Ninth Company Starts Out With Forty New Members.**  
Company K, of the Idaho state militia, was organized in Buhl Friday evening with forty members. The new company will use the Buhl opera house for an armory for the present. Adjutant-general B. J. Roberts was elected captain of the company. Forty-one members of company D of this city, headed by Capt. P. W. McVey, and several officers from Boise, were present and witnessed the company into the service of the state. C. V. Higgs, postmaster of the west end town was elected captain of the company.

### FOREIGN DEMAND FOR COAL

War Insurance Increased Mine and Shipping Activities

Washington, D. C. Sept. 30th.—The probable foreign demand for coal in the United States, as viewed by competent observers here and as indicated by foreign dispatches, means that the mine owners and coal carrying railroads in this country can look forward to further increased activity in the next few months. In fact, several railroads are already showing increased coal freight. In the last few days reports have been published that the Baltimore and Ohio railroad, and the Chesapeake and Ohio railway, for example, are rushing idle coal cars as reported as greatly diminished on several important coal carrying roads. According to Walter S. Pratt, special European correspondent of the *National Geographic Magazine*, France will be forced to get the coal formerly mined in Belgium from the United States. This is estimated at 20,000,000 tons annually. All of the Belgium mines are now operated under German control and the coal is going to Germany. The British shortage in coal means not only that shipments to British ports will be increased but that the American market will come into the American coal market. The British navy and other coal consumers formerly dependent on the British supply. Spain is also looking to American mines for the coal supply normally secured from Great Britain, according to a consular report received by the United States department of commerce. The embargo on coal by Great Britain will not, it is believed, lessen American production. The Allies need so much more of the product than they get before and neutral countries in Europe are deprived of their usual supply to such an extent that coal exports from the United States will greatly increase rather than decrease. This is interpreted as another favorable factor for the principal railroads in this country and renders more certain the outlook for greatly increased net earnings for the current year. Practically all of the exported coal means that much additional freight for the coal carrying roads which are already beginning to show greater earnings.

### HEALTH AND HYGIENE

Don't Spit Lairs Should be Made More Than Jokes.

The dangerous and dirty habit of careless spitting, coughing and sneezing is without doubt the most costly carelessness that civilized society indulges in. The saying, "No spit, no consumption," is literally true, and this means that the consumption of them we have with 5000 deaths a year, would be largely avoided if this habit could be abolished.

It has been shown by careful scientific experiments that in the act of coughing or sneezing, unless a handkerchief or other object is held in front of the nose and mouth, microscopic particles of saliva and nasal secretion are discharged into the air in which, even in a quiet room, may be carried a distance of from ten to fifty yards from the place where they were expelled. Many of these droplets can be seen if one will cough or sneeze in front of a mirror or window-pane. Most of them, however, are too small to be visible to the naked eye. One can now readily understand how very impolite it is to cough or sneeze without holding a handkerchief in front of his face, for such a person literally spits on his objects and people, perhaps on food, within a distance of from ten to fifty yards about him.

The germs of tuberculosis, diphtheria and pertussis grip, colds, pneumonia, whooping cough, measles and scarlet fever, are conveyed through expectation. Many perfectly healthy people not suffering from the disease carry the germs of pneumonia and diphtheria and other contagious diseases in their mouths and throats. It becomes necessary that not only recognizably sick people shall desist from careless spitting, but that the apparently well may be "germ carriers," should also be careful in expectorating.

Women and children should haste their anti-spitting ordinances more than jokes. As a matter of fact they should not pass such an ordinance until they are ready to enforce it. From a health point of view anti-spitting ordinances are not to be lightly regarded. They should be enforced in every school of them should be made more than a joke.

Before the discovery of Jenner, smallpox was considered a disease of childhood. Only a few children

reached the adult age without having had the disease.

The front yard is a pretty good index to the people who live in the house, but the back yard is a better index to their lives, their health and their habits of cleanliness.

Dirt and filth accumulate all the time; and if neglected soon become ugly, unsightly and dangerous. Cleanliness and beauty can only be maintained by constant vigilance and labor.

Because a man has been paying fire insurance on his home for twenty years and never had a fire, he does not cancel his policy. Health insurance works on the same basis, except that it costs less and produces more.

"Colds are getting to be a disgrace" rightly so. They indicate that in most instances the possessor of "a bad cold" (and we have yet to hear of a good cold) has disobeyed some ordinary rules of health. His punishment is noted out to him in the form of "a bad cold."

Why not clean up and stay clean? Spasmodic cleaning does not fit a town the name of a clean town. Neither does one health lecture or one crusade against filth during summer make it or even get it the name of a beautiful town. What you must do is to clean up and keep clean; bring about sanitary conditions and

keep them sanitary, have it somebody's business to look after these conditions, enforce laws and, if necessary, punish the violators of the law.

"It's the cleanest town in the state" is about the most convincing argument a town could have. It would attract home-seekers and investors; it would draw visitors and business; it would mean a good place to live and a good place to do business.

### NEW YORK LETTER

Bulgaria, though she has mobilized her army, is no longer the key to the situation on the Balkans. The center of difficulties is shifted from Sofia to Athens, where the master promoter of the Balkan League, the Greek king, would draw visitors and business; it would mean a good place to live and a good place to do business.

But while Sir Edward Grey could not find a solution from the point of view of the Allies, should Bulgaria attack Serbia and thus join the war on the side of the Central Powers, the Balkan power in a position to paralyze Bulgaria's military activities would be Greece. In addition Greece could find a solution from the point of view of the Allies, should Bulgaria attack Serbia, as well as Greece. Five or six allied army corps in addition to the Greek army could easily overwhelm the Bulgarians and eliminate them as a military factor.

The old dream of a Greek empire comprising the whole Greek population in Greece, Albania, Asia Minor and all the Aegean islands is thus doomed to remain a dream only, because, in addition to Italy's holding the Aegean islands, the plan to occupy those parts of Asia Minor that are inhabited by Greeks. Furthermore, Italy has also turned to become a competitor of Greece in Albania and the well-known Greek-Albanian leader, Mr. Zogoras, has pronounced the Italians as the arch enemies of his fellow countrymen.

If Greece should join the war, and if the Allies should win, she would not get the compensation she would expect because England and France could not force Italy to give up the islands and could not drive her out of Albania. In fact, Greece would not gain anything by joining the war, because of Italy's competition and in adding the Allies she would lose all her future possibilities. This explains why Greece, though morally in sympathy with the Allies, not only cannot join them, but must do everything to prevent their emergence victoriously from the war.

It was said that Greece did not join the Allies, because King Constantine is a brother-in-law of the Kaiser. That could be true on the supposition that the majority of the Greek people was not pro-Ally. But after the last election and after Venizelos' returning to power, there can be no doubt as to the sympathies of the overwhelming majority of the Greeks. King Constantine, who is a constitutional monarch, cannot have his will against the majority of his people, and he would consider it advantageous to join the Allies.

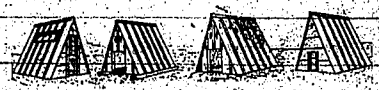

Thus not the influence of King Constantine, but purely political considerations are preventing the Greeks from joining the war on the side of the Allies and from giving assistance to them in case Bulgaria should attack Serbia.

WM. WIRT MILLS,

### For Sale

Two 40 acre tracts near Hansen, each 20 acres of red and white clover. Good stands. Will sell for \$125 per acre if taken before November 1st.

J. R. Hinton  
Hansen, Idaho.

Many of our farmer friends are beginning to tell their neighbors that our "Customers-Aid" Plans are a pretty good thing.

They think enough of them so that they are getting the habit of making use of them for even the simplest type of building.

If you are planning and perplexed—these drawings will start you right.

From stock barns down to the simplest structures, farm buildings are shown in complete working detail.

Our lumber yard is a mighty good place to come for building ideas.

## WINTER WORK IN ORCHARDS

When Ground is Frozen is Favorable Time for Hauling and Spreading Manure—Add Bone Meal.

The winter when the ground is frozen hard is a favorable season for hauling out with cart or sled the manure needed. In spring the ground is too soft to haul over and other work is too pressing; the result is this important matter is put off for another year. The manure should be hauled and spread evenly over the ground. Do not place directly around the trunks; it only affords a harbor for mice and insects. The manure should be raked and from granulated into by horses, cows and chickens, mixed with a little animal manure, is poor stuff and is only valuable as a mulch. This kind of manure should be hauled out to the orchard and piled. Mix a half-bushel of raw bone meal in each two-bushel wagon load of manure as it is piled and make a compact heap, which will rot down, and when well rotted, should be spread. About one to two bushels is the proper quantity for each large tree. The manure should be spread in a circle as far out as the branches extend.

Practical growers are now using from 400 to 800 pounds of animal bone and potash fertilizer per acre. The fertilizer is drilled in with 7/8 in the early fall, the eye is turned under in April for green manure. This method is found to be the cheapest and best method of fertilizing the orchard.

## SPRAY FOR SAN JOSE SCALE

Best Remedy for Pest is Thorough Treatment With Lime-Sulphur Mixture Late in Winter.

By C. F. OLLETTE, Colorado Experiment Station, of the worst pest attacking orchard trees in this country. It is extremely important that orchards should be so treated as to exterminate the scale from them and prevent its spread to surrounding orchards.

Undoubtedly the best remedy for this scale is a thorough treatment with lime-sulphur mixture late in the winter or early in the spring, before the buds begin to open on the trees. If the concentrated concentrated lime-sulphur mixture are used they may be diluted in the proportion of about one part of the concentrated preparation to ten parts of water. If home-made lime-sulphur sprays are used, probably there is no better formula than the following:

Flowers of sulphur, 15 pounds;  
Water, 50 gallons.

The lime should be slaked in warm water and as soon as the slaking has ceased, well stirred, the sulphur should be added and enough water added to the requisite to keep the mixture thick and sloppy. Boil for at least forty

minutes. The mixture should be kept in a cool place until ready for use.

When using the mixture for San Jose scale, five minutes, or until the liquid is a deep brick-red color, then it is ready for use and apply it liberally to the trees.

Protect Green Fruit from Mites, etc. To protect green fruit from mites and other insects which may be troublesome, spray them with a solution of kerosene emulsion. The best to be had is the "Kerosene Emulsion" made by the Blue Lakes Bottling Works.

# FOR REMOVING SILAGE

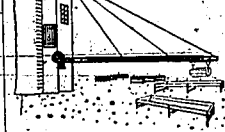

Description of Devices in Use for That Purpose.

Overhead Feed-Carrier is Advisable Where Silo is Adjacent to Feed Yard—Much Depends on Number of Stock to Be Fed.

(By L. W. CHASE)

From two to three inches of silage should be removed from the entire surface of the silo daily during the summer months and at least half of this amount in the winter. In the above-ground silos the silage may be taken with a silage fork and allowed to fall down through the chute to the ground, where it may be loaded into the cart or carrier and fed where desired; or it may be dropped directly into the silo, carrier, or wagon, and taken to the stock.

If the silo is adjacent to the barn and there is a smooth way from silo to feed manger, a simple silage cart is the most convenient device for

Illustrating How a Swing Track May Be Attached to a Strong Silo and the Silage Distributed to Several Feed Bunks.

taking the silage to the stock. The cart can be left beneath the silo chute and filled from above without removing the silage. Loose silage weighs about 15.5 pounds per cubic foot, and this should be given consideration when building a cart for a definite capacity.

More often than otherwise the silo stands either in or adjacent to the feed yard, in which case there is very seldom a smooth way from silo to bunks. An overhead feed carrier is then generally advisable. This depends upon the number of stock to be fed. A carrier may easily be arranged. If the yards are small a swing track may be attached to the silo and the silage distributed to several feed bunks.

When several carloads of stock are being fed silage, the most convenient way is to throw the silage into a wagon and distribute it to the feed bunks with a team.

Some sort of hoisting device should be used in silos and smooth silos where the pile is more than ten feet deep, hand-chests and power hoists are being used for this purpose. The simplest hoist is one of the bucket raised hand over hand, but this requires one person in the silo and one above ground. A better scheme and one which is practical where the silo is located in the barn between the mangers is to obtain several baskets and equip them with steel balls that have the same diameter as the silo and place them in the silo convenient for raising, climb out of the silo and by means of a hook on a rope hook a basket of silage to it and hoist it out. After the basket is emptied, drop it back into the silo, release the hook, and hook another basket to the silo.

A homemade hoisting device for semipit silos and which can be adapted to pit silos as well, consists of a three-inch pipe carrying a wooden ball, the ball well started, the silage should be added and enough water added to the requisite to keep the mixture thick and sloppy. Boil for at least forty

minutes. The mixture should be kept in a cool place until ready for use.

FRONT RANK STEEL FURNACE. It will be observed that the FRONT RANK STEEL FURNACE is built on STRAIGHT VERTICAL lines, thus causing the air in its ascent to pass directly over its entire surface. Call and let us show you this furnace.

## BRIZEE SHEET METAL WORKS

# Colt Show

Saturday, Oct. 16th  
At Horses Home Barn

On this date I will give the following prizes for the best colts from my two horses, Capon and Alforda: First prize, \$20.00; second, \$10.00. I will also give two prizes, \$10.00 first, and \$5.00 second, for best colt-out-of-sire or horse, the mother weighing 1000 pounds or under.
