CONTACT PROSPECTS BETTER THAN EVER

John M. Beck of Kimberly Tells
of Installation of Machinery at
Camp.

A compressor and hoisting machine has been received at the DeLano property in Contact and will be installed and ready for operation within a couple of weeks, according to John M. Beck, of Kimberly, who with George O. Bremer, H. W. Munce and W. M. Arnold returned Tuesday from a trip to that noted copper camp. There are now 30 men employed on the DeLano property and this number will be increased as soon as the new machinery is started. A great deal of hard work is being done on other properties. Mr. Beck says that the camp is more promising than at any previous time in its history. The prospectors have been out for a day from Contact on business, look conservative though hopeful view of the situation. He said a little more was being taken out and hoped that white-copper prices would continue to rise. However, the development of the camp was retarded by lack of transportation facilities. Mr. Beck said that the road that would lead him to the new road would go through in the near future. If it did, the camp would naturally gain rapidly. The prospectors are going to grab and willow along the line of the old Oregon Shortland right of way, but whether this amounted to anything more than an effort to keep it clear he did not know.

SALLADAY AS PRESIDENT

Now Head Chosen For Club—No

Room This Year.

On account of his having to b

mercantile club and was succeeded by H. J. Failing. Mr. Salladay accepted the place on the directorate made vacant by the elevation of Mr. Failing to the presidency. The board of di-

The board elected 75 new members who had applied during the campaign last week. A smoker will be given next Thursday night at which the referendum on the subject of investigation into the threatened strike will be discussed.

CARRANZA SENDS 30,000 TO BORDER

Mexican Government Already Moving Troops

AUTOS PROVE EFFICIENCY WHEN USED TO CAPTURE OFFICERS

Col. Tullis Cardenas and Two Lieutenants Killed by American Officers When He Attempts Escape.

Washington, May 23.—The Carranza government has ordered 30,000 troops into the region south of the border to exterminate bandits, according to information received today at the state department. The new troop movements are already in progress through Chihuahua, the department's advance state.

Officials here were inclined today to anticipate a further delay by Gen. Carranza in dispatching his new note regarding the border situation. Official announcement had returned was expected to lead to alterations in the communication as demonstrating the purpose of the United States government to be only the policing of the border region.

Mustering of the Arizona and New Mexico guardsmen is being delayed, Gen. Funtun reports, until the skeleton companies can be recruited to the required standard.

Secy. Baker has not decided what action shall be taken regarding the 116 Texas guardsmen who decide to enroll in the federal service. Judge Advocate General Crowder has submitted an opinion to Gen. Scott, chief of staff, outlining the war department's authority to courtmartial the recruits, however, was that if the court martial were ordered a majority of the members of each court be militia officers, not regulars.

Automobiles were put to a new military use in the Villa campaign May 14 when the bandit leader, Col. Julio Cardenas was killed with two of his lieutenants.

Three touring cars from Gen. J. J. Pershing's camp started about midday for Rancho San Miguel de Rubio, a short run across the mountains, the residence of the Cardenas family and the scene of some pot shooting occasionally, at American troops. Cardenas' family, all women and children, had remained unmolested, notwithstanding positive information to the American staff that the bandit frequently used his ranch for a rendezvous.

Until this Sunday's automobile raid, it has been customary to employ cavalry on night rides after bandits and ranches. The cavalry would surround the ranch just before going on these searches.

On this occasion, with an order to buy corn as the ostensible purpose, made a fast run over mountain foot hills to the ranch. Lieut. George S. Patterson, Jr., of San Francisco, commander of Gen. Pershing's staff, commanded the machines. Within a mile of the ranch the car topped a hill from which the first shot was fired. The machine gunners were visible to the occupants of the ranch and from which the automobiles made a dash toward their objective, which would have been impossible for cavalry. Running near 60 miles an hour they were within less than 300 yards of the buildings before they reached the ranch.

A Mexican working in the yard gave the warning, but it was too late. By the time Cardenas and his two men could get on their horses and dash for the ranch gate, the Americans had surrounded the place.

Cardenas was the first man to emerge from the ranch. He and Lieut. Patton engaged in a pistol duel in which a shot from Patton's weapon broke the bandit's arm and drove him back into the ranch house, where he was finished by the American soldiers when he tried to escape.

BUY BOUNTY CLAIMS AT THEIR OWN RISK

Hope of Compensation Rests in Appropriation by Next Session of Legislature.

BOISE, Ida.—Those who purchase claims against the predatory animal fund of this state, now exhausted, do so at their own risk. The only hope of compensation they have is that the next legislature will reimburse them through an appropriation. A warning to this effect has been authorized by the state livestock sanitary board, the warning being signed by State Veterinarian Bodie and is sufficient to give notice to those interested that they take claims at their own risk.

The predatory animal fund became exhausted some time ago due to the heavy drain made upon it by layers of predatory animals who have been very active. Since then the state veterinary department has been receiving the claims and placing them on file. Many have come in and it is now very apparent that the only way the hunters can be reimbursed is by a legislative appropriation.

The state livestock sanitary board has in evidence two deer heads, but aside from auditing bills did little else. The rabies and hog cholera situation were discussed informally but no action was taken. The board realizes that hog cholera is under much better control than it was a year ago and that there is less of the disease. With regard to the rabies, members of the board felt that everything possible was being done to exterminate the coyote and stamp out the disease.

The following is the warning the board authorized sent to the people of

Mack Sennet, one of the 8 greatest film directors in the world. He owns and supervises the famous Triangle-Keystone film factory. He has the magic power of knowing how to make millions of people laugh.

FRENCH TAKE IMPORTANT FORT

Germans Driven Out of Douaumont at Point of Bayonets

HAS BEEN IN GERMAN HANDS FOR NEARLY THREE MONTHS.

Gains Made Inch By Inch on Desperate Bayonet Fighting. Liquid Gas Used.

Paris—Recapture by the French after three months of the greater part of Fort Douaumont, which was taken by the Germans at the outset of the Verdun drive, is received with great elation by the press and public, the more so on account of the effect, it is expected to have on neutral opinion. Gen. Nivelle, the French commander at Verdun, took advantage of the fact that the Germans recently have been concentrating their attention on Dead Man's Hill, on the other side of the river and assembled a large amount of artillery for the attack on the Douaumont sector.

The German resistance at some points was stubborn. On the Froide Terre road, and at Douaumont, the French had to force back the German infantry inch by inch at the point of the bayonet.

As soon as they recovered from their surprise the Germans launched a number of fierce counter attacks, but all failed and by 10 p. m. preparations had been made to deal with the serious efforts the Germans are expected to make to recapture the lost positions.

The French success is considered by military critics here to have shaken the whole German line at Verdun. Douaumont fort was the most important point captured by the French and French gain there is regarded as

Goodbye coffee grinder

THE right way to protect good coffee—in vacuum sealed tins—has made grinding at home or at the grocer's unsatisfactory.

Right after Schilling's Best is roasted, it is carefully ground into even bits, the objectionable chaff taken-out, and the coffee hurriedly packed in vacuum-sealed tins.

Neither you nor the grocer can grind as uniformly as we do. And uniform grinding is one of the important reasons for the smooth, rich strength of Schilling's Best. A pound goes further.

Sold only through grocers.

Schilling's Best

having nullified the most significant achievement of the Germans in the great battle of three months.

West of the Meuse Hill 235, the western summit of Dead Man Hill has become a "no man's land," like Hartman's Wollerkopf. Once before the French abandoned it temporarily to avoid useless loss, recouping it when the opportunity came.

Fighting continued with extreme violence on both banks of the Meuse along the Verdun front. Two German counterattacks on French positions on Hill 304 failed completely. The French made further gains within Fort Douaumont. The Germans now hold only a small angle on the northeastern corner of the fort.

The battle around Hill 304 was especially severe. In attacking French positions on the west side of the hill the Germans used liquid gas, the official statement says, and penetrated one of the French trenches, but were repulsed at once. On the east side of the hill the Germans attacked after intense artillery preparation but were not permitted to reach the French.

DEPUTY REPORTS THAT RABIES STILL EXISTS

Coyotes, Sheep, Dogs and Horses Were Among Animals Killed That Were Affected With Disease.

Tom Urlo, who is employed by the county to assist in the extermination of coyotes and is working in the hills south of Rogerson, reports that there are still a number of rabid animals in that section. A short time ago a farmer by the name of John Smith, whose ranch is south of Rogerson, was attacked by a rabid coyote. The mad animal went to fight the man but was killed with a twenty-two rifle. Two youngsters in the Big Creek district were attacked by a coyote, but escaped to the nearest house. The coyote was later heard from at the ranch of Hugh Reed, where it attacked a dog.

A horse was killed on Mr. Healey's place near the Salmon river after having shown symptoms of rabies. The horse was tied in the stable and attracted attention by the noise of a manager in a frantic manner. It broke loose and attacked two small lads in the barn yard, who escaped to the barn. The men on the place shot the animal and reported that it was the most ferocious they had ever seen.

Some sheep belonging to a man by the name of Miller were attacked by a coyote and several of them badly bitten before the coyote's attention was diverted by one of the dogs guarding the sheep. The dog was also bitten and was tied up to await developments.

Mr. Urlo reports that he has found two sheep in the hills which were affected by the disease and he and Mr. Hungertford, who was assisting him, have cleaned out several den of coyotes that were apparently affected.

FIRST REHEARSAL OF MOVIES IS HELD

Pleasure Producing Company Expects to Give Exhibition in the Near Future.

The first rehearsal of the Pleasure Producing Company was held in this city Sunday afternoon and proved to be a very successful one under the skillful management of the adept stage manager, William L. Rogers. In a very short time the company will be putting on a number of plays, such as "The Town of Angels" in California. The heavy winter of the Great Shoshone falls and the heron will be rescued to five happy after afterwards, until the next film. The productions of the company, when once established in regular circuits throughout the country will do more to advertise Twin Falls to the world than any other except pictures. It could do, in the opinion of those who have made a study of the immense value of motion pictures as an advertising medium, that it is all that is in this case, it will not go out an advertising of which in all forms some suspicious people have an unaccountable and ungrateful something worth paying for and enjoying.

The managers expect to ask the privilege of using certain lands in the city on certain occasions, with the pledge that nothing will be molested or in any way injured. A number have already been granted, and the beautiful homes of the city may be seen in motion pictures in all the states of the Union.

of the state regarding the payment of bounties.

"To whom it may concern: Notice is hereby given that all available funds for the payment of bounty claims for predatory animals killed within the state of Idaho, have been exhausted and there are sufficient funds to pay only a small number of claims coming in the predatory animal fund up to Jan. 1, 1917.

All hunters and trappers and persons who have been purchasing traps and traps are hereby warned that in filling further claims for predatory animals killed with it, in doing so, they are taking their chances with the next legislature making the necessary appropriation for the payment of same.

"G. F. BODIE," State Veterinarian.

DANDELION ROOTS HAVE MARKET VALUE

Possibility That Boys Might Make Good Profit Discussed by Druggists.

That there is a market for dandelion roots is the substance of a story going the rounds of the press, in which it is declared that the demand for these roots for medicinal purposes is so great that they bring from four to six cents a pound. To dandelion is used in making up of liver medicines, and has become scarce and valuable since the breaking out of the European war.

Since 100,000 pounds or more are imported annually into the United States it seems that many a young boy or girl ought to make fairly good wages by collecting and preparing dandelion roots for the drug trade. The root is used medicinally in diseases of the liver and dyspepsia.

Digging up the root for control and also for securing the maximum amount of material for sale is best accomplished by the use of a spade or stout bladed knife. The plant grows so low that the frequent cutting of the lawn with the mower does not seem to have a good effect as with taller weeds. The plants must be destroyed below the crown of the root in order to kill them and of course it is necessary to go much deeper in order to get most of the root, which is thick, tapering, and sometimes fully twenty inches in length.

Another method of control is spraying with iron sulphate. The spraying must be done on bright days and at frequent intervals to be effective. It will prevent them from maturing seed and according to experiments in Dakota and Rhode Island it has been found to remove the root entirely from the lawn.

Except that it is a nuisance in lawns the dandelion is not a bad weed, since its leaves are used by many stock men for the basis of many a mess of greens for the home table. The leaves are also frequently eaten in salads early in the spring, both in Europe and in this country.

Whether a market could be found for these roots if gathered in Twin

Falls or not is a question. Local druggists say that representatives of outside firms could probably tell if consulted, and that if the roots here grow large enough and a market could be found for them, a neat income could be earned for a time in eradicating them.

MOTORCYCLE RUN TO ICE CAVES SUNDAY

Plan to Form Club and Make Trips During the Coming Summer.

A motorcycle run to the ice caves for the purpose of forming a motorcycle club, will be held next Sunday, leaving the Gloystein Brothers shop at 7:30 o'clock. A general invitation has been extended to all riders in the county, by the promoters of the plan, who hope to make it the event of the season in motorcycle lines. It is planned to take weekly trips during the summer months to the various points of interest around the city. It is expected to work out the details of organization when the riders gather at the caves Sunday.

SAGEBRUSH ROAD IS LATEST IDEA

PATTERSON, Wash.—George N. MacCulloch, of Coolidge, road supervisor, has invented a machine to shred sagebrush for purposes of road building. The machine cuts the sagebrush and spreads it over the road surface. The result is a smooth road built at small cost.

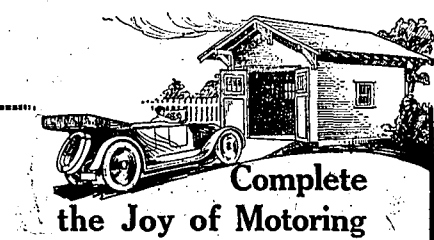

The machine consists of knives on a large wheel, which revolves against a railroad iron just near enough that the knives do not touch. A hopper is placed on top, and the sagebrush is forced by the knives against the railroad iron and cut into small shreds which is hauled to put on the road. Several highways on the Columbia river have been surfaced with this material recently.

Mr. MacCulloch has applied for a patent.

NOTICE

We hereby notify the public that H. E. Butler is not in any way connected with our company. We will not be responsible for any sales of stock that he should make, or any other obligations.

—Adv. KIMBERLY NURSERY CO.

Complete the Joy of Motoring

Have a convenient place for housing your car and making the small repairs.

One of the first requirements of a complete garage is the work bench—yet a need a place for the tools and accessories. This bench may be built along the side or in the rear, according to choice. Of course, you'll arrange for the windows. Good lighting is first and handy repair work.

A concrete floor provides good drainage and you can wash the automobile in all kinds of weather.

Build a garage now. It's your car's necessity.

SEMI-ANNUAL REPORT OF BUHL COWTESTING ASSOCIATION SHOWS INTERESTING RESULTS

THE semi-annual statement of the Buhl Pioneer Cowtesting association has just been issued, showing the average number of cows per herd, the average production of butterfat per cow, the most of such butter fat production, the cost per pound, the profit per cow and the owner's rank in profit per cow. This table shows a wide diversity in production and profit per cow in the different herds but it also shows that in all the herds a fine profit is made. The greatest difference is in the cost of production, and with greater economy in production the lowest profits.

dies Thursday. Light refreshments were served.

Ter. Pemberton was unable to fill his pupil Sunday. He was taken suddenly sick.

Miss Gertrude Boora is visiting relatives in Oakley.

Mrs. Carl Frederickson was a passenger to Twin Falls Sunday.

Mr. and Mrs. Francis Johnson, Mesdames Hunt, Kendall, Stevenson, Rowley and Roy Smith were passengers to Twin Falls Saturday.

J. E. Stenour made a business trip to Boise last week.

Prof. Davis attended the Democratic convention at Pocatello.

The Goodwin brothers have purchased the ranch belonging to the Oakley State bank.

Mr. Tuttle is moving his family and household goods into his new house south of the depot.

Mr. and Mrs. Delbert Whitte were shopping in Twin Falls Saturday.

Mr. and Mrs. Ray Nole have moved to the Pickett ranch for the summer.

Lee Johnson of Twin Falls, is spending a few days on his ranch here. He is planting 16 acres of spuds.

Mrs. Kendall was shopping in Twin Falls Monday.

Mrs. W. E. Beers invited a number of the ladies to take dinner with her and enjoy a Tag beer.

The most recent prize, which was won by Mrs. Hunt and Mrs. Lee Those present: Mesdames Jones, Rowley, Carlson, Lee, Hunt, Tracey, Hinman, Walton and Miller.

On Sunday evening Fay Cook took Mr. and Mrs. Doty, Low Rawlings and Miss Loretta Roberts for a ride in the car and while crossing a ditch at Terrell's ranch, he lost control of his car. The car turned over sideways and upset them all into ditch eight feet deep, but they escaped alive.

Roy Hunt attended the class day and commencement exercises in Twin Falls.

Oliver Johnson returned home Wednesday from Twin Falls, where he has been attending school.

Children's day exercises will be given in the church the first Sunday in June.

A carload of telephone poles have arrived and the company is busy setting them and installing phones.

The band is progressing. Hand practice every Monday evening at the school house, directed by Homer Goebl of Golden Valley.

The frost has gotten the tree fruit and most of the berry crop, but raspberries and dewberries are yet alive.

Mr. Richardson is building the Gem State office.

State News

—From Exchanges—

Killed in Auto Accident—Thuro Crandier of Moscow, died in a hospital in Genesee last Friday as the result of injuries sustained in an auto accident which occurred two miles east of that city the morning before.

According to reports, the machine which was being driven at a rapid rate of speed, dropped into a long rut in the road and as Mr. Peterson attempted to get it out the car hit a tree and twice, righted itself and then ran into a wire fence before it stopped.

Carroll and his skull caved in and did not regain consciousness. Mr. Lord received bruises about the face in addition to a broken nose. Mr. Peterson was thrown from the car and lay back, while Mr. Phillips escaped with but a few scratches.—Troy News.

Spud Crop Delayed.—B. P. Shawhan, manager for the state of the King Hill irrigation project, who was in Boise Wednesday, stated that the shipment of new potatoes from the King Hill tract would begin during the first week of June. The potatoes were as large as hen's eggs when the frost hit them last week, otherwise they would be marketable earlier.

Shawhan stated that alfalfa was under the King Hill tract and that the mule crop grows well. The tract has been well watered all spring and crops are in good condition, with the exception of fruit, which was nipped by the frost. As fruit forms only a small portion of the crop grown on the tract, the loss will not be heavy.—Statesman.

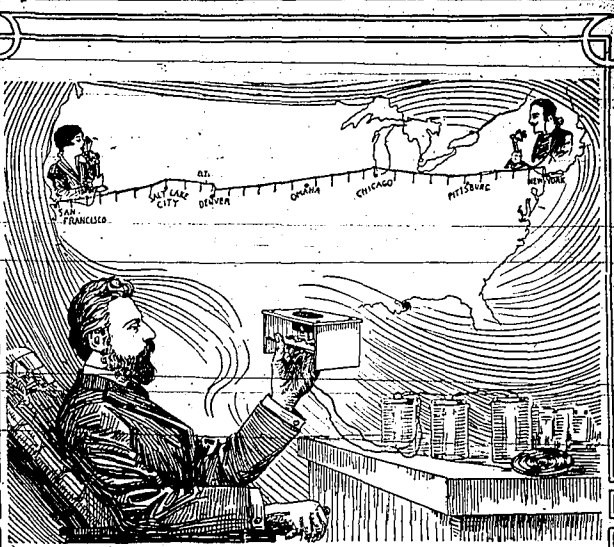

New Garage at Jerome—Yesterday morning ground was broken by the Jerome Concrete and Drilling company for a new building 50x125 feet on the east side of Lincoln avenue just south of the First National bank. The building is being erected by Oliver-Hill, who recently purchased the lots, and will be devoted to a garage. The building will be of brick, one story, the estimated number of brick required being 90,000. There will be a small basement under one corner to accommodate a heating plant should one be required. The roof will be supported by a truss and there will be no posts or other supports under it to obstruct the view of the entire interior. Mr. Hill will conduct a general public garage.—North Side News.

NEW BOOKS ON SHELVES OF THE TWIN FALLS LIBRARY

The following new books were placed on the shelves of the Twin Falls library Monday:

Piction—Jean of the Lazy A, by Bower; Handle With Care, by Turnbull; My Friend the Chauffeur, by Williamson; Portrait of a Lady, by James; The Mafactors, by Oppenheim; Agnes of Sorrento, by Stowe; The Outpost, by Norris; The Pioneers, by Prichard; God's Fool, by Maartens; Master and Man, by Tolstol; War and Peace, by Tolstol; The Unforeseen, by Cutting.

Non-Piction—Poems of Reflection, by Wilcox; The Forest, by White; Tolstol, the Man and His Message, by Steiner; Normal Life, by Devine; Customs and Fashions in Old New England, by Earle; Golden Treasury, by Paige; Egypt, Loti; Human Body, by Martin; Pentecost of Calvary, by Wieter; The Promised Land, by Antin; Luther Burbank, Williams; Juvenile—Cuddie's Cave, by Trowbridge; Tommy and the Whisking Stone, Burgess; Just Sixteen, by Woolsey; Being a Boy, Warner; Christmas

Telephone Standards

Forty years ago Alexander Graham Bell succeeded in transmitting the sound of the human voice over a wire; and while men scoffed at the invention and laughed the inventor to scorn Bell's imagination even then pictured the telephone in universal use.

His was the master mind, that penetrated the future and visualized an ideal—One System, One Policy, Universal Service.

Since then, time has developed certain standards—standards of plant construction, standards of equipment, standards of service efficiency.

Standards of our duty to the public have existed from the beginning of time; for they are founded on principles of equal justice and fair dealing. This means that our service must be as nearly perfect as human skill and ingenuity can make it, and that our rates must be fair, equitable, and as low as a fair return upon investment will permit.

It means courteous consideration of the public's needs, and solving the problems growing out of such needs in the light of the best engineering and other expert skill which the art of telephony has developed.

Such a policy commends itself to public favor, public respect and public confidence, without which no public utility can long exist.

The Mountain States Telephone and Telegraph Co.

Candles (children's plays), by Carter; Aunt Martha's Corners, Cupboard, by Gregg; When Mother Lets Us Cook, by Johnson; How to Dress a Doll, by Morgan; American Inventions and Inventors, by Mowry.

ENGINEER FRANK ROBINSON DEAD

Frank Robinson, a civil engineer, who for the past eight years lived in Twin Falls, died in the Physicians and Surgeon's hospital Saturday, at the age of 31 years. He was last employed by the Twin Falls Canal company some months ago. He was unmarried. The body was shipped this morning to his relatives in Washington, Kansas, for interment.

**PRESENT COUNTY HOSPITAL
DISGRACE TO COMMUNITY**

GIVE US THE NEW ONE!

Apologies to the proposed County Hospital, and "test we forget," some pains have been taken to obtain and place before the citizens of Twin Falls County, certain salient facts very pertinent to the situation. It is understood that the County Commissioners have practically decided that such an improvement shall be made; so that the excuse for this paper—if it needs any, other than the fact of its reference to a matter of general public interest—lies in a desire to awaken favorable sentiment and to hasten the day of fruition.

In the first place, let us take a glance at the territory and the people involved—at Twin Falls County and the inhabitants thereof. The extent of the large county is unlimited. Suffice it to say that it contains about 370,000 acres of land susceptible to irrigation and prodigiously productive when irrigated; and that something like two hundred thousand acres are now "under water" and giving returns to the agriculturist absolutely unheard of, even in the rich states of the middle-west. We will hardly need to recapitulate here the authenticated figures regarding last year's crops. It has been published to the world how seed-crops brought cash returns of from one hundred dollars per acre for alfalfa and alsike to three hundred and fifty-seven dollars per acre for white clover—not on a single acre, but from tracts of from five to eighty acres; and not in a single instance, but in hundreds of them! Also, regarding the marvelous profits from grain, from beans, from peas, from fruits and vegetables from the dairy, from hogs, from sheep especially, and from hay, worth locally at this writing twenty dollars per ton, in spite of the enormous quantity grown!

Of course the land thus changed in a decade from a desert to a garden of Eden has become valuable. The County Assessor advises that the average—average, mind you—valuation for the purpose of taxation is \$20.43 per acre; and that the total valuation of the County for same purpose is, approximately, and in round numbers, two millions of dollars. Within the confines of this favored section there is now a population of over twenty thousand souls high, upon the average, in intelligence and refinement, as is abundantly evidenced by the costly and magnificent provision for schools, both as to buildings, personnel and courses of study, by the fine and well attended churches and by the general high and law-abiding tone and temper constantly manifest.

In a community of the kind and character indicated, adequate and ample provision for the indigent and unfortunate who are, upon bible authority, "always with us," would naturally be expected. But when inquiry is made in Twin Falls County regarding that particular feature of modern civilization, the enquirer feels like saying, "One thing then lacketh!" And the default is, at present, so absolute as to be shameful.

Inquiry at the Auditor's office, where eleemosynary expenditures are recorded, developed the fact that, during the year 1915 something over seven thousand dollars were thus expended. Mr. Stewart, the bookkeeper, who kindly put in a half day's investigation, reported the names of over fifty persons who received aid (of course in their own homes) from the county during last year; and as many of them were heads of families, the total number would be at least twice as great. It is also certain that many of these needed medical attendance and hospital service—a fact further evidenced by the payment of \$705.51 to a doctor, or doctors, and \$747.60 "hospital charges."

Following up the inquiry as to what was done for these who needed everything—shelter, clothing, food and care, it developed that the county was maintaining an alleged "poor house," although in the same breath we were advised that the plant had been condemned as unsanitary by the State Health Officer, and that temporary occupancy was only permitted as an emergency expedient! "Seeing is believing," and if every citizen of

Twin Falls County could see that place, it's a cinch the Commissioners could not provide a better one too fast or too soon!

The Twin Falls County Poor House (and its a sure-enough poor house) is located on the alley facing Second Street S., between Second and Third Avenues S.—a region of warehouses, garages and livery stables. It was originally built for a livery stable, but later changed into a cheap hotel to serve the purpose of pioneer days. In front the view across the street takes in the rear of a machine shop (where a trip hammer soothes the nerves of the sick and nervous), to the left, and a garage to the right—the space being strewn with wrecked vehicles and machinery, rubbish and rags. A back alley, with all that implies, runs close on the right, piles of fence posts impinge on the rear, to the left and left-rear are coal sheds and more rubbish; and if a blade of grass ever grew anywhere, it has long since been buried and forgotten.

Within is absolute squalor—and that is no reflection upon the management, since no care nor labor could redeem such rooms and furnishings. There are a dozen small sleeping rooms very meagerly and poorly furnished, an alleged bath room and toilet, a hall, which appears to be the common sitting room, a dining room and kitchen. The large dining room—in fact all the older part of the house—is unplastered; and as the dining room is and has been, without a stove, food froze on the tables during the winter. The grade of the street has been raised, leaving the lot so low that in case of rain or melting snow the cellar filled and hip boots were required to reach the coal shed. The roof leaks numerously, and every windy day scatters soot from the chimneys everywhere. The rough and uneven floors, the doorways, the rattling windows—but why multiply words! The whole thing is, intrinsically, just about as bad as it can be, and is in every way derogatory to Twin Falls County and a libel upon her citizenship!

Five old men, either crippled or feeble, were the sole occupants, and they were not complaining—which might give ground for the assumption that one can get accustomed to anything. The apparent spokesman, one Patterson, said he had been there two years, and been well fed and well cared for. And Mr. Patterson, by the way, offered a note of unusual human interest. Left in the snow by foul means, during a winter night in the far north, eleven years ago, he has since been minus both hands to the wrists, one leg to the knee and the other foot to the instep. He walks fast and firmly upon crutches with leather pockets into which he thrusts his handless arms, feeds himself by means of composite contrivances of his own, and is hale, cheerful and measurably contented.

But this is no fit place for a civilized people to keep Mr. Patterson, or any other unfortunate (it does not seem that women are sent there at all); and we hold the prospect for better things as something that could not possibly have greater or more imminent necessity to urge its immediate achievement.

**OLD FELLOWS AND REBEKAHS
ASKED TO MEET AT HALL
TUESDAY MORNING.**

A request has been officially made for the gathering of all members in the district at the hall Tuesday morning, May 26, at 9 o'clock for preparation to participate in the Memorial Day parade for the honoring of the nation's dead and the brave deeds of the men who fought in the war.

"A natural unposed portrait of a child is one of the most charming things in the world."—From The Woman's Home Companion, April, 1916.

For a long time this has been our opinion and our ideal and we are glad to have our judgment sustained by so eminent an authority. We believe that a natural unposed portrait is most easily secured in a home-like studio. We have put money, time, thought, patience and love into the things we have arranged to please the little people who come to us to be photographed, for we want them to feel at ease and at home as the basis of the good negatives we hope to make of them.

We were repaid for all our planning the other day when a little girl went into the posing-room for the first time. She walked all about and looked at many things. Then she sat down in a little white arm-chair and very earnestly said: "Say, what makes this house so pretty?" We are grateful to the little lady for her sincere compliment.

The Bisbee Studio

PERSONALS

C. E. Whitty was up from Buhl to-day.
S. G. Gilliland was up from Buhl yesterday.
C. A. Ross came in from Three Creek, Sunday.
Mrs. Nona Fritz was in from Jarbidge Saturday.

Judge and Mrs. E. A. Walters of Twin Falls spent Sunday in Shoshone.—Southern Idaho Democrat.

H. N. Hansen and wife left this morning for Omaha, Neb., where they will visit for some time with friends and relatives.

Mrs. Hal Blue and daughter, Betty, leave Saturday for Greeley, Colo., where they will visit with the parents of Mrs. Blue, Mr. and Mrs. G. F. Baker.

LOCAL BREVITIES

—Phone 22—

Ohio Couple Married.—Everett Hawley and Miss Rita Gabbart of Waverly, Ill., were married May 20th, at the study of Rev. Harmon, pastor of the First Christian church.

To Deliver Address.—Rev. L. B. Franck, rector of the Ascension church, has been invited to deliver the graduation address to the Mountain Home high school class Friday evening.

Will Install Baby Grand.—Mrs. I. M. Arroll has purchased a baby grand piano and will install it in the Rogerson cafe, in the center where it will prove most convenient for cabaret entertainments.

Will Run Auto Track.—A. E. Hudson of Jarbidge, bought a truck from the gates Auto Co. this week to run in his truck line. W. F. Burgey of this city, also bought a truck from the same company, and will run it on the Contact and Twin Springs, Nev.

Farwell for Missionaries.—A farewell will be given to the Cadillac hall Tuesday, June 2nd, under the auspices of the L. D. S. M. I. A. for Mr. and Mrs. Aaron Tolman, who leave for a mission to the Southern states on June 7, 1918.

Pair Sent to Jail.—T. Jerome Taylor and Mrs. Margaret Hires were convicted on the charge of unlawful cohabitation before Probate Judge Osterlin Monday, and both given a bench warrant for detention for five months and Mrs. Hires for 75 days. Both are divorced and were living together unlawfully for about three weeks prior to their arrest.

Salmon Dammer Postponed.—On motion of J. H. Wise, attorney for the plaintiff, H. C. Hansen, the hearing on the dammer filed by defendant in the case of Hansen against the Salmon River company, et al., has been postponed to a date yet to be set. Mr. Wise is preparing to appear next week before the United States circuit court in San Francisco in a case in which the Equitable Trust company of New York is plaintiff and the Electric Investment company, as successor of the Great Shoshone company, is defendant.

Parish Hall Benefit.—The ladies of Ascension Guild, assisted by the choir and favoring friends, will give a benefit dinner and reading at Episcopal parish hall on Friday evening, June 8th, two weeks from next Friday. A chicken dinner will be served from 5 o'clock to 7:30, and at 8:30 sharp, will begin the program. The latter will consist of vocal and instrumental music and readings. The program will conclude with the comic opera, "Penelope, or the Milk Man's Bride." Tickets, at fifty cents for the dinner and ten cents for the entertainment, will be put on sale at once. As the proceeds are to aid in the cost of accessories for the hall, a liberal subscription is hoped for from the people of Twin Falls. A full program will be announced next week.

Miller will close his work with the church as pastor and for a short time will resign the ministry on account of a threatened nervous breakdown. Sunday school at 10 a. m. B. Y. P. U. at 7 p. m. You are cordially invited to attend these services.

CHANGES UNDER WAY IN THE I. D. STORE

Establishment Made Thoroughly Modern—New Building Devoted to Men's Outfitting.

"The Greater" Idaho Department store is rapidly getting in order, the work of moving and readjustment being pushed in swift and orderly manner under the direction of R. C. Beach, the president, and Charles L. Douglas, manager. The men's clothing department is being arranged in the new building which has just been added, the shoe department being placed in the rear. It is one of the most completely arranged men's outfitting departments in Idaho. From this department a large archway will lead into the children's and ladies' mislaid and children's department. To the front and occupying the place formerly devoted to the women's clothing department, will be found the ladies' ready-to-wear department. This will have ample space for the attainment of the best result in fitting and displaying goods. The old office will be torn out and new offices established in the balcony now occupied by the ladies' furishing department. The entire store will be rearranged and modernized. The latest National cash register system is included. Separate registers for each department and a separate drawer for each clerk, will be used to enhance the comfort and convenience of the customers and employees, and will mean prompt service and accuracy.

President R. C. Beach of the company, will remain in the store as the changes are completed and the store running in new, metropolitan style. The new manager, Mr. Hart, has rented the L. E. Saladay residence. His family will arrive from Blackfoot, June 1.

NOTICE. To the School Children: We old bodies have kindly invited the pupils of the Twin Falls schools to form a part of the Memorial Day parade. If any children desire to accept the invitation they will meet at the high school building at 9 o'clock, Tuesday morning, May 30. HAL G. BLUE, Superintendent of Schools.

WOOD BRIGGS TELLS STORIES

Kentuckian Gives Entertaining Program at Chautauque.

There has been a good deal of discussion among the Chautauque folks as to whether Wood Briggs is an entertaining lecturer or a lecturing entertainer. And Mr. Briggs is in doubt a little about it himself.

Mr. Briggs is a Kentuckian, and they say that every Kentuckian is an orator. Mr. Briggs is no exception to the rule. He tells his stories in the delightful Kentuckian way, and throughout his lectures he puts in little bits of philosophy of his own.

Briggs is coming to Chautauque full of ginger and good fun to make a part of one of the biggest Chautauque programs that have ever been brought to the west.

Opheum Theatre

Thursday, Friday and Saturday

H. V. Fitzgerald

The world's quickest, quick change artist who wears more clothes in less time than anyone in the world.

Presents a complete protean play impersonates all the characters alone and unaided, making some of the most remarkable and startling changes of costumes and characters ever accomplished.

Originator of the idea of turning his back to the audience, slipping out of his clothes unseen, leaving the clothes still standing there!

Is he in two places at the same time!

SYNOPSIS.

CHAPTER I—Sheridan's attempt to make a business man of his son Billy by starting him in the machine shop ends in going to a sanitarium, a nervous wreck.

CHAPTER II—On his return Billy is met at the station by his sister Edith.

CHAPTER III—He finds himself in an awkward and uncomfortable "fix" in the "New House" of the Sheridans. He sees Mary Vertrees looking at him from a summer house.

CHAPTER IV—The Vertrees, old and new family and imperious, call on the Sheridans, now rich, and afterward discuss them. Mary puts into words her parents' unspoken wish that she marry one of the Sheridan boys.

CHAPTER V—At the Sheridan home—warming himself Sheridan explains himself. Mary frankly encourages him. Sheridan's situation, and how he is to be sent back to the machine shop.

CHAPTER VI—Mary tells her mother about the banquet and checks her mother by telling of Jim as a matrimonial prospect.

CHAPTER VII—Jim tells Mary that he is not a "lunatic" just yet. He promises to marry, who half accepts him.

CHAPTER VIII—Sheridan tells Billy he must go back to the machine shop as soon as he is strong enough. In spite of Billy's plea to be allowed to write.

CHAPTER IX—Edith and Billy, devoted children, a wife, quarrel over Billy's leaving. Billy goes to Mary for help to keep Lamborn from quarrelling with Edith, and Mary leaves her in the room alone.

CHAPTER X—Bibbs has to break to his father the news of Jim's sudden death.

CHAPTER XI—All the rest of the family neighbors in their grief, Billy becomes temporary master of the house. At the funeral he meets Mary and rises high with her.

CHAPTER XII—Mrs. Sheridan pleads with Billy to return to the machine shop for his father's sake, and he consents.

CHAPTER XIII—Bibbs purposely interrupts a telephone between Edith and Lamborn. He tells Edith that he overheard Lamborn talking love to Edith's wife.

CHAPTER XIV—Mutual love of music arouses an intimate friendship between Bibbs and Mary.

CHAPTER XV.

That "mystery about plans" which troubled Bibbs had been a mystery to Mr. Vertrees, and it was being explained to him at about the time Bibbs attributed the reference to it in his notes. Mary had gone upstairs upon Bibbs' departure at ten o'clock, and Mr. and Mrs. Vertrees sat until after midnight in the library talking.

"She needn't have done that about her plans," vapored Mr. Vertrees. "We could have managed somehow without it. At least she ought to have consulted me."

of me, and if she insisted I could have arranged the details with her—the dealer.

"She thought that it might be—anyway for you," Mrs. Vertrees explained. "Really, she planned for you not to know about it until they had moved—until after tomorrow, that is, not I decided to mention it to you. See, she didn't even tell me about it until this morning. She has another idea, too. I'm afraid. It's—"

"Well," he urged, as she found it difficult to go on.

"Her other idea is—that is, it was I think it can be averted, of course—it was about her father."

"Not," he exclaimed, quickly. "I won't have it. You must see that. It's not for me to talk to her about it, but you mustn't let her."

"I'll try not," his wife promised. "She seems to be troubled about the—"

"She Needn't Have Done That About the Piano."

the cool matter—and about Billy. Of course the piano will take care of some things like those for a while and—"

"I don't like it. I gave her the piano to play on, not to—"

"You mustn't be distressed about it in any way," she said, cheerfully.

"She arranged with the—well, the purchaser that the men will come for it about half after five in the afternoon. The days are so short now it's really quite winter."

"Oh, yes," he agreed, moodily. "So far as that goes I don't suppose our neighbors are paying much attention just now, though I hear Sheridan was back in his office early the morning after the funeral."

Mrs. Vertrees made a little sound of commiseration. "I don't believe that was because he wasn't suffering, though. Mary told me he seemed wrapped up in his son's succumbing. He isn't vulgar in his boasting, I understand; he doesn't talk a great deal about his—his actual money. No, his bragging usually seemed to be about his family and the greatness of this city."

"Greatness of this city!" Mr. Vertrees echoed, with dull bitterness. "It's nothing but a coal hole. Of course Sheridan says it's great."

Mrs. Vertrees seemed unaware of the subtext. "I believe," she began, timidly, "he doesn't boast of—that is, I understand he has never seemed so interested in the—the other one."

Her husband's face was dark, but at that a heavier shadow fell upon it; he looked more lugubrious than before.

"The other one?" he repeated, averting his eyes. "You mean—you mean the third son—the one that was here this evening?"

"Yes, the—the youngest," she returned, her voice so feeble it was almost a whisper.

And then neither of them spoke for several minutes. Nor did either look at the other during that silence.

At last Mr. Vertrees, contrived to cough, but not convincingly. "What—what was it Mary said about him this afternoon? I didn't ah—happen to catch it."

"She—she didn't say much. All she said was this: 'It's the most wasteful creature I've ever known.'"

"Well?"

"That was all. He is wasteful-looking; and so frugal. If I hadn't known about him I'd have thought he had quite an interesting face."

"If you hadn't known about him?"

Known what?

"Oh, nothing, of course," she said, hurriedly. "Nothing definite, that is. Mary said decidedly, long ago, that he's not at all human, as we thought at first. It's only—well, of course it is odd, their attitude about him. I suppose it's some nervous trouble that makes him—perhaps a little queer at times, so that he can't apply himself to anything—or perhaps does odd things. But, after all, of course, we only have an impression about it. We don't know—that is, positively. I—"

She pushed them went on: "I didn't know just how to ask—that is, didn't mention it to Mary. I didn't—"

"The poor lady floundered pitifully, concluding with a mumble. "So soon after—after the—the shock."

"I don't think I've caught more than a glimpse of him," said Mrs. Vertrees. "I wouldn't know him if I saw him, but your impression of him is—"

He broke off suddenly, springing to his feet in agitation. "I can't imagine her—oh no!" he gasped. And he began

to pace the floor. "A hawk-eyed epileptic!"

"No, no!" she cried. "He may be all right, but he's—"

"Oh, it's horrible! I can't!" He threw himself back into his chair again, sweeping his hands across his face, then letting them fall limply at his sides.

Mrs. Vertrees was tremulous. "You mustn't give way so," she said, implored for once almost to direct discourse. "Whatever Mary might think of doing, it wouldn't be on her own account; it would be on ours. But if we should—"

should consider it, that wouldn't be on our own account. It isn't because we think of ourselves."

"Oh, God, no!" he groaned. "Not for us! We can go to the poorhouse, but Mary can't be a stenographer!"

Shedding Mrs. Vertrees resumed her obsequiousness. "Of course," she murmured, "it all seems very premature, speculating about such things, but I had a queer sort of feeling that she seemed quite intent on this—"

bad—allow—said—this—this—"

but checked herself. "In this young man, it's natural, of course; she is always so strong and well, and he is—"

he is—rather appealing to the—the sympathies."

"Yes!" he agreed, bitterly. "Precisely. The sympathies!"

"Perhaps," she faltered—perhaps you might feel easier if I could have a little talk with someone?"

"With whom?"

"I had thought of—not going about it too brusquely, of course, but perhaps just waiting for his name to be mentioned, if it happened to be talking with somebody that knew the family—and then I might find a chance to say that I was sorry to hear he'd been ill so much, and—"

Something of that kind perhaps?"

"You don't know anybody that knows the family?"

"Yes. That is—well, in a way, of course, one of the family. That Mrs. Roscoe Sheridan is not a—that is, she's rather a pleasant-faced little woman, I think, and that's rather ordinary. I think she is interested about—that is, of course, she'd be anxious to be more intimate with Mary, naturally. She's always looking over here from her house; she was looking out of the window this afternoon when Mary went out. I noticed—though I don't think Mary saw her. I'm sure she wouldn't think it out of place to—to be frank about matters. She called the other day, and Mary must rather like her—"

she said that evening that the cell had done her good. Don't you think it might be wise?"

"Wise?" he didn't know. "I feel that the whole matter is irresponsible."

"Yes, so do I," she returned, promptly. "It isn't really a thing we should be considering seriously, of course. Still—"

"I should say not! But possibly—"

Thus they skirted up and down the field, but before they reached the lights out and went upstairs it was thoroughly understood between them that Mrs. Vertrees should seek the earliest opportunity to obtain definite information from Billy Sheridan concerning the mental and physical status of Bibbs. And if it were subject of attacks of lunacy, the unhappy pair decided to prevent the sacrifice they supposed their daughter intended to make of herself. Altogether, if there were spiteful ghosts in the old house that night, enveloping upon the woeful comedy, they must have died anew of laughter!

(To be continued.)

TWIN FALLS LANDS TOO

VALUABLE FOR FRUIT GROWING

BOISE, Ida.—Martin J. Sweeley, of Twin Falls, candidate for the nomination for state attorney general at the Republican primaries, arrived from Twin Falls, Wednesday and stated that the farmers in that locality would not feel any pinch as the result of damage to fruit by frost.

"Our farmers are uprooting their fruit trees," said Mr. Sweeley. "They have found that their land is too valuable for fruitgrowing. Diversified farming, it has been demonstrated in our part of the country, is much more profitable. Almost every farmer has a few strings to his bow. Cattle, hogs and sheep pay well. The returns from seed raising have been enormous."

"We passed the cheap alfalfa stage long ago. It goes into beef, pork and mutton now. Dairying is a dependable and remunerative feature of our farm life. Silos are going up in all directions and the farmers are growing an abundance of the right kind of silage. We will have enough fruit for home consumption and some to spare but it is no longer an important factor in our farm production."—Statesman.

WEISER MAY HAVE NATURAL GAS SUPPLY

Gas Company's Well Taps Flow That Is Believed To Be Sufficient For All City Uses.

WEISER, Ida.—That the Weiser Oil & Gas company has a well of undoubted commercial value is the conservative opinion of all those best qualified to judge who have visited the well since the last flow was struck at a depth of 420 feet.

About 5:30 Friday morning the pressure had accumulated to such an extent that the cap blew off and residents of that part of town thought another earthquake or some other calamity was at hand. As soon as the pressure became normal drilling was resumed and a few feet further down the present flow was tapped. All at once

the drillers heard a rushing, roaring noise, and a moment later the rush of gas came throwing water, sand and gravel 75 feet or more in the air. This flow was not only much larger than the previous one but the pressure was necessary to let the gas escape constantly. An inch and a quarter pipe has been attached and if the valve on this is closed for only a few minutes the pressure runs up to 80 pounds.

On both Friday and Saturday evening large crowds visited the site of the well and gazed at the big blaze.

B. Kuteil, manager for the company, says that the one well as it now stands will furnish more than enough gas to supply the number of consumers required under the franchise granted by the city and he is confident that a greater supply is so far distant. But even if this should not be true a half dozen wells like this one would not only supply the city for domestic purposes but also an adequate supply for manufacturing purposes as well.

B. Kuteil,

S-RANKIN DREW AND VIRGINIA PEARSON IN THE HUNTED WOMAN BY JAMES OLIVER CURWOOD

---The Most Sensational
Drama Ever Produced---
MONDAY AND TUESDAY
ISIS THEATRE

Public Forum

Kaukauna, Wis., May 9, 1916.
The Twin Falls Times,
Twin Falls, Idaho.

Gentlemen: On the editorial page of your issue of April 27th, I find an article headed, "A Crime," which I have perused with much interest, due to the fact that I own 100 acres of land in the Salmon tract and have kept more or less in touch with conditions there since reading the *Hollister Herald* and later your good paper.

I feel that you deserve great praise for displaying the courage that you do and have been doing in your battle for the entrainment and for fair play, and

while the opinion and views of a non-resident of your section may not have much bearing upon the situation, still I cannot refrain from at least expressing myself and thanking you for your sincere efforts. While I have been moved to the point of writing you a letter on this subject, I am going to take the liberty of giving you an expression of my experience in connection with my Salmon tract purchase.

People from this section were attracted to the irrigated lands through great inducements and promises held out in liberally distributed literature, and many of them not understanding fully the Carey law have assumed that the Carey law was a law in which the federal and state governments safeguarded the public and saw to it that the promises made by the promoters were kept within safe bounds, and that the federal government and the state of Idaho would not palliate anything that would entice people onto the lands and thus leave them to shift for themselves and starve if the promoters saw fit to deprive them of what they contracted to deliver to them.

In July of 1911, I went to Idaho with my entire family for the purpose of proving up on my land, and lived on it during the month of August. My object in taking my family was to get a well-defined thought and feeling that if conditions proved satisfactory in Idaho we thought very seriously of leaving Wisconsin and locating permanently in your vicinity. We felt that this thirty-day residence on the land would afford us a splendid opportunity to determine our future course.

The next thought was, if for any reason the family did not feel favorable to locating in Idaho, after proving up on the land and getting title, we expected fully to be able to get Wisconsin settlers, of a kind that would make a success on the land, to move to Idaho and work the land, as we hoped, with success and profit. But while we were in Idaho we were made aware of the entire condition, due to the non-fulfillment of contracts on the part of the promoters, and we left Idaho very much discouraged as far as the irrigated land proposition is concerned, but with a growing impression of its delightful climate. While we were in Idaho, and in fact while returning to our home state, we were extremely confident that the Idaho state authorities would realize their duty toward the entrainment and see to it that justice was done them.

After the promoters had exploited the project, as it occurred to me in 1911, in the manner that they did, I did not for a minute consider that they would ever show a disposition to give the entrainment what they were entitled to, unless forced to do so by state authorities. It was not until, when Judge Dietrich's decision was rendered I felt that this was merely one stop in the battle. Later, when the good governor of our grand state, with considerable bluster took a whirl through the tract I expected that his cheering words to the entrainment and settlers were sincere and would exert himself to the utmost in their behalf, but subsequent events rather remind me of the great distrust that one sees in your country frequently during the summer, and the governor's trip seems to have done about as much good as those clouds have done to the settlers.

I do not wish to do the governor or any public official an injustice, but when one sees so much bluster and so much bluster for effect and for political gain, as we too often see on the part of officials, one naturally looks with suspicion upon such affairs unless evidence of good faith is forthcoming.

It now looks very much to me as though the promoters are going to considerable expense in litigating the matter in the hope of drying out the entrainment, whereas if they were disposed to do the fair thing and live up to the provisions of their contracts, the money they are spending for litigation they could better use in co-operating with the settlers and

demonstrating to them that they were disposed to establish matters so that the tract would be reduced in acreage consistent with the water available for irrigation and in accordance with the contracts.

It seems to me that the state authorities might at least make an effort to escape, by controlling funds, towards fighting the opposition in the courts. Many people who do not live on their lands do not contribute towards such a fund because they feel that others who should contribute equitably are not doing so and it is unreasonable for the entrainment to expect the residents on the tract to alone carry on the litigation.

Before closing permit me also to state experiences I had while the promoters were undertaking to sell the irrigation bonds. Shortly before my trip to Idaho in 1911, I was repeatedly urged by the buyers of the bonds to take advantage of a free excursion to Idaho for the purpose of inspecting the irrigation properties, and the expense and extravagance in connection with the flotation of the irrigation bonds best explains that. I ever saw in connection with the selling of securities. All of which made me feel that there was a waste of money, reckless extravagance and financial mismanagement. And really the settler who bought the property in the last analysis was expected to furnish the money for all of this enormous expense.

When such matters come to the attention of the public the next question that naturally arises is, how far and to what extent did the promoters really resort? I should like very much to see the state authorities make a thorough investigation of the transaction by undertaking to disclose where and how the proceeds for the bond sales and for the land was disposed of, and I feel that for the benefit and protection of all concerned a thorough investigation should be made on the part of somebody in authority to learn whether there had been any slush money, doodle money or slush-hill in the transactions at the expense of the federal government and the state.

It is not my intention to cast any reflections, but this is a matter of great public interest and the parties concerned should not hesitate in the least about producing the necessary figures, because publicity is what the public of late is demanding, and publicity is what the public is entitled to.

Yours very truly,
FRANK F. BECKER

SOCIETY NOTES

Letters for this department may be mailed, phoned or left at The Times office, Phone 33.

The M. C. B. club met yesterday at the home of Mrs. Solberg.

The Wednesday auction bridge club met last week with Mrs. J. T. Wright, Mrs. Everett Sweeney won the prize for the day, a club upon.

Mr. and Mrs. L. O. Brown presided over a trout dinner party last Monday evening. Covers were laid for Mr. Sulist, Miss Alma Farris, Mrs. Pauline Evans, E. Seahr and Mr. and Mrs. Brown.

On the occasion of his birthday Ernest Gates was the recipient of a pleasant surprise, his wife having invited a few friends to spend the evening. Cards were indulged in and a good time in general was enjoyed. The hostess served refreshments during the evening. Present were: Mr. and Mrs. Cookley, Mr. and Mrs. Wise, Mr. and Mrs. Hart, Mr. and Mrs. Edwards and Dr. and Mrs. Heble.

Mr. and Mrs. C. A. Bulles delightfully entertained the penchelle club last Thursday evening. A delectable four-course luncheon was served and the guests and a color scheme of red and white predominated. Present were: Mr. and Mrs. L. F. Moore, Mr. and Mrs. A. N. Sprague, Mr. and Mrs. Chas. Burton, Mr. and Mrs. H. Skelton, Mr. and Mrs. L. T. Wright, Mr. and Mrs. E. G. Leving, Mr. and Mrs. R. Spafford, and Mr. and Mrs. C. A. Bulles.

Complimentary to Miss Beadie Joyce of Chicago, Miss Fannie Hart was hostess to a large number of friends Tuesday evening at her home on Tenth avenue north. Dancing occupied the evening and delightful refreshments were served by Miss H. J. Hall. Clever little hand-painted programs were used. Dainty refreshments were served at the close. Present besides the hostess and guest of honor, were Misses Marguerite Putnam, Margaret Wilson, Fern Costello, Alma Benoit, Lesley Williams, Gladys Dwight, Vivian Conover, Thelma Conover, Carmen Cox, Vesta Thomas, Mildred Conway, Grace Barger, Bessie Joyce, Miss Margaret Wilson, and Messrs. L. H. A. Benoit, H. F. Fildoff, D. Girdner, L. Epler, M. MacDonald, Eugene Hart, Z. North, D. H. Woodin, A. Wallington, E. F. Taylor, D. Greaves, Kathryn Green, Mr. and Mrs. C. B. Hogg and Mr. and Mrs. Wm. Wagner.

ADVERTISED LETTER LIST.
Letters remaining uncollected for in this office after ten days will be forwarded to the dead letter office at Washington, D. C.

F. M. Anderson, Dewey Anderson, Frank Birtowsky, Mr. and Mrs. Sam Bright, W. M. Brewer, Irwin Fred Carson (2 letters), A. B. Cammish, Harry N. Davis, Frank Eadom, Joseph Garfield, W. M. Holt, M. T. Heath, Doc Lathrop, Frank L. Taylor, Fred Nulmer, A. E. Pettigrove, O. W. Reagan, Mrs. Veda Rudge, Mrs. J. Smith, Elton E. Sparks, Miss Beulah Stevens, O. C. Taylor, G. W. Wheelock (Reg. letter).
May 15, 1916.

DR. EVANS, THE OPTICIAN, WILL GO TO JOHNSON NEXT TUESDAY noon to attend his patients who have eye trouble, and will stop at Collier's Wednesday afternoon, May 15. Dr. Evans' frequent visits to these towns give the people in that section a chance to have their eyes tested without coming to Twin Falls. Adv.

CLUB WOMEN ENJOY MEETING AT POCATELLO

Eighty-Six Delegates Present, Including Six From Twin Falls—Special Program Rendered.

The sixteenth annual meeting of the first district federation of women's clubs of Idaho was held in Pocatello last week. Eighty-six delegates were present at the convention, including six members of the Twentieth Century club of Twin Falls, namely, M. J. Sweeney, Schroeder, H. W. Cloucheck and J. E. Cookley.

The business session was well attended, many fine papers read, and numerous problems of vital interest discussed. Mrs. Sweeney read an excellent paper on the subject of "Proposed Sawtooth National Park." The Sawtooth reserve covers an area of 569 square miles and is one of the most extraordinary scenic beauty spots in the country. It is already a national reserve, but is being used chiefly for pasturing, and for this reason the proposal is being fought strongly by the sheep and cattle interests.

The following resolutions were passed: Resolved that this district recommend to the state that the legislative committee be instructed to draft a bill to extend the time of residence in Idaho before applying for divorce; that the legislative committee be instructed to ask the coming legislature for an appropriation sufficient to complete the home already partially built for the feeble minded; that the district recommend to the state board of education for a state tax for the public schools; that they also endorse the bill presented by the board of education for the abolishing of the state superintendent; that each club in the district do one program the coming year to civil service study, location, member, use, and maintenance of all penal and charitable institutions of the state; that the district urge the passage of a state wide or partial civil service bill at the coming legislature; that the district recommend to the state that the legislative committee employ a competent club woman whose business it shall be to watch over, and care for our bills at legislative sessions, and committees that these women work under the guidance of the legislative committee and state president.

Other resolutions followed to the club ladies of Pocatello, who discussed the subject of the "Twentieth Century Club of Twin Falls." During the stay of the Twin Falls women in Pocatello they were the guests at numerous dinners and luncheons given by the Pocatello women, and a most enjoyable time is reported by all. The programs which occupied almost the entire three days were both interesting and

PAPER TO GO STILL HIGHER ITS BELIEF EXPRESSED BY BIG PAPER HOUSE

Powder Companies Buying Big Stock of Country at Fabulous Prices. Fibrous Textures of the Paper Mills. Bombs, Torpedoes, Howitzers and Machine Guns. Newspaper Readers in Germany Have to Give Back Old Papers.

FURTHER INCREASE in the price of paper, with no immediate possibility of an early return to normal conditions, are predicted by Parsons, a publication issued by the Whitaker Paper company of Cincinnati. Explaining the cause of the recalcitrance, it says: "Cellulose is the fibrous matter that is the basis of all kinds of paper. This substance is produced commercially from cotton and then rags and from wood pulp. Millions of tons of cellulose are required annually to supply the requirements of the paper mills of the world.

"In normal times 60 per cent of the rags and 40 per cent of the sulphite used for the manufacture of paper in the United States is imported from foreign countries. "But cellulose is also the basis of modern high explosives.

"The Dupont powder mills have installed an enormous battery of beaters having a capacity vastly greater than the capacity of any paper mill in the United States. They are paying fabulous prices for raw stock and commanding the first choice of rags from all over the country.

"What in normal times would be fibrous texture of fine papers is now being converted into ammunition for bombs and torpedoes and howitzer and machine guns.

"Germany has confiscated the entire supply of raw materials for the manufacture of paper within the confines of her empire. Even the wood pulp of Germany is now being converted into explosives, sparing only enough for the manufacture of such amounts of paper as are absolutely essential for domestic requirements.

"The government of Germany has fixed the price limit which the publishers of a newspaper in the empire may not exceed. The German resident who would buy a daily paper can do so only on condition that he surrender the paper of the day before to be returned to the paper mill, cleaned and converted again into stock for the publication of future issues.

"England, in time of peace, exports coal to Sweden and balances the account by importing Swedish pulp. But with the outbreak of the great war the British empire needed all her fuel supply to operate her munition plants and warships.

"Sweden, in retaliation, has refused to ship pulp to Great Britain, and owing to her shortage of coal and the dangers and difficulties of ocean traffic, she is now shipping very little pulp to the United States.

"South America, Central America, Australia, India, Africa and many of the European countries, finding their usual sources of supply closed, to them, clamor to the United States for relief and find that our stock of raw material is so nearly exhausted that we can no longer produce enough paper to meet the requirements of our own people.

"The god of war has not only appropriated the wood pulp and cotton essential to the manufacture of paper, but he has also claimed for his destructive purposes the bulk of available chemicals of scarcely less importance.

"Bleached sulphite (wood fiber) that formerly sold for \$2.50 per hundred weight, now commands as high as \$4.50 per hundred weight. Hiller powders that commonly sell for \$1.00 more than a cent a pound are unobtainable even at 15 cents. Soda ash, rosin, stic white, caustic and alum have doubled and tripled in price. Aniline colors that the paper manufacturer commonly buys for 40 cents per pound are now difficult to obtain even at \$2.00 per pound.

"Every article that enters into the production of paper has advanced in price and is still bound to advance to even higher prices. Labor, now feeling the stimulus of war orders, commands more than the same grade of labor could command before the war.

"There is no immediate possibility of a speedy return to normal prices. With the curtailment of production of raw materials and the artificial demand for cellulose for the production of high explosives, paper must continue to advance in cost. Even the termination of hostilities will not restore normal conditions until after sufficient time had elapsed to permit industry to return to normal conditions and to allow for the manufacture of enormous reserve stock.

"To the printer this all means the urgent necessity of advancing his prices in proportion to the general advances in the market. Paper already purchased and held in stock should be valued at today's price because it cannot be replaced for less."

of St. Anthony.
Corresponding secretary, Mrs. J. L. Cookley, Twin Falls.
Recording secretary, Mrs. Snyder, of Springfield.
Treasurer, Mrs. Green of Mackay.
Auditor, Mrs. Axline of Albion.

WATER TO GO STILL HIGHER IN BELIEF

Water to go still higher in belief, according to the report of the state engineer, who has just received a report from the Snake River project. The report states that the water level in the Snake River is still higher than it was a few days ago, and that the water is still rising. The state engineer has issued a warning to the people living along the river, advising them to be prepared for a possible flood. The water level in the Snake River is still higher than it was a few days ago, and that the water is still rising. The state engineer has issued a warning to the people living along the river, advising them to be prepared for a possible flood.

FAIR GROUNDS ARE SURVEYED AT FILER

The fair grounds at Filer, Idaho, are being surveyed by the state engineer. The survey is being conducted by a team of engineers and surveyors, who are working to determine the exact location and boundaries of the fair grounds. The survey is being conducted in order to prepare for the construction of a new fair building. The survey is being conducted by a team of engineers and surveyors, who are working to determine the exact location and boundaries of the fair grounds.

JACKSON LAKE DAM TO BE COMPLETED IN JULY ACCORDING TO REPORT

The Jackson Lake dam is expected to be completed in July, according to a report from the state engineer. The dam is being constructed by the Snake River project, and is expected to provide a large amount of water for irrigation. The dam is being constructed by the Snake River project, and is expected to provide a large amount of water for irrigation.

THE MOST SENSATIONAL

The most sensational story of the week, as told by the state engineer. The story is about a man who was found dead in a field. The man was found by a group of people who were out for a walk. The man was found by a group of people who were out for a walk. The man was found by a group of people who were out for a walk.

Why You Should Own a Maxwell

Comfort
First, because it is a comfortable riding car. Plenty of room for five people; deep, soft cushions; springs made of the best spring steel. Scientifically heat-treated, accurately suspended and balanced. You will always be comfortable in a Maxwell.

Appearance
Second, because the Maxwell is a trim, smart, good-looking car. Many makers of heavy, high priced cars, as you know, have copied the general lines, the shape of the body and hood of the Maxwell. This is more of a compliment than an infringement.

Service
Third, because the Maxwell, being a product of thirteen years' evolution, is so designed and manufactured that it gave unfailing, consistent and satisfying service to thousands of owners. Maxwell cars are made of the best materials that money and brains can buy—and they are made right. You can get out of any car only what is put into it.

Low First-Cost
Fourth, because you get everything in any car and you get it for less money. The answer to this is that the Maxwell is a light car and it is built in enormous quantities. The Maxwell Co. is one of the three largest producers of high grade motor cars in the world.

Low After-Cost
Fifth, because the Maxwell will give you more miles per dollar than any car built. We say this without hesitation or doubt. It is our honest belief and we are willing to prove it by Maxwell owners' comparison with any other car or by any other way you suggest or prefer. The Maxwell will please you. We know it. We will let you arrange for a demonstration and we will take the responsibility of satisfying you completely.

LABORERS WARNED AWAY FROM CANADA

Labor Department Says Dominion
Is Crowded

AMERICAN WORKMEN FORBIDDEN
TO ENTER BY COUNCIL

Those Who Go In Violation of
Order Urged to Join Army in
Europe.

That the reports circulated through the advertising-columns of several thousand newspapers in this country, to the effect that there is a great demand for harvest hands in Canada, is wholly false, that the labor market there is already so overcrowded that legislation has been enacted in several Canadian provinces to keep workmen out; that workmen going there in violation of these laws and finding themselves stranded will be urged to join the British army fighting in Europe and that instead of going abroad where work is scarce, the thing an unemployed laborer should do is to make application on a blank through the postoffice to the nearest zone where employment can probably be found for him, is the information given out by the labor department in a circular issued and widely circulated throughout the country.

R. E. Mansfield, United States consul general at Vancouver in a report says:

"There is no demand for mechanics or laborers in this part of Canada, and I have to recommend that this fact be made known through the press in the United States, as a means of warning American citizens against coming to British Columbia with the expectation of securing employment of any kind. There are in Vancouver more than one thousand unemployed, and that many able bodied men in this province are dependent upon public charity for the reason that they are unable to obtain employment."

Special efforts are being made to induce every foreigner of military age residing in this province, to enlist for overseas service, and it is practically impossible for an American citizen to secure employment in any capacity. I enclose a copy of a letter from the Dominion Immigration agent at Vancouver, dated March 21, 1916, advising that the order in council prohibiting the entry into British Columbia of artisans, laborers, skilled and unskilled has been renewed for a period of six months. This order in council was passed at the demand of organized labor, because of the great number of unemployed in all branches of industry in this province.

P. V. Powderly, chief of the division of information of the labor department adds:

"At the present time there exists no necessity for an American to leave his own country for the purpose of obtaining employment elsewhere, for all that will be necessary for him to do will be to obtain one of the blank forms of the division of information at the nearest postoffice, thereon make application for such position as he is fitted for, and return the same to zone headquarters."

CANDIDATE CROP NOW COMING UP

(Continued from Page 1.)

readily admitted that way. This seems to be all the aspirants for this job in the Republican ranks whose names are known as A. R. Hicks of Twin Falls, is understood to be inclined to refuse a renomination, and the attitude of J. W. Paris of Dubi, is unknown.

For the office of county superintendent of schools, Bertha Noel is understood to be in the field for renomination and as her administration has been harmonious and progressive, her unanimous choice by the Democratic voters is anticipated. Two Republicans are already in the field. One of these is Miss Brittonart Wolfe of Twin Falls, and another, Jesse A. Hensley, of Hunsen.

For sheriff it is assumed that Frank M. Kendall will allow his name to go before the primaries for a second term. He is busy chasing the evidences and has not taken time to announce as yet, but in such cases it is

RINER SISTERS TO PRESENT COMEDY PROGRAM

Chautauqua Patrons to See Famous Comedienne in "Joy Day" Program

If you would laugh and laugh long and heartily get a glimpse of the Riner Sisters in action at the Chautauqua, and if you have a care of "hills," no matter how bad, they will drive them from you like sunshine after an April shower.

The Riner Sisters are funmakers, and they are full of clean fun and humor. They live for the joy of it all, and they make you feel the same way. If you would forget all cares and laugh, laugh, laugh, come to Chautauqua and hear the Riner Sisters.

taken for granted that "alliance given consent." The name of C. H. Taylor has been mentioned—in connection with the place, but whether he has heard of the matter himself or not, or whether he would consider it is unknown at this time. On the Republican side Henry Olson, J. A. Gallier and A. P. Truesdale all have hats in the ring.

For prosecuting attorney John E. Davies is supposed to be willing to succeed himself, while Ed Kenney, also a Democrat, is thought to have heard the buzzing of the bee. Attorney Stephen of this city and W. R. Green of Buhl, are said to be anxious to be after the Republican nomination.

Harvey Coggin seems to be the only man suggested for the position of county treasurer so far by either party, but on the Republican side one or two or three will likely get into the race before September.

F. H. Karl, has announced on the Democratic ticket, and J. F. Denny is spoken of. John F. Hansen, the Rock creek U. S. commissioner, and George Wilcox, who is now deputy assessor, are in the field for the Republican nomination.

Judge A. W. Ostrom of Buhl, is generally considered a candidate for probate judge by the Democrats, though he has not said so specifically. O. P. Duval is mentioned for the Republican nomination.

And then there is the commission-ership. Chairman Carlson has indicated that he will not run again, but his friends say they will not take no for an answer. Dr. D. P. Albee is believed to be in the hands of his friends and not long gone. John B. White and H. U. Davis, the former an auto man, and the latter a contractor, both of Twin Falls, are also mentioned in connection with the Democratic nomination. It is assumed that T. E. Moore will get a Republican nomination unanimously. O. P. Senator of Twin Falls, also spoke of in connection with this place on the Republican ticket.

PROVIDES FOR TOURING IN YELLOWSTONE PARK

Regulations Cover All Phases of
Motoring; Brakes, Gears, Horns,
Speeds, Penalties, Etc.

Detailed information is given in a circular just issued by the department of the interior governing the use of pleasure automobiles in the national Yellowstone park. Only "such automobiles as are operated for pleasure and not those carrying passengers who are paying, either directly or indirectly, for the use of the machine," will be permitted to enter the park. The regulations include a schedule for leaving and arriving at the various points of interest, and no auto is permitted in the park except between the hours indicated; this arranging travel in the park so that visitors will not have to pass motor-driven vehicles.

The horse has the right of way, say the instructions, and the gasoline invention must at all times take the worst of it. The autos must take the outside of the road on all hills and dangerous grades, irrespective of the direction in which they are traveling. If a blow out occurs, or some other trifling accident which stops the way, the party must stay where they are until the hour next scheduled for auto travel comes around, which is usually about six hours later.

The horse in Yellowstone park maintains a dignity that has lost to other sections, and Uncle Sam is securing for it all of its inherent rights. Some of the more important of the regulations follow:

Motorcycles: Motorcycles are not permitted to enter the park. **Tickets of Passage:** Ticket of passage must be secured and paid for at the checking station where the automobile enters the park. This ticket must be conveniently kept, so that it can be exhibited to park guard on demand, and must be surrendered at the last checking station on leaving the park. Tickets of passage will show (a) name of owner, (b) license number of automobile, (c) name of state issuing license, (d) make of machine and manufacturer's number, (e) name of driver, (f) seating capacity of machine, and (g) number of passengers.

Fees: Fees are payable in cash only, and will be as follows: \$7.50 for a single trip through the park, and \$10 for the season. All permits will expire on October 1 of the year of issue. **Muffler Cut-outs:** Muffler cut-outs must be closed while approaching or leaving riding horses, horse-drawn vehicles, hotels, camps, or soldier stations.

Distance Apart—Gears and Brakes: Automobiles while in motion must not be less than 50 yards apart, except for purposes of passing, which is only permissible on comparatively level and slight grades. All automobiles, except while shifting gears, must retain their gears constantly engaged. Persons desiring to enter the park in an automobile must be required to satisfy the guard issuing the ticket of passage that the machine in general, and particularly the brakes and tires, are in good condition.

Gasoline: Gasoline must be carried in the tank, and there is sufficient gasoline in the tank to reach the next place where it may be obtained, and carry two or three. For this purpose, all drivers will be required effectively to block and add the rear wheels with either foot or

CLOTHES ECONOMY

Look at it this way: A suit purchased here at \$25 will not sag or bag because the sag and bag has been shrunk out of the fabrics, inside and out. It will not lose its style for that has been tailored into it by experts. It will satisfy because of its stability.

\$25 is only a few dollars more than cheap clothes cost. A \$25 suit will outwear a cheap suit two to one; it will outwear a cheap suit four or five to one... True Economy always looks beyond the purchase price.

Kuppenheimer Clothes

Are spoken of as greater values. Men who buy them and wear them, come back and duplicate their purchases each season in the season's latest styles.

\$18, \$20, \$25 or \$30

JENKINS & CO.

GOVERNMENT ISSUES BULLETIN REVIEWING

DON BARK'S DUTY OF WATER EXPERIMENTS

Extensive Tests in Idaho Indicate, Says Bark, 2 1/2 Acre Feet to Be Usual Amount Giving Maximum Results Under Average Conditions. Finds No Limit to Use of Water Applied to Alfalfa. When and How Much to Use.

Under conditions such as prevail in Idaho on a normal project with medium clay loam, irrigated land about 75 per cent of the irrigation project is profitable from a business point of view, to use depends upon the relative cost of land and of water and other local economic conditions.

With potatoes, it is found that there is a strong tendency for the yield to increase with the supply of water. The rate of increase, however, grows smaller as the quantity of water was increased, and on clay loam soils it probably will not be advisable to apply more than 2 or 2 1/2 acre feet per acre to the crop.

The report also deals with the question of the proper quantity of water to apply at each irrigation. An unavoidable loss from evaporation invariably occurs during and immediately after irrigation and it is, therefore, desirable to have no more applications during the season than are required to maintain the needed moisture content in the soil. Investigators found that the amount of water applied at one application is the correct quantity. Imperious soils should be so manipulated that they will absorb the smaller amount of water applied on the porous soils large irrigation heads should be used. On these porous soils very little can be accomplished with small heads of water because the water is absorbed so rapidly that it can not be forced over the field. The average size of the irrigation head over the greater part of Idaho seldom exceeds 1 to 2 acre feet. On the porous soils, the use of heads three or four times this size, it is said, will give a much higher efficiency.

In conclusion, the report points out that the determination of the proper supply of water for an irrigation project is a very serious problem. If too little water is allotted, the yields will be quite small and the lands will never reach their highest possible value. On the other hand, if too much water is allotted, the excess supply is almost invariably used and the irrigated lands may deteriorate rapidly through waterlogging. Moreover, if a water is diverted from use elsewhere and the ultimate area of irrigated land thus reduced. In determining the amount of water to be used, other factors than the maximum yield must also be taken into consideration. The cost of the land, the cost of the water, and the value of the crops produced are all important considerations. There are few cases in which the increased yield is proportionate to the quantity of water used.

hand brake, or such other brakes as may be a part of the equipment of the automobile. Gasoline can be purchased at regular supply stations as per posted notices.

Speeds: Speeds must be limited to 12 miles per hour ascending and 10 miles per hour descending steep grades, and to 8 miles per hour when approaching sharp curves. On "good roads with straight stretches and when no team is nearer than 200 yards, the speed may be increased to 20 miles per hour. Horses must be sounded at all curves where the road can not be seen for at least 300 yards ahead, and when approaching teams or riding animals.

Teams: When teams, saddle horses, or park trains approach, automobiles will take the outer edge of the road way, regardless of the direction in which they may be going, taking care that sufficient room is left on the inside for the passage of vehicles and animals. Teams have the right of way, and automobiles will be backed or otherwise handled as may be necessary so as to enable teams to pass with safety. In no case must automobiles pass animals on the road at a greater speed than 8 miles per hour.

Penalties: Violation of any of the foregoing or general regulations for government of the park will cause revocation of ticket of passage, and in addition to the penalties heretofore indicated will subject the owner of the automobile to any damage occasioned thereby, immediate occupation from the reservation, and the cause for refusal to issue new ticket of passage to the owner without prior sanction in writing from the secretary of the interior.

Accidents: When, due to breakdowns or accidents of any other nature, automobiles are unable to keep going or to reach the next stopping place on time, they must be immediately parked off the road, or where this is impossible, on the outer edge of the road, and wait until the next schedule for automobiles past that point, or until given special permission to proceed by park guards.

Let Us Print Your Sale Bills

ROBINSON'S

Shirt Talk

There are usually three qualities of Percale used in Men's Shirts of the better kind. The cheaper grade is used in the kind that sell for a dollar. The next grade goes in the \$1.25 kind, and the better grade in the shirt that sells for a dollar and a half. I have a line of well made, good fitting shirts, made from the better grade of percale, that we sell at one dollar each or three for \$2.75. Good patterns. Good colors. Coat Style. Really very splendid value.

P. S.—A new line of Sport Shirts and Sport Ties just in.

Edward Robinson
