CONTRACT LET FOR NEW LIGHTING SYSTEM TO GO INTO EFFECT

Ten Times as Much Reservoir Capacity and Six Times as Much Candle Power Lights For City.

At the city election Monday for the purpose of voting on the water works improvement bonds, little interest was taken in the election, and there was probably a smaller vote cast than at any other former city election, says the Buhl Herald. The vote was practically unanimous for issuing the \$11,000 bonds, and the people seemed to take it as a matter of course and not of improvement. Four votes were cast against issuing the bonds, three in precinct number 1, and one in precinct number 2. A total of sixty-five votes were cast.

The voting of the \$11,000 bond issue authorizes the city council to proceed with the needed improvement on the city reservoir. The present reservoir will be enlarged to eight or ten times the present capacity, and a better method of filtration will be installed. The amount of the bonds will not permit the installation of a modern filtration plant, though the council expect to furnish clear water, and a more permanent supply than heretofore.

A contract was left for the new lighting system which the city council adopted about three weeks ago, and new and greater candle power lights will be put on every street and corner of the city. The old lights will be replaced by new nitrogen filled lights, and each will be suspended over the center of each street crossing. The lights will also be placed so the leaves of the trees will not hide them.

In all, the number of lights for the city will be increased about five or six times. They will extend throughout the entire length of Broadway from the Burley corner to the opposite end, and on Main street to the corner. Outside the city limits the lights will be placed at intervals of about a block apart. One will be placed in front of the high school building. It is said that Buhl will be one of the best lighted cities in this part of the state when the new system has been put in.

DEAR HAY PREDICTED BY STATE EXPERT

Head of Wheat Growers' Association Says Hay Crop Is Better Here Than Elsewhere in Idaho

That the hay crop on the Twin Falls tract is the best that has been seen either in this state or in Utah and that the scarcity of feed elsewhere will result in making prices high, was the statement made Tuesday by J. W. Sessions, of Pocatello, president of the Idaho Wheat Growers' association and instructor in the technical institute at Pocatello, who was here with V. P. Ewert, state seed analyst of Idaho. The men were on a tour of inspection through the wheat and seed fields of the state and had just arrived from a recent when interviewed. They went from here to Buhl, where Mr. Sessions conferred with Gustav Kunze, president of the Idaho Dairyman's association, in regard to arranging time and place for holding the meetings of the two associations in the same city.

Mr. Sessions said that hay was already \$15 a ton in Pocatello, owing to the shortage in Utah and parts of Idaho.

Where Years Mean Money

Farm machinery wears out soon enough even with the best of care. You don't care to replace it any sooner than is absolutely necessary, for it represents a big outlay of money.

The one best way to get all the good out of your machines is to provide plenty of shelter for them. The first cost of a suitable shed is a small item and the saving is worth while.

Whether you need a new shed or just an addition, build now and add years to the life of your equipment.

The quicker you get your shed started, the quicker it will start saving you money.

JARBIDGE PUTS ON METROPOLITAN AIRS

LONG HIKE TAKE PLACE AMONG LEADING MINES OF NATION.

Golden Sunset, Surprise and Starlight Properties Make Fine Showing—Two Auto Accidents Occur.

(Special To The Times)
JARBIDGE, Nev.—The camp is taking on a very prosperous look, over a dozen of our citizens have automobiles here, and the latest Bonanza Kings have blossomed out with high-class machines and it is very probable that several others of our successful prospectors will soon be purchasing gas wagons. Another sign of the prosperity of the camp is evidenced by the big loads of lumber being brought into town every day from the saw mill at Dave creek. This mill has a contract for the delivery of 165,000 feet of lumber this season. Our town is a long way from the railroad but the trade is becoming of sufficient importance to attract drummers in most all lines of goods.

Not one of the mines were laid off from the Long Hike mine when the property management was turned over to J. M. Means on the first of the month. Mr. Means has been starting up the mine again as fast as he could get it in line and now has all the levels and faces going ahead.

Sixty men at work. The veins are wide so that most of the work is in ore and as the ore is soft the progress is rapid. The ore bodies continue on the different levels and the values are holding out at the high averages. There are some 5,000 feet of development work in this mine on the first level and the ore chute already opened from 400 to 500 feet long, and with a width of six to thirty-six feet. The levels are about 150 feet apart. This shows a great body of ore. The value of the ore runs from \$15 to \$40 per ton, which with the large amount of ore already developed, easily places this mine in the front ranks of gold mines in the whole country.

Bill Carbridge says that he expects to have a mine in the Golden Sunset property, on Bear Foot mountain, that will give the Long Hike a close run for first place. He has a deal on with Montana parties, and with the money to open it and develop it properly, he believes that it will soon make a great showing, as he has found 40 to 50 feet in width of vein matter that shows gold in the pan all the way across.

Molly Duffer's Surprise mine, up under Jarbridge Peak, is showing up more and better ore as he goes in on it. A panning of a piece of ore from this vein about the size of a pea, showed a mass of fine gold and several parties who saw the panning made were unanimous in estimating it to run at least \$2000 per ton.

X. M. Muir has let contracts for one hundred feet of work in the No. 2, No. 4 and No. 5 tunnels on the Success vein, and has also let contracts for the Elk and Shovel veins.

Another crosscut tunnel has been started on the Starlight claim to cut the vein about 350 feet, southward from the lower tunnel. Work is being pushed in both of these tunnels. Some of the best showing ore has come from this vein, with coarse gold in it, and the highest average assay has been obtained across six feet of ore that has been had from any mine in the camp.

A tunnel on the Jarbridge Gold property is expected to cut the vein in a few days.

The new tunnel on the Legitimate is going in rapidly. A blower and a lot of pipe have been brought in to be in readiness as soon as needed.

H. L. Thompson, the dentist who is having all the work he can attend to and is giving very good satisfaction.

Dr. A. A. Johnson, who was recently brought into camp by the Long Hike as mine doctor, has made a very good impression with the people of the camp.

The camp got over the Fourth without any accident, but the other day we had two in one day, a Ford machine broke down coming down the Crispin grade and went off, but fortunately landed against a tree before going down the mountain very far and came out without much damage. A big Overland with a big load of women and children in it ran off the road between here and Paviot and turned turtle and most fortunately no one was seriously injured.

Several auto stages are running between Twin Falls and Jarbridge, making the trip into Jarbridge in one day and returning the next. Auto trucks made the trip from Twin Falls with fast freight in two days.

CAMPING TRAILER SHOWN AT HARDY'S GASOLINE STAND

A pronounced novelty is the camping trailer which was received Monday by Mrs. B. White of the Food Auto Exchange. It will interest those who go camping by auto and yet do not want to leave behind all the comforts of home. The outfit consists of a two-wheeled trailer upon which is secured a water proof top and tent that in a few minutes can be raised and spread by one person, making a complete water proof home with kitchen table, shelves, folding gasoline stove, ice box and two excellent beds, capable of accommodating four people. The trailer is built bearing and rubber tired and when on the road has a capacity of 1500 pounds and will thus carry a large baggage and cool a party of travellers could need. It sells at \$185 here, and the first trailer was delivered to Dr. Pike. It may be seen opposite Hardy's gasoline stand.

SOMETHING STARTED.

The pure water situation looks more encouraging this week. Symptoms indicate that somebody on the city council has succeeded in starting something. While the council as an official body has taken no action, the subject not even having come up for formal discussion at recent meetings; nevertheless it appears that a tacit understanding has been reached by certain members of the council constituting a majority, with the result that the city engineer, James Bybee, has been instructed to commence operations. The initial proceedings will, of necessity, take the form of an investigation of the various sources of water from which the city of Twin Falls can be supplied, to determine the purity of such sources, the possibilities of contamination, the sufficiency of the supply and its availability.

We think that certain members of the city council fully appreciate the seriousness of the water situation; and that these members were sincere in pledging to the voters at the last election, their best efforts to procure for the city of Twin Falls such a water works system as the people have demanded. The complacent attitude that some of the councilmen have assumed since the city succeeded in buying the old water works system for some thirty thousand dollars more than it was worth, on the plea of "saving time," may have been somewhat discouraging to those on the council who make a promise with the intention of keeping it.

In city affairs we believe the announcement made in Tuesday's TIMES by Councilman Smith to the effect that the city engineer would at once proceed with the testing of Rock creek, is at once the most interesting and vitally important information that has been had in many months.

FLUSH OUT THE WHOLE SYSTEM.

In the meantime what shall be said of our present water works system, particularly of the water? Perhaps it would be better to say nothing; and say nothing we certainly would were it not that immediate attention appears to be necessary, and is sadly wanting.

Probably one-fifth of the people of Twin Falls have had at least one very unpleasant experience with the water taps in their residences. It is not pleasant, in drawing a glass of water from the faucet, to observe the floating bits of decayed animal matter in the glass; in one instance we know of a lady drew the entrails of a fish into her water pitcher.

THERE IS NO EXCUSE WHATSOEVER FOR SUCH A CONDITION! Only the admission of ignorance, gross negligence, carelessness or rank incompetence.

The experiences mentioned above are not isolated instances, but common, everyday experiences to which probably at least one-fifth of the residents of the city can testify. The plumbers are always busy cleaning pipes and faucets that have been clogged with the remains of animal matter that has been carried through the water.

NOT ONLY IS THIS CONDITION UNPLEASANT, BUT IT IS FAR FROM APPETIZING. NEITHER IS IT A CONDITION THAT CAN BE EXPECTED TO PROMOTE THE HEALTH OF THE COMMUNITY.

When fish fail to survive on the fluid which is served by the municipal water to the people of the city for drinking water, it is hard to understand exactly how human beings can thrive on it. In the news columns of this issue readers will find an account of what happened to a half-hundred mountain trout in the glass aquarium in the window of a downtown restaurant. The owners of the cafe have kept trout in this aquarium for many months. Friday, shortly after noon, with in a period of fifteen minutes, every trout in the aquarium had been killed. The connection with the city water works system is that the aquarium is connected with the mains in order to secure a constant flow of water through the tank. Apparently some rapid change in the condition of the water is accountable for the result. Only one explanation that is at all satisfactory has been advanced thus far; and that would attribute the cause to the chlorine plant that is used to "disinfect" the city. Chlorine is a deadly poison, is used by hundreds of cities to disinfect water, and when properly handled there can be no danger. The experience of the mountain trout is not reassuring and a vigorous investigation should be instituted by the council at once, and some explanation assigned to the incident, if possible.

IN THE MEANTIME, AS SOON AS A SCREEN CAN BE PLACED AT THE INLET INTO THE WATER WORKS SYSTEM, A CREW SHOULD BE PUT ON THE JOB AND THE ENTIRE SYSTEM GIVEN A THOROUGH FLUSHING THROUGH FIRE HYDRANTS AND ANY OTHER OUTLETS. THE WATER WORKS DEPARTMENT SHOULD ENLIST THE CO-OPERATION OF THE CITIZENS SO THAT THE FLUSHING CAN INCLUDE THE PLUMBING TO AND IN RESIDENCES AND PLACES OF BUSINESS. IN ORDER THAT THE ENTIRE SYSTEM MAY BE CLEARED AS EFFECTUALLY AS POSSIBLE.

It should be done at once.

"CONFERRING" WITH THE LAND BOARD.

It did not take the manager of the Salmon River Land & Water Company long to get to Boise after the settlers had unanimously adopted the petition for the cancellation of the state contract. From Boise papers we learn that he is "conferring" with the Land Board about the matter. Advising them, no doubt, how disastrous to the settlers such an action would be. In connection with an interview with the gentleman, the Statesman says the settlers want the tract reduced to 45,000 acres; whereas no specific acreage is designated in the petition to the Land Board, although the company's manager knew very well that probably not one man who signed the petition would agree to any such amount; that as a matter of fact, it would be difficult to get a majority of the settlers to agree to 30,000 acres. This gentleman has been singularly successful in the past in keeping the Land Board misinformed on Salmon matters. We are wondering what fruit his present effort will bring forth.

HE SHOULD WORRY.

Mayor Sweeley, we are informed, has added to the equipment of his law office, a water fountain designed along most modern patterns, and calculated to deliver into neat sanitary paper cups, clear, cool DISTILLED water.

"DEAN OF SCREEN" DIES IN UNCOMFORTABLE WAY

Charles Kent, the "dean of the screen," who has died more times than any other actor in showbiz, again, in a love affair with a director. Behind his life in "The Vital Question," rise, and also a candidate for the five-part feature. This time, however, he found it more uncomfortable

to die than ever before, for he had to hold his head in one position for many minutes.

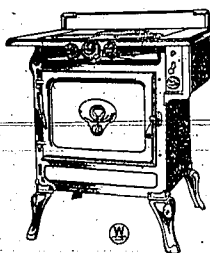

In "The Vital Question," Mr. Kent portrays the character of Rudolph King, an old man who has had some "ahead" business deals, but hopes to cover them up with the assistance of a clever and young lawyer. The "Vital Question" rise, and also a candidate for the five-part feature. This time, however, he found it more uncomfortable

him to take the case, telling him he gave him an interest in his business. The young lawyer, refusing to do anything that is not perfectly legitimate, turns him down, and King is in a quandary as to what to do. Scarsdale is the only man, who could help him out of his difficulty, and when he returns to give him assistance, King does not know which way to turn. On the eve of the investigation, rather than go to jail, he shoots himself, and we see him fall into a chair, his bloody head hanging over the back. It was in this position that Kent had to remain so long. As mentioned before, Mr. Kent is used to dying, but says:

"The next time I am supposed to die, I will try and arrange a more comfortable fall, or fix it so that my earlier life in the picture will allow me to pass away on a nice soft bed, which most photographers of clean lives are permitted to do. For every time anyone mentions 'The Vital Question,' I can feel an awful rush of blood to my head followed by an awful pain."

"THE SPELL OF THE YUKON"

AT ISIS FRIDAY AND SATURDAY

Arthur Hoops, whose appearance in Metro pictures is always received with interest, will next be seen in the supporting cast of Edmund Breese in "The Spell of the Yukon," a wonderful play based on the poem of the same name by Robert W. Service, when it comes to the Idaho theatre on Friday and Saturday. Mr. Hoops supported Mr. Breese in "The Song of the Wagoner," another screen adaptation of one of the Service poems. As is often the case among players, the best of friends are required to be the most deadly enemies for stage purposes. Mr. Hoops and Mr. Breese in "The Spell of the Yukon," are opposed as the wealthy factory owner, "Albert Temple" and the diamond-in-the-rough, "Jim Carson." Others in the cast of this photo-dramatization of the Robert W. Service poem, are Christine Mayo, Evelyn Brent, "Billy" Sherwood, Frank MacArthur, Joseph S. Halliday, Jacques Suzanne, Mary Reed, Harry Morelle and Baby Vulture. The picture was directed by Burton King and produced by the Popular Play and Players.

JAPANESE PRODUCTION

AT IDAHO THEATRE

Sensae Hayakawa, the noted Japanese actor, will be seen at the Idaho theatre on Monday and Tuesday in the Jesse L. Lasky production of "Alien Souls," a thrilling photo drama, written especially for him by Hector Turnbull, author of "The Cheat," in which play Hayakawa established himself as one of the most distinguished actors of the day. It is a Paramount attraction.

and young American—how she is finally brought to realize that the cost and the weight can never meet, is graphically shown in a number of thrilling and unusual scenes.

The production was made for the Lasky company under the direction of Frank Reicher and is considered one of the most valuable and beautiful of the many splendid productions by that company.

The photography is of a little more than the usual Lasky excellence, and according to reports, "Alien Souls" will create a sensation when presented here.

Twin Falls will be one of the few Idaho towns represented in this meet. Boise will not have any of her crack shots present at the meet.

Washington Case Heard—The preliminary hearing of the George Washington case in which Washington is charged with shooting a man named McCallum at Rogerson last May, was held Tuesday before Probate Judge Ostrom, who took the case under advisement. From the evidence submitted it was difficult to determine who fired the first shot.

Has Runaway—J. F. Walter, commercial agent for the Electric Investment company, figured in a runaway accident Tuesday afternoon when the team he was driving to the sugar factory became frightened at a line getting caught under the end of a wagon tongue and bolted. Mr. Walter was thrown out and received several, though not serious, bruises.

Two-In-Killie Mix-up—Claiming to have been assaulted by two Mexicans armed with knives Sunday night on Second avenue, two young men named Drickey and Hansen were taken in charge by Officers Hamm and Taylor and taken to the P. and S. hospital where they were given surgical attention, several stitches being necessary to close up the wounds. No trace was found of the alleged assailants.

East Is Dry—That crops are being burned by bitter heat in the Mississippi valley, is the statement of H. O. Anderson, who with his wife, returned a week from a six weeks' visit to Illinois, Kansas, Missouri, Iowa and Oklahoma. The heat was so great that it raised great blisters on his arms. May is good and small grain short in the region named, according to Mr. Anderson. Corn is practically destroyed. Mr. Anderson went for his health and the trip helped him. He says that there has been little political talk in the places visited, but that the people there speak favorably of Wilson.

Bybee Files For Survivor—Monday James A. Bybee, a Twin Falls pioneer, was placed in nomination as county survivor, it being the fourth time that his name has appeared on the Democratic ticket for that office. Mr. Bybee has held the office of survivor since 1910, and at the last elections had no opposition. Once he received the nomination on two tickets, and had to elect as to which he would accept. Mr. Bybee being a Democrat, stayed with his ticket. He has worked in this section of the state for 13 years. Mr. Bybee is also city engineer of Twin Falls, and is at present engaged in investigating water sources for a pure water supply for the city.

ALL MARKETS STEADY AT PORTLAND YARDS

Light Receipts of Cattle, Sheep and Hogs Bring Steady Prices Last Week.

Tuesday trading in the cattle division was confined almost entirely to feeders and speculators, says the Portland Live Stock Reporter of Thursday. Everything changed hands early at good prices—considering "quality" of stuff. There was a pretty fair demand from various feeder buyers for most any kind of cattle.

As was the cause of the day previous, yesterday was short in the way of receipts, although there was quite active trading. There were a number of cars of feeder stock bought up for shipment east. There was nothing on the market that would attract the attention of killers, but several sales of medium quality stuff were made to small killers at a little better price than it would have realized on Monday's market.

There is nothing doing in the cattle yards today. There is nothing to report side of a string of stock cows. The yards are practically depleted of supplies, the surplus having been taken by feeders the last few days. Considering quality, they sold at very good prices.

The liberal offering of hogs which has been coming to the yards seems to have checked for the present, presumably on account of the harvesting starting, which is taking up the time of the ranchers. There has been only a few mixed lots on the market the last couple of days and sold at steady prices.

Today offerings consisted of but a couple of loads which sold at steady prices. The bulk of hogs sold at \$9.00 and were of fair quality, although there were no choice hogs here since Monday.

Of the few head that have been here each day everything was sold at steady prices. All receipts were in small bunches and bulk was of medium quality only. There is a good demand for choice stuff.

Current quotations are: Prime light, \$7.50@7.75; prime heavy, \$7.75@8.00; good, \$6.50@7.25; common to fair, \$5.50@6.25.

Cow quotations are: Choice, \$5.50@5.75; medium to good, \$5.00@5.50; ordinary to fair, \$4.50@5.50; canners, \$3.00@4.00.

The Refreshing Charm of good tea is in its delicate flavor

Unfortunately, the world is not full of good tea. You must choose with care. Those many women who use Schilling's Best know that the cost of good tea is very, very little. But this is not the only reason for their preference. Another reason—a very real reason—is that each of the four taste-types (Japan, English Breakfast, Ceylon, Oolong) brews tea of indescribable charm.

Send for the Taste Packet which makes it easy for you to find the type of tea that you like best. Contains four parchment envelopes of Schilling's Tea—Japan, English Breakfast, Ceylon and Oolong. Enough for five or six cups of each kind. Mailed promptly on receipt of 10 cents (stamp or coin). Address: Schilling & Company, 333 Second St., San Francisco.

FORD AGENT COMMENTS

ON NEW PRICE REDUCTION

George B. Easley, of Western Auto Company, Is Enthusiastic About New List.

"The new price list for Ford, which went into effect August 1, will cause an even greater demand for the 'little car' than the George B. Easley, manager of the Western Auto Company and Twin Falls agent for the Ford auto, 'and I feel that more of our customers will be coming in this territory than were sold during the past twelve months. Three hundred and ninety cars were sold in Twin Falls and Cassia counties since August 1, 1915, and this number represents the great popularity of the Ford among the people of this territory."

"To assure greater facilities in supplying the Huckleberry district the Ford company has ordered a new distributing branch at Salt Lake and this plant will greatly increase our ability to supply cars on short notice."

"The new price list is a considerable reduction over last year's prices, and this year's new feature is represented in the sale for the first time of the Chevrolet for \$225. The price of \$345 for the runabout shows a reduction of \$45; the touring car at \$360, represents a reduction of \$30; the new car at \$570, a reduction of \$45; the town-car at \$525, a reduction of \$45, and the price of the sedan was lowered \$75."

"Speaking of Ford, a new story has just floated in from Helena, Mont. It concerns W. J. Haley, the Helena Ford agent, and shows how Ford cars sell in the hazy northwest."

"A few weeks ago the business men of Helena took an automobile run of forty miles to the big power dam now under construction on the Missouri river near Wolf creek."

"After a fine chicken dinner and inspection of the dam the two hundred persons of the party made the run home."

"Haley was beating it along at a pretty good clip when he noticed a woman running down through the waving his arms and yelling something. Thinking that there might have been some serious accident for which help was wanted, Haley stopped the car."

"The messenger of apparent bad news ran up to him and said: 'Send me out one of them Ford cars, will you?'"

"Following with a great air of always selling Ford that way, replied 'All right, and the auto was closed."

"Any wonder that it's 'every other car'?"

CRUM WANTS A NEW LAND BOARD PLAN

Says Business Should be Handled by Non-Partisan Board With a Responsible Head.

George C. Crum, of Lewiston, candidate for the Republican nomination for governor, spent several days in this city this week meeting old friends, getting acquainted with new ones and outlining his position on the state issues of the day.

Mr. Crum has some very decided and emphatic opinions as to the manner in which the business of the state of Idaho should be handled. He says there is no difference in principle in public and private business, and there should be no difference in the method of its transaction. In commenting on this, he said:

"We can legislate around the land board and change its personnel from now and then, but it will not remedy the existing evils. The system is wrong and will require a constitutional amendment before the proper method of handling the business can be had. It is impossible for members of the state land board to handle satisfactorily the tremendous volume of business coming before them in the necessarily haphazard manner in which it now has to be handled. Only a very small portion of the time of the members of the land board can be devoted to its business. Every member is also a member of numerous other boards, each of which requires more or less time and consideration."

"The business of the state land board should be handled through a non-partisan board with a responsible head, the members and officials of which should devote all their time to the consideration and transaction of the large and increasing volume of business of the board. At present the responsibility of the board is divided among five members. One member is no more responsible than another. No hundred million-dollar private situation can be successfully managed with the responsibility divided in this manner, neither can the business of a similar institution like the state land board be successfully managed except through a definitely responsible head, and the action of all of the time and attention of those in charge of it to its business."

"If it requires a constitutional amendment to do so, to remedy the evils of the present system and place the business of the land board upon a substantial business basis, why not adopt it? There is no other remedy which will effect a permanent cure."
