

TWIN FALLS TIMES

VOL. XII. NO. 12. TWELFTH YEAR. TWIN FALLS, TWIN FALLS COUNTY, IDAHO, THURSDAY, NOV. 16, 1916. SUBSCRIPTION \$2.00 PER YEAR

ELECTION CONTEST DECLARED POSSIBLE

Evidence of Illegal Voting Not Shown Here

ONE ERROR FOUND AFFECTING ALL—DAVIS GAINS VOTE.

Great Excitement Stirred Up In Other Parts of State Over Alleged Loose Swearing In.

The canvassing of returns in Twin Falls county goes on apace and notwithstanding the statements attributed to Secretary Gregory of the Republican state committee, nothing serious has been found. An error in counting in precinct No. 1 of Buhl, gave ten votes too many to every candidate on both tickets. D. W. Davis has gained one vote on a faulty counting in one precinct. Attorney H. H. Peterson, who represents the Republican county central committee, said today that there was no evidence of fraud. He would not say whether a contest might be held or not. Secretary Stuart Taylor of the Republican county committee said that he did not believe that there was any intentional fraud. There were many bets and some of those who made them on either side might have urged men to vote, without carrying finding whether qualified or not. He had no evidence that they did. Chairman Hicks is watching returns for the Democrats.

To the Prosecuting Attorneys of the Several Counties of the State of Idaho:

Señor: Evidence of the strong belief has reached this office from various parts of the state, that fraudulent evasion and violation of the election laws of the state was practiced at the election held on the 7th. From the information at hand it would seem that a widespread abuse of the privilege of swearing in questionable persons, as permitted by the registration law of 1913, was indulged in. There is nothing more important under our form of government than elections shall be free from fraud and corruption, and that the true will of the people shall be expressed thereat. I therefore request you, to institute, to institute an investigation of your county and report to this office.

When the number of voters in your county that were registered on election day under the provisions of section 4, chapter 52, session laws of 1913. Second—Whether persons so registered on election day were authorized to be registered and to vote under the laws of the state.

It is not intended that this request shall prevent in any way investigations by grand jury or otherwise that you or any of you might feel it good to make in your county or counties. It is only intended to ascertain from these reports the extent of the fraud, if any, whether spontaneous or organized, as only in this manner it seems can the real seriousness of the situation be adequately determined. Please give this matter your immediate attention.

With personal regards, I am, Yours sincerely, H. H. PETERSON, Attorney General.

Following a week of insinuation in which fraud was intimated, though not openly charged, by the Boise Statesman, and after a difference between the Bonneville county candidates, the above notice was yesterday mailed to the several county attorneys of the state of Idaho by Attorney General H. H. Peterson. On the previous day, the Statesman contained a statement to the effect that the county central committee of Bonneville county had determined to throw out the votes of two precincts and that this action would result in the election of the Republican ticket from that county. This report has proven incorrect, but there is trouble over the two precincts and that is the case. The following is the statement of the case by the Capital News:

The controversy over the governorship in this state now revolves around the count. It has no reference to any alleged fraud in the swearing in of voters. It is claimed that straight ball scratched on governor, have not been properly counted. At Republican state headquarters it is stated that a demand will be made to carry out in all counties where the situation related in the foregoing obtained and it is hinted that the case will be carried to the supreme court. It is necessary on the point of a proper method of making the count. Secretary

THE WASHINGTON SCHOOL

The construction of the Washington grade school at the end of Shoshone street, gives an artistic and beautiful appearance to the terminus of that delightful thoroughfare. The school is constructed of hollow tile with stucco finish and concrete cornice. The building has six class rooms, accommodating grades from first to sixth inclusive, a principal's room, a teachers room, a small library and an auditorium. Miss Leonard and principal. The enrollment is 226. The fixtures and furniture are of the latest pattern. The lighting and heating plans are of the most modern kind. The building, as shown by the picture above, is a thing of beauty.

MINISTER'S WIVES ARE EXTENDED MEMBERSHIP

Rolling of Twentieth Century Club to be Carried Out—Interesting Meeting Held.

The Twentieth Century club held its regular meeting on Tuesday afternoon at Parish hall. A short business meeting preceded the program. The members are very desirous of having the different ministers' wives take advantage of the rolling that was made several years ago. This rule provided that full membership be extended to these ladies. They will be waited upon by a committee consisting of Mrs. P. H. Smith, Mrs. Smith and Mrs. P. H. Smith. The club also extends a cordial invitation to the teachers to be present, whenever possible. The program was enjoyed a solo by Robert Logan, "There's a Long, Long Trail," and he responded to an "embrace with Caroline." A piano duet was given by Mrs. Gilbert and Mrs. Bue, "In the Garden of Roses." was sung by Mrs. J. B. White, and her company was "In a Garden." Margaret Beckman, who conducted the program, with a piano solo, "The Angel's Serenade."

After the regular meeting the parliamentary club met and organized. Mrs. Schroeder was elected temporary secretary and a committee composed of Mrs. Pike, Mrs. Norton and Mrs. Coughlin appointed to draft a constitution and by-laws. The next meeting is on November 21.

The musical department will meet with Mrs. Gilbert on Friday afternoon, November 17, at 2:30 o'clock. Plans will be discussed for putting on the opera that is being considered by the department. The club members are urged to make an important effort to present a program on November 17. This will be domestic science day. Miss Hunt, domestic science teacher at the high school, will demonstrate a Thanksgiving dinner. Various other tempting dishes will be displayed, and recipes given, so all members are requested to bring note books and pencils.

PAUL REVERE CHAPTER D. A. R. ORGANIZED HERE

Descendants of Revolutionary Fathers Elect Officers at Meeting Yesterday Morning.

Paul Revere chapter, Daughters of the American Revolution, was organized at a meeting held at the room of the Twin Falls Commercial club yesterday morning, with a membership of sixteen. The following officers were elected: Mrs. Kenneth Packard, regent; Mrs. David Brown, vice regent; Mrs. H. H. Eldridge, secretary; Mrs. Maud Weaver, registrar; Mrs. W. Burr Anderson, treasurer. Other members of the organization are Mesdames Adeline Norton, John Ault, Arthur Peavoy; P. W. McRoberts, A. Munson, H. J. Youngs, W. C. McKee, O. Olson, Grace Seaver and N. C. Booth, and Mrs. Bertha Noel.

L. WALTON MAKES SUGAR BEET SYRUP

Sample Brought to Commercial Club Rooms Tastes Good—May Set Up Mill.

Three quarts of sugar beet syrup from ten tons of beets, which were made at home, was the result of an experiment made by L. Walton, who lives near the city. The sample was brought in to the Twin Falls Commercial club and left for tasting. It appeared to the palates of all who tried it and received plenty of praise. Walton contemplates putting up a mill in the near future and entering the business. W. O. Gregory claims that a recent result in the election of Mr. Davis. At Democratic headquarters it is stated that any attempt to secure a majority will result in the election of Mr. Davis.

TWIN FALLS SOLDIER IS HOME ON FURLOUGH

Nick Wenzel Arrived Yesterday and Will Visit One Month Before Returning to Border.

Nick Wenzel, well known in and around Twin Falls, arrived from the border yesterday afternoon on a 30 days' furlough, and will visit with his parents and friends before returning to his company.

Mr. Wenzel expressed his pleasure at the opportunity of being able to pay Twin Falls a visit and noted the many changes and additions which have appeared in the city since the departure of the militia last July. Mr. Wenzel was the official photographer of the Idaho regiment and it was through him that Mr. Anderson of the Orpheum theater was able to procure motion picture scenes and views of the army camps for his Niagara Falls, N. Y. which has been the source of so much pleasure to friends and relatives of the boys at the front. Mr. Wenzel, while home will act as the source of so much pleasure to friends and relatives of the boys at the front. Mr. Wenzel, while home will act as the source of so much pleasure to friends and relatives of the boys at the front.

DEMOCRATS PLAN CONTEST FOR SENATE

Charge Illegal Use of Money in West Virginia and Indiana Deprived Them of Seats.

WASHINGTON—A senatorial investigation of the alleged misuse of money in the presidential campaign was announced definitely today by administrative officials. Preliminary plans have been made and a campaign is ready to be introduced next month.

It was stated evidence is being collected. The plan is to call those actually in charge of the campaign finance before the senate committee and investigate details of their transactions.

UNION-THANKSGIVING SERVICE TO BE HELD

Walter E. Harman Will Deliver Sermon Given in High School Auditorium, at 10:30 a. m.

The evangelical churches of Twin Falls will hold a special union Thanksgiving service tomorrow morning at the morning of Thanksgiving day. Plans are being completed for making this a most successful meeting and the high school auditorium has been chosen for the purpose. Walter E. Harman, minister of the First Christian church, will deliver the sermon.

SURVEY FOR WATER SUPPLY HAS BEGUN

Engineer L. C. Kelsey Assisted by City Engineer J. A. Bybee, Is At Work This Week.

A survey for a water supply for the city of Twin Falls has begun. Engineer Louis C. Kelsey, of Portland, assisted by City Engineer Bybee of this city, are at work this week getting service territory. The purpose of the survey is to determine the water supply for the city. Mr. Kelsey yesterday engaged an office in the Twin Falls Bank & Trust company's building where he will make his headquarters while here.

JAMES McMILLAN HAS VETO ON CHARITY WORKERS HERE

In order to enforce the ordinance against unauthorized charity workers and at the same time permit people to solicit for worthy objects, it has been determined that the city clerk will issue no license to solicit funds for any charitable object unless recommended by the representative of the Associated Charities of the city. James McMillan has been selected by the organization as the person on whom all who wish to solicit must apply.

NOT IN THE RACE FOR MAYOR SAYS DECONE

Declares His Opposition to Parking Shoshone Street Is Based on Popular Interest.

Declaring to a TIMES reporter that he is not a candidate for mayor and that his opposition to child roads submitted to the voters November 25 is based on motives of public interest, D. M. Decone today stated that he was in no position to take any action on the registration law. He said:

"I have heard from several reliable sources that the men engaged by the city council as deputy registrars for the bond election to be held November 25, have while on duty, taken occasion to assert that I am opposing the bonds on the ground that I desire to become a candidate for mayor next spring and that I wish to gain prestige by making such fight. I desire to say that such statements are untrue. I am not a candidate for mayor and my opposition is based on the grounds set forth before the city council.

If I believe that the streets of Twin Falls should not be narrowed. I believe that the four great routes entering the city from the different directions, twenty feet in diameter, carries it up and drops it into a washer, where the final cleaning takes place and from this it gets its first elevation. Widened on an automatic scale, the beet is then sliced with big knives and dropped into compressing batteries, which squeeze the juice out and discard the pulp into a large vat from which it is taken to the \$50,000 silo and made into feed for stock. That is the process followed here in Idaho. The juice is then measured in tanks and run into condenser No. 1, where a lot of time is injected into its system. It is then run into the second tank and the time is taken out again, like Finnigan, it goes to condenser No. 2 and gets another dose of time and then on to Kolley Filter No. 2 and has the time extracted again.

POWER SITE IS LOCATED BY LONG HIKE COMPANY

R. E. Lewis on Return From Boise, Says He Finds Part of Country Well Served.

"We have located a water right for the generation of power, the first work of the river near Jarbidge," said R. E. Lewis, attorney for the Elkhorn Mines company, otherwise known as the Long Hike company, who is returning from Boise yesterday. "I looked up the records while in Boise," he continued, "and find that part of the country where the water right would be run has never been surveyed. There ought to be a survey and I believe that if requested, the government would make one."

FAMINE THREATENS COAL USERS HERE

Supply Practically Exhausted and Unless Relief Comes City Will Suffer Shortly.

Owing to lack of cars to bring in fresh supplies, the coal in this city is now exhausted and unless the weather should turn warm and remain so for at least a couple of days, people are likely to suffer from cold. One dealer told a TIMES representative today that he had been without any coal for a week and that the supply at other places in the city was practically exhausted. A little comes in steadily, but not enough to meet demand. He said that even with the aid of the weather, the people would be apt to suffer before the winter was over.

SUGAR MAKING A FINE ART

Nothing Wasted in Plant of Amalgamated Sugar Co.

THE MACHINERY WORKS Marvels Conserving Everything.

Everything Works Without Hiccup From Time Vegetable Arrives Until Sugar Is Stored.

There is nothing wasted at the Twin Falls factory of the Amalgamated Sugar company, the water is reused, the brown sugar is melted over again and made white, the pulp is made into silage and conservation of resources marks every step from the time that the beet goes into the big hopper until it comes out in the form of some kind of food for consumption. Even the dirt on the beet is sent back with the water to be spread on the land. The beets drop into a rotary screen when they are unloaded and the dirt on them goes one way while they go the other. The dirt is carried up and reloaded on the wagon of the farmer. The beets are dropped on a big belt about 1000 feet long and carried to the opposite end of the long sheds where they are dropped on another belt from which they are distributed. When the factory is ready for them, they are let drop into a concrete flume about five foot deep and 300 feet long, in which there is a rapid stream of water that carries them to the factory.

This flume to a considerable degree cleans the beets from what loose dirt was left on them when they went through the rotary screen. A peculiar looking machine gathers up all the loose leaves that are floating on the water and deposits them at one side. So the beet finally gets into the factory. Arriving there it receives an other abridgment. An immense wheel, twenty feet in diameter, carries it up and drops it into a washer, where the final cleaning takes place and from this it gets its first elevation. Widened on an automatic scale, the beet is then sliced with big knives and dropped into compressing batteries, which squeeze the juice out and discard the pulp into a large vat from which it is taken to the \$50,000 silo and made into feed for stock. That is the process followed here in Idaho.

The juice is then measured in tanks and run into condenser No. 1, where a lot of time is injected into its system. It is then run into the second tank and the time is taken out again, like Finnigan, it goes to condenser No. 2 and gets another dose of time and then on to Kolley Filter No. 2 and has the time extracted again.

From Kolley Filter No. 2 it goes to the first sulphur tank and from there to winch and into the second tank. The sulphur is taken out, then another sulphur bath, followed by another extraction. This is done in a shop called the sterilizing shop. By this time the sugar is thoroughly sterilized and condition for any bug or microbe that could stand the lime and sulphur has been taken out. The sulphur used is not the ordinary kind that is bought in the drug stores, but another kind, that looks as if mixed with rock salt, and it is taken to the purifying qualities. And your coming sugar is not pretty at this stage of the game, especially before it goes through the drying process. The sulphur used is not the ordinary kind that is bought in the drug stores, but another kind, that looks as if mixed with rock salt, and it is taken to the purifying qualities. And your coming sugar is not pretty at this stage of the game, especially before it goes through the drying process. The sulphur used is not the ordinary kind that is bought in the drug stores, but another kind, that looks as if mixed with rock salt, and it is taken to the purifying qualities. And your coming sugar is not pretty at this stage of the game, especially before it goes through the drying process.

Evaporators take out a considerable part of the water, after which it goes to the pan. Placed in an immense vacuum heater tank, the sugar is graded to ninety brick, whatever it is, and begins to flow. The heat is then 176 degrees, which allows it to boil at the proper temperature for the development of the grains. The process is completed it is segregated. One of the pans will turn out about 400 sacks of material from part of the water after which it goes to the pan. Placed in an immense vacuum heater tank, the sugar is graded to ninety brick, whatever it is, and begins to flow. TEN YEARS

The events of the past ten years are comparatively fresh in your mind. It doesn't seem a very long period when you review it.

It would be interesting to ask yourself NOW, whether you will be satisfied to make the same financial progress in the next ten years as you did in the last. Wouldn't a Twin Falls Bank & Trust Company Savings Account brighten your prospects?

TWIN FALLS BANK & TRUST COMPANY

the treatment of a physician of Elmer. These will be services in Berger school house Sunday at 11 o'clock a. m. Rev. J. B. Flory of Twin Falls, will officiate. You are cordially invited.

The series of revival meetings held in Hagarad school house were well attended and much interest was manifested.

Stephen Has and son, progressive ranchers near Amsterdam, were Berger visitors Monday.

Berger continues growing and improving notwithstanding the bad conditions prevailing on this tract. The latest improvement and addition to Berger is a new and modern five-room bungalow erected by E. L. Mollin, rock contractor and electrician man. The natural used is the very best, the interior being finished in a most artistically was; a large and beautiful veranda facing the avenue, adds greatly to the appearance. A porch has been added at the rear, partially enclosed, with a cistern underneath; wired throughout the entire building, and will be electrically heated and lighted.

McMillan News

Times' Special Correspondence.

Mr. Winger and family left for California Monday.

Ira Nicholson and wife were Twin Falls visitors last Tuesday.

Married—Miss Myrtle Macdonald and Gabe Windel. Both young folks are well known here in McMillan.

A. C. Rutherford and wife were Twin Falls business people last week.

Charley Stroll finished threshing his clover crop after an intermission of snow and autumn.

Born—To the wife of Stewart Henderson of Twin Falls, a big baby girl. The mother of the babe was formerly Miss Belle Wilson of this place.

Joe Wilson, also his brother Fred, were Montpelier, Idaho, business men last week, looking at a large stock farm up there. They returned home last Saturday.

Ray Valentine, an uncle of the Valentine boys here, came up from California last week to sell his place here, where he once lived. He started back to the land of sunshine and flowers on Wednesday.

Fred Hills and his mother were McMillans last week, visiting at the home of R. T. Brown. They live on the Rock Creek side.

Will Clinton, from up near Hanson, was calling on friends here last week.

Charles Baker and wife autoed into Twin Falls last Tuesday to vote.

Richard Gith was a lumber business man last Friday.

Mrs. S. K. Nesbitt was shopping in Twin Falls last Thursday.

Mr. Parsons, who has been here for the past few weeks, has gone to Twin Falls.

Henry Zalsman, a former young man of this place, died recently at American Falls of typhoid. His friends were very sorry to learn of his death.

Richard Dugas and wife autoed into Twin Falls last week to vote.

Guy Ball and wife, F. T. Brown and wife, and Marion Berthold autoed to the home of Mr. Zalsman's.

Near Hanson, spending the evening socially.

A. S. Martyn lost one of his finest milk cows last week from blood, supposedly caused by eating beet tops.

Berger Items

Times' Special Correspondence.

Cold, colder, coldest. It seemed that Mother Earth had slipped a cog or two in her revolution on her axis as almost zero weather was prevailing the first of the week.

This neck of the woods of the Salmon river tract is not yet deserted of its population (most all of 'em are athletes) judging from the number of votes cast at the election in Berger. There were 119 out of 150 voters in Berger voting precinct, who exercised their rights at the polls. Wilson received thirty-six more votes than Hughes, and our only Moser had fifty stalwarts, good and true, while his opponent lagged behind with forty-eight followers. H. M. Sims was the high man, with 83 votes, and Mikese closely following up, receiving 76 votes, though not elected. There were nineteen foreign voters who thought county division would be just and proper, and perhaps solution to our difficulties on the Salmon, who supported Hugh's favorite son and champion for county division, Fred Nihart. There were thirty voters in Berger precinct who thought that the state of Idaho should be wot, while some eighty-six voters took a different view. At the election two years ago—there—were some eighty-five votes cast in Berger precinct.

Mrs. A. G. Ayer visited with friends in the Magic City a few days the first of the week.

Hauling clover has been at a stand still for a week or more on account of unfavorable weather.

Mr. and Mrs. J. M. Pierce were Twin Falls visitors Saturday.

Robert L. Forbes was a Twin Falls sightseer the first of the week.

Mr. and Mrs. Walter Starr paid a visit to the county metropolis Saturday.

C. A. Bickford, former manager of the Cash Buyers Union of Twin Falls, but who has been farming his 240 acre ranch on the Salmon the past season, was a Berger visitor Monday. Of course Charles did not forget to call on his South Dakota friend, namely the writer heretofore.

Mr. and Mrs. H. G. Lammers were a Twin Falls visitor one day recently.

F. W. Havlock, who recently had a sale of his stock and machinery, having rented his farm to T. A. Parrott, has moved to Twin Falls.

Geo. Hamilton was "doing" Twin Falls Saturday.

Mr. and Mrs. E. L. Mollin entertained the young people with a dance in their new domicile one night recently.

C. E. Hudson, who had the misfortune to loose his house with all its contents by fire some months ago, has completed a new bungalow, let's watch him and his family have recently moved.

The temperance program recently given by our Sabbath school, was exceptionally good, a credit to the school and the superintendent, J. M. Pierce.

Philio C. Hills, who raised a good crop of wheat this past season, having sufficient supply of water, has made several improvements about his place, among them a new and up-to-date residence. Philio is a hard worker and is entitled to the best there.

The little son of C. E. Carder, who was recently bitten in the face by one of Mr. Carder's horses, has been under

the treatment of a physician of Elmer.

These will be services in Berger school house Sunday at 11 o'clock a. m. Rev. J. B. Flory of Twin Falls, will officiate. You are cordially invited.

trouble caused some consternation and much amusement, but spoiled neither the dinner nor the program. A paper on the work done for legislation by women prepared and read by Mrs. H. W. Clouche, was much appreciated.

ADMITTED TO CITIZENSHIP.

The following new citizens were admitted this week: Paul Schnell, Roger; Herman Tetpetra, Bull; Casper Nygard, Hollister, and John Joseph Madigan and James Nelson, of Twin Falls.

BUSINESS GIRLS ENJOY ICE

SQUEWER TUESDAY NIGHT

The meeting of the Business Girls at the Parish hall Tuesday night, devoted to the presentation of a paper on the program which added greatly to the interest of the occasion. While dinner was being prepared a flood of water came pouring into the kitchen and soon assumed the proportions of a small deluge. It was discovered that a water pipe had frozen and had later broken when heat was turned on. The plumber finally stopped the leak. The

Maxwell Cars and two Super-Sixes for immediate delivery

For the next day or two, at least, we shall be in the fortunate position of being able to make immediate deliveries to a limited number of purchasers of Maxwell motor cars.

Two Hudson Super-Six phaetons are available for immediate possession. The price of a Maxwell touring car complete, in Twin Falls, is \$685.00; the price of the Super-Six phaeton complete, in Twin Falls, is \$1600.

If you have decided upon a motor car investment at either of these two prices—or within several hundred dollars thereof—don't you feel, in view of the fact that you may secure possession at once of whichever car you select, that a careful inspection and demonstration will be well worth your while before definitely making up your mind regarding a car?

The merits of these cars are now so universally accepted that I really feel it is unnecessary to take space here in going into detail with you regarding their successful performance, their endurance and stability and the very superior grade of materials and workmanship, together with the high standard of equipment characteristic of these cars. These are things which we will be glad to discuss with you to whatever extent you desire when you call to inspect and ride in the cars. Then, too, YOU may feel as a great many others do regarding these cars—that the wonderful record of sustained merit which each has scored throughout the length and breadth of the United States is sufficient in itself as your assurance of value received. In addition thereto, the Johnson Auto Sales Company stands squarely back of every motor car sold from its floor, and you may be sure your automobile requirements will receive the very best attention and service from our entire organization.

It is my judgment that fully 75 per cent of the present car in use in Twin Falls and throughout Idaho, will be replaced throughout the ensuing winter, and if you stop to consider how many beautiful days we have through November, December, January and February when riding is a positive delight, together with the snug comfort and convenience of being able to go quickly and warmly about on those winter days when snow and slush are under foot, I am sure you will agree that RIGHT NOW is a mighty good time to secure your car.

THE TWIN FALLS TIMES

TWICE-A-WEEK

Published Tuesdays and Thursdays by the
TIMES PRINTING & PUBLISHING COMPANY, Ltd.
HAROLD M. SIMS, Editor.

TWO DOLLARS PER YEAR IN ADVANCE

Notice: DISCONTINUANCE: Many subscribers prefer not to have their subscriptions interrupted in case they fail to remit before expiration. Notwithstanding this, it is not assumed that continuous service is desired; still, subscribers are expected to notify us with reasonable promptness to stop if the paper is no longer desired. Entered at the Twin Falls postoffice as second class matter as a twice-a-week publication, October 15, 1910.

NO DISCRIMINATION.

It would seem from the way that Miss Noel for county superintendent and Arthur W. Ostrom, candidate for probate judge, received the tail end of the vote in the east end of the county, that it is impossible to elect a Buhl nominee. Both Ostrom and Noel, led the Democratic county ticket in the five precincts of the west end, and ran far ahead of their opponents, but were defeated from the other end of the county. They were out-voted in the city of Twin Falls by their Republican opponents, which city went for Wilson, and other Democratic officers. The same deal again.

By the defeat of Miss Noel, the purpose of Twin Falls is accomplished, and the entire west end of the county, in which more than 2,000 votes were cast, is left without a single representative, state or county. Citizens of the west end, how do you like it?—Buhl Herald.

It is regrettable that the Herald did not take the trouble to study the election table which it published on another page of the same issue, before making the above wholly misleading statement. In the first place the assertion that Miss Noel and Judge Ostrom received the "tail end of the vote" in the east end is false, if it is intended thereby to convey the impression that they were at the tail-end of the Democratic ticket. The same erroneous implication is contained in the statement that the city of Twin Falls "went for Wilson and other Democratic officers." Lastly, the statement "By the defeat of Miss Noel the purpose of Twin Falls is accomplished and the entire west end of the county in which more than 2,000 votes were cast is left without a single representative, state or county," is absolutely without foundation insofar as it implies a deliberate purpose on the part of anything more than a negligible part of the voters of this city to prevent the election of candidates on the sole ground that such candidates were from the west end.

Twelve candidates on the Democratic ticket, congressional, state and county, failed to get a plurality of the votes cast on November 7 in Twin Falls county. Of course James A. Fitzgerald received more votes than any other defeated candidate, as he was the recipient of a large proportion of the Republican vote that did not go to Nihart, so in fairness in making a comparison this office should be passed. That left eleven other Democratic candidates who arrived late. Of these Miss Noel received the largest vote in the city of Twin Falls. Of these Judge Ostrom received the fourth largest vote in the city of Twin Falls. An adding machine will show this. There were nine candidates besides Judge Ostrom on the Democratic ticket at the tail end, after Miss Noel. There were seven candidates on the Democratic ticket after Judge Ostrom in Twin Falls city. What is there in these figures to show a deliberate conspiracy on the part of Twin Falls voters to disfranchise the west end?

A west end resident, said in the city the other day, that it had been said on the streets of Twin Falls before election that no west ender could get a county office, and added that it had been said dozens of times. No member of THE TIMES staff had ever heard of its being said during the campaign. It may be granted that such statement was made by an irresponsible individual, or by a dozen irresponsible individuals. It may be that some of the friends of the successful candidates in an excess of zeal, might have made such statement and might even have tried to influence a few votes with this argument. If they did it was wholly reprehensible. We have no evidence that the successful candidates personally made any such appeal, or in fact that any such appeal was made to a single voter by anyone in behalf of anyone. Still, in a few instances, it probably happened.

The Herald says that Miss Noel and Judge Ostrom ran ahead of their tickets in Buhl. Judged by its own logic, we would be compelled to say that this was due to the fact that voters in the five west end precincts wanted to prevent Twin Falls from getting anything. We do not believe it, however. We believe that because Miss Noel and Judge Ostrom were particularly well known in the west end and their qualifications were fully recognized there, people who thus knew them, voted for them, without the thought of how it would affect Twin Falls in any way entering into their calculations.

There should have been no such discrimination against any competent candidate for any position except that of legislator and any voter in either end of the county who attempted that sort of discrimination was guilty of an unpatriotic act. And had it not been for the fact that it was generally recognized that county division was the paramount issue of the campaign, so far as legislative offices were concerned, and that party lines were to a great extent abolished in both ends of the county, relative to legislators, any discrimination against a legislative candidate because he lived in either one end of the county or the other, would have been just as reprehensible as such discrimination actually was in the few cases in which it was practiced on non-legislative candidates in the election on November 7.

FIXING TO STEAL?

No sooner had it become apparent that Moses Alexander was re-elected governor of Idaho and that the Democratic state ticket was elected, with few exceptions, than the Statesman began to cast insinuations that the vote of the state was fraudulent. This is the plain English of it, though, with characteristic evasiveness, the gang's organ made no plain statements. It intimated that there must be something wrong with the vote because it was so much larger than four years ago.

The reasons for the big vote were not far to seek. Not only had the population greatly increased, but the fact that there was a wet and dry election on increased the number of prohibition votes tremendously. There is no evidence that the liquor men made anything more than a bluff, as they early realized that their case was hopeless, but the wet vote was out as well as the other, moved by the general agitation. Moreover, four years ago, the fact that Wilson's election was a foregone conclusion prevented people generally from taking the keen interest that they did this year, while the good-naturedness of the state machine had not been sufficiently exposed to arouse popular indignation and bring out a large vote to improve it. Under such circumstances, as large a relative vote was not to be expected and it was not cast.

The great campaign to get the dry vote, took place after the closing of the registration books, and was so thorough that only a few unregistered voters were not approached and urged to go to the polls; hence the large number of voters who were sworn in on election day.

The Statesman continued to insinuate for a few days, on Tuesday reported definitely that two precincts in Bonanza county in which 921 votes had been cast, a majority of which were cast for the Democratic ticket, had been thrown out by the commissioners. It was said that this would give all the offices to the Republicans in that county and might change the results in the case of certain state offices. The fact that Idaho election laws are law was also pointed out.

Certain facts stand out in all this. The election laws are the heritage of days when the people were less conscientious than at present in regard to methods used to get men into power. They have been

perpetrated by the gang that stole money directly from the treasury, and indirectly through the hands of the statesman's employees. Why the law was allowed to remain unchanged need not be asked, since the use to which they might be put by such forces is evident.

Furthermore, everyone knows which party had the most money in the campaign which just closed and everyone knows where the great power and water companies and the public utility corporations stood. So that if there were any systematic fraud anywhere, its location might readily be suspected. If the presence of a few fraudulent votes could legally disfranchise the voters in a precinct in which they are cast, then it would obviously be easy for a powerful combination of financial institutions and adroit and unscrupulous politicians to swear in a few illegal votes in Democratic precincts and then contest such precincts.

What ever interpretation may be put upon the election laws by the courts, the average man would certainly assume from their letter that the board of county commissioners would have no power to throw out the votes of any precinct. They do not count the votes, and are not even permitted to certify that anyone is elected, the law saying plainly that the certificate shall be made by the county auditor as such and not as clerk of the board of commissioners, in fact later reports show that the votes were not actually thrown out in Bonanzaville precincts.

Lastly, the value of the thing stolen and the character of those tempted to steal must be considered. That the scattered farmers and workmen throughout Idaho, who want to see a Democratic administration in the hope that better labor laws will be passed and that the attitude of the state will be in defense of the just rights of bona fide settlers, should attempt to stuff the ballot boxes is unthinkable. But a just enforcement of laws for the protection of labor and of settlers, and the removal of other necessary laws to secure their rights means the curbing of privileges worth millions to certain great interests. The politicians who have served and who still serve these interests, are remnants of the same crooked gang that robbed the treasury and gave away the heritage of the people, wherever they had a chance. Clarence Van Dusen has more than intimated that an examination of all the books of the state would mean the placing of others behind the bars. An impenitent thief can hardly be trusted to respect the rights of the people, where these rights conflict with his graft and his liberty.

Here then we have the opportunity and the motive for arranging before the election for protection against the wrath to come, by endeavoring to arrange for the contest of Democratic precincts. The promptness with which the Statesman intimated that the vote was unacceptably large when, as a matter of fact it was not, was a suspicious circumstance, and one which would lead to the belief that the whole thing was staged beforehand and that the cry of "fraud" was to be raised should the state election prove unsatisfactory to the machine and its owners.

BUSINESS CONFIDENT AT ALL TIMES.

That the condition of the country is essentially sound, and that businessmen regarded it as such before election, and were not worrying about the results, whatever they might show, is indicated by the reports of the great mercantile agencies from week to week during the campaign. Straw votes showed an advantage to Hughes for weeks and business continued to improve; then the great swing toward Wilson began and still the reports grew more and more optimistic with each recurring number. All this indicates that while there is much difference between parties in many matters, these differences are not so fundamental as a lot of candidates assumed them to be a few days before election. The following from Dun's Review, November 4, indicates the confidence felt by financiers that the country would be safe whoever might win:

"Neither the pending elections, nor the persistent rise of prices have perceptibly reduced the momentum of the business movement. Activity continues unabated at a time when more or less hesitancy is usually witnessed, and it remains a wonder that with costs mounting steadily, and in many cases rapidly, demands are sustained in such great volume. New buying for current and forward requirements still outstrips the facilities for both production and distribution, labor conditions and the growing scarcity of materials acting as a brake on manufacturing in many directions. Car shortages are also a hindrance and the consequent restriction of fuel supplies causes some concern among industrial interests, with shipments are generally backward and the trend of prices continuing strongly upward, producers display greater reluctance in extending commitments farther into the future and an increasing number of profitable contracts are being rejected."

Yet, even with much business of necessity held in abeyance, bank clearings make a phenomenal exhibit and are 39.0 per cent. larger this week at leading centers outside New York than a year ago, though part of the gain is obviously due to the high prices. As many expected, a further striking rise has occurred in iron, fuel, hides, leather and in other important lines, and of the 331 wholesale commodity quotations regularly compiled by Dun's Review, eighty-six show advances this week and fourteen declines. The extreme living costs not unilaterally cause some restriction of buying and, by many, luxuries are purchased sparingly, yet, on the whole, consumption is maintained in remarkable volume and in the aggregate retail trade is of record dimensions. Thus, though the weather has not been favorable to the best results in some sections.

"It is significant of the times that the failure record continues highly encouraging. Prosperity in trade and industry makes for greater promptness in the settlement of financial obligations and business reverses are relatively moderate, in spite of the increase in new enterprises."

BORDER BOYS STAY WITH CHIEF

It is usually pretty good sport after a hard political campaign to examine the material out of which hobgoblins are made which have been worked like hollow men's spectres during the contest. One of the most industrious spooks that walked abroad before November 7, was the apparition that was said to have appeared to certain active outs, to confuse the vote that if the boys on the border were allowed to vote, President Wilson, Governor Alexander and all the lesser Democratic lights would be snuffed out. Unfortunately, the laws of Idaho did not permit them to cast their ballots, so just what sort of a confusion could only be judged by what did happen in other states. Pennsylvania laws permitted the militia in service to vote and instead of administering a rebuke to the administration, the proportion of Democratic votes among the national guard from the Keystone state was greater than among the voters at home.

Moreover, Pennsylvania was credited with having a larger percentage of dissatisfied soldiers than any other state, and the eastern press was filled with wails alleged to have been emitted by guardsmen from that commonwealth.

When the Minnesota contest election seemed close, it was street talk among the outs that if Wilson carried the state among the stay-at-homes, his small plurality would be wiped out by the ballots of the 2800 guardsmen on the border. The reports from the front dropped off it effectively by showing that the votes of the Minnesota troops were running about as the vote at home.

There is no difference in bravery and patriotism between the members of the political parties. While in the two Republican states named, it seems that there were more Democrats than Republicans at the front; on the other hand, it might easily happen that among regiments from Democratic states, a majority of the votes would be cast for the Republican ticket.

Guessing on what would have happened in Idaho is as unsafe as guessing on election, and a large number of voters in all parties know how uncertain that is.

ROBINSONS

Store Talk

It's all right folks, just "keep a coming" while the coming is good. I have more of the same kind and quality of merchandise that I have had all along and I rather think that there will be enough for all, but the way you good folks have been buying for the past few weeks, and the way our business is growing it will not be a bad idea to come soon while the coming is still good.

You know now-a-days many kinds of merchandise, particularly goods such as I carry, can not be had for prompt delivery, and the advances asked are something astonishing. So come now while we still have the good kind and as usual at "Right Prices." You know I am not "boasting" prices as many are doing so come "while the coming is good."

Just a Word About Boys' Wearables

Its a pity, yes! a shame, to see the materials that are being used in boys' clothes these days. Suits bought just a few weeks ago are faded and old looking. Its too bad. Cottonades, Satinets, Cotton Shoddy, Wool Shoddy and most anything but good honest materials are being used in making suits and pants for the boys.

I have a good line of boys' suits and separate knee pants, made from materials that I can recommend for wear. They are made in good style, cut full and are good looking, the "worth while" sort. The pants are not only sewed well, but the seams are bound to give them added strength and the many details that are essential in boys' clothes have not been overlooked in those I have here for you.

When I say to you that I am giving just as good materials, just as good style, and just as good make as you would have been given last year at this time, I am relating only facts and that is saying a whole big lot.

Bring the "Little Men" in and see.

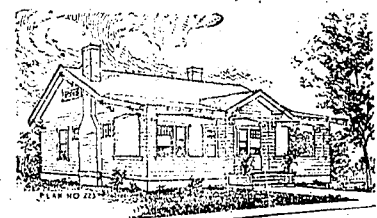

Edward Robinson

P.S. Always have in mind that you can mail order anything we carry, and be sure of correct prices and careful attention to your orders.

BUILDING JUST THE HOME YOU WANT

In speaking of the home you want to build one writer has said:

"The house he is to build is the house of his hopes and dreams, probably the fruit of long years of work and study and contemplation; it is to be a home for his soul as well as his body, a little corner of the world that is essentially his own."

In other words, to be just what you want, your new home must be vastly more than an example of practical construction of good quality materials. Its whole makeup, interior and exterior, must interpret and express you—it must harmonize with your individuality.

The floor plans and sketches comprising our "Cottage Home" Plan Service are chock full of sensible suggestions which the architect or builder can carry out at a modest outlay.

The home of your hopes need not be an expensive home.

GEM STATE LUMBER CO.

COMMENTS BY EXCHANGES

A GREAT VICTORY.

THE closest and most hotly contested election in thirty-five years has resulted in a glorious vindication of President Wilson and Democratic policies.

One of the most significant and far-reaching facts is that we won without New York, Illinois and Indiana, old Republican strongholds where the moneyed interests have usually dominated the elections.

It is a stinging rebuke to the arrogant assumptions of Wall street that we could win without New York, and proves that the people of the nation are at last realizing their responsibility

sufficiently to stand back of the leaders who are trying to deliver them from the bondage of corporate control that they may exercise their sovereign rights.

President Wilson has stated several times in the last few weeks in his campaign speeches that he was willing to co-operate with Wall street, but that what these interests demanded was control and dictation of national policies, and that for that he would never stand, while he was in power. This was the great issue—plutocracy as represented in Wall street and democracy as voted in the will of the people, and the people have won. The western states have shown their power and the political future of this country will never again be centered in the east, controlled by the money powers, subject to close dictation.

Another vital interesting fact regarding this election, is that the border states, Texas, New Mexico, Oklahoma, went overwhelmingly for Wilson, giving unequivocal sanction to the president's Mexican policies, and utterly disproving the Republican forecast in regard to these states. This will have its own weight and influence with the South and the republics and the destiny of Mexico. Our whole foreign policy will be strengthened by the result of the election. Foreign nations will be quick to recognize the value of the endorsement of the president's diplomatic policies, and the future of the prestige of this nation and its opportunity for good will in the final adjustment after the war.

Still another interesting fact is that all of the strange states with the exception of Illinois, went for Wilson. It proves that in the states where the women have voted long enough to base their choice on policies instead of prejudice, to discount campaign lies, and ignore the vicious methods of petty politics, they use their reason and judgment and vote for the leaders who represent their best interests.

It is a splendid personal victory for the president who has had more to bear in shouldering the burdens of government than any president since Lincoln, who has been maligned and abused by desperate opponents, who has been threatened by the capitalists because he would not be controlled by them, against whom all of the alien religious and nationalistic rancor has been hurled, and who, in spite of all the elements arrayed to defeat him has been victorious.

He won, because he represents the best and vital in the thought of the people today. He won because he is the president of the whole people, not the uncaring of the privileged interests. He is for the people, and the people are for him.

All the old traditions have been overturned, for money has not been sufficient to browbeat the voters, who have arisen in their might and returned an unqualified approval of their leader's deeds. There is now some chance of putting over progressive legislation for all the people, in the interests of all, for though the house is Republican, the senate is Democratic, and with such an endorsement of the people's popular vote, President Wilson will have the instruments at hand for carrying out his policies.

Best of all, it was a victory won by wholly honorable tactics. There was only fair and sane methods employed by the adherents of Wilson, methods in keeping with his own high standards of what the chief executive of the nation owes to his country. This is most gratifying, and may be influential in lifting up the plane of voting tactics in future elections, for if people find out the electorate will not be bluffed nor stampeded by eleventh hour scandals and sensational dope, it will be dropped and we shall have in both the Republican and Democratic ranks, as we have had in the Democratic, only dignified and decent tactics, suitable to the discussion and endorsement of national problems.

Now that the campaign is over the nation can settle down in a spirit of co-operation among all its various elements, for there is a great work to be done, and only a united and harmonious nation can compass it. This paper has done what it could to further the good cause, and now that it is in no more danger for the present, will turn its attention to matters other than partisan and political—such as:

In the Tuesday Times—See the Business Directory.

CORN CLUBS CONTEST IS ATTRACTING NOTICE

Buhl May Compete in the St. Paul First National Corn Contest at St. Paul, Minn.

No contestants from the Twin Falls schools will enter the second annual corn show at St. Paul this year, though it is said that some contestants may enter from Buhl, Professor Mueser, of the Twin Falls high school, and yesterday the considerable progress had been made during the summer with corn club work here, but that he did not believe that any would exhibit at St. Paul.

While the time limit set for receiving entries for judging is December fifth, exhibits are now arriving daily at the corn show headquarters in St. Paul. The number of requests received for entry blanks, and advice from corn growers of their intention to enter, is so large that the promoters of the exhibit this year will greatly outnumber the fifteen hundred ten-acre samples entered at the "First National" corn show which was held in St. Paul last December. Promoters of several shows being held locally throughout the northwest have advised the management of the St. Paul show, that a portion of their exhibits, and in some cases all of them, will be sent to St. Paul for entry and display. This is on the part of corn enthusiasts in setting in exhibits from Wisconsin, Montana, Washington, Oregon and Idaho, which states comprise the corn territory, with the object of having the St. Paul show to prepare a representative display of northwestern corn, which will demonstrate to the most skeptical that corn can, and is being grown successfully in practically every district of this great agricultural section of the United States.

The "First National" corn shows are held under the auspices of the First National bank and Northwestern Trust company of St. Paul and bankers of the northwest with the object of interesting farmers in the growing of more corn, which has contributed more to the wealth and prosperity than any other product of the land.

Farmers and farmers' sons in the eight states included in the corn show territory are invited to enter contests and compete for the beautiful silver and "Golden" bronze loving cups offered as prizes. No entry fee is charged.

NEW "COYOTE" STAFF CHOSEN BY SENIORS

Junior class Elect—List Given Out Subscriptions by Merchants Toward Publication.

The election of the staff of the high school publication, "Coyote," took place last week. The editor-in-chief and business manager were elected by the senior class. Later the athletic editor and exchange editor, including the calendar editor and senior class reporter were chosen from the same class.

The juniors elected an assistant editor and an assistant business manager as well as a class reporter.

The sophomores and freshmen have yet to elect class reporters. The staff so far elected, is as follows: Editor-in-chief, Thomas; business manager, Vernon; Marquette; assistant editor, Paul McKinley; assistant business manager, Darwin Harvey; athletic editor, Charles Perline; exchange editor, Rachel Quigley; calendar editor, Katherine Quigley; editor, class reporter, Francis Quigley.

Owing to the fact that the Merchants association would rather make donations for the support of this publication, than to advertise in it, the following business men have made these donations:

Elkridge Clothing Co., \$25.00; Idaho Department Store, \$25.00; City Pharmacy, \$25.00; Twin Falls Bank & Trust, \$25.00; Twin Falls Milling & Elevator, \$25.00; City Pharmacy, \$15.00; Skeels-Wiley Drug Co., \$10.00; Gem State Lumber Co., \$10.00; Ostrander Lumber Co., \$10.00; Ostrander Lumber Co., \$10.00; Dargatz Bros., \$10.00; Courteen Seed Co., \$10.00; Jenkins Clothing Co., \$10.00; C. E. Booth, \$10.00; Samuel Hart, \$10.00; Strain & Sons, \$10.00; First National Bank, \$10.00; W. R. Priebe, \$10.00; Geo. W. Hoover, \$10.00; Twin Falls Hardware Co., \$10.00; Times Printing and Pub. Co., \$10.00; Cline Book Store, \$10.00; Economy Grocery, \$5.00; City Market, \$5.00; J. E. Porterfield, \$5.00; Bedford Drug Co., \$5.00; Diamond Hardware Co., \$5.00; Kingsbury Printing Co., \$5.00; Logan Music Co., \$5.00; Parrot Optical Co., \$5.00; Johnson Auto Sales, \$5.00; Bole-Payette Lumber Co., \$5.00; C. D. Thomas & Co., \$5.00; Hickory Cash Store, \$5.00; American Electric Co., \$5.00; Sweetley & Sweetley, \$5.00; F. W. Brannan, \$5.00; V. H. Decker, \$5.00; L. Hammen, \$5.00; Model Staff, \$5.00; J. A. Sinclair, \$5.00; Macaulay Bros., \$5.00; C. P. McGrath, \$5.00; H. A. Brice, \$5.00; Idaho Hardware & Implement Co., \$5.00; E. M. Wolfe, \$5.00; Twin Falls Music House, \$5.00; Shoshone Grocery, \$5.00; Stuebaker Bros., \$5.00; Mr. Anderson, \$5.00; Modern Packing Co., \$5.00; J. H. Wolff, \$5.00; Sanger Realty Co., \$5.00; J. H. Wise, \$5.00; C. M. Booth, \$5.00; C. Booth, \$5.00; E. Prater, \$5.00; P. H. Debevoise, \$5.00; W. E. Aaron, \$5.00; E. L. Ashton, \$5.00; Asher D. Wilson, \$5.00; C. P. Green, \$5.00. Total, \$465.00.

Several merchants have not been approached as yet. The high school as a whole greatly appreciates the support given by the business men of the town.

A DAY FOR OTHER THINGS.

The summer is over, a beautiful harvest garnered, and what is more appropriate than a joyous visit with friends. As an aid to you, our Week-End and Sunday reduced rates are at your disposal. Ask about them. Agent, O. S. R. R.

FREE TRIAL For Fifteen Days Special Offer for Short Time Only

A handsome and highly perfected Player-Piano, the finest ever offered at or near the price.

Burrland Player-Piano

With beautiful music cabinet and 20 rolls of music. DELIVERED TO YOU FOR A FIRST PAYMENT OF.....\$10.00

Balance in easy monthly payments. Price of outfit.....\$408.00

The Burrland Player-Piano is entirely above the class of other player instruments. It is a masterpiece.

For price is not the first consideration in this instrument. It is the highly perfected and finished product of the largest manufacturers of musical instruments in the world to the person who plays to have the leader in fine player construction.

The Acolian Company, its quality is the first requirement in the Burrland Player-Piano, the unequalled Acolian guarantee.

Its wonderful pneumatic system, because of many patented and exclusive features, is unrivaled in its performance. Musical capability and ease of operation, the remarkable construction is evident in every part that is a factor in securing maximum excellence from this Burrland Player-Piano, remember, is the work of the men who have made all of the world's finest players.

The piano quality of the Burrland Player is also very superior. The tone is rich, smooth and big in volume. The action is quick and well-balanced—delicately sensitive to the touch of the fingers.

The tone experts who have made the Burrland Player-Piano such a masterpiece of fine player construction, have helped to make it one of the greatest triumphs of the Acolian art.

**"Only 'Guts-It' for
Me After This!"**

It 'Guts' Every Corn Every Time
Faster, Holding More Simple.
You tell me what I've got out of
too-tasting salves for corns I've
been using. "GUTS-IT" is so simple and
easy to use—put it on in a few
seconds—before there is a corn or
corn-fooling to do, no pain that
bores up to your mind. All the time it
works—and then, a little "Guts-It"
corns peel right off, leaving the clean,
smooth skin underneath. No more
corns in your shoes! No wonder millions
of "Guts-It" is sold and recom-
mended by druggists everywhere.
A bottle of "Guts-It" costs only 10c
at J. Lawrence & Co., Chicago, Ill.
Solely sold in Twin Falls and surrounding
area at J. Lawrence & Co., Pharmacy,
Bedford-Flower Drug Co.

That's what they all say, the very
best thing for corns. "Guts-It" is so
easy to use—put it on in a few
seconds—before there is a corn or
corn-fooling to do, no pain that
bores up to your mind. All the time it
works—and then, a little "Guts-It"
corns peel right off, leaving the clean,
smooth skin underneath. No more
corns in your shoes! No wonder millions
of "Guts-It" is sold and recom-
mended by druggists everywhere.
A bottle of "Guts-It" costs only 10c
at J. Lawrence & Co., Chicago, Ill.

The M. C. B. club met with Mrs. Hol-
ingsworth last Wednesday afternoon.
Mrs. Kelly captured the prize in a
Japanese vase for high score. Miss
Pauline Evans was a guest of the af-
ternoon.

Mrs. Everett Swallow entertained in-
formally at dinner last Thursday eve-
ning. The table was artistically ar-
ranged, the colors being pink and
white. Places were laid for twelve
guests.

The Thursday Evening club met with
Mrs. Karl at her home on Eighth ave-
nue, last week. The guests were en-
tertained at the tables at cards. At
the close of the evening delicious re-
freshments were served.

The Ingleside club met on Novem-
ber 2 at the home of Miss Ratcliff on Ad-
dison avenue. The time was spent in
doing fancy work and in general dis-
cussion. A dainty luncheon was served
beside a crackling open wood fire, and
the guests departed in the twilight af-
ter a pleasantly spent afternoon.

Mrs. Carl B. Hoag entertained with a
kingship tea at her home on Fourth
street, Thursday afternoon. At the
close of the afternoon a delicious re-
freshment was served in the dining
room. The guests were: Mrs. Hoag, Mrs.
Taylor, Mrs. Hart, Mrs. Parnell, Mrs.
Karl, Mrs. Allen, Mrs. Bond, Mrs. Graves, Mrs.
Girder, Mrs. Flinck, Mrs. Greene, Mrs. Mac-
gill, Mrs. Logan, Mrs. Robinson and D. Graves.

The Paris home at Dahl, was the
scene of a delightful affair Saturday
evening, when Miss Nona Paris en-
tertained a number of her Twin Falls
friends with a dinner at her home. The
dinner was a delicious one, and the
evening was spent in a most enjoy-
able manner. The guests were: Mrs.
Paris, Mrs. Taylor, Mrs. Hart, Mrs. Parnell,
Mrs. Karl, Mrs. Allen, Mrs. Bond, Mrs. Graves,
Mrs. Girder, Mrs. Flinck, Mrs. Greene, Mrs. Mac-
gill, Mrs. Logan, Mrs. Robinson and D. Graves.

BULL ASSOCIATION PROVES SATISFACTORY

Small Stockraisers Can Easily Com-
bine to Secure a Pure Bred Sire For
Herd.

A co-operative bull association is a
farmers' organization, the chief pur-
pose of which is the joint ownership
and management of a pure bred bull.
The association is organized in such a
manner that the members can afford to
buy a pure bred bull for their herd.

The owners of small herds of grad-
ing cows often find it impossible to
afford to purchase valuable pure-bred
bulls. In consequence they buy
scrubs, or breed their cows to a scrub
bull or an inferior pure-bred bull on
some near-by farm. One year a Hol-
stein bull may be used, the next year
a Jersey, and occasionally a bull of no
particular breeding. The work of the
co-operative bull association makes it
possible for any farmer to own a share
in a pure-bred bull of high quality.

A bull association in its simplest
form may consist of three farmers who
together purchase three good registered
bulls of the same breed. Each farmer
keeps one of these bulls for two
years, at the end of which time the
bulls are exchanged to prevent in-
breeding. For the same reason a sec-
ond exchange is made at the end of
the four years. In this way, by paying
the purchase price of only one bull,
each member of the association has
the use of good pure-bred bulls for six
years. A larger membership in the
association may either reduce ex-
penses or make possible the purchase
of better bulls.

The original cost of the five bull
and their annual cost of maintenance
are usually divided among the mem-
bers of the association according to
the number of cows owned by each.
Records on file in the dairy division
of the department show that the mem-
bers of associations now organized are
getting the services of these high-class,
pure-bred bulls at an average cost
considerably less than they formerly
paid for the services of scrub bulls or
registered bulls of doubtful merit.
Many farmers in Maryland, Michigan
and Minnesota, who questioned re-
garding the value of co-operative bull
associations, estimated that the use of
sires belonging to the association in-
creased the value of the offspring in
the first generation from 30 to 50 per
cent. The average of these estimates
was 40 per cent.

Co-operative bull associations have
been common in Denmark for many
years, but the first associations of the

AT HOME IN A SHELLHOLE

An ingenious Tommy who has set-up
camp and housekeeping in the shelter
of a deer shellhole. Although he is
careful not to show his head above the
hole, he evidently goes upon the assump-
tion that lightning never strikes
twice in the same place.

kind in the United States were orga-
nized in 1908 by the Michigan agricul-
tural college. In this country thou-
sands have not been rapid—but suc-
cessful. They have been highly suc-
cessful. If skillfully managed, they may
be made a great factor in the upbuild-
ing of profitable dairying in this coun-
try.

ELECTION DAY CIRCULAR SCORED

Attack on Prohibition Record of Gov-
ernor Too Late to Refute is Severely
Censured.

A set of hand bills were put out on
the streets of this city on election day,
with the intention of influencing vot-
ers to defeat Governor Alexander for
re-election, says the Bull Herald.
They were gotten out by a man who
was formerly president of the Anti-
Saloon league of this state, and drew
inspired under the guise of being a non-
partisan mover to defeat a "wet" candi-
date. The literature was spread broad-
cast at a time when there was no
chance to come back with an explana-
tion.

But to those who heard Governor
Alexander on his last visit to Bull,
the alleged anti-dry dope had no ef-
fect. Governor Alexander explained
his position on the liquor question
when he made a speech at the Metho-
dist church in Boise seven years ago
against the saloons. The governor
said that that speech cost him at least
\$25,000 in business, because he was
boycotted by the wets of the city. The
day following that speech 175 framed
circulars were sent at a dollar a
copy to the members of the Anti-Saloon
league of this state, and a Mr. Diamond
of the league, who lived in Hagerman,
and who happened to be in this city
last week and heard Alexander's speech
and who formerly lived in Boise where he witnessed the
boycott.

One explanation of the move is that
one of the members of the executive
committee of the State Anti-Saloon
league happens to be a particular
friend to D. W. Davis, and he, without
the knowledge of the other mem-
bers of the executive committee, sent out
circular letters discrediting Alexander
and his record on the liquor movement.
The other members of the executive com-
mittee repudiated the action taken, and
announced their repudiation.

A DAY FOR OTHER THINGS

DISTINCTIVE DECORATIVE DESIGNS JUST FOR YOUR HOME—FREE!

It is a surprisingly simple and easy matter to beautify one or all
the rooms in your home with Cornell-Wood Board.
Cornell designers will show you exactly how you can beautify
and modernize your home and tell you just what the cost of
material will be. No matter if you want just an idea, a few sug-
gestions for a single room, or a complete decorative scheme for
your entire home, we can give you just what you desire.
This service is absolutely free and places you under no obligation whatever.
ASK YOUR DEALER.

Cornell-Wood-Board

For Walls, Ceilings and Partitions
An endless variety of panel effects is made possible by the use of Cornell-
Wood-Board. Cornell-Wood-Board nails right to the studding or over old
walls and stays there. Takes paint or kalsomine perfectly.

Guarantee: Cornell-Wood-Board is guaranteed not
to warp, buckle, chip, crack or fall.

Manufactured by the Cornell Wood Products Co. (C. C. Frisbie, President), Chicago, and sold by the dealers listed here.

Nibley-Channel Lumber Co., Ltd.

Warned the public against this move to
betray Davis for political reasons,
and not because of his ultra dry rec-
ord.

Davis and Alexander, question their
stance for prohibition. But the circu-
lars distributed under the guise of
anti-saloon and W. C. T. U. dope, did
Alexander an injustice, and it will re-
act upon the organization maintained
for the purpose of putting the booze
out of commission.

Speedy and Easy Riding

There's little comfort in most low priced
cars. You can't use their speeds. They
jostle you—they ride roughly—they
don't hold the road.

The \$635 Overland is different. It is not
only the speediest of low priced cars—

But you can use the full speed of its power-
ful motor when you need it.

It has long 42-inch, easy riding, shock ab-
sorbing cantilever rear springs. In addition
the 75 B Overland is a longer car—104-
inch wheelbase. And it has 4-inch tires.

Its smoothness and ease of riding at any
speed would do justice to a much larger
and heavier car.

Come in and let us demonstrate. That's
the best kind of proof.

Uncle Eli's Fable

HOW THE MONKEYS PROGRESSED.

A HUNTER was one day walking through the forest when a Monkey, who was perched on a limb of a palm tree, called down to him:

"Hello, old man! What are you doing here?"

"Is that you?" queried the man as he looked up. "I was just walking about to see if things were as I left them ten years ago."

"And do you see many signs of progress in that time?" asked the Monkey.

"Not a one, and I am greatly disappointed."

"If you do not see any it is because you are frightened," said the Monkey as he wrapped his tail around the branch and revolved himself round and round it.

"Well, quit that foolishness and come to business. Speaking of progress, how have you monkeys progressed in the last ten years?"

"I will cheerfully explain. When you were here ten years ago it was to gather coconuts. The trees were too tall for you to climb, and you threw missiles at us to make us throw coconuts down at you. It was a sharp trick, and it made a fool of us monkeys for your great benefit."

"But don't you do it now?" asked the Hunter.

"No; we have got a better thing than that—a more progressive thing. Please throw a club up at me."

The Hunter did so with the utmost cheerfulness, and the Monkey seized a rock from the dozen he had carried up and deposited it in a crack of the tree and hurled it down with such true aim that it struck the man in the stomach and gave him a solar plexus knockout. When he recovered consciousness it was to hear the Monkey say:

"HELLO, OLD MAN!"

"Even the Monkey world cannot stand still. We had to throw puff balls to show that we were going backward, or we had to throw rocks to show that we were up to date and a little ahead."

RESCUING HIS BROTHER

This scene on the western front shows two English brothers, the elder helping the younger to safety after he has been wounded. The wounded brother has held onto his captured German helmet.

NEW DISEASE IS ANNOUNCED

From the Strain of Working Too Hard Comes "Angina of Effort," a Pain.

The rush of modern life has produced a new disease, greatly increasing in extent and especially prevalent among doctors, teachers, clergymen, lawyers and other men of affairs, observes the Philadelphia Bulletin.

Dr. Oliver S. Haines, who announced the new ailment, calls it "angina of effort." In plain English that means a sudden shooting pain under your breastbone because you're working too hard.

If, at the age of 50, you find yourself unable to walk a city block without a pain, you probably have "angina of effort." It comes from having lived too hard and sometimes from an "antagonistic attitude toward the problems of life."

No happy-go-lucky ever gets it. Those who have been obsessed by lust of power, love of struggle, or who harbor exaggerated ideas of their rights and privileges usually do. Everybody who gets "angina of effort" dies a sudden death, usually ascribed to gastritis, according to Dr. Haines. Dearly, corked up venom, brought on by mental conflict with the prevailing ideas, becomes a toxin, he says, which gives rise to a pain that radiates into every part of the body. Neuralgia, rheumatism and similar aches may be symptoms of it.

You can best be cured by slowing down, Dr. Haines thinks, and by modifying the competitive spirit that makes you carry into every day life. If you don't slow down, you're doomed.

For certain temperaments Dr. Haines announced more specific remedies. The victim of "Old Man Confidence," who worries over unimportant details, and cannot sleep at night because of the passionate and harsh way he has treated his family during the day, ought to be given a potash preparation.

For the emotional idealist who dissolves readily into tears—"at the movies, for instance, or the theater," Dr. Haines said—treatment by oxalic acid is the cure. The prey of suicidal desires is about hopeless in Dr. Haines' estimation, but he recommends arsenic for a trial.

Sure Remedy.

"Ah, dearest," sighed the young man who had just broken into the silly class, "my heart is burning with love for you."

"Is that so?" exclaimed the practical maid. "Wait a minute and I'll get you a little soda. Grandma says that's the only thing for heartburn."

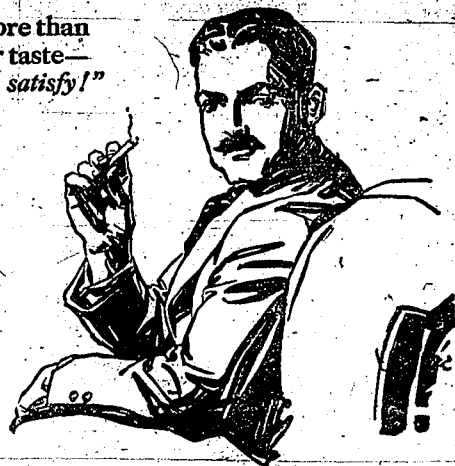

CONDENSATIONS

Patrolman Bartel and Mahoney and Building Inspector Corcoran of Ansonia, Conn., claim to have seen a parrot which annihilated its nails with a pocketknife. While these men watched, this bird picked up the knife from the bottom of its cage and, holding it in its mouth, carefully scraped its toes on the blade. When this was done to the parrot's satisfaction it dropped the knife.

Two infant humming birds, the mother of which was accidentally killed, are being brought up by hand at the home of Mr. and Mrs. Samuel Benn, founder of Aberdeen, Wash. The birds now are about grown. The Benns have fed them on honey, and they have become so tame that after being freed for the day they return to the Benn home at night for shelter.

For the first time in the history of great lakes navigation, iron ore is being loaded at the Ashland (Wis.) docks, into the steamer Clow by the aid of a giant magnet thus doing away wholly with the use of longshoremen's labor.

breaks down. We go bargain hunting until we are loaded down with things we cannot use. I like to go shopping," said a woman one day. "I see so many things I do not need." And that is the thrift habit now—and thrift is just what we need.

Doing without may be difficult at times, but it gets you somewhere. All successful careers are built upon it. Saving money and doing without is a painful process, but the results are mighty pleasures. Sacrifice is never easy and self denial never popular. But you can't have the big things of life if you insist upon having thousands of little things all the time. The boy who wants a bicycle must do without candy and soda and the like, but he knows his wheel will give him leading pleasures that will balance the little sacrifices. "Savings" for a purpose is not difficult, and self denial for larger pleasures becomes a joy. It is easy to follow the line of least resistance—to do the easy thing; to follow the crowd. But following crowds is a splendid achievement that will do you good and leave little behind. It is a splendid achievement, this doing without and less learn it. But the structure is built in a lasting one and beautiful. And the pitiful fact is that if you do not learn to do without now, there may come a time when you have to do without, and then it will be too late. That is the lesson of the purchase and the bread line. And as you practice the art of self gratification and ignore the virtue of self-control, the larger the shop window, the more the temptation to the appeal that is on every hand.

spend, and let yourself go, you too will join a crowd that is sliding down hill to nowhere, only to get a hard bump at the bottom, when it is too late to mend and wake up in tail regrets. But the thrift habit now—and thrift is just what we need.

Another sample of the deal that the Twin Falls Republicans handed to the west end, is exemplified in the result of the election for the legislature. The Twin Falls Republicans gave the west end Republicans to understand that Nihart was being supported by them as a regular candidate on the ticket. The Twin Falls Republicans were, of course, to support all the Republican nominees, who live in the city of Twin Falls and the east end of the county. In fact, the little deal was so cleverly executed, that the Republicans took them at their word, and gave out the information.

At one time, however, the Twin Falls Republicans became dubious, and called upon the chairman of the Republican central committee—William H. Nihart, who had been elected as a regular candidate on the ticket, to see if he could not get some of the Republican votes to elect Nihart.

that the Republican organization was not responsible for the statements which were being made to defeat Nihart by the Twin Falls ring, co-operate with the Republicans would be severed at once. A nice little appeal from Mr. Nihart, straightened the matter out all right, so that all was friendly—seemingly.

A glance at the comparative votes for legislative candidates in the city of Twin Falls tells the story. The Twin Falls Republicans were not at all asleep at the post. They early fixed up a slate to vote for two of the three Republicans on the ticket, scratched Nihart, and gave the third vote to Stims, a Democrat. The result was that in the seven precincts in the city of Twin Falls, where a total of about 1,400 Republican votes were cast, Nihart received about 257. They figured on electing the two other Republicans and H. M. Stims, but they did not calculate for enough ahead, and by their own method of voting, two Democrats were elected instead.

Nihart did not get wise on the false impressions conveyed to them until it was too late. But then, we learn, that was only a sample of what the Twin Falls Republican ring will do to defeat a west end candidate.

TALKS ON THRIFT.

THE ART OF DOING WITHOUT.
As time goes by the virtue of self denial is more and more apparent, and the art of doing without more needed. The social fascinations of today, the craze for dress, amusements, recreation, automobiling—all the glitter and attractions of a materialistic age—call loudly for self control, self denial and careful living. And those who try to keep pace with the crowd set a pace that kills.

No man ever succeeds who does not learn to do without. The very basis of religion, of good conduct, or good character lies in the virtue of self control. It is the highest evidence of self mastery and the foundation of all social and business success.

Did you ever stop to watch a crowd around a street fakir selling some article of household use—a potato peeler, for instance? How he persuaded the mob that their wives could not peel potatoes without it, found ready purchasers, who laid down their quarters, marched home and presented the article with pride and a righteous feeling of "helping wife in her daily labor," only to find her peeling potatoes the same old way the next day?

We listen to argument. We persuade ourselves. We are easily convinced that we need, in fact must have, many things that we do not need and do not want. We see things in the shop windows that appeal. We read alluring ads until our resisting power

LOUISA A. MOSELEY.

Notice

The replacing of the wooden sidewalks throughout the city with concrete and the building of new concrete sidewalks where there are no sidewalks, and where such sidewalks are needed, will be ordered in by the city council at an early date. The plat showing the location of the wooden walks to be replaced and of the proposed new walks is now on file in the city clerk's office for public inspection.

REESE M. WILLIAMS,
City Clerk.
