Bees Silence Church Bell With Honey
(By International News Service)
HALSBY, Ore., July 24.—A swarm of bees has taken possession of the bell of the Christian church here and has stored honey in such quantities that the floor has broken and honey is dripping down upon the bell, making it impossible to ring it for church services.

Christmas Is COMING And So Is Santa Claus

Because the weather is a bit warm just now—Christmas and its many gift problems are far from being in your thoughts. But we are right on the job. Mr. R. C. Beach and our Economy basement manager have been mighty busy of late—buying TOYS, DOLLS, and all kinds of good things that will please the little folks when "Santy" starts to hitch up his team—Of course, purchases made to sell in the big ECONOMY BASEMENT have to be away underprice, and we think that you will greatly appreciate the low prices we offer.

Remember we bought all the SAMPLES we could get hold of, and they run into hundreds of dollars, so you are assured of the choice from the biggest and best line—at the lowest prices.

The Idaho Dept. Store Clearance Sale

of Men's and Boys' Clothing
—Is something which all who seek to economize should attend. All Men's and Boys' Suits are at greatly reduced prices, also many lines of Furnishings, etc. Bear in mind that we handle the famous "Society Brand" and the "Alfred Benjamin" clothes. Many people are now profiting from this clearance sale, and why not you? Clothing will be much higher as you doubtless know, so fill your needs for some time to come.

"Pay as You Eat" in Place of "Free Lunch"

(International News Service)
NEW YORK, July 24.—Was... only has "free lunch" disappeared from every chair-queening emporium here, but "pay as you eat" lunch has taken its place alongside the hard-working longshoremen and the hungry truck driver to blasphemous philosophy on the faculty of armed conflict.

INCREASED YIELD PER ACRE

as well as increased acreage, is the avowed purpose of the American farmer in his attempt to help supply the world's demand for staple foods. This institution while naturally inclined to favor especially its farmer-depositors, invites all farmers in this community to call upon it for any useful service which it fairly can render to assist them in increasing the production of their farms. This year, as perhaps never before, every farmer needs a banker as his business agent and financial friend.

TWIN FALLS BANK & TRUST COMPANY

CHOP WARNING, HONEY AND BEES

Beekeepers should do their utmost this year to increase production. This means increasing the number of colonies in so far as it can be done without decreasing the crop. This means also give your bees their best attention. Those who have their bees in boxes have an urge, wherever we can reach them, to adopt modern equipment; but this will be valueless unless they at the same time adopt modern practices. The best beginner's book as well as one for the expert is the cheap encyclopedia called "ABC and XYZ of Bee Culture" which has been secured through the entomologist of Twin Falls.

Natural swarming should be curbed as much as possible and increase should usually be made by artificial division. You can increase crop by giving the bees plenty of room for storage for gathering and storing when bees are overcrowded. In this regard many commercial beekeepers are not doing their best. If you own a few colonies, increase their number to your profit, but remember that only by intelligent care can bees be made profitable, except in rare seasons.

The tendency at present, says the federal apiarist, is to encourage the professional beekeeper, and those who wish to enter this class should at once consider the establishment of additional colonies, care being exercised not to overcrowd any one location. To those who have not begun out-apiary management, this year promises to be a good time to make a start.

Idaho has established an apiary inspection system for detection of bee diseases and for instruction of beekeepers in their control. Circular Bulletin No. 442 gives the symptoms and treatment of the diseases. For Twin Falls county call on Ed Vance, deputy inspector, at the Bureau of Entomology. It can tell you whether diseases have been reported in your county.
Cardinal points:
1. Begin in the spring; plenty of room for brood rearing and plenty of stores; plenty of protection.
2. During honey flow, check the swarming; as undesirable as it reduces the crop. See Farmers' Bulletin No. 603 for methods of control.
3. During honey flow, give bees more storage capacity. It neglect may lose half the crop.
4. Protect bees from cold and also wind in all parts of the state. The checkers in Idaho this year is due to lack of this protection from freezing. See Farmers' Bulletin No. 635 for methods.
5. Comb honey (in sections) should be produced only from white honeybees and when they honey flow in rapid succession they are unsuited for any market save the local one. Extracted honey now sells best on government marks. It is never should be so considered and now is the time to prove its worth. Note that two-count honey supers may easily be converted into a deep extracting super or a hive body, if you wish to change to

Women Active in War Preparations

Gentler Sex jumps in tidying things in Shape To Lick Kaiser Wilhelm—Washington Tiring.
(By Edna Huber)
(By International News Service)
WASHINGTON, July 24—Really, Washington is tiring. It must be the rule of the hour here to get for the national capitol used to be such a lovely place for women to visit. But baggage are packed into elevators with them talking war, we are crowded hotel dining rooms with men talking munitions, and even in the ladies' rest-rooms the hotels the men side in to continue their war talk. Everyone is here, though, it seems. Of course the men predominate, for they are primarily the war makers. But there are lots and lots of women here and are carrying on some part of the burden of the war, and they are seen everywhere.
Mrs. George Thatcher Guernsey, the president of the D. A. R., seems to be all the time with loads and loads of things.
Miss Margaret Wilson, the president's daughter, gets around to all of the war benefits and Mrs. McLeod, another daughter of the President, is seen in every public activity. She has become a beautiful woman, and has a charming grace that has made her a favorite in Washington society.
Ida Tarbell, who is perhaps the best known of American women writers, seems to get down here occasionally. She has been working with George Creel, the official censor, who some of us know as the husband of Blanche.

Of course the suffragists are prominent and they mingle everywhere. Miss Carrie Chapman Catt is carrying on a great deal of work with her suffrage work. Mrs. Alice Paul, head of the Woman's Party, seems to have worn herself into a nervous wreck with the strenuous drive she has made to get a suffrage amendment passed during the present session.
The women of the stage get to Washington, too. Marie Dressler and a number of others came down a few nights ago to entertain the soldier boys at Fort Myer.
These are just a few of the women that I have met in the streets and hotels. Here, the war is on us, but if I am convinced, I am sure that the women are doing their bit.

Governor F. D. Garner, of Missouri; Governor Arthur Capper, of Kansas; Senator James E. Watson, Harry New of Indiana, and Hiram Johnson, of California, and Emerson McMillan, are down for speeches.

Truly a Legitimate Excuse for a Yokel
(International News Service)
NEW YORK, July 24—While the old speller and Webster's Unabridged may not have been in the curricula of certain of the truck gardeners out in the Borough of Queens, the boys in this city are labeled properly in any syllable terms of ordinary understanding they rarely fail to comprehend the drift of the conversation.
It was to one of these present-day plautocratic "armies" that the advance agent of "The Forty-Frivious," through the courtesy of a friend, was invited to obtain an option upon the gardener's barn by the roadside, the walls of which would have excellent billboards. To the gardener the the-

BEAUTIFUL ARTCRAFT PRODUCTION AND BIG VAUDEVILLE AT THE IDAHO, FRIDAY AND SATURDAY.
The man explained that the show was going to spend the summer at a nearby beach. But the gardener hesitated and the agent started to explain away all objections.
"I want you to understand that this is a strictly legitimate show," he said. "Strictly legitimate."
A puzzled frown appeared upon the gardener's face.
"You understand me, I hope," I said. "Legitimate," I confirmed.
"There, there, sure I understand!" broke in the devil in his own home town with a comprehensive grin. "Gimme ten passes and step all the posters you want to on that barn."

COUNTY PROTEST OF ASSESSMENT SENT TO BOISE

COMMISSIONERS DO NOT LIKE INTERPRETATION OF NEW LAW BY AUDITOR

Friendly Suit to be Filed in the Case

Plan Would Involve Heavy Assessment for Year to Assess Money to Effect the Change—Finch Writes Protest.

The letter published hereunder and written by E. J. Finch, county clerk of Twin Falls county, at the request of the Board of County Commissioners, places this county in line with those counties that have failed to act on the suggestion of State Auditor Van Dusen that the Board of County Commissioners pass at the July session a set of resolutions demanding estimates from county officers, once, with a view of going on a cash basis January 1, 1918.

The state auditor has suggested that friendly suit may be entered to determine the meaning of the statutes, and determine whether his construction of them is correct. The commissioners here are not entering the method suggested by the state auditor, considered of itself, but having adopted another, they point out that the state levy necessary to make the change is unfair and unnecessary. A tax case would cost little should any of the counties interested join in it. Adams, Bonner, Cam, Latah, Shoshone and Washington counties already have the system desired by the state auditor, and these will naturally not be expected to cooperate in preventing its adoption, but for the others considerable hardship will be experienced if the Van Dusen construction must be adopted at once. July 19th, 1917.

Wm. C. Van Dusen, State Auditor, Boise, Idaho.

Dear Sir: I have been requested by the Board of County Commissioners to reply to yours of the 27th inst., re the matter of placing the county on a cash basis.

The commissioners of Twin Falls county do not take kindly to the proposition that they should enter a friendly suit to determine the meaning of the statutes. Our fiscal year begins the second Monday in April and the levy is made in September. The statutes require the commissioners, at the time of making the annual levy to ascertain if there are any registered warrants outstanding issued prior to the second Monday in April and if there are such warrants outstanding that they make a levy for warrant redemption to pay such warrants.

This condition has never prevailed in Twin Falls county, at least as such a levy has been made for warrant redemption in necessary at times to register warrants.

collected over interest paid in seven years of \$6771.82. We never have any trouble in cashing our warrants, the local banks taking care of them at the face of the warrant.

In the matter of the budget system will say that our commissioners always ask for an estimate of every department of the county for the expenses for the fiscal year and use these estimates in determining the levy for the year. The feature of the law requiring the department to live within the estimate, however, has not been considered as to economy. If this feature is to be enforced it will result in the different departments increasing their estimates until they are sure they are absolutely safe and later in the fiscal year if a comfortable surplus still remains to the credit of the department there is a tendency to extravagance.

Our commissioners feel that in order to comply with your request it will be necessary to make a levy in January to run this county for one year and nine months. Our taxes are reasonably high at the present time, that is we bear our share from the tax payers but they are not paying enough. The commissioners fail to see the necessity, having their judgment on the record of the past seven years, of piling the money up in the banks at two and one-half per cent. They would not be able to use this money and could not buy supplies any cheaper. We would be pleased to hear from you further as to the benefits you think would accrue to the county by reason of adopting the plan outlined in your letter of the 27th ult.

With kind personal regards, I am,
Very truly yours,
E. J. FINCH, Clerk.

Military Company to Drill Wednesday P. M.

Will Gather Near Bickel School At Eight O'clock—Experienced Men to Be in Charge.

The first drill of the "Twin Falls Home Guard" company will be held on the lots back of the Bickel school house Wednesday evening at 8 o'clock, at which time the organization will take shape. There are now approximately 180 men who have joined the company, and others are expected. The lists are to be completed at the Monday Hardware company store where Mr. Arthur Appell has in charge. The following officers were temporarily selected at a meeting held on Friday night: Dr. J. B. Eskine, W. A. Ware, I. A. Appell, Floyd Ham and James Bower. All of these have had military experience and are proficient in the matter of drilling. The company will be divided into smaller bodies of eight men each under an officer corresponding to the corporals in the regular service and the whole organization will be military in character, based on the "Invent" form of the United States army organization. The company will seek to secure arms from the state. It will be under the orders of Sheriff R. H. Kendall and will, in case of any emergency, follow his instructions strictly, as its primary purpose is to maintain the enforcement of the law and to help in the settlement of the community, as voted by the people on the streets and everywhere, is unanimously in favor of the organizing of this company. All who favor the maintenance of law and order in the community are urged to join this organization, by signing the lists at the home guard. Of course, there are no military obligations for all members to attend drill on every occasion, but it will be present.

Judge Dietrich Lets Company Enter Suit

Holds That He Has Jurisdiction For Time Being In Case Against The Land Board.

Federal Judge F. S. Dietrich has decided that he has jurisdiction at least for the time being in the suit brought by the Twin Falls-Salmon River Land and Water company against M. Alexander, J. H. Peterson and E. B. Hart. It is the contention of the land company that the land in question involved in the decision by the federal judge is that of jurisdiction, the defendant having raised the question whether or not the suit against them is not a suit directed against the state of Idaho.

Home Guard Company Organized at Filer

A large and enthusiastic gathering of the people of Filer met in the Gem theater Tuesday evening for the purpose of organizing a company of home guards, says the Journal. C. A. Thomas and Deputy Sheriff Thomson, of Twin Falls, were present and addressed the gathering. They spoke at length on the necessity of the people of this county forming such organizations and what is expected of them. As is well known, the U. S. W. is becoming a menace in this and other western states, and it is for the purpose of taking care of home conditions that these determined people are handling themselves together, to take care of local conditions when these are in the course of preparation, and more and additional information will be ready to give out at the meeting held Tuesday evening at the Gem. If you desire to be enrolled on a guard roll on hand at that time. Only men who mean business are desired. No slackers or chicken-hearted, half-hearted Americans wanted.

FIGHT GRASSHOPPERS NOW

They Are Young and Hungry and Will Eat Anything, Whether Poisoned or Not. In Three Weeks Their Appetites Will Be Less and Less and Their Tastes More Delicate

FARM BUREAU NEWS

Where stover or alfalfa feed is eaten by grasshoppers, one of our best methods of control is to spray the infested fields with a sodium arsenite-spray solution made by mixing:

- 1 1/2 pounds sodium arsenite.
- 2 quarts cheap molasses.
- 50-80 gallons water.

This is the amount for one acre and should be sprayed evenly. Two bushels of molasses, too coarse a spray or the application of too much of the solution will burn the foliage and the grasshoppers will not eat the poison. Last year this district had a great deal of trouble from burning, and the notes was that the 200 pounds of molasses did not make a fine enough spray, or it was put on too thick by an inexperienced sprayer.

A cheaper method for poisoning for small acreage is Polston Bran Mash Bait, at the following rate for five acres:

- 1 1/2 pounds wheat bran, or wheat middlings or alfalfa meal.
- 1 pound Pair-Groen or 1 pound white arsenic mixed dry.
- 2 finely chopped lemons or 1/4 ounce lemon extract.
- 2 quarts strong emulsion molasses.

wherever the English language is spoken as follows:

- 1 barrel fresh horse droppings, 60 pounds to 100 pounds, 5 10-cents pills.
- 1 pound Paris green or other arsenite mixed above.
- 50 finely chopped fruits as above.
- 2 pounds table or common salt.
- Water to make whole mass soft but not sloppy.

Enough for 5 acres—Cost 30 cents

This was invented about 1902 by Norman Criddle, a progressive farmer of Hamblton, who noted that hoppers gather on fresh horse droppings in the field, and on sweet jumpers, blow handles or where prepared salt was present. It works best on young hoppers, and fence rows for newly hatched grasshoppers before they should migrate into cultivated fields.

Now it is too late to get all the grasshoppers in such situation at least in south Idaho, although the roadside locations are still producing the most hoppers. Fields in clover or alfalfa and pasture also produce hoppers in numbers and a telegram from the county commissioners of Onida county, July 8 says, "Grasshoppers are clearing the grain crops in this county. We are putting up a good fight but need a man to lead who understands the work of destruction." Similar reports are expected elsewhere from rumors received.

Write or call up the Farm Bureau office for further particulars and information as to where spray machines may be hired.

Local druggists have a good supply of these things on hand.
