MOONEY STRIKE IS WANNING ON COAST

Ship Building Industry, Worst Still, Shows Improved Conditions—Picketing in Baiter. SAN FRANCISCO, July 7.—Reports from Pacific coast cities indicated tonight the five-day strike in behalf of Thomas J. Mooney was fully making in the ship building industry of Oregon and Washington.

All but one of the yards in Portland, Ore., and along the Columbia river were reported idle. Officers of Oregon, Wash., yards which operated with greatly reduced force reported nearly normal activity on hand tonight. At a special session of the metal trades council in Tacoma a meeting was adopted warning members that the council would not stand back of those who endangered their place by such an individual effort. At Seattle the strike was reported to be confined to the building trades.

STRIKERS LOCKED OUT

PORTLAND, July 7.—The fourth day of the Mooney strike failed to bring any change in the faces of organized labor here. Apparently the other branch of labor of strike was the metal trades council, including the boiler makers and the metal mill workers. All metal trades workers in the ship yard and fitting out plants quit in response to the strike order. They have locked out of their plants by order of the ship building companies.

HUMAN ANCHORS HOLD. At times during the day the blizzard crews swinging to hand lines from the ship were lifted bodily from their feet as the wind blew the ship about. At no time, however, did the R-34 get beyond the control of her human anchors. Major G. M. Pritchard, executive officer of the dirigible's crew, discussing the difficulties in keeping the ship from injury late in the day, said he was sure that the men would be able to handle the situation.

R-3 SWINGS AT EASE OVER MINNOLA

Righted From Her Perilous Posture and Held in Control by Doughboys as Human Anchors.

By the Associated Press. MINNOLA, N. Y., July 7.—The return cruise of the British dirigible R-34 across the Atlantic could not get under way until after dawn on Wednesday. The projected plan to get the gigantic ship off at 5 a. m. on Tuesday was abandoned tonight after local weather conditions which, included adverse blimp winds, made it impossible for the dirigible's crew to exert the necessary control during the afternoon. Without such scrubbing it would be impracticable for the blimp to take off on her venture, as quantities of carbon accumulated in the engine during the 108 hours in which the crew was aloft on the unprecedented journey which ended at Roosevelt field here on Sunday morning. Craft Swings at Ease. Tonight the R-34 swung at ease below this flying ground, her graceful hull, scarcely moving in the gentle breeze which was blowing, by great searchlights which made her visible to thousands of spectators who had come here in motor cars, trains and on foot to watch the early leaving. In contrast with conditions as the darkness fell on Sunday, the dirigible was moving in a steady path. On Sunday she was suspended with her nose pointed towards the ground and her stern swinging at an altitude several hundred feet higher, in jeopardy of being dashed to pieces on houses in the wind, and of being acted adversely against her stabilizing surfaces. This situation does not prevail tonight. Let Out Water Ballast. Shortly before 5 p. m. the wind, having died down until the atmosphere was still, a stream of water poured from the ballast tanks. As this ballast left the craft, the R-34 moved upward slowly. From both sides, well forward, and from the undersides; also well forward, three wire cables were connected with anchorages on the ground. The stern was left to swing in the wind. As this ballast during the night. There was no possibility, Major G. H. Scott, the commander, said, that the stern would rise, as it did Sunday night, until her massive form assumed an almost perpendicular position. It was explained from sources here that much water ballast had by mistake been emptied from the stern. Tonight the amount of water ballast lost was greatly diminished throughout the night.

At no time, however, did the R-34 get beyond the control of her human anchors. Major G. M. GILBERT ON STAND TELLS HIS STORY

Denies Statements Attributed to Him by Those Who Took Notes of His Speeches.

By the Associated Press.

JACKSON, Minn., July 4.—Jas. Gilbert, former non-resistance league oration speaker and co-defendant with President A. C. Towsey, testified in district court here this afternoon that he never conferred with Gilbert made at Kenyon in 1917 and at Lakefield, in 1918, and that Towsey never conferred with him regarding addresses which Towsey made during the war.

Freedom and Gilbert are on trial charged with conspiracy to foster sedition by means of public speeches and literature.

March of Gilbert's testimony concerned the speech he made at Lakefield, January 23, 1918. He was first arrested while making this speech. The indictment charges that Gilbert in this address declared:

"Your boys are better off on the farms than in the trenches, five thousand men they are... in the trenches five thousand men away..."

TWIN FALLS DROPS HOLIDAY ATTIRE

Everybody Happy As Streets Begin to Emerge From Hanging and Decorations.

With the awarding yesterday morning of the \$200 salute to Daniel Taylor as the most popular cowboy on the grounds, the last of the decisions relative to the roundup was given and the work of paying the bills began.

It will take several days to check up and determine how the \$200 stand as a result of the celebration. It was stated last evening that the proceeds were something like \$12,000, while the bills presented were about \$22,000, but many large bills belonging the lumber bill were outstanding and unreported, hence it was said the profits would necessarily be what took down very materially.

The town presents a post-celebration appearance in places. Daily effort is being made to get the town cleaned up and there around the grounds what had been gorgeous and well-stocked stands and the streets wear a general appearance of emptiness.

At the same time, the sentiment is universal that the roundup was a great success in all its features and that the equipments paid to the boys for the energy and enterprise are many and varied.

By the Associated Press.

WASHINGTON, July 7.—Under instructions to make a complete report on conditions in Omsk, Roland S. Morris, United States ambassador to Japan, was expected by the state department to sail today from Tokyo on an extensive tour of Siberia. He will be accompanied by Major General William S. Graves, commander of the American forces in Siberia, who will accompany him to Omsk. The ambassador may visit the anti-Bolshevik fronts in European Russia after visiting Omsk.

Upon the recommendations of Mr. Morris, it was learned, will depend in great measure the time of the actual recognition of Kolchak government at Omsk as the government of all non-Bolshevik Russia. Mr. Morris' previous reports on the Siberian situation are said to have influenced allied and associated governments in what is being given recognition to the Omsk government.

Admiral Kolchak, it was said today by officials here, has not practically every request of the Paris conference relating to the establishment of a constitutional government in what is left of the former Russian empire and the various foreign offices were said to be satisfied that a constituent assembly election would be held as soon as the internal affairs of Russia permitted. The military operations of the Kolchak armies are progressing satisfactorily, it was said.

INCREASED WATER SUPPLY FOLLOWS THE REGULATION

Water in the Twin Falls Canal system increased considerably yesterday and the company was warranted in a delivery of 70 per cent the total amount of normal, which considering the present condition of crops and the cooled weather, is enough for the present. There has been no rainfall in the Snake river basin this week, but the hope for the celebration of July 4 had led to the increase the amount of water available.

FREIGHT Dwindles; UNCLE SAM LOSES

Roads of Country Are Operated by Government at Loss of \$30,000,000 in May.

By the Associated Press. WASHINGTON, July 7.—Decrease in freight business continues to be an important factor in causing a deficit in the operation of the railroads. Director General Hines said today in explaining that the deficit for class roads, those having at least \$1,000,000 annual income, amounted to \$36,000,000 in May. The loss to the government in five months this year has been \$272,269,183 for the large roads. Other elements in the cost of unified operation of the nation's transportation system, such as the rentals of the smaller roads, relations with short lines not under federal control, inland waterways, and the deficit in the express business, which Mr. Hines noted was "due to the fact that the increase in express rates has been very

much less than the increase in costs" will be the subject of a public statement soon by the director general.

VOLUNTEERS ASKED TO MEET TO SEARCH FOR HIGHWAYS

A call for volunteers has been issued by Mayor W. E. Eldredge to meet this morning at the intersection of Main avenue and Elbowe streets at 7 o'clock, for the purpose of making a search of the canyon under the direc-

tion of former Sheriff Frank M. Kendall, for the body of J. J. Richmond, who may have committed suicide a couple of weeks ago. Plans for the search will be laid when the party meets.

Follow Solomon's Plan in Selecting Building Material

"Send me also cedar trees, fir trees, and algon trees out of Lebanon, for I know that thy servants can skill to cut timber in Lebanon; and, behold, my servants shall be with thy servants."

Solomon knew in his day the great and lasting value of fir, cedar and pine in the construction of buildings for permanence. All old residents of Idaho have also had ample opportunity to test the element resisting qualities of the timber which grows in profusion over the mountain slopes of this great state.

"For I know that thy servants can skill to cut timber in Lebanon."

We, likewise, in Barber and Emmett, are equipped to cut timbers, and cut them in a manner of excellence never dreamed of by Solomon. Did you ever notice the smooth, velvety surface of a B P board? Solomon was compelled to cover his rough hewn timbers with gold-leaf to hide the surface imperfections. Our method of manufacture brings out all of the beauty of grain so cunningly wrought by nature, leaving an effect far more beautiful than beaten gold.

WE ARE BUY.

The country is all set now to try the great experiment—national prohibition. It will be interesting to see how it goes.

As a matter of fact, nobody really needs liquor either for his health or his happiness, nor is it all likely that being deprived of strong drink will drive a great people to extremes of crime in other directions.

In Idaho where prohibition has been in operation for some time it has generally been found that crime decreased notably. This has been the general experience.

So long as there are vast private stocks of liquor, and the sale of light beers and wines is permitted, it will be difficult to judge of what complete prohibition really would mean; but even as it is, a pretty good test can be made.

LET GERMANY WORK.

At last there is some slight sign that Germany is coming to her senses. Says the Tagles de Hunsdrecht of Berlin:

"What we need is a despot to compel the nation to work. If we are unable to install him, our enemies will send him."

That is the plain, simple truth. The German nation has never since the war, saying nothing and sewing wool—the most useful and profitable undertaking of his whole life. What the German nation needs is to do likewise.

To make the allies some small measure of recompense for the well done them, to restore their own country to something of its former prosperity and comfort and to make their own future tolerable and respectable, the Germans must stop whining and talking of revenge, stop seeking excuses for war, and go to work patiently and constructively.

Honest work is in itself a cleansing force. Through honest work and discipline allied Germany may in time wipe out the memory of her evil past and renovate her own soul. And it will be much better for her to do it of her own free will, in voluntary penance, than under the compulsion of the nations she has wronged.

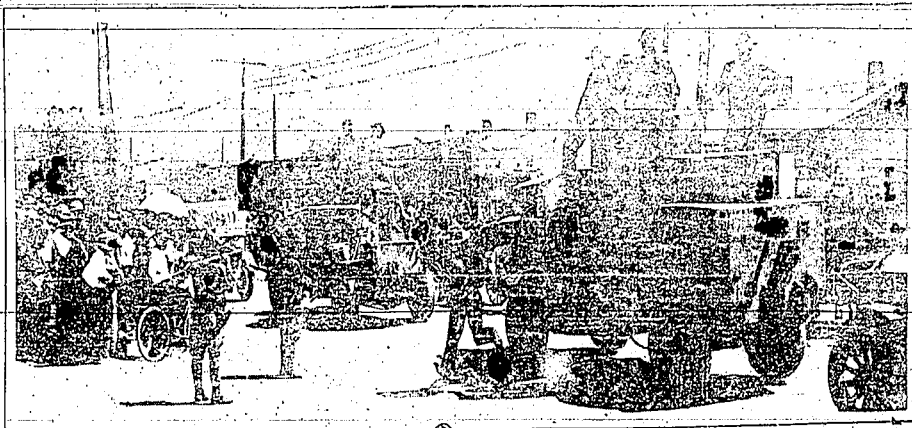

GREEK LOSES TO ITALY.

Italy recently defeated Greece, not in a battle but in a game of soccer football. The score was 2 to 0.

About the same time America defeated Canada by a louver score, 5 to 4. These games took place at the Pershing Stadium in France, where all sorts of thrilling international contests are going on most of the time.

The first trials in an inter-allied hand-grenade throwing contest have already been run off. Americans carried off the honors in that as well as in the javelin throwing.

SEVEN MEN RULED NATION IN SECRET

Congressmen Makes Bold Charge of "Secret Government" by Council of National Defense

WASHINGTON, July 7.—Seven men formed a "secret government of the United States," which, working "behind closed doors" determined all of the so-called war legislation "weeks and even months" before it was declared against Germany, Chairman Graham of the house committee investigating war department expenditures, charged today after reading into the record a digest of the minutes of the council of national defense.

The seven men were named by Mr. Graham as Holitt Godfrey, Howard H. C. Coffin, Bernard M. Baruch, Samuel Gompers, Franklin D. Martin, Julius Rosewall and Daniel Willard, members of the advisory commission of the council. This commission, he added, was designed by law to act in an advisory capacity to the cabinet, composed of six cabinet officers, but the president, he asserted, made them the real executives.

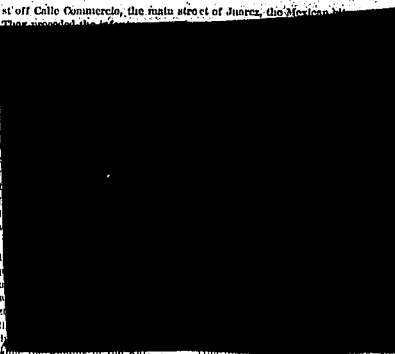

After Mr. Graham had read to the investigation committee a digest designed to show that the military draft food control and press censorship had been discussed by the commission several weeks before war was declared, Representative Dyer, republican, Kentucky, interpellated asked if "all this was prior to the president's speech on armed neutrality, in which he said he was not contemplating war?" The chairman answered affirmatively.

Mr. Graham said that purpose of the council and commission, offered in the senate and house, led Mr. Coffin to drop that a "definite channel of contact" be established between the council and congress. "In other words," commented the chairman, congress ought to be educated.

In brief, Mr. Graham's digest charged the president organized the council by violation of the law and that in addition to framing legislation, dictating public the country was to pursue, and befriended "big business." Included in the report read into the record was a letter by Judge Gary advising the commission it was discussing the laws "supposed to regulate business."

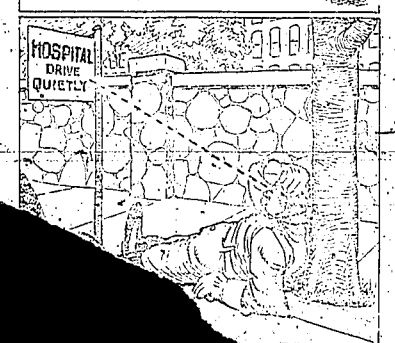

DENIAL IS MADE.

WASHINGTON, July 7.—(Categorical denial of Chairman Graham's charges was made by Governor D. H. Garrison, director of the council, in a formal statement. Garrison said the other day he had been on a committee. Mr. Garrison said at the outset a majority of the commission had decided that the president had no right to create such a body.

The council's minutes having disclosed these facts to Mr. Graham, he addressed himself to the council's session of procuring supplies for the war effort. That matter was brought out today before the senate military affairs committee and the intimations against members of the council's committee on supplies, decided of their own weight at the end of the London the same day by way of all committee members under the stress of an unprecedented emergency were undoubtedly in some cases placed in the apparent position of doing business with themselves, where as that never was actually the fact. Mr. Garrison said that purpose of the council and commission, offered in the senate and house, led Mr. Coffin to drop that a "definite channel of contact" be established between the council and congress. "In other words," commented the chairman, congress ought to be educated.

BURLEY GATHERS IN THE PENNANT

Descending Twin Falls Sunday by a score of 9 to 6, Burley won the pennant for the first half of the season in the South Idaho baseball league.

Twin Falls lost by a combination of weak batting, poor fielding and poor pitching. Alexander, on the mound for the locals, was not there with the goods. The visitors scored one run in the first, two in the fifth and five in the eighth before it was decided. By the manager that Alexander was losing the game for the homers. Carson was switched from first to mound, the visitors scoring one more run in that inning, making their total of nine runs.

The story of fielding is little better and the batting is about the same. Seven hits were made by them during the game, three by Neuman, Whitwell and Singleton were the only Twin Falls men who did not get on at least once, while Watson performed that stunt each time he faced Crane. Altogether, Crane, the Burley twirler, struck out 15 men.

NOTES OF THE GAME

Burley might be one regular team. It fully sustained its reputation by being one of the finest little clubs in Southern Idaho by the team and the big bunch of "rooters" that came down to play that game with the Twin Falls nine. Burley leaders put up such a superior article of baseball that it was more of a riot than a ball game. The recent Donpsey-Willard fiasco was an even fight compared to the one-sided affair staged at the local park Sunday.

The Twin Falls bunch played like a lot of school boys in the face of what is probably the strongest team ever gotten together in these parts.

No amount of money seems to be too big for Burley business men to spend in their successful efforts to get

together a winning aggregation. And, verily, they have one.

Twin Falls should absorb some of the Burley enthusiasm and the plainly evident "we-do-things" spirit of the live wires behind their team.

A tremendous crowd of fans is assured all over the circuit every time the Burley bunch takes to the road, and two seasons ago this afternoon Class is appreciated everywhere.

Toledo, July 7.—Joe Willard, defeated champion heavyweight champion of the world, tonight is on his way to Lawrence, Kansas, home and permanent retirement from the ring.

BEGIN HOT WATER DRINKING IF YOU DON'T FEEL RIGHT

Says glass of hot water with phosphate before breakfast washes out poisons.

If you wake up with a bad taste, bad breath and a sore throat, or if your head is dull or aching; if what you eat costs and forms gas and acid in stomach, or you are bilious, constipated or nervous, restless, and can't get feeling just right, begin with hot bathing. Drink, before breakfast, a glass of real hot water with a teaspoonful of the stone phosphate in it. This will flush the poisons and toxins from the stomach, liver, kidneys and bowels, and cleanse, sweeten and purify the entire alimentary tract. Do your inside bathing immediately upon arising in the morning to wash out of the system all the previous day's indigestible waste, gases and acids before putting more food into the stomach.

To feel like young folks feel; like you felt before your head, nerves and muscles began to ache with body impurities, get from your pharmacist a quart of phosphate which is inexpensive and almost tasteless, except for a sourish twinge, which is not unpleasant.

Just as soap and water act on the skin, cleansing, sweetening and freshening so hot water and limestone phosphate act on the stomach, kidneys and bowels. This is a "real" remedy, also, for constipation, biliousness, flatulency or have any stomach disorders should begin this inside-bathing before breakfast. They are assured they will become real cranks on the subject shortly.

OPEN COVENANT TO SAFEGUARD FRANCE

Public Knowledge That Britain and America Will Help Her Insure Peace in Europe.

By the Associated Press.
PARIS, July 7.—(French Wireless Service).—The French Government, explaining the agreement entered into by the United States and Great Britain to come to the aid of France in case of unprovoked aggression by Germany says:

"The language of nations cannot operate immediately. Years may go before it really comes into force, and in the meantime France may again be the victim of aggression. The danger of aggression menaces France more than any country which is a member of the league. America, being far away, and England more than ever protected by the sea."

The league of nations cannot operate immediately. Years may go before it really comes into force, and in the meantime France may again be the victim of aggression. The danger of aggression menaces France more than any country which is a member of the league. America, being far away, and England more than ever protected by the sea."

"Mr. Wilson and Mr. Lloyd George realized that France needed an immediate guarantee the simplest proclamation of which would keep in check and force for aggression. The agreement which guarantees the nation it will come into force if any provocation of aggression is made against France. But who could imagine our country capable of provoking a war? The treaty does not impose any obligation on France, but for all her binding themselves by it to provide her with the guarantees they deemed to be necessary. Finally, the treaty will remain in force until the league of nations decides that the league itself is sufficient guarantee against aggression. Such is the meaning of this unprecedented agreement. It will not be possible to abrogate it."

GLASS OF SALTS IF YOUR KIDNEYS HURT

20% Less Meat If You Feel Weakly or Have Bladder Trouble.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eating of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels, removing all the acids, meat and uric acid, else you feel a dull misery in the kidney region, sharp pains in the back or neck, headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The uric acid is cloudy; full of sediment; the channels often get clogged, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush off the body's uric acid waste get about four ounces of Bad Salt from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salt is made from the acid of grapes and lemon juice and has been used for generations to clean and stimulate sluggish kidneys and stop bladder irritation; Bad Salt is inexpensive, harmless and makes a deliciously refreshing lithia-water-drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases.

DANCE HALL ISSUE BEFORE COUNCIL

Curbing the Fun in—Council Officers Action On Health Plans—Another Week.

Dance pavilion elimination, the completion of the curbing and the enclosing of the Eighth street lateral this year, were the principal topics of interest at a long meeting of council last night which closed up a number of small matters pending the final approach of the end of the fiscal year.

Whether the dance pavilion is a legitimate business of a common and public nuisance, as conducted by C. D. Lyon on the corner of Second avenue and Second street north was a source of a long discussion before the council which ended in a ruling by City Attorney John B. Davies that it was a matter for the courts to determine. He said that the hall might be enjoined and the matter tried out in the district court, should some of the city ordinances covering nuisances permit the issue to be presented to the police court.

The question was presented before the council by a petition filed by Dr. W. H. Pike, who had examined the matter of sanitation for the Red Cross. Other speakers in behalf of closing were Rev. L. H. Frank, A. Guilford, E. A. Wilson and H. H. Bradley. Danger to health and to property from fire and the noise incident to its conduct were urged. Manager Lyons replied that the matter of danger of health had been remedied and he denied the accuracy of other charges, quoting a number of women whom he associated and it was enjoyable to have it in the neighborhood.

Under the decision of the city attorney the subject went over until to day when it will be looked into further.

It was determined by the council to proceed with the putting in of curb and the enclosing of the Eighth avenue lateral at the earliest possible moment. This will be called for and it is hoped to have this sort of work done and completed by the end of the month. It was also decided that the paving may be raised to the level of the street.

BUMPY WIND

Continued From Page One.

here the British government asked the United States government to build a ship in which to house the ship during her stay in this country. This the United States government refused to do. When the British government learned this it said something equivalent to all right.

Assuming the vessel was well worth the risk, that it would tend to increase the friendship between the people of the United States and England and that it would be well worth the cost even if the ship were lost, the British government authorized the flight.

Tonight, in event of any emergency which might require their presence, 600 men in khaki were held in reserve. The ship itself remained on the pier at the hotel.

It was at the hotel that the British attaché, General C. G. Grey, and his wife, Mrs. Grey, and Mrs. William G. McAdon, daughter of President Wilson, Mr. Sayre and Mrs. Myrtle Miller, wife of Colonel Miller, commanding the United States forces, were in the hotel field, through the night.

The great event of this afternoon of an hour in the ship.

No other visitors were allowed on the ship because the swaying of the great craft in the wind made it impossible.

Will Be Heavily Touted.

After the engine have been overhauled tomorrow, the fuel, water ballast and hydrazon will be taken on, and the ship is expected to be ready to start on Tuesday for an early start on Wednesday.

The early starting hour is necessary, Major Scott said, because before sunrise the temperature is not so high as to affect the petrol supply. By starting before sunrise, Major Scott explained, he would be enabled to use on 4500 gallons of fuel, a sufficient supply to last throughout the cruise.

The determination reached today is to have the dirigible pass over Philadelphia, Washington and other cities before setting a course eastward. General Carlson explained, reported from the unanticipated situation which the Helibellers found upon reaching here. They had expected to find a "short-cut" and "back" of an air route in the event of the dirigible being forced to remain on land elsewhere, then within a fangy sheltered from winds.

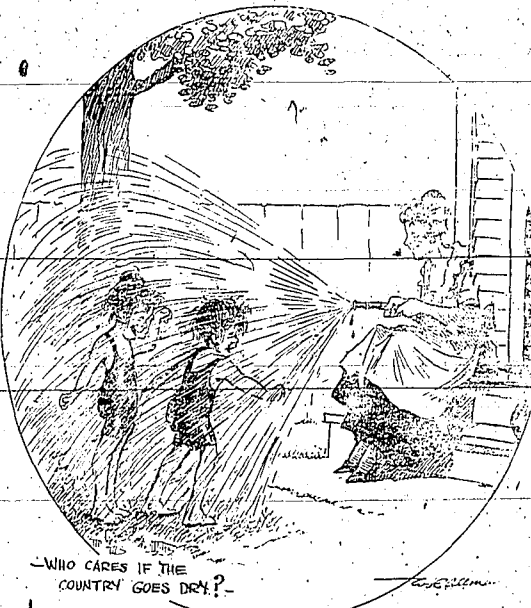

To carry here longer under such conditions, General Carlson said, the dirigible would be "back" for which the air ministry did not care to assume responsibility.

Weather May Delay.

Should average weather conditions prevail Wednesday morning, it was considered doubtful whether a start would be made, although American naval officials said it was not likely that the British would "take a chance" in their inability to get away.

THE GREAT AMERICAN HOME

—WHO CARES IF THE COUNTRY GOES DRY?—

How to Jump Into First Place.

On each 2-year subscription to The Chronicle or approximately its equivalent in shorter term orders, 40,000 votes are allowed—providing same is received at the campaign department before 9 o'clock Monday night, July 21.

Then, in addition to that, 50,000 SPECIAL EXTRA votes are allowed on every "club" of \$24.00 turned in.

Therefore, two 2-year subscriptions (amounting to \$24.00 in business) means 130,000 votes.

It can readily be seen by glancing at the vote totals above that just a few such subscriptions for any candidate would furnish a new leader in the race; in fact, an ENTIRELY NEW CANDIDATE what at this time has no votes at all, could, by a little enthusiastic action on the part of themselves and friends, climb to the top of the list and thereby acquire the leadership for the big prize automobile.

And, when one takes into consideration the value of the prizes to be awarded and the short time the competition is in force, they are well worth any effort they might take to secure.

LONDON PRESS OPPOSE TRIAL OF EX-KAISER

Fear Hohenzollern Legend to Keep Race Hatred Awake.

PLANS SUGGESTIVE OF PAGAN TRIUMPH

Say Unpleasant Incidents Might Follow Arrival of the Former Emperor in England.

By the Associated Press. LONDON, July 7.—Strong opposition continues to develop in the British press against the project of trying the former German emperor in London or trying him at all. Paris dispatches saying that America and Japan are opposed to the trial, and that Italian are lukewarm apparently have had an effect on sentiment here. Liberal newspapers such as the Manchester Guardian, the Westminster Gazette and the Daily News are leading the way with a part of the conservative press taking the same view.

that it would tend to make the Kaiser a martyr among the Germans, prolong the passions of war and upset the life of London. It is also said that the former emperor's arrival here might cause unpleasant incidents.

The Westminster Gazette is one of those holding that the best punishment for the ex-emperor is to leave him in security and the Times gives prominence to a letter from Sir Valentin Chirol, its foreign editor, expressing a fear that the trial might create a "Hohenzollern legend like the Napoleonic legend and bring upon Great Britain odium in Germany and in some neutral countries and if the prosecution should fail, it would mean a defeat.

The trials of some minor offenders are expected to begin in August. These will include commanders guilty of violations of naval warfare by the operations of submarines, those who ordered the bombardment of open towns and officers of press camps who mistreated captives in their charge.

TO ASSIST IN HARVEST. The Associated Press. WASHINGTON, July 7.—The commanding officers of Camps Pike and Bowie, Tex.; Dodge's, Ia.; Funston, Kans., and Fort Bill, Okla., were advised today by the war department to release every man serving under an emergency enlistment, who could be spared, for work in western wheat fields.

You Can Cook in Comfort in a Wired Home

How glad you will be this summer if your house has been wired for electricity! But that is not all—it is only in a wired home that your housework can be lightened by the numerous motor-driven labor-savers now in such common use.

The Oregon Short Line wanted to

have poles further on alley in Block 12, this having an existing, but the council decided that the company had no grade where the sacrifice of ground by the city would be necessary.

The question of chains against the city for the break in the water pipe month ago, was again vigorously debated by council for change in city attorney was instructed to prepare a written opinion on the question of liability for the next setting of the pipe.

It was stated that the city and the company will both be defendants in the suit.

George M. Dow asked of the city attorney placing air pipes in the alley for ventilation of his new building, opposite the city hall. Council indicated that it would grant the request, but told how to furnish necessary specifications. It then voted to close the sidewalk temporarily by its material while the building was being constructed, provided it did not use the street.

An city attorney received instructions to look up the ordinance and see if the proper health officer, as usual had been exercising that function.

The question of securing an operator for the new filtering plant was asked. James E. Byers was recommended, but no action taken.

JOHNSON ARRANGS NATIONS' LEAGUE

declares it to be "League of Armed Nations in a Gigantic War Trust."

By the Associated Press. PHOENIX, R. I., July 7.—Senator Hiram W. Johnson of California, speaking tonight, declared the proposed league of nations was not really an association to prevent war, but "a league of armed nations in a gigantic war trust."

"It is very creation," he added, "it has been stripped of every idealistic purpose it ever had. It contains within itself the elements of many wars, and worse than that, it reveals in the Shantung decision, the chains of tyranny upon millions of people and elements for all time unjust and wicked annexations."

"This league of nations, with the world who really wrote it, was meant to obtain peace only insofar as peace maintained forever tolerate their territories and their subject peoples; and it was meant that this kind of peace should be obtained by the exercise of the power, and force of the United States."

Summing up his criticisms of the league covenant, the senator said: "It means that I must abandon the lessons of my youth, which until this moment have been the creed of my manhood of American ideals and American patriotism; that I must deny Americanism I taught my children and that under God's blessing I hope to teach my grandchildren. It means the halting and betrayal of new world liberalism, the triumph of cynical old world diplomacy, the humiliation and end of American idealism. The issue is Americanism and I am an American."

He was arrested.

The crowd then turned its attention to the socialist headquarters and completely manacled to enter marching into the home of J. T. Brenner, a prominent socialist. Constable Blair of the police opened to the crowd to be calm and promised to place Brenner under arrest. The office entered Brenner's home and found him armed with a shotgun, and a revolver.

He was arrested.
