PUBLIC CURTAILS ITS PURCHASING OF MEAT

Other Products Slump—Retail Market to Soon Be Affected by the Drop.

By the Associated Press. CHICAGO, Aug. 27.—A drop of \$1 a hundred pounds of the average for hogs with lower prices for beef cattle at the stockyards today was ascribed to several reasons and partly to the general protest against the high cost of living.

Market man said the tendency was for still lower hog prices, particularly after the fall marketing, and they professed to see a break in high living costs.

The public has curtailed its buying of pork and beef recently while live stock receipts are large. The market market failed to set an emergency outlet, and the packers virtually drew their buyers from the pens today.

Export business has been depressed by the foreign exchange situation, the live stock men say, and the receipts of accumulations of hogs on the farms during the recent strike of railroad shippers, and a strong run of hogs in prospect, caused the weak market.

Which averages today's range was at \$1.48, the difference between today's lowest point and yesterday's high point was fully \$1.60, live stock authorities said, while the average drop for beef cattle today ranged from 50 to 75 cents a hundred pounds. Sheep also sold lower.

With lower retail prices on meats expected to result in a day or two from the lower live stock prices, other Continued On Page Five.

HIGH SCHOOL WILL EXTEND ITS SCOPE

New Courses Announced for the Entering Year—Government to Aid Cadets.

Plans for the commencement of the work in Twin Falls high school this coming year have been completed under the direction of Superintendent Blue.

Expansion of the activities of the school will be the main feature of the new year. While the new building will not be ready for many months, the faculty has been added to, and new courses outlined.

A cadet corps will be organized similar to that of last year. The government will provide everything except uniforms. For each student, the following equipment is provided: Rifle (complete), gun sling, cartridge belt, bayonet scabbard, haversack, canteen, cup, knife, fork, spoon, meat can, shelter half, shelter tent, pole, tent pins, 40 rounds of ball cartridges for each range, sixty rounds of gallery practice cartridges, twenty rounds of blank cartridges.

This work will be open to boys who are physically fit and at least 14 years of age. The government requires that when a student once enters the course he must complete two years of it in order to secure graduation. One hundred boys must enroll for the work in order to secure government aid. F. C. Hebo will continue as military instructor.

The Twin Falls high school achieved a notable record when nearly 200 of her boys enrolled in the military service of the country. A great many of these boys dropped their high school work to serve their country. Two plans are proposed to help these boys in securing graduation from high school.

One of His Majesty's fastest destroyers was used to bring His Future Majesty, the Prince of Wales, to America.

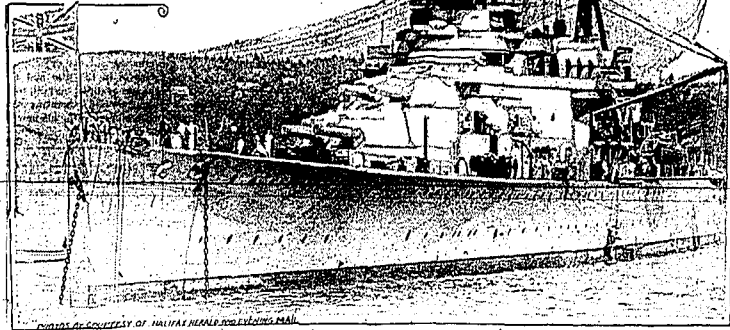

PHOTO BY COURTESY OF UNITED PRESS PHOTOGRAPHIC PLAN.

AM—JES' AS I GET STARTED IN SOME FUN IT MOVES ME THINK 'BOUT SCHOOL OPENIN'!

The first plan involves giving credit for military service. Such credits will apply on graduation. The number of credits to be granted will be found by multiplying the number of school months by 45. For example, if a boy followed two years—15 school months—of high school work, he will be entitled to eight credits. Any fraction of a credit will be counted as a whole credit. The second plan involves permitting these boys to carry five subjects throughout the remainder of their high school work.

The board of education has completed the third floor of the high school building. This will be used for the work of all the musical organizations. The bands, orchestras, glee clubs and choruses will recite on the third floor. J. T. Bainbridge is now a regular member of the high school faculty and will have charge of all the work in music. He will devote every school day to music work with the students. If any boy or girl is interested in learning to play an instrument or in becoming a member of the bands, orchestras or glee clubs, Mr. Bainbridge should be seen about the matter. If any student is unable to buy an instrument, provisions can be made for helping him get it.

At the suggestion of Dr. Bryan, state commissioner of education, the faculty is organizing courses in arithmetic and science and geography. These courses are open to seniors only. Any senior who plans to teach school is urged to enroll in these courses. Credit on graduation will be given for the work. Another advantage in taking these courses lies in the fact that work or credit in these courses will be accepted in lieu of the state examinations in these subjects. During the first semester a course will be given in arithmetic. During the second semester the course will involve grammar and geography.

Soon after the beginning of school, it is desired to reorganize many of the clubs that were permitted to lapse during the war. The school used to have an interesting Latin club, French club, an Agricultural club and a Science club, etc. French and Spanish are coming to have important places in the high school, and probably the organization of a Spanish club will be made.

The school shall try the plan this year of letting the students decide whether or not they desire to secure lockers and be assigned to definite lockers. A great many of the students who have always been required to secure lockers have never locked their lockers. When the new addition is completed, the entire building will be provided with open lockers. If any student desires a locker, he will call at the superintendent's office and with a payment of a fee of \$1 will be given a locker and assigned to a definite locker. If any student feels that he does not care for a locker, he is privileged to reject any locker not taken by those who deposit a fee and secure a locker. An last year, it will be necessary for two students to use the same locker.

It is the aim of the present administration of the high school to inaugurate the practice of student government to as great an extent as is practicable and as rapidly as possible. This can probably be done most satisfactorily through the establishment of a council designed to represent the student body.

Last year, the initial step was taken in the creation of the machinery available or giving the students the opportunity for expression of their wishes and government of the school. A student cabinet was organized which consisted of a body of nine members—the four class presidents, four class secretaries and the principal of the high school. This year it is planned to enlarge this body and increase the scope of its activities. A student council, comprising the eight senior class officers and the high school principal, together with four additional members—three elected from and by the senior class and one elected from and by the junior class. The student governing body will thus be expanded from nine to thirteen members. Upper classmen can exercise greater influence and assume more responsibility. To be elected to this body will be the greatest political honor a student can receive from his or her fellow students.

It is the aim of the high school faculty to give an opportunity for more complete and better training in the art of public address during the coming year than has been done formerly. As large a number of students as possible should avail themselves of this opportunity. The achievements of members of this high school in the past in all educational contests and debates with other schools in the state are an incentive to students to plan to take part in these activities during the coming year. The public speaking department will again be in charge of Miss Ida Brown. She will give a much larger amount of time to this work. Miss Brown returns from Chicago, where she has been doing special work in the "Schools of Expression" during the past summer. The use of the high school auditorium will be given over to pupils in public speaking much more exclusively than has been the case in former years.

The use of the high school auditorium will be given over to pupils in public speaking much more exclusively than has been the case in former years.

It is the desire to extend to all girls in the high school as large an opportunity as possible to participate in some form of physical exercise and training. To realize that aim it is planned to have this form of activity for the girls more completely organized than has been done formerly. Miss Ida Brown will give part of her time to the supervision of girls' athletics and physical training.

The work in boys' athletics will start with a new instructor, Mr. Neberger, who has been connected with the high school athletic work during the past three years will again be in charge. During the past summer Lincoln field has been improved by an expenditure of over \$2000. A tight board fence has been erected about the field and a modern grandstand constructed, which will comfortably seat a large body of spectators.

This year another instructor is being added to the commercial teaching force, giving three teachers who devote their entire time to instruction in commercial subjects. Furthermore, the curriculum is being enlarged and enriched. Two courses of study are now presented in the commercial department, or the commercial curriculum is divided so that students may receive training for the state entrance lines of work in the business world. The stenography course will emphasize training for stenographic and secretarial work. The business administration course will emphasize training for the management and conduct of business. During the first two years pupils in both courses will pursue the same subjects. At the beginning of the third year the work diverges into the two courses and those pupils taking the business administration course will be required to take advanced bookkeeping and accounting, economics, commercial law, advertising and salesmanship and business organization and management. Pupils taking the stenography course are required to study geography and typewriting.

In addition to the continuation of new subjects which were added to the course of study in the high school last year such as algebra IV, Spanish IV, geography, salesmanship and military drill, the high school intends to offer a number of new subjects this year which have not been given before. Opportunity will be given to students to study third year French, vocational arithmetic, grammar and geography, physiology, anatomy, boys' chorus, a complete regime of courses in agriculture and several additional subjects in the commercial curriculum which are dealt with more fully in another place. The course in economics will be conducted so that it will be proper to offer it of all students intending to use an accountancy and commercial departments. A new course will also be organized in art for those students who are interested in this subject. In this course, the emphasis will be placed upon the in-

struction or vocational side, involving such special work as painting, advertising placards, etc. Miss Virginia Anderson, a graduate of the University of Montana, will have charge of this work.

WILSON SEEKS RETURN OF DRAFTED FROM SIBERIA

By the Associated Press.

WASHINGTON, Aug. 26.—Plans for the withdrawal of drafted men with the Siberian expedition in receiving their return and sympathetic consideration, President Wilson today wrote Fred Meyer of Chicago, president of an organization composed of the men's friends and relatives which is making an organized effort to have them returned.

According to the secretary of war, the president said, the total enlisted

strength in Siberia is slightly more than 8,000 men, of whom not more than 6,000 are emergency men. Recruits electing Siberian service are being enlisted, Mr. Wilson's letter added, and already 3411 men have been chosen and more than 2,000 have been sent to Vladivostok to relieve the emergency men.

ROBINSON'S BLANKETS.

BLANKET talk these hot days seems almost too much, but as there seems to be some who are considerably "het up" over blankets it may not be amiss to say at this time that this store has always been noted for the good quality of blankets sold and at most reasonable prices.

In staple cotton and Woolnap blankets I have always carried the best quality that is produced and sold them with the original mill tickets. In recent offerings I have noticed that the brands mentioned are not those of the mills producing the best.

Aside from selling the first quality only of the best made produced, my regular prices are no higher than those offered at what appears to be special prices.

This is a good store to find reliable merchandise at reasonable prices and blankets are no exception, so come in when you are in need of blankets.

MEN IN NAVY CARB STICK UP FOOTIT

Paris Sees Western Style Holdup in Whitley House French Barrroom.

By the Associated Press. PARIS, Aug. 27.—Six men wearing United States navy uniforms carried out a spectacular holdup last night of a barrroom run by the famous French clown Footit.

The men entered the bar at 11 o'clock and five of them lined up the customers against the wall and searched their pockets. Meanwhile, the other man rifled the till, taking from it in addition to 10,000 francs Footit's watch and a diamond ring. Footit endeavored to defend his place against the marauders and broke a champagne bottle over the head of one of the men, who however, apparently was not injured.

Footit became famous through his appearances as a clown on the Odeon stage. He is well known to the patrons of all the Paris vaudeville houses. During the war he opened an "American Bar" on Montmartre street.

Accused Says He Might Be Braggart, Drunkard or Thief, But No Traitor.

By the Associated Press. PARIS, Aug. 27.—Examination of Georges Gaston Quinn, charged with communicating military information to the army and with having collected evidence against Edith Cavell, British nurse, executed in Belgium by the Germans, was continued today. Charges of fraud were made against the prisoner by several women who testified Quinn boasted he

would be able for a consideration to have their imprisoned husbands released. His ability to secure their release, the women asserted Quinn told them, was due to his "connections". Quinn admitted he might be a braggart, drunkard and thief, but declared he never betrayed France nor the allied organization headed by Edith Cavell for the release of war prisoners, as he was not aware of the existence of such an organization.

IF BACK HURTS USE SALTS FOR KIDNEYS

Put Less Salt in Kidneys, Feel Like Lead or Hammer.

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need a flushing occasionally, else we have backache and dull aches in the kidney region, severe headaches, rheumatic twinges, lumpy urine, sour stomach, indigestion and all sorts of bladder disorders. You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a teaspoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithium and is harmless to those with kidney trouble. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent, thirst-water drink which every day should take now and then to keep their kidneys clean, thus avoiding serious complications. A well-known, local druggist says he sells lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

HOARDS AND STORES

Attorney General Palmer, in the course of his efforts to put the food speculators out of business, makes a useful distinction between food that is hoarded and food that is stored legitimately. It is a distinction which the public sometimes fails to recognize.

Most of the foodstuffs accumulated in the storage houses are probably placed there in good faith, and belong there. They are the natural surplus of the season of plenty stored up to tide the nation over through the rest of the year. So far as this storage is legitimate, it is not only insurance against starvation in the season of scarcity, but it serves to steady prices throughout the year.

On the whole, the public undoubtedly benefits by it. If there were no storage houses and consequently no wholesale storage of perishable foodstuffs, it would always be as it was in primitive times, either a feast or a famine, with prices ruinous to the producer in the feast period and ruinous to the consumer in the famine period. Storage conservation is a boon to both.

"We are going to be very careful not to do anybody an injustice or to jeopardize the winter supply by forcing on the market the surplus of the summer season," says Mr. Palmer.

But along with these legitimate stores there are "hoards" of butter, eggs, poultry and other commodities bought up and withheld from the market for the sole purpose of helping to corner the market, forcing prices still higher and then profiting by the artificial famine created.

The hoarders and gamblers who are responsible serve no useful purpose. They are criminal parasites in the food industry. They are exploiting the public in the worst sense. They are "grinding the faces of the poor." They must be put out of business, and their hoards, which are in excess of the surplus needed to last through the winter, must be put on the market to relieve the present need and lower prices to their natural level.

THE EVOLVING COW

The head of the dairy department in one of the state agricultural colleges says that twenty years ago the average cow was giving 2200 to 2600 pounds of milk a year, and the best cows were giving as high as 14,000 or 15,000 pounds.

"Today the average cow still does not amount to very much, but she has developed into a 3800-pound cow. During this period we have developed cows that give us 30,000 pounds of milk."

He gives some interesting cost details connected with this lacteal evolution. When the average cow produced 2400 pounds of milk, that milk was sold at 5 cents a quart. The cow was fed on clover at \$4.60 a ton, corn at 35 cents a bushel and other grains in proportion. Labor ranged from \$13 to \$16 a month, and the hired hand worked from 4 in the morning till 7 at night.

"If that cow were still in existence to-day," he says, "with present prices for labor and feed, you and I would have to pay 34 cents a quart for milk."

The professor was arguing that milk producers deserve all they are getting for

their product. His statement makes at least an impressive argument for the improvement of cows, and of all other sources and means of food production.

When all is said and done, the surest way to lower the price of milk is to raise cows that give more milk. The surest way to lower the price of apples is to make the trees bear more and larger apples. The surest way to lower the price of bread is to increase the size of the wheat berry and the number of berries on the stalk, and raise more stalks to the acre. Likewise the surest way to cheapen manufactured products is to improve machinery and operative methods and so increase the output. And the surest way to bring retail prices down nearer to manufacturers' prices is to improve store-keeping methods so that goods can be handled less expensively.

NATURALIZING NAMES

During the war it became very common for foreign residents of America and Great Britain to adopt English names. In many cases this was done by simplifying the spelling or by translating the foreign name into the English equivalent. A third method was to choose some English name and ask the court to bestow it upon the alien-named individual.

This last system became a nuisance in England, where foreign people showed a decided preference for historic or old family names. Confusion of identity arose. One case is told of two students at Oxford. One was an upper classman who had adopted an English name in place of his original very foreign one. The other was a humble freshman of the same name. It had belonged to his family for generations. Most of the time the younger man thought nothing about the matter. But when the relationship of the two men was confused and the older, better known student was naturally assumed to be the real member of the ancient family, the freshman decided something ought to be done about the business.

England now has a law providing that in Anglicizing their names foreigners must use "the equivalent in English of the former name" and, if it turns out to resemble an old family name the consent of that family must be secured. Also, only naturalized citizens are allowed to alter their names. Persons who are still aliens must keep the names they bore August 4, 1914.

The latter part of this law will appeal particularly to Americans. Such a provision in this country would prevent the dishonest or treacherous alien from concealing his nationality by taking an American name, and it would add another to the many advantages of attaining citizenship.

OUR DEAD IN FRANCE

Although no final action seems yet to have been taken in the matter, the decision probably will be to leave our soldier dead abroad and permanently improve and beautify the American cemeteries in Europe. Practically every one who has given the matter serious consideration believes this to be the right way.

There are sentimental reasons for this action as well as practical ones. In a cablegram to the war department, General Pershing said:

"The graves of our soldiers constitute, if they are allowed to remain, a perpetual reminder to our allies of the liberty and ideals upon which the greatness of America rests. . . . I recommend that none of our dead be removed from Europe unless their nearest relatives so demand after a full understanding of all the sentimental reasons against such a removal.

"I believe that, could these soldiers speak for themselves, they would wish to be left undisturbed where, with their comrades, they fought the last fight."

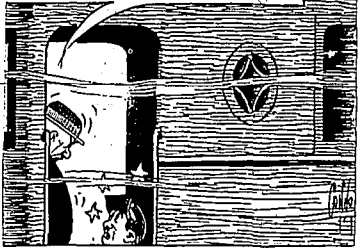

General Pershing, "himself a soldier, probably knows what he says. The brave boys who died "over there" are held as dearly in the hearts of Americans as they could possibly be if buried here. Their memory is as glorious in either case.

Two sessions to consider the new order from Warren S. Stone and W. G. Lee, president of the Brotherhood of Locomotive Engineers and Brotherhood of Railway Trainmen, respectively, telling striking trainmen to return to work immediately. They refused to comment on the developments.

As the result of the receipt of the telegram, local officers of the brotherhood tonight posted the following announcement signed by Lee:

"As the all acts of the brotherhood that we will engage in sympathetic strike and tell our men that less than two months ago 258 members of the brotherhood were expelled from the organization at Winnipeg for sympathetic acts. We will not let them lose their positions. Our members must return to work and uphold their contract; if they expect to retain membership and support of the organization."

Simultaneously the following notice, addressed to engineers and signed by Warren S. Stone, was ordered posted:

"Effective at once inform all members of division that strike is illegal from plant to plant. All members of the Brotherhood of Locomotive Engineers will be required to abide by the laws of the organization and carry out the contracts made in good faith both by the individual, roads and the federal government. Failing to do so, they will be expelled inside of 24 hours. Unless there is decided improvement, the government will take steps to operate the roads. You all know what this will mean. Impress on everyone the necessity of using sober thought and exercising common sense and not carried away by a wave of mob law."

 WASHINGTON, Aug. 27.—Director General Bliss announced today that there will be "final" instructions to the men of their organization participating in railroad strikes on the Pacific coast to return to work immediately.

DETECTIVES RAID CHICAGO "SCHOOL FOR BOLSHIEVISM"

By the Associated Press.
 CHICAGO, AUG. 27.—A school for Bolshevism, it was alleged by detectives, was raided tonight and 18 men arrested in the Preston Federal hall. A quantity of literature in Russian dealing with the Emma Goldman and Tom Mooney cases was seized.

According to the detectives most of the members are young men who are interested in Bolshevist ideas by speakers.

The prisoners will be interrogated by government agents as well as the police, according to the detectives.

SAGE AND SULPHUR DARKENS GRAY HAIR

It's Grandmother's Recipe to Restore Color, Gloss and Attractiveness.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Yours is the only way to get this mixture with no risk at all. In some, which is messy and troublesome. Nowdays, by asking any drug store for "Weyght's Sage and Sulphur Compound" you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, at a small cost.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time, by morning the gray application or two, your hair becomes beautifully dark, glossy and attractively combed. You will get a large bottle of this famous old recipe, improved by the addition of other ingredients, at a small cost. It is not intended for the cure, mitigation or prevention of dandruff, and after another ton of theseus.

MATURE PLANS FOR WILSON'S WESTERN TOUR

Will Leave Washington After Foreign Relations Committee Reports.

TO SPEND 25 DAYS

TALKING OF TREATY

Completed Itinerary Will Be Announced Some Time Today, Says Secretary Tumulty.

WASHINGTON, Aug. 27.—The itinerary of President Wilson's "swing around the circle" with addresses on behalf of the peace treaty in at least 50 of the principal cities of the country is expected to be announced tomorrow at the White House.

After weeks of uncertainty concerning the proposed trip extending to the Pacific coast, definite announcement was made today that the president would leave Washington as soon as arrangements could be made. It was intimated that the start might be made within 10 days or two weeks.

Changes in Plans. When this announcement was made, it was understood by White House officials that the review of the new Pacific fleet at San Francisco, originally set for September 2 or 3, had been postponed until September 15 and Secretary Tumulty said he believed the president would be at the Golden Gate by the latter date to take part in the ceremony.

Late in the day, however, Acting Secretary of the Navy Roosevelt announced that the review would be held on September 1. This was decided on, he said, when the president several days ago had requested that plans for the review go forward without reference to his trip to the Pacific coast.

Will Speak 25 Days. According to plans now being worked out in connection with the itinerary, President Wilson will spend twenty-five days laying before the people of the country his reasons for the immediate ratification of the peace treaty without change.

Although the president desired to greet General Pershing on his arrival at New York City early next month, he was asked to consider the tour of more importance. It was possible, Secretary Tumulty said, that the president might overcome the obstacle to an

early start by meeting General Pershing en route to the west, probably in St. Louis.

Changes Are Made. Some changes have been made in the itinerary as originally made when President Wilson was in Paris, but it was said his purpose was not to stop at Chicago, but not been changed, but he may speak in the middle west, at Columbus and Cincinnati and St. Louis.

While the itinerary was not completed tonight, it was regarded as almost certain Mr. Wilson would speak in Kansas City, Iowa, Minneapolis or St. Paul, Denver, Hot Springs, N. D.; Billings, Mont., then swing down the Pacific coast states, and after reaching San Francisco, come home by the southern route, making addresses on the return.

Will Follow Report. Under the present plans of senate leaders, Mr. Wilson's departure will follow closely submission of the foreign relations committee's report on the treaty, and his arrival to the country for ratification will be coincident with the senate debate on proposed amendments and reservations.

Just how far the senate developments have influenced the president's plans is not revealed, but it is known that he frequently had discussed his proposed trip with senate leaders in connection with the treaty situation.

In the opinion of some senators on both sides of the treaty fight, the aggressive stand taken by the committee in adopting "extra amendments" to the treaty has caused a definite change which may have had some connection with announcement of the president's plan.

WASHINGTON, Aug. 27.—The itinerary of President Wilson's "swing around the circle" with addresses on behalf of the peace treaty in at least 50 of the principal cities of the country is expected to be announced tomorrow at the White House.

COMPOSIT OF OTHER PLANS IS PROPOSED

Continued From Page One.

all valid and properly outstanding bonds would be assumed by the federal company, and guaranteed by the government, and stockholders in regular bonds would be given a definite plan to be permitted to exchange their holdings on a basis not exceeding the ratio during federal control, which otherwise would have no process of exchange. Stockholders in the new company, holding any convertible bonds, would have an incentive for efficiency, economy and progress by authorizing a dividend in excess of the standard one and pro-rata issues of new stock at par.

Would Limit Capital. Public interests, his plan held, should be secured against undue capital charges by limiting a majority of the capital in the new company to bonds, issued at the lowest available interest rate. Such certificates of the federal company, he proposed, should contain provision that they might be taken over at any time by the government at par and the accrued standard dividend.

Government control of the railroad during the war was defended by Judge Anderson, who asserted that under such control there was "less failure in the railroad business than in any other big industry," a statement which he said he recognized was "inconsistent with public sentiment."

Want Reduced Prices. Several representatives of railroads appearing before the committee urged that equipment purchased by the railroad administration at war prices be sold to the companies when the roads were returned at reduced prices.

In the senate a bill was introduced by Senator Leaton, republican, Wisconsin, providing for unification of the railroads into privately owned system with minimum earnings guaranteed and management shared by the security holders, public and employees.

DEFLECT COMPROMISE FROM PHONE CONCERN

By the Associated Press. NEW YORK, Aug. 27.—Telephone workers of California, Oregon, Washington, Nevada and Idaho voted to reject the compromise offer of the Pacific Telephone and Telegraph company and the federal wire control board, which recently halted a strike of the telephone workers. It was officially announced today.

BEST TO BE USED AS PRINCIPAL AMERICAN PORT

By the Associated Press. WASHINGTON, Aug. 27.—Dress will be used as the principal debarkation port for the army overseas until all activities in France have been closed, General Pershing advised the war department today. Where the accomplishment, Antwerp will be utilized. The forces in Germany already are being supplied through Antwerp.

5000 MEN FIGHT MOUNTAIN FIRES

Three or Affairs With Hundreds of Fires in North Idaho and Montana.

By the Associated Press. MISSOULA, Mont., Aug. 27.—Five thousand men composing the fire fighting forces of the federal forest service, were waging a battle today against hundreds of forest fires sweeping over Montana and northern Idaho, with no prospect of controlling the flames further than to save whosoever towns may be in their path until rain intervenes.

This estimate of the situation was made at the forest service headquarters here, where it was said that despite the refusal of federal troops to aid in the fight against the flames, no shortage of men is feared, civilian recruits filling the daily vacancies in the ranks of the fighters.

The most dangerous fire reported was the Deep Creek blaze, sweeping into the southern end of the Hitteroot forest from Idaho yesterday. A sheet of flame a mile wide, spread over five miles of Montana land, and creosoting the divide.

PRICE TUMBLE IS RESULT OF H. C. FIGHT

Continued From Page One. Foodstuffs, including fruits and vegetables, declined. In the commission house district, apples ranged 25 cents a bushel, oranges 50 cents a box, sweet potatoes 25 cents a bushel, peaches 25 cents, bananas 25 cents a bunch and canteloupes 25 cents a crate, tomatoes, green corn and watermelons also sold lower.

Declines generally were attributed to abundance in crop markets. The United States bureau of statistics reported 294 carloads of potatoes on the track; apples 42; watermelons 18, and canteloupes 45.

FAIR PRICES FOR MEAT

NEW YORK, Aug. 27.—In an effort to stabilize meat prices the committee on fair prices for meat of the

New York State Association of United Meat Butchers of America, today agreed upon a tentative fair margin schedule covering 15 head meat items. The list will be given a trial, during September.

The margins agreed upon are two cent higher than those in effect during the wartime period, but it was understood reductions in whole sale prices would enable them to sell at lower than wartime figures.

The maximum fair margin profit schedule agreed upon today follows:

Beef of good and medium steers: Chuck steak, 13 cents a pound; whole cross rib, 20 cents; cut cross rib, 24 cents; new beef 13 cents.

Hinds and ribs of good and medium steers:

Steak steak 17 cents; bottom round 19 cents; rib roast prime 18 cents; whole top sirloin 15 cents; cut top sirloin 19 cents.

Lamb: Leg of lamb 14 cents; rib chops 14 cents; chuck 3 cents; stew lambs under cost 4 cents.

Pork products: Smoked hams, unwrapped 2 to 16 pounds, 2 cents a pound; smoked shoulders, picnic, 25 to 7 pounds, 7 cents; smoked bacon, unwrapped 13 cents; pork chops, end, 8 cents; pork chops, middle, 12 cents.

The margins are based on "cash and carry" and do not include the cost of delivery service.

PHICES ARE DIPPING

WASHINGTON, Aug. 27.—Prices are beginning to turn downward in certain parts of the country but the slump has not yet gathered momentum sufficient to affect purchases for immediate use, according to reports to the department of justice.

Attorney General Palmer, asked today how soon results could be expected from the campaign to reduce the cost of living, said all the government wanted was a fair chance to show what could be done to take the artificial inflation out of the market. He said officials were well pleased with the success so far attained and that cumulative results were expected when congress enacted amendments to the food control law which criminal penalties can be imposed on profiteers and hoarders.

"We hope the public will begin to reap the benefit of our efforts before long," Mr. Palmer said. "For instance, we are making progress in obtaining promises from shoe manufacturers not to raise a limit beyond which prices shall not go."

Diapnoids, which apparently is nationwide, on the part of shoekeepers seeking to induce purchases now on marked the last day of the present season that prices will be materially higher next season, was condemned by Mr. Palmer as one certain thing which would make prices con-

these things if needed. His attention was called to advertisements in various papers stating straw hats, clothing and other non-perishable articles should be bought before next year's prices become effective.

"It is very unfortunate that some merchants take that attitude and we have been studying the situation," the attorney general said. "Extensive purchases now, reducing the supply and thereby the demand, would make their predictions come true, whereas we hope for a normal price level if the people do not stampede into a buying hysteria."

RIMBOLDY M. B. CHURCH CLASS-CONFERENCE YEAR

The Kimberly Methodist church conference year closed last Sunday night. It was voted a great success. During the year fifty-nine new members were taken into the church. The pastor's salary was raised \$300 by vote. Pledges to the amount of 14,450 have been secured for mission, war reconstruction and centenary work. Rev. G. E. Mangum, accompanied by the lay delegates are attending the conference at Weber this week.

PLAN "CLEAN-UP" FOR ALL VIOLATORS OF PROHIBITION

By the Associated Press. WASHINGTON, Aug. 27.—Recent arrests in New York for violation of the prohibition law will be followed immediately by "clean-up" in other cities, Attorney General Palmer announced today. He declared that the law department thought the law enforcement activities of the department of justice had been laid aside for the high cost of living investigation would be shown they are mistaken.

Intimation of Strike is Contained in Letter to Judge Gary of Steel Company.

By the Associated Press. NEW YORK, Aug. 27.—Although twice refused an audience by Judge E. H. Gary, chairman of the United States Steel corporation, John Fitzpatrick, chairman of the steel workers' labor committee authorized to negotiate for union recognition, announced tonight that another communication had been drafted by the committee in reply to a letter from Judge Gary today in which he refused to recognize the union.

Mr. Fitzpatrick would not divulge the contents of the new communication, which was drawn up after a long conference with Samuel Gompers, president of the American Federation of Labor. He also refused to discuss the committee's attitude on the calling of a strike which it has been authorized to order in the event of failure to reach agreement.

It was understood tonight that the executive board of the American Federation of Labor would hold a special meeting in Washington next Thursday to consider the steel workers' demands.

FRANCE TO MAKE USE OF WHITE COAL

Full Horsepower Capacity of Water-power to be Developed for Industry.

PARIS, Aug. 28.—Nine million horsepower is the total capacity of the natural waterfalls of France, according to a complete census made by Monsieur Jules Cole, under secretary of public works. Of that total 720,000 horsepower was utilized before the war and about a half million has been put into operation since 1914.

The advantage France may draw from full exploitation of its rich resources in power appears clearly when it is recalled that Germany has only 1,300,000 horsepower in hydraulic resources, that coal costs three times as much as it did before the war, and that the French water power corresponds to a total annual coal consumption of seventy-eight million tons—eighteen million tons more than France consumed annually before the war.

Former Governor Reaches Home in Best Health He Has Been In Years.

GOODING, Ida, Aug. 27.—Ex-Governor and Mrs. F. R. Gooding returned home this evening from Rochester, Minn., where the former governor was operated upon.

Gooding Gooding went east two months ago to be of help in framing and planning the campaign for land reclamation projects. His work in Washington was interrupted shortly after the introduction of the Mondell bill incorporating the Large Tracts bill of Illinois. He hastened to Rochester where he has since been for treatment.

"I am feeling fine, state the trip splendidly, and am stronger than I have been in years," said the ex-governor on his arrival here tonight. "The country looks scared in the trip west, Montana, Wyoming and Nebraska showing growth."

RALPH MULLINS, 15 YEARS, OLD, CALLED BY DEATH

Ralph Mullins, 15-year-old son of Mr. and Mrs. John S. Mullins, who live seven miles southwest of Twin Falls, died at a local hospital yesterday morning from typhoid fever. Funeral services will be held at 10:30 this morning from the DeWitt chapel. Rev. W. A. Moore will conduct the services.

NO SILK UNDERWEAR; SHIP IS HELD UP

ST. NAZAIRE, Aug. 27.—A relief ship with medical supplies for the Caucasus was held up for days here because two dozen suits of silk underwear sent from Paris to the Red Cross workers on board, were lost. Typhus is carried only by the louse and there is something about silk that the louse doesn't like. Therefore the workers (all men by the way) were under strict orders to wear nothing but silk underwear.

VACCINATION TO BE REQUIRED TO WARD OFF SMALLPOX

The Moral Risk

When the time comes to seek credit, a bank will want to know what you ARE as well as what you HAVE.

That's where the moral hazard comes in. And you can't establish credit over night. Rather, it is a matter of becoming KNOWN at your bank, of establishing confidence by the way in which you have kept your account, regardless of the amount you have to your credit.

Get acquainted—that's the first thing. Then develop that acquaintance into friendship. It will stand you in splendid stead when the time comes. Remembering also, that this bank offers you a complete banking service.
