

Pigeons Outwitted Germans Thru Fog and Rain

WASHINGTON, D. C.—Membership in the A. P. S. is a military honor no mere man may achieve.

The A. P. S. stands for the American Pigeon Service of the United States Army.

When the history of the greatest of all wars is written, these American birds will have their names in the annals. It will be told how the Huns were organized into shotgun squads to kill the winged messengers, but how 98 per cent of them outdistanced the bullets and "homed" with messages that enabled American artillery to locate and silence the enemy guns, to destroy trains of the foe's ammunition and to save thousands of American lives by re-enforcements and timely rescues.

"Heavier-than-air" planes were not the only ones who sailed above the enemy's heads. The Army Signal Corps had 10,000 pigeons overseas and 10,000 in America to be sent if they were needed. Birds carried 403 messages of incalculable importance, and at times when all other means of communication were unavailable.

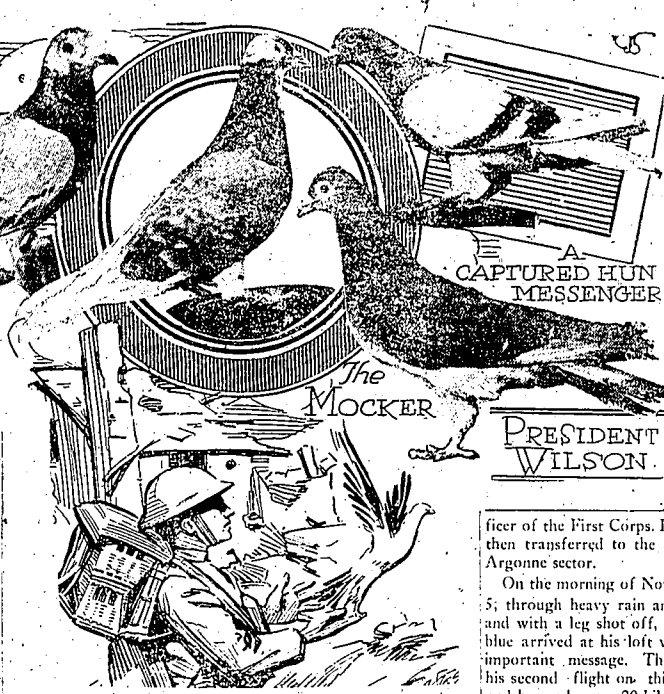

Helps Silence Enemy

"The Mocker," with his eye destroyed by a piece of shrapnel and his head a welter of clotted blood, homed in splendid time on the morning of September 12, a few minutes after 7 o'clock, in a thick fog and heavy rain. Never faltering, he bore tidings

of a particularly important objective reached and gave the location of several of the enemy's heavy batteries which were doing terrible execution on the advancing American troops. With the information American artillerymen were able to silence the enemy's guns in 20 minutes. The Mocker's wounds were dressed. He recovered and is now in the loft in Potomac Park here. The accompanying picture was taken on the blind side, showing his "disability" is the loss of his right eye.

Cited for Bravery

No less valiant is the record of "President Wilson," a huge

Feathered Heroes—three American messengers and one captured German bird

blue bird of wonderful vitality and rapidity of flight. So gallant was his work during the operation of the signal-officer of the First Corps. He was then transferred to the Meuse-Argonne sector.

On the morning of November 5, through heavy rain and fog and with a leg shot off, the big blue arrived at his loft with an important message. This was his second flight on this front and he made over 20 kilometers (12 1-2 miles) in 21 minutes. "President Wilson" also recovered and is now in the Hall of Honor of the American Pigeon Service here.

Perhaps the most heroic bird that died on the American front was "Cher Ami." He carried a tremendously important message from Grand Pre, on the Argonne, over 25 miles of hills and dales to his loft in Rampont. He shot up from behind the American breastworks like a rocket. His pigeonier saw him falter and flutter in the air a moment, recover, poise in mid-air for a second, and then, like a flash of light, shoot away with his head pointing homeward. At Rampont straight out of the sky like a plummet he dropped, striking his left breast first. Sergeant Kockler, his trainer, found the message tube was hanging from the ligaments of his leg, and he had a hole in his breast. "Cher Ami" died from his wounds and his body is mounted in the Smithsonian Institute.

Too Fast for Bullets

Perhaps the busiest bird on the American front was "Spike." Spike is the color of the sky, flies like greased lightning and eluded the Boche bullets. He delivered 52 important messages, never made a mistake and didn't get a scratch. He, too, is back in Washington.

No. 67,552 has no name yet. As far as known he was the only German bird captured alive. He was taken by the Americans in the St. Mihiel drive and is now associating with the American pigeons in Potomac Park.

Tiniest Broadway Star Is Busy Off the Stage

NEW YORK — The tiniest star on Broadway is also the busiest in her own admission.

Lillian Roth is 8 years old. In Henry Savage's latest production, "Shavings," she plays a part so important, in the opinion of critics, that almost any grown-up star, whose name is emblazoned in electric lights, might well envy her.

Lillian affirms that she is the busiest girl in the world, and backs up her sweeping statement with what appear to be most convincing facts.

"You see," says Lillian, as she deftly applies a touch of cosmetics to the face of her best beloved doll, Petunia, who also figures in "Shavings," "grown-up actresses don't have to work and everything when they are off stage. But I do. I have to go to school and do home work, and take lessons on the piano ukele."

A program of her day entails going to the Professional Children's School—which is solely for stage children—and studying writing, reading, spelling, geography, diction, French and singing.

"I love my teachers," says the little star. "But they're pretty hard. In regular schools, kids only have to study reading and writing and arithmetic. don't they? I wouldn't mind that—only the arithmetic. I think that's awful. I'm on cancellation and long division now, and they are dreadful things to think about."

But even the busiest girl in New York admits she has a lot of fun. For instance, there is the hour every day she spends in Central Park, shovelling snow, roller skating and talking to the "cop."

Lillian is very fond of her doll co-actress, Petunia

"I've got a regular cave-home for Petunia," says Lillian. "It's built in a snow bank, and the snow hasn't been warm enough so far to melt it. I have a lot of fun with Petunia, but I love roller-skates. I go everywhere on them, in the park and to the library, shopping and to the theater at night. Mother takes me to the theater an hour early every night so I can play awhile before I go on. I run her a race on the way, and beat her, because I can go faster on my roller-skates than she can, walking."

Lillian's dressing room, by the way, is considered a most wonderful place, thanks to Colonel Henry Savage. It was arranged especially for her, and has room for seven dolls and a doll carriage—which may explain her insistence upon the hour of play before her three hours of work every night.

Northwest Mounted Police Is Given Much More Jurisdiction

OTTAWA—Wearers of the "scarlet and gold" of the northwest mounted police—on February 1, renounced the Royal Canadian Mounted Police—are now charged with the enforcement of federal laws in all provinces of Canada. It is, for instance, as though the New York police force had its "beat" extended from the metropolis to San Francisco. Many of these intrepid officers are sons of aristocratic British families and are veterans of the great war.

The metamorphosis of the great organization known as the Northwest Mounted Police, organized in 1873, when the Canadian northwest was a sort of "No-Man's Land," recalls some of the heroic exploits of its members. One of the earliest of these was the heroic action of the late General Sir Sam Steele, then a sergeant. A camp of hostile Cree Indians were obstructing the building of the Canadian Pacific railway. Sergeant Steele, accompanied by a constable, rode into the midst of the camp, and while the redskins indulged in prolixious shooting, and war whoops, calmly ordered Chief Pie-A-Pot to get out within ten minutes.

The chief ignoring his order, Steele, garbed in a striking red coat, dismounted, leaped over Pie-A-Pot's squatting figure, through the

door and kicked out the center pole, bringing down the tent on Pie-A-Pot and his squaw.

The audacity of Steele's act in thus man-handling the head of the tribe overawed the Indians and they at once started to obey his order.

Of the many international cases handled by the mounted police, one of the most famous was that of fitting Bull, who, after wiping out General Custer's band in 1876, sought to use the Canadian border territory as a base of further operations against the Americans. With a mere handful of men the mounted police were able to control the Indians.

The remarkable endurance of members of the force have been frequently mentioned in the press. The death of the Fitzgerald patrol on the Fort McPherson-Deseront trail in 1910-11, when Inspector Fitzgerald and Constable Kinney, Taylor and ex-Constable Carter died on duty, was a notable instance. The four bodies of the men who had perished on the long trail, were afterwards found. The men had straggled on to the last, killing their dogs and even eating part of the harness. Fitzgerald, the last to survive, was found with his diary and a small bag under his body.

Many other interesting stories are told of these guardians of peace.

any workman because of his affiliation or non-affiliation with any labor organization; that there shall be no interference with any employer by any organization or its members while such employ is in the performance of his constitutional right to work; that the right to be reserved by the employer to engage or discharge an employe be not questioned; that employes be free to engage their employes on conditions mutually satisfactory to themselves and employer and in conformity to the public welfare."

The report of the committee, prepared by President J. E. Gallagher, shows that an investigation was made as to conditions, showing that the financial men of the state will not place their money in building enterprises of the present time because of "the prevalence of expensive strikes and a consequent delay in building construction." The report says that "provisions must be made for the removal of the cause of uncertainty and dissatisfaction." As to the building inquiry at Salt Lake, Logan, Ogden and Provo, it is reported, showing that they "appreciate the seriousness of the

Utah Industries Are Now in Favor of the American Plan

SALT LAKE—Representatives of for Utah in 1920. About 75 attended financial, mercantile, manufacturing, from Ogden. This committee was building and material interests from named on February 27 under resolution passed by the directors of the Utah Associated Industries. Under the plan adopted, working other business interests, at a meeting, hold March 12, in the Hotel Utah, under the auspices of the Utah Associated Industries mapped out a plan of action regarding building operations for the state, following a report from a committee which has been investigating through questionnaires, the conditions applying to the building work

TRADE CONFERENCE SAID TO BE SUCCESS

"Cash in Advance" Policy Must Be Abandoned by the United States, Is Claim.

MEXICO CITY—Local newspapers refer to the United States-Mexican trade conference which recently closed its sessions here as of "transcendent importance" and predict that as a result there will be "closer relations between the two republics, better understanding and mutual amity." They express the hope that the conference will be made an annual affair.

That Mexico is a fertile field for American trade expansion was admitted by all speakers and all agreed that if the United States is to get its share of business there must be a revision of its trade methods. A point insisted upon by persons acquainted with the country was that the "cash in advance" policy must be abandoned or at least modified. Germany and Great Britain, who appeared to be considered the principal commercial competitors, are liberal with their credits. It was declared, and Latin temperament does not take kindly to a policy that even hints at personal dishonesty.

American banks were severely scored during the discussion for an alleged lack of co-operation with American exporters in the matter of credits and other accommodations that might facilitate business. Representatives of these banks declared that there was no disposition to discriminate and that a suitable credit standing is all that is necessary.

Prospective advertisers in the republic were given many helpful hints by merchants here, all of them commending the newspapers upon their general reliability and worth.

F. W. Dunkerley, local banker and representative of the American Bankers' association, said that Mexican banks are opening commercial credits in the United States, Europe, China and Japan and that a system of trade acceptance is being worked out. He urged larger American invest-

ments. "The opportunity is here," he declared. "The time is propitious and some one is going to furnish the necessary capital. We hope it will be largely American."

"Send representatives to Mexico who speak the language—Spanish," was another injunction imparted by many speakers. "The reason Germany is strong here," declared one, "is because every business man who comes here speaks Spanish as fluently as his native tongue. He has been educated to understand the people he lives as they do and he more than any other foreigner makes money in Mexico families. Moreover, he has one business policy that few American firms follow. He fills an order card frame for every one of the principal objection Mexicans find with American firms is their constant substitution with something just as good." That coupled with a harsh credit system makes entry difficult.

The conference did little formal business. An address by John A. Aronson, president of the American Bankers' association, in which he advocated the calling of an international banking conference and the establishment of an international clearing house, resulted in the appointment of a committee to draft a resolution endorsing this sentiment. The committee, however, failed to meet. Another resolution which called for formal action provided for a system of exchange of students between American and Mexican universities.

COAST GUARD CUTTER TAKES SUPPLIES TO YAKUTAT

JUNEAU, Alaska—Laden with medical supplies, the United States coast guard cutter Algonquin will leave Juneau within a few days for Yakutat on the southeastern Alaska coast, her summer headquarters. From Yakutat, the Algonquin will patrol Alaskan waters to render medical assistance to fishermen and the fishing fleet.

The vessel will haul all ships sighted and receive a report of whether there is sickness aboard. Medical attention will be given on the spot, if necessary, and in more serious cases, the patient will be rushed by the cutter to the nearest hospital.

CAR PLANNED ON EASE OF OPERATION

Dealer Declares Gear Shift Designed to Make Driving Easy.

"Ease of operation is a phase of motoring which has been carefully considered by Westcott engineers and the result is a car which can be driven for hours without fatigue," says Mr. Gordon of the Gordon-Davis Auto Co., "distributors for the Westcott larger Six and lighter Six."

"The gear shift lever has been designed with the idea of allowing the driver to take an unimpeded, easy position, and still find the lever accessible. A well-designed curve and an added height give results which are a pleasant surprise to a driver who handles the Westcott for the first time."

"The unusual completeness of the instrument board is also a factor in bringing easier driving. On the board will be found all the essential instruments and a rugged not often found. Besides the ammeter, oil pressure gauge, lighting and ignition switch with lock and speedometer, will be found a gasoline gauge, registering the contents of the tank in the rear of the car, and a radiator, a new type of temperature indicator which indicates on the dash board the motor heat. It is connected with the cylinder water jacket, recording the engine heat. There will be found also a spot light plug, an electric cigar lighter and a control for the coal ventilator. A new type of eight-day keyless clock is used."

PLAN TO ORGANIZE WESTERN G. O. P. FOR HERBERT HOOVER

By the Associated Press. CHICAGO, March 17.—Plans to organize a committee in middle western states for Herbert Hoover for the republican presidential nomination were made today by representatives from eleven states who attended a meeting in Chicago at the invitation of Ralph Arnold, a California mining engineer, who started the California Hoover campaign.

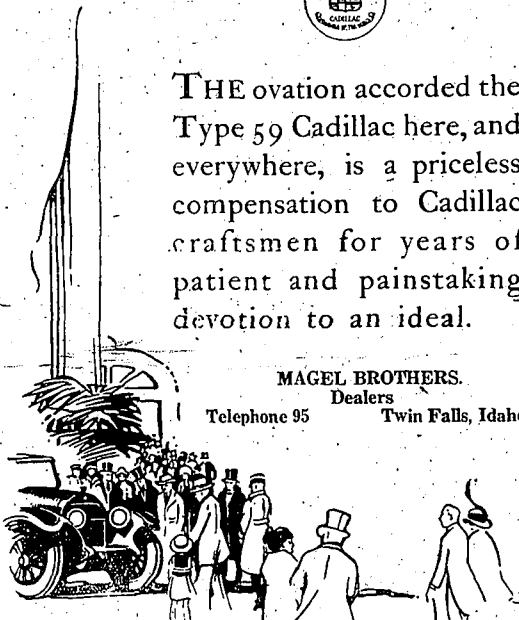

Headquarters for Illinois, Wisconsin, Iowa, Minnesota, North and South Dakota, Nebraska, Missouri and Kansas would be opened in Chicago soon, Mr. Arnold said.

FLOOD WATERS COVER LOWLANDS IN MONTANA

MILES CITY, Mont., March 19.—Flood waters in the Yellowstone river are reported to have backed up

Ford

THE UNIVERSAL CAR

Out of the more than 3,000,000 Ford cars now in use, about 60% have been sold to farmers. Probably no other one thing has brought to the farm so much of comfort and profit as has the Ford car. It has enlarged the social life, doubled the facilities for marketing, brought the town next door to the farm, multiplied for the farmer the pleasures of living, and by the same token the Ford Touring Car has brought just as much pleasure to the residents of the towns and cities, because it is an every day in the year utility, answering the demand of quick transportation at low expense. A family car without an equal in low cost of operation and maintenance. We solicit your order for one. We have the full line of Ford cars. We carry the genuine Ford Parts, and assure you the best in mechanical service and the most reasonable prices.

Western Auto Co.

THIN CLUE LEADS TO STOLEN CAR

Dealer Makes Surprising Recovery Long After Giving Up Hope

Recovery of stolen automobiles would be easy if every victim had the good fortune that befell H. H. Richardson of Owensboro, Ky., not long ago.

Mr. Richardson is Dodge Brothers dealer in Owensboro and frequently brings men to drive cars home from the factory in Detroit. Several months ago he left one of these new cars standing in front of a hotel while he took dinner. It was stolen. The police were given a complete record of numbers, but nothing ever developed. Richardson gave up the car as among the permanently missing.

A month and a half after this incident he was sitting in a car in front of a store when a Dodge Brothers touring car rolled by. There was nothing unusual about the car except that the fenders seemed particularly spotted.

"Something tells me that car was stolen," Richardson said to his companion. "I may be crazy, but I'll just follow it." He trailed the car a few blocks and it stopped in front of a restaurant. When the driver was inside, Richardson inspected it. The number plate on the floor board had been removed and his first suspicion was verified. The car number on the floor had been filed off and another stamped in its place. The engine number had likewise been tampered with.

Richardson stood guard while his companion called a policeman. The three then accompanied the driver to police headquarters. There the original records were compared with other secret numbers on various parts which the careful thief had overlooked, and the identification was complete. It developed that the fenders had been solemnly insured, as Richardson first suspected.

The driver proved to be the "owner." He had bought it from the thief in good faith and his investment was a dead loss. Never again will he deal with a stranger when it comes to buying motor cars.

AIR CHARTS TO BE MADE BY U. S. OF MEXICAN BORDER

EL PASO, Tex.—Air maps of the Arizona-Mexican border will be made by army air service reconnaissance branch as soon as landing fields for same airplanes are located and charted, according to announcement at Fort Bliss. Preliminary work already in under way.

Long stretches of border are mountainous, cut by deep ravines and gullies that cross the border and the terrain is said to be extremely difficult to survey and map in the ordin-

ary way. After photographs of the line have been taken from airplanes, the negatives are to be reduced to a uniform scale and joined. This is said to be a result in a map not wholly accurate, but which will show features of the terrain that engineers surveying from the ground would be almost certain to miss.

WORLD'S WIRELESS RECORD MADE AT WALLAUPE

BOSTON, Feb. 18.—United States naval radio station at Wallaupe, six miles from here, has established a world's record for handling transoceanic traffic according to the station's records. The Wallaupe senders and receivers handled 21,000 words in one day recently, this total being exclusive of inter-Island business and ship-to-shore messages.

Recently the other chief station in Maine was reported to have set the pace for the remainder of the world with 15,000 words handled in one day. The Wallaupe station averaged that much during December, averaging 16,000 words in January and, by officers, if the present pace be kept up, will set a new class in an average of 20,000 words daily for February.

FAIR PRICE COMMISSION HEADS QUIT; NO PUNDS

By the Associated Press.

CHICAGO, March 18.—Major A. A. Sprague, Jr., chairman of the Fair Price commission of Illinois, and Mrs. Joseph T. Bowen, head of the woman's state fair price organization, with her entire staff today announced their resignations. The announcement was unexpected.

Reasons given by both Major Sprague and Mrs. Bowen were practically the same. Both asserted they could not carry on the work adequately with the limited force at their command.

Mrs. Bowen declared that lack of financial interest by Washington was to blame for the collapse of the Illinois organization, and denounced the national plan to introduce "cheap meat week" as "a scheme to bring added profits to the packers."

WOOD SAYS MILITARY TRAINING NOT UNDERSTOOD

By the Associated Press.

MILWAUKEE, S. D., March 18.—"There has been a great deal of misrepresentation regarding military training. It has been made a matter of cheap campaign notoriety by those who have not served and who do not understand what they are talking about, or who, if they understand it, deliberately misrepresent the facts," said General Leonard Wood, republican majority candidate for the presidential nomination in the first of two addresses here tonight.

Despite the atoms which covered everything with ice and snow, the theater was packed and an overflow meeting was arranged in the city hall auditorium.

WESTCOTT

The Car with a Longer Life

Those many extra miles of trouble-free driving are what sell more Westcotts to the men who have already driven Westcotts. In both the "Lighter Six" and "Larger Six" types, it is the car of long life and more than ordinary satisfaction.

WASHINGTON SALMON FISHING DEPLETED

Report of the Commissioner Discloses Results of Intensive Work.

OLYMPIA, Wash.—Washington's salmon industry, once among the leaders in the state's activities, has been almost depleted by the intensive fishing of the past six years. L. T. Darwin, state fish commissioner, declared in his annual report filed with Governor Louis F. Hart.

Creation by the legislature of a fisheries commission to take full charge of fishing operations in Washington waters was recommended by Mr. Darwin.

He urged that foreigners be barred from fishing in the state waters, because, he said, the destruction in a large part has been accomplished by persons not citizens of the United States. During the war, he said, foreign fishermen banded themselves together, took the lead in the industry and increased the price.

Sookee, salmon runs of the Puget sound have almost been wiped out by the heavy fishing, the report stated. The Silveride and Chum or Dog salmon have also been reduced in number. The humpback salmon runs probably will be attacked by the fishermen next and, in a few years, the commissioner predicted, they, too, probably will be depleted.

Columbia river, Grays harbor and Willapa harbor waters of Washington have not suffered to the extent of Puget Sound. Mr. Darwin said, largely because of the greatly increased hatchery work. But as the fishermen are beginning to take immature salmon and are preventing the fish from reaching their spawning grounds, it is probable that these waters will suffer more soon.

TRADE BALANCE IS AGAINST BRITISH

Compared to Pre-War Days, Situation Adverse to Great Britain

LONDON.—Great Britain's adverse trade balance for the year amounted to \$439,000,000. Against this will tally Britain's "invisible exports" which have been estimated by the board of trade at \$400,000,000. For freight charges, \$30,000,000 in interest on foreign investments, and \$10,000,000 in license charges, bank charges, commissions, etc. These would total \$520,000,000, leaving an adverse balance of \$149,000,000 as compared with the pre-war favorable balance of \$224,000,000.

A considerable reduction of the excess of imports over exports is expected in 1920 for two reasons in particular, says the American Chamber of Commerce in London. First, the imports in the early months of 1919 are stated to have consisted largely of war materials which will, of course, not recur in 1920. Second, 1919 was largely a year of restriction for British manufacturers. In 1920, therefore, the American Chamber of Commerce says, Britain should be able to save accordingly on imports of raw materials while the exports of finished goods should be increased.

Despite the fact that Britain's 1919 imports were more than twice her 1917 imports in value, the American Chamber points out that there were only four-fifths the 1913 imports. The average cost of British imports "figure" out about \$14 a ton; in 1915 it was about \$41 a ton. Great Britain is still importing less than her pre-war quantities.

A review of the monthly totals shows an almost unbroken rise in the export of British goods, culminating in a yearly total of practically \$725,000,000. Of this \$625,000,000 or almost 50 per cent were manufactured

articles, a tribute to the degree to which British production is under way despite the crippling difficulties of industrial disputes since the armistice. According to the American chamber, prospects for British trade for the coming year, both for export and receipt, are unusually promising.

MAKE PLANS FOR THE FIRST ELECTROLYTIC COPPER PLANT

NEWTON ABHOTT, Eng.—This little town has been chosen as a site for the first electrolytic copper refinery in Great Britain, to cost \$10,000,000.

This is the first of its kind in Great Britain. The non-ferrous trade committee, formed by the government, strongly recommended a plant capable of producing 100,000 tons of copper should be established in the United Kingdom for which, as far as possible, British copper in dilute form should be used.

The government promised financial assistance if required, and Sir Gerard Muniz, a member of the West Bromwich copper firm, who was chairman of the committee, now heads a syndicate which will erect the new copper refining plant.

At Newton Abbot there are the water facilities, in addition to a bed of over 300,000,000 tons of lignite for the generation of electricity at a very low cost.

EXCHANGE SITUATION MAKES FOR UNIQUE OPPORTUNITIES

LONDON.—Theoretically, it would seem impossible to turn a profit by merely buying a short trip through France, Switzerland and Italy, says a Swiss correspondent of the Daily Graphic. He gives this formula:

Take a £10 banknote into France, and change it for 420 silver francs. With these enter Switzerland, where they will make 2,100 Italian paper lire, then pass into Italy and cash into Italian silver lire. You may have 2,100 Italian silver lire. Take these back into Switzerland, and you have 2,100 Swiss francs, as the silver lire are accepted here as equal value in Swiss francs. Now buy French paper marks, and you will receive 4,200 French francs. Return to France, where you buy English notes, and you get £100 more or less.

Practically, it is not so easy, as silver coin is rare on the continent, and there is the French prohibition to carry more than 1,000 francs out of the country.

HAWAIIAN MONARCHY FIRST TO MAKE THE COUNTRY DIRTY

HONOLULU, T. H.—Historians of the Hawaiian Islands assert that an Hawaiian monarchy was the first government in the world to put absolute prohibition into effect.

Kamehameha, the great, first king of United Hawaii, in 1795, after having conquered all the other islands, issued an edict imposing prohibition. In later years foreign nations forced liquor on the Hawaiians and its sale was general on the islands until the great war, when, with the opening of the arms training camps in the islands prohibition went into effect.

HUNS' BIRTH-RATE BETTER

BERLIN.—The birth rate is making a rapid recovery throughout Germany according to statistics which have been gathered by the American Red Cross representative here. In most sections of the country, the number of births per month is now double that of a year ago, when the lowest point in the curve of vital statistics was reached.

Placards for Berlin show a greater improvement than for any other city in Germany. Health conditions throughout Germany, however, indicate a steady betterment.

USE HAMPERS IN POST RURAL SERVICE

Unique Experiment Being Made by the New Haven Farm Bureau

NEW HAVEN, Conn.—An experiment in the use of the hamper for carrying product of the farm from the farmer to the city householder, is being tried out in Connecticut. The department of agriculture has approved the idea which is patterned on that of the parcel post rural service. The street railway express is the medium of transportation, not the mail.

Farmers can take orders by telephone, fill up a hamper and deliver it to the street railway company which maintains an auxiliary express service along the lines with automobile delivery in the cities. Eggs, poultry, potatoes, apples and other farm products, ordered over the wire, may be delivered in a few hours with as much care as a marketman in town gives to his city customers.

The New Haven county farm bureau which for a year has studied local marketing by the trolley found the possibilities of the trolley express were such as to develop a "farm to table" delivery by means of a "home hamper." Commentator is glibly ridden with trolley lines. Tens of thousands of farmers can see across country trolley lines pass. Express cars pick up any stoppage place. Hampers made up in Milford were delivered in New Haven and Bridgeport within two hours, or in as short an interval as a city merchant makes his local deliveries.

The plan contemplates use of a uniform hamper, easily handled on express, recognized by car crews and automobile drivers as containing food-stuffs with the possibility of perishable articles, like dressed poultry, or breakables, like eggs.

Experimental hampers hold enough food to last a family several days. Success of the plan depends largely upon the initiative of farmers in securing customers who are willing to have a delivery made in this way.

FIVE HUN SHIPS TO BE ALLOCATED TO UNITED STATES

By the Associated Press. WASHINGTON, March 19.—Five German surrendered warships allocated to the United States under the armistice terms, a battleship, a cruiser

and three destroyers, will be brought to this country next month, it was announced today by the navy department. Under the supreme council agreement the ships must be destroyed within a year after arrival in this country.

SUMMARY OF DISASTER DUE TO MISTAKEN TOPOGRAPHY

LOS ANGELES, March 18.—The beaching of the submarine U-1 on Santa Margarita Island, Lower California, with the loss of four lives, was the result of the topography of that island being mistaken for the entrance to Magdalena bay, according to members of the crew of the motorship Manhattan, which brought to Los Angeles harbor today the survivors of the submarine.

SOMETHING IS WRONG: MILK PRICES TO COME DOWN

By the Associated Press. TACOMA, Wash., March 19.—Milk dealers today announced that the retail price of milk here will be reduced from 15 to 12 1/2 cents a quart beginning April 1. Dairymen said the lower price is due to the fact that condensate in the state are over-stocked.

Essex Almost Doubles Light Car Endurance

Essex Has Performance Like the Costliest Fine Cars—Its World Endurance Record Has Never Been Rivalled

The most important thing Essex has proved is that weight and size are no longer necessary to finest car quality.

Its 3037 miles in 50 hours is a world endurance record. The test was official. Supervisors of the A. A. A. certified the Essex stock chassis in every detail.

Never before was a car driven at top speed for 50 hours. The grind was equal to years of road use. Yet the Essex showed no measurable wear.

What car, the Essex size and weight, can even attain a mile-a-minute speed, much less keep it up for 50 hours?

Such Endurance as You Want in Your Car

These decisive tests proved Essex not only the supreme performer of the light car field, but they showed that the moderate priced, economical Essex has such endurance and dependability as few large, high priced cars offer.

Greater size could add nothing to Essex. It has the qualities, weight and size are built to give—riding comfort, solidness, distinction and smooth, quiet pace. But in addition it has fuel, oil and tire economy. And its great durability means freedom from repair costs and positive, dependable transportation.

Essex is easy to operate. Driving does not fatigue. Its quick response to the lightest touch and its smooth, restful comfort in motion, account for this.

That is why so many women are Essex owners. They appreciate its safety, too. Its controls are simple and instantaneous. It makes fast time, with security, even in difficult traffic.

Essex Wins On Quality Minus Useless Weight

Essex won recognition on the issue of finest quality without useless weight and size. That issue is uppermost today.

You will take pride in your Essex from the first. Its beauty, luxurious fittings and its performance give it distinction everywhere. And time will increase your respect for it. You will come to rely absolutely on its dependability. You will find it always ready for any demands you may make.

These are reasons why Essex set a world's sales record in its first year. And orders are now so far ahead it is certain even that unrivaled mark will be surpassed this year.

Thousands, realizing this, are placing their orders now. We advise that you do the same, to avoid disappointment.

MICHIGAN-SENATOR GIVEN LIMIT ON CONVICTION ON ELECTION FRAUD CHARGES

Newberry, Paul King, Frederick Cody and 13 Others Held Guilty.

SENTENCES STOICALLY RECEIVED BY PARTY

Sen Granted Ninety Days to Perfect an Appeal-Will Retain Seat in the Upper House.

TRUMAN H. NEWBERRY

By the Associated Press.

GRAND JURORS, Mich., March 20.—Truman H. Newberry, junior United States senator from Michigan, was today convicted by a jury of having conspired criminally in 1918 to violate the election laws. He was sentenced by Judge Clarence W. Scowron to two years imprisonment and fined \$10,000.

Sharing the fate of the senator were his brother, John S. Newberry and 15 campaign managers, including Frederick Cody, New York, and Paul H. King, Detroit. Both these men received the limit sentence with their chief.

Brother Fined \$10,000.

Charles A. Floyd, Detroit, was also sentenced to two years in the penitentiary, but he was fined only \$100 as much as Newberry. The brother who was not sentenced to Leavenworth. The lightest sentence went to George S. Ladd of Sturbridge, Mass., and he was fined \$1,000.

Other sentences assessed were:

- William J. Mickel, two years. Allan A. Templeton, one year and six months. Roger M. Andrews, one year and six months. Milton Oakman, one year and six months. Richard H. Fletcher, one year and three months. James F. McGreor, one year and three months. Fred H. Henry, one year and three months. Hannibal Hopkins, one year and one day. E. V. Chilton, one year and one day. Harry O. Turner, fined \$2,000. B. Frank Emery, fined \$2,000. Judge Jennings overruled a motion for a new trial pending an appeal.

End Comes Quickly.

The trial passed into history with great velocity. It was ready with its verdict at 11:12 a. m. Less than half an hour later they had been discharged by the court after freeing 68 of the 80 defendants. There was a brief reprieve for luncheon and then the senator and his 15 associates were brought in court today. News of the convictions had been spread around the city and the room was jammed.

Ordered to stand before the bar, the men arranged themselves in a crescent, the senator on the left and his brother next.

The act of ranging the men before the bar died away to absolute stillness. In quiet tones Judge Sessions asked if any of the men wished to say anything before sentence was pronounced. They stood mute. Then the court, in even voice, read the time honored formula of sentence.

"Truman H. Newberry, in your case, it is the judgment of the court that you be confined in the penitentiary at Leavenworth for the full time and period of two years and be fined \$10,000," said the judge.

Audience Is Silent.

No one stirred as the audience caught the words that showed the judge had addressed against the principal defendant the heaviest sentence allowed by the law.

Received Stoically.

There was a deep breath or two audible as the same measure of justice was meted out to King and Cody. One or two of the defendants stirred.

Continued On Page Four.

TURKEY MUST BE GOOD, SAYS LLOYD GEORGE

By the Associated Press.

LONDON, March 20.—Premier Lloyd George yesterday discussed the Turkish question with the Imperial conference headed by Mohammed Ali, who declared that Turkey should have all her post-war territory restored. The premier replied: "I do not understand Mr. Mohammed Ali to claim indulgence for Turkey; he claims justice, and justice she will get; Austria has had justice; Germany has had justice; why should Turkey escape?"

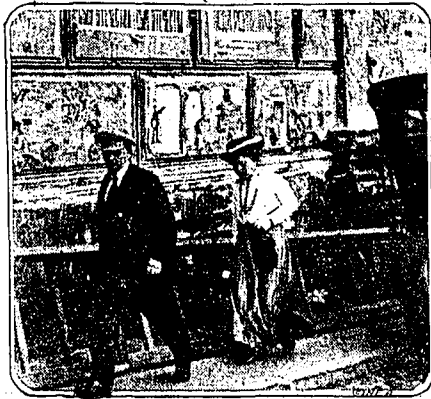

"Turkey thought she had a deal with us. Why did she come in and try to stab us and destroy liberty throughout the world while we were engaged in this life and death struggle?"

"Is there any reason why we should apply a different measure to Turkey than we have meted out to the Christian communities of Germany and Austria?"

"I want the Mohammedans in India to get it well into their minds that we are not treating Turkey severely because she is Mohammedan. We are applying equally the same principle to her as to Austria, which is the greatest Christian community."

Referring to the temporal power of the caliphate, the premier said he would not interfere in a religious question, in which Mohammedans themselves are divided. The declaration requested that the American massacres be investigated by an international commission of which the Moslems were represented.

Lenin a Swift Walker

This exclusive photograph, direct from Russia, shows Lenin 'looting' his sister a merry pace through the streets of Moscow. The fact that she can't keep up seems to be causing the Bolshevik chief no great concern.

GOMPERS ATTACKS CONFERENCE PLAN

Declares Proposed Machinery to Settle Industrial Stacks Lacks Simplicity.

By the Associated Press. WASHINGTON, March 20.—Recommendations by President Wilson's conference for settlement of the industrial unrest were attacked today by Samuel Gompers, president of the American Federation of Labor. In a prepared statement he said the machinery for adjusting disputes between employees and employers "which has for years been in existence in practically every organized industry in the United States is superior to the machinery now suggested by the industrial conference both in point of simplicity and in point of effectiveness."

"The conference," said Mr. Gompers, "has devised a mass of machinery to be made effective by law, composed of a national industrial board and local and regional conferences and boards of inquiry. The whole scheme in this respect may be summed up as follows: 'To aid and assist machinery for arbitration and adjustment between employers and employees exists wherever such machinery exists perfectly wherever employers forsake the spirit of dominance and the attitude of autocracy.'"

"Through one of this machinery it has been found possible to maintain industrial peace with no stoppage of any kind for periods ranging from 10 to 14 years. No machinery devised by the government or its agencies or supervised by the government or any of its agencies, could achieve results superior to the results achieved by machinery which has long been in operation in our industrial life."

"In industries where the employees are not organized, no machinery of any kind, whether supervised by governmental agencies or otherwise, can produce industrial justice. With organization of workers, no structure of machinery need be thrust upon it from the outside. Organization brings with it machinery which is both adequate and practical, the result of experience of any of the fustian or pure theory."

"The report of the industrial conference merits criticism of a very serious nature in connection with the emphasis which it places on what it terms 'employee representation' under which generic term it groups those distinctly non-union organizations known as shop committees, shop councils, works councils and representative government in industry. It is to be feared that the commission views industry from the viewpoint of a single shop and builds its machinery on the theory that disputes are caused by the shop. If such a viewpoint is to be actually carried into operation it will be most disastrous."

"Unavoidable" organization of independent shops-units of the employees is a menace to the workers for the reason that it organizes them away from each other and puts them in a position where shop may be played against shop. Not only the welfare of the workers, but the best economy for the national demands that industry insofar as possible, be viewed in a national light and that the workers be united into organizations covering whole industries as is now the case with the 126 national and international trade unions."

TRAIN FEINERS ARRESTED. DUBLIN, March 20.—There was a roundup of prominent Sinn Feiners throughout Kerry early this morning.

POINDEXTER AND WOOD SWAP VIEWS

Debate Issues in South Dakota Primary Campaign—Selection to Be Made Tuesday.

By the Associated Press. PIERRE, S. D., March 20.—The labor situation and the league of nations were the chief problems discussed by Maj. Gen. Leonard Wood and Senator Miles Poindexter of Washington, republican candidate for president, in the opening speeches of their joint debate here tonight.

Senator Poindexter, who opened the debate, declared that "an abyss existed" between General Wood and himself on these two issues. He argued that he supported rejection of the league of nations covenant and that General Wood was on record as favoring ratification of the covenant with reservations. Senator Poindexter also declared that his "open shop" labor policy was contrary to General Wood's views.

General Wood declared "he could not permit Senator Poindexter to dig an abyss between them because no abyss existed." General Wood did not directly state whether he favored an open shop or not, but he said: "No man should be compelled to work and no man should be prevented from working if he wants to work."

"Touching upon his attitude toward the league of nations," the general declared: "My letter to Senator Borah leaves America free and untrammelled to accept the mandate she ought to accept from the mandate of American public opinion. When we turn our people to war, it is going to be done under the mandate of the American people and not under the mandate of any group of foreign nations."

A state-wide primary for presidential endorsement will take place Tuesday. At the republican convention held here last December General Wood was endorsed for the nomination. The convention, under the state law, was obliged to decide upon a permanent issue and it chose "Americanism" as its slogan.

MINNESOTA DELEGATES TO GO UNINSTRUCTED

ST. PAUL, March 20.—Minnesota will send four uninstructed delegates at large to the national republican convention in Chicago next June. The delegates were selected at the state republican convention held here today.

A resolution instructing them to vote to General Leonard Wood for president was voted down by the convention, 536 to 498, after a hard fight.

The delegates chosen were Mrs. Marley L. Posner, Minneapolis; R. H. Bach, Awatonian; Alvah Eastman, St. Cloud; and Millie Bunnett, Duluth. Alternates are Miss Julia Rogers, St. Paul; J. E. Hayward, Fairport; George J. Frankenberg, Ferris; Pauline and Frank E. Head, Minneapolis.

Resolutions adopted today endorsed Governor J. A. A. Burnquist and United States Senators Nelson and Kellogg and favored woman suffrage.

BERLIN PREPARES FOR RED INVASION

Constatl Rumors of Attack by Communist Cause Great Tension in Him Capital.

By the Associated Press. BERLIN, March 20.—Something of its normal aspect returned to Berlin late today and the only reports of a disturbing nature came from cities and towns outside the capital, principally those in the Rhine industrial centers, where local socialist governments and communist regimes are declared to have been set up. To what extent the reds are in control is not definitely known, but that there are serious disorders of all kinds among the laboring elements in these places is generally accepted.

Four of an attack by communists, who yesterday were reported to be marching on Berlin, has caused great tension among the police and military, who have taken all precautions. A double row of barbed wire entanglements at all the cross streets run from the northwestern part of the city at Month in a semi-circle round the inner city as far as Schoenberg. This is reinforced with machine guns and manned by strong bodies of troops.

A decree by President Ebert proclaiming an intensified state of siege in Berlin may have been responsible for a considerable extent, in bringing about a decrease in disorder, but it is generally believed that the settling of the strike in Berlin, when through the short lived regime of Dr. Kaapp resulted in much disorganization, was the chief element in the restoration of at least partially normal conditions.

It is expected that the workmen will be given extensive concessions, although these have not been announced. Early in the day the strike was rigorously enforced, socialist and republican pickets patrolling the city.

BEHAVE ALL SAFE ON BOARD OF GROUNDING SHIP

By the Associated Press. SEATTLE, Wash., March 20.—No fears were felt here tonight officials of the Pacific Steamship company said, for the safety of the company's Alaskan passenger steamer Admiral Peckin, which grounded on a soft mud bar in Duncan bay, near Seymour narrows on the inside passage early today, after ramming and sinking a small tug boat towing a raft of logs. No lives were lost when the tugboat went down. The accident occurred in a dense fog.

GEORGIA REPUBLICANS SPLIT ON SELECTION OF DELEGATES

By the Associated Press. CARTERSVILLE, Ga., March 20.—Fleeced here today of an uninstructed delegate to the national convention by republicans of the Seventh Georgia district, led a faction to hold a separate convention later which was announced by state Chairman Pockett to have instructed for General Wood for the presidential nomination. It was said a contest for the seat would be made at Chicago.

FOUND GUILTY OF ROBBERY

LOS ANGELES, Cal., March 20.—Herbert and Arthur Brown, brothers, were found guilty here today of the robbery of the Union Square branch of the Hellman bank here a few months ago. They will be sentenced Monday. All the stolen money, exceeding \$70,000, was recovered.

FAMOUS MORMON HOME IS TO BE TORN DOWN

By the Associated Press. SALT LAKE CITY, Utah, March 20.—Amelia Palace, or Gardo House, home of Amelia, favorite of the 23 wives of President Brigham Young of the Mormon church, who died in 1877 and buried as a landmark in Salt Lake City, was acquired today by the Church of Jesus Christ of Latter Day Saints (Mormons) from Mrs. Edwin P. Fletcher for the sum of \$100,000. It is understood church authorities contemplate tearing it down and erecting upon the site a huge office building.

The structure was built in 1876 and was the family residence of President Young until his death in 1877. The property was reversioned to the church and was occupied by various church officials until its purchase by Mrs. Holmes many years later. In recent years, or since the war, Amelia Palace has been the headquarters of the local Red Cross. The residence, which is one block distant from the temple, was burned after a fire started there and from it derived the name of Gardo House.

HINT ANOTHER STRIKE OF COAL MINERS APRIL 1

By the Associated Press. INDIANAPOLIS, Ind., March 20.—Possibility of another tie-up of the nation's bituminous coal industry, being a result of the government's prosecution of operators and miners for alleged violation of the Lever fuel control act, in a statement issued tonight by E. D. Logsdon of Indianapolis.

Mr. Logsdon said the fuel coal operators notified today by federal officials, and one of 125 men, operators and miners, indicted by a federal grand jury here for alleged conspiracy to enhance the price of coal.

Federal officials tonight asserted that they had authorized no statement as to the theory on which the government proceeded in its prosecution of the miners and operators and declared they would not divulge the charges against those indicted until all of them have been arrested.

PLAN TO NATIONALIZE COMMUNITY CENTER WORK

By the Associated Press. WASHINGTON, March 20.—Tentative plans for the nationalization of all community center work were outlined here today at the conference on community organizations called by former Secretary Franklin H. Lane. Representatives of the governors of 26 states, community organizations, labor government bureaus, business, labor and the church were present.

Projects favored by the conference were observations of "Neighbors' day" on June 14, organization of a national executive committee to co-ordinate community center work, observance of Decoration day and Labor day simultaneously, use of school houses as social centers in urban and rural communities alike, co-operative buying and selling of staple commodities.

NEXT MOVE IN TREATY FIGHT WITH WILSON

General Belief President Will Let Battle Be Carried Into Campaign.

TO DELAY ACTION ON PEACE DECLARATION

Leaders in Upper House Halt Plans Because of Unsettled Status of Members' Minds.

By the Associated Press. WASHINGTON, March 20.—After a troubled eight months sojourn in the senate the treaty with Germany was back in the keeping of President Wilson tonight with a note appended saying that ratification had been refused.

What the president's next move would be remained conjectural. White House officials declined to comment.

Will Let People Decide. The general feeling of officials elsewhere about the capital, however, was that Mr. Wilson probably would let the treaty lie in his desk while the bitter controversy it has raised is fought out in the political campaign. The treaty was taken back by the White House early in the day by a host of officials, and a message from the senate in preference of order adopted last night after a fourth vote on ratification had failed to muster the necessary two-thirds. It was delivered to Secretary Taft who accepted it in the name of the president.

Scarcely had the bulky document passed physically out of the capitol building when some of the senators who worked for ratification began a movement to recall it and try once more for a compromise. However the provision of the constitution on both sides was that no proposal for another reconsideration ever would take serious form.

Slow Up Leaders Plan. The unsettled state of senate opinion nevertheless had the effect of slowing up the plans of the republican leaders for passage of a declaration of peace and it was decided after many conferences that the resolution for that purpose probably would not be urged before next week. Previously the purpose had been to bring it up Monday and press it for early action.

In making this decision the majority managers in the senate are understood to have been influenced in part by undetermined factors in the house which also would have to act on a peace resolution and whose leaders balked at a similar proposal last December. Most of the ranking members of the house foreign affairs committee, in whom rests the peace resolution would fall, were out of town and had not informed themselves of their attitude.

House Takes Action. During the day the senate was not in session but the question of a peace declaration was raised in the house by Representative Tinkham, republican, Massachusetts, who introduced a declaratory resolution and had it referred without debate to the foreign affairs committee. In its general provisions it followed the resolution of Senator Knox, republican, Pennsylvania, which is backed by the republican senate leaders. Both provide for repeal of the declaration of war, for certain settlements with Germany, and for a declaration of international policy.

War Laws Continue. Until some affirmative action is taken by congress or the president to end the war status legally, the technical position of the country remains official war, just what it was the day the armistice was signed. War legislation continues in force and under the war department interpretations of the situation the president still has his powers as commander in chief to keep "American" troops whatever posts in Germany and elsewhere. The armistice was signed. War legislation continues in force and under the war department interpretations of the situation the president still has his powers as commander in chief to keep "American" troops whatever posts in Germany and elsewhere. The armistice was signed. War legislation continues in force and under the war department interpretations of the situation the president still has his powers as commander in chief to keep "American" troops whatever posts in Germany and elsewhere.

TWIN FALLS COUNTY LAND MOST VALUABLE

Average Price Per Acre of All Plover Land Is \$241—Ada County's Land Ranks Seventh.

Twin Falls county leads all other counties in the state in average valuation of plover land with \$311 the price per acre for good land, \$132 the price for poor land and \$241 the average valuation per acre of all plover land.

Plover lands in Idaho have practically doubled during the last five years according to an official bulletin issued by Julius H. Jacobson of the Idaho crop reporting service.

Poor land that averaged \$34 per acre in 1918 is now worth \$60. Average good plover land increased from \$48 in 1918 to \$113 in 1920, while the value of all classes of plover land jumped from \$43 in 1918 to \$165 per acre in 1920.

Comparative values of land by counties are hard to obtain owing to changes made in county boundaries by the addition of new counties. However the value of all plover land today varies from \$23 an acre in Power county to \$241 per acre in Twin Falls county.

Second in rank as to valuation of plover land is Ada county with an average value per acre of \$240. Canyon Adv.

Year	Idaho	Ada
1918	\$43.00	\$48.00
1919	\$50.00	\$55.00
1920	\$165.00	\$113.00

BURLEY LEGION DELEGATES TO FAVOR LAND LEGISLATION

Legion men in Twin Falls have received word from the Burley post that at its last regular meeting it went on record as favoring legislation providing fine loans for home or farm building rather than a cash bonus. Burley will be represented at the state convention here, April 7, 8 and 9, with a delegation elected to uphold the decision of the post in regard to home question and to represent the Burley legion post as a progressive organization.

The Life Insurance Man says: The cash sinking fund created by a Life Insurance policy stands as an immediate bulwark against stringent times.

Society

The M. S. and S. club will meet at the home of Mrs. W. O. Jacky Wednesday afternoon, March 24. A special program has been arranged for the day.

The North Avenue club was entertained at the home of Mrs. E. A. Sublette Wednesday afternoon. The program consisted of St. Patrick day exercises. There were 13 members present. Mrs. Ward Johnson and Miss Ida Brown were the guests of the afternoon.

An impromptu dance and social will be given by the Eastern Star after the chapter meeting Tuesday evening. Each member is allowed to bring a escort.

The Archaean club was entertained Friday afternoon at the home of Mrs. E. B. Johnson with an elaborate four course luncheon. Sweet peas in a large basket formed the centerpiece. Initiation of Mesdames Stevens and Johnson into the club was the work of the afternoon after which a program was given. The guest list included: Mesdames C. E. Potter, B. E. McNew, L. A. Werner, J. W. Laubenthal, Ruth, J. E. Finck, William Baker, Stevens, W. M. Fisher, R. D. Stover, C. D. Weaver, Patterson and C. D. Hunt.

UNPAID RENT FOR FLAT IN BOISE CAUSES COURT ACTION

H. G. Dietrich has filed a complaint in district court against Harry R. Williams charging him with non-payment of \$1,120 due for rent on a flat in Boise. Plaintiff asks judgment for \$1,200 plus interest at seven per cent from July 1, 1916, together with costs of action.

BUILDING PERMITS ISSUED.

G. E. Harmln secured a permit yesterday for the erection of a 29x32 one-story house on lot 5, block 1, Five Point addition. The estimated cost of the building is \$1,500. William Spencer has a permit for the erection of a 14x22 structure on lot 3, block A, Dougherty addition, estimated to cost about \$200.

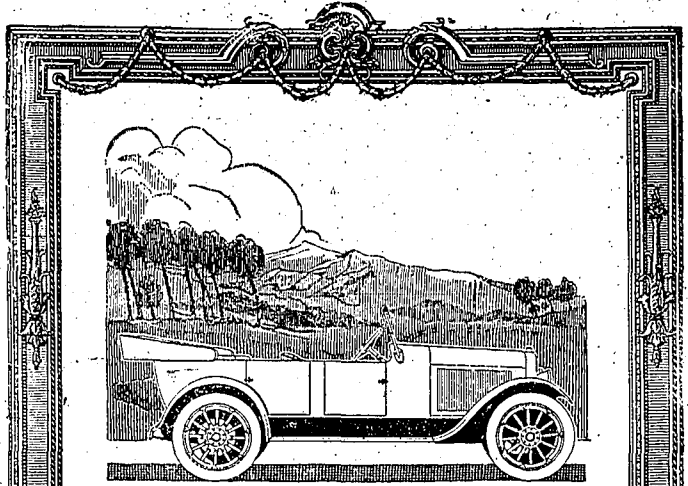

HALE PAYS \$18.80 FINE FOR NOT BURYING HORSE.

Herschel Hale, in probate court charged with leaving the carcass of a dead horse unburied for a period longer than 24 hours within a quarter of a mile of the low line canal, paid a fine and costs amounting to \$18.80 yesterday.

BANK OF HANSEN GETS JUDGMENT BY DEFAULT.

Default judgment for \$226.37 plus \$10 for fees and the costs of action was granted to the Bank of Hansen in its case against H. H. Tiley in probate court yesterday.

See Sluups on Page 3.—Adv.

One Look at This New Chalmers Makes You Want It

YOU can't get into an argument about the beauty of this new Chalmers. Everyone admits it. Just one look suffices. Its coach, with large square doors, infinite detail, engaging appointments, superior high finish establishes a precedent.

And when you sink into those new type cushions that tilt deeply you say to yourself: "Here is comfort, indeed." Then let loose the power steering. Note the silence. You can scarcely hear a sound. Watch for vibration. You detect none—not even the semblance of a fender quivering.

All throbbing is gone. Hot Spot and Ram's-horn make sure this rhythm. They "digest" the gas before it gets inside the engine, and they "feed" each cylinder quickly and evenly.

They make results de luxe in power, and that is why so many now say Chalmers is one of the few great cars of the world.

WASHINGTON HOME OF MANY EMBASSIES

All But Two Countries Are Represented in United States Capital.

WASHINGTON—More foreign governments are represented by embassies and legations in Washington than in any other capital in the world. In all, 42 countries have accredited representatives here. Besides these there are many consular representatives and nationalities seeking recognition from the American government. Chief among the latter are representatives of the Irish, Ukrainians, Armenians, Lithuanians and Albanians. Only the states of Monaco and San Marino appear to remain unrepresented.

Alabama, whose status is one of the principal points of controversy in the Adriatic problem, has as its "envoy" C. A. Cherkov, a graduate of Harvard university, one of the first in his country ever to appear in America on a professional governmental mission. Another of the Balkan states, Montenegro, still maintains its legation despite the incorporation of Montenegro.

in the Serb-Croat-Slovene state and the disposition of former King Nicholas, whom the legation ostensibly represented, Bulgaria, a third Balkan state, occupied the position during the year of being the only country, at war against the allies, and yet represented here by a legation. Diplomatic relations between the United States and Bulgaria were never severed.

Months ago, the ambassador sent to this country by Kerensky shortly after the overthrow of his staff continue to be carried on the diplomatic list of the state department while that of Ludwig C. A. Martens, Soviet ambassador, appears only on lists in the records of the department of justice.

AGITATION FOR EXCAVATION OF BURIED ROMAN CIVILIZATION.

MADRID, March 17.—The newspapers are demanding the government credits for the commencement of excavations in the province of Leon, to unearth Roman cities which are believed to be buried there, and which traditions says, contain great quantities of jewels and antiquities of great value. The papers declare that the task be assigned to experts who would be capable of making a success of the undertaking.

The old province of Leon was a medieval kingdom soon after the invasion of Spain early in the tenth century by the Saracens. In 1037 it was united with Castile, but twenty years later the two became separate kingdoms, only to join hands again in 1230.

WET BROWNSVILLE CAUSES NO HARM TO RICKY'S BROWNS.
BROWNSVILLE, Tex. — When Manager Branch Rickley of the St. Louis Nationals picked Brownsville for his spring training camp, many "stove league" fans in the north grumbled a man of Texas, limited by the location of the city in extreme south Texas, and predicted: "Rickley will have his hands full with that gang down next to 'wet Mexico.'"

But Rickley didn't give that much thought when he signed for the spring workouts here. The usual club discipline will be enforced.

MONTANA STOCKMEN ARE NOW FEARING FLOODS.
HELENA, Mont.—Because of deep snow in the hills, floods are feared by stockmen and other Montana people, if warm weather comes suddenly this

spring. The latter end of this month, but if there are prolonged warm spells, probably will decide the question. In the earlier weeks of spring, frosts are reported here that an unprecedented may be expected. Weather men unite in predicting a good crop because of the moisture in the various parts of the state. Sixty and eighty-foot drifts are said to lie in the mountain passes of the upper reaches of the great divide of Idaho, Oregon and Washington are the Rocky mountains, and in eastern Montana, ten feet on the level is reported in various places. At the very least of gradually there will be little trouble, it is believed, West. Adv. being quick and sure results.

MILKING MILK PRODUCTION
Milk, cream, butter and cheese are dear everywhere, and especially in such densely settled communities as New York. When anything is dear, it is mainly because of scarcity; plentiful supply would lower the price.
At a time like this, when the cry everywhere is for greater production of the necessities of life, it is somewhat of a shock to learn that one of the biggest milk-handling concerns in the metropolitan district has put this notice on the doors of all its receiving stations:

"Under no circumstances can any creamery take on an additional dairy without first getting permission from this office, and permission will not be granted for new dairies unless conditions change. All dairymen are urged not to increase their production of milk, and if possible, to decrease it."
The ordinary consumer, reading this, is likely to rub his eyes in incomprehending amazement. What he wants is more milk, more cream, more butter, more cheese. Why, then, limit the supply? Why, indeed, unless to keep prices up to an abnormal level against the natural operation of the law of supply and demand?

Farmers are being urged all the time to increase production, as a patriotic duty, and help feed a hungry nation of city dwellers. Factory workers are likewise urged to increase production. Everybody wants increase, apparently—except profit-makers who can derive more benefit for themselves, or who fancy they can, in selling a moderate quantity of goods at exorbitant prices than selling a plentiful quantity at normal prices.

In the light of such practices, how can producers be expected to make any sacrifice to speed up production?

RENOUNCE "ATTEMPTS" TO OVERTHROW RUSS RULERS
By the Associated Press.
CHRISTIANIA, March 20.—A protest against the attempts of "international capitalism to overthrow the Russian government," is contained in a resolution adopted by the Inter-

national Transport Workers congress here. The international bureau was directed to employ economic and political means to be employed to support this resolution.

A proclamation adopted by the congress applicable to the world labor movement, which is a historical mission by international proletarian action for the overthrow of capitalism."

NEXT MOVE IN TREATY FIGHT WITH WILSON

Continued From Page One

plastic disappearance of securing a technical status by any method except ratification of the treaty. Sen. Aldrich, generally, do not believe he has abandoned the position, and the republican side of the conference expect that if they pass a negative resolution he will veto it. They hope, however, to secure enough democratic support to recess it in both houses by the necessary two-thirds majority.

Quickly Lose Bully Pulpit.
Senate officials who have had physical contact with the conference, starting when President Wilson himself carried it into the senate chamber, lost no time in obeying the mandate to return it to the White House. Accompanied by several members of the senate, took it to the executive office last night and early this morning. They had to wait nearly an hour before Mr. Tammuly appeared to receipt for it.

The big volume, wrapped in brown paper and bound up with red tape, at first was taken into the office of Rudolph Forster, executive clerk of the White House, but Mr. Sanderson declined to leave it until he had a receipt signed by the secretary to the president. When Mr. Tammuly arrived he went for a talk with the president. Almost an hour elapsed before he returned to find the copy for his desk and Mr. Sanderson and his assistants waiting.

After the receipt had been signed, one of the messengers took up the treaty to hand it to Secretary Tammuly, but the latter demurred.
"Let it be there," Mr. Tammuly said and the delegation from the senate departed.

MICHIGAN SENATOR IS GIVEN THE LIMIT

Continued From Page One

A bit when Floyd was given a slightly less severe penalty, but each succeeding sentence to prison or heavy fine was received in stolid silence.

Immediately after the sentences had been passed Frank C. Dally, of Chicago, special assistant attorney general and chief prosecutor of the already famous case, wiped the slate clean by moving the dismissal of 10 of the 135 respondents to the indictment who had pleaded "no contest." He also moved the discharge of Elmer E. White of Traverse City, who was given a suspended sentence of three and a half years because of illness and of James Dudley, a Michigan contractor who went to South America on business before government officials could serve him with a warrant.

Ninety days were granted the attorneys for the convicted men in which to perfect an appeal. Then court adjourned.

Newberry's Statement.
Senator Newberry announced this afternoon he would continue to represent in the United States senate the people who elected me."

The senator said:
"I am proud of the fact that the record in this case contains nothing of which I need be ashamed. I have no record of fraud, bribery, or other disreputable crime was produced and I was convicted under a law that is not thoroughly understood and whose interpretation by the court is open to further adjudication. Under the charge I was made a conspirator if I had knowledge that my campaign was being conducted in an illegal manner. That is, that I was not the author of the whole thing."
"Many members of no criminal conduct, unless after conference with my senatorial associates, they deem it necessary I will continue to represent in the United States senate the

people who elected me. I have no personal wish to crowd myself into the senate but I will continue to hold my membership until the senate itself or the highest court in the land decides otherwise. Whether I shall continue to exercise my functions as a senator pending these determinations, depending upon the advice of other senators as I have stated."

FORD WILL NOT COMMENT

DETROIT, Mich., March 20.—Henry Ford, democratic opponent of Truman H. Newberry in the 1913 senatorial campaign, declined to discuss the conviction of Senator Newberry and his associates tonight. Asked for a statement, Mr. Ford said he had nothing to say at this time either as to the Newberry case or the forthcoming recount of ballots cast in election.

FARMER STILL MISSING; SCOUTS AID IN SEARCH

Officials from the sheriff's office accompanied by nine boy scouts yesterday made a search of Black Creek canyon in the vicinity of the home of Fred Egerstrom, who disappeared from his home on Tuesday, but no trace of the missing man was found. The scouts were commended by the officers for their work in the search. Every nook and corner in the canyon in the neighborhood was investigated by the volunteer searchers. Because Mr. Egerstrom was believed to have hidden a haul of money

in the rocks of the canyon which he visited every day, it was thought that some accident might have befallen him while he was making one of his periodical trips into the canyon, as the descent is about 600 feet and he is a large man, weighing about 225 pounds and is 50 years of age.

FILER CITIZENS VOTE \$30,000 SCHOOL BOND

FILER, March 20.—Citizens of Filer today voted their approval of the plan of the school board for additional housing facilities in the schools by voting favorably on the \$30,000 bond issue. The vote stood 128 for and 48 against. This is the first time a majority of 10 votes, 117 votes being required to assure ratification of the school board's plans. Much interest was displayed in the election. It is said that the majority of the votes cast against the issue was by people desiring the spending of a larger sum than contemplated rather than because of opposition of the execution of the school system.

ROBBERS GLAD \$50,000 IN LIBERTY BONDS FROM BANK

By the Associated Press.
MODERSTO, Cal., March 20.—Robbers who entered the safe deposit vault of the First National bank of Cross's Landing near here early today

obtained Liberty bonds and jewels valued at \$40,000 to \$50,000, according to an estimate made tonight by bank officials. The robbers burned through the door of the vault with a torch.

ST. PAUL, Minn., 234,595. PROFILE. By the Associated Press.
WASHINGTON, March 20.—Population statistics for 1920 announced tonight by the census bureau included: St. Paul, Minn., 234,595, an increase of 19,851 or 9.2 per cent over 1910. Albany, N. Y., 113,344, increase 12,091 or 13.1, per cent.

ANNOUNCE SERVICES IN CHURCHES TODAY

Musical Numbers to Feature Several Special Sermons at Others.

At the morning service at the Presbyterian church Sunday, Rev. A. H. Brand will speak on "High Preparation for Humble Service." His sermon theme for the evening service will be "The Man Who Was Bigger Than His Trouble." There will be a solo by Mrs. Clark at the morning service and in the evening Mrs. J. E. White will sing "Just As I Am." "Catechesis" will be the topic for discussion at the C. E. meeting at 6:30.

At the Christian church Rev. W. A. Moore will speak on "Soul Winning" at the morning service and in the evening his topic will be "Half Way Through Life."

Rev. R. E. Foster will occupy the pulpit at the Baptist church for both services Sunday. "The Temple of God" is the subject of his morning address and "The Glory of the Cross" that for the evening's service.

At the Ascension Episcopal church there will be the usual musical program.

The First Church of Christ, Scientist, will hold services at Pariah hall at 11 a. m. The subject for the lesson sermon will be "Mind over Matter."

There will be preaching service at the Twin Falls Mission at 11 a. m.

WARNS AGAINST AN OVER EXPANSION OF CREDITS

By the Associated Press. BALTIMORE, Md., March 20.—A note of warning about the danger of an over-expansion of credits was sounded tonight by Francis H. Sisson, vice president of the Citicorp trust company of New York, at the annual dinner of the Baltimore chapter of the American Institute of Banking.

At the same time Mr. Sisson cautioned against too audaciously putting on the brakes as being likely to bring about a period of depression.

Mr. Sisson and United States Senator Robert L. Owen of Oklahoma, were the principal speakers. Senator Owen complimented bankers of the country upon the value of their constructive work in counseling and financing industries of every character, and remarked that America is in great need at this time of stimulating production and distribution as a means of reducing the high cost of living.

UNDERWOOD AND FITCHCOCK ABANDON FIGHT FOR PRESENT

By the Associated Press. WASHINGTON, March 20.—No effort to break the deadlock between Senator Fitchcock, of Nebraska and Senator Underwood of Alabama for the democratic leadership of the senate is expected for another two weeks the two candidates having agreed to abandon their plea for a democratic caucus as soon as the treaty debate was ended.

The change is understood to have been made to permit Senator Fitchcock, who conducted the administration fight for the treaty to go away for a rest. He left today to spend a few days at Augusta, Georgia. During his absence Senator Underwood is expected to act as leader.

STRIKE THREATENS TO CUT OFF CHICAGO'S ELECTRICITY

By the Associated Press. CHICAGO, March 20.—A strike directed against the Commonwealth Edison company was called today by Frank Ragon, head of the newly organized Edison Employees' union, who said that three-fourths of the 5,000 employees of the concern, which supplies Chicago with electric current, would be out by tomorrow.

Union claims were denied by company officers, who declared that few employees failed to report today. Union leaders said the men were striking for recognition of the union and for the reinstatement of 300 employees who, they said, were discharged for joining the union. No wage demands were made.

"PUSSYFOOT" STARTS HIS "DRIVE" AMONG "FROGS"

By the Associated Press. PARIS, March 20.—"Pussyfoot" Johnson has inaugurated a prohibition campaign in this country. He addressed a large audience for the first time on prohibition this evening under the auspices of the "High Cross Society."

This society advocates absolute prohibition, as compared with the Anti-Alcoholic League of France and a newly organized group of 60 deputies of the French chamber who repudiate the "heavier" alcoholic drinks but advocate wine and beer.

RATES FOR FOREIGN EXCHANGE RECOGNIZED BY TREASURY

WASHINGTON, March 20.—Rates of foreign exchange fixed by the treasury department for army accounting purposes during March 16 to 31 period, were announced today as follows:

Sterling \$2.75 to the pound; French francs 12.50 to the dollar; Belgian francs 14.00, and lire 18.00.

Clothes that Give You Physical Comfort Must Also Give You Mental Satisfaction

You want your clothes to give you physical comfort—ease and freedom in action or repose—as well as the mental confidence of being correctly and smartly dressed.

Kincaid-Kimball Clothes Famous For Fine Tailoring

"Famous for Fine Tailoring" is not just a happy phrase but a deserved reputation. These clothes were first made in 1856 by one of the founders of the clothing industry in America. He early established the principle that every garment should be made in one factory where workmanship should be under the supervision of experts, where no influence of sweat-shop methods could influence product.

The Fashion freshness, the finer Fabrics and Fitting accuracy these super-styled clothes makes it well worth your while to inspect them at once—\$30.00 and up.

SUNDAY SCHOOLS TO HOLD CONFERENCE

District Conventions Held Preparatory to State Meeting at Payette in May

As preparation for the state general Sunday school efficiency conference to be held in Payette in May, lesser conventions are being held in the eastern and southern districts of the state. One such conference will be held in Twin Falls on March 25 by the Idaho State Sunday School association, according to announcement given out at the office of Rev. E. M. Keeler, general secretary of the association at Boise.

All these lesser conferences indicate that the state efficiency methods of operation of Sunday schools. Several of these district and county conventions have been held and the preparatory schedule will close with a meeting in Murtaugh, Sunday, March 25.

LADIES' SPRING SUITS

WOMEN'S COATS

REFLECTING A RARE ELEGANCE

Lines charmingly modish combined with rare colorings and exquisite fabrics endow these presentations with a subtle beauty. Coats of such enviable distinctiveness and individuality are seldom priced so favorably. Featured are such alluring materials as Jersey, Tropicine, Serges and rich Velveteens. And the woman who selects from these chic offerings may rest safe in the assurance that tiresome duplication will not endanger the exclusiveness of her choice.

Smart House Dresses For Tidy Women

There is no need to apologize for one's appearance while attired in one of these reasonably priced offerings for all the models presented are just as neat and attractive in styling as they are exceptional in value.

The fabrics are: NURSE STRIPED GINGHAMS, PLAIN AND PLAID GINGHAMS, PERCALES AND PLAIN WHITES.

You have but to examine the materials to be assured that this selling presents values decidedly uncommon.

We assure you that there are plenty of styles to choose from.

We are carrying an excellent assortment of LITTLE SISTER'S SCHOOL DRESSES, made of gingham.

INDUSTRIAL CONFERENCE OFFERS PLAN

Urges Joint Organization of Management and Employes.

PREVENT DISPUTES IS PLEA OF CONFEREES

Collective Bargaining Is Approved—Work Must Not Be Stopped.

By the Associated Press.

WASHINGTON—Joint organization of management and employes "as a means of preventing misunderstanding and of securing co-operative effort" throughout American industry is proposed by the industrial conference appointed by President Wilson in a report to the president made public recently.

The conference in its report states that they have modified the tentative plan of machinery to adjust disputes in general industry by conference, conciliation, inquiry and arbitration, announced by the conference on December 29, 1931, and that they have endeavored to develop methods of prevention rather than adjustment of labor difficulties. The modified plan developed since the conference reassembled last January 12, it is said, makes machinery available for "collective bargaining with only incidental and limited arbitration." The plan has been extended to cover disputes affecting public utilities other than street railroads, and also the government and other public employes.

Analyses Situation.

In addition the report analyzes the development of industrial relations, hours of labor, women in industry, child labor, housing, wages, profit-sharing and gain-sharing, thrift agencies, inflation and high cost of living, agriculture, unemployment and a public employment clearing house.

The causes of industrial unrest are set forth as including "the rise in the cost of living, unrestrained speculation, spectacular instances of excess profits, excessive accumulation and misuse of wealth, inequality and readjustment of wage schedules, release of ideas and emotions by the war, housing revolution, theories imported from Europe," the belief that free speech is restricted, the intolerance of employment, fear of unemployment, unnecessarily high infant mortality in industrial centers, loss of personal contact in large industrial units and the culmination of a growing belief on the part of both employes and employers that a readjustment is necessary to a wholesome continuity of their united efforts.

Industrial problems vary not only with each industry, the report says, but in each establishment. "Therefore the strategic place to begin battle with mutual understanding is within the industrial plant itself. Primarily the settlement must come from the bottom, not from the top. This conference, in expressing its approval of "employee representation" says it is not a field for legal form, because the should take such representation from the workers which such representation should take in every plant. For this reason the recommendation directed solely to managers and employes.

"If the joint organization of management and employes in the plant is

Industry fails to reach the collective agreement" says the report, "or if without such joint organization the contract alone which are not settled by existing agencies, then the conference proposes a system of settlement through a national industrial board, local regional committees and boards of inquiry.

Based on Experience.

The plan in which the conference sees "based upon American experience and designed to meet American conditions" is national in scope and operation and yet decentralized. It is said to be different from anything in operation elsewhere and employes not feel authorized except the right of inquiry. Its basic aim is an invitation to settlement of peace by the parties in conflict and the enforcing of public opinion toward endorsement of the method of settlement.

The national adjustment conference proposes a board to consist of four representatives selected by the parties to the dispute, and four others in their industry chosen by them and familiar with their problems. It will be presided over by a trained government official, the regional chairman, who will act as a mediator. If an unanimous agreement is reached, it would result in a collective bargaining having the same effect as if checked by joint organization in the shop.

Failing to agree unanimously the matter with certain restrictions, would go to the national industrial board, unless the disputants preferred to submit the matter to arbitration.

Meanwhile both parties to the dispute have agreed that there shall be no interference with production pending the processes of adjustment. If the parties, or either of them, however, refuses voluntarily to submit the dispute to the processes of the plan or to submit to a regional board of inquiry is formed by the regional chairman of two employes and two employees from the industry and not parties to the dispute. This board may subpoena witnesses and records and publish its findings as a rule, to the opinion.

Would Be in Washington.

The national industrial board in Washington would have general oversight of the workings of the plan which in addition to being applicable to public utilities, provides machinery for "prompt and fair adjustment of wages and working conditions of government employes." The plan involves, in possibilities, it is said, other than those imposed by public opinion. It does not impose compulsory representation. It does not deny the right to strike. It does not submit to arbitration the policy of "closed" or "open" shop.

Regarding "employee representation" the report says, "the subject has been discussed under such different names and forms as shop committees, shop councils, works councils, representatives (the government in industry) and others but the conference says it prefers the general term having in mind the successful application of principle to various activities outside, as well as within the purely industrial field.

"Employee representation," says the report, referring to the employes, "should proceed from a genuine desire that the management for democratic representation as a substitute for direct personal contact, may proceed in accordance with sound principles and be kept from perversion which will threaten the labor's legitimate usefulness by making it an agency of attack rather than a means to peace."

The idea of "employee representation," the report says, has aroused opposition from two sources, viz: Employers who will adhere to the theory that labor is a commodity, a view which is said to be steadily disappearing, and trade union leaders who by card shop representation a subtle weapon directed against the unions.

"Employee representation," the conference says, "offers no road to industrial peace. No employer should direct solely to managers and employes.

"If the joint organization of management and employes in the plant is

SHETLER IS FREED BY DISTRICT COURT

Writ of Habeas Corpus Saves Him From Extradition—Retained on New Charge.

W. H. Shetler was yesterday afternoon released from custody on a writ of habeas corpus issued out in the district court. Shetler was held here under a fugitive warrant charging him with the theft of \$7,000 worth of drilling machinery at Vale, Ore.

Delinquent introduced at the habeas corpus hearing tended to show a lack of evidence of Shetler having ever been in the Vale country at the time of the alleged theft. The action was said to be the outgrowth of a difference between the costs of oil company and Mr. Shetler. Mr. Shetler claims that the costs oil company owes him a large sum for wages and that several times he has filed affidavits against the oil company. He also claims that the oil company is holding tools belonging to him.

During the trial of Shetler on the fugitive warrant in probate court here the sheriff from Vale, Ore., arrived with extradition papers signed by Governor Davis. Shetler was then given into the custody of the sheriff but would extradition by immediately filing a writ of habeas corpus in the district court. Bothwell & Chapman represented Shetler in the proceedings in both courts.

Shetler was requested last night by a charge of larceny made by Floyd Bros. of Vale, Ore. Hearing on the new charge will be had in probate court.

STRIFE MAN WILL MAKE RACE AGAINST CUMMINS

By the Associated Press.

DEWELLINGTON, Iowa, March 20.—Colonel S. W. Brookhart of Washington, Iowa, today announced his candidacy before the republican primaries for the seat in the United States senate now occupied by Albert B. Cummins. He will make his campaign as an opponent of the Cummins-Each bill, he says. Colonel Brookhart served in the world war as an instructor of small arm practice.

ject to contract from Reno, Nev., to the Utah line a "highway" following the overland route of pioneer days, was adopted today at a meeting here today of hotel men and highway enthusiasts.

Nevada counties through which the highway would pass have bonded bonds for a share of the work with the proviso "that unless funds from other sources are forthcoming, to October 1 the issue become void. Mayor Harry Stewart of Reno, said Washoe county had turned over to the Nevada highway commission \$185,000 as its share of the road work."

A house built of beer bottles was once an interesting feature of Tonopah, Nev. It was account of the local scarcity of timber that a miner conceived the idea of building himself a dwelling from a huge stack of beer bottles. More than 10,000 bottles were used.

LIST OF NEW ENGINEERS INCLUDES TWIN FALLS MEN

Included in the 118 new civil engineers who have been admitted to practice in Idaho as a result of the examination held March 9 by the state engineer's examining committee announced by the state bureau of irrigation, are several Twin Falls and surrounding town residents, as follows: Carl H. Bannum, Burley; William L. Harrold, Twin Falls; J. H. Hovey, Twin Falls; Frank Beech, Burley; James A. Ryboe, Twin Falls; Baye Utvik, Burley; Charles H. Mull, Twin Falls, and James C. Porterfield, Twin Falls.
