

WORK PROGRESSES ON NEW BUILDING

Build High School Striving Will Be Fine—Material Arriving on Time—Contractor, L. Pleasent.

Buhl, July 22.—The work on the new high school building is well under way. Engineer Knuts reports steady progress on the work being done, the frame for the cement has been completed and he hopes to start pouring cement Saturday. The main boiler for heating purposes has been set; brick work would follow it to be finished.

The material for the building is arriving in good time, according to Engineer Knuts. Four carloads of gravel, three carloads of brick and two carloads of the having arrived in the last three days. The steel girder are sidetracked in the railroad yard waiting to be delivered. The carpenter work is being done right on the ground. A spacious carpenter shop was built for the purpose of making window frames. Mr. Knuts said that his men would put out from 10 to 15 window frames each day, he also stated that the building would require a large number of windows.

Seventh avenue having been opened up for traffic, delivery of material will be speeded up. Previous to this time the wagons had to make a very long trip. Work has started on installing the new water main which will give a larger supply of water for building purposes.

Buhl News Notes

Buhl, July 22.—D. V. Armstrong leaves tomorrow for his home in Okla. He spent two weeks here visiting with his father and sister. Miss Helen Holman of Twin Falls is visiting with friends here. Mrs. Jack Carr left early in the week for Sheldon, North Dakota, to visit with friends and relatives. She expects to be away for two or three months.

Police Judge T. C. Washburn purchased the Buhl bakery and hopes to commence business by the first of August.

Mr. and Mrs. F. E. Prichard of Minnaha, Iowa, are here visiting with their two sons, Glenn and Thomas Prichard, and their daughter, Mrs. Mayra. Mr. Prichard remarked at the large crop of wheat in this district.

He said that the people in the east were skeptical about the large crop of wheat grown in Idaho. A new parsonage is being erected for the minister of the Episcopalian church.

Miss Sybil Hall of Salt Lake is spending her time here visiting with friends and relatives.

Miss Elva Wilkenson of Boise will

spend a short time here visiting with Mr. and Mrs. Hubert Brown left recently to spend some time at Lava Hot Springs.

Mr. J. A. Eyle of Twin Falls and C. W. Boyd of Boise are here to inspect the sheep of this district.

MEETING OF THE PUBLIC CALLED FOR FRIDAY

A meeting of the public is called for Friday at 5 p. m. in the Chamber of Commerce rooms to decide upon the matter of changing the time into the Rocky Mountain time.

All persons interested in encouraging or objecting to this change are invited to present their claims at this meeting, which will be in charge of the civic bureau of the Chamber of Commerce.

Comments have been handed to the chamber containing the signatures of several hundred people requesting the change.

If no legal technicalities arise and the public sentiment continues to favor the change, action will probably be taken to set a date within the next few days on which time all clocks (excepting railroad and Western Union) will be moved ahead one hour.

ENJOYING PECULIAR HONORS

There is a little great grand daughter visiting in the home of Mr. Kennedy Packard, who is enjoying peculiar honors not accorded to many children. The child is Majella Rogers, daughter of Mrs. George Rogers of Sacramento, California. She is taking her nap in the cradle in which her great, great, grandmother, Mrs. Packard's mother, was rocked.

The cradle was, of course, the property of the baby's great, great, great grandmother, who wove the linen and flax woven in the cradle from wool and linen grown on the home farm in New York. The cradle was made by Majella's great, great, great grandfather for his first child; and, though, having passed through several generations, it is still in good repair.

Mrs. Packard has the reel and spinning wheel which were used in making the linen, and also a linen tablecloth and towels woven in the old home. For more than 150 years this home community in the family, and was last recently sold.

GRANT BUILDING PERMITS

Two building permits were granted yesterday, one for a new building and one for an addition. C. E. Huffman was granted a permit to construct a residence on lots 8 and 2, on Second avenue north. The building is to be a one-story affair, 14x24 with porch, at an estimated cost of \$500. A permit was granted to Moe W. Petkin, 260 Alexander street, to construct a one-story addition, 9x24 to the house at that location at a cost estimated at \$250.

Commercial Aviation Growing In Popularity

NEW YORK.—Commercial aviation in the United States shows a healthy, steadily growing popularity, says the Manufacturers' Aircraft association in making public here today the report of representatives who have just completed a tour of the country which included inspection flights over most of the territory now served by aerial transport.

"The airplane is undergoing the same development experienced by other vehicles of transportation introduced to the public, the various sections of the country according to its requirements in conformity with their individual topography, customs and natural resources," the report said.

"The Southwest and Pacific coast are leading in the adaptation of aircraft to commercial use and plans for preparation, contemplate honey-combing that area with a network of aerial transportation lines. In the Middle West the airplane is being adopted as the ocean demands, and it is meeting with encouraging success, the severe competition of good railroads and highways, lack of landing fields and the considerable indifference of the Middle Atlantic states."

Now, however, in attempting to keep with customary conservatism, the South is using it mainly for private purposes and Florida and the West Indies have come to recognize flying as "a most important method of communication."

"At present, there are in the United States 15 manufacturers of aircraft and aircraft motors and 85 manufacturers of accessories. During the past few months 29 new airplane distributing agencies have been established throughout the country and new aerial transport operating companies have been formed in New York city, San Francisco, Long Beach, Hollywood, Los Angeles, Oakland, Stockton and Alameda, Cal., Minneapolis, Philadelphia, Blue Field, W. Va., Bettendorf and Des Moines, Ia., Ponca City, Okla., Seattle and Spokane, Wash., Detroit, Mich., Arkansas City, Ark., Bridgeport, Conn., Aurora, Ill., Fargo, N. D., Cincinnati, Newell, S. D., Birmingham, Ala., Ashbury Park, N. J., Lexington, Va., Brooklyn and Syracuse, N. Y., and Hawaii, N. H.

"Aviators are convinced of the practicability of establishing passenger and express lines throughout the entire Pacific coast, which, roughly speaking, consists of two great mountain ranges and series of valleys. The plans for agencies here, now in preparation, contemplate connecting San Francisco with Los Angeles, San Francisco with Del Monte, San Francisco with Portland, Ore., over the Cascade range, and Portland with Tacoma and Seattle, Wash., with an almost certain extension of the line eastward to Spokane. A 10-passenger airplane service already is in operation between San Francisco and Los Angeles and a weekly mail and business express line between Seattle and British Columbia points will begin operations within a few weeks.

"At present there are some 150 airplanes in commercial use in California and 50 more in Oregon and

over the Tasmanian coal fields. President Masaryk declared his belief in the League of Nations and said that if America was to have economic relations with Europe she must also have moral relations.

"I am sorry," he said, "that America no longer cares to take a part in European affairs. I wish President Wilson could have succeeded, believe in the League of Nations, and if the leaders of the league show that there is discord amongst them it is not good for the entente."

"America came into the war without any selfish claims." She fought to strengthen this peace and to put it into practice, and ought not to leave it now.

"I wish American democracy could be felt in Europe. I know the Monroe doctrine; but if America is to have economic relations with Europe, she must also have moral relations. There must be moral as well as pecuniary reciprocity."

The teacher problem is a burning question in Czechoslovakia. The economists of both Poland and this nation are claiming that the Tscheco coal fields are absolutely essential to the industry of the west, and in this respect, the Czechs are in a position to demand more than 150 million. Speaking of this situation, Mr. Masaryk said that the Czechs want a plebiscite held at once.

WASHAW, July 22.—The pleasure to the Polish capital is becoming serious through the defeat of the left wing of the Polish army. In three weeks the Poles have retired from the Berezina river to the Niemen, a distance of more than 150 miles, and the distance between the Niemen and the Vistula, which flows through Warsaw, is less than that, being about 160 miles.

TWO CASTES IN POLICE COURT.

Two people were cited to appear before Police Judge Minick yesterday. They are June Morgan, daughter of Dr. and Mrs. J. A. Morgan, who is charged with exceeding the speed limit, and Oliver Kunkle, who is charged with "wild whirly and unlawfully" having the muffler cut-out open.

BASEBALL GAME SUNDAY.

Local baseball fans will have an opportunity to see the Twin Falls players in action next Sunday, when the Wendell nine, champions of the Wood River league, invade Twin Falls.

"Gilded" Oliver will perform from the musical for the Twin Falls Independents, who are practicing diligently in order to thwart the aims of the Wendell aggregation who desire to add another scalp to the string they already have.

EXPRESS REGRET ABOUT INDIFFERENCE OF YANKES

PRAGUE, Czechoslovakia.—President Thomas Masaryk, the deliverer of the new republic of Czechoslovakia, in conversation with a group of American correspondents, expressed regret that "Americans no longer care to take a part in European affairs." The withdrawal of the United States, he said, had weakened the hand of the entente in settling such vital controversies as that being waged between the Poles and the Czechs.

AMERICANS IN LEAD. By the Associated Press. ANTWERP, July 22.—The Americans led their nearest competitor, the Belgians, by 27 targets at the end of the first day's team match in the Olympic trapshooting competition. With 150 targets remaining to be shot tomorrow, the score out of a possible 620 were as follows: America 388; Belgium 261; Sweden 255; Canada 250; Great Britain 242.

RULER OFF HALLOT. JEREMISON CITY, Mo., July 22.—The farm labor ticket on which P. T. Christensen of Utah was nominated for president in Chicago last week, came out on the official bulletin in Missouri at the November election. Secretary of State Sullivan ruled today.

FRECKLE-FACE

Sun and Wind Bring Out Ugly Spots—How to Remove Easily.

Here's a chance, Miss Freckle-face, to try a remedy for freckles with the guarantee of a reliable concern that it will not cost you a penny unless it removes the freckles; while if it does give you a clear complexion the expense is trifling.

Simply get an ounce of Othine—double strength—from any drugist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case. Be sure to ask the drugist for the double strength Othine as this strength is sold under guarantee or money back if it fails to remove freckles.

The Bank's Part In Business Success

An artist could as well paint his picture without a needed color, a builder raise his structure without an essential tool, an author weave his story without the central character—

As the business man make strides in business without his bank.

This institution aims to have its service expand with the expansion of patrons' needs, to the end that it shall fill an ever more important part in their advancement.

DAIRY OWNERS TRY FOR INDEPENDENCE

Milk Producers Plan to Get Rid of Dictation of the Distributors.

N. F. A. Staff Special.

NEW YORK, July 16.—A step forward in the direction of complete independence from milk distributing companies is being taken by the dairy farmers of New York and five adjoining states.

Some \$5,000,000, organized in the Dairyman's League, Inc., already own co-operatively 12 country milk plants, and a campaign has just been launched to establish new plants in 25 different sections of league territory. The new project involves raising a fund of nearly \$1,000,000.

All Milk Products.

The plants include fluid milk shipping stations, butter and cheese factories and places for the manufacture of condensed, powdered and evaporated milk and other milk products.

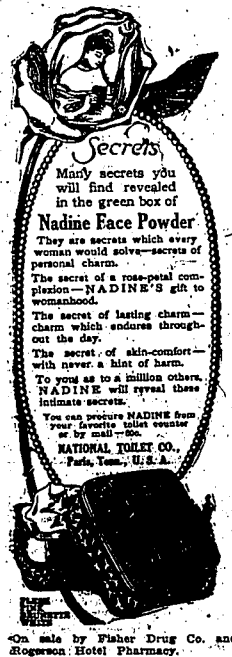

Until farmers set out to get possession of country milk stations all such plants were owned by the distributors and manufacturers. Under the new scheme of things the farmer will be a manufacturer as well as a producer.

According to league officials, the co-operative plan will give the producer a steady market for his milk and assure him a more equitable distribution of the proceeds. Co-operative activities will result in reduced costs, they declare, and consumers will reap the benefits.

Fair Price, More Trade.

Fair prices, they add, will bring increased volume of business and increased returns to the producer-manufacturer.

Only recently the American relief administration placed with the Dairyman's League Co-operative association an order for something like 5,000,000 cans of the Dairyman's League brand of sweetened condensed milk. The total deliveries will amount in value to about \$1,500,000.

Secrets

Many secrets you will find revealed in the green box of

TURKEY CONSIDERS RUSSIA A SOLE LOGICAL ACTION

MOSCOW.—Turkey has turned to soviet Russia "as the sole nation which accepts in full the principles asserted in theory at the close of the great war," said Delional, Turkish minister of the Young Turkish party, to the correspondent of the Associated Press. (Djemal formerly Turkish minister of marine is on the attack extradition list.)

"We are facing a crisis which involves our national existence. It is a question of might against right, in which we have been forced to a momentous decision by the entire power, as we were in 1914," Delional said.

After the conclusion of the armistice the Young Turkish party was discredited through British intrigues and forced to turn over the government to Izet Pasha. Plans were begun for the dismemberment of Turkey.

"Our hopes of saving Turkey, with the exception of the loss of Arabia, vanished as plums of the British and French imperialists became clear and the Versailles treaty utterly repudiated the principles asserted in President Wilson's 14 points. Anatolian Turkey saw the inevitable outcome, and the consequence was the revolution by Mustafa Kemal, founder in the establishment of the provisional government of Ankara, supported by the Young Turkish party.

"The decisions of the San Remo conference and recent declarations of President Wilson, that the question of the Dardanelles should be settled only when Russia is able to participate in the deliberations plainly show that the entente anticipates the eventual restoration of the Caudet party and support the dismemberment policy.

"Realizing this last we have turned to soviet Russia as the sole nation which accepts in fact the principles asserted in theory at the close of the great war.

"We are ruled by the war, our country is economically backward. Russia offers us reciprocal trade arrangements affording possibilities of economic development without the danger of commercial exploitation such as we would inevitably suffer at the hands of the western capitalists."

THE FARMER'S VOICE.

"Why should a farmer work 16 hours a day when city people work half as many? They don't have to,"—C.

Except from a letter to the editor. The reason a farmer works 16 hours a day (when the weather is favorable or the emergency great) is because he wants to:

It is money in his pocket to do so. He does not have to do it. He may let his field go untilled, his grain go unharvested, his peaches rot. If he wants to.

The motive for his 16 hours (when he works that long) is entirely within himself.

If people should starve because he does not work, he would not have any personal sense of guilt for the tragedy.

It is money to the farmer to work, and his flowers prove it.

The latest available figures (1910 census) showed the increase in farm land value in the United States in a decade to be 118 per cent; in other words, had not been doubled, again. Since then it may have doubled again. The men who got this increase in the farmers, 63 per cent of whom (in 1910) owned their own farms and consequently doubled the value of their estates.

A farmer's work embraces a great variety of occupations. This makes it more attractive than the chore of many a city worker who, from morning to night, does the same thing over and over again. And then the farmer's his own boss. He takes up the line of work he wants, follows it as long as it suits him and then can turn to something else.

Many a city man would gladly work more than eight hours if he were in the farmer's position.

TREATY AND LEAGUE NOT 'FIXED ISSUES'

By the Associated Press.

WASHINGTON, July 21.—The peace treaty and the league of nations can in no way be regarded as "fixed issues" in the presidential campaign, announced as their present status may be "open question" between now and March 4th, Franklin D. Roosevelt, democratic vice presidential nominee declared today on his return to Washington from attendance at the meeting of democratic national committee at Columbus.

Mr. Roosevelt told newspapermen that Governor Cox, the party's presidential nominee, undoubtedly would feel fairly the position on the treaty issue fully in his address at the notification ceremonies.

CONDITIONS IMMOBIL.

MEXICO CITY.—Conditions in the northern border states of Mexico were characterized as "immobil and disorderly" by Roberto V. Posquiera, financial agent for the Mexican government in the United States. In a statement he has just issued to the Mexican newspapers, Senor Posquiera said the situation which appears on the borders along the roads leading to the United States, "Mexico—the road to hell," was accurate. For a few years no one had been able to work with security in Chihuahua and, he added that "El Juarez, as in Lower California, formerly there was continued rapine and all its forms. One single example would suffice to show the immorality that exists there. The gambling concession produced \$11,500 monthly to the government, and the same concessionaires today are offering to pay \$50,000 monthly for the same privilege.

Senor Posquiera charged that Mexican laborers who crossed the line were being ruthlessly exploited by labor agents, with the aid of the Mexican authorities. He likewise attacked the alleged practice of some American merchants who furnish office supplies to Mexican officials, of making out invoices for double the right amount.

"This fact shows the robbery that is being systematically committed against the national treasury and the injustice to which point official corruption has reached," Senor Posquiera commented.

ALL METAL AIRPLANE.

PARIS.—France, whose strong war aerial force, in men and materials, has been allowed to disintegrate, is determined to win a new place in commercial aviation. P. L. Flanrin, aviation under-secretary, told the chamber of deputies when it voted 300,000 francs for civil and military air service.

The development of the all-metal airplanes, he suggested, is one of the most important things being sought and he said German attempts along this line "seem to me more dangerous than any clandestine deposits of war materials."

M. Flanrin told of typical flights in other nations, such as the New York to San Francisco race and the American postal routes and then reported that the Paris-London airplanes covered 120,000 miles, carrying 803 passengers on 513 flights during the period from last Sept. 1 to March 1, when winter atmospheric conditions arose. On only seven per cent of the trips was there more than an hour's delay and only one accident, in which an American passenger was killed.

The progress of aviation during the war, M. Flanrin said, raised the plane flight speed from 74 to 143 miles an hour; lowered the time for reaching altitudes by four-fifths; increased the power limit from 100 to 1,000 horse-power; multiplied the carrying capacity more than sixfold; quadrupled the flight range.

POLICE GIVE WARNING.

CONSTANTINOPLE.—Turkish policemen made no attempt to surprise evil doers but give warning of their approach by striking on the pavement at regular intervals with long heavy sticks tipped with steel, to the great disgust of sleepers. It was formerly the custom of the night watchman to shout loudly in Turkish that all was well every time they pounded on the pavement. But the allies forbade the shouting, and since the arrival the night policemen, most of whom are very old men, content themselves with hammering the pavement. The Turkish population objected strongly to having the hammering discontinued, so it is supposed to be the only means of guaranteeing that the policemen will patrol their beats.

SUGAR FROM ABROAD.

TOKIO.—Owing to scarcity of sugar in America, large quantities of Formosan and Java crop are being exported to the United States by the Japanese refining concerns. During March and April, 23,000 tons of Java sugar were sold to foreign merchants and a further supply of nearly 40,000 tons of Formosan and Java sugar have been contracted for by the American merchants. The goods are to be delivered at New York, San Francisco and other ports.

NORWEGIANS PROTEST TRICKS OF GERMANS

CHRISTIANIA.—Norwegian business men have protested to the Norwegian government against alleged tricks of German commercial concerns whose policy is to deliver to Norway goods bought and paid for at inflated official and unofficial quotations which led the Norwegians to believe the delinquencies were deliberate.

Commercial intercourse between Norway and Germany had been suspended by the occupying forces. The exchange rate of German money was recently when a number of Norwegian concerns were notified by the Germans with whom they had placed large orders that the merchandise would not be delivered until the government had placed special export taxes which prohibited exportation at the prices at which the goods had been sold.

The Germans are said to have demanded additional sums ranging from 50 to 100 per cent of the prices they had quoted before they would fulfill their contracts.

The Norwegians frequently were compelled to pay the additional sums, having contracted to sell elsewhere the German products. However, complaints that Germans were using this method to evade the unfavorable rate of exchange between the two countries had been frequent. That Norwegians commercial organizations made official representations to Berlin, and it is said the Berlin government issued a statement that official cognizance would be taken of sharp practices by German businessmen in their international dealings. The government denied the export taxes complained of had been levied, or that any other restrictions had been placed on export trade.

Newspapers here for several weeks have carried editorial criticisms of German business methods since the war, and several trade papers have declared the German eventually must feel the effect of "commercial trickery" they are alleged to have practiced.

There also is widespread complaint against German life insurance companies operating in Norway and the Norwegian foreign office has been petitioned to protect policyholders who, it is charged, have been paid in marks when the policies call for payment in kroner. Thousands of thousands of German life insurance policies are held here, especially among farmers.

In this connection it is pointed out that whereas 45,000 kroner, an average life insurance policy before the war equalled 50,000 marks, the rate of exchange now made such a policy worth 375,000 marks.

REPORT ON MURDER.

DUBLIN.—The official report of the inquest at Tamm received at Dublin castle says that after the murder of Burke and Carol, a party of police and military went to Tamm. The police got out of hand on seeing the bodies of their dead comrades. Shots were fired and houses burned. The police alleged that they were fired upon.

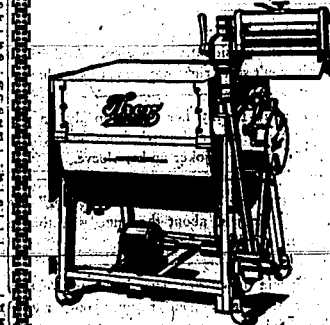

SEVENTH PRECINCT VOTERS ATTENTION.

Voters residing in the seventh precinct may register at the Washington school building, Saturday, July 24th, between 9 a. m. and 5 p. m. Voters may also register at the residence of Mrs. Herbert Wirth, on Hayburn avenue, the house east of the C. E. Booth residence.—Adv.

PLENTY OF HARVESTERS.

The term, "army of reapers," is no longer a mere figure of speech. There is a veritable army of 100,000 men moving through the western wheat belt, harvesting the crop. It was organized by the federal department of agriculture, with the co-operation of the states most interested.

As a result, the grain is being reaped without difficulty. While the country as a whole is grievously short of labor, particularly farm labor, the farmers in the big-grain sections have enough help, for the first time in many years.

High wages, said to, average \$7 for a 10-hour day, are a strong inducement, but the chief reason for this satisfactory situation is organization and direction of the labor supply from a responsible center.

It has been demonstrated now that labor, while remaining free to do as it pleases so far as individuals are concerned, can be marshalled to meet a big seasonal and sectional demand in agriculture. Why not in other industries, and other sections, and why not in all seasons?

Why can not the moveable labor of the country be utilized in this way for all kinds of industrial emergencies? Why should there ever be large numbers of men idle in one section or in one industry when another section or industry needs them? Why should "seasonal occupations" prevent workers from finding employment elsewhere or locally in other work, during their dull season?

There is ample room for the government to develop this plan that is now working so well in the wheat fields of Kansas and Iowa.

LIBERTY BOND BLUFFERS.

It is rather astonishing to find, after all the glory and enthusiastic patriotism of war times, that so large a number of Liberty Loan buyers have left their bonds, only partly paid for, at the banks.

Boldly they displayed the buttons in their coat lapels, gloriously they displayed the posters in their windows, proving to admiring neighbors and friends how much they loved their country, how thrifty they were, how well off. They still look in the sunset glow of that effulgence—that they haven't got the bonds.

There may have been good reasons why some of the buyers did not finish paying for their bonds. There are always people who, by reason of sickness, death or some emergency, find themselves unable to carry out their plans. But normal causes do not account for anything like the number of people who made first payments and never did anything further about the matter. With the ending of actual warfare, and their feeling of urgent necessity left them, and under the stress of rising prices for peacetime commodities, they have believed themselves unable to cover the remaining payments. That a little self-denial would enable them to pay up, however, the war years amply proved. Why not a little self-denial now, to redeem their reputations as people of their word, and at the same time to make a little provision for the future?

Americans are too happy-go-lucky. They live too much in the day, too little do they turn their minds to the days to come. Fair weather does not last forever. The Liberty bonds should be taken up without further delay.

"GAS" FROM SUGAR.

The motor fuel of the future is to be grown, not mined. This might be inferred merely from the known fact that the petroleum supply is limited, and is being used up very rapidly. It is made more of a practical certainty by the announcement that a chemist for a large sugar plantation in Hawaii has succeeded in making an excellent motor fuel out of sugar—or rather, out of molasses. It is a "motor alcohol" which is said to have more power than gasoline. Like other forms of alcohol, it burns more cleanly

than gasoline or kerosene. If it is really more powerful than these fuels, it is thus doubly preferable to them, provided it does not cost too much.

Wood alcohol, made of wood, starchy fiber or other substances containing cellulose, has heretofore been considered the only practical possibility in the way of an alcoholic motor fuel. Grain alcohol has been considered prohibitively expensive. There is no reason why sugar should not be used, whether obtained from cane, beets, mangoes or other sugar-producing fruits and vegetables, or cereals and vegetables containing starch, which substance is convertible into sugar and thence into alcohol. Sugar is composed mainly of carbon, like petroleum, coal, peat and wood. And though it may sound absurd when the world is suffering from so great a sugar shortage, scientists say that there will be no trouble in producing enough sugar to supply all the fuel requirements of gas engines in the future, when once the new industry is established and the market created.

It is a cheerful reminder, to pessimists who are forever croaking about the failure of this or that resource, that civilization has a way of discovering new resources, or creating new ones, about as fast as it needs them. When gasoline gives out we shall undoubtedly have something just as good, and probably cheaper and better.

GERMAN "REPARATION."

The German representatives at the Spa conference, and their apologists elsewhere, have made much of the various supplies, machinery, livestock, etc., delivered by the Germans in compliance with the reparation terms of the Versailles treaty. The value of such "reparation," to the beneficiaries may be judged from this statement made by H. B. Fullerton, an American agricultural expert who has been doing work for the French government.

"The cattle and milk cows which the Germans have turned over to the French peasants under the peace treaty," he says, "have been found to be infected with hoof and mouth disease. As for chickens, I never knew there were so many midget bantam chickens in the world till I saw a German shipment of barnyard fowls. The agricultural implements turned over are monstrosities which can never be used."

These cattle are not only useless in themselves, but they infect the French herds. Those midget fowls are counted, chicken for chicken, against the fine, big, well-bred chickens the Germans stole from the French peasants. Those farm implements are listed as balancing the good French implements taken or destroyed by the invaders. The Germans are simply cheating.

In everything the same old story! Always hedging and shifting and pretending to fulfill the peace terms, and never doing it! If Germany had any sincere intent to make reparation, and would give evidence, in any particular, of honestly doing the best she could to make good the harm so ruthlessly done, the allies would be far more disposed to soften the penalty, and the world would lend a more sympathetic ear.

"Coney Island Bathhouse Men Bar Babies With Bottles," says a New York paper. Do they bar men with bottles? Why discriminate against the babies?

President Wilson doesn't mind the weather in Washington at all this summer. It's cool enough as long as there are any senators hanging around.

It's about time to organize a society of veterans of the presidential campaign. And we do hope it won't start right out demanding a bonus.

"Germany to lay her cards openly on the table at Spa," says a dispatch from Berlin. But we'll bet she has a joker up her sleeve.

The supposed malcontents are "bolting" the big parties in just about the same way that a hungry man bolts his breakfast.

California is urging everybody to "eat a raisin a day." A good many people would rather drink it.

Passing the buck continues to be the chief political occupation in this country.

No, that wasn't another earthquake in France.

OUTBURSTS OF EVERETT TRUE

PEACE RESOLUTION IS FAVORED BY HARDING

Continued from page 1

President Wilson's lesson of nations not punishing the poor States for their past mistakes and taken in previous years' unscrupulous deceptions.

Speaking slowly and with a characteristic gravity, the president dealt his declaration of policy in a clear, full voice that penetrated the crowded out-cries of the pavilion. Several times he got the crowd on his feet as he hammered with eloquent fist to land his blows where they would tell.

There was cheering. His thrust at the league of nations was answered by repeated thunderclaps of cheering but the passage the crowd seemed to have lost when he voiced his humility in the presence of the responsibilities of the presidency, and then squaring his broad shoulders, added that his confidence in the support of his fellow citizens made him "wholly unafraid."

In his decision of the league, he made no direct recommendation for rejection of the peace treaty and did not take up in detail the league covenant. Contenting himself with the declaration that the league as conceived by the president was unthinkable, he passed on to state his own views of what should be done.

At the conclusion of the speech, the senator returned to his home but several of the visiting delegations, not content with their first reception, called again to say goodbye. With Mrs. Harding, who had been by the side of the nominee during most of the morning, he again shook hands with the callers.

WATKINS IS CHOSEN

BY DRY PARTY

(Continued from page one.)

expect to continue as a member of the democratic party and to serve my country through it."

The telegram was addressed to Mr. Bryan's brother, Charles Bryan, at Lincoln.

LINCOLN, Neb., July 22.—D. Leigh Colvin of New York, an author, was nominated for the vice presidency on the first ballot. He was born in Ohio. The convention then permanently adjourned.

ANNOUNCEMENT.

Dr. G. F. Baker announces the reopening of his dental office in the Idaho Department store building. Dr. G. F. Baker, formerly of Chicago, will handle the practice until Dr. Baker is able to use the arm injured in an automobile accident several weeks ago.—Adv.

BOLSHIEVISTS BAROAINING.

WARSAW.—Based on reports reaching Warsaw by wireless and otherwise, it is considered in high circles here that the bolshievists apparently have adopted the policy of bargaining as long as possible before definitely answering the armistice proposals, notwithstanding the expiration of the time limit set by the allies.

Meanwhile the Reds are throwing fresh divisions into their drive from the northwest, which is carrying the

riders. This is believed here to be part of the soviet government's program to gain territory at the gates

of Poland while Moscow spars with London for time. The exchange of notes continues, with the question of agreeing regarding an armistice hanging chiefly upon involved points put forward by the soviet.

The newspapers here are publishing dispatches to the effect that the soviet government is consistently holding out for Warsaw as the only satisfactory place for a conference designed to bring peace. This plan has been opposed by Poland and the allies from the first.

NEED FINANCIAL HELP.

PORTLAND, Ore.—Unless Oregon fruit growers receive immediate relief from banks to finance the industry over the peak of necessity, heavy losses will be sustained by the packing companies and fruit growers also will suffer, according to conclusions reached at a conference here of city and country bankers, growers and canners.

Bankers are said to have reached their limit in loans to canners and their limit, it is understood that it was decided to appeal to the federal reserve banks for relief.

BOUND FOR ITALY.

—GALVESTON, Tex.—The Italian steamship Alcana, loaded with 120,000 bushels of wheat, departed for "a safe port in Italy via Gibraltar for orders." So long as any former warships of the Italian navy remain loyal to Gabriele d'Annunzio, it was explained by her agents, all Italian vessels will clear from American ports with their destinations unknown, stopping at Gibraltar for orders.

PETRIFIED FISH.

SALT LAKE CITY.—A monster petrified fish, about 50 feet in length, has been discovered encased in the rocks in Garfield county, Utah, about 70 miles east of Panguitch by Sheriff James Goulding of Garfield county and T. W. Smith, of Salt Lake, who have been prospecting in that section.

Four years ago at practically the same spot the fossil remains of a plant lizard were found. Goulding and Smith have offered their find to the University of Utah.

FOREST DEPLETION CAUSES THE NEWSPAPER SHORTAGE

WASHINGTON.—The fundamental cause for the present shortage of newspaper paper is the serious depletion of the forests of the Northwest and the Lake States where there is an overdevelopment of the pulp and paper industries, according to a report to the senate by the forest service, United States department of agriculture, in response to a request for information on timber depletion, prices, exports and ownership. The report, which has recently been made public, is one of the most comprehensive ever prepared dealing with the lumber resources of the nation.

Since the requirements of paper making, besides the kind of wood that can be advantageously used in making newspaper, four species—spruce, hemlock, balsam and poplar—supplied 84 per cent of the total amount manufactured in 1907, according to the report. The occurrence of these species chiefly in the Lake States and New England has led to the over-centralization of the paper making industry there. It is stated.

Payne, Deputy for Depletion. Until recently when abnormal demands, short supplies and resulting high prices led to increased newspaper production, through the utilization of plants designed for and formerly used in making other kinds of paper there has been no expansion in the newspaper industry in the United States since 1905, and we have had to import large quantities of pulpwood and paper, the report points out. The demand, however, has recently increased and because of excessive depletion of our own resources the country now is dependent upon foreign sources for two-thirds of its newspaper of its raw material.

Even with the increase in supply has been far short of the needs of the newspapers of the country in the past two years. The contract price has increased more than 200 per cent while spot market prices are 550 per cent more than in 1915. "Prior to the war," says the report, "the larger newspapers secured all or practically all of their supplies under contract, and a relatively small percentage of the total newspaper supply was handled on a spot market basis. During the last year the larger papers have found it increasingly difficult to secure all of their supplies under contract and have been forced to secure the remainder in the spot market. It is in the open market that the full effect of competition for inadequate supplies is shown and this is reflected in the much higher prices."

Small Papers Suffer Most. "Unfortunately, it is upon the spot market that the smaller newspapers, least able to increase returns by increasing advertising and raising their rates, must depend." The result has been that many of these small papers have been forced to curtail their circulation and have had the greatest difficulty in securing enough newspaper to continue publication.

It has been possible for the lumber industry to move to more remote timber lands as forests have been cut away, but the heavy investment required for paper plants have made it impossible for the paper industry to do this. The result is that existing mills are finding it necessary to secure their supplies of wood from increasing distances. Spruce from Minnesota and Canada, for example, is being hauled from 700 to 1,200 miles to paper mills in Wisconsin.

The timber is going fast, the report says. It is reported that in New York, where nearly 50 per cent of all newspaper is produced, 80 per cent of the pulp and paper mills have absolutely no timber supplies of their own. For these mills there seems to be no other prospect than to close down in a comparatively few years. In New Hampshire, the enormous pulpwood has been cut, heavily and 10 or 15 years will see the end of the supply. Aside from the state preserve in New York, in which no cutting is allowed, the bulk of the enormous pulpwood in the East is located in Maine. One company there has enough timber for 40 to 60 years out. Others are estimated to have enough to last 15 to 20 years, but there are about 15 companies which have no lands of their own and which will have difficulty in purchasing material within 10 years.

In general, the pulp and paper mills of the Northwest are becoming more and more dependent upon Canadian wood. Such dependence, the report points out, is extremely dangerous. "All exports of pulpwood are prohibited from Newfoundland. The Canadian provinces have prohibited the export of pulpwood from crown lands, which form a very considerable part of the timberlands in Eastern and Western Canada."

On the whole, the situation of the newspaper industry in the United States is very unfortunate and there is little chance of its becoming better, the report states. The only thing that can assure production of even approximately domestic requirements are concerted efforts to increase the production of pulpwoods in the Northeast and the development of the newspaper industry in the West and in Alaska.

Alaska Offered. The timber on the Tongass National forest in Alaska is said by the report to be of particular importance in connection with the newspaper situation. It is estimated that there are about 70 billion board feet of Sitka spruce and western hemlock well suited for paper making. The timber is located in a comparatively narrow belt along 12,000 miles or more of coast line. No power is available as is also deep water transportation from numerous mill sites.

"It is estimated that the cut from this region alone will insure a perpetual supply large enough to meet one-half of the present newspaper requirements of the United States. Alaska as one of the centers to which the newspaper industry of the United States should look for a large future development. The same is true of other centers in the West, where immense resources of pulpwood supply are now almost wholly undeveloped. Much of this timber is in the national forests."

To write about promptly the development of the pulp and paper industry in new regions of abundant timber supplies the report recommends a comprehensive survey to furnish exact data upon the status and location of suitable timber and other graded data.

KRAKASIN IS 'MODERATE' IN SOVIET GOVERNMENT. LONDON.—Leonid Krakasin, who came into the public's attention when he came to London this autumn as head of a commercial trade to negotiate the reopening of trade relations between Soviet Russia and the outside world, has been one of the few "moderates" to be given a place of responsibility in the Soviet government machinery and has been characterized as a "bourgeois bolshevik."

For engaging in a student's demonstration, Krakasin was expelled from the Petrograd Technical Institute. Subsequently he engaged in a number of plots against the czarist regime, but continued to advance in his profession, that of an electrical engineer.

Following the bolshevik coup of October, 1917, Krakasin was offered a seat in the ministry, which he declined as he thought Lenin's adventure too risky and his theories too extreme. But his relations with the new government were cordial and he accompanied Lenin and Trotsky when they went to Tiflis-Litovsk to negotiate the treaty with Germany.

When it became apparent that the bolshevik government would not let Krakasin throw in his lot with it and become commissary of food in the red army.

A "bourgeois bolshevik," Krakasin is said to have little or no belief in the theories and aims of the soviet government. For the time at least, however, he was convinced that nothing was to be gained by resistance to the control of the workers. He came upon his own ground with the workers in his own factory, giving shape to the soviet experiment.

During his tenure of four ministerial offices he has worked imperceptibly for the restoration of the pre-bolshevik order of commerce. To him, the nationalization of commerce was one of the most stupid of Lenin's blunders. As for the world revolution, he is an entire skeptic, and is all for bourgeois peace. He would lead Russian socialism into the normal ways of democracy. "Who believes in socialism in Russia?" he is reported to have asked. "Not I, nor Lenin."

OFFICE PURSUES MAN. PEKING.—A striking example of the office seeking the man, or rather pursuing him, is afforded by the present cabinet situation. Premier Chin Yun-peng, who became the leader of the "Chihli" political faction after the death of former President Feng Kuo-chang, wants to resign his post but the president won't let him. The ostensible reason of his desire to quit is the difficulty the government finds in financing the army. The real reason is said to be found in a contest which is in progress between the "Chihli" and "Anfu" factions, the latter being the military group.

For the third time the premier has tendered his resignation and three times the president has refused to accept it, offering in lieu a leave of absence, each resignation bringing forth a new extension of the leave. In the meantime Admiral Shih Cheng-heng, minister of the navy, is reluctantly filling the post of premier.

Much political maneuvering is going on under the surface and at the moment it is regarded as probable that the cabinet will not be reconstituted. The president is expected to resume his post possibly with some changes in the ministries upon which he is said to be insisting.

PARLIAMENT AROUSED. PARIS.—France's expenditure in other countries of 1,600,000,000 francs last year has caused a great commotion in parliament and the newspapers to a point where the government has renewed efforts to bring about industrial use of alcohol.

Washington	41 43 .488
Detroit	39 45 .464
Detroit	28 55 .337
Philadelphia	25 65 .273

BOSTON, July 22.—Kerr had the better of Harper in a pitcher's duel today and Chicago defeated Boston, 2 to 1. Chicago scored in the third on singles by E. Collins and Weaver in the eighth on singles by Kerr and Leibold. McNally's overwork of first, and E. Collins sacrifice fly.

Score: R. H. E.
Chicago 2 9 1
Boston 1 10 2

Batteries: Kerr and Schalk; Harper and Walters.

BRILLIANT FIELDING.
PHILADELPHIA, July 22.—Weich's infield single with the fifth out secured two runs and won today's game, from Detroit 3 to 1. Vouch's home run accounted for the visitors' only score. Brilliant fielding helped Harris out of several tight places.

Score: R. H. E.
Detroit 3 9 2
Philadelphia 1 10 1

Batteries: Ayers, Ogles and Stange; Harris and Perkins.

RAIN INTERRUPTED.
NEW YORK, July 22.—New York again defeated Cleveland today, 11 to 3, the game being called after the Indians finished their turn at bat in the seventh. Play was continued in the rain after the first inning and an interruption of 20 minutes was allowed by continuous rain until the game was called.

Score: R. H. E.
Cleveland 3 7 2
New York 11 16 0

Batteries: Coveleskie, Myers, Faltch and O'Neil; Collins and Iruel.

PITCHED SHUTOUT BALL.
WASHINGTON, July 22.—Washington ousted St. Louis from the first division today by taking the first game of the series, 5 to 4. Zachary pitched shutout ball after being hit hard in the first four innings.

Score: R. H. E.
St. Louis 4 9 5
Washington 5 9 0

Batteries: Shacker and Severid; Zachary and Utchich.

HONK ON AMERICANS.
LONDON.—R. I. Peacock, curator of mammals to the London Zoological society, has discovered what he says is a "great honk upon the Americans."

who for more than 400 years have believed that bad badgers on their continent.

An American badger, brought here to make an "instructive comparison," was put in a cage with some British badgers. The British badgers slept all day, the American badger and the American animal was neither badger, skunk, nor weasel. He said its skill and teeth were "wrong" for a badger. It lacked the scent gland, and its resemblance to the badger was no superficial but constituted it of a totally different tribe.

Philadelphia 2 9 6
Chicago 4 8 1

Batteries: Meadows and Wheat; Tyler and Dady.

TWO STRAIGHT.
PITTSBURGH, July 22.—Pittsburgh made it two straight by defeating Brooklyn today, 5 to 2. Cadore weakened in the 7th and 8th when the locals scored four runs.

Pittsburgh 5 10 0
Brooklyn 2 7 2

Batteries: Cadore and Krueger; Carlson and Schmidt.

RALLY IN NINTH.
ST. LOUIS, July 22.—Boston trailed St. Louis for eight innings today,

then rallied in the ninth after hitting Boegef, the first man to face him. Oeschger was hit hard but the locals were able to bunch scuffles only in the eighth inning when five hits and two bases on balls accounted for their four runs.

Score: R. H. E.
Boston 4 12 0
St. Louis 5 8 1

Batteries: Oeschger, McQuillen and Gandy; O'Neil, Schlupp, Haines, and Clemens.

HELD IN CHECK.
CINCINNATI, July 22.—Haines held Cincinnati completely in check today and New York won the second game of the series, 2 to 1. Lique pitched fine ball, allowing only four hits in eight rounds, one of which was a triple.

Score: R. H. E.
New York 2 6 2
Cincinnati 1 6 2

Batteries: Haines and Smith; Lique, Eiler and Wingo.

REMINAL OF FORMER PRINCE.
POTSDAM.—Funeral services for Prince Joachim, youngest son of former Emperor William, were held in the Friedenskirche. They were attended by his brothers, Princes Eitel Friedrich, Adalbert, August and Oscar, numerous former officers, and personages connected with the one-time imperial circle.

On the coffin were wreaths inscribed from former Emperor William, Empress Augusta Victoria, Princess Victoria Louise, and numerous personal friends. After the ceremony the coffin was temporarily transferred to the Sigismund chapel, which is attached to the Emperor Frederick's mausoleum.

who organized in China the "Ever Victorious Army" in the Taiping rebellion, afterward turning the command to the British general "Chinese" Gordon. The Shanghai post has 100 members and has been authorized to form other posts in China.

at present prices, values are sure to rise. We have some good bargains with share of crop to buyer, and some for full delivery.

HERE IS ONE
120 acres, all in crop, all seeded in alfalfa. Land lays well, no sand, very little rock. House, barn, granary and other buildings. Located north of Jerome, near good school. Price \$175 per acre, delivered November 1st, all charges paid to ship, or will sell with crop if desired. Can give good terms. Call on or address

Finance

NEW YORK, July 22.—Liberty bonds: Final prices today were: 2-1-2s, \$90.92; first 4s, \$95.84; second 4s, \$96.90; first 4-1-2s, \$96.10; second 4-1-2s, \$95.08; third 4-1-2s, \$95.28; fourth 4-1-2s, \$95.30; Victory, 3-2-4s, \$95.78; Victory 4-2-4s, \$95.74.

By the Associated Press.
CHICAGO, July 22.—Black rust, which more serious than any previous this year, had a good deal to do today with a material advance in the price of wheat. The market closed firm; 2c to 2-1-2c net higher, with December, 55¢ and March 56¢. Corn gained 1-2c to 2-1-4c, oats, 1-8c to 1c, and provisions 17c to 50c.

Unfavorable conditions in parts of the American northwest, especially North Dakota, formed one of the chief reasons for anxiety becoming grain sellers regarding black rust injury to wheat, but during the early trading the market tended downward owing to talk of widespread heavy demands for corn to move wheat and because of welcome rains in Canada. Predictions of showers and high temperatures, however, in the black rust district, but subsequently to a reversal of sentiment and so too did gossip that export business at the seaboard was lively, and that receipts of coarse grain in here were likely to be curtailed.

Only after the opening showed uncertainty second a decided upturn. There was a renewal of yesterday's persistent buying on the part of a big elevator concern.

Oats merely reflected the changes in other grain.

Provisions were governed by the strength of cereals, despite lower quotations on here.

CASH GRAIN.
CHICAGO, July 22.—Wheat—No. 2 red, \$2.82; No. 3 red, \$2.80.

Corn—No. 2, mixed, \$1.55, 1-2c; No. 2 yellow, \$1.54, 1-2c; No. 2 white, 94¢ 95¢ 1-2c; No. 2 white, 92¢ 93¢ 1-2c; No. 2 yellow, \$1.52, 1-2c; No. 2 white, \$1.51, 1-2c; No. 2 yellow, \$1.50, 1-2c; No. 2 white, \$1.49, 1-2c.

MINNEAPOLIS, July 22.—Corn—No. 2 yellow, \$1.54@1.56.

Oats—No. 2 white, 93¢ 95¢.

Barley—No. 2, \$1.17.

Hops—No. 2, \$2.10-1-4¢ 2.20-1-4¢.

Flax—No. 1, \$2.75@4.41.

ISSUING VICTORY MEDALS.

WASHINGTON.—Victory medals are being issued by the War Department to world war veterans on individual application only and no arrangements have been made with the American Legion to distribute the medals.

Secretary Baker's reply, made public by Sperry, after denying that arrangements had been made with the American Legion to distribute the medals, said that "any arrangements made by the American Legion with the members of that society after they have received the medals is a matter over which this department exercises no jurisdiction."

BISHOP CODD ISSUES ORDER.

LONDON.—The nationalist newspaper of Dublin announced that the Right Rev. William Codd, Roman Catholic bishop of Ferns, county Oxford, has prohibited the clergy of his diocese from participating in Sinn Féin exhibition courts and has refused to allow the clergy to announce collections in aid of the rallymen who are striking against carrying armaments, says a dispatch to the London Times from Dublin.

The newspaper said the dispatch continues that Bishop Codd in the first place, indeed the first priest, to take such action.

IRISH WILL NOT COMPETE.

BIRMINGHAM.—After an exchange of correspondence with the British Olympic committee, the executive committee of the Olympic games has refused Ireland permission to participate in the seventh Olympiad as a separate nation.

The Irish athletes refused to compete under the British flag and wrote the Olympic executive committee stating that they would enter in a number of events if they were allowed individual standing. The Belgian executive, facing a delicate situation, sought to gain Great Britain's consent, but failed.
