THE END OF A CAREER

It would seem that the earthly career of Nicholas Romanoff, late czar of Russia, is finally at an end. Thought to be a quiet life in the hands of his wife, she is the protégé of a group of officials and women whose only thought was for themselves, it is not thought that his end should be more notable than any single feature of his life.

Nicholas Romanoff was naturally a weakling. His whole life was given up to a constant struggle between his conscience on the one hand and his inability to throw off the yoke imposed by the conditions under which he lived and reigned. His life which led the right and follow the wrong, which indecency may be traced throughout his whole career.

He was the sport and plaything of the strong men by whom he was surrounded. Naturally democratic, imbued with a sincere desire to help his people and anxious always to bring about a condition of national harmony throughout Russia, he was unable to separate himself from members among his subjects, totally without the power to lift the veil from the chaff in the hands of the every day life and lacking the strength to profit from the natural talents for governing which he appears to have possessed to a marked degree.

The policy pursued during his reign towards nihilists and similar agitators appeared to him to be the only method in any manner warranted. But he reached this conclusion not through any investigation of his own into existing conditions but because it was the desire of those close to the throne that this precise conclusion be reached by him.

I like being and being a good deal in Alaska, and I'm not afraid to be shot at," he said. His application for enlistment in the infantry was completed, and Eskimo left Sunday evening for Fort Seward in complete military dress.
