### LINER JUSTICE A SUNK BY GERMAN TORPEDO ON WAY TO AMERICA

BRITISH STEAMSHIP UNDER CONTROL OF UNITED STATES FALLS VICTIM TO U-BOATS—IS BIGGEST SHIP SO FAR LOST BY ALLIED NATIONS—NEWS IS ANNOUNCED IN BERLIN WITH EXPRESSIONS OF LIVELY SATISFACTION

COPENHAGEN, July 24.—The British steamer Justice has been torpedoed and sunk, the German admiralty officially announced today.

German newspapers express great satisfaction that the steamer was sunk while under American control.

Submarine commanders in their official reports stated the Justice was equipped with large steel anti-torpedo nets, "rendering her destruction difficult."

### NAMED MAYORS OF TOWNS TO BE CAPTURED

GERMANS SELECTED OFFICIALS IN ADVANCE FOR CITIES IN PATH OF PROPOSED HUN DRIVE

By FRANK J. TAYLOR (United Press Staff Correspondent)

WITH THE AMERICAN ARMIES IN FRANCE, July 24.—The German drive southward between Soissons and Main-de-Massiges was one of three pushes they contemplated this summer—two toward Paris and one toward the channel ports, according to information obtained from prisoners.

The recent effort, which resulted so disastrously and gamed up the whole program, was aimed toward Chalon and Epervy. The French and Americans have captured German officers who were prematurely appointed mayors of French cities to be occupied, including the two named Epervy.

Captured Bucha also declared that a large number of divisions were massed in Flanders for a drive against the British while they were concentrating 13 divisions (420,000 men) for the Champagne operation. The Flanders drive was to follow the crown prince's push as soon as the latter had attained a certain degree of success. Many prisoners in Soissons have been identified and recently removed from Flanders, indicating the failure of the Champagne drive and the contemplated Flanders campaign.

Paris Drive in Sight

German officers say the third drive toward Paris was to be undertaken late this summer or early in the autumn in the event that the one just stopped did not carry clear through to the coveted territory.

War Lords in Bad

Prisoners are doubtful as to whether these other two drives will be carried out as planned, since a great number of extra divisions were used on this.

### MEMBERS OF CREW ALL ACCOUNTED FOR

VICTIMS OF GERMAN SUBMARINE ALL BEACH COAST HARBORE SAFELY

PORTLAND, Me., July 24.—All members of the crew of the schooner Richard and Robert, sunk by a German submarine off the Maine coast, were accounted for today.

A day containing eight men was landed here, while another with four men was taken to Boston. Captain Robert Wharton and eighteen of the crew have arrived at the naval coast patrol headquarters at the port.

Eleven of the schooner's crew arrived here on a coal steamer last night. The Roberts and Richards was sunk by a bomb plane on her by the crew of the submarine after a shell had halted the little vessel.

An officer of the submarine took an American flag from Captain Wharton of the schooner and as he did so declared he had another in his "summer home in Maine."

### SALVAGE CLAIM TAKES ALL CASH

CHICAGO, July 24.—Hopes of claimants for damages growing out of the Eastland catastrophe here were shattered today with the announcement that the salvor had been successful in his claim against the \$400,000 realized in selling the ship. The salvage claim practically wipes out available cash. The Eastland sank in the Chicago river three years ago, killing 800.

### REAR GUARD OF CROWN PRINCE IS FORCED TO GIVE GROUND

ALLIED PRESSURE COMPELS STEADY RETREAT NOTWITHSTANDING ENEMY EFFORTS

By FRED S. FERGUSON (United Press Staff Correspondent)

WITH THE AMERICANS IN FRANCE, July 24.—Despite orders to hold to the death, the crown prince's rear guard is being forced to give way before the allied attack along practically the whole battle front. Prisoners declare the units of the rear guard were ordered to remain at their posts and hold off the Americans to the last. Before the violence of the American assault they are being wiped out or taken prisoners.

The advance is proceeding cautiously at all points, however, owing to the great mass of German reinforcements and their great resistance. The battle occasionally loses all resemblance to a rear-guard action and appears as though the Germans endeavor to make a permanent stand. Now German reserve divisions are being constantly identified.

Resistance Stiffening

The bitter fighting is proceeding north of Jaugnon, where the Americans are enlarging their bridgedhead. Americans are pressing northward along the main road from Chateau-Thierry to Perre-E-Tardennes in the

### AUSTRIA PLANS ANOTHER DRIVE

NAVAL OFFENSIVE AND TWO LAND MOVEMENTS ON THE PROGRAM

By HENRY WOOD (United Press Staff Correspondent)

ROME, July 24.—Austria-Hungary is planning a triple offensive against Italy, according to dispatches received from Italian correspondents in Switzerland today.

The program includes military drives in the Venetian region of the Italian front and in Albania, together with a naval offensive along the Adriatic coast.

Simultaneously Austrian aviators are to bombard Italian cities back of the lines and attempt to regain the ascendancy on both the Italian and Albanian fronts. According to reports Austria-Hungary is openly counting on German aid in carrying out the plan. A German diplomat in the fact that General von Below's tentative appointment as commander-in-chief of the Austrian army was recently reported to have been cancelled, following strenuous objection by the Austro-Hungarian high command.

AMSTERDAM, July 24.—A rumor that an attempt was made on the lives of the Kaiser and General von Hindenburg is denied in copies of the Cologne Volks Zeitung received here today.

### THREATENED STRIKE BY MUNITION WORKERS MEANS VIRTUAL STOPPAGE OF WAR MACHINES

LONDON, July 24.—In an effort to reach an amicable agreement with munition workers who are threatening to strike, conferences will be held between representatives of the government and the unions, which have named a special committee to study the matter. It was declared today, there will be more than 100,000 striking before the end of this week, with a possibility that the number will reach 200,000 next week.

Already 12,000 men have left their work at Coventry and 5000 at Leicester. Today 60,000 men and 50,000 women are scheduled to walk out at Birmingham. At other points thousands were expected to strike. Manchester workers are expected to go out tomorrow. There has been no action yet at Glasgow.

Morning newspapers are urging workmen against haste, pointing out the danger of a stop. The allies, they declare, will suffer greatly if the strike is permitted to be called.

### ADVANCE MADE OVER FIFTEEN DIVISIONS OF ENEMY

GENERAL MARCH SAYS GERMAN RETREAT IS SIMILAR TO AUSTRIAN DASH, BACK ACROSS PIAVE RIVER

WASHINGTON, July 24.—In the face of at least fifteen divisions of German reinforcements, the allied armies in the Soissons-Rheims salient have steadily advanced during the last three days, Chief of Staff March told correspondents today.

Between the Marne and Rheims the enemy has been pushed back on a ten-mile front to a depth of from one-half to two miles.

The Germans have only one rail-line over which to carry out their retreat unless they have constructed some minor field tracks, he said.

Similar to Pavia

"It seems that the Lord has become tired of his partnership of 'me and Gott,'" March declared during his description of the great offensive of the Franco-Americans of the past week. The German retreat was in some respects similar to the Austrian dash back across the Piave. A storm had concealed the allied movements that made possible the pushing back of the enemy. That was what March referred to when he declared that the self-made partnership of the Kaiser and his "Gott" had gone awry.

Make Bold Decision

Taking the situation as a whole, March pointed out that the Germans had made a bold decision for retirement, relying on the cover of night

### HUN PEACE TERMS AGAIN SET FORTH

OFFER THIS TIME COMES THROUGH SPAIN, ACCORDING TO BERLIN NEWSPAPER

AMSTERDAM, July 24.—Germany has made a new "informal" peace offer to Spain, according to the Berlin Vorwarts, the Socialist newspaper, which declares it obtained the information from reliable sources and enumerates the principal German terms as follows:

No annexations or indemnities in the Balkans.

The Russian and Rumanian peace treaties to stand unquestioned. Belgium's future, as well as that of other small nations, including the Balkans, to be determined at the peace conference.

All colonies to be returned to Germany.

Freedom of the seas to be realized. Gibraltar and Suez canal defenses to be dismantled and Germany to be permitted to establish sailing stations in those places.

### FOUR HUNDRED THOUSAND ENEMY TROOPS MASSES IN SOISSONS-RHEIMS POCKET FOR LAST FINAL EFFORT

RESISTANCE IS BITTER BUT ADVANCE GOES ON

TURNING POINT OF WHOLE OFFENSIVE MAY COME WITH DEVELOPMENT OF IMPENDING STRUGGLE ALONG TWO SIDES AND PART OF THIRD OF BLOOD SOAKED GROUND WITHIN FAMOUS TRIANGLE—PROGRESS GRADUAL BUT STEADY NORTHEAST OF CHATEAU-THIERRY AND SOUTH OF OUROU.

PARIS, July 24 (4:00 p. m.)—The Germans appear determined to avoid a prolonged retreat and are reported to be preparing for a desperate stand along the present battle front.

Further allied successes under these conditions will thus imperil more than 400,000 Germans in the Soissons-Rheims pocket as their forces within the salient have grown to that figure.

French and American troops, overcoming bitter resistance, are progressing northeast of Chateau-Thierry and south of the Ourcq.

The enemy position at Oulchy-Le-Chateau (which already is reported to have been rendered untenable by the allies) is outflanked.

### US ARTILLERY ACTIVE SHEARS PINCH LITTLE HARDER ALL THE TIME

TEMPORARY SET-BACKS QUICKLY OVERCOME BY ALLIES AT EVERY POINT OF FIGHTING

By LOWELL MELLETT (United Press Staff Correspondent)

WITH THE FRENCH ARMIES IN THE FIELD, July 24.—Another day of hard fighting has gone well with the allies. Although at one point they threw back the advancing American temporarily, the Germans were compelled to give ground in many places, the most important of which were in the region of Soissons and Rheims—the two points where the Germans are making their most desperate resistance.

Near Soissons the enemy felt the pinch of the Franco-American spear. Near Rheims the Franco-British spear jabbed its point in a little farther, adding to the danger of the German army in the pocket below.

The German slight success resulted from a heavy counter-attack which caused the Americans near Eplois. But the Americans later regained the town and advanced a bit further.

The object of the Germans in throwing in strong forces here has been to protect the slow process of the withdrawal of supplies and troops from the pocket.

Not All Fires German

Incidentally today's report showed that all munition depot fires are not the result of their destruction by the Germans, but all allied aviators and long-range artillery have been particularly successful in hitting these dumps.

The French yesterday attacked

### GERMAN CROWN PRINCE CHANGES HIS PLANS

PARIS, July 24.—The German crown prince has suddenly changed his plans for a strategic retreat in the Soissons-Rheims salient and has determined to fight it out there. This is indicated by attacking enemy resistance and increasing reinforcements, and was borne out by German prisoners today, who declared the withdrawal order has been countermanded. They could offer no explanation, but military experts believe the German plan, fearing the internal effects of a huge retreat, forced the change in plan.

The crown prince continues to order new divisions into the pocket, drawing the reinforcements from as far north as the main British front. German losses in this region are estimated at 125,000 to 150,000 men, including 25,000 prisoners.

region of Epidis (four miles northeast of Chateau-Thierry), harrying the enemy retirement toward Fore-So-Fardinois, one of the principal communication centers. In this section of forces captured Marie farm, an important strategic point.

While the German columns were passing through the woods an American unit found the Boches had established machine guns every ten yards. They were seemingly impregnable. The Americans massed as though for a frontal attack. While the German column was centered on these forces, other Americans made a wide encircling movement and suddenly charged the enemy from both flanks. They were taken completely by surprise and surrendered to escape slaughter.

Artillery Fire Deadly The results of heavy artillery fire are seen everywhere—dead Boches, dead horses, smashed wagons, wrecked houses, and trees snappled off like matches. Beyond Chateau-Thierry I saw a point patch with most of the top blown off of the ground by shells. In the midst of the patch was a shallow German dugout covered over by the footboard and headboard of a wooden bed taken from a nearby house. The Boche occupants had left blankets, comb and other equipment in their flight.

Whole Village Wrecked The villages north of the Marne are badly wrecked and display shell tracks that remind one of the queer pranks played by our American tankmen. One shell, hitting the side of a house, tore off the wall that served as the back of a cupboard. The dishes stood wrecked on the shelves untouched.

Yanks in High Spirits The Americans are in high spirits, despite the fact that they are literally snatching their food and rest on the run. Two doughboys, bringing in two Boches for the battle, carry a captured machine gun. They decided their packs were getting heavy and made the prisoners carry them. Enroute to headquarters they came upon two dead Germans. "I think the Boches ought to bury their own dead, don't you?" asked one of the doughboys. "Sure," answered the other.

CHICAGO GRAIN FUTURES CHICAGO, July 24.—Grain futures started at lower levels on the Chicago board of trade today. Commission houses had selling orders sufficient to over balance a favorable market. Favorable weather here is being anticipated. There was a slight reaction in grains before noon. Provisions reflected the strength in the hog market.

July corn opened unchanged at 101 3/4, slumped briefly and by noon advanced 1 cent above the opening. August corn was down 5/8, at the opening, 102, but later advanced 1 1/8. September corn, down 5/8 at the opening, 103, was up 1 1/8 by noon. July oats opened 74 1/2, 1/4 and later gained the same fraction. August oats, unchanged on opening at 69 1/8, advanced 1/8 later. September oats opened at 69, up 1/8 and regained at that figure.

front last week and many of them were so badly shattered they will not be fit for use as storm troops inside of four months. The majority of intelligent German prisoners believe the Kaiser will start another offensive this summer on even a bigger scale to regain the confidence of the German people, which is admitted to be at a low ebb. Many prisoners frankly say they do not know and do not care about Germany's future activities, declaring they are sick of war.

They say the allied army compelled them to fall back so fast they were unable to maintain an effective counter-barrage. While the allies were bombarding, Boche positions prepared by some of the local attacks, the German outfits were forced to take cover and many were captured before they could come out of their hiding-places. In some regions the fighting was carried on almost entirely by artillery and machine guns, the front being in far ahead of the Americans that rifles and grenades could not be used effectively.

Cover Retreat Allied aviators and German prisoners testify to the destruction wrought by our heavy guns on railways, roads and important junctions, which were necessary to the enemy's retirement. The German plan of retreat left the machine gun signals to fight rear-guard actions at many points. On several occasions when their guns and their crews were captured the Boche general staff did not know that their comrades had already fallen back.

**BIG SAVING IS POSSIBLE BY WIRE SEIZURE**

**ELIMINATION OF MUCH EXPENSE AND PROPER GUARDING OF GOVERNMENT INFORMATION ARE ASSURED**

(By United Press)  
WASHINGTON, July 24.—The government's purpose in seizing the lines of communication are manifold. Cabinet officers pointed out that such action was essential to protect government secrets, and private information valuable to the enemy being disseminated abroad. It was also considered vital for the need of maintaining uninterrupted communication channels and eliminating the danger of strikes.

In addition, however, the government needs vast amounts of material to work with now the war because of waste in unnecessary competition between telephone and telegraph companies at many places. Duplicating telegraph systems in nearly one thousand cities will be combined under government control, telephone wires will be utilized in extending telegraph services. It is the intention to materially increase the telegraph facilities, more equitably distribute the labor of telegraphers, thereby reduce the operating expense by completely changing the present bookkeeping methods—and as a result bring to the public increased service at cheaper rates.

Just as the railroad administration has eliminated the expense of many and diverse competitive agencies—offices, advertising, etc.—so will the wire administration eliminate similar expense.

**Control Use of Cables**  
Seizure of the cables, it has been stated, is vital because of two principal reasons:

It will serve further against information of value to the enemy getting out of the country; and

There is at least one cable that the war department has long been anxious to have its hands on, for carrying on vital work.

While seizure of the wire systems was brought to a head at a time when nation telegraphers were threatening to strike, because the Western Union refused to accede to their demands and President Wilson's request to abide by a ruling by the war labor board (acknowledging the right to join the union) the government has had the opportunity to plan for the future.

At least three of the present members of President Wilson's cabinet favor government ownership or permanent operation of the communication system. As a result it is confidently predicted by authorities here that once the government has put into effect its plans of reorganization of the great wire lines, it will be a physical impossibility to reassemble them and turn them to private ownership again.

**Of Widespread Effect**

The executive order of the president today brings under government control for the period of the war, millions of miles of wire, thousands of employees and capital with the seizure of the cables and the monopoly postal business, places the government in virtual control of every industry in the land.

The strike of telegraphers is now definitely off.

With a president's signature on the wire seizure order, lockouts will stop and reinstatement of those men locked out in recent weeks will take place rapidly after government control begins.

The union will endeavor to have all questions of wages and working conditions left in the hands of the war labor board. Some questions are now pending.

In his proclamation taking over the lines the president assumes "each line of every telegraph and telephone system and every part thereof, within the jurisdiction of the United States including all equipment thereof and appliances and under whatsoever and all materials and supplies."

**Under Postmaster General**

"It is hereby directed," his proclamation reads, "that the supervision, possession, control and operation of such telegraph and telephone systems shall be exercised by and through the postmaster general, Albert S. Burleson.

Such postmaster general may perform the duties imposed upon him so long and to such an extent and in such manner as he shall determine through the owners, managers, board of directors, receivers, officers and employees of said system.

"Until and except so far as said postmaster general from time to time by general or special orders otherwise provide, the owners, managers, board of directors, receivers, officers and employees of the various telegraph and telephone systems shall continue operation in the usual and ordinary course of the business of said systems in the face of their respective contracts, associations, organizations, owners, or managers, as the case may be.

**WITH FRENCH ARMIES IN THE FIELD, July 24.—The first day of the German offensive, Commandant George Molitor, holding Brailley, (two miles northeast of Caillon) with two companies, was encircled by the Germans.**

During the afternoon he sent a message by carrier pigeon telling of the plight and giving the only valuable information. The little body of Frenchmen held off the Germans for seven hours. Then, knowing he was lost, Molitor sent a final message, asking that the French artillery be turned on the village as the Germans entered.

"Les Boches sont sur nous. Nos Sommes perdus Mais Nous sommes de belle besogne. Fait sur la Villa."

"The Boches are upon us. We are lost, but we have done good work. Fire upon the village."

(those who have had the responsibility under conditions heretofore existing) have been remarkably successful considering the unusual additions to their task and the unprecedented difficulties in the way of its full performance which have arisen out of the war—difficulties which could be overcome only by a unity of administration particularly unification of the use of the telephone and telegraph lines which could not be realized without the aid of the government.

"Under the president's orders conditions are changed and greater opportunity is afforded to effect improvement and economic and a larger use by the people of these facilities which have become an imperative need in their every day life. Whether advantage can be taken of these opportunities to improve this service to the public remains to be disclosed by experience.

**Improve From Service**

"There will be no change affecting the present wire service except to improve it where possible. Of course no general policy has been decided upon and will not be until a most careful survey of the whole situation is had and a complete set of conditions as they now exist secured.

"I shall freely avail myself to all advice and suggestions which those in a position to do so may be good enough to offer me.

"It is necessary to formulate any changes of policy, announcement of such will be made through the postmaster general."

No reference is made to the government taking over the cables. For many the local problem involving the operation of these lines, some of which do not touch American shores, have been under discussion by government authorities.

Pocatello Railroad Man Breaks the Ice for the Nonpartisans in entering Primary Race

W. A. Fife of Pocatello, an Oregon Short Line conductor, who was endorsed by the Nonpartisan league convention for secretary of state, was nominated as possible candidate to fill that office Monday by Thomas R. Davis and David Anderson, who filed his nomination papers at the office of the secretary of state.

The first Nonpartisan league candidate to enter the field, says the Idaho Statesman. He has not accepted the nomination but is expected to do so. He was selected by the league as the labor representative on the organization's slate.

W. W. Van Canan of Sandpoint was nominated by Ignatz Well also of Sandpoint, for secretary of state on the Republican ticket. Van Canan hopes to profit, it is said, by the seeming unwillingness among the voters of Idaho that some of the state officials shall come from north Idaho. He has the backing of the party in the northern part of the state.

**TO OFFER PROGRAM OF RUSSIAN HELP**

**PRESIDENT PREPARING ANNOUNCEMENT AS TO FORM OF PROPOSED ASSISTANCE**

By ROBERT J. BENDER (United-Press Staff Correspondent)  
WASHINGTON, July 24.—Allied action in Siberia impends. President Wilson has completed an announcement which will set forth to the world the program of aid for Russia assuming the Russians and all peoples that ours is not a policy of aggrandizement or aggression. Its issuance awaits only receipts of the formal acceptance by Japan of the International proposition. This is expected hourly.

The first step of the allies will be to occupy Vladivostok with troops.

With this has definitely been actual protection the landing of armed German forces, which is becoming a greater menace in Siberia, will be countered.

The action is not "intervention." It is the foundation work for the economic assistance which is to follow. President Wilson will outline specifically the whole proposed course of action and its purposes. His declaration will be spread broadcast through all countries of the world to effect any effort by Germany to spread the false

rumor that the allies are aggressively acting against Russia.

A force of trained newspaper men will be sent into Siberia to establish contact with Russians and disseminate the news of the American program of assistance. Czecho-Slovak forces have "cut their pipe" in Siberia. The people of that part of Russia are friendly.

THE OUTCAST

Germany's latest outrage, her submarine attack upon an unarmed tug with a string of barges in tow is simply another piece of evidence for the prosecution—simply one more reason why Prussian militarism and everything that it entails must be cleaned off the face of the earth.

During the past thirty days alone Red Cross hospitals back of the fighting lines have been deliberately attacked and bombed in places. One hospital ship, the Glendowry Castle, has been sunk and there is no sign of any attempt of the program which lends its keen relief to the fact that neither is their aid, nor the abandonment of the American advances beyond Chateau-Thierry.

All these things must some day be settled for and the settlement must be exacted just the same whether the German Empire is a bankrupt institution, its people walled down disease and torn with starvation. And after that settlement is effected it will take the passing of many decades before the manhood of the earth will be prepared to extend the hand of friendship to the German people.

That Germany today is slated to occupy the place of an outcast among the nations is the fault of Germany alone. Not particularly the German government but the people who serve the German government and acquiesce in the perpetration of deliberate murder and worse. And in this lies perhaps the most terrible feature of the days to come. For the innocent must then suffer with the guilty—children must grow to manhood with the knowledge of an inherited curse upon themselves and their kind. Men will live and have their being that in a way of implacable hate, cut off from instructors, with the rest of the world, pointed at as the people who killed babies, murdered women, bombed hospitals and ground the heel of the tyrant into the face of a people.

SLACKER JEWELRY

Some Americans have been brought to a realization that platinum jewelry is far too time is slacker jewelry, but in how times why this is so. The statement of Dr. Charles L. Parsons, chief chemist of the Department of Interior Bureau of Mines, explains this point and is an effective argument for discontinuance of the non-essential use of a material vitally necessary to the winning of the war.

"The war can not be won without platinum," says Dr. Parsons, "and it is equally essential in times of peace if our country is to excel Germany in the development of chemical science and industry. With the aid of platinum from one ordinary welding ring about 100 pounds of nitric acid can be made every 24 hours. This 100 pounds of nitric acid converted into high explosives will send a number of 3-inch shells against the Germans and help to bring the boys back home.

"Platinum rings, pins, cigarette cases, and mesh bags are not factors in winning this war—explosives are. I wonder if the purchasers and wearers of platinum jewelry know that explosives can not be manufactured without the use of sulphuric and nitric acids; that the manufacture of these acids requires the use of supplies of platinum; that airplanes must have platinum for important instruments; they need; that platinum is absolutely

necessary in the manufacture of special pyrometers; that pyrometers are necessary in all steel treatments; and that no guns can be made without the use of pyrometers.

HOLD YOUR LIBERTY BONDS

To successfully finance the war it is necessary that owners of Liberty Bonds hold their bonds if possible. Where for any good reason it is necessary for them to turn their bonds into cash they should seek the advice of their bankers.

There are various other methods used and likely to be used, some of the gold-bond variety and others less crude and probably within the limits of the law. All offers for Liberty bonds except for money and at market value should be scrutinized carefully. The bonds are the safest of investments and have non-taxable and other valuable features.

GUNNER DEFEW of Albert N. Depew

EX-GUNNER AND CHIEF PETTY OFFICER U.S. NAVY MEMBER OF THE FOREIGN LEGION OF FRANCE CAPTAIN GUN TURRET, FRENCH BATTLESHIP CASSARD WINNER OF THE CROIX DE GUERRE

SYNOPSIS

CHAPTER I—Albert N. Depew, author of the story, enlists in the United States Army, serving four years and attaining the rank of chief petty officer, first-class gunner.

CHAPTER XIX (Continued)

I was shot through the thigh some time or other after the captain got back. It felt just like a needle-pick at first, and then for a while my leg was numb. A couple of hours after we took our trench back, I started out for the rear and hospital. This wound had been hurting for some time. They carried the captain out on a stretcher about the same time, but he died on the way from loss of blood. Fresh troops came up to relieve us, but our men refused to go, and though officers they were not there in the trench, they stayed until they took the captain away. Then, back to bullets—no bullets, this time. I believe that we received an army canteen for that piece of work, but I don't know, as I was in the hospital for a short time afterward. I do not remember much about going to the hospital except that the ambulance made an awful racket going over the stone-paved streets of Epiez, and that the bearer who picked up one end of my stretcher, had eyes like dead fish floating on water; also, that there were some civvies standing around the entrance as we were being carried in. The first thing they do in the hospital is to take off your old dirty bandages and slide your stretcher under a big electric magnet. A doctor comes

learn harness making, mechanical drawing, telegraphy, gardening, poultry raising, bookkeeping, bookbinding, and the men teach the nurses how to make cases out of shell cases, and floors of aluminum, and slippers and gloves out of blankets.

The nurses certainly work hard. They always have more to do than they ought to, but they never complain, and are always cheerful and ready to play games when they have the time, or to go to a movie. And their work is pretty dirty too. I would not like to have to do it. They say there were lots of French society ladies working as nurses, but you never heard much about them, or any talk about Lord Helpus or Count Whodas, please, or anything like that from these nurses.

A few shells landed near our hospital, while I was there, but no patient was hit. They knocked a shrapnel over my lady to splinters, though, and bowled over a big crucifix. The kitchen was near by, and it was just the chef's luck that he had walked over to our ward to get a tin of his, when a shell landed plumb in the center of the kitchen, and all you could see all over the barracks was stew.

Tim was a regular endless day for me, and I would often come over and visit him. He asked many questions about Dimezza, for he had lost relatives there, though he had lost track of them. He often tried to describe the houses they had lived in, so that I might tell him whether it was still standing or not, but he could not remember the place he spoke of. During our talks, he told me about many atrocities. Some of the things he told me I had heard before, and some of them I heard of afterward. Here are some things that he either saw or heard of from victims:

He said that when the Germans entered the town of St. Quentin, they started firing into the windows as they passed along. First, after they had occupied the town, they bayoneted every workman they could find. Then they took about half of the children that they could find and killed them with their musket butts. After this, they marched the remainder of the children and the women to the square, where they had lined up a row of male officers against a wall. The women and children were told that if they moved, they would all be shot. Another line of men was brought up, and made to kneel in front of the other men against the wall.

The women and children began to beg for the lives of the men, and many

Women and Children Begged for the Lives of the Men.

of them were knocked in the head with our bullets as they stopped. Then the Germans fired at the double rank of men. After three volleys, there were eighty-four dead and twenty wounded. Most of the wounded they still carry Christmas, Dayton, Columbus, Cleveland, Buffalo, Detroit, Toledo, Chicago, Milwaukee Minneapolis St. Paul, Des Moines, Omaha, Kansas City and St. Louis, probably in the order named. The tour will end early in September.

ROBERT JUDGE I hereby announce my candidacy for the nomination to succeed myself as Probate Judge of Twin Falls County, subject to Republican primaries Sept. 3. G. P. DUVAL.

TO THE PEOPLE OF TWIN FALLS COUNTY

For the past two years I have served as your assessor, during which time I have tried to fulfill the duties of the office to the best of my ability. My interest has been directed solely to the affairs of the office and I have striven at all times to base my assessments fairly and equitably on all classes of property. I am now seeking a candidate for reelection to the office of County Assessor, subject to the will of the Republican voters at the primaries September 3, 1918. Sincerely yours, GEO. W. WILCOX.

TEAMS LIKELY TO PLAY OUT SEASON

NEW YORK, July 24.—Charged baseball will get a sufficient lease on life to allow it to continue to the end of the season according to plans today. Following conferences between baseball men and Provisional Marshal General Crowder the plan was to allow players to continue in the game until their local league notified them that they must get "productive" employment or quit the service. This was regarded sufficient to permit the game to go on to the end of the season. The decision is expected today or tomorrow.

Ten Babies Are Registered and Examined Every Hour—Average is High

(Special to The News)

REPERT—Pursuant to request of the United States government and as a part of a nation-wide movement, the registration of all children under the age of 5 years is in progress here, beginning Monday and continuing until Saturday evening. Registration and examination of the children takes place in the office of Dr. Brown and Dr. Elmore. So far about 10 babies each hour have been registered. Although some are found to be underfed or improperly fed, the average is high. Advice concerning the care of the child is given the mother in each case.

**INJURY TO WORKER AFFECTS RED CROSS**

Mrs. H. P. Larsen of Rock Creek Auxiliary Falls and Disinfects Kitting Flinger

(Special to The News)

ROCK CREEK—Mrs. H. P. Larsen fell Saturday and dislocated her finger and badly bruised her hand. The injury in itself is not serious, but since a severe illness several years ago her recovery will probably be slow. In Mrs. Larsen's injury the Red Cross has lost one of its most faithful workers and the work will suffer accordingly.

Hitch, the youngest son of Mr. and Mrs. M. T. Brown, had the misfortune to lose the first joint of two fingers in a hay stack Saturday afternoon. The stacker seemed about to tip over and Hitch stepped up to the trip to save it from going over and in some way his hand was caught in the pulley and the cable passed over it, cutting the fingers off. He was taken at once to Dr. Davis of Kimberly, but all the doctor could do was to dress the injured members.
