CONFERENCE IS TRYING TO SUIT ALL COUNTRIES

Peace Congress Is Finding It Rather Difficult to Please Nations Gathered in Paris to Settle Their Troubles

By Fred S. Ferguson
PARIS, March 20.—The league of nations' covenant as it will be incorporated in the preliminary treaty will be practically completed Saturday, according to general belief today.

On Saturday the committee which drew up the constitution will hold its first meeting since the initial draft was finished. President Wilson will preside at the session.

Suggestions from neutrals regarding changes and amendments were to be received today. Informal talks will also be held by various conferees in which the president and Colonel House will represent the United States. The delegates have been going over the details of the covenant with a view to meeting the suggestions and criticisms advanced by the United States senate.

Situation Difficult
It was admitted today that amendments which will take into consideration the criticisms and the draft time not tread on the toes of other powers—which would likely occur with further amendments—are being found difficult.

Some of the committees, having virtually completed their work on problems to be incorporated in the preliminary treaty, are now considering subjects which will form a part of the final settlement.

The committee on aerial problems has agreed to the general principles of control for aerial navigation but has appointed three sub-committees which will work out the details.

An important feature of the commission's work is recognition of full and absolute jurisdiction by each state of the air above its territory and territorial waters.

PARENTS SEARCH FOR LOST CHILD

Six Years Ago Small Daughter Disappeared and Father Still Maintains Watch

NEW CASTLE, Ind., March 20.—Six years ago today pretty little Catherine Winters disappeared from her home here and a country-wide search for her father and stepmother, Dr. and Mrs. W. Winters and other interested persons has failed to reveal her whereabouts.

Tens of thousands of dollars have been spent in the search which has lasted throughout the six years and still being continued on a small way by her father. It was on March 20, 1913, that missing needles for a missionary society that the nine year old girl became lost.

Newspapers gave prominence to the story and published description of the girl.

In 1914, William B. Cooper, a boarder in the Winters' home, Dr. Winters and his wife were arrested on charges of conspiracy to commit felony by the burning of the body of the girl. These charges were dismissed, however, after Detective Robt. Able disappeared. Able had filed the charges against them but a grand jury failed to return an indictment.

PROMINENT BUSINESS MAN IS CHARGED WITH MURDER

Husband Who Attempted to Shoot Wife Is Now Held to Answer for Her Death

DETROIT, Mich., March 20.—While the police here today were waiting for the arrival of Patrick J. Reaney, prominent business man of Dallas, Texas, they were co-operating with the coroner in determining the cause of the death of Reaney's wife.

Reaney was arrested in Detroit and charged with attempting to shoot his wife from whom he had been separated about twenty years. The woman had powder burns about the neck and police found a revolver on Reaney. He was admitted to jail and returned to Dallas.

Last night the woman died and the police ordered Reaney's re-arrest. The coroner said he may be able to determine the cause of her death today.

LOWER PRICES FOR STEEL IN NEAR FUTURE

This Reduction Is Expected to Start Work Which Is Now Held Up by High Costs of Building Materials

WASHINGTON, March 20.—Steel men were expected to submit to the industrial board today the schedule of lower prices which they believe will relieve the business stagnation in their industry.

These prices are not expected to reach pre-war levels, but it is believed certain they will show considerable reductions as compared with the present figures. The steel men are reported to have agreed on most of the prices they will submit at a long conference late yesterday.

To Take Effect At Once
If approval of the board is given the schedule, the lower prices will go into effect soon. Steel men and members of the board believe that new prices will prevail by April 1. Steel heads state they are anxious for the reductions as the present stagnation, with their high overhead expenses, is making a big hole in the year's profits.

While here the steel representatives are sounding the probability of large railroad purchases. All agree that unless the railroad can make the purchase the steel industry will face one of its leanest years.

Meanwhile, letters and telegrams are being sent into the board urging speed in making the price reductions in order to check the rapidly increasing unemployment.

Holding Up Work
Governors and city officials, the communications show, feel that they must hold public construction work in the hope of lower prices.

Conferees with the lumber men will follow the steel meetings, but officials agree the present meetings must be successful in order to make the following week regarded as the steel industry.

Indications are that the steel prices will drop considerably below the decrease the steel men made after the war industries board prices of December.

Price Reductions
Among them were the following reductions in prices:
Pig iron, Bessemer, \$35.20 to \$32.20.
Pig iron, basic, \$33 to \$30.
Pig iron, foundry, \$34 to \$31.
Sheet bars, \$57 to \$47.
Plates sheared, \$72.50 to \$67.20.
Rails, standard heavy, \$106.40 to \$99.68.
Rails, light, \$67.20 to \$61.00.

GIRL CONFESSES MURDERING RIVAL

Seattle Woman Admits Killing Wife of Man She Loved by Feeding Guest Strychnine

SEATTLE, Wash., March 20.—Ruth Garrison will be formally charged with first degree murder today, according to Deputy Prosecutor John Carmody, who says Ruth has confessed that she poisoned her rival in love, Mrs. Grace Elizabeth Storrs, who died after eating a fruit cocktail with strychnine at the Bon Marche lunch room, where she dined, as the girl's guest Tuesday afternoon.

Dudley M. Storrs, the man in the case, was due to arrive here from Okanogan this morning.

The 18 year old girl slept soundly at the city jail last night after unburdening her soul of the tragic details of the crime. Her only apparent thought, the matron said, concerned the man she loved. She wonders if he will care for her now that she has confessed to the murder of his wife.

Confesses Crime
Dry eyed, calm, Ruth made her confession of murder at 6'clock yesterday afternoon. She had matched her wits with Deputy Prosecutor Carmody and Captain of Police Tennant with deft abandon.

Knees crossed, she sat carefully back and looked her questioners straight in the eye. At times she even became jocular—physiologists on love. During an intermission in the cross examination an important bit of information percolated to police headquarters. A woman who had dined at the Bon Marche Tuesday noon had noticed Ruth Garrison carefully stirring a fruit cocktail before Mrs. Storrs arrived. The girl then pushed the glass across the table, arose, looked about her, walked around the table and tipped a chair against it in anticipation of her guest.

IDAHO CITY IS MAKING STRONG BID FOR FIGHT

Pocatello Is Working Hard to Secure Big Scrap of Willard and Dempsey for This State and Producing Inducement

POCATELLO, Idaho, March 20.—With characteristic western enterprise, Pocatello has started in to outbid New York for the Willard-Dempsey championship fight.

The last census rated Pocatello at 15,000 population.

But Pocatello has opened the bidding at \$160,000 and has posted \$50,000 of this sum with Charles Sumner of the Pocatello Tribune.

If the New York territory insists on trying to compete with Pocatello for the fight, this city may raise the ante to a quarter million, J. Bobb Brady told the United Press today.

In fact, Pocatello—and Brady speaks for this city, insists that the fight be held here where twenty rounds are possible and has gone so far as to tell Tex Rickard a much over long distance telephone. Brady, who is a son of former United States Senator Brady, is rated as a near millionaire, backed by O. P. Gerber, another public spirited citizen, is now engaged in obtaining waivers for the fight from adjoining states.

Utah has enthusiastically leaped into the Pocatello bandwagon. Brady is now after Montana and Oregon. He is after California, too, but realizes Reno is a strong bidder for the Idaho support.

Substantial Guarantee
"If Rickard wants the money, as he says, he can't refuse our guarantee," said Brady. "There are no strings to it. We don't have anything to say about the motion picture rights. We are banking on the fact that the American sporting public will insist that Willard and Dempsey go the long route. A ten round fight would be a joke."

"Pocatello offers the best railroad facilities. Lines from the north, south, east and west tap big centers of population, including Salt Lake, Portland, San Francisco and Butte. We are going to have this fight here July 4."

Brady has wired Rickard as follows: "You can get a larger crowd and more money here than any place in the world where you can stage a real fight."

MISSISSIPPI ICE FLOE VERY LARGE

Much Damage Is Caused by Huge Blocks Crashing Into River Craft and Bridges

ST. PAUL, Minn., March 20.—The biggest floe of ice in the Mississippi river in many years smashed houseboats, carried away smaller craft, broke down bridge breakwaters and threatened bridges from the upper river to below Lake Pepin, according to reports here today. Several days ago the first ice breakup smashed the Burlington bridge at Winona, Minn.

The St. Paul railroad bridge at Mendota on the Minnesota river was smashed by an ice jam last night. Houseboats and smaller craft there were all smashed and carried away.

Thousands in the Twin Cities gathered along the river late yesterday and early today to watch the ice run. All sorts of debris was swirling in the mass of rapidly moving ice.

It Costs More

FOR several years material and labor costs have steadily increased, and all transportation charges have been advanced. That means that every operation in the giving of telephone service has increased steadily in cost.

It costs more to operate a switchboard, keep the books, do the billing and collect the accounts.

It costs more to install a telephone.

It costs more to repair a telephone.

It costs more to take out a telephone.

It costs more to move a telephone.

It costs more to string a circuit, repair a wire and to set a new pole.

Every piece of equipment and every item of supplies costs more.

And Meanwhile—

LEAGUE DEBATE HOLDS INTEREST OF LARGE CROWD

Throngs Who Gather to Hear Noted Speakers on the Vital Question of the Entire World Judge Issue for Themselves

BOSTON, March 20.—Two American gentlemen, United States Senator Henry Cabot Lodge and Dr. A. Lawrence Lowell, president of Harvard University, met here last night in a debate on "the most momentous question before the world"—the league of nations.

The decision as to the merits of the arguments today lies with the American people. There were no official judges, no referees.

In these respects Senator Lodge and Dr. Lowell agreed. The latter argued in favor of the principles of the covenant, admitting the necessity of some modification of the amendment. Senator Lodge objected to the draft in its present form, but declared himself in favor of a league of nations.

Critics Present Draft

Senator Lodge criticized the present draft as a loosely drawn and crudely worded instrument. Dr. Lowell admitted that there was much of it that had been misunderstood and which had been misinterpreted. Admitting this, he said that the draft was not a bad one, but that it was not a good one. He urged the adoption of the underlying principles of the draft of the league now before the world.

Dr. Lowell declared that the draft is the first experiment in open diplomacy and was submitted as such in the form of an experiment. He said he was glad that there was an intention of adopting the covenant as it now stands; that in their present state the clauses are tentative only and designed to allow the people of the world to consider the question for themselves.

Uphold Monroe Doctrine

In his criticism of the covenant, Senator Lodge called for a league which would not prevent the United States from following her traditional policies. He urged that the Monroe Doctrine be maintained and declared that any league acceptable must include that doctrine.

Senator Lodge asked the mothers, the sisters and the sweethearts of America if they are willing to guarantee the political independence of every nation on earth to the extent of sending their loved ones to far corners of the world to maintain those principles.

For a few moments there was silence, then someone shouted "Yes," which was followed by an overwhelming "No," "No," "No," from women and men alike.

Sums Up Opposition

Senator Lodge summed up his opposition to the draft of the covenant in what he termed "five constructive criticisms," which were in effect: First. The instrument should be re-drafted. It should mention what vote is necessary to pass on every subject contained in the covenant and worded so that all may understand it.

Second. Ambiguous phrases should be eliminated.

Third. Should be made more definite by a larger reservation of the Monroe Doctrine.

Fourth. International questions of immigration should be excluded.

Fifth. League should be definite as to why and under what conditions it can be abrogated.

Raises Alligators

There is money in raising alligators. One man near Los Angeles is said to have grown rich from the enterprise. It is a lucrative and practically uncrowded field for the man who has sufficient business initiative combined with physical courage to enter. Anyway, the matter is well worth looking into by the man who has decided that he would like to raise something and has concluded that chickens are the only possibility.—Exchange.

Men's Clothiers Demand Increase in Wage Scales

Union Officials Estimate About Two Thousand Workers Are Out on General Strike

CLEVELAND, O., March 20.—A general strike in the men's clothing industry here was called today. Union officials estimated about two thousand workers responded to the call.

The men demand a 44 hour week, 30 per cent increase in pay, time and a half for overtime, abolition of the subcontract system and recognition of the union.

Present hours of clothing workers are between sixty and seventy hours, union leaders say.

ARMY DESERTER IS IN CUSTODY

Star Player of Seattle Hockey Team Is Held in Guard House for Safe Keeping

TACOMA, Wash., March 20.—Charges of high handed methods on the part of military authorities at Camp Lewis are included in a blister fight which opened today to obtain the release of Bernard Patrick, star player of the Seattle hockey team, who is being held in custody at camp on the charge of wild desertion.

Federal Judge E. B. Cushman this morning issued an order directing Major-General J. D. Leitch, Camp Lewis commander, to produce Morris in court Friday morning at 10 o'clock and show why a writ of habeas corpus should not be issued releasing the athlete from custody of the military police.

Morris, who was arrested and confined at Camp Lewis March 5, by order of draft board number six in Seattle had been expected to play with the Seattle team in the world championship hockey series which opens in Seattle tonight. If he is released Friday he may be able to take part in the third game of the series.

STRANGE INFLUENCE HOVERS OVER PLAY

NEW YORK, March 20.—Spiritualists in England and America are watching with keen interest the extraordinary "The Invisible Foe," now playing at the Harris theatre here. Heretofore the play has been an American psychic research authority, is among those who maintain that "The Invisible Foe" is being supported by the spirit of a dead man.

The play, which has also been produced in London, concerns information transmitted by the spirit of a dead man for the unravelling of a crime committed in London. The play has the key. When the play reaches New York practically every theatrical dramatic critic condemned it in unmeasured terms. The critics were of the opinion that the play was uninteresting, crudely constructed, and wholly improbable. They said, further, that the playwright had used ancient and melodramatic incidents and hoovers in the play. "The Invisible Foe," this should have put a damper on the production. But such was not the case.

Spits New Fact.

In spite of the critics the play picked up steadily and quickly became one of the greatest successes of the year. Spiritualists, in explaining this, said that the "strange" work drawn to the theatre by the spirit of a departed friend and relative. One of the odd features in connection with the play's successful run was the patronage bestowed by returning soldiers and sailors. Captain Gillingham, a famous American producer, who staged "The Invisible Foe," declared that there was no doubt in his mind as to the influence of the spirit of a departed friend. "The play was in rehearsal he said, the spiritualistic power was in operation."

"I am so hard-headed and as practical as the average person concerned with Broadway it is a general belief," and I certainly had no interest in spiritualism before putting on "The Invisible Foe." But I have changed my mind. I positively affirm that spiritualistic assistance was given to me in making the play ready for the public. I repeatedly felt strange influences guiding me and directing me in my efforts to secure certain novel effects. Even the actor felt these influences. I cannot explain it, but I think everybody connected with the play felt that extraneous influences were hovering over the production," said Gillingham.

MacDonnell, who, in the play, receives the message from the spirit which gives the clue to the real criminal, has become so converted that she has received a message from her father who died last year. As for myself, I am beginning a complete study of spiritualism."

Bonnors Ferry Boy Wins Service Cross

Pvt. O. A. McCarthy Eshes Machine Gun Nest Single- Handed Says Citation

The distinguished service cross has been awarded to Private Charles A. McCarthy of Bonnors Ferry, Idaho, a member of the Second machine gun battalion, for extraordinary heroism in action near Fleville, France, October 5, 1918, described in the official citation as follows:

With the assistance of one other soldier, Pvt. McCarthy entered a wood, where three machine guns were holding up our attack and, under unusually heavy artillery and machine-gun fire, knocked one of the guns out and rushed the second single handed. With the assistance of the other soldier, he then succeeded in capturing about 20 prisoners, who were in or near the machine-gun nest. Next of rank, Mrs. Elmer Keith, Bonnors Ferry, Idaho.

STEEL MEN ARE WILLING TO AID

Leaders of Industry Are Anxious to Help Country Back to Pre-War Conditions

WASHINGTON, March 20.—"The steel men are entirely willing to cooperate in making effective any program that will stabilize prices and conditions," Chairman Peck of the Industrial board, stated after the first conference with the steel heads today to reduce and stabilize prices.

Question of prices was not touched upon at the first conference and the entire time was devoted to a review of the general business situation. Final decision on a lower scale of prices is not expected until late today or possibly tomorrow, Peck stated. Even then it is hardly probable that a complete schedule will be agreed upon. This may take several days.

"Today's meeting was attended by representatives of approximately 50 of the steel plants in the country," said Peck. Several of the steel leaders expressed the opinion that the outlook was very satisfactory for a complete agreement on a new price schedule.

UNIVERSITY GETS ALL APPROPRIATIONS ASKED

Defeat of 85 Railroad Fare Bill Only Setback Received by State In- stitutions From Legislature

UNIVERSITY OF IDAHO, Moscow, March 20.—All of the university appropriation bills brought before the last Idaho legislature, were passed. The principal setback about \$30,000 by direct taxation for the plant at Moscow, and about \$250,000 by direct taxation for extension work in agriculture and home economics. Among the minor bills in one appropriating \$30,000 for the establishment of a state bureau of mines, a similar amount to be given by the government. A \$30,000 S. A. T. C. deficiency bill was also passed, this amount to be reduced by all sums received from the government in remuneration for the losses to the university caused by the S. A. T. C.

The defeat of the railroad fare bill was the only setback received by the state institutions. The house voted favorably upon this measure, but it was lost in the senate.

Final copies of the appropriation bill have not yet reached Moscow, but the amounts authorized are essentially the same as asked for.

MINE WORKERS HOLD MEETING

Convention of United Miners Will Discuss Question of Hours and Wage-Scale

INDIANAPOLIS, March 20.—United Mine Workers of America will meet in convention, probably in Indianapolis, to discuss the question of wages, shorter days and five day weeks, which they will propose to the mine operators in their next joint conference. The sub-committee of the general policies committee discussing in these propositions, yesterday decided they were too big for a small body of men to finally agree on.

The sub-committee was to submit its report to the general policies committee of two hundred representatives of district organizations from every part of the country late today. These subjects embody the recommendations of Frank J. Hayes, president of the organization, made before the general committee last Tuesday at which time it also suggested nationalization of the mines.

Ringed Chime Bells

When first introduced, chime bells were rung by a number of men, each grasping a rope from one particular bell and striking it at the precise moment the leader pointed a finger, at him for a signal. The custom originated in Europe, and was imported into this country when the first chimes were brought over. This was shortly after the country's independence was declared, the new bells being placed in Trinity church, New York city. It required seven men to ring the seven bells, and it was not until 1800 that a plan was devised whereby one man alone was able to ring the bells.

SUGGESTS THEATRE IN OPEN AS A MEMORIAL

Professor Lewis Makes Novel Proposal to Commemorate University Men Who Gave Their Lives

UNIVERSITY OF IDAHO, Moscow, March 20.—A fitting memorial to the university men who gave their lives in the war has been suggested by Prof. H. T. Lewis of the economics department of the University of Idaho. Mr. Lewis suggests that a large outdoor theatre be erected west of the university gardens. It will be known as the University of Idaho Memorial theatre. There are many advantages in this location. The walls of the new wing would act as a sounding board for the voice. The slope makes a natural amphitheatre which could be terraced back to advantage. The hill back of the proposed site would be ample protection from the wind and the rooms in the new wing could be used as dressing rooms.

Professor Lewis suggests that a tier of concrete seats be constructed. The expense would not be large for the only cost would be for concrete and labor. It would be entirely feasible if this idea meets with approval and some funds can be secured that sufficient work may be done so that the commencement play of the year could be given there.

University songs, rallies, assemblies and band concerts as well as plays could be given in this outdoor theatre. This would be the best place for such functions and the theatre would play the same part in college affairs in the summer as the "C" does in winter.

MANY SOLDIERS APPLY FOR GOVERNMENT HELP

WASHINGTON, D. C., March 20.—Not every wounded American soldier is entitled to retirement by the federal board for vocational training. Under the law, the soldier must first, have been awarded compensation by the war risk insurance bureau.

To date the bureau has awarded payments for injuries to only 3655 men, but many thousands more have their applications under consideration by the bureau at this time.

USE MORE MONEY

There can be no question but that prices, retail and wholesale, are on the downward trend—a matter for thanksgiving on the part of everybody.

Perhaps the solution of much of the trouble and unrest current over the country today will come about through the gradual decrease in the cost of living.

When the solution does come it will probably be found to be a very simple affair. Perhaps the best bet on the matter would be the old, every day situation with respect to the difference between what a man earns and what he is called upon to pay for the privilege of staying on earth to earn it.

Early American Newspapers. The first newspaper published in America made its appearance in Boston on September 25, 1689, and was called Publick Occurrences.

Doctors' Fees Regulated. The fees of doctors were prescribed by law in Babylon in the days of Nebuchadnezzar. The code of Hammurabi, the great lawgiver, provided: "If a doctor has operated with a bronze lancet on a man for a severe wound, and has cured him, or has removed a tumor with a bronze lancet for a gentleman, he shall receive ten shekels of silver."

An Awful Break. Squigg—"Well, I see that porch climber finally escaped from jail. Broke out, I understand." Squigg—"Say, now, for the love of pillyclubs and badgers, don't hand us that old stuff about 'parasites'." Squigg—"Wouldn't think of such a thing; this fellow broke out with chickenpox."

Coral Beads. Coral beads are apt to lose their fresh appearance. To clean them put a piece of soda about the size of a pea into a bowl of water hot enough to dissolve the soda. Rub some ordinary soap on the fingers, then rub on to the beads between the hands. Rinse them in clean cold water.

About Roller Skates.

Roller skates were patented and used in France as early as 1810. A few years later an Englishman named Syers patented them and manufactured them in London.

Not Up to Expectations.

Jane has often envied her small playmate who has a baby brother and she frequently expressed a wish for a wee brother, too.

Evidently Here.

Alice is interested in the sayings printed each day. A few days ago she read one that was signed with initials the same as her own.

Strange Plant.

A little plant called the aralia or mesquite she was found in Welsh hedgegroves, and it is (written a naturalist) the only species of its genus in that country.

Hardly an Ideal Citizen.

There is a story told of an ancient dandy in London who, taking, one sunny afternoon, his accustomed stroll down Bond street, met an acquaintance hurrying in the direction of Westminster.

Simple Rule for Success.

The path of success in business is invariably the path of common sense. Notwithstanding all that has been said about "lucky hits" the best kind of success in any man's life is not that which comes by accident.

Removing Old Putty.

A great deal of scraping can be saved, when putty is to be removed, by brushing over it some nitric or hydrochloric acid and leaving it for an hour or two.

How Great Poems Were Written.

Two of the greatest poems in the language were written by chums competing against each other in friendly rivalry. They undertook to work at these poems for six months and then compare results.

Sunny Dispositions.

"I think it was Carlyle who said: 'The man who can laugh way down deep in his diaphragm can never commit murder.' And he should have added that the man with a whistling disposition can never be a man, abuse a child, betray a friend or refuse to pay his rent."

And They Come High.

"It sounds funny," said the facetious feller, "but many deep thinkers have lofty thoughts."

Hardy Chinese Ponies.

The Chinese horse is really a pony somewhat after the type of the western broncho. It comes from Mongolia and is known as the Mongolian pony.

Woolgrowers' Secretary Proposes Campaign for Feeding Lambs

Western farmers generally are losing a great deal of money by selling hay instead of fattening lambs, says S. W. McClure, of Salt Lake, secretary of the National Woolgrowers' association, in a letter of recent date to County Agent C. H. Bohrer, in which he outlines his views as to the desirability of starting a campaign to bring about more extensive feeding of lambs in the Twin Falls country.

In this connection County Agent Bohrer calls attention to the fact that fat lambs are quoted on the Omaha markets at \$19.50 and \$20.

Mr. Bohrer is arranging for a meeting here of farmers interested in the proposed campaign with Mr. McClure on or about March 29, if possible.

Red Cross Advises Filing Discharges

Home Service Section Offers Benefit of Information on Claims for Gratuity

Returned soldiers and sailors who are required to send their discharge papers to Washington with their claims for the \$50 gratuity made available by recent act of congress are advised in a communication from divisional headquarters by Mrs. Austin D. Thomas, secretary of the home service section of the Twin Falls Red Cross chapter, to retain competent evidence of the existence of the papers.

A large number of returned servicemen of this vicinity have filed their discharge papers for record in the office of the county recorder. The original papers are returned by the county official as soon as copies are filed in his office. This procedure is recommended by the home service section here, which is supplied with a fund of information in respect to the payment of the gratuity and is giving the benefit of this information to all applicants.

Curfew Law to Be Resurrected Here

Whistle at 9 o'clock Friday Evening to Warn Youngsters Off the Streets

Pursuant to direction of Mayor A. L. Swain the curfew ordinance which has lain quiescent on the city statute books for some years, will be resurrected and enforced in Twin Falls and on Friday evening next at 9 o'clock a whistle will sound to warn boys and girls under the age of 15 years and who are unaccompanied by parents or guardians on the streets to repair at once to their homes under penalty of arrest.

The curfew whistle is to be sounded at 9 o'clock p. m. during the period beginning October 1 and ending March 31, at 10 o'clock p. m. during the period beginning April 1 and ending September 30.

The ordinance provides that persons under the age of 15 years may remain after the sounding of the curfew whistle "on the streets, alleys or any unoccupied public or private place within the limits of the city" only when accompanied by a parent or guardian or person, or on errands directed by parent, or on errands directed by parent or guardian or on necessary employment.

Babylon in its Prime.
At the time the priests betrayed Nebuchadnezzar and permitted Cyrus to enter the city of Babylon, the students were learned in astrology, kept time with sun dials, and a water clock by night, spyglasses and telescopes; and the rich had perfected a system of entertainment never equaled in lavishness.

Maintain Equal Humidity.
The air in all parts of a cigar case, vault or other place where moisture is needed is kept equally humid by means of a device in which an electric fan drives its breeze through a box filled with absorbent material soaked in water.

Electricity on the Farm.
Electricity is now equal to nearly all kinds of farm work, from irrigation to churning. So far it has not attacked plowing and cultivating, but electricity is not yet through with the farm.

NEXT BASKETBALL GAME HERE A "DOUBLEHEADER"

Twin Falls Girls Accept Challenge of Murtaugh Feminine Tossers—Baptist Comes for Return Contest

The basketball game here Friday night will be a "doubleheader." The Murtaugh girls' basketball team cleaned up on the Murtaugh boys' team and immediately wired in a challenge to the Twin Falls lady basket tossers to set the time, the place and they would be the first.

The local variety five will meet the Rupert team the same evening. Rupert defeated Twin Falls by three points in the first game played in this section of the state this year and a close game should be seen Friday night, something that has not occurred so far this year here. This is the last of the dual games scheduled with other high schools this season.

Learn to Use Both Hands.
You have noticed perhaps that left-handed people seem to have an advantage over right-handed people in being able to use the right hand with greater ease than right-handed people can use their untrained hand. It is a good thing to practice writing and drawing with the left hand.

Deaths

Garnett Barnes
Garnett Barnes, aged 15 years, son of Mrs. Flora Denton, died Wednesday evening at the family home in the South Park addition from pneumonia following influenza. Funeral services will be held at 8 o'clock this afternoon from the Grossman & DeWitt chapel, with interment in the Twin Falls cemetery.

Xmas B. C.
Xmas was celebrated many hundred years before Christ was born. It was in honor of Tammas, one of the Babylonian sun gods. They had three, Baal, Ashtaroth and Tammas, and built many temples in their honor. The letter "X" was changed to "K," as this was considered a sign of the holy entrance into the temple of the gods of the sun.

Not a Summer Resort
Very few Europeans are able to live in Hydrabad, India, during the summer, and the alfalfas who manage to endure the awful heat do not venture out of doors during the middle of the day at all. The white troops stationed there are not allowed out of barracks from nine o'clock in the morning till five o'clock in the evening, save the scorching sun and heat have claimed many victims from sunstroke and heat apoplexy.

Torrent and Laleket.
The stream of modern literature represented by the books and periodicals on the crowded counters is a turbulent and enormous torrent, dashing along among the rocks of criticism, over the pebbles of the world's daily events; trying to make itself heard and seen amidst the hoarse cries of the politicians and the rumbling wheels of traffic. The classic is a still lakelet, a mountain tarn, fed by springs that never fail, its surface never ruffled by storms—always smiling a welcome to its visitor.—Holmes.

Recognition Among Bees.
Naturalists for a long time were at a loss to understand how it was that insects were enabled to so quickly recognize an intruder among their family or settlement. It has been determined that in most cases they recognize each other by smell. Among the bees each distinctive class of workers—the guard, the fanner, the pollen carrier, the waxmaker, the architect, etc.—has its own distinctive odor. And besides each has its own separate hive odor, which it imparts into its own particular home.

American Newspaper History.
Benjamin Franklin contributed much to the development of journalism in colonial days. An editor at the age of sixteen, and a prolific writer, he was identified at some time or another in his life with many of the newspapers which furnished the news period. The oldest newspaper in the United States, which has been continued without interruption of issue or change of name, is the New Hampshire Gazette. It was first published in Portsmouth, N. H., in 1760.

Gun Barrels.
A rather interesting side light on the question of gun barrel life is a determination of the actual length of time to which a good shotgun barrel is subjected to the force and burning effect of the powder charge during its lifetime. If 100,000 shots are fired from a shotgun the inside of the barrel is actually exposed to the flame of the powder charge for about four minutes.

Putting it Plainly.
A judge, whose personal appearance was unimpressive as his legal knowledge was profound, interrupted a female witness. "Humbugged you, my good woman?" said he. "What do you mean by that?" "Well, my lord," said the witness, "I can't explain it exactly, but if a girl called your lordship a handsome man she would be humbugging you!"

The Head of the Family.
An inquisitive scientist states that the average American family is composed of 4.8 people. Who is the 5? Why, the old man, of course.

Iowa Solon Says More Consideration Must Be Given Man Who Produces in Order to Control Bolshevistic Moves

FORT DODGE, Ia., March 20.—The requirements of the laboring man must be given more consideration by state and federal governments if the Bolshevistic evil is to be curbed.

Make Better Citizens
The Bolshevistic movement is serious and something must be done to curb it," said Kenyon.

Kenyon said that if he made the trip he would take the eastern route and stop at Paris to get first hand information on the peace conference.

ENGINEER UNITS ARE REACHING AMERICA

Regiment of Mining Experts From All Over America Arrive Among Late Arrivals

NEW YORK, March 20.—The transport Dakotan arrived today with 3,390 officers and men of the 27th engineering, the 137th and 4th aero squadrons and several casual officers.

The 27th engineers, 43 officers and 1,349 men from Camps Dodge, DeWens, Dix, Grant, Lewis, Pike, Sherman, were composed of expert mining engineers from all parts of the country.

The regiment was cited three times for bravery in connection with continuing strategic bridge construction under terrific fire.

Among officers aboard were Captain H. J. Jacques, Denver; Lieutenant J. O. Greenan, Oakland, California; Major Raymond E. Franklin, San Jose; and Sergeant W. R. Jones and Lieutenant Charles Wilkoff, Los Angeles.

BUREAU OF CENSUS GIVES FIGURES ON MARRIAGES

Department Says One Out of Every Nine Ends Troubles in a Divorce Court

WASHINGTON, March 20.—One marriage out of every nine terminates in divorce and while marriage in proportion to the population is steadily increasing, divorce is increasing more rapidly.

According to returns, which covered 2,285 counties, or all but 95 counties in the United States, the total number of divorces granted in 1916 was 129,306, or 112 per 100,000 of population, against 84 in 1906; 73 in 1900 and 53 in 1890.

Nebraska still holds the highest place in the percentage column, with a record of 607 per 100,000 population.

Approximately 69 per cent of the cases, divorces were granted to women.

The chief reasons for the increase in divorces were contributed by them as follows:

Desertion, 26.8; cruelty, 28.3; infidelity, 11.5; neglect to provide, 4.7; drunkenness, 3.4; all other causes, 15.3 per cent.

The second highest divorce rate in the country is in the classified columns of The News. Somebody will want it.

Herendenon, accused by Peter Swenson with the crime of battery, in probate court here Wednesday evening pleaded guilty to the charge and paid a fine of \$4 as assessed by Probate Judge O. P. Davall. In explanation of the affair Herendenon told the court that about two years ago he had bought a quarter car from Swenson with the understanding that the price was to be \$25 per ton. When delivery of the hay was made, he said, Swenson exacted a price of \$30 a ton. Herendenon at that time advised Swenson that duplicate relations between them would be severed forthwith Swenson's manner of approach Sunday when he slapped Herendenon on the shoulder and spoke cordially to him was regarded by the accused as an overt act to which he responded with a blow.
