QUICK ACTION AVERTS STRIKE IN RHINELAND

Release of Radical Agitator Calms Situation Which is Still Smoldering With Unrest and Seething With Treachery

BY FRANK J. TAYLOR.
BERLIN, April 2—(delayed)—More than 150,000 workers went on strike in Berlin late today.

Metal workers, technicians and other skilled craftsmen, were the first to walk out. They were quickly followed by several other trade unions.

While the strike had been anticipated for several days, it was believed it might be postponed until next week and the sudden walkout caught the government forces unprepared. There was no violence, however, and the city was quiet tonight.

Disturbance Renewed

Reports reaching here tonight indicated that disturbances had been renewed in Stuttgart and Frankfurt with greater vigor than before. More than twenty persons have been killed and fifty wounded in Stuttgart. Business is completely at a standstill. Crowds are swarming through the streets, storming army food wagons. Government troops are maintaining the upper hand by means of machine guns, firing from buildings and armored motor cars. A battery of tanks is assisting in patrolling the streets.

In Frankfurt, hundreds of persons have been arrested. Loss from plundering is estimated at more than a million dollars.

BERLIN, April 2—(delayed)—The Freiheit today published the following appeal of the radicals' central committee:

Workers and workwomen, rise and demonstrate against the brutal military government which is gradually placing the entire land under a state of siege.

The government is fortifying workers' meetings and is utilizing the demonstrations of the reactionaries.

The new general strike and political outbreak in Berlin, which was temporarily averted through release of the radical agitator, Damm, is smoldering today. The government is preparing to use every force to crush any demonstration.

Frankfurt is quiet again. The strike in Essen and in the Ruhr district is less threatening. The situation in Stuttgart is still critical, however.

The above dispatch contradicts reports from various news items yesterday that a general strike was under way in Berlin. Yesterday's reports also described severe fighting in Frankfurt, in which hundreds were wounded.

Coulsje Board

The so-called outja board has no more intelligence than any other piece of wood and its movement or action in the supposed answering of questions is controlled or imparted to it either consciously or unconsciously, innocently or fraudulently, voluntarily or involuntarily, by the operator. It is practically the same thing under a new name as the planchette board, which had such a great run in the early days of the spiritualism craze.

Habits of Crayfish

The crayfish may be described as a fresh water lobster, and usually lives a purely aquatic life, keeping to the river-bed. Some of the crayfish found in Australia, however, have forsaken the water and excavate burrows in the damp soil. The tunnel leading to the head of the burrow is free from water, but water is always present in the chambers, at the end where the crayfish lives. They do much damage to artificial watercourses in the mining districts by riddling the banks and dams.

Origin of Collie's Name

The collie's name appears to be shrouded in mystery; but there seems to be a fairly reasonable foundation for supposing that it is from "coll" or "collant" on account of the broad white mark round the neck which is seen in the majority of these dogs.

To "finance" a "To Let" advertising campaign you need only set aside—for perhaps a few days—a part of your pocket money.

INDICATIONS ARE FOR RECOGNITION

All Signs Point to Probable Acceptance by Peace Conference of Bolsheviks

BY J. W. T. MASON.
NEW YORK, April 3—Recognition of the Bolshevik administration at Moscow, as the defacto government is rapidly becoming inevitable according to all indications of the new point of view of the Russian situation being taken by the peace conference.

The Paris delegates are putting personal sentiment and national resentment aside. They are beginning to examine the accomplishments of the Bolsheviks from the standpoint of international movements, the recognition of sovereignty in revolutionary regime. While the Bolsheviks have been in power they have established sufficient domestic order to permit successful operations to be conducted simultaneously in the extreme northern and southern areas of the country.

Go Return Home

In the north, American and British troops are on the defensive and intend to retire to their transports and return home as soon as the ice breaks. In the south, the British met with severe military setbacks and are practically entrapped along the Black Sea. In eastern Russia, the Siberian rebels against the Moscow government have been unable to set up a new government nor can they penetrate into western Russian territory.

In the west the Bolsheviks have converted Hungary to their doctrine and have formed what amounts to an alliance with the Hungarian government.

Meanwhile, no other Russian factions have been able to make progress against the Bolsheviks, nor is any group outside Moscow in a position to proclaim its possession of sovereign power.

Normal Procedure

Under these conditions it would be no more than a normal procedure under international law for the peace conference to extend formal recognition to the Lenin-Trotsky government. Such recognition would imply neither approval nor disapproval of the communist experiment which the Bolsheviks are attempting. All the world recognized the Lenin government when it was in power, despite the awful cruelties perpetrated on millions of innocent persons in the name of the Czar.

If the peace conference permanently adjourns leaving Russia in the position of an outlawed nation, the benefit to Germany may be very great. Once the peace treaty is signed the alliance of the United States and America is dissolved. Thereafter German relations with Russia can be directly established without supervision of the allies.

Should Russia thus be thrown into Germany's hands, the German powers will have given Germany a big advantage in the race for rehabilitation.

LABOR MEETING DECLARES VIEW

British Unions' Delegates Register Vote on League and Peace Plans

LONDON, April 3—British organized labor today officially registered its views concerning the peace settlement and the league of nations.

Nearly one thousand delegates, representing between eight and nine million workers throughout the country, met in Central hall at the invitation of the labor party and a trade union congress for the purpose of articulating their peace policies. They were called upon to ratify a program drawn up by a joint committee of the two organizations closely paralleling that formulated at the international labor and socialist congress in Bern.

The delegates were expected to pass a resolution declaring it is highly important the peace conference quickly show substantial progress. They were also expected to adopt recommendations for amendments to the league covenant, including:

Revision of Article XIX so that the principle of self-determination shall be extended to the colonies and nations which would affect Ireland, Egypt and Australia.

Revision of Article VII so as to prohibit conscription and provide for general disarmament.

Revision of Articles I and II so as to provide for election of delegates to parliaments, according to the countries' population instead of the members being appointed by the governments.

The delegates were expected to charge the peace conference with reverting to the old balance of power basis in handling the Polish and Rumanian situation. It was also believed they would make suggestions concerning settlement of the Rhine question.

World's Greatest Cataract

What is the greatest cataract in the world is on the Iguazu river, which partly separates Brazil and Argentina. The precipice over which the river plunges is 210 feet high, that of Niagara being 167 feet. The cataract is 13,125 feet wide, or about two and a half times as wide as Niagara. It is estimated that 100,000,000 tons of water pass over Niagara in an hour. A like estimate gives the falls of Iguazu 140,000,000 tons.

PARENTS SEARCH FOR MISSING DAUGHTER

Girl Who Mysteriously Took Leave of Her Home Is Addressed Through Papers

PASADENA, Calif., April 3—The call of anguished parents went out today to 19-year-old Frances Gray.

A big, black-bordered advertisement appeared in a paper reading:

"Frances H. Gray: Mother, father and all of your friends want you to come back. We love you dearly so do not be afraid to come back. We will give you a very large allowance and anything you wish. Please come."
(Signed) "Mamma."

Both the mother and the father, George W. Gray, wealthy Chicagoan, steadfastly maintain there is no possible chance that the girl, who has lived with them as their daughter, was in a changing and not the real Frances Gray.

The theory they seem to cling to is that reading from fiction and other sources has worked upon an imaginative temperament until their daughter really believes she was "Billy W." a boy—and not Frances Gray. It was as "Billy W." that she signed herself to the note she left her parents when she suddenly disappeared Tuesday.

One theory is that she had slipped away to study art in some eastern city.

Both parents scout any suggestion of a man being involved.

"She was just like a child; the idea of her being attracted to any man is unthinkable to us," declared Mrs. Gray today. "She still loved her tell of her."

CHICAGO, April 3—Ambition for the stage was the cause assigned by her Chicago friends for the disappearance from her Pasadena, California, hotel by Miss Frances Gray, 19-year-old daughter of George W. Gray, Chicago manufacturer of burial goods. It was said the girl cared very little about boys.

George Hollister, member of Gray's firm refused to discuss the girl's disappearance.

Proposed Aviation College Officials Are Looking Over Sites for Institution

OAKLAND, Calif., April 3—The San Francisco bay district may be the site of the proposed national air academy, according to announcement by Major J. H. Moulthrop, representative of the air service division at Washington, D. C., here on an inspection trip.

The proposed aviation college is to cost \$10,000,000 and is to be modeled after West Point. It will require 300 acres of land and have a personnel of 2,000 students. It will not be a flying school, but will furnish a four year technical course. Students will attend flying schools after completing the four year technical course.

BOLSHEWIKI START GERMAN OFFENSIVE

Troops Resist Invasion Successfully Having Been Prepared for This Move

BERLIN, April 2—(delayed)—A Bolshevik offensive was reported to have been started today in east Prussia. The German troops are said to be making a successful resistance.

The Germans have been preparing for a Bolshevik offensive on the eastern frontier for several weeks. Marshal Von Hindenburg recently called a council of war at Kolburg to discuss defensive measures.

The Bolsheviks announced some time ago that as soon as weather conditions permitted they would conduct major offensive operations on all fronts. They have carried out this threat in practically all regions save the northern front, where it is still winter and on the eastern German and Polish frontiers.

FEED OR FIGHT?

It has long been a moot question as to whether starvation or plenty would prove the best solution of the Russian problem. Up to now the problem has been approached by means of armed forces in the north and food shipments in the south and center.

There is no disposition on the part of the American people to demand undue haste in the settlement of the Russian problem but it does seem as though there had been plenty of time to arrange either for the withdrawal of the American forces in Siberia, or the Murmann Coast, or else to permit of the assembling of a force sufficiently large to provide a real demonstration against the Bolshevik forces.

Highway District Considers Sending Officials East to Sign Bonds

Commissioners of the Twin Falls highway district have about reached the conclusion that it will be cheaper, safer and more satisfactory to send their chairman, C. B. Chasnel, and secretary, Stuart H. Taylor to Chicago to sign the bonds of the \$1,250,000 issue recently voted last week, than to have the securities sent from the printer in Chicago to Twin Falls and back through the mail at a cost of \$312.50.

The bonds are to be delivered to the purchasers at a Chicago bank on April 10 or as soon thereafter as possible. In the event the commissioners decide definitely to send their officials to Chicago for this purpose, they will leave early next week.

ROAD REFUSES PRICE SCALES ON PURCHASES

Railway Administration Is Responsible for Possible Failure of Industrial Board to Make Reduction in Costs

WASHINGTON, April 3.—The whole program of lower prices, through agreements between industries and the government industrial board, is threatened with discard as the result of the refusal of the rail administration to accept the board's prices for its purchases.

Only President Wilson can save the situation it is believed. He has been called a full report of the difficulty and has been asked to give direct orders as to whether the view of the board or Director-General Hines shall prevail.

Recommitment of the steel prices previously agreed upon to the board for further conferences with the railroad administration, may have a disturbing effect on business conditions, members of the board fear. This action was decided on at a conference of government officials after Hines refused to change his attitude. Nearly all the prices already have been put into effect by the industrial board.

Unemployment Increasing
With unemployment increasing in the country, members of the board believe industrial chaos will follow the present business stagnation unless lower prices are agreed upon and stabilized.

The view of the railroad administration is that prices can be forced lower than those of the industrial board. The board claims that return to pre-war levels cannot be expected with the present which wages are opposed to reducing. Railroad wages are generally increased and members of the board point out it is unfair for the railroad administration to try for extremely low levels when it is a big favor in holding up wages.

Recommitment of the steel prices means another conference with the steel kings. The steel prices, agreed upon were determined after a long conference and Judge E. H. Gary declared they were the best that could be expected for a year.

Hines' attitude has precipitated chaos in the program outlined by the industrial board, its members say. In official circles here, resignations are believed possible as a result of yesterday's bitter fight.

SOVIETS WANT PEACE BEFORE RECOGNITION

First They Ask Cessation of Hostilities and Food Then Are Prepared to Show World What They Can Do

BY FRED S. FERGUSON
PARIS, April 3.—The Russian soviet government is not asking for recognition by the associated powers, it was learned from authoritative sources today. The proposition recently submitted to the peace conference by Premier Lenin, summed up, is substantially:

Wants Peace
"Make peace with us, enabling us to end the numerous little wars that are being waged on Russian territory."
"Lift the blockade so as to permit us to get food and materials."
"Then we'll make good and you can recognize us—if you care to."
The Russians it is understood also are willing to make a separated peace with associated powers, that is without including the new Hungarian soviet government in the pact. By making peace with the Russians is naturally meant withdrawal of all allied forces from Russia and cessation of participation in such campaigns as that in Odessa district.

Agrees to Cease Fighting
Lenine agrees to cease fighting, it is declared, and to stop propaganda work in other countries, applying his governmental machinery to purely national affairs which he expects to show it is possible for a system to succeed in which a rich man cannot get anything more because he is rich.

The Russian's attitude is that such military operations as they are now carrying on, are in self defense. It is known that the peace conference is giving extensive consideration to the latest reports from Russia and is becoming more impressed with accumulation of evidence that violence and bloodshed are not stopping Bolshevism.

Neutral Reception
An instance of this is contained in reports reaching here from Copenhagen regarding the reception accorded General Mannerheim in neutral countries. Mannerheim crushed the Bolshevik movement in Finland by killing human beings in this country at a meeting on the pier himself and holed. Mannerheim did not leave the boat. In Copenhagen he was stoned while riding with the King. He intended to visit Norway but his visit was cancelled.

In view of the reports of serious food conditions, as well as the spread of typhus in Bulgaria, coupled with danger of a Russo-German alliance, the peace conference is said to be considering whether the associated powers can afford to ignore the present opportunity to effect an immediate agreement with the Lenin government.

Not only are the styles brand new, but the patterns reflect novel, uncommon effects: lively stripes, neat checks and rich mixtures that will quickly help dispel the war-cloud.
