Only One Concession.
With the exception of one concession relative to the Sarre basin, Germany's claims to regard the latter have been rejected. GERMANY SHOULD REFUSE TO SIGN SAYS MONTGALES

Member of Hun Peace Delegation at Paris Declares That Troops Are Insufficient; Cabinet Endorses Financial Bills

BERNE, (AP)—Germany should refuse to sign the military and economic terms of the peace treaty, which are not acceptable, according to a statement made by General Count Max Montgales, one of the German delegates at Versailles, quoted in a Munich dispatch received here.

Montgales says that the military terms do not allow Germany a sufficient number of troops to maintain order, the recent events in Berlin and Munich being cited as proof of his statement.

He adds that the acceptance of the economic clauses would "condemn German working men to slavery."

Approve Bill

BERLIN, (AP)—The German cabinet has approved a number of financial bills drafted by the ministry of finance, including a tax on incomes from property, a levy on capital on the basis of the last year of war, an increase in income tax and an increase on sugar and tobacco duties.

Information has been received from an unimpeachable source that the council of plenipotentiaries to be met by Germany to the peace conference will declare in favor of military disarmament, saying that Germany is ready to reduce her forces to 300,000 within two months after the conclusion of peace and to cut the size of the army down to 200,000 men.

VOICE REACHES LONG DISTANCE THROUGH AIR

Can Be Heard Loud as a Cannon at Twenty Miles from Instrument.

SAN FRANCISCO, (AP)—A man's voice can be made as loud as the cannon's roar, it can be heard two or twenty miles away. The thing of a voice can be amplified until it sounds like the breakers on an ocean cliff.

No Trick At All

"It's no trick at all to magnify the sound four or five million times, or indefinitely," said Tom Lambert, a wireless telephone engineer, today. "All that is needed is to connect a number of vacuum valves in multiple with a wireless receiving set, and the thing is done. At the first receiving outlet a voice will be normal. Cut in on vacuum valve and it is raised seven times, thereafter it squares itself eight times seven and forty-nine for the next vacuum valve, and 49 times 49 for the next, and so on."

Sound Volume Great

"I mean volume of sound, not power of transmission," explained Lambert. "In a test recently, a phonograph was connected with an amplifier at midnight, and we were lifting it up gradually to supply all San Francisco with sound and amusement, when the police urged us to desist."

Watch Ticking Heard

"In the stadium at Golden Gate Park the ticking of a watch was made audible all over the grandstand while an athletic meet was in progress. Captain Robert W. A. Brewer, an experimenter, moved off 2,000 feet and spoke quietly with song and amusement while he held. A wireless station which I am not permitted to name recently received a telephone message from Europe, and through its amplifier started duck hunt over all forty miles away."

Looks Like Light Bulb

Mr. Lambert exhibited one of the vacuum valves. Its exterior resembled an ordinary 19 candle electric light bulb. Through the glass, however, could be seen electric winding that was dissimilar. Around a filament was wound coils of wire called a "grid." Above the grid was an encircling metallic plate. The current, it was explained, passed through each in the order described. The incoming wireless signals travel down the aerial wire to the tuning set and then to the vacuum valve, which is a "detector" or receiver.

For practical purposes, the vacuum valve has its use in warships, where the wireless telephone speaks its message through a horn to several officers, instead of one using complex equipment. The wireless telephone is wonderfully extending the field developed by the wireless telegraph. Any wireless telegraph receiving set is equally good for receiving telephone messages. The transmitting instruments, of course, are different.

Efficient Twenty Miles

Every airplane possessed by Uncle Sam and all United States warships are equipped with wireless telephone apparatus. These sets on warships are efficient at least twenty miles.

PARIS, (AP)—The Echo de Paris today declares that it was on the request of President Wilson that the heads of the allied and associated powers have declined to permit publication of the full text of the peace treaty presented to the Germans. President Wilson, adds the newspaper, "foresees in any disclosure and risk in opening an important discussion in the United States during his absence."

Dispatches from American correspondents in Paris have stated that it was understood the chief opposition to making the treaty public came from Premier Lloyd George, although President Wilson later had approved the British premier's view.

Ohio Is Singing Goodbye to Booze

Double Celebration Marks the Passing of Demon Rum from Buckeye Land.

COLUMBUS, O., (AP)—The first of a double celebration marking the passing of liquor traffic in Ohio started here Saturday and at midnight the state virtually became a dry territory under an amendment to be constitutionally adopted by the voters last autumn.

While midnight tonight is specified in the new law, the celebration of the license year ended Saturday and comparatively few saloonkeepers paid the \$300 necessary to reopen for the fall, celebration of the year.

Farwell to John

Big farewell parties to John Barleycorn were held Saturday night in all every wet municipality in Ohio; the biggest state in the country to have voted prohibition. The authorities did not anticipate trouble in any community as a result of the expected hilarity.

For several weeks some communities have been preparing for the advent of prohibition and the number of licensed drinking places, which totaled 5600 a few months ago, has been considerably reduced.

Saloonkeepers report that for several weeks stocks of wines and whiskies have rapidly disappeared. Virtually all the finer wines and liquors have been disposed of. Despite the unusually high prices that have prevailed, the dealers say thousands of dollars worth of liquor has been stored in private warehouses and cellars for private consumption.

Close Doors of Saloons

Score of saloons that closed today will reopen shortly as lunchrooms and refreshment stands. Several breweries will reopen as ice manufacturing and cold storage plants.

Ohio will enter the list of dry states without the usual prohibition enforcement machinery. For the present the prohibition laws will be enforced by state officials.

Prohibition leaders attempted to pass emergency prohibition legislation through the Ohio legislature this winter, but failed. A law enforcement bill was passed, but minus an emergency clause, and the "wet" has announced they will call a referendum upon it before it can become effective.

The state will lose revenue amounting to approximately \$4,000,000 annually as the result of prohibition. Bill providing for new revenue making work are pending before the Ohio general assembly.

Great Britain Objects

Great Britain had proposed that this tonnage as well as German ships seized in other countries be placed in a common pool and allotted on the basis of tonnage lost through action of enemy submarines. The United States has steadfastly refused to accede to this plan.

Ed. J. Roberts, formerly identified here with the Roberts-Daly company, according to the Tonopah Daily Bonanza of May 12, has joined with George Klugreich and his associates in taking control of the Belcher, Belcher Extension and Victory mining companies, comprising what is said to be the best selected area in the Divide district outside of the proven properties.

The deal is most far-reaching in its importance for the Divide district and for Nevada in general, according to the Bonanza.

Mr. Roberts, who some year ago ran the first survey in the gold mountain district, four months ago arrived in Tonopah and learned of the difficulties besetting the owners of the properties he has taken over. He quickly closed the contract by which he becomes one of the large owners of the estates reorganized as the Belcher Divide Mining company, and has made preparations for extensive development work.

REDS APPEAL TO WOMEN OF MOSCOW CITY

Alarmed Over Advance of Enemies Lenine Followers Are Taking Desperate means; All Russian Cabinet Reorganized

LONDON, (P)—While there is no confirmation that Nikolai Lenine, the Bolshevik premier, has proposed an armistice to Admiral Kolchak, head of the All-Russian government at Omsk, there are indications that the Bolsheviks are anxious over the fate of Petrograd and Moscow. A wireless dispatch states that the defense committee of Moscow is appealing for women volunteers for military service and admits that non-combat troops are fighting in the outskirts of Riga.

Capture Useless

According to a dispatch from the Reuter correspondent there is no doubt that Petrograd can be taken but he says its capture would mean nothing to the allies inability to feed the population.

Reorganization Proceeds

OMSK, (P)—The work of reorganizing the cabinet of the All-Russian government is proceeding. It is being intended to effect closer co-ordination with the military control and at the same time work more efficiently along the lines of the program adopted by Admiral Kolchak, former minister of justice and education, M. Starinkovitch and M. Sapozhnikoff, have been succeeded by Professors Teleberg and Precharenko, who, it is believed, will direct the work of the two departments to better advantage.

Combine Staff

It is also proposed to combine the ministry of war with the general staff, under the presidency of the chief of staff, General Lebedev, who will move to Ekaterinburg, where he will be near the scene of operations. This ministry has in the past been the recruiting and drilling of soldiers up to the point where the men were incorporated into combat units. After that time the men passed under control of the staff, an arrangement which resulted in some cases in a conflict of authority. Certain considerations of the re-organizing and equipping of the men also will be influenced by the proposed change.

Admiral Returns

Admiral Kolchak, head of the all-Russian government, has returned from a visit to Ekaterinburg, where he presided at a conference of manufacturing firms, merchants and industrial organizations in the Ural district. He gave them assurance that the government would help in the rehabilitation of industries and in the building up of the transportation facilities.

Guarantee to Jews

Guarantees were given a Jewish delegation that the work of the government would be safeguarded and several Jewish organizations expressed confidence in the government, sending cash donations for the army.

Military Situation Good

The military situation is regarded here as satisfactory and each week new units are being equipped and moved toward the front. The Bolsheviks have massed forces in the Samara sector in a desperate effort to hold the grain growing section of the country, without which the Bolshevik regime is bound to collapse. They won a minor success near Samara, including the re-occupation of the town of Biobeeb. This has been offset, however, by the gains made by Siberian forces along the Vitka river.

Fighting is going on in the streets of Orenburg. At Uralak, 210 miles to the south of Orenburg, Cosack forces, which have long been carrying on an isolated defense, have been joined by Siberian troops and the government's position has been greatly strengthened.

PASTEUR PLAY IS WOMANLESS

Based on Life of Famous Scientist It Proves to Be Great Success.

PARIS, (P)—Sacha Guity's play, "Pasteur," in which no woman's character appeared has had a run of 107 performances, which for a play entirely devoid of feminine interest is considered in Paris to have been a great success. The piece, however, hardly had claims to be played. It was rather a series of unconnected scenes in the life of the great scientist, beginning with one showing him with his pupils, at the outbreak of the war of 1870, continuing with scenes introducing his first application of his vaccination against hydrophobia and ending with his reception at the French Academy.

Many Remember Him

The absence of any woman's role was not the only remarkable feature of the piece. The "hero" has not been dead twenty-five years yet, so that many who saw the play remembered him personally. The author found his materials in the life of Pasteur written by Pasteur's son in law, M. Vallery Radot, whose wife, Pasteur's daughter, on seeing Lucien Guity, the author's father, who played the title role with a marvelous make-up, could not help exclaiming: "Papa!" The boy who played the role of the first victim of a mad dog's bite to be treated by Pasteur was a young brother of the boy who really was so treated.

KANSAS GRAIN A GIANT CROP

Immense Fields of Wheat in Sunflower State Awaiting the Harvest.

KANSAS CITY, Mo., (P)—An army of more than 200,000 men will be required to harvest the giant wheat crop in Kansas this year, holding A. L. Barkman, director of harvest work, United States employment service. Sixty thousand of this number must come from outside the state.

In making the estimate, he referred to the report of a board of agriculture, issued last month, which said that "with a general average condition of 99.32 per cent on an estimated total of 10,759,000 acres of growing winter wheat, the prospect for a record smashing crop."

The harvest labor problem in Kansas is more difficult than in any other state and 47,000 posters have been distributed among government buildings throughout the nation. While 500 laborers a day are received here from prospective workers, Barkman said many who write will not come, and that most careful distributors will be necessary to prevent a labor shortage.

What cutting usually starts in the south central counties of Kansas about June 15 to 20, reaching the central part of the state ten days later. The demand for men increases as the harvest district broadens.

"Men should, if possible provide themselves with sufficient funds to tide them over a few days in case of rains or unavoidable delays in securing work," said Barkman. "The harvest fields do not offer light work and the sun is often exceedingly hot. Therefore boys and men who are unused to heavy work are handicapped in securing employment, competition with able-bodied experienced men."

Missouri can care for its big wheat crop with local labor, Barkman said. Nebraska and states north will be supplied with harvest labor by the drift of men from Kansas, if that state, the center of the wheat belt, has a sufficient supply.

HOMELESS DOGS JOIN WOLVES IN PREYING

PHOENIX, Ariz., (P)—Homeless Mexican dogs, abandoned by their owners who have fled from their homes south of the Mexican border, have reverted to the savage state, many of them joining bands of wolves, and are preying on the cattle of the Arizona ranges. So serious has the situation become, said Mr. E. Musgrave, predatory animal inspector of the United States biological survey that a strenuous drive has just been inaugurated to wipe out this menace to the cattle.

CONOCO GASOLINE

A Mistake Corrected

Many users of gasoline consider the gravity test the true measure of its value.

But — The United States Government — through its National Bureau of Standards, at Washington, has said that this test tells nothing of the power of gasoline.

This authority states that the only true test of gasoline is found in its vaporizing and combustive qualities, and these can only be determined by its boiling points.

Because combustion starts at the lowest boiling points and continues on up to the high boiling points, forming the complete, uniform chain of combustion necessary to get the right results from your gas. Leave out one link — boiling point — and the power chain is broken.

You require low boiling points for easy starting, medium boiling points for quick, easy acceleration, and high boiling points for speed and power.

It is only possible to get this continuous chain of boiling points — combustion points — power points, from straight-distilled gasoline. Mixtures always have missing links.

Conoco Gasoline is a straight-distilled, all refinery product and will measure up to all real power requirements. Look for the sign of the Continental Soldier.

Young Deer Is Seen at Reservoir Site

Fawn, Driven from Hills, Is Center of Interest for Workmen.

A young fawn, running in a westerly direction across fields from the city reservoir south of Twin Falls Friday afternoon, an unusual spectacle attracting the attention of several persons at the reservoir site. It is presumed that the animal had been driven down from the foothills between 25 and 30 miles away. Among those who saw the animal were R. W. Sharp, superintendent for the firm installing the filtration plant; G. W. Saunders and John Houck. They are positive that the animal was there, despite the attempt of Waterworks Superintendent John J. Pilgrimm, whose view was obstructed, to make them believe they had seen a jack rabbit.

Several well authenticated instances of the appearance here of deer are on record, although it is unusual for the animals to be found so far from the hills.

COMPANY MASCOT LEFT STRANDED

Boy Picked Up by Soldiers Lands in Police Court Dock.

LONDON (Correspondence of the Associated Press)—American airman who befriended and made a mascot of a bright, curly-haired English boy named George Loveridge, will be grieved to learn that the latter had a hard time of it after his return to the United States. Charged with sleeping under a haystack and having no visible means of support, the youth was arraigned in the UKridge police court the other day.

"Well, my boy," questioned the court, "haven't you any friends at all?"

"Only the Yanks, sir," the prisoner replied.

He said his father and mother were killed and their house wrecked by a bomb in an air raid in October, 1917. "Some American airman," he went on, "took pity on me and called me the mascot of No. 190th squadron. They treated me very kindly, gave me a uniform and took me with them wherever they went. I was paid \$10 a month by the paymaster. When the squadron went to France they wanted to take me, but the war office wouldn't let them, so they asked No. 133rd squadron to take care of me. When that left for France I was handed over to No. 228th squadron and came with them to Northolt.

"Now they've returned to America. They tried right hard to take me, but the government said I couldn't go for four years. I spent all my money and had to sleep under the haystack."

In handing the boy over to the police court the military magistrate said: "You must not mind being in the dock. You haven't done anything very wrong."

Wall of Paris

Ceases to Exist

Famous Military Zone Will Become Site of Parks for French Capital.

PARIS (Correspondence of the Associated Press)—By authorizing the destruction of the wall of Paris and the site of the military zone outside the wall for city improvements, the French parliament has just removed the principal obstacle to a "Greater Paris." The city will thus obtain the elbow room it needs, any one of the most remarkable parks in the world. With a width of 250 yards and a length of 25 miles, the park will completely surround the city, adding one more to the circular systems of improvements that have successfully taken the place of disappearing walls since the time of Philippe Auguste which show that the growth of the city as rings mark that of the oak.

Landmarks Are to Go.

Americans revisiting the city ten years hence will come upon "Greater Paris" without knowing it if they look for the old landmarks. The rag pickers' huts, truck gardens and pile of refuse that made the military zone look like "Shantytown" and gave arrival the first warning of approach to the city will have disappeared to give place to the park. In place of the massive stone wall and deep moat in front of the new park, constituting a third of all the park area of the city. The rest of the space will be utilized for the erection of a permanent exposition building.

Preserved as Monument.

A small portion of the wall will be preserved as a historical monument. This improvement will involve the suppression of the sixty "gates" of Paris. New and wider thoroughfares will connect the city with the suburbs and, eventually, most of the immediately neighboring communes will be incorporated in the greater city.

BAPTISTS NAME MEETING PLACE FOR NEXT YEAR

Convention of 1920 Will Be Held in Buffalo, N. Y.; Recommend Officers for Ensuing Year.

DENVER, Colo. (AP)—Buffalo, N. Y., today was unanimously selected by the Northern Baptist convention as the meeting place for the 1920 convention of the church.

The prominence given to western men and women was a feature of the report of the nominating committee presented to the Northern Baptist convention in session here today. Besides nominating D. C. Shull, a prominent business man of Sioux City, Ia., for president, the committee, in making its selections of officers and board members for the ensuing year, gave greater recognition to the west than heretofore has been given.

Follows Custom

In selecting Mr. Shull for president, the committee also adhered to the long established custom of limiting the office to laymen, although it had been suggested the position be given to a clergyman.

Nominations Submitted
The principal nominations submitted by the committee follow:

Officers of the convention:
President, D. C. Shull, Iowa; first vice-president, Rev. Frederick E. Taylor, Indiana; second vice-president, H. G. Stoddard, Massachusetts; corresponding secretary, Rev. Wm. C. Billing, Missouri; recording secretary, Rev. Maurice A. Levy, Massachusetts; statistical secretary, Rev. Charles A. Walker, Pennsylvania; treasurer, F. L. Miner, Iowa.

Executive Committee
Members of the executive committee (terms expires 1922): Rev. W. S. Abernethy, Missouri; Rev. G. A. Briggs, New York; J. A. Earl, Iowa; Robert East, Minnesota; W. W. Everett, District of Columbia; Rev. Jos. C. Hazen, Illinois; Mrs. Andrew MacLach, Illinois; W. W. Smith, Michigan; E. J. Steinberg, Wisconsin; Ferdinand, Nebraska.

Mission
A Baptist foreign mission, T. J. Villers, Michigan; American Baptist Home Mission Society, Charles R. Brock, Colorado; president American Baptist Publication Society, W. G. Brimson, Illinois; president Woman's American Baptist Foreign Mission Society, Mrs. W. A. Montgomery, New York; president Woman's American Baptist Home Mission Society, Mrs. John Naveen, Illinois.

Final Action Deferred
When the nominating committee's report was made public only one name was submitted for president of the convention, that being D. C. Shull of Sioux City, Ia. Debate developed on the floor of the convention and F. W. Freeman of Denver, a lawyer, was placed in nomination for president.

Speakers declared their belief that the traditions of the church would be better served by having two candidates for the office. A motion was adopted to postpone the election until Mr. Freeman's name could be placed on the ballot. This decision put the election over until into today.

'Tis Not So.

Corn Declines.

CHICAGO (AP)—General selling in local by favorable weather for plowing and planting brought about declines today in the corn market. The trade was also expecting much larger receipts in the near future. Reports of a 20 per cent decrease of corn acreage in Kansas operated, however, as something of an offset. Opening prices which ranged from 7-8 to 2 1-8¢ lower with July 14.01 1/4 to 1.62 and September 1.45 1/4 to 1.62.
