

NEW RAILWAY STRIKE CALL IS IMMINENT

Conference of Committee of 100 of American Federation of Labor Employees Department is Scheduled

ALL FACTIONS ASSEMBLE FOR PARLEY IN CHICAGO

Federal Government Announces Labor Board Will Be Given Full Support in Effort to Avert Strike

CHICAGO, (AP)—Developments in the possibility of a strike order by others of the 16 standard labor organizations, beside the five train service bodies, were seen today in a call for assembling tomorrow of the conference committee of 100 of the railway employees department, American Federation of Labor. This committee has full power to order a strike of the six shop

No final action was expected, however, before Friday, according to B. M. Sewell, president of the department.

All Factions in Conference.

The first of a series of conferences in Chicago at which representatives of all factions in the railroad strike organization may decide the outcome of the strike call issued by the big four brotherhoods for October 20, began here today to continue over the week end.

Three group meetings are scheduled: 1. Executives of the shopmen, maintenance of way workers, clerks, telegraphers and others meet to decide their attitude toward the announced strike of the train service employees, with indications of a final decision at a joint conference Sunday.

2. Brotherhood leaders are on their way here to hear the government's attitude through the railroad labor board tomorrow.

3. The board members of the central division meet Friday in Chicago to discuss all phases of the strike situation, while executives of other divisions meet simultaneously in their own regions.

Rate Cuts Indicated. Freight rate reductions approximately equivalent to the 12 per cent wage reduction in wages ordered last July 1 by the railroad labor board were indicated as the probable basic suggestion the labor board will propose, with the backing of the administration, to avert the strike.

Mr. Markham said the present transportation struggle was due to the fact that 29 public bodies have a hand in fixing the rates, income and expenses of the railroads and that they have no control over the equality of rates. He said 67 per cent of their operating costs "The remedy," he said, "is to place more in the hands of railway management—under competent and broad-minded supervision—the control of operating costs, in such a way that responsibility may properly be fixed upon the management for the operation of their properties."

The railroad, he said, has taken their share of losses in the present period of readjustment, despite the fact that they were not permitted to profit as other industries had during the period of high prices, because their earnings were fixed by the government.

Consensus of Obligations. "With a consciousness of their obligation to the public service," he said, "the management of the railroads of this country have recently announced that they will ask the railroad labor board for a further reduction in wages, but the public is not prepared to propose to pass along to the public in the reduced freight rates. This puts the attention of the public, which exercises the influence of control on the railroad, into the hands of the public, who would reduce rates, and the management on the labor board have the opportunity to secure them by granting such wage reductions as will make reduced rates possible.

Unskilled labor cost the railroads of the country last year more than \$1,200,000,000. Other industries have been liquidating labor costs, excepting the wages of unskilled labor. It is entirely unfair that the farmer, for instance, should have to pay freight rates sufficient to make it possible for the railroads to employ labor at three or four times the price which the farmer is paying for exactly the same kind of labor.

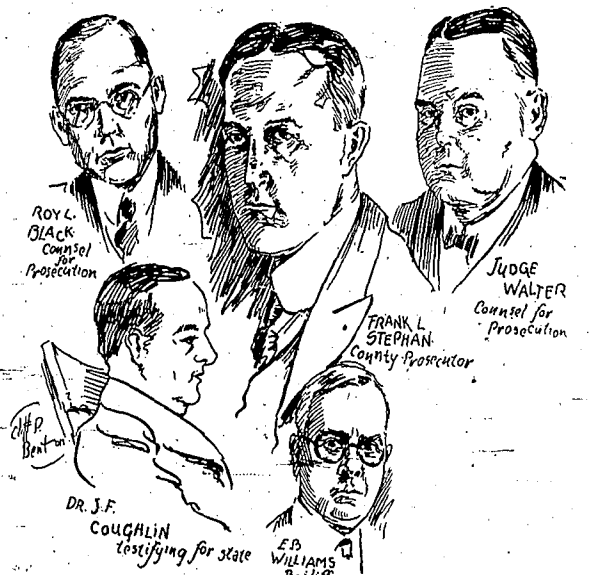

Defines Issue Involved. "It is most important that the public understand clearly the issue involved in the order for a general railway strike which has been formulated by the railway labor brotherhoods. The thing it is proposed to strike against is the decision of the railroad labor board authorizing a reduction of approximately 15 per cent in wages, which the railroads put into effect July 1. There is no question as to the possible grounds for a strike. The labor brotherhoods propose now to defy the law and strike."

Draft Defensive Program. With the problem definitely assigned to the labor board for solution and made a matter of the government's program ready with a detailed program in the event of the strike materializing, no important local developments were expected today.

Reports from military area headquarters that steps were being taken to list men now in the service, who have had experience in various phases of railroad work are understood not to be the result of a general order from Secretary Weeks.

Although suggestion was made yesterday in high official quarters that important reports of railroad freight rates were in prospect and might occur immediately, the interstate commerce commission has no pronounced view of importance to make today at

Living Costs Fall 1.7 Per Cent From May to September

Figures Still 77.3 Per Cent Higher Than 1913 Average, Reports Bureau

WASHINGTON, D. C. (AP)—Based on statistics for 26 cities, cost of living in the United States decreased 1.7 per cent from last May to September, according to figures announced today by the bureau of labor statistics.

The decrease from May to September ranged from 0.1 per cent for Portland, Me., to 3.8 per cent for Jacksonville, Fla., with New York showing a decrease of 1.1 per cent, Denver 0.6 per cent, and Seattle 2.6 per cent.

The figures showed the cost of living in the country in September to be 77.3 per cent higher than the average for the year 1913. The increases were itemized as follows:

Food 5.1 per cent; clothing 0.2 per cent; housing 0.9 per cent; fuel and light 0.7 per cent; furniture, 12.4 per cent; and miscellaneous 10.8 per cent.

BANK OF NORTH DAKOTA IS DECLARED INSOLVENT

Court Orders Governor and Other Officials to Receive No More Deposits

JAMICSTOWN, N. D. (AP)—The state-controlled Bank of North Dakota, Governor Lynn J. Frazier and other officials of the state and the bank today were under injunction not to receive deposits of public or private funds in the bank under the terms of a temporary order issued yesterday by Judge J. A. Coffey in Sturtevant county.

The injunction was issued on a petition of a number of taxpayers and creditors on a permanent order was set for November 3.

The injunction came on the heels of a statement by officials of the bank, asserting that this bank, totalling \$1,000,000, had been sold, of which a large part would be available for farmers and to take up advances to other state projects, the state floor mill and elevator and harbor building schemes.

The order declared the Bank of North Dakota "is insolvent" and prohibits everyone connected with the bank from interfering with any proceedings on the court may appoint to take charge.

State officials said the action was of a political nature and they indicated today that the matter probably would be brought before the state supreme court at once.

SENATE'S VOTE BRINGS PEACE

Only Formalities Remain to Complete Ending of Status of War

WASHINGTON, D. C. (AP)—Exchange of ratifications at Berlin of the "Treaty of Berlin" finally establishing peace between the United States and Germany, is to be the next step ending the nation's legal war status.

Following ratification by the senate last night of the German and also the Austrian and Hungarian peace treaties, the state department today was in position to proceed with the last formalities. Appointment of diplomatic officials, however, is not anticipated for several weeks at least.

The senate voted on the German and Austrian treaties were identical, 69 to 20, and 68 to 17 on the Hungarian treaty. Fourteen democrats supported the treaty on the final roll call while only two republicans, Senators Borah and La Follette cast their votes against the treaties.

LOVE BANDIT HOLDS UP DOMINION EXPRESS TRAIN

Bobby is Discovered when Messenger is Found Bound and Gagged at Moosejaw Station

MOOSEJAW, Sask. (AP)—A lone bandit today held up the Dominion Express train between the Vancouver-Toronto express between Swift Current and Moosejaw, lifting the safe and dropping it from the moving cars. Railway officials are checking up to determine how much loot was obtained.

The robbery was discovered when the express arrived here and the messenger said he suddenly found himself covered by a pistol. A crew command and the messenger threw up his hands and was left bound up on the floor.

With the express stopping toward Swift Current, the robbers calmly asked him to get out of the train. After he obtained what he wanted, he left through the side doorway.

BOMB EXPLODES AT EMBASSY OF U. S. IN PARIS

Blast Follows the Receipt of Threatening Letters Coming to Ambassador in Connection with Italians' Conviction

PARIS, (AP)—A bomb exploded today in the house of Myron T. Herrick, the American ambassador, seriously injuring the valet who opened the package containing it.

The room in which the explosion occurred was connected with the case of two Italians recently convicted of murder in Massachusetts.

The bomb was contained in a carefully made package, delivered this morning and addressed personally to the ambassador, who it appears, might well have opened it himself, as it seemed to be a gift designed for him.

The ambassador's valet, however, happened to open it.

Immediately after the explosion Ambassador Herrick went to the Hotel Crillon, where General Foching is stopping. The prefect of police joined the general and the ambassador there, and this evening they were conferring on the case.

Threats to tear down "The American flag over the American embassy here" were contained in many letters which have been received at the embassy in the last few days protesting against the conviction in the United States of two Italians, for the murder of Elizabeth A. Pearson, paymaster of a shoe manufacturing establishment at Braintree, Mass. In all between 300 and 400 letters of protest have been received, at the rate of more than 100 a day.

There have been numerous demonstrations by radical elements in Italy since the conviction of the two Italians, papers here in Paris have taken up the campaign, urging their followers to protest to the embassy and announcing the police and the French government departments have initiated precautionary measures.

Premier Paints Dark Picture of English Trade Conditions

LONDON, (AP)—The situation in England as regards trade and unemployment is worse than at any time since the end of the Napoleonic wars, declared Prime Minister Lloyd George in the house of commons today in outlining the government's policy on the two subjects.

At present, he said, there are 1,750,000 persons unemployed, and added that the greatest unemployment, to the extent of 17 per cent, was in the metal trades.

He declared that the causes for this situation could be summed up in one word—war.

In a part of the government's plan of alleviation, he said, the government proposes to set up a fund of \$100,000,000 to enable it to service 100,000 unemployed in the dominions, whether he said 60,000 or 100,000, settled with government assistance.

GREEKS SEIZE BIG STORES OF TURKS' WHEAT

Fertile Fields of Anatolia Make Possible Prosecution of Warfare Without Drain on the Exchequer

WITH THE GREEK ARMY IN THE FIELD, (AP)—Americans who find life expensive would secure unbounded relief if they could come to Anatolia. In the area through which the Greek army passed in its advance on Angora lamb sold for 60 cents each, chickens for 12 cents, whole cows for 49 and pigs for half a cent. Every sort of food is found in great abundance and it seems as if America never heard of even before the war.

Could Feed Continent.
The fertile fields of Anatolia rival those of the most productive American state. Wheat is the principal commodity of the thrifty Turkish and Kurd farmers. They raise sufficient quantities to feed a continent. When King Constantine's army made its retreat in 1918 with advance from Uluk in the heart of the Kemalists country, it found hundreds of thousands of tons of wheat and grain. It is the plan of the Greek government to market this huge treasure in an effort to bring the Greek currency back to par.

The Greeks also found incalculable numbers of sheep and goats. The oxen and water-buffalo swarm the plains of Asia Minor, while the famous Angora goats and Caravan sheep are so numerous that they sell for about the price of a pound of mutton in any American city.

It is this great cornucopia that has made it possible for Mustafa Kemal's army to hold out so long without outside assistance. It is also this great abundance that has kept the Greek forces going. Their onward march to Angora would not have been possible upon the meagre food supplies they have been able to transport from Smyrna and Greece.

Water Only Is Scarce.

The only thing scarce in Anatolia, particularly in the northern part, is water. The territory over which the Greek troops made their recent remarkable advance in order to catch Kemal's army is made up largely of level land and barren hills, with water only at distant intervals. For days the weary soldiers had to march under the burning Asia sun without a drop of water to relieve their parched throats.

PLAN TO DECREASE LOSS IN THE MINING OF LEAD

Prof. Laney, Head of Varsity Geology Department, to Make Special Survey.

UNIVERSITY OF IDAHO, Moscow, (Special).—An investigation into the nature of slag losses in lead mining with the hope of developing a method whereby a greater per cent of the metal can be taken profitably from the ore, will soon be started at the university under the supervision of Dr. F. B. Laney, head of the geology department of the school of mines, in co-operation with the Bunker Hill Mining and Concentrating company. Graduate mining students will assist in the work.

"Through modern practice the amount of metal lost has been greatly reduced," said Dr. Laney, "but the nature of the loss has not been determined. By discovering this, progress can be made which will be of direct benefit to the mining industry."

For this, and subsequent investigations, a special microscope with lenses of the finest quality obtainable, have been imported from Europe.

NEGRO IN CUSTODY FOR KILLING OF LITTLE GIRL

VINELAND, N. J., (AP)—Louis Lively, the negro accused of killing a little girl at East Moorestown, N. J., last spring, was arrested here early today after shooting a policeman. According to the police, he confessed to killing the child. A small crowd surrounded the jail after his arrest because known, but every precaution was taken to guard the prisoner.

Lively is charged with killing 7-year-old Madeline Buser, mauling her body and burying it in the cellar of his home. He fled and last night was recognized by Policeman Jan. Wilson, who, with another policeman, pursued the jailer. Lively shot Wilson, who is not expected to recover. The other policeman captured the fugitive.

"I didn't mean to kill Madeline," said Lively, who declared the child played often at his home and that when she broke a dish he became angry and hit her with a chunk of wood and later, terrified, he cut up and buried the body.

FARM SERVICE SUPPLIES BIG WORK DEMAND

Positions Numbering 2,168 are Filled Since Spring by Employment Institution

A total of 2168 positions have been provided for unemployed men and women in this district by the farm service since the opening of that institution's employment department on March 10, last.

Single men were chief applicants for work, 1363 of these being supplied with jobs of one sort or another, over all other departments, including married men, boys and housekeepers, as well as "miscellaneous" applicants. Although there is still some work to be had in the country, demand for jobs and men has fallen off materially in the past two weeks. Best gathering is the principal work being done now on district farms, although a call obtains for some men for general farm work and potato picking. Having is done, but some threshing is still awaiting the machines.

Manager Donald McLean of the farm service, in a report just compiled, carrying the business of the department in October 5, shows employments for the season with wages paid, as follows:

Single Men.
Twelve at \$40 per month and board; 215 at \$45; 226 at \$50; 49 at \$60; 0 at \$100. Nine at \$1 per day; 27 at \$3; 304 at \$2.50; 584 at \$2; 8 at 25 cents per hour.

Married Men.
One at \$80 per month; 36 at \$75; 1 at \$70; 67 at \$65.

Housekeepers.
Six at \$45 per month; 62 at \$30; 4 at \$25; 7 at \$5 per week.

Miscellaneous.

One at \$40 per month, including loan. Board and fuel; 0 at \$4 per day, including loan; 33 at \$2.50 per day; teamsters; 2 at \$30 per month, herd; 3 at \$50 per month, herd; 14 at 12 1/2 cents and board, sheaves; 8 at \$65 per month; 12 at \$60; 2 at \$55; 7 at \$50 per month, irrigators; 10 at \$75; 3 at \$45 per month, camp flunkies; 23 at \$125 per month, cooks; 5 at \$30 per month, boys; 4 at \$45 per month, dish washers; 4 at \$75 per month, choroman; 1 at 75 cents day, choroman; 99 at \$7 per acre, beet thinner; 5 at \$3 per day, beet thinners; 0 at \$2 per day and board, beet thinners; 5 at \$7 per acre, beet spacers; 95 at \$2 per day and board, hay men; 7 at \$2.50 per day and board, hay stackers; 19 at \$1.50 per day, hand boss pickers; 41 at \$5 and 6 cents, spud pickers; 18 at \$4 per day, spud sorters; 15 at \$4 per day, sack sewers; 110 at 5 cents per box, apple sorters; 35 at 35 cents per hour, apple sorters.

ARMAMENTS CUT ONLY ECONOMY

Costa Rican Tells Press Congress Education Alone Will Bring Peace

HONOLULU, T. H., (AP)—The limitation of armaments is not a definitive step towards peace, according to Dr. Roberto Brenes Fournier, director of the university and former Costa Rican minister to Washington, who addressed the Press Congress of the World here today.

"It is a step toward the economic welfare of the nations, upon whose capacities of production and thriving depend the indirect taxes of every description which enormously, aggravated by the need of maintaining permanent armies, and the incessant renovation of armaments," Dr. Brenes said.

Misunderstandings Breed War

"But war is not the outcome of any accumulation of weapons," he said, "but of misunderstanding of the international interests of nations; historical interests—boundary of colonial, industrial, racial or institutional interests. Paucity of armaments does not determine peace. It is a state of consciousness of the nations which engenders wars, which induces the conveniences of taking up arms, which inflates the budgets of the states. Wars, as all other events produced by man, take birth in the depths of his thought and his consciousness.

"The enlightened thought of man and the illumined heart of woman will determine the permanent peace, as their obscuration has generated numerous wars which have hastened the ruin of the human race."

Education Solves Problem

"Therefore the institutions which educate the consciousness of man are those that inform his thought of the people and those that rule their destinies, are directly and indirectly responsible for the state of mind of nations which bring themselves into war or which propose peace.

"Is there any institution which educates the thought of man more extensively or more powerfully than the one represented by this Press Congress of the World?"

"If we truthfully aspire to eliminate war among men, let us recognize with candor that the Press Congress of the World is able to attain this high purpose."

"A memorable performance of this Press Congress of the World should be the sketching of the cardinal lines of the great human interests upon which an agreement is possible without reviving the extant wide divergencies of nationality, race or religion.

"And not less memorable should be the work of organizing sub-congresses which have in charge the settling forth from a new international viewpoint of all those problems affecting different groups of nations. The agreements arrived at in these sub-congresses should serve as a basis for the subsequent debates of the Press Congress of the World.

Work for Spanish-Americans

"The Spanish-American section of this sub-congress should take in charge this most important function: to emphasize the spiritual unity of all peoples speaking one and the same language, creating in a solid and definite way the sentiment and the conviction that in the realm of art and science and all the spiritual forms of

civilization all those nations are, separately, more provinces of a vast ensemble which we must take in sight when the artistic work is created, or the scientific research is brought about, or the philosophic doctrine is expounded.

"It is a section of the sub-congresses should take in charge the foundation and direction of a great newspaper destined to form and educate that continental American nation to live for the spiritual unity of the peoples of the continent, to represent in an integral and comprehensive manner the grandeur and transcendence of the whole ensemble.

"Such a newspaper ought to be founded and edited in New York, America. It is not possible to live for any length of time, with an open mind, without losing the provincial prejudices, though living always the high interests and ideals of the mother country.

"New York will have in relation with the spiritual unity of Spanish-American nations the same destiny that Alexandria had in relation with the intellectual unity of declining Greece or the destiny of Florence in relation with the awakening of arts and letters at the dawn of the Renaissance."

FREE FROM TUBERCULOSIS HERDS SEEK ENROLLMENT

Latest report of the tuberculosis eradication work by the United States Department of agriculture shows that a total of 204,802 head of cattle in 823 herds have been accredited by the government as free of tuberculosis infection, while 702,500 additional cattle in 60,113 herds have already been one tested and found free of the disease. On August 3, 1921, a total of 1,294,175 cattle in 79,241 herds were under supervision in the tuberculosis eradication campaign. Furthermore, there were 218,621 cattle in 14,491 herds on the waiting list for testing. There is a constant increase in the number of animals and herds tested and accredited and in the demands on the part of herd owners who desire to place their cattle under government supervision.

Theatres

William Farnum, the popular William Fox star, is coming to the Idaho theatre Wednesday and Thursday in the most stirring story of his career. It is that of Francis Wilton, the famous vagabond in Justin Huntly McCarthy's book and play "If We Were King," a role made famous on the stage by E. H. Sothern. Mr. Farnum has given in the career many of the most important pictures shown in the last few years. His leading role in "A Tale of Two Cities" Charles Dickens' famous story, is still being shown throughout the United States and Great Britain and on the continent. It is indeed a classic in motion picture art. Another among Farnum's innumerable big pictures is "Les Miserables" which, like "A Tale of Two Cities," will be shown and rebroadcast for years. His "Riders of the Purple Sage" and his "Rainbow Trail" drew packed houses wherever shown.

PUNTS AND PASSES

(By LULLBAK.)
Went out to Lincoln field last evening to see the team at work, and right here, let me say that they are a real bunch of athletes.

The boys go about their work with a snap that is refreshing, and they have just as much pep at 6 o'clock as they had at 4.

As a rule, they punt the ball for a while, and then settle down to business, and believe me, it is some business. They are getting ready for the coming game, and having let off yesterday, they tend to work twice as fast as usual.

From the side liner the team impresses one in this manner: At right and we have Gene Thomas, a likely chap that is fast on his feet, and has all the earmarks of being one of Evans' real finds.

At right tackle we find Nicholson, a good lineman, and a hard man to break through. Nye at the same place works hard, and any one that works hard is bound to succeed.

Pat Flynn at right guard is one of the heaviest men on the line and can be depended upon to tear open the necessary holes for the tackle.

Forville also fits in at right guard, and is another heavyweight that will make life miserable for the opposing team.

At center, Evans is blessed with three handy passers in Puckett, Denton and Tucker.

At left end is left end, and is a real whizzer when it comes to catching forward passes.

Bob Paltzer at left tackle is in a class by himself, and can play the backfield when necessary. But does all the kicking and can be depended upon for punts ranging from 40 to 60 yards. Puckett, the center, can also play right tackle. Then we have a new man by the name of Fletcher, and this lad sure tears through the line. He hasn't played in any games so far, but takes a tip from me "Fletcher will be one of the regulars." He doesn't seem to realize that he has competition.

Leiser at left guard is a real husky, and fits in nicely. A guard is supposed to do the job that the name of his position implies, and Leiser won't let the opposition get through left guard.

With Cliff Pix on the sick list, Scott and So be taken from Fairbank, and given promise of being an able assistant to Cliff. By the way, we saw Cliff last evening and his injured knee is coming along nicely, and with a rest over the coming game, he will be in tip top condition for the Nampa game.

Thoughtless at left half is a good ground runner, and inside of two weeks will be one of the best backfield men in the state.

We all know what Scelley can do, so we won't go into detail, but for the benefit of those that don't know him, we'll say that whenever we need it, 15 yards Scelley is the boy that gets the ball. King is an able assistant.

Robinson, no doubt, will play full back while Pix is out of the game, and is rounding out in fine shape.

And before we finish our summary on the first string team, it won't hurt to mention "Slim" Browne. Browne looks

HIGH HEAT WELDING IS UNDER DEMONSTRATION

Coast Expert Gives Example of Latest Achievement Before Professors

UNIVERSITY OF IDAHO, Moscow, (Special)—High heat welding, accomplished by a flame attaining a temperature of 2000 degrees Fahrenheit, was demonstrated to engineers of the University of Idaho recently by E. Olsen, representing a Seattle welding concern. The demonstration was held under the auspices of the associated engineers of the university. Speed tests, overlaid welding, and various forms which will be encountered in practical work were carefully demonstrated by Mr. Olsen. The apparatus used in the demonstration was capable of cutting high carbon steel up to 24 inches in thickness.

Rasmussen Makes a Serious Confession

Admits He Has "Too Much Jewelry" and Not Enough Money"—Decides to Let Go at Any Price.

"If we could collect the money owing to us we'd be on easy street," said L. Rasmussen. "If" said I. "If"—like the lads who got lost out hunting—"if we had some ham we'd have some ham and eggs—if we had some eggs!"

SO in order to raise money the whole stock will go on sale at astonishing prices. The store is closed today and tomorrow, so that everything may be marked down—plainly and decisively. There will be solid gold rings for as little as a dollar apiece!

THERE will be white and gold china for a dime! Clocks that were made to sell for fifteen

dollars will be sold for three. Knives, Forks, Spoons, and all sorts of high grade Table Ware will be sold for twenty cents apiece—though mostly they sell for seventy-five cents to a dollar and a quarter! Diamond Jewelry will be sold at a third to a half below prevailing price. Cut Glass will go at half price. All the Watches for men and women will be reduced.

BUT the tale is too long to tell in one chapter. See the windows today. Arrange to be here Friday at 10 o'clock. I thank you.

POISONED CANDY CAUSES ILLNESS OF SIX NURSES

Postoffice Inspectors at Chicago Conduct Search for the Sender

CHICAGO, (AP) — An exhaustive search for the sender of a box of poisoned candy, responsible for the critical illness of six nurses at the West End hospital, was being conducted today by postoffice inspectors.

The box came through the mail and was addressed to Miss Helen Rosenfeld, a 17-year-old student nurse. It contained home-made "Fudge" candy, analysis of which by Dr. H. D. Vally, laboratory expert of the institution, was said to show that the supposedly deadly poison permeated all of the candy.

Kenia Rosenfeld, sister of the student nurse, said she had been in the hospital since that time. In the candy box was a typewritten note bearing the following description:

From a patient who was an ardent admirer. This candy was faithfully made.

CLEAN SWEEP IS MADE OF BERGDOLL CASE RECORDS

Box Containing the Documents Stolen from Congressman's Office is Found

WASHINGTON, D. C., (AP) — The box containing Bergdoll investigation and private papers, stolen from the office of Representative Johnson of Kentucky, was found in a room on the fifth floor of the office building building being opened and with important documents missing.

Employees of the building reported that they located the box covered with rubbish in an unoccupied storage room. After a hurried examination, Mr. Johnson announced that not a single slip of paper relating to the Bergdoll investigation was left.

After a conference with Speaker Gillett, who stated he proposed to go to the bottom of the matter, Mr. Johnson called on the Washington police to obtain the finger prints of all office building police and workmen.

Speaking of carters, have you heard of the Harvard students who spilled a pair with silver clasp in a Harvard Square shop window, and, thinking to raise a smile, at least, from the chatter at the counter, asked the price of a dog-collar, pointing at the same time to the silver-clasped carters? She turned back, and the window man, and said: "We do not separate them for puppies, sir."—Boston Herald.

For Dark Woodwork. The best way to clean dark-colored painted doors and woodwork is to take a pull of clean warm water and pour a little paraffin into it and then wash the paint all over, working downward with a piece of old Turkish toweling. Next, dry with a piece of clean cloth and polish with a substantial dust. To attempt to clean such paint by hard rubbing is a mistake. It does not need it and will only be rubbed away.

fact. There was no hint of anything of the sort in the witness' testimony yesterday.

Continuing his evidence Mr. King said he had known the Dooleys during the time they farmed near him and the defendant he had known for some years. He saw Ed Dooley, the day he was taken to the hospital and talked to him for about ten minutes. The two were in a small shack on the Dooley farm. Dooley was suffering severe pains, he told the witness.

The witness said he was the man who suggested to Dooley that he take out life insurance. This was about May, 1915.

Said Ed Couldn't Talk. Robert and Mrs. Dooley talked to the witness during the illness and the defendant told the witness Ed couldn't talk. She was then engaged in making preparations to attend the funeral.

Miss Rose King, sister of Mrs. Bover, said she knew the defendant when she lived on the farm with her husband, Ed Dooley, and her brother, Roy Dooley. She helped Mr. Dooley do the cooking while the threatening was going on.

Lots of Flypaper. Flypaper was in evidence at the Dooley home, the witness said. It was sitting about in suet of water.

Describes Ed's Symptoms. Miss Beatrice Hertz, a nurse, said she first met the defendant on the Dooley farm in Twin Falls in 1915.

Next day the patient was violently delirious, all his first day symptoms being aggravated and his condition grew much worse. Later, he was tied in bed.

Probos of Every Secret Order Asked in House

(Continued from Page One)

Washington—A congressional investigation of every secret organization in the United States is asked in a resolution introduced in the House today by Representative William Upshaw, democrat, of Alabama, Ga.

The resolution is in complete in the commission's record, that of the middle western states for redactions on grain, but such fees. The complaints were received in 1919 and 1920 on the ground that the fall in the price of farm products has made the rates so burdensome as to destroy farm lands.

A WISE LIMITATION
Residents of Allison who have appealed to the courts to
prevent the removal of the State Normal School from
their community seem to have raised a highly important
question in their assertion that the legislature, under
provisions of the State Constitution, cannot move an educa-
tional institution created by the legislature from one lo-
cality to another except for sanitary reasons.

The intention of the authors of the Constitution to im-
pose some sort of barrier against indiscriminate swapping
about of state institutions with the rise and fall of popu-
lar parties or factions seems to be clear in the text of
this constitutional provision. Difference of opinion may
exist over the desirability of the specific basis for this
prohibition, but certainly there can be no quarrel over
the wisdom of imposing some sort of limitation on political
activities in this field.

In this particular instance a ruling of the courts up-
holding this apparent prohibition would be of no lesser
benefit in the long run to the town to which the school
was to be removed than in the community from which it
was to be taken.
Without some such limitation or guarantee there could
be no assurance that another legislature might not take
the school away from Burlington with no more fuss than
marked the proposed transfer of the institution from
Allison, and various other state institutions, might be
shifted about like the pieces in a checker-board.

And if this particular form of prohibition were deemed
unjustifiable, then the way to alter it is open through
subversion of the question to popular vote, and thanks
would be due to the present controversy for bringing an
inconspicuous situation to public attention.
At any rate some sort of limitation upon the province of
the legislature in this field must be maintained.

SMALLER PAPER CALLED LIKELY

Brooklyn Newspaper Man Points Out Trend of Opinion Among Publishers

HONOLULU, (AP)—Herbert L. Bridge,
man, business manager of the Brooklyn
Standard Union, told the Press Con-
gress of the World today he believed
the newspaper of tomorrow would be
smaller than those of the present.
"Who is blind competition to print
everything which everybody wants
print so much that nobody wants
it," Bridge asked. He expressed the
opinion that the size of the newspa-
per would resolve itself largely into a
commercial and mechanical problem,
saying: "If the paper can be sold for
more than it costs it will be. Other-
wise curtailment will follow, depend-
ing upon price of newspaper, labor and
other material production."
Size and Price Not So
The retail selling price will doubt-
less follow the same laws, but both
size and price are the body, not the
soul, of the newspaper of tomorrow.
Whatever may happen, it is my be-
lief that if they were smaller they
would be better, though this thing
I would not be prepared to say is the
point. But how many features, supplere-
ments, insets, juniors and other ap-
pendages could we discard with resign-
ance and advance production.

"The New York Mercury re-
ported the miraculous retreat of
the American army after the battle
of Long Island which saved the
Revolution in three lines; the Lon-
don Times covered the battle of
Waterloo in two sticks. We print
and give telegraphic messages of
the beauty of our beauty men
and women in a San Francisco he-
tel."

Mr. Bridgman said he would not ad-
vise the newspaper to lose their
power nor undervalue their influence over
through the care of personal journalism
which Greeley, Bennett and Raymond
did so well. He said the newspaper
of tomorrow should be a more
considering other phases of the
newspaper of tomorrow, he said:
"Nothing is more certain than if the
word and manner of the newspaper
is not enacted in spite and igno-
rance were repealed every self-respect-
ing publisher would rejoice, not so

veterans of the world war have taken advantage of the
plan, which is not entirely paternalistic, since it involves
return honorees of great value to the dominion as a whole.
The law provides that any ex-serviceman may apply for
loans up to \$7,500.

Perhaps the most important feature of the plan is the
continued government supervision of the settler and their
enterprise to assure them success. It buys the equipment
for the new farmers at a large saving over retail prices
and gives them constant advice and encouragement until
they are firmly established. For the wives of the settlers
there are courses in home economics. This movement not
only fulfills the government's pledge to look after those
who fought in its defense; it promises to have an impor-
tant part in developing the dominion's enormous natural
resources, for Canada's greatest need has always been
man power for her farms.

More Truth Than Poetry

A COUNTRY MOTH

By S. E. KIBBE
THE little old town is so quiet that you long to
be getting away.
Why stay where the movie's the only recall at
the end of the day?
You often feel lonely out yonder where the scen-
arials and thrills are so few.
Where the dreams that you like to be dreaming
can never—ah, never—come true.
Why linger where old men have little
To do but smoke stogies and whittle?
The bright lights continue to dazzle. And do
they mean nothing to you?

YOU cling to no strap, and you never are jostled
by people who pass;
You're where no sidewalk is crowded, where
the wide lawns are covered with grass;
If you break a log every one knows it; the home
paper mentions the fact.
Do you never give way to self-pity,
As you think of the busy, big city?
Oh, why, little moth, do you linger? The flame
hasn't ceased to attract!

THE gray-headed men who have millions will never
discover you there,
Where the days are so long and so dreary.
There are glittering gems you could wear,
If you cared to be taking your shoes as the
heart-broken scrubwoman took.
Before she was hopeless and toothless, when she
looked as unlovely as you look.
And had come with romantic notions,
To escape from the kind of conditions
That cause you to sigh as you linger, still safe,
In the little home nook!

THE WISDOM OF EXPERIENCE

"Yes, I made it myself, and it has a kick like a
thousand-volt wire. Shall I pour you a glass?"
"Just a minute till I find out whether my doc-
tor has a stomach-punch that's in working or-
der!"

EDUCATIONAL DISPLAY GOING FROM THE STATE

Agriculture Department to Have Exhibit of Standard Stuff at International

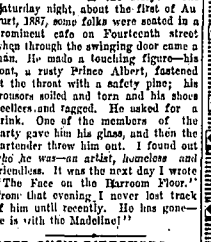

BOISE, Idaho.—The state of Idaho
has been granted a 35-foot space for
an educational display at the Inter-
national Grain and Hay show, Union
Stockyards, Chicago, Ill. The grain
show is held in conjunction with the
International Livestock exposition No-
vember 1 to 15, inclusive.
Last year the state exhibited such
at this show and won first, second, fourth
and sixth in alfalfa; first on red clover,
first and second on alfalfa and
"lover" clover; second, third and fourth
on Ditch wheat and tenth on Turkey
Red, in competition with the entire
country and Canada.

This year in addition to sending a
competitive exhibit the state will send
an educational display. This will in-
clude certified and standardized seed
produced this year in Idaho; giving
our method of certification; and
to what degree the crops have been stan-
dardized. It will show the location of
the university and the extension divi-
sion and its connection with all sec-
tions. Lots of first, second and third
cuttings of alfalfa hay will be placed
on exhibit, showing the feeding value
of each. The Idaho potato will be dis-
played, showing the grades.
G. B. Ahlson, acting field agronomist
and state seed commissioner, has been
appointed to care for the collecting of
this exhibit and setting it up at
Chicago.

The Union Pacific system has grant-
ed a free return of seed exhibited at
Chicago and the entire exhibit will be
set up at the State Seed show to be
held in Idaho Falls January 10-13, in-
clusive.

Author of World Famous Poem Tells Origin of the Story

Hughy D'Arcy, little known as the
author of one of the world's best-
known poems, "The Face on the Bar-
room Floor," in a poem
that has made a
verbal appeal and
has brought fame to
many actors, por-
trayed the part of
the "bum," recent-
ly gave out the real
facts of the origin
of the story.
How he was prompt-
ed to write this
heart-touching
piece of verse. Here
is the story: "One
Saturday night, about the first of Au-
gust, 1887, some folks were seated in a
prominent cafe on Fourteenth street
when through the swinging door came
a man. He made a touching figure—his
coat, a rusty Prince Albert, fastened
at the throat with a safety pin; his
trousers soiled and torn; his shoes
leathered and tugged. He asked for a
drink. One of the members of the party
gave him his glass, and then the
waiter threw him out. I found out
who he was—an artist, homeless and
friendless. It was the next day I wrote
"The Face on the Barroom Floor."
From that evening I never lost track
of him until recently. He has gone—he
is with the Madeline!"

SEED SHOW DIRECTORS PLAN TO MAKE RECORD

Nampa's 1920 Exposition to be Eclipsed at Idaho Falls This Fall

BOISE, Idaho.—The directors of the
Idaho State Seed show, C. D. Irwin,
president, Kimberly, H. F. Scheeler,
vice president, Sandpoint; C. B. Ahl-
son, secretary-treasurer, Bonanza;
Thomson, Twin Falls; B. K. Bennett,
Moscow; H. K. Wiley, Springfield; F.
W. Catter, Burley; A. F. McCloud, Pen-
well, and C. E. Johnson, Idaho Falls
representing the seed growers of the
state, at a recent meeting selected
January 10 to 13, inclusive, as dates
for the state seed show. Idaho Falls
will be the home of the show this
season. The citizens of Idaho Falls are
making every preparation for the larg-
est show yet held in the state.
Last year the show was held at Nampa
and was declared by enterprisers to
be the largest exhibit of high quality
small seed ever displayed in an col-
lective exhibit. Thirty-four counties
of the state were represented. More coun-
ties are interested this year.

The seed show is an annual meeting
of the seed growers of the state,
scores of farmers from other parts
and shows in order to make it possible
for them to attend the program offered
this week, to see the quality of seed
produced in every section and to profit
by the educational features.
Premiums amounting to approximately
\$1,500 are offered to competitors
from the United States and Canada.
The premium lists have been sent to
all interested in the state. Informa-
tion can be obtained from them or from
C. B. Ahlson, secretary of the Idaho
State Seed show, Boise, Idaho.

In brief the objects of the state seed
show are: To promote a medium
through which the producers can be-
come acquainted with their fellow
workers throughout the state; to pro-
mote a common furor through which
the problems peculiar to the seed grow-
ers can be thoroughly and intelligently
discussed; to foster and encourage the
use and production of pure seed through
education, propaganda, and suitable
state laws to afford a clearing house
through which the members may mar-
ket or buy pure seed; to provide an
effective medium for advertising the
superior quality of Idaho grown seed.

Why They Smiled.
I had been to a dance the night
before and as my feet hurt me the
next day I took off my shoes and kept
my feet under my desk. I had just
started typewriting and was deeply en-
grossed in the letter that I was tran-
scribing when my boss called me into
his office where he and six other men
were holding a conference. I quickly
jumped from my chair and walked
into his office, forgetting my shoes.
I noticed that the men were trying
hard not to laugh and I finally gave
up to the fact that I did not have
my shoes on.—Chicago American.

FOREST ASSOCIATION URGES FIGHT ACTION AGAINST PINE BEETLE

Ravages of the pine beetle in forest cause greater loss than forest fires. This is shown in a report from J. P. Kinnah, secretary of Klamath-Lake (Continued Forest) Association of Klamath Falls, Ore., to the American Forestry association. Plans and figures as to the form of forest devastation were passed today before Senator McNary and Representative Simont, of Oregon who are urged to put forth every effort for the passage of relief measures now on congress.

The report from Secretary Kinnah shows that on an area of less than 800,000 acres there has been an annual loss of \$300,000 for ten years. The loss by fire was 10,000,000 feet of pine while the loss caused by the beetle reached 100,000,000 feet. Inasmuch as private timberland owners would be spending money uselessly if the United States government does not cooperate in fighting this pest on public lands adjoining private holdings, the American Forestry association is asked to direct the campaign for getting action through federal legislation.

Now is the time to start the warfare against the beetle, the association points out. From now until next March is the time to locate the infested trees. The limbs and main trunks can be cut down and burned. If 75 per cent of the infested areas can be treated, the remaining timber can be protected for several years. Investigation shows the beetle can be attracted to girdled and felled trees. As a rule two or three "trap" trees to the acre are enough to get results.

The pest is a borer and is particularly destructive to the timber in the mountains and California mountains into Washington and Oregon, and eastward into Montana. The bugs dig winding egg galleries in the bark and the result is a stripped and dead tree.

Railroad officials and chambers of commerce throughout the infested section are urging action on the McNary-Simont measure.

DES MOINES MOTOR BUS SERVICE TO BE CONTINUED

DES MOINES, Iowa, (AP)—Members of the Des Moines Motor Bus association have announced that they intend to continue bus operation in competition with street car service which is expected to be resumed soon, after having been suspended since August 2.

Under terms of the proposed new franchise which will come up for final action by the city council next Monday, buses would not be permitted to operate in competition with street cars on streets traversed by car lines.

The First Group Photograph of the Sons of the Japanese Mikado

One of the most interesting photographs received from Japan is this exclusive one showing for the first time the four sons of the Mikado of Japan. Aside from the interesting fact that it is the first photo showing the four princes together, it is the first time the Crown Prince Hirohito (left) has been seen in Japan wearing European clothes. The picture has the official release of the Department of the Imperial Household of the Imperial Court of Tokyo. From left to right: Crown Prince Hirohito, Prince Sumiko-miya, the six-year-old son of the emperor; Prince Takamatu-no-miya, the six-year-old son of the emperor, and Prince Atsuhiko-miya, the nineteen-year-old son of the emperor.

PUNGENT HORSE RADISH FAILS TO STOP PESTS

Insects Attack Even Tear-Starting Root Making Prey of the Plant

Even the pungent and tear-starting qualities of horse-radish are not sufficient to discourage insect enemies. In addition to two other specific and two incidental pests preying upon the plant, entomologists of the United States department of agriculture report a third specific enemy, known as the European horse-radish webworm and another in a bulletin of the department bulletin No. 966, just issued.

The caterpillar which, does the most destruction, is of medium size and is also known as the purple-backed webworm, as well as by its regular name, while favoring horse-radish, it is also known to attack turnips and cabbage, and after feeding on the lower surface of the leaves sometimes webs them together near the ground. When abundant, it attacks the stalks even down to the roots. It was first discovered in Virginia in a bulletin of the United States department of agriculture, in 1910, and occasional attacks have been noted in Massachusetts, New York, New Jersey and Wisconsin. The moth of the species is rather a bright orange yellow, with a wing spread of about one inch, prothorax spotted. The eggs are deposited in compact masses containing, from half a dozen to a score. They are a little brighter green than the leaf, and each egg is surrounded by an irregular ring of yellow spots. At least two generations a year are produced in Virginia.

The webworm may be controlled by spraying with a hand-pumped horse-radish, and more readily on other weeds by fall and spring plowing and frequent cultivation.

STATES PROTEST AGAINST BOOK ISLAND VALUATION

WASHINGTON, D. C. (AP)—Protestants against the interstate commerce commission valuation assigned to the "Whites, Rock Island and Pacific" are filed Tuesday in behalf of the states of Nebraska and Iowa. The railroad itself formally complained yesterday to the interstate commerce commission that the tentative valuation set for it was too low while the railroad commissions of the two states named asserted that it was on the contrary too high.

Peepers is Again Plying Nervious Nocturnal Custom

Residents on Shoshone Street North Report Window Watcher at Work

"Peeping Tom," who appears to have been absent from the city some months, has reappeared, according to police authorities. These are watching for the culprit, police say, who has been carrying on his nefarious vocation nightly for a week or so in the vicinity of Shoshone street north and Tenth streets. The police were called last night but he was observed peeping into a residence on the east side of Shoshone between Ninth and Tenth avenues. The police were called but "Tom" had disappeared. Watch was kept in intermittently throughout the night, but nothing further was seen of the peeper until about 5 this morning, when he was again seen. The peeper was called to see again. The visitor eluded capture.

USE ROCKS TO BREAK INTO OAKS WAREHOUSE

Tramps Believed to be Responsible for Burglary on South Side

Employing rocks as principal weapons nocturnal visitors made forcible entrance to the Oaks & company warehouse, Fifth avenue south and Second avenue east, last night. The rocks were used to break out a window sash. The visitors carried off a small quantity of canned goods, such as marinated and vegetables. To be criticized is the theory that the robbers were persons passing through on the night freight.
