# SOCIAL YOKE IS GROWING LESS

### Buying and Selling of Women is Gradually Giving Way to Enlightened Teachings

HAIFA, Palestine, (AP) — The movement for the emancipation of the women of Palestine from their social yoke has just received a new impetus by an exhibition of women's handicraft held here, with results far greater than any hoped for by its most ardent supporters.

The idea of woman in industry is a new one in this land. Before the great war woman was considered a burden. Her place was the hill-like home from confinement of which she would dare leave only by special permission from her lord and master, the husband. This was especially true among the Mohammedans who believed that woman had neither brains nor soul and must be treated as a chattel. The fact that she was sought as a maid instead of being married for love added great strength to this belief.

Many Changes Are Made. Today all this is changing. Women are not only demanding but also receiving equal rights in the home. To the utter consternation of men, they have thrown to the winds custom and tradition and have attacked upon fields untended a few years ago. They have definitely entered industry and are as a result relieved in part of the economic dependence which kept them subjugated for centuries.

The exhibition which was the first of its kind in Palestine was opened by the high commissioner, Sir Herbert Samuel. In the course of his speech he praised the women of Palestine for the part they are playing in the upbuilding of the country.

The exhibits which were all hand-made, consisted chiefly of pottery, lace and embroidery. Basket making was perhaps the most interesting of all articles on display.

It is believed that with proper advertising, markets could be found and a great demand created for some of the things which the country women in Palestine are capable of making.

## FIRST RUN MOONSHINE MOSTLY RANK POISON

### Federal Prohibition Agent Sounds General Warning Against Home Distilled Liquor

LOUISVILLE, (AP) — "The face on the barroom floor," should be a skull with crossbones under it, these days," declared George H. Billisco, federal prohibition agent.

"Death lurks in white corn liquor," he says. "It all contains fuel oil, one of the most deadly poisons. First-run moonshine is 'rank poison' yet the moonshiner who makes the stuff—'first whops'—is called by the legitimate distiller, 'doom' trouble himself to distill it again, but sells it as it is for drinking purposes."

Double distillation and aging in charred barrels for at least four years is necessary to remove the fuel oil, Mr. Billisco says.

"No moonshine I have ever seen in my experience as a prohibition enforcement officer has been aged. The bootleggers' motto seems to be 'the speed ahead' and never 'safety first.'"

## COBLENZ AGAIN OPEN

## Freckled Pink Shoulders Win Verdict for Girl Against Beauty Parlor

Miss Orace Naughton owned a pair of freckled, pink shoulders, and a beauty doctor said that she could remove the freckles and tried to. The beauty doctor failed, so Miss Naughton brought suit in the San Francisco court of San Francisco for the recovery of the amount of money she paid, alleging that the freckles stayed put. The judge took a note at the discovery of the freckles and marked them "Exhibits A and B" and rendered a verdict in favor of the plaintiff. The exhibits are modestly shown here, but a safety pin, which prevents a too curious gaze.

## \$200,000 Is Her Bid for Spurned Love

CHICAGO — Charging breach of promise, Miss Mary Lygo, former Police beauty, has filed suit against Gordon C. Thorne, millionaire of this city for \$200,000. She seeks a similar amount from his mother, Mrs. William Camp, whom she charges with snatching Miss Lygo, just from the hospital after her second attempt at suicide for love of Thorne, based the suit on Thorne's statement that he will not wed her out of respect for the wishes of his mother. Under the Illinois laws he would be unable to marry any one until next June, a year from the time he was divorced by Mrs. Virginia Miller Thorne, society beauty. In her suit against Mrs. Camp she charges she was called "vampire" and accused of "drugging Thorne down, down, down." Miss Lygo's association with Thorne became known last spring, when she eluded her wrists with a razor on learning that he had a dinner engagement with another girl. Shortly afterwards he was divorced and charged with drunkenness. He is now in Florida.

## FIRST ENGLISH CHURCH SERVICE IN AMERICA HELD IN CALIFORNIA

### Interesting Story of Religious Significance is Disclosed by Newberry Library of Chicago in Account of Visit of Sir Francis Drake to America in 1579

CHICAGO, (AP)—First church services in English in what is now the United States were held in San Francisco in 1579 by Sir Francis Drake on the trip an Englishman made around the world, according to the Newberry Library here.

Drake returned to Plymouth, his home city and starting point, in September of 1580, just 40 years to the month before the Pilgrim Fathers sailed from there, and five years before Sir Walter Raleigh's first body of settlers put out.

Drake was a fighting Puritan, leading the British fleet later in the crucial hours against the Spanish Armada, and this first American church service in the English tongue was directed by the Puritan chaplain to the expedition.

After a terrific struggle to get around the end of South America, Drake had plundered the Spaniards up the west coast unaware of danger, and continuing north had passed shores yet unknown to Spain. Turned back by the cold as he began to approach California, he put into a small creek of bay on the northern side of the Golden Gate before striking out across the uncharted Pacific.

It was on June 17, 1579, that Drake anchored on the California coast. He landed his men on the 21st, and on the 23rd, after the friendly Indians had lacerated themselves to pay the white man homage, Francis Fletcher, the chaplain records:

General Orders Prayers  
"This laudible sacrifice (against our will) being thus performed, our General, with his company, in the presence of the natives, fell in prayer; and by signs in lifting up our eyes and hands to heaven, signified to them that that God whom we did serve, and whom they ought to worship, was above, beseeching God, if it were His good pleasure, to open by some means their blinded eyes, that they might in due time be called to the knowledge of Him, the true and ever living God, and of Jesus Christ whom He hath sent, the saviour of the Gentiles."

In the time of which prayers, singing of Psalms, and reading of certain chapters in the Bible, they were very attentively; and observing the end of every pause, with one voice all cried, oh, sweetly rejoicing in our consciences. Yes, they took such pleasure in our singing of Psalms, that whenever they resorted to us, their first request was commonly this, Grant, by which they intreated that we would sing."

Drake tarried just a month, setting sail on July 23, after naming the country New Albion. The year after—the following May—dropped anchor again at Plymouth, he was elected mayor of the city, and served 340 years ago.

## AMERICAN UNIVERSITIES FACE SERIOUS PROBLEM

### Limitation in Size of Undergraduate Body Must Be Settled Somewhat

MIDDLETOWN, Conn., (AP) — The limitation of the size of the undergraduate body, the problem of which was unique in collegiate circles when Wesleyan University set herself to solving it six years ago, has today become common to many colleges and universities.

When Dr. William Arnold Shanklin was installed president of Wesleyan 12 years ago, he stated that the college would hold its enrollment as nearly as possible to 500 men; that she did not claim to teach things to all men, but that her task was to teach the essential things to a small group of students and well prepared students. Three years ago, Wesleyan's enrollment suddenly jumped from 500 to 600 men. At that time the president and the faculty requested the trustees to impose the 500 limit. This was done, and the size of the student body has been steadily reduced to near this number.

Can Have Too Many. "It is desirable that a college should have as many students as its physical facilities and its instructional staff can properly care for. Beyond that point more students are a liability and not an asset," said Dr. Shanklin. "We are resolved not to yield to the craze for numbers. Wesleyan does not want more students, but desires to do work unequalled for those whom she does admit." Only 181 freshmen were admitted last fall, and these were carefully selected from more than three times as many applicants. With 525 undergraduates and 55 faculty members at present, there is a faculty adviser for every group of 10 students.

PAR REACHING PLOT REVEALED. STOCKHOLM, (AP) — Swedish newspapers assert that a plot has been revealed to ship into Russia 500,000 army rifles, alleged to have been sold to the soviet authorities through Swedish intermediaries. The rifles are said to have come originally from Germany and are believed to have been held in storage in Denmark for some time.

White stains on hardwood. A mixture of salt and olive oil will remove white stains from hardwood which are caused by hot dishes. The dry spot is covered thickly with salt, and then as much olive oil is poured over as the grains will take up. This stands over night, and in the morning the discoloration should be briskly rubbed with the mixture, which is then wiped off. If there is still a trace of stain, the application is repeated, until the stain is gone.

## ANTS AND GRASSHOPPERS HOLD UP TRAIN SERVICE

### South Australia Suffers From Visitations of Plagues of Insects

SYDNEY, N. S. W., (AP) — A plague of grasshoppers and ants has descended upon southern Australia, holding up train service and making miserable for inhabitants and laying waste gardens and fields of wheat, oats and other grain, according to information reaching here.

Several freight trains on the Rockburn line were held up several hours by myriads of grasshoppers on the rails which prevent the driving wheels from obtaining traction. Later passenger trains were delayed by the enormous number of ants on the rails.

Women Occupied Whole Train. The first train wholly occupied by women in the history of railroad travel was that chartered by a Massachusetts delegation to attend the women's congress held in Chicago at the time of the World's fair in that city.

# AGENTS REPLACE BRANCH OFFICES

## German Firms Would Spread Out in More Economical Manner

BERLIN. (AP) — German export firms will before the end maintain branch offices in the United States now are seeking to establish agencies with reliable houses there, to avoid the cost of opening and maintaining their own establishments. A few German firms already have succeeded in making satisfactory connections in this manner, and the Americans are accepting and forwarding orders for German goods.

While American imports in Germany are negligible, the German export trade to America is reported gradually improving, despite the fluctuating value of the mark which prevents the making of long-time contracts. The majority of the exports are bought by the Americans on a cash basis, although verbal contracts are common for future deliveries, prices however, being quoted in foreign currencies.

Virtually all German exporters now quote prices in the monies of the countries to which they sell. It is understood that the government is suggesting the use of the dollar for the checks eventually are deposited in the Reichsbank, which is the forwarding agent for the government in the payment of war indemnities, which must be made in foreign exchange.

### Not Anxious for Bias

This policy has created a peculiar attitude on the part of the German business men, whose profits often depend upon a depreciated currency in his own country. He is therefore loath to see the mark rise in value, for his net proceeds would be proportionately reduced.

In spite of wage increases and high cost of raw materials, German factories are reported to be running at full capacity for the last three months, with orders ahead which it will take weeks to fill.

### NOTED FIGURE SCUMBLES

LONDON. (AP) — Civilians and official England today mourned the death of Viscount Bryce of Dechnon, who passed away at Sidmouth yesterday. Announcement of the death of the noted statesman, author and diplomat was unexpected. "Bryce was of the least interested in his illness, and the end came suddenly."

### Graphite

Down to 1850 graphite was obtained chiefly from the Borrowdale mine in Cumberland, England. Since then a supply has been drawn from eastern Siberia, the Colorado, New York state; Buckingham, Quebec; and Bolivia. Graphite is also produced in Ceylon, and Madagascar. Artificial graphite is made by heating carbonaceous substances to a high temperature.

# POWER COMPANY RENEWS ITS VALUATION CLAIMS

## Files Supplementary Brief Supporting Its Inventory Figures

BOISE. — The Idaho Power company filed Saturday with the Idaho public utility commission a brief in support of its contention that its property should be valued for rate-making purposes at \$22,247,800, less \$4,875,000 deducted for "non-operating" property.

The new brief purports to answer the arguments of the Southern Idaho Power & Light Users' association as set forth in January 2 by Attorney J. M. Lampert, who held that \$10,000,000 is an eminently just and fair valuation. It is also supplementary to the 241 pages of brief argument filed by the power company December 1.

### Reproduction Cost Factor

Attorneys for the power company claim in the new brief that the value determined must be that of December 31, 1910, and that the price trends since that date are to be considered. They cling to the original cost figure as "evidence of present value" and insist that the cost of reconstructing the property is not a determining factor in arriving at the proper valuation.

### Property Desired New

Failure to set up depreciation charges against its property is explained away by the power company with the argument that the property is in 100 per cent service condition and that there is no evidence of neglect, wastefulness, poor service or inefficiency. It is to be treated as if it were a new property, the opinion of the company's attorney.

### Where Contentment Centers

This is understood by interested attorneys to determine the real clash in the valuation case, the power company holding to its own figures on the number of dollars actually put into the business merged into the Idaho Power company, the plaintiffs declaring that a large part of the money they count should be charged off as "lost in over-optimistic positions", and "counterfeit" companies. They hold that the only dollar on which the people are forever to pay "returns to the company must be "an earning dollar" and a dollar "invested in used and useful property" only.

### Alignment

When William Butler Yeats was a boy, his family moved from Dublin to Bedford Park, as he relates in the Dial. Yeats says incidentally that he was not much of a churchgoer, but that he must have gone a few times because he remembers very clearly a wooden sign which hung in the church porch. The congregation are requested to kneel during prayers; the kneelers are afterwards to be hung upon pegs provided for the purpose.

# GUERRILLA TYPE WAR POPULAR

## Bolshevik Troops and Insurgents Battle After Style of Hunter Chasing Game

HELSINGFORS, Finland. (AP)—Only the use of rifles and machine guns distinguishes the warfare now in progress between bolshevik troops and Karelian insurgents in the Arctic forests of Russian Karelia from the principal stalking and hunting that the wild things of the northland have waged against each other in this frozen land for wages. (Karelia is a section of northwest Russia bordering on the White sea and extending into southeastern Finland.)

The Karelians, hunters, fishermen and trappers from childhood, know the forest trails as well as the wolves, who here outnumber the human. Fur-clad like Eskimos, wearing snowshoes or skis, they dash through the frozen land and in the long Arctic nights pounce upon their similarly clad bolshevik foes.

Reports of this guerrilla warfare which have recently reached Helsinki, Finland, indicate that in many instances "no quarter" has been the rule on both sides.

The insurgents accuse the bolsheviks—who in this case are also Karelians, but Red army men—of stripping their prisoners naked and dropping them alive, through holes chopped in the ice of the lakes which dot the forests. They freeze to death even before they are shot, for some days the cold has been so intense that to expose a bare hand to the frigid air meant a frozen hand in a few minutes. The bolsheviks present similar charges against the insurgents.

The Karelian revolt began late in October but the Russian soviet did not begin active operations until the Karelians until the latter part of December.

The territory actually occupied by the bolsheviks extends only about 10,000 square miles of sparsely settled forest wilderness, with a total population of only about 40,000 persons. Holding little, however, are distant snow-covered hundreds of miles from the occupied territory to the Murmansk railway, which runs from Murmansk to Petrograd, and have blown up several bridges, thus preventing movement of bolshevik reinforcements.

When these bridges are repaired, the bolshevik content it will be a simple, though long task to quash the revolt. The absolute lack of railroads and severely of useable highways will prevent movement of any large body of troops into the forests in which most of the insurgents are as much at home as the foxes and wolves.

### Tunnel That Helped to Dig Itself

In the Shilput tunnel under the Alps, which is by far the greatest tunnel in the world, the quantity of water flowing out of the southern end, from the many veins encountered in the heart of the mountain, amounted to 12,000 gallons a minute, and furnished sufficient power to compress the air by which the drills were worked, and to refrigerate the tunnel. The necessity for refrigeration was judged from the fact that the heat in the deeper parts of the tunnel rose as high as 150 degrees Fahrenheit when not artificially reduced.

### Simple Wireless Messages

The waves of wireless stations are unceasingly passing through our houses and our bodies and we neither see, hear nor feel them. Yet if there be interposed a few strands of wire, a metal plate and a tiny glow lamp, and if these accessories be ranged in order, the wireless messengers will carry the sound of a voice speaking thousands of miles away.—Brooklyn Express

# IF KIDNEYS ACT BAD TAKE SALTS

## Says Doc'or in Slim You Have Been Eating Too Much Meat

When you wake up with backache and don't misery in the kidney region, generally means you have been eating too much meat, says a well-known authority. Meat forms uric acid which overloads the kidneys in their effort to filter it from the blood and they become sort of paralyzed and clogged. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels, by eating all the body's urinous waste, else you have backache, sick headache, dizzy spells, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediments, channels often get sore, water seals and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys will then act fine. This famous salt is made from the acid grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys, also to neutralize acids in the urine so no longer irritates, thus ending bladder weakness.

Jad Salts is a life saver for regular salt eaters. It is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink—adv.

## You know "It's toasted." But do you know why?

### LUCKY STRIKE is the toasted cigarette. Lucky Strike is the toasted pipe tobacco. And because Lucky Strike is toasted it preserves the Burley flavor for you until you smoke it.

The exact reason for this is interesting. You see, when Lucky Strike is toasted the heat closes the pores in the Burley leaves, and literally seals in the Burley flavor. It stays there for months—years—until it is released by burning in your pipe or cigarette.

Or take the method of the bee. You can put a honey-comb away for months or years and the flavor is always there—inside. This is because the bee puts a thin coating of wax over the honey and seals it in, so it lasts forever.

The same with Lucky Strike. Toasting the tobacco seals in the delicious Burley flavor. It's there today, tomorrow, and forever after—to stay!

Whether you are a cigarette smoker or a pipe smoker you should get acquainted with the special and lasting flavor of toasted Burley tobacco—to be found only in the Lucky Strike brand. Buy a package and you will notice this improved taste immediately.

# HEAD LETTUCE MEETING TOPIC

## Prospective Growers Act on Advice and Reduce Area to be Devoted to Crop

Thirty prospective growers of head lettuce signified their intention each to grow next season an average of one acre of lettuce at a meeting Saturday afternoon in the room at the hotel. The prospective growers expressed the purpose to undertake.

Effect of the discussion at this meeting was to reduce rather than to increase the prospective acreage to be devoted to the crop by each grower. Principle speakers were J. E. Broad, county agent and A. I. O'Reilly, county leader of vocational clubs, who recently attended the district school at Caldwell for instruction in methods of head lettuce culture.

"We are giving you all of the 'dopes' on growing head lettuce," said Caldwell to get, and "of that it," Mr. O'Reilly said.

The meeting was held at the hotel, the desirability of attempting to grow a great acreage of the crop the first season.

The beginning should understand that by entering upon a gamble with the chances for less almost equal with those for large profits, and be content with the results of the first year if it yields more than a profit. The prospective lettuce growers were told that the man who "hired up" and expects to make a fortune in one year by growing lettuce acreage is likely to make a mistake that is likely to lead to disappointment, they were further advised.

The County-wide Session.

The meeting Saturday was preliminary to a county-wide meeting for discussion of the subject to be held here under auspices of the farm bureau recently on February 4. At that time it is expected E. H. Bennett, field horticulturist for the state university extension department and an expert in lettuce culture, will be present to address the prospective growers.

The meeting Saturday authorized the appointment of a committee of five members to take up the subject of the installation of head lettuce culture in Twin Falls county and in particular to pass upon contracts presented to growers by buyers of the crop.

The county agents, who are club leaders are to act as two of the members of this committee, the others being appointed from among prospective growers by the farm bureau.

## NEW WATERWAY WOULD PROVIDE BIGGER MARKET

(Continued from Page One)

It meant a slight digression to assert the present conditions in the agricultural territory in that it would be regarded as primarily the concern of either a section or a bloc.

Secretary Wallace who declared the conference had been called to consider the present agricultural depression and the necessity of a permanent policy for the building of a sustaining agriculture.

At the close of his address, he announced that the tentative action of Minnesota, chairman of the joint congressional inquiry commission, would act as permanent chairman of the conference, and Dr. H. C. Taylor, chief of the bureau of markets and crop estimates, as executive secretary.

Three fields of effort.

Secretary Wallace told the delegates that constructive action should be made in three fields which he outlined as follows:

"First, what may be done properly through legislative action."

"Second, what may be done through administrative and educational efforts, national and state, by the various agencies charged with the duty of fostering agriculture."

"Third, what may be and should be done by the farmers themselves individually, and through their organizations."

## TODAY'S MARKETS

### SPECULATIVE ISSUES SHOW MODERATE RALLY

Foreign Exchange Lower and Oils and Metals Ranges—Selling Comparatively Light

NEW YORK, (AP)—Speculative issues rallied moderately at the opening of today's stock market. Steels and equipments manifested some relaxation from late Saturday's selling pressure. Gulf States, Republic, Michigan and United States steels rose large fractions. Bug, air, copper and rails also improved, but oils and motors were lower. Foreign exchanges were irregular, although London's markets were firm on the successful underwriting of new eastern European loans.

Gulf States Steel rallied sharply after, as did also Republic, Michigan and Coke, but oils, equipments and tobacco were lower. The closing was irregular. Liberty bonds eased and railroad bonds were featureless.

Standard stocks again yielded to the speculative issues today. The independent steels resumed last week's erratic movements, recording wild fluctuations. Sales approximately 650,000 shares.

Liberty Bonds. NEW YORK, (AP)—Liberty bonds closed: 1-2's \$96.00; first 4's \$97.30; second 4's \$98.30; first 4's 1-4's \$97.80; fourth 4's \$97.25; Victory 3-4's \$100.15; Victory 4's \$100.15.

Chicago Grain. CHICAGO, (AP)—Cold weather tended to hold wheat prices upward today because of lack of open protection in the southwest. Commission houses were the chief buyers. Some of them took the position that all depressing factors in the market had been discounted. The opening quotations, which were from unchanged figures to 3-8 higher, with May \$1.16 to 1.16 1/4 and July \$1.03 to 1.03 1/4, were followed by moderate gains all around.

Announcement of 2,750,000 increase in the United States visible supply was a bullish influence, but profit-taking sales led to a further rise in prices during the last hour. The close was unsettled, 1-8 to 1-4 net lower, with May \$1.15 3/4 to \$1.15 3/4 and July \$1.02 to \$1.02 1/4.

Liberal receipts would 'earn more' relatively easy. After opening at 1-4 off the advance, May \$1.12 to \$1.12 1/4, the market kept to the initial range.

Exporters were after corn here. The close was weak at a shade to 1-8 to 1-4 net decline, May \$1.12 to \$1.12 1/4. Corn futures starting unchanged to 1-4 higher, May \$1.14 to \$1.14 1/4, and then closed a slight general advance.

Higher quotations on hogs gave livestock a decided lift. Call. Wheat—No. 3 Red \$1.27; No. 1 hard \$1.18 1/2.

Corn No. 2 mixed 49 3/4 to 49 1/2; No. 2 yellow 49 1/2 to 50; No. 2 white 37 1/2 to 38 1/2; No. 3 white 34 1/2 to 36.

Rye No. 2, 83 1/2 to 84; Rye No. 3, 75 to 76; Timothy 35 to 37; Clover seed \$12.50 to 22; Pork nominal.

OMAHA, Neb., (AP)—Hogs—Receipts 1,500; active, 25 to 40c higher; bulk 180 to 210 pound butchers \$8.25 to 8.50; top \$9.50; 200 pound butcher \$8 to 8.25; bulk cows \$6.50 to 7.55.

Cattle — Receipts 5,000; beef steers and heifers active, mostly 15 to 25c higher; heavy heifers \$7.50; bulls and veal steady; stockers and feeders strong; spots higher.

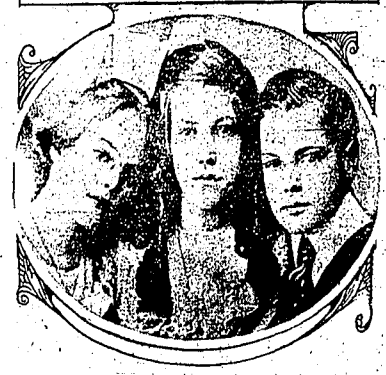

Sheep — Receipts 6,000; lambs and yearlings 15 to 25c higher; bulk lambs \$12 to 13; early top \$15; best yearlings \$11; sheep 25c higher; ewes, top \$7.50.

Chicago Livestock. CHICAGO, (AP)—Cattle — Receipts 15,000; early sales beef steers mostly 25c higher; spots up more; choice heavy top \$9.50; bulk beef steers \$7 to 8; stock and bulls 15 to 25c higher; best heavy bulks \$4.50; calves, stockers and feeders strong to higher.

Hogs—Receipts 45,000; mostly 25 to 40c higher than Saturday's average; some 100 to 200 pound hogs 50c higher; sheep buying liberally; big packers doing nothing; top \$9.50; practical top \$9; bulk \$8.25 to 8.50; pigs mostly 5c higher; bulk desirable around \$8; few \$9.10.

Sheep — Receipts 15,000; generally strong to 25c higher; fat lambs to city butchers \$13.00; packer top early

## Hero Sea Captain, Wife and Children

When the United States liner Hudson reached New York waters with six men rescued from a sinking fishing smack off St. Pierre, N. F., aboard, most everybody concentrated on interested spectators of the news at a number of courses. But when it was Mrs. A. B. Randall wife of the captain of the Hudson, Captain Randall, it will be recalled, was confined last October with charges that she had misled a party of fishermen's profit in an open shop without making any effort to pick them up. On these charges he was tried and acquitted, but only after he had been temporarily suspended. Now, on his first trip after being restored to his command, he has had the good luck to silence criticism of his conduct by heroically rescuing six men from the sinking smack and bringing them safely into port. And his faithful wife, for the life of her, can't see anything but the hand of Divine Providence in the matter. "God must have been watching out for him to give him this opportunity," she said in advancing her view. The rescue was effected on January 1. A terrific gale was raging at the time. The captain of the smack had been swept overboard and the six survivors of the crew were expecting a watery grave any hour. The rescue was accomplished by a lifeboat sent out and under great danger and difficulties. It was directed by Captain Randall in person. The photograph shows Captain Randall, with his wife and three children (from left to right)—Dorothy, Sylvia and Albert, Jr.

# ASK CHANGE IN TAX MACHINERY

## Assessors of Idaho Recommend Abolishment of State Board of Equalization

County assessors of the state, at a convention which adjourned Saturday at Boise, adopted a resolution recommending the abolishment of the state board of equalization and establishment in its place of a non-political state tax commission to be composed of three members to be elected after the manner of the election of the judiciary.

This was regarded as one of the most important actions taken by the assessors' convention, according to B. Claud Stewart, Twin Falls county assessor, who served at the conference as a member of the resolutions committee.

Mr. Stewart was among those who opposed a suggestion that resolutions that would have committed the assessors in determining property valuations for taxation purposes in 1922 to the same basis as outlined in 1921. He told the convention that he would like to have an opportunity to prove that conditions in this county warrant a reduction in valuations in several instances.

Stewart also announced a proposal for levying tax assessments against mercantile stocks on inventory lists, presented by Mr. Stewart, was adopted by the assessors.

With few exceptions, Mr. Stewart reports, bases for determining valuations of livestock will be maintained this year the same as last. He reports that between 2 and 30 per cent in the case of horses, was agreed upon. Common sheep will be valued at \$1 a head, the same as last year. The assessors' decision in this regard will be reported after Hugh Sperry, as a representative of the wool growers' association, had given it as his opinion that such valuation would be fair in view of the fact that the war finance corporation is advancing money on sheep on the basis of \$1 a head valuation.

Cattle will be assessed at \$10 each, common cattle at \$20 each, pure bred cattle at \$45 and up, and range bulls at \$100 each.

You wouldn't think of paying for a dozen oranges and accepting nine.

If you don't know what you are getting, that's exactly what may happen when you buy some brands of baking powder that used to be put up in 16 oz., or full pound cans and now come in 12 oz. or 3/4 pound cans. Of course the weight is marked on the label, but the can may look as large as usual to you.

Don't take chances—look at the can—know how many ounces of baking powder you are getting.

One safe way is to always buy Calumet. You know the large can contains 16 oz. or a full pound—that nothing has been taken from the quantity or quality.

Calumet has more than the ordinary leavening strength. You don't have to guess—you know you use less. It is pure and sure.

HEADS ELKS ASSOCIATION

O. P. Duvall, probate judge and past elected ruler of Twin Falls lodge, E. F. O. R., who was Saturday at Pocatello, elected president of a fraternal organization for Idaho.

IMPORTANT DEAL IS MADE IN TWIN FALLS PROPERTY

Building on Shoshone Street Changes Hands; Anderson Buys Reed Residence

The first big real estate transaction of the present year, and one of the most important in the city, was consummated last Wednesday when the L. C. Smith property on Shoshone street, now occupied by the Gem hotel, was purchased by William G. Reed, a contributor of \$10,000.

The former Reed residence on Blue Jacks boulevard, previously known for years as the Hedder place, consisting of two acres of ground and one of the handiest and best equipped suburban homes here has been purchased by A. R. Anderson of the New Oregonian building.

The theater building sale will make no difference in the occupancy at this time. In both leads the Irrigated Land company acted as agents.

APPROVE BRIDGE CONTRACT

A contract with John McConnell for construction of a bridge across the main canal east of Hansen, was approved by commissioners of the Twin Falls city water district at their meeting Saturday afternoon.

JUDGE DUVAL IS HIGHLY HONORED

Local Man Elected to Position of President of Elk Bodies of State of Idaho

O. P. Duvall, probate judge and past elected ruler of Twin Falls lodge of Elks, was Saturday at a convocation of delegates from several Elks lodges throughout the state, elected president of a permanent organization of Elks lodges of Idaho, effected at that time.

Judge Duvall was chosen temporary president of the temporary organization when it met at a meeting in Boise last fall. Other officers of the association elected at the Pocatello convention are Harry Fox, Pocatello, secretary and treasurer; E. H. Dewey, Nampa, first vice-president; Herman Taylor, Sandpoint, second vice-president; J. V. Hawkins, Coeur d'Alene, third vice-president; P. W. Williams, Idaho Falls, sergeant at arms.

The constitution and by-laws adopted for the association provide that its executive committee shall be composed of the elected rulers of all of the Elks lodges of the state.

Boise was chosen as the meeting place of the association when it convenes next on June 14 and 15.

Many Lodges Represented. The convention at Pocatello was attended by about 40 delegates from southern Idaho lodges. Northern Idaho lodges had previously expressed their purpose to join in the association but were not represented at this session.

A meeting of exalted rulers of the southern Idaho lodges convened by C. C. Stewart, Boise, district deputy grand master, was held at Pocatello Saturday for consideration of plans for a membership drive to be held in the vicinity.

Twin Falls lodge was represented at the Pocatello meetings by Judge Duvall, H. R. Grant, orated ruler, and C. G. Higgins, chairman of the membership committee.

ASKS TO BE HEARD ON CURTAILMENT OF TRAINS

Southern Idaho Traffic Association Interposes Objection to Proposal.

Protesting against the reported purpose of the Oregon Short Line to ask permission to curtail passenger train service on some branch lines including the Rupert-Bliss cutoff and the Twin Falls-Hollister branch, Secretary Leonard Wray, for the Southern Idaho Traffic association, today addressed a letter to the state public utilities commission asking that the association be heard when the proposed application of the railway company is presented to the commission.

Weighing Without Scale. The reappraisalment of the load is shown in their "method of weighing without scales." To weigh a pig, said an highwayman the other day, "all ye have to do is to lay a plank across a sawhorse, place a big wedge in one end of the plank and the pig on the other, then shift the plank until the two things balance." Then ye guess the weight of the stone and ye have the weight of the pig.—Boston Transcript.

COMMISSION PLAN IS STILL ACTIVE FACTOR

Refusal of Mayor to Call Election Not Regarded as End of Efforts of Backers

Indications that proponents of the commission form of government are continuing in their endeavor to secure its adoption for Twin Falls, following the refusal of Mayor J. W. McManahan to call an election for submission of the question, was evidenced today in the presence of Harry C. Alexander with a stenographer at the city office for the purpose of making a copy of the list of signers of a petition for adoption of the commission form of city administration filed January 9 by E. W. Walton.

The mayor's refusal to call the election (which) was based upon assertion that the petition filed by Walton was insufficient. Subsequently a petition asking that an election be called for submission of the question of adoption of the commission plan of municipal government was filed by W. S. Simpson for the former service men's campaign committee in the last city election.
