

BUSINESS MAN GIVES ADVICE ON LONG LIFE

Albert M. Johnson, Life Insurance Head, Tells Scouts to Marry Early, Refrain from Dancing

CHICAGO, July 16 (AP)—One who desires to live 100 years should marry early, refrain from indoor dancing, should not get into college and be neither rich nor poor, according to an address made here by Albert M. Johnson, president of the National Life Insurance company, before several hundred Boy Scouts. Mr. Johnson said these maxims were reached by his company following statistical computation of results from a survey of longevity under modern conditions.

The long list of "Don'ts" which Mr. Johnson said the survey suggested in order to attain this age contained a few "do's" chief among which was "religion in a true way." Mild exercise daily and a "straight neck" in walking, were others.

Our statistics show, when compiled and averaged, that to reach five score years one should marry early, be neither rich nor poor, should not be a professional or college athlete or an actor, should refrain from indoor dancing and never drink intoxicating liquors, Mr. Johnson said.

"Be Religious." "Be religious in a true way. Religious people are happier as a rule and going to church tends to make them regular in their habits. Do not drink until you are beyond 21 years of age. One of the most emphatic results of our survey was the evidence that religious observance cannot be indulged in temporarily by enough people to give you much of a chance to win.

"Stretch your neck up. Short-necked people are better subjects of surgery. Stretching your neck gives the blood vessels there less chance to clog. Take mild exercise daily, regularly, and not intermittently or sparingly."

HEAVY VOTE IS CAST IN U. S. SENATOR CONTEST

Leaders of Farmer-Labor Party Renew Claims for Success in Special Election in Minnesota

ST. PAUL, July 16 (AP)—Magnus Johnson, farmer-laborite, and avowed follower of Robert M. La Follette, took a slight lead in the special United States senatorial election in Minnesota, leading Governor J. A. O. Pines, republican, a Harding supporter, in the first 50 precincts to report.

These 50 precincts, more than half from Ramsey county (St. Paul), gave Johnson 3709, Pines 334, and James A. Carter, republican, 64.

The first 14 rural precincts were unitarily for Johnson.

ST. PAUL, July 16 (AP)—With interest greatly increased in the last few days of the campaign, it was indicated tonight before the polls closed at 9 p. m., possibly more than 500,000 votes were cast today in Minnesota's special United States senatorial election.

The apathy that marked the June 18 primary, when only 300,000 persons voted, has been dispelled to a large extent today.

That the volume of votes cast today would exceed the primary vote was indicated in reports from nearly every one of the 87 counties, which declared the vote would run from 50 to 90 per cent of normal. There are 800,000 eligible voters in the state.

ATTORNEY DENIES CHARGE

Banton Makes Reply to Charge of Anti-Saloon League Official Under Grand Jury Investigation

NEW YORK, July 16 (AP)—District Attorney Banton today flatly denied charges made by William Anderson, state superintendent of the Anti-Saloon league of New York, that the district attorney had promised to "put Anderson out of business," declaring that such a step would "make me go home."

Mr. Anderson, who is now under grand jury investigation on charges of grand larceny, forgery and extortion, appealed to Governor Smith for an opportunity to submit proof of his charges at a hearing conducted by the attorney-general or some other official.

Mr. Banton, in denying the charges, declared it Mr. Anderson's duty to lay all the facts before the governor. "The governor should remove me if it is true," he said. "But he won't. You can't get Anderson under oath at any time."

Mr. Banton declared he had absolutely no ambition to be governor and asserted that present indications were that he had enough of public office.

Summer's Dresses Rival the Accordion in Pleats

1880 fashion does come as a shock. Protrusions of bow or drapery in the middle of the back for so long been a comic paper synonym of complete antiquity in modishness that it is a little difficult to think of putting your spring savings into a dress that seems the revivification of those ancient yet not yet historical styles.

The answer is though, that they are appearing in the best shops and on the smartest people, and that they become more charming as the year becomes accustomed to the new lines. 1880 seems to take the fancy of the public just now, but of course there can be no guarantee of how permanent a development it will be.

The pictured dress from the atelier of Henri Creange is, like many of the current evening dresses much lower in the back than in the front. In fact the front seems trying to make up in sterness for the intense frivolity of the back. It is cut quite high and falls in a straight, unbroken line until it is met by the circular ruffle which is drawn up in the back until it disappears under the frilly bow. The gay spirit of the back is further emphasized by a plaited underskirt of crepe, a vestee and a cascade of the same which gives an accordion like effect in walking. The frock itself is of the dominant Fallie motif in a salmon pink. The buckle is bound with silver ribbon to match the head dress.

BRITAIN PLANS WAR MACHINES

Lay Keels for Rigid Airships to Carry Bomb Dropping Planes Aloft

LONDON, July 14 (AP)—Keels are now being laid in Great Britain for huge rigid airships which will hover aloft the clouds with a number of small fighting machines on board ready to launch at a foe, says an aeronautical expert in the London Daily Chronicle. The task of these machines in war, he says, will be to carry aloft to immense heights and to transport, if necessary, thousands of miles, squadrons of swift, deadly, steel-built "attack planes." These will be launched from high above the clouds, and will rush at 200 miles an hour and more earthward to harry other aircraft and raid the commerce of the sea.

"The airships will have the power, lacking in a small machine," the writer says, "of long-distance flights at a great altitude, while, on the other hand, the small planes they carry will be able to outfly and out-journey."

Use Diving Tactics "In the case of specially-organized fight any machine laden for a long flight by these formidable airships, the tactics of the craft sent darting down from airships will be to dive pell-mell on their surface-launched opponents, and strike them deadly blows before they can gain the vantage-point of altitude.

"Height in air-warfare is the key to victory, and these airship-carrier fighters will have the advantage of being in a position to choose their own moment for a swoop upon enemy craft climbing from the earth."

The Chronicle's contributor says that France, Italy and the United States all show a growing recognition of the importance of fighting-planes. The United States already has laid the keel of an airship which will launch single-seater fighters and pick them up again while the mothercraft is traveling at full speed. The first American "flying-aerodrome," he adds, will be ready to take the air this summer. It will carry as a normal load twelve fighters of the latest type.

Transport Air Craft Great Britain has completed the first seagoing vessel in the world designed specially for the transport of aircraft. She has a displacement of 10,000 tons and carries seven 6-inch guns, four 4-inch, and a number of smaller guns. Besides torpedo armament, the new vessel is fitted with two tons of gasoline. It is fitted with twenty airplanes, which will be raised to the taking-off decks by means of electric elevators.

Another advance in aerial efficiency is the contract placed by the British ministry, of huge seaplanes with a speed of 125 miles an hour.

One of the late types has a wing span of 112 feet and carries nearly two tons of gasoline. It is fitted with twin Concor engines of 1,300 horsepower each, driving twin propellers.

A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their efficacy," writes Mrs. William Volmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good.—adv.

NEW ALPHABET IS SOUGHT

Advances Made in Development of Radio Give Rise to Belief That New Universal Code is Necessary

NEW YORK, July 16 (AP)—The establishment of a universal telegraphic alphabet is urged in a statement issued today by the Engineering Foundation. Radio engineering is leading the peoples of the earth toward a common language, the foundation continues. Methods to simplify and expedite the electrical transmission of messages should be evolved through national legislation and international conferences. Science and commerce will not hesitate; it is a task ready to perform its function the foundation says.

"There are great losses in the northern Atlantic," the statement continues. "Crowding automobiles in city streets have necessitated traffic lanes. Aviation is establishing lanes in the air. Abolishing of lanes in the ether has become urgent."

"The new continuous wave system designed by General Spitzer," the foundation states, "has been applied to radio telegraphy. Variation for dots, dashes and spaces are reduced to the minimum on the theory that the least practicable change in the fundamental wave should be made. For easier reading the waves have been made square topped."

National legislation and international conferences are now in order," the foundation declares in conclusion, "to put into use those methods of relief to establish this simple universal alphabet. Radio engineering is leading the peoples of the earth toward a common language, a mutual understanding."

NEOKITIS NOT A PART OF PREMIER'S WARDROBE

WARSAW, July 14 (AP)—Premier Witos of Poland never wears a necktie. This, it is said, is in order to accentuate his peasant origin, although his suits are cut by the best tailor in Poland.

A Warsaw newspaper recently opened a subscription to buy a tie for Mr. Witos. In a few days the fund collected amounted to 1,700,000 marks. Mr. Witos would not accept the money, however, and at his request it was handed over to the Red Cross society as a donation to be known as "The Necktie of M. Witos."

ELVEN-YEAR-OLD GIRL WINS DIVING HONORS

DEL MONTE, Cal., July 14 (AP)—Berate Phelan, 11-year-old Fresno girl, won the senior women's diving championship of the Pacific association in a meet here today. Miss Phelan, said to be the youngest girl diver in the United States, had competed with some of the best girl divers in California, including Eleanor O'Brien and Lillian Lander of Pacific City and Margaret Bernard of Alameda.

DISCOVER CHURCH THIEVES

WARSAW, July 14 (AP)—The police of Warsaw have uncovered the net work of an organization of synagogue thieves who operate throughout Poland, disposing of their religious loot in America.

More than sixty scrolls of the law have been stolen from Polish synagogues recently. Scrolls of this type being of sheep skin and hand written by trained scribes, command a high price and there is a brisk demand for them, particularly via American syndicates.

SUGAR MARKET ADVANCED

Generally Higher Prices in Both Raw and Refined Products Noted in New York Market Activities

NEW YORK, July 16 (AP)—The sugar market was much more active today with general advances noted in both raw and refined. Fully 375,000 bags of raw sugar were purchased by refiners at prices ranging from 5 1/4 to 5 1/2 for Cubana. One refiner advanced fine granulated to nine cents and all others to \$6.75 against \$6.50. At the close of the week an increased demand for refined was responsible for the buying movement. Futures were strong at 12 to 20 points net higher.

PLATINUM FROM LAKE BRIDGEPORT, Cal., July 14 (AP)—Experiments in recovering minerals held in solution in the waters of Mono lake are declared to have proven the project feasible, engineers state. Platinum, gold, radium iridium, and rhodium are recovered. One company is preparing to operate here.

BRITISH EXPORTS HEAVY

RIO DE JANEIRO, July 14 (AP)—American exports to Brazil, according to figures published by the federal department of commercial statistics, were surpassed by British shipments last year for the first time since the beginning of the world war. The total value of American exports to this country in 1922 was almost equal to that of the year before hostilities began in Europe, but less than one-quarter of the total reached in the high tide year of 1920.

The reasons for this tremendous decrease in Brazilian imports of American products, according to opinions expressed by business representatives here are the unfavorable exchange rates on Brazilian money, the relatively higher cost of doing business confronting American exporters and the general retrenchment in Brazil.

Lack of credit. Those who say they can't are the first to get canned.—Boston Transcript.

COLLEGE OF IDAHO TO RECEIVE BIG DONATION

Presbyterian School at Caldwell Promised \$100,000 if Sum of \$45,000 is Collected

POCATELLO, July 16 (AP)—The College of Idaho, a Presbyterian educational institution, located at Caldwell, will receive \$100,000 from the Rockefeller foundation if it raises the sum of \$45,000, according to information given out by R. R. McCormick, field secretary of the college.

The promise of \$100,000 by the foundation will cause an immediate campaign to be inaugurated by the friends of the college to raise the amount which the institution must match to get the gift.

Mr. McCormick outlined the pledge of the foundation and stated that its terms must be met by February 1, 1924.

Naturally, "That's my impression," said the seal, as it was pressed into the wax.

The Fisk Non-Skid Cord is the closest approach to perfection in the history of tire-making.

The proof is ready: Out of 600,000 straight side Fisk Cord Tires, size 31x4, less than 50 were returned for any reason whatsoever in the first 18 months of sale.

This is an amazing record which we believe no other tire has ever equalled.

Every Fisk Tire is a low cost mileage tire.

There's a Fisk Tire of extra value for every car, truck or speed wagon.

LOCAL PLAYERS WIN GAME FROM RAILROAD BOYS

Phil Fix Pitches Great Game and Pocatello Loses 10 to 3, Classy Plays Feature Contest

Twin Falls baseball team won its first independent ball game Sunday afternoon from Pocatello, 10 to 3. Phil Fix, catcher for the team from Twin Falls, pitched a great game of ball, and was backed by wonderful support. Phillips and Huff pitched good enough ball, and were backed by miserable support. This tells the story of Sunday's game. Errors mixed in with a few base hits sent Phillips start hurried for the railroad team, to the show in the third inning. Huff, who took his place, kept the locals away from the plate for the next few frames, although a mass of errors mixed the locals two more markers in the eighth.

The Pocatello team, usually reliable to the last degree, failed miserably Sunday afternoon at first making four errors, three of them coming from thrown balls that were right in his hands. Eight errors were charged up against the visitors, while the locals made four miscues.

Rupp, the second pitcher to try and stop Twin Falls, made six men whiff the breeze, while Fix fanned five. The locals started their bombardment in the first frame, when Edou doubled to center, after Watson and Selly had singled. These two runs gave the Twin Falls boys a lot of confidence, and then on Pocatello never had a chance.

Pocatello made a marker in their second attempt, Pettit rigging the ball after singling and being sacrificed to second, and scoring on two infield outs.

The third was the big one for the Whitel clan, five markers coming home on three hits, one triple to right by Hillman and three errors.

Everything went along nicely from then until the sixth, when the Twin Falls team took a short rest, allowing the invaders to score two runs on two hits and two errors.

Twin Falls scored one in the seventh, when Kioffner doubled, went to third on Rickard's lead, and scored to center and scored when Rickard let the ball get away from him.

The last two runs for the home team came in the eighth when Watson doubled his fourth out of the inning, and Whitel made a home run to the right field corner of the diamond.

The box score:

Pocatello:	AB	R	H	PO	A	E
Forstend, lf.	4	1	1	0	0	0
Jackson, ss.	4	1	0	1	3	2
Frost, rf.	5	2	2	1	0	0

 Score by innings:
 Pocatello: 010 002 000—3
 Hits: 010 102 031—7
 Twin Falls: 000 002 100—10
 Hits: 013 102 128—18

Summary: Earned runs—Twin Falls 2. Stolen bases—Hill (2), Pettit, Hill. Two base hits—Hill, Pettit, Kioffner. Errors: Watson, Rickard, Hill, Hillman, Ostrander, Fix 5, by Phillips 2, by Rupp 6. Base on balls—off Fix 2, off Phillips 2, off Rupp 2. Left on bases—Pocatello 10, Twin Falls 6. Double plays—Hill to Tressler (2), Passed balls—Linville 1. Balk—Fix. Umpires—L. Whitel behind the bat, Bailey on bases. Time of game—2 hours.

NOTES OF THE GAME.
 Pocatello was a little off color, but at that they have a classy organization.
 Hill at second base is a team by himself, giving a big league performance Sunday.
 Jim Selly was another infielder who showed that he is in tip top shape. Jim took care of eight chances without a blaw.
 Bruce Watson had his batting eye along, getting four hits out of five, one a two-bagger.
 Pettit led the hitting for the visitors with three out of five.
 Ostrander made a swell catch of Rickard's fly in the fifth.
 Whitel was charged with two errors, but gave a clever exhibition at the initial catch.
 Forstend made a nice catch of Kioffner's foul in the first, but he should have let it go, as a runner scored after the catch.

GIANTS SPLIT DOUBLE HEADER

Cubs Take First, While League Leaders Take Second. Dodgers Beat Pirates

NEW YORK, July 16 (AP)—The New York and Chicago Nationals divided a double header here today, the Cubs winning the first game, 7 to 4, and the Giants the second, 3 to 1. Chicago won the first game through Kaufmann's splendid pitching. Bentley pitched one of his best games since joining New York, in the second game.

BROOKLYN, July 16 (AP)—Brooklyn evaded the series with the Pirates by bunching five hits, two passes and an error off their pitchers in the third inning for seven runs, winning 8 to 4. Stelzner held the Dodgers to one hit in the last five innings. Grimes was effective, except in the second and eighth.

PHILADELPHIA, July 16 (AP)—St. Louis pounded an eleven-run victory in the second inning today, defeating Philadelphia, 13 to 7. Halnes pitched good ball.

ST. LOUIS, July 16 (AP)—St. Louis defeated Philadelphia, 13 to 7. Halnes pitched good ball.

CINCINNATI at Boston, double header postponed; rain.

UNANIMOUS.

YANKS DIVIDE WITH INDIANS

Coveleskie Comes Back with Shut Out. Blankenship's Passes Beat White Sox

CLEVELAND, July 16 (AP)—Cleveland and New York again split a double header today, Cleveland taking the first, 6 to 0, and New York the second, 11 to 7. Coveleskie, knocked from the box Sunday by the Yankees, never was in danger today. Bush, a finger on his left hand broken by a drive hit by Speaker.

MAKEMEN BEAT WHITE SOX.
CHICAGO, July 16 (AP)—Tod Blankenship's passes, coupled with an error by McGinn, enabled Philadelphia to defeat Chicago, 4 to 3 today, behind great pitching by Slim Harris.

FOUR STRAIGHT FOR BROWNS.
ST. LOUIS, July 16 (AP)—Long distance hitting enabled St. Louis to defeat Boston 4 to 1, here today. It was the Browns' fourth straight victory over the Red Sox.

ZACHARY BEHN DAUSS.
DETROIT, July 16 (AP)—Zachary got the better of Drury in a pitcher's battle today and Washington defeated Detroit, 4 to 2. Leibold's three-base hit in the fifth drove in the two runs that were the margin of the Senators' victory.

One Dollar Saved Represents Ten Dollars Earned.
 The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living his expenses for every dollar saved. That being the case he cannot be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars, outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents and a bit of it in the house often saves a doctor's bill of several dollars.—adv.

ISSUE PARDONS FOR CONVICTED NEWSPAPER MAN

Editor of New Mexico Paper Released from Serving Sentences in Jail on Criminal Labeling Charges

SANTA FE, N. M., July 16 (AP)—Governor Hinkle today issued pardons to Carl C. Magee, editor of the New Mexico State Tribune, convicted on the charges of libel and sedition.

Magee was sentenced to the penitentiary for one year to 18 months on the criminal libel charges and 360 days in the San Miguel county jail on the contempt charges.

Withheld Action.—The governor stated last Saturday he would take no action until Magee had exhausted means of redress in the courts and this action today came as a surprise.

The governor, in issuing a pardon on the sentence for alleged libel declared that the defendant had been tried, convicted, and sentenced without the knowledge or consent of the party supposed to be libeled.

Fines Remitted.—In the pardon in the contempt charges, the governor remitted the fine and costs of \$7 imposed on Magee on four citations, and also all fines imposed on the Magee Publishing company, amounting to \$200.

In the pardon in the contempt charges, the governor remitted the fine and costs of \$7 imposed on Magee on four citations, and also all fines imposed on the Magee Publishing company, amounting to \$200.

No Special Session.—Prior to the issuance of pardons for Magee, a campaign had been under way for the last two weeks urging the governor to call a special session of the legislature to sit a court of inquiry.

What the World Is Doing

AS SEEN BY POPULAR MECHANICS MAGAZINE

Sheet of Water Protects Firemen.—Ample protection is afforded the firemen of an eastern city by the adoption of an interesting type of fire-fighting equipment. The tank is mounted on a two-wheeled cart, so that it can be brought up quickly to be used against a fire at close range. The cart accommodates a fireman who sits in it, and is able to handle a powerful stream of water from a nozzle directly in front of him. The pipe mechanism on the cart behind him, which sprays a curtain of water all around him, so that a

"Safety wall" of water protects him and serves simply to prevent blisters and burns. The nozzle proper is mounted in a ball socket, so that it can be swung in any direction with great facility. It can be connected to four, even five, hoses, and throws a stream of water 125 feet into the air.

"Knock-Em-Dead" Rat Trap.—A mechanical rat killer with a heavy spring and a rotating double hammer which strikes the animal on the head and throws him from 5 to 8 feet, is the latest in traps. This device automatically resets itself for the next blow, and two safety catches prevent accidental discharges. The rat is thrown away at once and leaves no odor to scare away other

power of the expanding fluid will raise 30,000 pounds in three seconds if properly applied.

A Simple Derrick for Farms.—A handy and efficient derrick can be built in a short time from material found on nearly every farm. It consists of a derrick wagon, secured, elevated on a heavy post so as to revolve freely, and fitted with a simple which for raising the load. An iron pivot yoke is forged to the shape above, or one may be built up of flat and round iron. A hole is drilled in the post

Drills Horizontal Holes Straight.—Anyone who has ever used a brace and bit knows that in the drilling of horizontal holes there is a great tendency to raise or lower the brace a trifle while drilling, which, of course, results in the hole being drilled at an angle. To overcome this tendency, slip a large washer that is free from burrs over the bit so that it rests on the smooth shank. As soon as the bit is held at an angle the washer will travel one way or the other, and the workman can correct the fault instantly.

Bottled Fluid Can Lift Tons.—Sibbard's fluid flask has been outdone in real life by the invention of an expanding fluid easily carried in steel bottles by a child. The power may be released by a valve used with jacks or other lifting devices to raise street cars, autos, and heavy weights. It is estimated that the

top to accommodate the shank, an iron disk, a steel ball, taken from an old ball bearing, being set in the hole as shown, to make an easy-running bearing. The yoke straddles the tongue at its balancing point, a bolt being passed through a hole drilled in the center. The yoke consists of 1/2 in. pipe and fittings arranged as indicated, the winch shaft passing through holes drilled through the ends of the "handles." One end of a stout cable is securely fastened to the winch shaft, and the other end to an iron collar that is an exact fit around the bottom of the post. The collar is held in position by half-collars above and below it, screwed to the post. Hooks or clamps to suit the load are suspended from the outer end of the tongue. A rod, sliding through the ends of the handles, near the winch shaft, as indicated, is pulled out to keep the crank from revolving when it is desired to swing the load. With this arrangement it is possible for one man to operate the derrick unassisted.

HARDING MEETS

MRS. HARDING ILL

FAIRBANKS, Alaska, July 16 (AP)—Mrs. Warren G. Harding, wife of the president, has been so worn out by the awaiting hospitalization by Alaska that she has been compelled to take to bed, Mr. Harding informed an audience here just before he said his party left for Seward, Alaska.

Greeted by Mayor

"This is the greatest day in the history of Fairbanks," said Mayor Marquand, as he introduced the president to the cheering throngs of long residents. Mr. Harding declared that he was entitled to the designation because he was the first president to visit the territory.

DRYS MAY DEMAND LAWR ON SEARCH FOR LIQUOR

WASHINGTON, July 16 (AP)—If the state department fails by negotiations with foreign governments to establish the right to search rum runners twelve miles off shore, the drys will demand that Congress act by the drys to accomplish the same purpose by statute.

FEDERAL RESERVE BANK OFFICIAL TAKES LIFE

KANSAS CITY, Mo., July 16 (AP)—William A. Dally, 36, secretary to Carol A. Worthington, deputy governor of the Federal reserve bank here, shot and killed himself here today.

PRINCESS IS ARRESTED

Daughter of the Late Prince Maximilian is Held in Connection with Kapp-Putsch Affair of 1920

MUNICH, July 16 (AP)—Princess Margarete, 22, daughter of the late Prince Maximilian of Hohenzollern-Sigmaringen, is under arrest in connection with the case against Captain Ehrhardt, one of the leaders in the Kapp Putsch of 1920, who escaped last week from the Leipzig prison.

CO-OPERATE TO END WARS

CHICAGO, July 16 (AP)—There is real danger of wars unless there can be cooperation, not merely between this country and European countries, but between the countries of Europe, Mrs. Maud Wood Park, president of the National League of Women Voters, declared in the legislative committee of the league at its first meeting after her return from a "woman-to-woman" tour abroad.

SINGER'S HUSBAND SUED

NEW YORK, July 16 (AP)—Florence Samuels, husband of Avelina Galli-Curci, Metropolitan opera soprano, was sued for \$50,000 for alleged slander today by the singer's husband, who claims to have discovered Galli-Curci's vice.

COOPER'S JURY HOLDS EXPLOSION WAS ACCIDENTAL

ALTON, Ill., July 16 (AP)—A verdict of accident, holding nobody responsible for the explosion at East Alton plant of the Western Gas & Electric company, in which 12 employees were killed last Tuesday, was returned by a coroner's jury here late this evening, following an inquest held by Coroner Merrier of Madison county.

STRIKE FOR WAGE INCREASE

NEW YORK, July 16 (AP)—Eight hundred plumbers in Greater New York went on strike yesterday to obtain a standard wage scale of \$6 a day from the master plumbers and recognition of the newly formed Associated Plumbers' Helpers union of Greater New York from the journeymen plumbers. The helpers have been receiving \$2.70 to \$4.50 a day.

Forty-one German Printing Plants Work at Capacity on New Money

BERLIN, July 16 (AP)—Forty-one German printing plants, working day and night, disgorged 17,563,819,142 marks worth of fresh paper money every hour during the first week in July. The total paper currency circulation on July 7 was 20,241,782,066,000 marks, an increase of 2,950,731,010,000 over June 30. The aluminum exchange in circulation increased in the same period from 1,000,000,000 marks to 20,200,000,000.

Buyers Old Issues

A curio collector is said to be paying from five to ten times the face value of certain old 100 mark and 1,000 mark notes, declaring those printed from copper plates are the only ones acceptable abroad, as the later ones, printed from type, are refused because they are too easily counterfeited. This is in spite of the fact that the notes are being printed from type in order to increase the output of the presses. The federal printing plant alone is able to issue 14,000,000 notes daily, while only one-tenth of this quantity would be possible if copper plates were used. Furthermore, it takes six months to prepare one copper plate. Even the new notes of certain old notes which are to be issued soon would be printed from type.

Stands Has Monopoly

According to Montagu Morgen, a Berlin weekly, a publishing house which is one of the plants of Hugo Stinnes has a monopoly on the printing of currency under the control of the Reichsbank. This firm sublets contracts to some thirty other printers.

OREGON TOWN IS HIT BY SEVERE HAIL STORM

BEND, Ore., July 16 (AP)—Hail as big as golf balls, falling just before noon today, drove Bend residents to shelter and shattered globes on heavily exposed lamp post in the downtown district, as well as some windows. The storm flipped automobile tops and dented roofs. Several horses, trotting by the street, were killed. The storm lasted less than 15 minutes.

Two Sisters, Contenders for Custody of Five-Year-Old Girl, Take Differences Into Court

LOS ANGELES, July 16 (AP)—The conflicting stories of two sisters, contenders for the custody of a five-year-old girl, was an offshoot of Superior Judge Leslie Hewitt today, and arguments will begin tomorrow in the habeas corpus proceedings brought by one of them, Mrs. Lois Pollan of Savannah, Ga., in an effort to obtain possession of the child from the other, Mrs. Elsie Shosted.

Denies Charge

Mrs. Shosted, who followed her sister on the stand, declared that her former husband, not Frank Melton, was the father of June; that her sister gave her the baby, immediately after she was born at Independence, Kansas, where the two women had "switched names" so that the baby, born out of wedlock to Mrs. Pollan, might be known to the world as the child of Mrs. Shosted, who at that time was Mrs. Earl Shanzhoffer; that she, Mrs. Pollan, wanted to take the baby away with her and care for it, but was prevented by Mr. and Mrs. Shanzhoffer to leave the infant with them until she was able to support it, and that her sister, since then, has refused to give up the child.

Alleges Confession

Mrs. Shosted stated Mrs. Pollan had "confessed" to her that Mrs. Shosted's former husband, Shanzhoffer, was the father of the child.

Two Other Sister, Mrs. Arnola Alexander

and Mrs. Maud Shosted, called to the witness stand, contradicted much of Mrs. Pollan's testimony, including her statement that Melton was believed to have died in France. They declared Mrs. Pollan had seen him in Springfield, Mo.; since the close of the world war.

A BARGAIN

THE ROAD MENACE: Because of the fact that the average man will, unconsciously drive fast or on a hard surface road than he will on an unimproved highway...

But the really dangerous feature of driving, auto, horse or team, on state highway or country lane, comes during the evening hours.

It is unfortunate that there is not some way of regulating this matter of car lights. Scarcely a man but who has experienced the narrowest kind of escapes from serious accident from this cause...

Is there no such thing possible as a county testing station for brakes and lights, to which all cars might be compelled to pay an occasional visit...

THE FARM IN ART

It has been objected that artists and illustrated magazines in general present always a discouraging and dreary view of farm life in America.

What is the population of your city? What is the birth rate; the death rate? How did the site of the town happen to be selected?

What are its chief natural resources? Do most of the citizens own their homes; or are they renters? Is the sewerage system adequate for health?

What about the water supply? Is it adequate to meet fire emergencies? Is there proper ventilation in all public buildings?

What kind of schools have you? Are they working effectively? Any person might ask himself another score or more of questions...

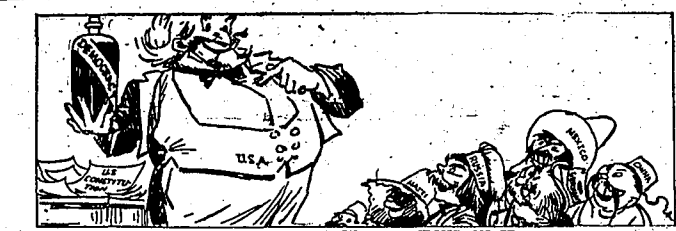

A PACIFIC EXAMPLE

The French Parliament the other day, following its approval of the Washington naval limitation treaty, unanimously ratified the four-power Pacific treaty.

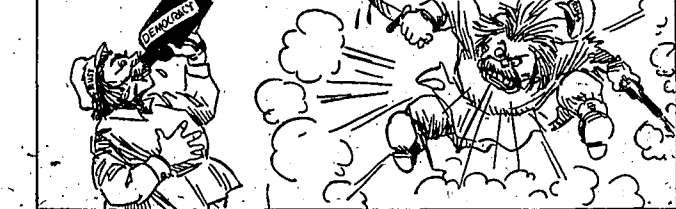

Reason, like knowledge, soon reaches a limit. Truth alone can go where knowledge and reason hesitate.

It is the treaty which made unnecessary...

THAT MEDICINE DOESN'T SEEM TO WORK AS WELL FOR SOME AS IT DOES FOR OTHERS

cosary the British-Japanese alliance and removed the threat of war between Japan and the United States.

Former Premier Briand, who helped write the treaty, won great applause when, in the course of the parliamentary debate, he expressed the hope that the Pacific pact would be copied in Europe.

The applause is echoed on this side of the water. And Europe might possibly do that very thing, if France would make a real effort in that direction.

KNOW YOUR TOWN

Many a citizen who brags about his own community speaks from faith rather than knowledge. A writer in a big daily suggests that it will be of general advantage to "know your town."

A little examination of one's own information would include such questions as these: What is the population of your city? What is the birth rate; the death rate?

What are its chief natural resources? Do most of the citizens own their homes; or are they renters? Is the sewerage system adequate for health?

What about the water supply? Is it adequate to meet fire emergencies? Is there proper ventilation in all public buildings?

What kind of schools have you? Are they working effectively? Any person might ask himself another score or more of questions...

"The front door was opened by the butler. Kramenin felt the muzzle of the revolver against his ribs.

steps and were hustled into the car. The smaller of the two was inclined to resist and Whittington shoved her in unceremoniously.

"Get a move on, George," shouted Julius. The chauffeur slipped in his clutch, and with a bound the car started.

"The man on the steps uttered an oath. His hand went into his pocket. There was a flash and a report. The bullet just missed the taller girl by an inch.

"Get down, Jane," cried Julius. "Flat on the bottom of the car. Are you all right, Tuppence?"

"What made them let us go?" demanded Tuppence. "I reckon Monsieur Kramenin here asked them so prettily they just couldn't refuse!"

"This was too much for the Russian. He burst out vehemently: 'Course you—course you! They know now that I betrayed them. My life won't be safe for an hour in this country!'"

"That's so," assented Julius. "I'd advise you to make tracks for Russia right away."

"Let me go, then," cried the other. "I have done what you asked."

"Sure thing. Pull up, George. The gentlemen's not making the return trip. If I ever come to Russia, Monsieur Kramenin, I shall expect a rousing welcome, and—"

But before Julius had finished his speech, and before the car had finally halted, the Russian had swung himself out and disappeared into the night.

"Annette and I didn't know what was going to happen to us," said Tuppence. "Oh! Whittington hurried us off. We thought it was lambs to the slaughter."

"Annette," said Julius. "Is that what you call her?" His mind seemed to be trying to adjust itself to a new idea.

CHAPTER XVI

Her arm through Jane's, dragging her along, Tuppence reached the station. They arrived on the platform just as the train came to a standstill.

Tuppence opened the door of an empty first-class compartment, and the two girls sank down breathless on the padded seats.

If they once reached Sir James Peel Edgerton in safety, all would be well. But would they reach him? Would not the silent forces of Mr. Brown & Co. be assembling against them?

Tuppence mapped out her plan of campaign. As the train at length drew slowly into Charing Cross, Jane Finn sat with a start.

"Have we arrived? I never thought we should!" "Oh, I thought we'd get to London all right. If there's going to be any...

"One thing I'd done already as a precaution—tipped off the old-time packet and substituted blank paper, and then sewn it up again. So, if anyone did manage to rob me of it, it wouldn't matter."

"What to do with the real thing worried me no end. Finally I opened it out flat. There were only two sheets of paper left. I tossed one into the advertisement pages of a magazine. I stuck the two pages together round the edges with some gum off an envelope. I carried the magazines carefully stuffed into the pocket of my ulster."

"At Holyhead I found myself in a carriage with Mrs. Vandemeyer after all. I was myself with the thought that there were other people in the carriage—there was quite a nice-looking man and his wife sitting just opposite. So I felt almost happy about it until just outside London. I had guessed back—and closed my eyes. I guessed a bullet would be sent, but my eyes weren't quite shut, and suddenly I saw the nice-looking man get something out of his bag and hand it to Mrs. Vandemeyer, and as he did so he winked."

"I can't tell you how that wink sort of froze me through and through. My only thought was to get up into the corridor as quick as ever I could. I got up, trying to look natural and easy. Perhaps they saw something—I don't know—but suddenly Mrs. Vandemeyer said 'Now,' and flung something over my nose and mouth as I tried to scream. At the same moment I felt a terrific blow on the back of my head."

Mexico Loan Safeguards Women. Under the law of Mexico, it is twice as much an offense to mutilate the face of a woman as it is that of a man. The idea of this is based on the fact that the woman's beauty is a great asset to her life, therefore, is a very serious personal injury.

Mr. Carter. His country place is north of London somewhere." Crossing Holborn there was a block, and the taxi was held up. This was what Tuppence had been waiting for. "Quick," she whispered. "Open the right-hand door!"

The two girls stepped out into the traffic. Two minutes later they were seated in another taxi and were retracing their steps, this time direct to Carlton. Tuppence turned to the driver. "There," said Tuppence, with great satisfaction. "This ought to do them. I can't help thinking that I'm really rather clever! What's this thing swearing—Oh!"

There was a grinding noise and a bump. Another taxi had collided with theirs. In a flash Tuppence was out on the pavement. A policeman was approaching. Before he arrived Tuppence had handed the driver five shillings, and she and Jane had merged themselves in the crowd.

"It may be my fancy," said Tuppence suddenly, "but I feel as though there was some one behind us. Tuppence and Jane took to their heels. The house they sought was some way down. Footsteps echoed behind them. Their breath was coming in choking gasps as they reached Sir James' door. Tuppence seized the bell and Jane the knocker.

A man reached the foot of the steps. For a moment he hesitated, and as he did so the door opened. They fell into the hall together. Sir James came forward from the library door. "Hallo! What's this?" He stepped forward, and put his arm round Jane as she averted uncertainly. He then turned to the library and laid her on the leather couch. From a tautulus on the table he poured out a few drops of brandy, and forced her to drink them. With a sigh she sat up, her eyes still wild and frightened.

"It's all right. Don't be afraid, my child. You're quite safe here. Her breath came more normally, and the color was returning to her cheeks. Sir James looked at Tuppence quickly. "Am I right in thinking that the joint venture has ended in success. For a moment she hesitated, and as he did so the door opened. "Is Miss Jane Finn?" Jane sat up. "Yes," she said quietly. "I'm Jane Finn. I have a lot to tell you."

"When you are stronger—" "No—now!" In a low voice Jane began her story. "I came over on the Lusitania to take up a post in Paris. I was on the ship when it was torpedoed, and I was rescued by Mr. Brown & Co. He asked me if I was a patriotic American, and told me he was carrying papers which were just life or death to the Allies. He asked me to take charge of them. I was to watch for any advertisement in the Times. If it did appear, I was to take them to the American ambassador."

"Most of what followed seems like a nightmare still. I see it in my dreams sometimes. I'll hurry over that part. Mr. Danvers had told me that the door of an empty first-class compartment, and the two girls sank down breathless on the padded seats.

If they once reached Sir James Peel Edgerton in safety, all would be well. But would they reach him? Would not the silent forces of Mr. Brown & Co. be assembling against them? Tuppence mapped out her plan of campaign. As the train at length drew slowly into Charing Cross, Jane Finn sat with a start.

"Have we arrived? I never thought we should!" "Oh, I thought we'd get to London all right. If there's going to be any...
