PROPOSERS OF
BONUS ARE SURE
BILL WILL PASS

Congress Prepares to Take Up
Veto of Measure by Coolidge;
Little Effort Made to Organize
Forces in House.

WASHINGTON, May 16 (AP)—Congress prepared with businesslike concern today to take up the veto of the soldier bonus bill, proponents of the measure insisting the situation was unchanged by the president's message and that the bill would be passed by both houses.

In the house where the measure will be brought up on a convening tomorrow bonus advocates were so confident of repassage that scarcely a roll was taken. Little effort to organize their forces.

Activities centered in the senate which will vote on the bill if passed by the house, probably Monday or Tuesday. Most of the members were deluged with messages and in contrast to the house the leaders were busy conducting polls.

Senator Curtis, republican, Kansas, in charge of the bill in the senate declared however the necessary two-thirds majority had been untouched. There were intimations from other proponents that they expected a close vote with the measure receiving a possible majority of two.

While administration spokesmen characterized the president's message as effective the situation they said had been fairly well crystallized for some time in view of the expected veto.

There was little evidence of a concerted movement among opponents of the bill in the senate to line up support for the presidential action. Most of the republican leaders, including Senator Lodge of Massachusetts, the floor leader, declared during debate on the measure that they would vote to override the veto. Other republicans who made similar declarations were Senators Watson of Indiana and Willis, Ohio.

Senator Smoot, Utah, one of the administration leaders, who has opposed the bill has been almost constantly occupied with conference meetings on the revenue bill and said today he would have no time to organize the opposition forces.

The bill passed the senate by a vote of 67 to 17. While numerous messages have been received from advocates of the bill, members also heard from opponents. Julius H. Barnes, president of the Chamber of Commerce of the United States and the ex-service men's anti-bonus league were among these.

Decline Noted in
Retail Food Price
in Recent Month

Federal Bureau Report Shows
Decrease Ranging from Five
Per Cent in East to Less
Than One Per Cent in West.

WASHINGTON, May 16 (AP)—An average decline of two per cent in retail food prices in the United States during the month ending April 15, was reported today by the labor department's bureau statistics. The trend of wholesale commodity prices also continued downward during the month, the bureau's weighted index number including 404 commodities, declining to 146 as compared with 150 for the month before.

Decreases in retail food prices in 51 of the 52 cities for which figures were reported ranged from five per cent at Buffalo, Mississippi, New Orleans, Providence and Los Angeles, Portland, Oregon, and Salt Lake.

For the year ending April 15, the average decrease was given as one per cent.

Decrease in foodstuffs and metals were chiefly responsible for the average decline in wholesale commodity prices during the month. Smaller decreases were reported in the groups of cloths and clothing, fuel and lighting and chemicals and drugs.

Farm products, on the other hand, showed an increase due to advances in cattle, hogs, sheep, poultry, cotton, hay, potatoes and peanuts. No change was reported in building materials, house furnishing goods and miscellaneous commodities.

The general commodity price level for April was nearly 7 per cent lower than in the same month last year.

Dr. Sun, Reported
Dead, Is Alive and
on Way to Recovery

Official Telegram Shows
Announced Demise of Chinese
Leader Was Not True.

PEKING, May 17 (AP)—Sun Yat Sen, south China leader, whose death was reported and apparently confirmed, is alive and on the road to recovery, according to an official telegram received today by the American legation. A similar message also was received by the Japanese legation.

The Chinese newspapers believed so firmly in the demise of Dr. Sun that they published lengthy obituaries of him in addition to numerous editorials commenting on his passing. The cabinet even was reported to have discussed the bestowal of posthumous honors on the Canton ruler, reports from seemingly authentic sources having been received of his death.

BIG UTAH DAM
IS THREATENED

Hundred Workers Labor to
Prevent Break and Loss of
Water Stored for Crops.

SALT LAKE CITY, May 16 (AP)—One hundred volunteer workers, laboring ceaselessly, are holding in check nearly 300 million gallons of water stored in the Holmes creek irrigation district reservoir near Layton, Utah, 25 miles north of here, according to advices reaching here tonight.

While little fear of the threatened flood inundating the business and residential sections of Layton is expressed, the breaking of the dam would result in the loss of the year's water supply for the surrounding district and a great loss to the farmers would result, officials state.

Workers laboring desperately piling brush and sand bags into the gap in the sand wall are just about keeping up with the rushing waters of the water threatening to tear out the dam, according to those in charge at the dam.

COOLIDGE BEATS JOHNSON
IN COAST STATE ELECTION

PORTLAND, Ore., May 16 (AP)—Early returns sprinkling in from the far corners of the state from today's primary election gave President Coolidge a big majority over Senator Johnson, a big majority over Senator Hiram W. Johnson of California for preference for the republican nomination for president.

United States Senator Charles L. McNary had a substantial lead for the republican nomination for United States senator over George L. Baker, mayor of Portland, who made a strenuous campaign against McNary.

Eighteen precincts out of 1763 in the state gave Coolidge 1024; Johnson 175. The same precincts gave McNary 768, Baker 326.

W. G. McAdoo is unopposed for the state's preferential choice for the democratic nomination for president.

VIOLENT QUAKE REPORTED

CONSTANTINOPLE, May 16 (AP)—A violent earthquake is reported in the region of Erzurum. Several villages have been destroyed and about 50 lives lost.

FLIER TO MAKE LONG TRIP
TO VISIT HIS PARENTS

MINNEAPOLIS, N. Y., May 16 (AP)—Major W. N. Hensley, Jr., stationed at Mitchell field, has announced that next week he would attempt a dawn-to-dusk non-stop flight of approximately 1300 miles to Columbus, Nebraska to visit his parents.

The DHAB, a stock observation type airplane, will be used, Major Hensley said.

FAVOR MERGING OF STATE'S
CO-OPERATIVE ORGANIZATIONS
SALT LAKE CITY, May 16 (AP)—The voting board of the California, Prune and Apricot Growers' association has decided to take steps to effect a merger of the state's co-operative marketing organizations.

The annual report of the president of the Prune and Apricot Growers said the association has on hand 57,000,000 pounds of prunes and 2,500,000 pounds of apricots.

McAdoo LAYS PLANS.
NEW YORK, May 16 (AP)—William G. McAdoo, who is in New York for a few days in the interests of his campaign for the democratic presidential nomination, today held several informal conferences at which plans for his state and national campaigns were discussed.

He will be here until Monday when he will return to his home in Los Angeles.

TAKE STEPS TO
FORM NATIONAL
LABOR PARTY

Clothing Workers-Appoint Delegates and Instruct to Throw
Strength to Movement for
New Political Factor.

PHILADELPHIA, May 16 (AP)—Definite action toward the formation of a national labor party, including the appointment of delegates instructed to throw the weight of the Amalgamated Clothing workers of America to any existing organization which advances a program giving a promise of attaining such an end, was taken by the clothing body, in an annual convention here today.

President Sidney Hillman, declared that "there will be no guarantee of world peace until the organized labor movement of America follows the British example and creates an independent labor party capable of winning at the polls the right to represent America in international relations."

Answering a demand that the body commit itself to the farmer-labor party, President Hillman said he did not criticize the farmer-labor party, the socialist party or the worker's party, but that to commit the organization to any group that did not represent the entire American labor movement would be a mistake.

By a vote of more than four to one the convention instructed the executive board to send official observers to the farmer-labor convention in St. Paul on June 17 and the conference a progressive political action in Cleveland on July 4 with authority to throw the full strength of the organized workers in the men's clothing industry behind any program that gives promise of bringing an independent labor party into existence.

ORDER NEW PLANE

MITCHELL FIELD, N. Y., May 16 (AP)—The airplane in which Major Frederick L. Martin may resume his attempt to encircle the earth, interrupted when storms wrecked his machine in Alaska, has been ordered shipped to New York from Langley field, Virginia, by the first available steamer, according to a telegram received by Major William N. Hensley, Jr., commandant here, from Major General Mason M. Patrick, chief of the army air service.

Fire Situation Grows

Three Hundred Men Fighting Blaze in Vicinity of Priest River; 6000 Acres of Timber Destroyed; Hot Winds Drive Flames Onward; Smaller Fires Reported Under Control.

Speeding Airplane
Reveals Plot for
Importing Liquor

Iowa Police Officers Take
Contraband Brought in by
Aerial Bootleggers.

BURLINGTON, Iowa, May 16 (AP)—An airplane speeding through the sky led police officers on a loose race yesterday.

Sheriff Murray saw the plane sweeping over Burlington at sunset. It gave him an idea.

"Beat it to the fairgrounds and watch for bootleggers," he telephoned.

Charles Parmenter, head of the police department and two policemen, dashed away to the fairgrounds.

They caught Walter Hall driving away with forty gallons of grain alcohol in his sedan. Nearby were two local aviators pulling the hand over the engine of an airplane they kept at the fairgrounds.

Hall refuses to tell where he got the liquor. The aviators pleaded innocent of all knowledge of Hall's cargo.

PRESENT FARM AID BILL

WASHINGTON, May 16 (AP)—A new farm relief bill providing for the creation of agricultural associations with power to lend money on farm products, limit production and market commodities was presented by Senator Smith, democrat, South Carolina.

The bill was drawn, its proponents said, with the idea of providing a compromise upon which the whole strength of the farm bloc in the senate could be centered.

BOOSTING LAFOLLETTE

MADISON, Wis., May 16 (AP)—"La Follette for president" committee has been appointed and opened headquarters in Chicago.

SPOKANE, May 16 (AP)—Three hundred men were fighting fires today in the vicinity of Priest river, Idaho, where 3,000 acres of timberland have been burned over on the west branch of Priest river and 3,000 acres of green timber has been destroyed on the other side of the stream. The weather is hot and a wind is blowing.

MISSOULA, Mont., May 16 (AP)—With two serious fires of more than 1,000 acres each burning on private timber land and pessimistic reports arriving from the Nez Percé and Clearwater national forests, the forest fire situation became more serious tonight.

The two most serious fires reported today were those on Grange Creek covering 1200 acres and one on Saddle Creek covering 1,000 acres. Both are in private land in the Bend or Oreille section of northern Idaho.

Out side of three minor fires in the Lolo forest in the Frenchtown district, no new conflagrations in the national reserve have been reported in the last 24 hours. The fires in the Lolo forest have been controlled or put out, the slash fire on the Anaconda Copper Mining company holdings at Nine Mile having been confined after a hard fight.

Rain Needed

Reports from the Nez Percé and Clearwater forests indicate difficulties unless rain comes.

The supervisor of the Clearwater forest has asked authority for 18 emergency men immediately. In the Grange creek country, 200,000 feet of logs and a railroad trestle as well as large stands of timber have been destroyed by the flames. The fire has reached such size that it would require 12 miles of fire line to surround it. The establishment of such a trench would be an expensive under-taking and the time required to complete it would be considerable.

PAID \$250,000
FOR PROTECTION
OF RUM TRAFFIC

Prisoner of Atlanta-Prison Tells
Sensational Story in Senate
Hearing; Promises Documents to Prove Claims.

WASHINGTON, May 16 (AP)—A quiet-voiced, stocky little man with piercing blue eyes—George Remus of Atlanta penitentiary—walked between guards into a senate hearing room today and testified that as a detail of bootlegging operations involving millions of dollars he had paid \$250,000 or \$300,000 for "protection" to the late Jess W. Smith, companion of former Attorney General C. D. Baskin. Given time and opportunity he promised to produce checks and records that would at least refresh his memory and fix dates in the bewildering multitude and magnitude of his transactions.

Remus, produced by the penitentiary warden for the senate committee investigating the alleged conduct of the department of justice, served less than four months of a two-year sentence imposed upon him for conspiracy to violate the prohibition laws. His examination was completed when adjournment was taken, and the witness had halted in his answers to questions about what other money had gone through his hands to government officials, pleaded fear of further incriminating himself and a desire to confer with attorneys.

Paid Big Sum

At the last moment, when the jail doors were opening for him in the spring of 1923, Remus testified he came to Washington and saw to Smith \$420,000 or \$300,000, confident that punishment could be evaded.

"He" (Smith) said that the attorney general said there would be no putting away of Remus and his men," Remus declared when pressed for the details of his understanding. Although now in the penitentiary, he declared he would not say to Smith "double-crossed" because Jess Smith, dead by his own hand, "could not talk."

In reply to questions of Senator Wheeler, the committee prosecutor, Remus laid bare a story of a magically sudden rise to wealth and almost as sudden a fall to the status of a convict. He was a successful criminal lawyer in Chicago in 1919, by 1922 he had become sole owner of nine distilleries in Ohio, Kentucky and Indiana and part owner of more, and the operator of a string of wholesale and retail drug companies from New York to Missouri.

Implies Bribery

That he bought up government officials almost as expeditiously as he acquired his properties was an implication to which he clung unshaken throughout his examination. He told the committee that his selling whiskey

Federal Counsel
Fail to Compel
Doheny to Talk

Court Rules Against Government
Attorney's Efforts to
Force Old Man to Tell of Delivery of \$100,000 Loan.

WASHINGTON, May 16 (AP)—Special government counsel in the oil cases lost their fight today in the District of Columbia supreme court to compel Edward L. Doheny, Jr., of Los Angeles, to testify before the grand jury investigating charges of fraud and corruption in connection with naval oil cases.

Upon his appearance before the jury in response to a subpoena, Doheny refused to answer any question regarding the delivery by him on behalf of his father of \$100,000 in cash to Albert B. Fall in Washington on November 30, 1921. The older Doheny has testified that this was a loan and the younger Doheny said that neither he nor his father, lessee of California naval reserve No. 1, had done any wrong, but that he would not testify on the ground that his answers might tend to incriminate him.

Arguing in support of the motion that Doheny be compelled to testify, Attorney General Cummings contended that since government counsel had informed Doheny in advance that there was no thought of bringing any charge against him, his refusal to answer questions was not in good faith, and that when he asserted his constitutional privilege it was for the purpose of protection not of himself, but of his father.

Upon his hearing argument by Frank J. Hogan, counsel for Doheny, Justice Hitt ruled against the government, dismissing the motion made by counsel on behalf of the grand jurors.

IDAHO WEATHER.

FAIR PLAY IS GREATEST NEED BUTLER CLAIMS

University President Scouts Nation That "Men Can Be Made Happy and Virtuous by Law"; Opposes Farm Aid.

NEW YORK, May 16 (AP)—The notion that "men can be made happy and prosperous and rich and virtuous by law" was assailed last night by Dr. Nicholas Murray Butler, president of Columbia university as "based upon an absolutely groundless hypothesis" in addressing the eighth annual dinner of the national industrial conference board.

"We must get back to the fundamental principles of American society," Dr. Butler declared, "as written into the federal constitution as originally adopted with the bill of rights. Morality in business, the spirit of service and fair play in business will do more to prevent the development of government restriction upon private enterprise and what is termed socialism than any amount of propaganda or legal appeal."

Oppose Farm Bill.

Barring government interference to prevent monopoly, he deplored the passage of the income tax amendment to the constitution because it "tended to the ground all the immunities that surrounded private property and placed it wholly at the disposal of congress," and branded as a fallacy the McNary-Haugen farm relief bill now before congress.

The same public sentiment, he declared, explained the rejection of the Mellon tax reduction plan, "a scientific plan for dealing with the people's revenue."

Things have happened in a government prone to legislate morality into business which made him "astounded," he said.

"If a cabinet officer did not take a bribe legally, he came so close to it that I should not wish to be asked to defend the distinction," said he. "The governor of a great state has just gone behind the doors of Atlanta penitentiary for the commonest of crimes. A member of the house of representatives is under sentence for a wretched conspiracy to violate the national prohibition law which he helped to pass."

"Can that kind of government so staffed and manned deal with the grave problem of private industry on the basis of principle? Dishonesty, crookedness on either side destroys it all."

Charles Cheney, treasurer of the silk manufacturing firm of Cheney brothers of South Manchester, Conn., as toastmaster of the banquet, called upon political parties to adopt platforms that "mean something."

"There is nothing to distinguish the two major parties," he declared. "Even the tariff is jumbled up."

Trade associations were discussed by the board in executive session earlier in the day. It was disclosed that more than \$1,000,000 had been spent in the last six years for research work to find the truth about industrial relations between employer and employee.

SHIP'S LIQUOR TAKEN

SEATTLE, Wash., May 16 (AP)—Extensive liquor stores aboard the French steamship Nevada were locked up and sealed by United States customs officers here yesterday following notification the vessel carried no permit sanctioning the possession of liquor in American waters. The vessel came to Seattle from Mexican ports after a brief stop in San Pedro.

The News is read by the permanent warning censors.

Blood Red Torrents Sweeps Down Sides of Great Volcano

Cloud Pours Through Eruptions of Kilauea; Eight Lives Reported Endangered.

HILO, T. H., May 16 (AP)—A great cloud hanging over Kilauea volcano yesterday began pouring in a flood of rain through the red ash eruptions from the pit. The result, according to observers, is two cascades 200 feet high which are sweeping in a blood red torrent down the bluff into the Halanauau crater.

This is the first time, it is said, since an exhibition at the volcano has been recorded. The red ash cloud ejected from the crater pit covers an area of 25 miles.

An eruption of the crater Tuesday endangered the lives of eight observers including Thomas Bales, superintendent of the Hawaii national park. Bales with two others was knocked down by flying rocks. He is recovering rapidly from his injuries and was able to walk today. The two other observers were slightly hurt.

KIMBERLY

KIMBERLY—The junior class of the Kimberly high school entertained the senior class and the members of the school board and their wives at an elaborate banquet Friday evening.

Mrs. Zaina Jones has returned to Kimberly for the summer, from Rome, where she has been visiting with her daughter, Miss Bertina, for several months.

Mr. and Mrs. F. O. Potter drove down from Boise Wednesday to spend a few days visiting with their sons' families.

The Elderly Ladies' Birthday club met Friday afternoon with Mrs. N. R. Barshall.

J. L. Shepard and family left Thursday evening for Murtugah where they spent the night with the Fahey family, resuming their journey for Cleveland Friday morning. They expect to be gone six weeks. Mr. and Mrs. Durham have charge of the station during Mr. Shepard's absence.

Mrs. E. N. Whitney and Mrs. May L. Mickelwait of Twin Falls were Kimberly visitors Thursday afternoon having been honored guests of the Ladies' Pioneer club at their Mothers' day meeting.

The Ladies' Pioneer club met on Thursday afternoon at the home of the president, Mrs. A. J. Wilson, with Mrs. H. W. Heighon, Mrs. P. Mulder and Mrs. L. C. Doty assistant hostesses. The E. L. B. club members were guests of the club and also a number of other mothers than club members were present with congratulations in token of Mothers' day. During the business meeting the acceptance of three new members, Mrs. Lloyd Jones, Mrs. John Bush, Jr., and Mrs. Leslie Foy was announced.

The K. B. club donated \$8 to the local scholarship loan fund bringing the total amount of the fund to over \$100. Mrs. J. N. Davis reported the net proceeds of the Tom Thumb wedding and candy sale to be \$73.10, which fund was turned over to the playground equipment committee which will act jointly with a committee from the grade school in purchasing equipment to be installed before the opening of school in the fall.

Programs for the coming club year were presented to the members after which a short program was given with Mrs. H. H. Denton as leader. During the social hour which followed delicious refreshments were served by the hostesses. The June meeting will be held at the home of Mrs. W. H. Turner, with Mrs. G. L. Noble, Mrs. C. T. Brown and Miss Elsie May assistant hostesses. Mrs. J. P. Henry will be the leader.

Another Score for the Cow.
Some of the best camels now in captivity have been raised on cow's milk given in a nursing bottle.

Bishop Will Fight Heresy Charge.

BISHOP WILLIAM M. BROWN.

BISHOP WILLIAM MONTGOMERY BROWN, of the Protestant Episcopal church of Gallon, Ohio, who retired ten years ago as Bishop of Arkansas, will be tried publicly by nine other bishops in Cleveland, Ohio, on May 27, on charges of heresy, growing out of his recent writings. He declares he expects to place the entire orthodox Christian religion on trial by demanding of all bishops if they accept the entire Bible literally, adding that if they do they are hopelessly at odds with modern science. This battle between the fundamentalists and modernists is said to be the first heresy trial of a bishop since the Protestant reformation.

"Liquor Now Poisonous."

"I never got drunk," he hastened to add. "I never got drunk in my life. But the trouble is the liquor now is not good. It is poisonous."

New Anti-Skua Chain.
New anti-skid chains for automobiles are clamped directly to wheel spokes without the use of side chains.

FRIENDS COME TO AID OF MAN UNDER ARREST

SAN DIEGO, Cal., May 16 (AP)—A.

R. Morford, former Mayor of St. Joseph, Mich., arrested recently for holding up a local bank and obtaining \$3,000 gained release from the county jail late yesterday after his bail had been reduced from \$10,000 to \$3,000. W. K. Prudden, retired banker of Lansing, Michigan, who says he is an entire stranger to the prisoner, furnished the bond and friends of Morford made plans today to have him sent to a home for tuberculosis sufferers. Reports received here today say that many residents of Morford's hometown and county in Michigan have joined to help him and many messages guaranteeing him legal defense and other aid have been sent to the local authorities.

Origin of Honeymoon.

The origin of the word honeymoon is disputed. The old theory was that it refers to the practice of the ancient Teutons who drank "hydromel," a drink made of honey, for a month, or "moon," after marriage. There is an old story that Attila the Hun indulged so freely in hydromel at his wedding feast that he died. The month after marriage when people drank honey wine was called "honeymoon." But modern philologists trace on this derivation. They say originally the word had no reference to "month" at all, but referred only to the ever-changing character of the moon. At any rate, honeymoon now refers to the period immediately after marriage, especially that part spent away from home, when everything is supposed to be as sweet as honey—Potholer.

Ever buy a wooden nutmeg?

A HUCKSTER stopped at Grandmother's door. "Any nutmegs today, lady?"

In the tray before him he displayed his wares—big, beautiful nutmegs, and at a ridiculously low price.

Being fond of nutmeg's spicy flavor, and seeing an opportunity to stock-up on them to advantage, Grandmother bought generously.

There was to be rice pudding for supper. Grandmother took the golden-brown beauty from the oven and prepared to give it its finishing touch—a sprinkling of nutmeg. Out came the grater and one of the new nutmegs. She scraped and looked puzzled. Scraped again and looked closer. Sawdust!! The nutmegs were made of wood.

How far from such methods we have traveled in these days of advertised merchandise. The merchant of today signs his name to what he says about what he sells. He knows that when you come to buy buy you will expect the goods in his store to be what he has said. He knows that if he deceives you once, your trade is gone forever.

Wooden nutmegs never could have been advertised. Read the advertisements.

The fire of publicity consumes falsehood—
advertised goods are reliable.

THE GUMPS—TRAINS THAT PASS IN THE NIGHT

PERILOUS COURSE IS AHEAD AS AVIATORS CONTINUE JOURNEY

Three Army Planes Leave Attu Island for Point Hundreds of Miles Away; Will Pass Over Unconquered Wilds and Bleak, Rock-Bound Shores; Japanese to Welcome Them.

ABOARD U. S. S. COAST GUARD CUTTER HAIDA, May 16, (Wireless to the AP) via Cordova, Alaska.)—Three army planes left Attu Island today for Paramashiru Island, on a flight around the earth.

Chill, fog, uninhabited islets, bleak inlets with rock-bound shores, volcanoes and a long stretch of bleak, unconquered northern Pacific waters lay ahead of the American "round-the-world" fliers today.

The ocean stretch of 878 miles never has been crossed by air, nor has the long jump from Paramashiru southward to the main island of the Japanese group, another stretch of equal length.

Paramashiru, second largest of the Kurile Islands, is inhabited only by hairy Ainu, aborigines of Japan who have been driven north to this dreary land by the constant economic and cultural pressure of the Japanese from the south. It has four volcanoes, regarded by the few persons who have brought back stories of them, as possessing unusual splendor.

Supplies Ready.
The American fliers' plans call for a landing in Kashiwabara bay where a Japanese and an American destroyer await them; the Japanese as official hosts and the American boat as a carrier of supplies.

A like welcome from war craft of the two nations lies at the end of the next jump southward to Bettou on Yotorofu, the largest island of the Kurile chain. This island is mountainous like Paramashiru but has many more volcanoes, as many as five of which sometimes are in eruption simultaneously.

Incidentally, it is these volcanoes that give the islands their name, the root of which is the Russian word "kurit" meaning "to smoke." Cosacks, from the Siberian mainland, were the first whites to visit the Kuriles, but later when whaling was in its prime, the hardy mariners from New Bedford and other New England centers prowling the north Pacific in search of the sperm whales, frequently drove their ships into the remote harbors of the islands. Thus, while pioneering in one sense, the Americans actually will only be revisiting lands with which their forebears, a generation or two back, had a more or less familiar knowledge.

Phenomena Abound.
The islands present some of the most awe-inspiring natural phenomena to be seen anywhere in the world. Their volcanoes are spouting fountains of fiery beauty, for surpassing anything in Japan proper, in Italy or in Hawaii, according to scientists who have studied in all four sections.

The airman will pass through this region at the year's most favorable season, for although the spring in the Kuriles is cold and blustery, the weather is clearer than at any other season.

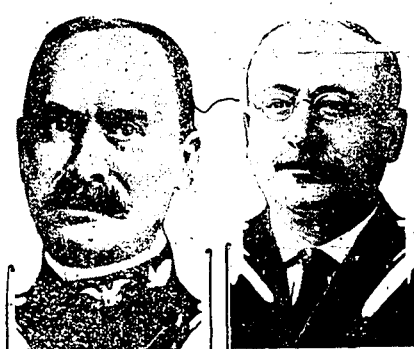

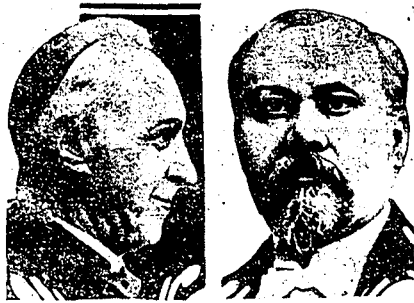

The islands have mountains 7,000 feet high. Their forests abound in game and are roamed by grizzly bears, the first cousins of the American variety. Their streams are the spawning places of numerous salmon.

The Japanese name the chain Chishima, or thousand islands.

To Fly Southward
From Attu the pilots laid their course for Cape Kronatki on the Kamachak peninsula, 611 miles from Attu. From Kronatki to Paramashiru Island, which is in the Kuriles group at the northern end of the Japanese empire, 297 miles.

The planes, those remaining after one of four that left Santa Monica, Cal., March 17, was wrecked against a mountain on the Alaska peninsula April 30, were expected to reach Paramashiru Island between 8 and 6

THE FRENCH ELECTION for the chamber of deputies was a great victory for the French democrats, or Left Wing, the Bloc National, which dictated France's aggressive policy, being beaten. Premier Raymond Poincaré, it is believed, must change his policies or suffer defeat in the new chamber. Congressman Victor Berger, socialist, of Wisconsin, is urging President Coolidge to call a new conference to revise the Versailles treaty to conform to Woodrow Wilson's "fourteen points." The belief that radio waves move as fast as light and electricity is disputed by Captain T. J. J. See, professor of mathematics in the U. S. navy and government astronomer at Mare Island navy yard, California, who declares radio is held back by the earth's attraction, moving 165,000 miles a second to 186,000 for light and electricity. All Belgium is celebrating the fiftieth anniversary of the entrance of Cardinal Mercier, primate of Belgium, into the priesthood. The cardinal is the national hero of the Belgians.

Church Services

"The House of Good Cheer"

In the morning at 11 o'clock the minister, Mr. Wining, will preach a "Father's Day" sermon in which he will pay a tribute to "Poor old Dad." The anthem will be "Lift Up Your Heads" by Brown, and the offertory (organ) "Tranquility" by Schumann.

In the evening the union baccalaureate services of the high school will be held under the auspices of the union church association, the Reverend C. E. Wining, pastor-in-charge, presiding. The following will be the program:

Orchestral prelude by Dr. Parrott's orchestra; Hymn: Announced by the Reverend Chas. W. Bock; Invocation: the Reverend O. D. Harris; Anthem: "Praise the Lord, O My Soul" by Barker; Scripture Lesson, the Reverend John E. Kanar; Offering, offertory by the orchestra; Sermon: "Lift Thine Eyes" (from Micah) by Men. Delosch, Meslames Mott, Sturdivant, Kellogg, Potter, McGuire and Bell; Baccalaureate address, the Reverend A. G. Pearson; Anthem: "The Hosts are Telling" (from the Creation) by Haylen; Benediction: the Reverend L. P. Nilsson.

The main floor of the auditorium will be reserved for the Clatsop guests (admittance by card), but other seats will be open and free to the first who come to occupy them. The doors will be opened at seven o'clock. Because of the union service there will be no meeting of the Epworth League.

Picks Out Her Minute.
Barker: "Why does a woman always keep a man waiting so long after she says she'll be ready in a minute?" Barker: "Because she picks out a minute which is about half an hour away."—Pearson's Weekly (London.)

The Man to Be Envious.
I pity no man because he has to work. If he is worth his salt he will work. I envy the man who has work going down and does it well.—Theodore Roosevelt.

If your property is desirable and is advertised in the classified—you'll find your buyer.

Today's Sporting News

BRUINS SWAMP CALDWELL NINE IN LAST GAME

Final Score is 19 to 7 in Favor of Local Team; Visiting Players Hurt; Double-Plays Constitute Feature.

The Bruins swamped the Caldwell ball team in the final game of the series Friday afternoon with a score of 19 to 7.

After Earwood, Caldwell's pitching ace was battered for 11 hits in four innings. "Pete" Kim again came to the rescue of the Caldwell team, pitching the rest of the game and allowing but 7 hits.

Twin Falls settled down behind L. Jaramas pitching for the first five innings with real baseball, holding the visitors to four scattered hits. In the meantime Earwood for Caldwell was finding the going hard with 13 runs against him.

Hitler for Twin Falls was the leading batsman as well as the feature player of the game when he nabbed a pretty fine string early in the first inning, making a double play for first.

Wild in Fifth The game went wild in the fifth inning when Lavey Jaramas threw wild and knocked Matt, Caldwell batter, to the ground. With the visiting catcher out of the game Caldwell made several changes in the lineup. Garrity added to the mixup by placing a home run over the right field fence. Caldwell came to bat in the sixth inning and the comedy began. Errors, three of them in succession, started the first run with one out and another homer let in another. Bardley, shortstop for Caldwell, in attempting to slide in this play, injured his back and was carried from the field. He was tagged off the bag and a fifth "home-run" play of the inning scored four more runs for Caldwell without a hit. Lavey struck out the next two men out, not trusting the local fielding, and ended the inning.

Reorganize Again Caldwell was again forced to reorganize. With two men out of the game he left an even nine players and the game ended with a minimum of errors for Caldwell. The first inning attack, settling down after the temporary blowup and playing creditable baseball.

Two double plays were made by Caldwell, one by Bardley who tagged Carr out at second and threw "Doc" Jaraman out at third, in the third inning and the other feature was the unassisted double by Camel in the seventh frame when the first striker took Day's fly and touched out Farrar who was caught napping off base.

The game concludes the blue and white baseball season with five games won and eight lost.

Today the Caldwell team meets Huhl on Ferris field.

Time-Two hours 25 minutes.

Hot Water Sold. In nearly all Chinese cities a large percentage of the inhabitants live in a sort of hand-to-mouth fashion, buying food from restaurants. Hot water is sold from stands by people who make a business of providing it. The great necessity for economy in fuel seems to be the primary cause of this mode of living.

BOSTON TAKES 12-INNING GO

Chicago Drops Long Contest to Red Sox; Detroit Takes Second From Philadelphia.

BOSTON, May 26 (AP)—A single by Ezzel, Fitzgerald's blunder and Wambach's single gave Boston a 4 to 3 12-inning victory over Chicago today. Ferguson was ineffective only in the first inning when Chicago scored its three runs. Five hits after two were out in the fifth gave Boston three runs. Boone made four straight hits. Fulk made a sensational catch of Boone's drive in the tenth, catching the ball at the crest of the leftfield bluff.

The score: R. H. E. Chicago 3 11 0. Boston 4 13 1. Batteries-Ferguson and O'Neill; Schalk; Ezzel, Fitzgerald and Wambach.

TWO STRAIGHT. PHILADELPHIA, May 16 (AP)—Detroit made its two straight from Philadelphia today when Holloway defeated Burns in a splendid pitching battle. The score was 3 to 1. A double by Pratt in the seventh inning with two on base gave the Tigers the victory. Houser made his sixth home run of the season.

Prior to the game Ty Cobb, manager of the Tigers, exchanged blows with a negro attendant at the park. Cobb said the negro insulted him. The men were separated before any damage was done and the attendant was dismissed by the home club.

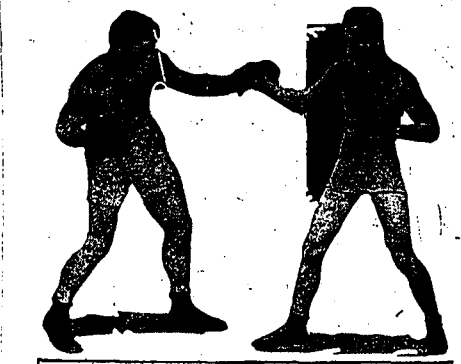

The score: R. H. E. Detroit 3 10 1. Philadelphia 1 9 0. Batteries-Holloway and Bassler; Burns and Perkins.

St. Louis at New York, postponed; Cleveland at Washington, postponed; rain.

Cause of Itch. Itch, or scabies, is caused by the pressure of larvae or mature specimens of Acanthosca scabiei, the itch mite. Although the itch was known to the Greeks and Romans, the cause was probably not recognized before the Twentieth century. A case was reported in 1902 wherein the skin of the patient was estimated to contain 7,000,000 eggs and 2,000,000 mites. The disease causes 450 per cent of all skin diseases in the United States.

Use for Unexpended Bonus. According to a recent announcement the \$500,000 remaining unexpended, following the payment of the New Jersey state bonus to former service men, may be used by the American Legion to provide hospital accommodations for ex-soldiers who may become incapacitated.

Walker to Defend World's Championship

MICKEY WALKER, world's champion welterweight, will defend his title in a 12-round fight with Low Tender, in Philadelphia, on June 2.

NEW YORK WINS SLUGGING FEST

Cubs Lose in Wild Game; Cincinnati Drops Place; Philadelphia Wins in 10 Innings.

CHICAGO, May 16 (AP)—New York defeated Chicago, 10 to 12, in a wild slugfest in which home runs and extra base hitting turned the tide of battle several times. Each side trotted out pitchers to check the slugger, the Cubs using six and the Giants four in the box, one as a pinch-hitter and another as a base runner.

Terry, substituting for Kelly, who was ill with a sore tooth, smashed out two successive homers, with a man on base each time, and Young got one. George Grantham of the Cubs smashed out a four-bagger with bases filled and gave the Cubs the lead for the second time, but the visitors continued their attack and finally won.

The score: R. H. E. New York 10 21 4. Chicago 12 13 0. Batteries-Neff, Oeschger, Jonnard, Mann and Snyder, Gowdy, Jacobs, Wheeler, Pierce, Blake, Keen, Kaufmann and O'Farrell.

BOSTON 8, CINCINNATI 3. CINCINNATI, May 16 (AP)—Boston made its three straight by winning from Cincinnati today, 8 to 3. Luque was knocked out of the box and Sheehan, who succeeded him, was hit freely. Yeagris, a recruit right hander, kept the Reds' hits scattered. Commissioner Landis witnessed the game.

The score: R. H. E. Boston 8 14 1. Cincinnati 3 11 2. Batteries—Yeagris and O'Neill; Luque, Sheehan and O'Wingo.

PHILADELPHIA 4, PITTSBURGH 3. PITTSBURGH, May 16 (AP)—In a hard fought 10-inning game, Philadelphia defeated the Pirates here today, 4 to 3. Through loose fielding on the part of Pittsburgh's team, the Phillies started off with a three-run lead. Pittsburgh rallied in the sixth and tied the score. A scratch single by Headline, followed by Betts' sacrifice and Walker's double gave Philadelphia the game in the tenth. Kremer pitched well for Pittsburgh allowing only one scratch hit between the first and tenth innings.

The score: R. H. E. Philadelphia 4 7 1. Pittsburgh 3 9 3. Batteries—Carlson, Betts and Wilson; Headline; Kremer and Goeh, Schmidt.

ST. LOUIS 6, BROOKLYN 5. ST. LOUIS, May 16 (AP)—The St. Louis Cardinals returned to winning form this afternoon and took the third game of the series from Brooklyn with the score of 6 to 5. The game ran 11 innings. Flack's home run in the eleventh ended the game.

The score: R. H. E. St. Louis 6 11 1. Brooklyn 5 12 1. Batteries—Henry, Dickerman, Denton and Taylor; Pfeffer, Doak, Dyer and Gonzalez.

COLORADO ELEVEN TO GO TO HONOLULU FOR GAME. HONOLULU, May 16 (AP)—The University of Colorado, Boulder, has accepted the invitation of the Hawaii university to send a football team here in the fall to play two games.

RUPERT TRACK STARS VICTORS AT STATE MEET

Bleamaster's Men Win Annual Event at Moscow; Five New State Marks Set; Twin Falls and Kellogg Entries Tied.

MOSCOW, Idaho, May 16 (AP)—Rupert's high school four-man track team, coached by W. C. Bleamaster, won the eleventh annual Idaho state interscholastic track meet here today with 23 points. Five new state marks were made.

Mitchell of Parma high school was high point winner with first places in both hurdle events and the high jump. His efforts placed Parma high second with 15 points. Murley high school with 12 was third, Caldwell and Downey, with 10 each, tied for fourth; Twin Falls and Kellogg with nine each, tied for sixth place.

Twenty-nine schools were represented. The new records made were: Cleaver, Caldwell, mile, 4:37.7; Mitchell, Parma, 120-yard hurdles, 16.5, and 220 hurdles, 26; Demer, Sand Point, javelin, 107 feet 8 1/2 inches; Rupert relay team (Burgher, Hockaday, Stone, Long) half mile, 1:35.6. Long of Rupert equaled the state mark of 10 seconds in the 100-yard dash and 22 seconds in the 220 yard dash.

New Thing in Lenses. It is well known that pure quartz glass possesses the property of transmitting, very abundantly, the so-called chemical rays of light, by means of which photographic effects are produced, and it has often been attempted to make photographic lenses of quartz alone. Unfortunately, quartz also possesses the property of double refraction, so that, unless the opening of the lenses is very narrow, good images are not produced. A French optician, E. Morin, is reported to have succeeded in making small photographic lenses of quartz glass in which some of the difficulties have been avoided and the lenses show great rapidity of action.

Japs Never Use Ladders. Ladders are not used in Japan, even in the construction of the highest buildings, the inclined plane being the means for taking the material to the highest places, the custom in construction being to erect the network of the pole scaffolding before work is put under way and have the route all completed for the laborers to carry the material for construction. The inclined plane, says the Detroit News, is used probably because the barefooted coolies could not conveniently climb ladders, although the stairway in a Japanese house is so steep as to be virtually a ladder.

Okapi a Rare Animal. The "okapi," to obtain a specimen of which an American expedition is now on its way to Africa, is a very rare animal, first discovered in Uganda by the explorer Sir Harry Johnston. The animal is about the size of a large ox. The coloration is, perhaps, unique among animals. The body is of a reddish color, the hair is short and the appearance of the hide is extremely glossy. The hind quarters and legs are of a cream color and striped like those of the zebra.

HOOVER ASSAILS TAX PUBLICITY

Conferees Lock Horns on Senate and House Differences on Revenue Measure.

WASHINGTON, May 16 (AP)—Indications of extended contents on the tax bill appeared today as the conferees locked horns on some of the more controversial differences between the senate and house. It was freely intimated that the conferees probably would have to return to their respective houses for instructions on some of these points.

Members of the conference are bound to secrecy on their actions, but it was indicated that among the several stumbling blocks are the senate amendments for publicity of tax returns and a graduated tax on undistributed corporation profits.

In this connection Secretary Hoover issued a statement today assailing the full publicity proposal as unfair to small business and as opening the door to fraud.

House conferees, it is understood, have stood firm against this amendment which was voted in the bill by democratic-republican insurgent coalition in the senate on motion of Senator Norris, republican, Nebraska. A similar proposal was rejected by a decisive margin in the house. House leaders privately predicted today this amendment would be turned down by the conferees.

Members of the house and senate finance committees, however, agreed to open the tax returns to inspection by congressional committee, empowered by resolutions.

A Mixed Scene. They sometimes shoot "bits" in the movies. Shots of a big city parade go nothing, for instance, and you can work them into many a plot. A director who had gone high into the mountains had to talking with a scientist who maintained a small observatory. This expert told him something which caused him to send a telegram: "I must use some security. I can catch gaudy 'Westerns.'"

Two men in a motor house had a truck arrived and so did the snow-blast when they set up the scenery they found it was not well chosen to match a snowstorm. All they had was an Egyptian pyramid, a section of the New York subway and an elaborate ballroom scene.

Penelope's Shroud. During the long absence of Ulysses, king of Ithaca, at the siege of Troy, his wife, Penelope, was beset by numerous suitors for her hand. To put them off, she declared that she could not choose from among them, until she had fastened weaving a shroud, or robe, for her aged and father-in-law. Penelope was careful to undo at night what she had woven by day, and thus managed to keep her suitors at a distance. This stratagem was finally discovered by her admirers, who thereupon renewed their attentions; but the timely return of Ulysses, after an absence of 20 years put an end to their importunities.

Verse the Proof. Verse is the final proof to the poet that his mastery over his art is complete. It is the shutting up of his powers of "measured content"; the answer of his art to his spirit; of strength and ease to his guidance.

Poetry, in its complete sympathy with beauty, must of necessity leave no sense of the beautiful, and no power over its forms, unmanifested; and verse is as inevitably from this condition of its art as the laws of proportion do from any other kind of embodiment of beauty.—Leigh Hunt.

A Valuable Rooster. A city gentleman has taken all over an extensive and lavishly equipped farm. He saw blooded stock of many kinds and was particularly impressed by the prices that had been paid for some of these specimens. Upon rejoining the guests at the mansion he proceeded to enlighten his wife. "Now take that rooster yonder, for instance. That rooster is worth \$200. He's a genuine Southdown."

Origin of Name Gotham. "Gotham" was the name of a town in Nottinghamshire, England, the inhabitants of which, about 1200, were ridiculed for simplicity and short-sightedness, and were later termed in derision "the wise men of Gotham." Washington Irving, in the Salmagundi papers, applies the name "Gotham" to New York, satirizing the short-sightedness of many of the inhabitants.

GREAT ACTOR IN FILM AT THE IDAHO MONDAY

Enil Jannings enjoys the distinction of being one of the most finished actors of the screen world.

He first became known to American audiences through his masterful work in support of Pola Negri in her first picture, "Passion." Then came Paramount's "Deception," in which he played King Henry VIII. This was followed by "One Arabian Night," and "All For a Woman." "Eyes of the Mummy," starring Pola Negri, followed.

Jannings achieves the triumph of his screen career in the title role of "Peter the Great," a Paramount production, directed by Dimitri Dushowetzki, who made "Mad Love," which opens at the Idaho theater next Monday.

Tribute Money. During the administration of Thomas Jefferson, the Barbary states gave much trouble, not only to the United States, but to the European powers, because of the pirates that infested the waters of this part of the coast of north Africa. The European powers had been accustomed to pay them tribute in order that their vessels might not be molested. The American government had entered upon the same practice. Carriages of presents were sent now and again to appease the greed of these pirates. The demands became so exorbitant that our government at last sent a small fleet to the Mediterranean, which taught the pirates that blackmailing must cease. This is the only instance in which the United States had paid tribute to any country.

Prince Rupert's Drops. The name, Prince Rupert's Drops, is given to turpentine-shaped pieces of glass, formed by melting the glass and allowing it to drop into cold water. If the point of the tail to one of these be broken off, the whole will at once shiver and shatter into a host of fragments. The sudden cooling, the particles have not had sufficient time to arrange themselves in a stable manner, and hence they fly asunder as soon as the structure is broken. These curious drops are commonly supposed to have been discovered by Prince Rupert, the grandson of James I of England; but Faraday says that they were simply brought by him into England in 1800.

Origin of Name Gotham. "Gotham" was the name of a town in Nottinghamshire, England, the inhabitants of which, about 1200, were ridiculed for simplicity and short-sightedness, and were later termed in derision "the wise men of Gotham." Washington Irving, in the Salmagundi papers, applies the name "Gotham" to New York, satirizing the short-sightedness of many of the inhabitants.

PREDICTS BAD EFFECT ON BUSINESS IF THIRD PARTY ENTERS CONTEST

Campaign Featured by Conservative Judgment, Not Dynamite and Debris, is Babson's Recommendation.

BABSON PARK, Mass., May 16. (Special to the News) "What will the appearance of a third party do to general business?"

As we face two national conventions next month and some certain discussion and unrest, the question is probably uppermost in the minds of both business men and investors. It was put today to Roger W. Babson, the business authority.

"It would hurt business," promptly replied the statistician. "Because it would weaken confidence and increase uncertainty and it is thru confidence that politics can affect business conditions."

Cites Figures.
"If you will study the figures for previous election years you will find that the proverbially poor business of these seasons is not due to the fact that there is an election but rather to the fact that conservative and radical interests struggle for control. Whenever both the leading parties have nominated conservative men, business has continued as though no election were in prospect. When radicals have been strong, business has suffered."

"Calvin Coolidge apparently has the republican nomination as a sound conservative and he believes that the vast majority of the citizens are sound conservatives. Should the democrats nominate a conservative man, business confidence will increase materially. But if a radical group comes into the field with a third party, confidence will suffer and business will slow down."

Orderly Progress.
"Are we to progress then? The question is natural. From the point of view of business, and I do not mean 'big business' in the usual sense but all business, progress must be made in orderly efficient fashion. If a business man wants to change and improve machinery in a factory he plans very carefully, orders the new machines and calls in a crew of experts to install them. Then when all is ready the old machines are carefully dismantled and moved out so that they may be put to some other use, the new ones are installed and the factory resumes operation with a minimum of loss in both time and money. The same principle is in making a similar change would involve dynamite and debris. It is more expensive and usually less productive."

Not Unified.
"The possible third party as it shapes up today does not represent any unified group that would be solid enough to accomplish anything in the way of progressive legislation. It is composed rather of an accumulated minority of blocs and factions, each bent on trying to get 'something for nothing' for its particular group. Even if one of these proposed schemes were passed it is doubtful if it would work and real benefits for its favored class and the economic cost to the rest of the country would be tremendous."

Business Not "Too Good".
"General business, just now, is none too good. The Babson chart shows it at 7 per cent below normal—and if we are to avoid serious depression it is well to remember that human progress is made slowly by building on what we have already tested and found sound. You cannot legislate against economic law any more than you can legislate water to run up hill."

"Lasting progress requires time, earnest effort and patience—not dynamite," concluded Mr. Babson, "and it is to be hoped that no third party will enter the field to aggravate a real depression when we might otherwise avoid the suffering and loss that such a development brings to everyone."

PAID \$250,000 FOR OFFICIAL PROTECTION

(Continued from page one)

as medicine was a mere pretext and that in reality he was the source of supply for bootleggers in a half dozen central states, the "financial" man of an organization he referred to as "Remus and his men."

His "chief counsel" introduced him to Jess Smith in New York in 1921, Remus said, Smith knowing the witness as "a reasonably large operator in whiskey," and Remus knowing Smith as "a man very close to the attorney." When the third party "retired gracefully" Remus testified that he laid a foundation for good relationship with Smith by passing over \$50,000 in \$1,000 bills. Then began a series of meetings he added which continued until the shadow of the penitentiary was falling over him all though Smith was promising even then that the "general," the term applied to H. M. Daugherty, was going to use his influence to obtain executive clemency for Remus.

Human Heart Beats.

The human heart beats something more than 35 million times per year. Such an industrious organ opens the way to difficulty. Recognition of this fact and a resulting consideration and care would offset a lot of suffering from heart disease.

ANTI-BONUS MEN SEEK SHOWDOWN

Veteran's Organization to Carry Out Fight to Demand Action Supporting Veto.

WASHINGTON, May 16 (AP)—Declaring war on every member of congress who votes to override President Coolidge's veto of the soldier bonus, the Ex-Servicemen's Anti-Bonus League today announced it would organize to carry the fight into every state.

Knowlton Earlam, president of the organization, issued this statement: "I am a member of congress has conclusively favored and voted for the bonus, that is his affair, but if there are those who believe the bonus wrong in principle and yet are influenced by what they consider political expediency to cast their vote against the presidential veto, we intend to show that there are at least two sides to the question, and we expect to appeal to the voters who are against the bonus."

"There are unfortunately some members in each body of congress who are opposed to the bonus but who are fearful of their political future if they vote against it. This view is undoubtedly due to the fear of what has been called the soldier vote. There is no such thing as a soldier vote. Soldiers are first and last citizens of the country and we believe that the great majority of veterans are good citizens and desire the welfare of their country above every other consideration."

WOULD REQUIRE COMPANY TO SHOW COAL TONNAGE

BOISE, May 16.—The hearing before the public utilities commission to determine whether the O. R. & N. shall be forced to repair and operate the spur line built under war orders to the Teton claims attracted wide attention because of the possibility of an Idaho coal mine being developed in a few years and because certain agencies, such as the Boise Statesman, saw in the proposed legislation a means of connecting the coal company, more political force than domestic fuel. In fact, the Statesman said editorially that Samuels wanted neither coal nor railroad so much as he did political notoriety and a new lease to ride.

The proceedings before the commission brought out that the coal measures were so formed as to render development expensive and that for some time the output might not be more than 100 tons a day, or a trifle over one large carload, eliminating the cost of shipping. It was also brought out that the cost of repairing the spur would be \$36,010; that a needed "Y" would cost \$27,020, with two bridges, that a turntable would cost \$40,000 to \$50,000, that the cost of operation would be \$19,325 annually, aside from any snow plow operations, that the annual revenue would be \$12,700 based on 34,000 tons of coal a year and that the deficit would amount to around \$8500 a year, including taxes.

The railroad company proposed (1) to give the spur line to the coal company for five years; (2) that it will complete and repair the spur if the coal company deposits the cost of \$30,010, to be returned at 25 cents a ton freight and 6 per cent to be paid by the railroad, or (3) that it will complete and repair the spur if the coal company will put up a bond to give it an annual tonnage of 29,000 tons for five years. These three propositions may be met by a counter proposal but the outlook is that the commission will not require the railroad company to rebuild and operate the road unless there is some compensatory tonnage in sight.

However, the Idaho commission may not pass upon the case, as a question has been raised that jurisdiction rests only in the interstate commerce commission.

It was suggested by a legislator that if advertised in the classified—you'll find your buyer.

Human Heart Beats.

What the World Is Doing

AS SEEN BY POPULAR MECHANICS MAGAZINE

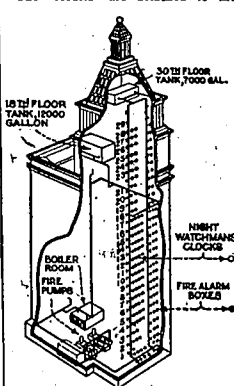

Water Veil Guards Walls of Skyscraper

Connected to powerful pump, a network of 291 sprinklers on the outside of the new Union Central Life Insurance company's building in Cincinnati, Ohio, has been installed to bathe the structure's upper stories in a protecting curtain of

water in case of a severe fire in the neighborhood. The sprinklers are similar to those used in interiors, but operate only when the pumps are started. This installation, said to be the first of its kind on a building of this type, was adopted largely because of the lesson taught by a disastrous fire in Chicago, in 1922, when flames leaped an eighty-foot street, melted windows of heavy wire glass and devoured the contents of several upper floors of a steel skyscraper. The blaze proved that a modern "fire-proof" structure, though amply guarded against flames by interior sprinklers, may not be immune from an outside attack. The configuration further showed that, even if the flames do not actually break through the wire-glass windows, capable of withstanding from 1,500 to 1,700 de-

grees Fahrenheit, radiate sufficient heat to endanger books and papers and other inflammable materials. The system is divided into six units, each placed where it will best protect the exposed sides of the building. Water is supplied directly from the city mains and from storage tanks in the upper floors. Approximately 5,000 linear feet of galvanized pipe, weighing 14,000 pounds, were required to connect the sprinklers. The "feeders" are attached to the

building by fasteners in holes drilled into the exterior terra cotta. Sprinklers are turned downward so they will drain, and are pointed directly at the windows. In case of danger from an outside fire, pumps are started, control valves on the top floor where the entire system is managed are opened, and in a short time, the upper stories are bathed in a protecting film of water, pouring at the rate of 2,550 gallons a minute at fifty pounds pressure, upon the outside of the windows.

Beard Is Removed with Mud and Use of X-Rays

Shaving boards from men's faces has been accomplished by a special mudlike paste that is undergoing experiments at the hands of a New York doctor. After the mass has been applied, it hardens and is torn off. To finish the operation, X-rays are then directed against the skin. The originator of this method claims that it is beneficial and if used regularly will remove scars and similar marks of long standing. It is also said that the treatment does not leave any ill effects on tender skin.

Births Outstrip Death Rate in World's Largest Cities

Annual death rates in the twenty-six largest cities of the world are only about three-fifths of the birth rate, according to figures compiled by a French statistician. His reports show that for every 10,000 inhabitants, an average of 250 births and 154 deaths occurred in the large metropolitan centers for the year ended July 1, 1923. Alexandria and Cairo, Egypt, stood high on the birth and mortality lists with 670 and 630 births, respectively, and 250 and 283 deaths per 10,000 inhabitants. Bombay had the highest death rate.

Hot-Weather Comfort for Autos

An automobile top, exposed to the sun's rays, absorbs an amount of heat that renders it rather uncomfortable for the occupants, especially during the summer time. Experience has shown that the application of a coat of aluminum paint to the under side reduces the absorption of heat to a great extent, and painting the outside with the same kind of paint helps still more. Practically one-half of the heat absorption can be prevented by applying aluminum paint to either inside or outside.

A worthless clock can be used in the sick room to indicate the next time medicine is to be given by setting the hand at the proper position.

FIRE SITUATION IN IDAHO GROWS SERIOUS

(Continued From Page One.)

struct one would make its success doubtful.

Winds Drive Flames.
On Sadler creek the flames are added in their ravages on the private timber by high, hot winds which are driving them forward into the heavy timber stand. However the national reserve has not yet been threatened by this blaze.

The Wolf creek fire in the Flathead territory has been checked from the west, only to run away again to the south, and now covers 300 acres. Optimistic reports concerning some of the fires which are now burning have been received. Thirty men fighting the Pine creek fire in private timber in the Kootenai forest in Northern Idaho, report that it is in check. There are still two serious fires raging in this territory according to reports.

Fighters Conquering.
The 600 acre Pilgrim creek blaze, which has been burning in the cabinet forest near Noxon, is giving way to the efforts of 80 men combatting it and it is believed that it will be under control within the next two days.

The Mud lake blaze in the Flathead country was reported checked with the prediction that it would be under control by night. On the Kootenai forest, 18 fires still are burning as well as several others on the Pend Oreille.

The next issue of the telephone directory goes to press May 20. Those desiring changes should arrange for them prior to that date. Mountain States Telephone & Telegraph Company—adv.

expressed at the amount obtained and it was voted to put it in the memorial fund. During the social hour a guessing contest was enjoyed and the hostesses, assisted by Mrs. T. H. Irwin, Mrs. H. M. Holler, Mrs. Avant and Mrs. Louis Friedman, served a Jack Horner luncheon.

The Mentor club members entertained their mothers and friends with a delightful party in the business women's club room Thursday afternoon. The splendid program consisted of the following numbers: two vocal solos, "Mother Macrae" and "Mother of Mine," Miss Marie Brady; reading "A Tribute to Mother," Mrs. C. J. Schroeder; whistling solo "Swallows at Eve," Mrs. George Leonard of Filer; a reading "Mother," Mrs. Corin C. Bowen, and a vocal solo by Little Miss Wilma Bertsch.

Punch was served during the afternoon and at the close of the program the guests were seated at one long table heavily decorated with spring flowers and delicious refreshments were served. The favors were pink and white carnations.

The guest list included Mesdames C. J. Schroeder, Belf. Wyatt, Barry, A. Broeseau, Smith, Howell, Blakely, Heck, White, Davis, Logan, Millard, James, Nicholson, Hunsley, Donney, Kunkel, Long and Leonard and Good of Filer. A rising vote of thanks was given those who assisted in entertaining. The next regular meeting of the club will be on Wednesday May 21 at the home of Mrs. Frank Gentry.

Mr. and Mrs. J. W. Dudley entertained at dinner Friday evening for the state championship first aid team of the local telephone company. The guests were Mr. and Mrs. Russell Stoddard, Mr. and Mrs. Earl Squires, Mr. and Mrs. George Charlton, Mr. and Mrs. Charles Sherman, Mr. and Mrs. Leonard Nuttall.

SOCIETY
Edited by Mrs. E. R. Williams Telephone 336

The Episcopal Guild enjoyed an evening meeting Thursday with Mrs. James H. Bothwell and Mrs. W. Orr Chapman at the home of Mrs. Bothwell on Tenth avenue north. There was a short business session presided over by the president, Mrs. Thomas Robertson.

Mrs. Stringfellow of Boise gave a pleasing talk on St. Margaret's school in that city. Mrs. W. H. Dwight and Miss Emma Smith each gave vocal selections. Miss Annie Smith read a splendid paper on Cornucopia, and Miss Gladys Terhune gave two humorous readings. The hostess assisted by Miss Annie Smith served dainty refreshments. There was a large attendance and all expressed the wish that there might be many evening meetings. Mrs. I. N. Sullivan of Boise who is visiting her niece, Mrs. Bothwell, was a guest.

Miss Jane Maxwell entertained the Luncheon club Friday afternoon. Covers were laid for ten at an attractive table having as a centerpiece white and purple lilacs. In the bridge games which followed the luncheon favor for high score was won by Mrs. Asher B. Wilson.

Members of the Acircian club spent a pleasant afternoon at the home of Mrs. William Baker on Friday. The usual interesting current events were given and the afternoon was spent socially. At a late hour the hostess served delicious refreshments. Mrs. John Bolton and Mrs. Harry Smock were guests.

The War Mothers were entertained Friday afternoon at the home of Mrs. David Brown in the Reed apartments. During the business meeting it was voted to assist the Legion in the resolution which they adopted for the observance of Memorial Day. A report was made of the result of the sale of carnations on the Saturday previous to Mother's Day. Much gratification was

DRY WEATHER AFFECTS
QUOTATIONS ON WHEAT

High Temperatures Prevailing in the Southwest Assure in Lifting Values; Rain Needed in Nebraska.

CHICAGO, May 16 (AP)—Dry weather reports from Nebraska, Kansas and other important wheat states, together with higher temperatures in the southwest did a good deal today to lift wheat values. The wheat market closed unsettled at 1-4 to 3-8 to 3-4 net gain, July \$1.09 5-8 to 1.09 3-4, and finished 1-4 to 3-4 up, oats unchanged to 1-8 to 1-4 higher and provisions varying from 5 cents decline to 2 cents rise.

Especially in Nebraska rain was said to be needed to stop impalement of wheat growth. A leading authority reported that April rainfall was below normal west of the Mississippi with a sharp deficiency shown in Iowa and Nebraska. The first half of May has also shown continued moisture deficiency in the two states named and a noticeable lack also in Kansas, Oklahoma and Missouri. Under such circumstances, a moderate amount of buying developed, notwithstanding that many traders evinced a disposition to postpone dealings until farm legislation at Washington is out of the way. An elevator house led the buying in July delivery.

Wheat prices were also strengthened by indications of a liberal reduction of the Chicago stock of wheat this week, lake shipments of about 1,000,000 bushels to the east being noted. Besides, European demand was reported as slightly better, with purchases of 500,000 bushels at the seaboard. Estimates were current, too, that the world's available supply had decreased 37,111,000 bushels in April last year. Corn and oats as well as wheat responded to complaints of dry weather and to prospective reduction of stocks here owing to lake shipments. Furthermore, today's receipts of corn in Chicago totaled only 20 cars.

Provisions, although dull, were sustained by an upturn in hog values.
