TOTAL DEAD AT 98 IN TERRIFIC EASTERN STORM

Northern Ohio Tornado Leaves Heavy List of Victims; Lorain to Be Rebuilt at Cost of Millions.

CLEVELAND, Ohio, June 30 (AP)—The list of known dead in Northern Ohio's tornado Saturday has reached 98 early tonight, according to compilations made by the Associated Press. At Lorain, where the storm hit the hardest, the death list stood at 72; 13 additional bodies having been recovered during the day. City officials feared this figure would be increased as rescue workers continued their search of the ruins.

Approximately 75 persons have been reported missing at Lorain.

Conservative estimates place the property damage in Ohio at more than \$30,000,000. The exact amount, officials agree, will not be known for days. One additional death was reported at Sandusky this evening, where almost a dozen injured are said to be in a serious condition. The death list at other points in the storm area showed no change.

Everywhere strenuous efforts were made during the day to clear away the debris as much as possible and rush relief to the stricken areas.

Governor Denney on his return to Columbus, called a meeting of state capital business men to adopt relief measures.

LORAIN, Ohio, June 30 (AP)—Lorain's death list was increased by two late this afternoon when searchers, digging in the ruins of the Crystal restaurant found the body of 12-year-old Dorothy LaLonde and Edward Wittenbach of Henrietta, Ohio, who died of injuries they received during the storm Saturday afternoon. The total dead now stands at 98.

One more was added to Sandusky's list when John Kinton, negro of Glasgow, Ky., died of injuries this afternoon at a Sandusky hospital bringing that total to eight.

Storm Strikes Again.

The efforts of the men cleaning out the debris in the State theater today were futile, but little progress being made in removing the tons of brick and twisted steel. The work was interrupted several times by heavy showers and tonight a severe rain and thunder storm struck the city, stopping all work.

Fire Chief David Hatt and Coroner Miles E. Perry today said they believed a number of bodies still remain under the debris in the theater.

While the rescue work was going on throughout the wrecked parts of the city, local business men and city officials were formulating plans for the rebuilding of Lorain.

Will Rebuild City.

Mayor George Hofmann said Lorain (Continued on Page 4, Col. 4.)

Conference Ready To Open Cleveland Sessions Friday

No Set Nominating Speeches and Long Demonstrations, Says Hyatt; Expect to Close Business by Sunday Morning

CLEVELAND, Ohio, June 30 (AP)—There will be no set nominating speeches and no seventy-five minute drummed-up demonstrations during the convention of the conference for progressive political action which opens here Friday, Gilbert Hyatt, representing the national committee of the conference, announced tonight.

"If Senator LaFollette is nominated it will be by the spontaneous action of the convention," he declared.

Leaders here arranging the conference are awaiting a statement from Senator LaFollette which they believe will clear up the question whether he would accept if nominated. His nomination, they assert, is certain.

The convention is expected to run through Friday and Saturday with probable night sessions. Efforts will be made to finish up by early Sunday.

William R. Johnston, chairman of the conference, who will deliver the keynote address, is expected tomorrow. Other speakers on the opening day of program include Senator Shipstead of Minnesota, Mrs. Mabel Costigan of Illinois, Senator Lynn Frazier of North Dakota and Edward Keating, editor of a labor magazine.

Elphar F. J. McConnell will deliver the opening invocation.

SIXTY AIRPLANES ARE READY FOR START OF AIR MAIL SCHEDULE

Planes to Leave San Francisco and New York at Same Time in Opening of Trans-Continental Service.

CHICAGO, June 30 (AP)—Sixty airplanes were in readiness tonight for the start tomorrow of the trans-Continental air mail service. At six a. m., Pacific standard time, one plane will leave San Francisco and at 10 a. m., Eastern standard time, another plane will leave New York. At each of these terminals, and also at eight interior division points there will be two more planes instantly available. In addition, twenty planes are in reserve, principally in the Missouri valley, for use in case of emergency or demand.

The elapsed time, trip westbound will be 34 hours and 45 minutes, and for the eastbound trip, 32 hours and 5 minutes.

U. S. FLAG CUT DOWN AT TOKIO

Police Seek Man Who Committed Offense; Crowds Gather to Oppose Recent Law.

TOKIO, July 1 (AP)—An unidentified Japanese today cut down the American flag flying in the American embassy grounds.

Jefferson Caffery, the American charge d'affaires, immediately took the matter up with Baron Shidbara, the foreign minister.

The police are making a search for the man who cut down the flag.

TOKIO, June 30 (AP)—The nationwide demonstration against the American exclusion act which goes into effect today, opened with mass prayer meetings at all the national shrine shrines throughout the country. Crowds petitioned the emperor to rescind the act and to stop the war in China.

The Japanese race is "insulted," by exclusion from America.

Tokio's principal meeting was at the Meiji shrine. It was attended by thousands of reservists and others. Scores of other anti-American meetings are being held in Tokio alone today.

SEEK CLUES IN MILLS MURDER

Robbery Believed by Officers to Have Been Motive for Slaying Near Mt. Home.

BOISE, June 30 (AP)—Motive for the murder of Parady Mills, wealthy Seattle resident, whose body was found on the Boise-Mountain Home highway last Friday, was robbery, according to a theory advanced by officers working on the case tonight. Elmore county officers today were searching for valuable papers and a sum of money said to range between \$400 and \$500 belonging to the murdered man and which were not on his person when he was found.

The prosecuting attorney's office has delayed filing a formal complaint against E. Holberg, who according to Arthur Stevens, sheriff of Elmore county, has admitted the crime. Robbing the victim maintains, however, that the shooting was accidental, but refuses to detail the accident.

Sheriff Stevens and a deputy went to a scene described by Holberg, where they found a dress suit case hidden by the suspect.

Toddy Holberg indicated for the first time that he wanted to be represented by legal counsel.

ARMY REPLENISHES QUALITY

100 PER CENT AS MARKSMEN

SAN FRANCISCO, June 30 (AP)—The Thirty-first Infantry, stationed here, is establishing the reputation of being the best regiment of marksmen in the army. It is said at western division headquarters.

Recently 40 men of the regiment went to the rifle range at Fort Barry with automatic rifles. The qualification of "expert rifleman," the highest grade awarded for marksmanship, was given to 41 and the other two went the rank of "sharpshooter," the next highest grade. The automatic rifle, a light, air-cooled machine gun, is carried and fired like an ordinary rifle and requires expert handling.

Out of 100 automatic gunners of the regiment, 85 have qualified as expert riflemen this year and the other 15 rank as sharpshooters.

IDAHO WEATHER.

Tuesday, generally cloudy.

ESTIMATE CUTS SCHOOLS' COST BUT FOR DEBT

Tentative Budget Provides for \$232,000 Expenditures with \$13,000 Increase for Sinking Fund.

Containing provision for expenditure for all purposes other than sinking fund loss by approximately \$2000 the similar expenditures last year, a tentative budget for Twin Falls school district for the year 1924-25 was worked out by Superintendent M. O. Mitchell and Frank C. Lynch, accountant, was presented for the consideration of the board of education at a special meeting Monday night.

The tentative budget provides for aggregate expenditures in the sum of \$232,930.99, which includes approximately \$13,000 more for next year than last for sinking fund to retire bonds of the district. The budget last year provided for expenditure of \$229,766.28, and actual expenditures amounted to \$229,096.32, leaving a balance of \$609.96.

Under the tentative budget for the coming year the district's expenditures for all purposes other than sinking fund it is estimated, would be held well within the limit of the amount provided for by the levy authorized by the voters at the election last February.

Comparative Figures.

Instructional services accounts for the district's largest expenditure. The budget last year provided \$125,860 for this purpose. Actual expenditures were \$125,857, leaving a balance of \$3 in this fund. The tentative budget appropriation for instructional service next year is \$125,165.

Last year's budget appropriated \$19,625 for operation of plant; actual expense was \$19,010.80, and the tentative estimate is \$19,375.

Maintenance of plant last year was

McAdoo-Smith Contest Holds Convention To 15 Ballots With Little Change in Votes

Bryan Hands Out News Bulletin to Convention Scribes

Reporters at Convention Breathless as Commoner Makes Announcement.

MADISON SQUARE GARDEN, New York, June 30 (AP)—William Jennings Bryan stands on the platform at convention hall tonight. Several degrees of brilliancy added to the famous Bryan smile.

He sought out the newspaper correspondents.

"Boys, I have a piece of news that you'll want," said the peerless one veteran of many campaigns. The fourth estate held its breath and expected to hear about a nominee being decided upon, who, where, how and when.

Mr. Bryan calmly took a pencil from over a scribe's ear and in a professional manner wrote for a moment. Then he issued this bulletin:

"A great granddaughter today was born to Mr. Bryan. The parents are William P. Meeker and Kitty Owen-Meeker. Mr. Bryan's oldest granddaughter."

Mr. Bryan retired before the newspaper men could recover their wits quickly enough to congratulate him. Anyway he looked very happy.

Estimated at \$505; actual expense was \$9076.86, and the tentative estimate is \$1505.

Fixed charges, including rent, taxes and insurance, last year were estimated at \$3800; actual expense was \$3587.55, and the tentative estimate is \$4725.50, the reduced estimate for the coming year being accounted for by the fact that few insurance policies will expire next year.

Department service last year was estimated at \$43,781.25; expense was \$44,663.26, and the tentative estimate is \$53,933.04.

Auxiliary and sundries account, out of which expense of pupils' transportation is paid, was estimated last year at \$16,735; actual expense was \$16,735.

"Grebs of Michigan" Is the Latest Entry in Balloting Contest

Inquiry Falls to Establish Identity of Man Who Received Complimentary Vote.

MADISON SQUARE GARDEN, New York, June 30 (AP)—"Who is Roland Grebs?"

"I don't know," responded the chairman of the Michigan delegation in the democratic national convention. Nevertheless the clerk's records show a vote cast from Michigan for Grebs for president. Consequently Mr. Grebs takes his place among the list of those who have received complimentary votes in national political conventions without conducting political campaigns.

ROCKWELL SURE M'ADOO WILL WIN

Californian Declines to Comment but Manager Tells of Expected Victory for Him.

NEW YORK, June 30 (AP)—After the first round of balloting today for the democratic presidential nominee, William G. McAdoo, who was in the lead from the start, declined to comment on the situation.

In an informal statement, however, David Ladd-Rockwell, his campaign manager, reiterated his prediction that McAdoo would be nominated. He said he was satisfied with the outlook.

Rockwell asserted it was apparent that the real battle was between McAdoo and Governor Smith with both sides digging in for a fight to the finish.

Both he declared, were jockeying for advantage and neither showed its full strength. "It looks like trench warfare," said Rockwell, insisting that

DELEGATES WILL MEET TODAY TO RESUME BATTLE

National Democratic Session Called Off After Futile Effort to Pick Nominee; Few Small Shifts in Strength.

How the vote stood at end of fifteenth:
McAdoo, 479.
Smith, 305 1/2.
Davis, West Virginia, 61.
Cox, 00.
Ralston, 31.
Glass, 25.
Harrison, 20 1/2.
Ritchie, 17 1/2.
Necessary to nominate, 732.

MADISON SQUARE GARDEN, NEW YORK, July 1 (AP)—At 12:05 a. m. eastern daylight saving time the democratic national convention, after 15 unsuccessful ballots, adjourned until 10:30 this morning.

MADISON SQUARE GARDEN, NEW YORK, June 30 (AP)—As midnight approached the democratic national convention had completed its fifteenth ballot and a nominee still was being sought.

Twelve hours of balloting had served merely to advance McAdoo and Smith in a steady gradual movement and to bring neither one within striking distance of a nomination.

At the conclusion of the announcement of the fifteenth ballot, Chairman J. Bruce Kromer of the Montana delegation, a McAdoo floor leader, moved an adjournment until 10:30 tomorrow morning. The convention didn't even wait for the motion to be put and carried. It merely piled out while it was being done. The band struck up "Home, Sweet Home" and the convention hall was emptied quicker than it would have been if a troop of elephants which often scour the arena had suddenly been sent loose. Some changes were predicted for tomorrow's balloting. Whether there would be a nomination or not was anybody's guess.

One politician remarked: "The ice is 12 inches thick; there isn't a crack in sight."

None the less, all the rival candidates (Continued on Page 5, Col. 3)

Political Camps Keep Steady Eye On Developments

Friends of J. W. Davis Aroused to Cheers During Balloting; Underwood Men Rely on Smith Votes to Gain.

NEW YORK, June 30 (AP)—Steady advance of strength shown by John W. Davis during the balloting today around his West Virginia friends to whoops of delight every time a new county was heard from.

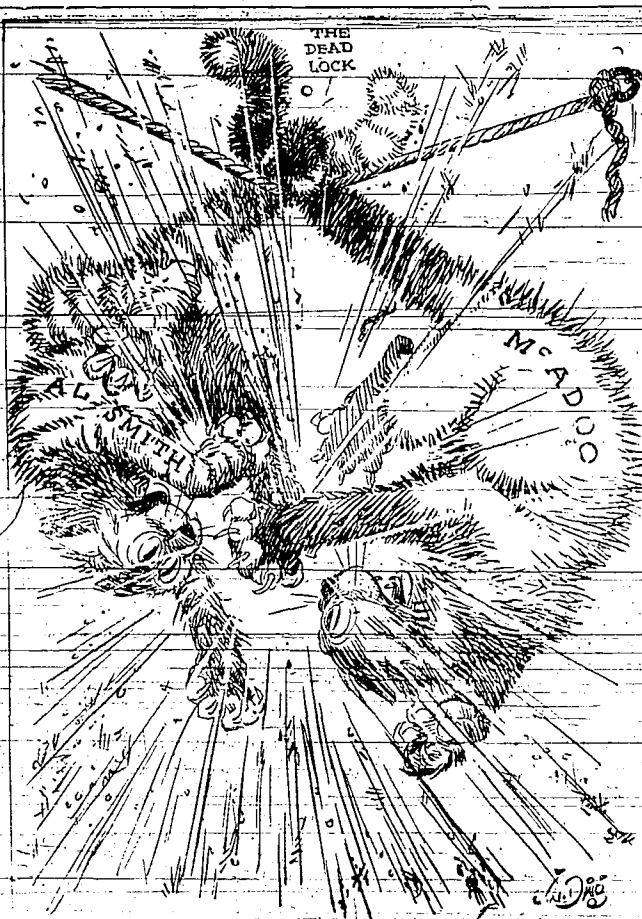

With the exception of the West Virginia delegation all of the votes polled for Mr. Davis if it was said came as a result of the voluntary work of men in various delegations who are for him as second choice. The generous applause from the galleries also was pleasing to the West Virginians as it added to the then expectation of getting a good share of the big New York vote should it abandon the governor's standpoint.

NEW YORK, June 30 (AP)—Senator Underwood's campaign managers spent the long hours during the balloting today virtually as onlookers. They rely largely upon Smith delegates to give them their standing as a third choice.

Adoo battle has been fought to a finish.

It was disclosed during the voting today, said the Underwood leaders, that there is a decided sentiment favorable to the Alabama senator in numerous delegations.

LIKE THE KILKENNY CATS, THERE'LL BE NOTHING LEFT BUT THE STUBS OF THEIR TAILS

ARRANGE PLANS FOR PILGRIMAGE

Revival of Historic Event to be Observed; Celebration Expected to Last One Week.

SAN FRANCISCO, June 30 (AP)—Plans have been made for an international pilgrimage to one of the cradles of civilization on the Pacific coast of the United States, the spot near Montezuma, Cal., where Father Junipero Serra, the first Spanish padre, landed and established the first mission in California in 1776.

The celebration, to be centered in the restored chapel of Carmel Mission, will begin October 12 and last a week. Those to whom special invitations will be issued will include the king and queen of Spain, the Spanish ambassador at Washington, the president of Mexico and a number of other noted Spaniards and Mexicans.

The ancient Spanish mission overlooks the Pacific ocean. The body of Father Serra is buried beside the altar in the chapel, but during the observance the coffin will be removed, in the course of a memorial service, and placed in a beautiful sarcophagus which is being completed by Jo Mora, the sculptor, in his studio at Pebble Beach, Cal. The sarcophagus will be unveiled at an elaborate ceremony on October 19, the birthday that will mark the conclusion of the pageant.

Thousands are expected to gather for the celebration. In addition to religious services, there will be music, dances and entertainments typical of the period depicted. The fiestas, fandangoes, barbeques and mission plays that characterized the Spanish occupancy of California, will be reproduced faithfully.

LEGION READY TO HELP COMMUNITY BETTERMENT

INDIANAPOLIS, June 30 (AP)—Interest in community and civic betterment among members of the American Legion is growing rapidly, according to Garland W. Powell, director of the Legion's National Americanism commission, under which is directed this phase of Legion work is being carried out.

Mr. Powell's statement was based on the hundreds of requests which have been pouring into the community and civic betterment bureau, a division of the American commission.

"While we have many reports concerning posts which have already assumed some community responsibility, it is surprising how many Legionnaires are planning campaigns for betterment of conditions about them," Mr. Powell declared. "Requests for dissection along these lines are received daily, and indicate that constructive work for their neighbors is the principal aim of this great group of ex-service men."

"There is no intention on the part of the Legion to supplant any agency engaged in work of this character, but to offer our broad membership as an agency equipped to align all community endeavor."

Advice furnished by the bureau will extend to every phase of community development, and civic betterment, Mr. Powell said.

EXPENSE OF PARLIAMENTARY SEAT BRINGS PROTEST FROM BALWIN

LONDON, June 30 (AP)—Frank statement that financial demands upon parliamentary candidates and members of parliament were becoming too heavy was made by former Premier Stanley Baldwin in a recent address in which he declared that he had expended more than \$15,000 in elections during the last three years.

"Many men are poorer since the war," Mr. Baldwin said. "I myself am one of them. Too many demands for money should not be made upon members of parliament and candidates."

IRELAND TRIES TO REGAIN ITS EXPORT EGG TRADE

DUBLIN, June 30 (AP)—Patrick Hogan, the free state minister for lands and agriculture, has introduced into the Dail a bill to regulate the export of eggs.

Eggs are one of the most important of Irish exports and the industry has recently shown signs of deterioration. In 1921 Ireland exported \$50,000,000 worth of eggs, poultry and feathers, the value of the export being second only to that of cattle.

AMERICANIZING ENGLAND

LONDON, June 30 (AP)—Great Britain eats as much ice cream every year as all the people of New York state plus two-thirds of those in Pennsylvania, according to those who manufacture it over here. Last year his majesty's subjects consumed 20,000,000 gallons of this frozen product.

POLICE MUST LEARN HOW TO RUN

LOS ANGELES, June 30 (AP)—The police here are being put through a course in physical culture by Captain Walter Yant, former physical director of the 10th division at Camp Lewis.

Explaining the need for the course, Captain Yant said: "Very few policemen can run three blocks or even two. Few can go up or down a rope. Having big muscles and being able to lift heavy weights are not physical fitness. Some officers don't know how to stand. Many don't know how to breathe."

TOURIST PARK NOTES

Mrs. A. M. Johnson and family came by way of Battle Mountain and Elko, Nev., from Marysville, Cal., and are going to Boseman Mont.

Mr. and Mrs. H. Oppenhefer are on their way from Sacramento, Cal., to Colon, Mich.

La. M. Hamilton from Denver is on the road, with nowhere to go.

Charles Keene and family are moving from Bonham, Tex., to Cottage Grove, Ore.

T. C. Lorenz and family of Des Moines, Ia., are going to the coast, with southern California as their goal.

Mr. and Mrs. S. F. Holler from Council Bluffs Ia., are going to Seattle.

James Clancy and party have been through the park and are now on their way to Portland.

E. Anderson and family from San Diego, Cal., are going to Minnesota.

Mr. and Mrs. Ray Eick have been visiting in Iowa, and are now going back to San Diego, Cal.

W. H. Pierce and family from San Francisco left for St. Paul Sunday morning.

Frank Leon and party from St. Cloud, Wis., are going to spend the summer on the coast.

Mr. and Mrs. Wm. Brown from Kenosha, Wis., were visitors in the park Saturday.

Ray Eichelberg and family who have been doing the coast are now returning to Boseman, Mont.

E. J. Hopkins and family are going the long way round from New Orleans to Los Angeles.

W. H. Nelson and party came from Manitowish, Wis., and departed for San Diego, Cal.

A. B. McNary and family from Redmond, Wash., are out sight seeing. They are going to Salt Lake City, and then to Yellowstone park.

C. J. Coe and family are travelling from Stillwater, Wis., to Portland.

J. J. Hughes and family from Storm Lake, Ia., have been in the park for several days. They found several of their Iowa friends living in Twin Falls and have spent the time talking over old times. They left for Portland Monday morning.

Mr. and Mrs. H. E. Rush from Houston, Tex., are going to San Francisco.

E. Houken and party have been back to the old home in Ill. and are now going to San Jose, Cal.

E. Starch and party are journeying from Springfield, Ill. to Long Beach, Cal.

J. Bates and family are on their way to Portland from Salt Lake City.

G. W. Sanders and family are going to Blackfoot from Oakland Cal.

J. E. Ballies and family from Willamport, Pa., are on the road to Portland.

As V. Reeves is returning to Mina, Nev., from Rupert.

Charles P. Wadsworth whose home is in Wickenburg Ariz., came from Jerome and departed for Rogerson.

E. J. Cole and party from Cleveland, O., have visited Yellowstone park, and are now going to Los Angeles.

M. W. Briggs and a friend from Salem, Ore. have been to Contact, and are just looking around.

E. R. Martin and partner from New Orleans came from Wells and are going to Portland.

PAINTING ON A SPIDER'S WEB

FOUND BY GERMAN COLLECTOR
BERLIN, June 30 (AP)—What is regarded as one of the most singular works of art in existence is now in the possession of a Berlin dealer. It is a painting 6 by 4 inches, executed on a spider web and preserved by being clamped between two plates of glass, so that one can examine it on both sides.

The scene depicted is that of a happy family sitting together at a table.

As an interesting side piece to the painting, the artist also preserved a spider web on which he had completed part of the picture when it tore. This second web shows traces of its having tried in vain to patch up the tear.

There is nothing to tell when the spider web was painted.

About Gas Mantles

COINAGE MELTED FOR COPPER

NEW YORK, June 30 (AP)—After circulating many of them for more than a century, in the Dutch East Indies, 233 tons of copper coins were unloaded here recently on their way to a smelting plant in New Jersey. Many bore the date of 1780; others were worn so smooth that their age could not be determined.

These symbols of the trade of a corner of the world that readers of English associate chiefly with the novels of Joseph Conrad soon will be transmuted into just copper, practically pure copper, however, worth about \$250 a ton.

The coins were collected by the Dutch government 10 years ago when the old issues were recalled and replaced with new.

Myth About the Diamond

Diamond was the name of a handsome youth of the island of Crete, who was one of the attendants of the infant Jupiter in his cradle. It was decreed that diamond should not be subjected to the ill that flesh is heir to, so he was transformed into the hardest and most brilliant substance in nature.

You can't keep entirely up-to-date without reading advertising

THE GUMPS—IF DREAMS COME TRUE

FOURTH BRINGS MANY DEATHS, FIGURES SHOW

National Organization for Prevention of Blindness Issues Warning against Unnecessary Risks in Celebration.

NEW YORK, June 28 (AP)—Don't celebrate Independence Day by sacrificing forever your eyesight, or that of someone else.

This is the warning issued here today by the National Committee for the Prevention of Blindness. Although great progress has been made in the movement for safe and sane celebrations of Independence Day, the committee says the Fourth of July is followed each year by a flood of reports of accidents to little boys and girls which, in many cases, blind them and in most others so seriously impair their vision that they are handicapped for life.

Numerous Causes

Injuries to the eyes from the use of fireworks and firearms are not, however, confined to Independence Day celebrations. The committee has within recent months received reports of serious injuries to the eyes of children through the use of fireworks and firearms since the Fourth of July of last year. In 79 of these cases the child had been shot in the eye with an air rifle; the eyes of 70 children were seriously injured by other firearms; in 41 cases the eyes of a child were seriously injured by the explosion of so-called "dynamite caps," commonly used as ammunition for "dynamite games;" the eyes of 21 children were injured by premature blasts of explosives, and 13 by display fireworks.

The committee found that while eye accidents of this type are recurring throughout the year, there is a sharp and sudden rise in their frequency during the first week of July and immediately following Christmas, due to the use of fireworks in Christmas celebrations, particularly in the south, and to the popularity of the air rifle as a Christmas gift for boys.

The committee believes that fireworks have a proper and desirable place in the life of the American boy, that they focus attention on historical events in a way beyond the power of ordinary history instruction; and that they do stimulate patriotism. But the committee feels that the eyesight of several hundred children each year is lost high a price to pay for the use of fireworks and firearms, particularly during the Fourth of July and the days immediately preceding it. The committee urges every parent and other adult responsible for the care of children to take steps immediately to avert this year a repetition of the customary Fourth of July casualties. Specifically, the committee recommends that firearms of all sorts be put out of reach of children; that all fireworks be kept out of the hands of little children and that the use of so-called dynamite, giant cannon crackers, skyrocket, roman candles and other powerful fireworks be restricted to grown-up children under the supervision of adults.

RAILROAD SEEKS PERMIT

TO ABANDON OPERATIONS

LOS ANGELES, June 30 (AP)—In altitude and earnings the Death Valley railroad is the lowest in the United States, according to a report filed here with the state railroad commission, seeking permission to abandon the line because, the company declares, "it isn't worth the distribution of being designated a common carrier."

In the request for permission to abandon the line as a common carrier, it was noted that the earnings dropped from \$128 in 1923 to \$23.78 in 1923. Company officials explained that the increase was "unnatural" and was on account of motion picture companies using the desert as locations.

Seeking an Excuse

Many a town would spend numerous idle, worthless days in the country if he could find some excuse for it.

Rev. Glen Morton held the regular church services here Sunday morning.

Through July the services will be held in the evening.

Friends here of Miss Bonnie Guecio will be pleased to learn that she was married on June 21 at Longview, Wash., to Mr. Thomas M. Guecio. Thomas was for several years a resident of Eden and is well and favorably known.

Mr. Thomas is a glazier of the Longview section and is at present employed as sewer and water engineer of that city.

M. A. Williams is here from Salt Lake looking after business affairs.

H. O. Erwin made a business trip to Jerome last Thursday.

Mrs. Fred Arnold spent the past week visiting friends at Nampa.

Mr. and Mrs. C. Watson of Pocatello are here spending a few days with their son, Glen Watson, who lives on his farm south of town.

The Ladies' Aid conducted a successful food sale last Saturday at the Eden Mercantile store.

Mr. and Mrs. Frank Fulton and family, Mr. and Mrs. A. J. Wilson and family picked last Sunday at Crystal Springs ranch.

Ralph Gresham returned to Eden Monday from Portland, where he attended school the past year.

JAPANESE FLIES IMPORTED

TO KILL JAPANESE BEETLES

SEATTLE, June 29 (AP)—Some time ago a number of Japanese beetles found their way to New Jersey in a shipment of irises. These beetles spread until they have become a menace to vast truck gardens in New Jersey. A special variety of Japanese fly, several billion of them, is being imported to exterminate the beetles, for which they have shown a voracious and effective appetite in the old country.

A. G. Webb was sent here by the United States bureau of entomology to supervise the shipment of flies, which arrived on a recent steamer and have been forwarded to New Jersey by the post office department. They were packed in 250 cartons, the consignment weighing four tons.

Alaska's Mineral Wealth

Alaska has produced nearly half a billion dollars' worth of minerals, and 67 per cent of this has come from her deposits of gold, copper and silver.

TODAY'S PROGRAM AT NEW YORK CONVENTION

Convention convenes at 10:30 a. m. Invocation by Bishop Luther B. Wilson of the Methodist Episcopal church. Continuing of balloting for presidential nomination.

KLANSMEN TO CELEBRATE

Klanbluffs have been circulated here announcing a Ku Klux Klan celebration of the Fourth of July to be held at Kimberly. The announced program includes singing, picnic dinner, baseball, foot barbecue, naturalization, ladies entertainment, address by the Rev. J. E. Sling and music, open air radio and fiery cross fireworks.

Egyptian Barber Had

First Idea of Organ

More than two thousand years ago a barber in Alexandria discovered that in moving his mirror air was forced through the tubes which were common to mirrors at that time. This caused a curious musical sound to be emitted. So struck was he by this peculiarity that he set about making an instrument which was the foundation of the modern organ.

After several experiments he made a water-fute, in which air was forced by bellows through an inverted cone which sent notes coming from a keyboard, the pressure being kept uniform by water.

After a thousand years a rival instrument made its appearance. This was of a similar pattern, but instead of water, weights regulated the pressure.

In 961 an organ was erected at Winchester. It had twenty-six bellows and ten pipes to each key. The two men who sat at the keyboard "blew and sweated enormously." Later, a firm of organ makers in Germany succeeded in erecting the first really big instrument. The pipe stops did not come from the front of the organ, although various novelties were introduced.

Among the innovations were the nightingale and cuckoo stops, while others represented clock-crowling and goat-bleating. Though these novelties have now fallen into disuse, an organ with one of these nightingale stops is still to be seen in Rome.

First "Flying" Feet

Rather Grade Affairs

A state label in the yard of Old North Church, Boston, marks the place from which the first flying feat in this country was made. The flight was accomplished by John Childs, an Englishman, who became famous as a glider. His glider was a crude affair, the operator being suspended by a sort of harness. The length of the flight was about 700 feet. It was successfully repeated. The inscription on the tablet reads: "Here, on Sept. 18, 1797, John Childs, who had given publicity to his intention to fly from the steeple of Dr. Cutler's church, performed it to the satisfaction of a great number of spectators. In 1923, the year of the first continuous flight across the continent, this tablet has been placed by the Massachusetts Society of the Colonial Dames, to commemorate the two events."

Puzzled German

There was once an operator at the

Crookhaven wireless station named Blinn, whose friends for 363 days every year consisted of two hard-boiled eggs. During the war he was an operator in a very important position on the grand fleet, and a certain most important message was required to be sent. He was puzzled for a moment, and then, with his hand upon the Morse key, tapped out the extraordinary words, which no doubt puzzled every German listening: "Two hard-boiled eggs transmitted." He tapped this out half a dozen times, and the stations around the coast were much mystified. But Crookhaven stations sprang alert at once. They knew it was Blinn. They took his secret message for the admiralty and replied: "O. K. Two hard-boiled eggs." The result of that code message was claimed to be the sinking of a German cruiser, writes William Le Queux in "Things I Know."

Theatro M

ATTRACTIVE PROGRAM AT ORPHEUM WEDNESDAY

Vaudville at its best will be the program of the day at the Orpheum theatre Wednesday, according to announcement of the management.

The mid-week attraction includes Arthur (Jiggs) Van with the Kilkenny Bros. Johnson and Harding, Harman's Cats and Dogs and Louis Stone and Company.

Arthur (Jiggs) Van as the feature attraction with the Kilkenny Bros. late stars of "Bringing Up Father," is the creator of the Jiggs character which has made him a popular idol. He is ably assisted by Maggie & Co., the dancing duo, and a number of irascible Irish wit interspersed with lulling melodious Irish melodies.

Louis Stone and company in novelty tosy-tory dancing, will undoubtedly prove both interesting and amusing in his unique up-side-down dance offering.

Johnson and Harding in "Watch the Quinliffe" are known throughout the United States and have been a standard act for years.

An Ill Omen

Among some German pennants, should a mother lose the heel of one of her shoes, she takes that to be a warning that one of her children will die before the year is out.

Eight new body models on a chassis of 114 3-4 inch wheel base, embodying a new six-cylinder valve-in-head engine with a three-inch bore and 4 1/2-inch stroke, is the sensational announcement made by the Buick Motor Company.

The new six-cylinder model is to be known as the Standard Six.

The body models will consist of a five-passenger double-service Sedan, a two-passenger enclosed Roadster with heater, a five-passenger enclosed Touring car, a two-passenger Double Service Coupe, a five-passenger Sedan, and a four-passenger Coupe. Probably the most striking features of the new models are the completely enclosed sedan and coupe on the open cars, and the low-pressure tires on all models.

The cars with the enclosed tops will carry hangers. The tops and slides are so designed that they harmonize well with the distinctive body lines.

The new upholstery with leather, with special cushion springs effecting a high degree of motor comfort. Other models are furnished with upholstery of durable cloth in contrasting colors.

The engine is a valve-in-head type with automatic lubrication throughout and with the cylinder head, camshaft, and clutch and transmission form integral parts of the engine which is suspended at three points from the main frame. The crankshaft is a deep forging, extra heavy and balanced with four large bearings. The pistons and connecting rods are properly balanced and fully machined.

Large valves are operated by automatic adjustable push rods through rocker arms which are automatically lubricated from the crankcase. The clutch produces fifty actual brake horsepower.

It has pressure feed lubrication to the crankshaft and connecting rod bearings, also to the cam shaft and pump shaft, front bearings, rocker arm bushings and push rod socket joints, as well as timing gears. The oil pump is of gear type, driven by the crankshaft on the right side of the engine, and driven by worm on the center of the camshaft. It has a maximum pressure of thirty pounds regulated by relief valve pump oil screen.

The engine is reinforced to prevent collapsing. Pistons, cylinder walls, cams, rollers, and the other four camshaft bearings are lubricated by a cast oil capacity 4 1/2 quarts. Fan automatically lubricated from reservoir in hub. Water cooling is by centrifugal pump operated from the cam shaft by spiral gears. Harrison cellular radiator is employed.

Control is by means of short spring operated clutch, steering wheel, clutch pedal, accelerator with foot clutch pedal, and starter pedal conveniently located. Gear shift and emergency brake levers are convenient to the right of the driver's seat.

The carburetor is the improved automatic float-type, supplied by vacuum system from the gasoline tank mounted on the rear of the frame. Automatic heat control insures proper vaporization at all speeds. The air regulator and choke levers are on the instrument board.

Ignition is supplied by the high tension jump spark system, the current being supplied by storage battery and a coil with a variable resistor. The spark advances automatically. The starter is a complete Delco single-unit system for starting, lighting and ignition.

It is an integral part of the engine and operating in conjunction with the large storage battery. The combination electric motor and automatic circuit breaker is found on the instrument board.

The clutch is a multiple disc, dry plate, requiring no slight pressure to operate. It is very smooth in engagement and very positive in action, and the adjustment is particularly simple.

The transmission is the selective sliding gear type, three speeds forward and one reverse. The gears are special and heat treated. They

are of positive interlocking hand control so easy to operate that the gears can be shifted with the tips of the fingers.

Through single, large, improved, automatically lubricated universal joint and fully enclosed propeller shaft, through spiral gear in the rear axle, is the drive. The propeller shaft housing connects directly with the rear end of the transmission. The joint enclosing universal. Strut runs from front end of the propeller shaft housing to the axle housing keeping them in perfect alignment. Both torque and drive are taken through ball joint.

The rear axle is the three-quarter floating type which means that the weight of the car is taken on axle tubes and axle driving torque is taken by axle shafts. The differential is mounted on high duty ball bearings, piston shaft an extra large ball bearing, rear wheels on Hyatt roller bearings. Spiral bevel gears are fully adjustable.

The service brakes are Buick type, external contracting, operating on drums of unusual size and area on four wheels. The equalizer insures proper distribution of pressure to front and rear brakes. They are easily adjusted for wear with a simple screw adjustment. Hand brake of internal expanding type. Operating on rear wheel brake drums only.

Drop-forged, I-beam of carbon steel, reverse Elliott type, double heat treated steering knuckles and tie rod yokes characterize the front axle. Axle especially designed to operate with four-wheel brakes. New departure ball bearings for the front wheels.

The wheels are of artillery type with six flanges. Tires are 31 by 4.95 inch, low pressure, on all models.

The steering gear is of improved semi-irreversible split bronze nut and worm, with large adjustable ball bearings to take up wear. Steering wheel 17 inches in diameter, short spark and throttle levers in center of steering wheels. A button on top of steering post.

The frame is of reinforced pressed steel, channel section, exceptionally stiff and deep side members. Four heavy cross members. Integral gasoline tank support and spare tire carrier.

Four coil springs are semi-elastic type. The shock absorbers, both being exceptionally long, especially heat-treated, and adapted for each body type.

Of Volcanic Origin

South Africa is of a volcanic origin, and the land in the vicinity of Kimberley is so sulphurous that even ants cannot exist upon it.

No Escape

He who pays coal bills in winter and ice bills in summer is a firm believer in the theory that riches have wings.

HANSEN TAKES 6 TO 1 SCORE

Community Team Visits Lincoln Lot and Trims Mixed Outfit of Local Players

Hansen's community team invaded the Lincoln lot Monday evening and returned with the long side of a 6 to 1 score.

Original plans called for the Baptist team to meet the Hansens but after a view of the visitors a pick was made of the players present and a more-or-less variegated assemblage of local players was selected to meet the Hansen team.

Shirley Brannock pitched the full route for the inter-church team from Twin Falls with eight strikeouts in the first three innings, and but one hit in the final two frames. Brannock's arm gave way and the visitors sent their runners around the diamond.

For Hansen Frank pitched nine ball for two innings, getting two strikeouts and allowing two hits. The right hand was injured, and but one hit in the final two frames. Brannock's arm gave way and the visitors sent their runners around the diamond.

The game was interesting from the first, both for the large audience and the participants, and the umpire handled the game well. Both teams which pulled the solid headed stunt on many occasions.

The sportsmanship and good feeling on both teams was only impaired at the end of the game when a few complaints were made by some of the Hansens for a 6 to 1 score.

Hansen scored two runs on errors and the final four in the last inning on hard hitting. Twin Falls' run came in the first when with two men on bases and one out Brannock sent a drive to shortstop which was caught by the runner, Cook, who stepped first at the time went on to second without touching first and in an eager attempt to complete a double, Hansen overthrew at first allowing Martyn to score. Cook still failed to reach the point and was responsible for the third out when Deal tagged first.

Errors were less plentiful than generally supposed, each team is accredited with two apiece.

The score: R. H. E.
Hansen 6 10 0 4 7 2
Twin Falls 1 10 0 0 1 3 2

The lineup: Hansen: Weaver, cf; Krummy, 1b; C. Weaver, 2b; Scott, c; Frahn, p; 1b; C. Krummy, cf; McCarthy, 3b; Deal, 3b; Howard, 3b; Bennett, rf; Twin Falls: Dalton, 1b; Martyn, 2b; Cook, rf; C. Brannock, p; King, ss; Miller, 1b; Lyons, cf; Farrar, 3b; Jarman, cf; Masters, lf.

SCHEDULE FOR WEEK

Tonight the Presbyterians are scheduled to meet the Christian church at 6:30 sharp.

Wednesday the Baptists play the Methodists at 6:30.

Thursday evening the Knoll team will cross bats with the Presbyterian nine.

NORTHSIDERS LOSE TO KIMBERLY IN POOR GAME

A game which had threats to spare was the Kimberly-Eden contest Sunday in the northside town and which was taken to a 5 to 2 score by the invaders of the Eden lot.

Errors for Eden were responsible for a share of the runs.

Fuller occupied the mound for the most of the game for Kimberly surrendering it only in the ninth inning to Thompson. For Eden Johnson pitched a fair brand of ball for the full route.

The score: R. H. E.
Kimberly 5 4 4
Eden 2 6 8

Batteries: Fuller, Thompson and Minn; Johnson and Fogg.

WATER CLAIMS TO BE PUSHED

Twin Falls and Minidoka Directors Take Similar Action Regarding River Storage.

Authorization for "appropriate action to enforce the rights of the Twin Falls Canal company with respect to its claim to natural flow of Snake river" during this season in Jackson Lake reservoir by upper river users under an exchange plan adopted by the "committee of nine," was voted by directors of the Twin Falls company at a joint meeting here Sunday with directors of the Minidoka irrigation district and the Minidoka south side district.

Such action, it was provided in a resolution adopted by the Twin Falls directors, is to be taken in the event that satisfactory results are not obtained through negotiations to be made for the Twin Falls company by Burton Smith, general manager, and J. R. Bothwell, attorney, who were appointed to "take up the questions of release from Jackson lake of the water that has been stored for the year 1924 from a natural flow storage and the future question of storage of the natural flow."

Minidoka directors, who at a previous meeting with the Twin Falls directors held here last Friday, had indicated their purpose to institute legal action to enforce their claim to a major portion of the stored water in question, at this meeting took action similar to that of the Twin Falls directors and designated R. L. Willis of Rupert, manager for the Minidoka irrigation district, and Attorney S. T. Lowe of Burley as their agents in the negotiations and possible subsequent "appropriate action."

Delivery State Stable

Fifty per cent water delivery which was begun through the Twin Falls canal system last week, seems likely to be maintained without interruption for three or four weeks, Manager Smith stated Monday. A major portion of the "water" now running through Twin Falls canal is the flow of Portneuf springs to which is added return flow from the Minidoka projects approximating 100 second feet.

Sixty per cent water delivery for a period of eight to ten days was begun Saturday on the north side, water for this purpose representing mainly the donation of upper river users to relieve the situation on the north side. Some water stored in Jackson lake to the credit of the north side company may be used in making this delivery but the north side water users have decided to hold 25,000 acre feet of storage water in reserve for use later in the season.

BUHL WINS GAME FROM POCATELLO TEAM, 4-3

Buhl held the long end of a hostile baseball fence on Friday Field Sunday afternoon with a score reading 4 to 3. The Pocatello Indians, one of the many teams which the Gate City supports, were the visitors of honor on the occasion and found themselves unable to hit Buhl. Buhl twirled, to any degree of satisfaction and contented themselves with playing a similar game with Buhl batsmen.

TOTAL DEAD AT 98 IN EASTERN STORM

(Continued from page one.)

will not be repaired, but rebuilt.

At the same time fears were shed for the first victims of the storm, three children who were buried today. To-morrow nearly 40 more will be laid to rest but there will be no public funerals. Mayor Hoffmann forbade them, he said there had been enough grief and that public funerals would only "add to the city's wounds."

Twenty-five citizens of Lorain will meet with a like number from Plympton tomorrow to form a committee known as the heroic committee to undertake the task of rebuilding Lorain.

To Cost \$25,000,000

The Lorain group today said it would cost \$25,000,000 to replace the devastated structures with modern buildings. On being notified of this, Governor Danahy declared he would issue an official proclamation inviting the entire United States to contribute to a \$25,000,000 rehabilitation fund to be used in Lorain and vicinity.

Plans now in a formative state call for the raising of practically all of the old structures in the business district. It will take about five years to replace them but at the end of that time Lorain will be one of the most modern cities in the country, the committee said.

The 7,000 homeless and hungry are being taken care of as well as a crushed and battered city can take care of them. They live a primitive life, sleeping on floors or in crude shacks and tents. They eat at Red Cross and Salvation Army canteens but have managed to accomplish the routine of living.

WOMAN TELLS OF TURK'S NEAR EAST DEPREDACTIONS

Mrs. Charles Gannaway Speaks Sunday Evening at Methodist Church; Accompanied by Armenian Girl.

Turkey and her attempt to dominate the Near East and the extermination of a quarter of a million Christians was the subject of Mrs. Charles R. Gannaway's address at Sunday evening at the First Methodist church and who recently returned from the Near East accompanied by a four year old Armenian girl. Mrs. Gannaway was one of the first of a group of Near East relief workers to leave America following the world-war.

She told of her work in Mesopotamia, Turkey, where she was patron of the home for Armenian girls who were rescued from Turkish houses. Later Mrs. Gannaway assisted her husband in medical work in other sections of Turkey. She returned to America from Beirut, Syria, where she was director of an orphanage housing 1400 girls.

Zadi, the four years of age Armenian girl, has received much attention from Americans in every city they have visited, said Mrs. Gannaway.

"Zadi is getting so much attention," said her foster mother, "my only fear is that she will get spoiled."

"We really had no intention of adopting Zadi," she was but one of the many children that the doctor was looking after in the hospital, and she was not attractive then as she is now. People who see her now think we made our pick of the 50,000 orphans. But we have pictures taken two years ago which will prove how very unattractive she was then.

"I wish Americans could realize," she continued, "that there are 50,000 more like her in the orphanage of the Near East; as well as 100,000 for whom there is no room."

"We teach the children the language of the country where they are living, as well as their own language. We are trying to give them an elementary schooling and train them in some trade for which there is demand in the Near East, so that they will be qualified, at the proper age, to take care of themselves."

"All through Armenia and Greece the name of America is fairly worshipped. Grieved from the tragedy of starvation they are grateful. This, we believe, will help in no inconsiderable way, to establish peace and good will in that land of age-long hatreds."

West Virginia. The Davis people handed the McAdoo people a howl of derision at that. Maine gave 2 to McAdoo, 4½ to Emith, 5½ to Underwood.

see some of the candidate managers shivering. At any rate everybody was watching his step. The first bad luck struck McAdoo. In Arizona he lost one to John W. Davis. It did not make any difference to California, however, or

Figure 1 is a line graph showing the percentage of total sample for each age group (0-14, 15-24, 25-34, 35-44, 45-54, 55-64, 65-74, 75+) across different years (1970, 1980, 1990, 2000, 2010, 2020). The y-axis ranges from 0 to 100. The x-axis shows the years. The 0-14 age group shows a steady decline from approximately 25% in 1970 to 10% in 2020. The 15-24 age group shows a slight increase from approximately 15% in 1970 to 20% in 2020. The 25-34 age group shows a slight increase from approximately 10% in 1970 to 15% in 2020. The 35-44 age group shows a slight increase from approximately 10% in 1970 to 15% in 2020. The 45-54 age group shows a slight increase from approximately 10% in 1970 to 15% in 2020. The 55-64 age group shows a slight increase from approximately 10% in 1970 to 15% in 2020. The 65-74 age group shows a slight increase from approximately 10% in 1970 to 15% in 2020. The 75+ age group shows a slight increase from approximately 10% in 1970 to 15% in 2020.

McAdoo would be able to hold his lines in the face of a many-sided attack.

"We have shown," continued Rockwell, "that we have an irreducible

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group and an experimental group. The control group received a standard dose of 10 mg/kg of morphine, while the experimental group received a higher dose of 20 mg/kg. The subjects were then subjected to a series of tests, including a pre-test, a post-test, and a follow-up test. The results of the tests were analyzed using a two-way ANOVA, and the results are presented in Table 1.

A COOL PLACE TO DANCE

NEVER in the history of this store have our windows been so interesting as now. Most of our advertising is being done through the windows—where you may see as well as read. The changes are frequent, in many cases occurring several times during the day. It's worth one's while to come here "window shopping."
