Millionaire's Son Shot by Woman

DETECTIVE W. J. OSHEW, Y. M. M. KORA, SPALAJKOVICH

CHRISTOPHER HUPFEL, 33, son of the multimillionaire, New York, banker and real estate operator, Adolph Hupfel, was shot twice in the face, it is alleged, by Iora Spalajkovich, 40, daughter of the former Serbian ambassador to Berlin, who was immediately placed under arrest.

Hupfel and Iora Spalajkovich were first linked in 1918. The names of Hupfel and two doctors were trying to send her to an insane asylum in January, 1923. In January, 1923, she entered suit for \$700,000 against him, charging malicious mischief.

FARM RELIEF REPORT GETS CONSIDERATION

Senate and House Agricultural Committees Study Commission's Recommendations from Various Angles.

WASHINGTON, Feb. 13.—The report of the president's agricultural conference was considered from different angles by the senate and house agricultural committees today.

Carry Grading Report

While Chairman Carney of the conference was explaining the report of his colleagues to the senate committee today, representatives of agricultural organizations advocated speedy passage of the new McNary-Haugen farm bill.

Flora and Fauna Vanishing

It is urged upon biologists to exert "more serious efforts to rescue a few fragments of vanishing nature" through the medium of science.

Attention, Farmers

1925 is the year to put a reasonable part of your good land in sugar beets.

We do not know of a failure in crop following a winter when we have had good frozees with sufficient molasses.

Seven per cent of the available land, properly formed to beets, will insure a 120-day run for the Twin Falls plant, that has stood idle this year.

By utilizing the by-products from beets 200,000 lambs can be fed with your surplus hay and still produce enough milk and butterfat to supply the state of Idaho.

Boots are the best cash crop grown on the Twin Falls tract because when the crop is raised the market is ready and price fixed so that the farmer who has enough beets to pay his taxes and other obligations is able to hold his beans, potatoes, wheat and hay until the price suits him.

The 1925 Contracts are now available and are the only profit-sharing Contract ever and above an absolute guaranteed price that is in existence today.

We solicit a reasonable amount of your adaptable acreage and assure you we are here to make a success if you will do your part.

CALIFORNIA VOTE ON MUNICIPAL POWER ISSUE

Resolution Adopted at Chamber of Commerce Meeting Would Submit Question for Popular Decision.

An open meeting of Twin Falls Chamber of Commerce attended by between 25 and 30 citizens in the lobby of the room here Friday night with a single dissenting vote, a resolution calling for an opportunity for Twin Falls citizens to express their opinion for or against establishment of a municipal power plant for this city.

The particular power issue mentioned in the resolution which was offered by Arthur L. Swain, former president of the chamber of commerce, although other speakers mentioned the Crown and D. E. Detweiler, discussed possibilities of development of cheap power at Clear Lake site in Snake river canyon north of Idaho.

Shad L. Hoaglin, Twin Falls mayor and president of the chamber of commerce, who presided at the meeting, in a review of recent achievements of the chamber and outline of its possible future activities, included a proposition submitted by W. C. Hazard, owner, for sale of the Clear Lake site to the municipality for \$200,000.

Resolution for \$200,000 of municipal power development at Clear Lake, according to the owner's estimate, has been given at between \$35,000 and \$40,000.

Tells Limitations of Law. Opposition to the municipal power development proposition is expressed in the meeting on the subject of the law by W. C. Hazard, who has been planning, in response to opinion by Mr. Hoaglin, to have the law changed so as to legalize the Idaho state power plant in the case of J. D. Tucker, former mayor of Twin Falls, and other members of the Twin Falls municipal commission, involving municipal water rights, the city cannot fix a rate that will provide for this interest, and only of tax levy against property.

"Twin Falls already owns \$200,000 general obligation bonds as 50 percent of the municipal power plant, and it is not possible to issue any more bonds for the purpose of improvement purposes, is required by the state constitution and general obligation bonds," Mr. Hoaglin declared. "Twin Falls already is carrying a heavy load of bonds, and for that reason," Mr. Hoaglin added, "I should oppose voting of additional bonds at this time for municipal power development."

Mr. Sprague said he objected to the proposal because of increase in tax rate. "The rate would be increased to 10 percent," Mr. Sprague said, "and this is an important factor from the standpoint of prospective investors and home builders in the community."

Reply to these objections, Mr. Swain asserted that the only question to be determined is whether or not a municipal power plant could be developed and operated at a profit. It made no difference, Mr. Swain argued, whether the Twin Falls tax rate were increased or there were a compensating reduction in power rates.

Mr. Swain and C. H. Thomas referred to reports of successful operation of a municipal power plant at Idaho Falls, Idaho, which has developed into a business enterprise. Mr. Thomas suggested that arrangements be made for a public hearing for discussion of the power proposition and advised obtaining the largest meeting place available in the city.

The meeting recorded its decision with regard to the power proposition that it be referred to the voters by Mrs. Evelyn Aldrich of New York, who is the only woman who has ever negotiated the sale of the Copper River, mining company at Central Idaho. It was estimated that the sale was \$500,000, and who in this address discussed possibilities for development of the resources of this region.

Lists Industrial Opportunities. Indicating a number of industrial opportunities because of production here, Mr. Swain mentioned that there are new materials required. Mrs. Aldrich enumerated canning plant, candy factory, wooden mill and packing plant. In this case, she asserted, are cramped for space and installed by labor troubles and would take advantage of Idaho's industrial opportunities if they only knew these opportunities exist here.

Explaining that she spoke in this regard to the women of Twin Falls, Mrs. Aldrich stated that there are in Twin Falls a number of organizations "which seem to be working up individuals and doing a great deal of good for the community. She said that in this situation she "saw a lack of cooperation" and "wondered whether or not other fellow citizens unless they exactly coincide with their own."

STANDARDIZATION FIGHT IS CARRIED TO COURTS

W. M. Lambing Appeals from Commissioners' Order Dictating New Pottery at County Hospital.

In an action instituted in district court here by W. M. Lambing of Twin Falls, through E. M. Wolfe, assistant attorney general, members of the present board of county commissioners are called upon to defend in court the action of their predecessors on December 27, last, in ordering standardization of Twin Falls county general hospital in accordance with minimum requirements of the American College of Surgeons. Mr. Lambing appealed from this order of the court.

The appeal, according to its text, is made to protect the interests of the taxpayers and the right to receive treatment in the hospital by practitioners of any school of the healing art who are duly licensed to practice in Idaho. It is alleged further that standardization was done in the interests of practitioners of medicine and surgery in the exclusion of all other schools of the healing art.

Licensed to Wed—Lee R. Jordan of Buhl and Alice M. Brown of Twin Falls, returned Friday from California at the office of the county recorder here.

To Study Engineering—Philly Rendahl, son of Mr. and Mrs. B. N. Rendahl, is to leave this morning for Milwaukee where he will enter a school of engineering.

Visits Twin Falls—Jay L. Downing, for a number of years superintendent of schools at Kelso, and now engaged in the practice of law at Lovelock, spent Friday in Twin Falls on business visit.

In Tacoma Hospital—Beverly Richey, former resident of Twin Falls, and now employed by the Northern Pacific railroad, is a patient at the railroad hospital in Tacoma, suffering from severe sciatica, according to word received here.

BUHL AUDIENCES HEAR MESSAGES

Strong Addresses and Poultry School Feature Day's Session of Farmers' Course.

BUHL, Feb. 13.—(Special to The News).—Outstanding addresses at the week-end sessions of the Farmers' school here were delivered this morning by J. J. Mullins, dean of the University of Idaho school of agriculture, on "The Agricultural Situation," this afternoon by W. W. Deal of Nampa, master of the Idaho state grange, and this evening by F. E. Roberts of the International Harvester company extension division, on "My Neighbor," sessions of a poultry school.

Special today by Fred C. Moore, poultry specialist of the University of Idaho extension division. An interesting feature of Saturday's program is to be afforded in a discussion by local doctors of the subject of "Manufacturing of county hospital."

The meeting recorded its decision with regard to the power proposition that it be referred to the voters by Mrs. Evelyn Aldrich of New York, who is the only woman who has ever negotiated the sale of the Copper River, mining company at Central Idaho. It was estimated that the sale was \$500,000, and who in this address discussed possibilities for development of the resources of this region.

Lists Industrial Opportunities. Indicating a number of industrial opportunities because of production here, Mr. Swain mentioned that there are new materials required. Mrs. Aldrich enumerated canning plant, candy factory, wooden mill and packing plant. In this case, she asserted, are cramped for space and installed by labor troubles and would take advantage of Idaho's industrial opportunities if they only knew these opportunities exist here.

Explaining that she spoke in this regard to the women of Twin Falls, Mrs. Aldrich stated that there are in Twin Falls a number of organizations "which seem to be working up individuals and doing a great deal of good for the community. She said that in this situation she "saw a lack of cooperation" and "wondered whether or not other fellow citizens unless they exactly coincide with their own."

LINCOLN, PERFECT SCOUT

Twin Falls Lad Pays Tributes to Emancipator; Sets Oath to Success on Precepts of Scoutcraft.

Abraham Lincoln is termed the "perfect scout" in the following appreciation which has been written by Tim Robertson, an eagle scout of Twin Falls.

"Although I am not a scout, I have been in the scout movement since I was a boy. I have seen the principles which govern it, and I have seen the dawn of civilization. In every age man who has attained the pinnacle of success has used its precepts as stepping stones.

Among the most outstanding of these was Abraham Lincoln, known throughout the world as preceptor of the Union and agent of humanity. His boyhood, spent as it was in the backwoods of Kentucky and on the frontier of Indiana, taught him early that which many a scout learns today: hard work, hard study, sobriety, camping, staking, pioneering and so on.

His intellectual attainments were marked by the same perseverance that distinguished his knowledge of the out of doors. Once he learned to read and write he never wasted his spare time for amusement or opportunity to increase his store of learning.

The life of Lincoln seems to have been "guided instinctively" by the principles of the scout laws. His nickname of "Honest Abe" speaks for itself as regards to the first of the scout laws. The fiber of his character and the purity of his motives in all his actions is evidence of his "loyalty to all to whom loyalty is due." As of his helpfulness, his fellowman, Abraham Lincoln stood at all times ready to serve. A day never passed in his life without his "daily good turn."

In like manner numerous instances in his life illustrate his constant use of the scout principles. In other words, he was a scout in all his life. Thus we find Abraham Lincoln, the ideal scout, at all times true to himself, his country and his God.

Lightning as a Photographer. Sometimes amusing and almost unbelievable anecdotes find their way into official newspaper reports. For example, the following statement of lighting as a photographer, sent in by Candler Cobb, an American trade commissioner: "In the hour of an old best I recently cut up on the island of Sky there were found burnt marks in the very heart of the stone showing a man's name and the date, '1830.' It is supposed that three years ago lightning struck the spot."

TWO CASTLEFORD MEN HELD ON LIQUOR CHARGE

H. King and John Mason Plead Not Guilty to Alleged Possession of Liquor Seized by Officers.

Charles H. King and John Mason, of Castleford, Idaho, in protest herein, pleaded not guilty to charge of illegal possession of about three bushels of liquor seized by deputy sheriff C. G. Gieseler last Thursday. Preliminary hearing in the case was set by Judge J. L. Holden for Wednesday next; the date being advanced because of King's statement that he had been indicted for illegal possession of liquor on Monday. Each defendant was admitted to bond in the sum of \$200.

Saramonic metaphors. A political speaker said that the present government has sown a harvest which will be reaped by the people. Another said that "the floodgates of ire and indignation are stilling through the land area in arm." A third that "the (Mr. Duff) is a mere squawking with his hand on the rudder." But to Bishop King we must award the prize. He said that Mr. McKeen's speech was an "unintentional plot which, like him up in a tight corner, led it should have, pretended to be dead until it got up and trotted home on the friendly back of the blabber of St. Asaph."—Boston Transcript.
