GOVERNOR CUTS \$260,000 FROM APPROPRIATIONS

Twenty-Seven Bills Disposed of Tuesday by State's Chief Executive; Desk Is Now Cleared.

BOISE, Idaho, March 17 (AP)—Twenty-seven bills were disposed of Tuesday by Governor C. E. Moore, either by approval or veto, while two were allowed to remain on his desk to become laws by default. The bills, worth \$260,000, were signed up during the first week of check Tuesday night, the last remaining bills of the 1925 legislature which passed 265 bills during its session. In five appropriation measures the governor withheld approval from items representing office expenses, and from state-owned office districts. All other bills were approved and 11 vetoed. More than \$260,000 has been cut from appropriations, according to a statement from the governor's office, all the bills partially approved since the amounts were given Governor Moore to pass upon.

Editorial.

The most notable bills which were passed by virtue of their being either signed or vetoed, are house bill 258, appropriating \$17,407.04 to meet relief claims, an aggregate of items from bonds, office expenses, and state-owned office districts, and insurance accounts, and senate bill 100 by Van Horen, Hafferty and Harrigrove for \$25,000 for a wagon bridge across the Snake River at Barberville, handled by the Amundsen Committee of Baker county, Oregon, provided a like amount is appropriated by Oregon. House bill 306, the savings bank bill introduced by the bank and banking committee, authorizing the formation of trust companies and providing for supervision, management and control of such institutions and the investment of savings deposits, was the last measure to be signed by the governor Tuesday afternoon.

Dairy Master.

House bill 231, by a committee on agriculture, which would have amounted to a director of dairymen carrying an appropriation of \$10,000, was given approval. This measure provides for inspection under supervision of the commission of agriculture of the places where dairy products are manufactured or offered for sale. The appropriation covers salaries, wages and other expenses.

House bill 309 by the appropriations committee, carrying sums totaling \$298, 000 for salaries, wages and other expenses of offices and bureaus of the state department of public works, roads, railroads, water power, state departments of agriculture, farm markets, plant industry, animal industry, state board of sheep commissioners, department of reclamation, and other sub-departments of state office, was signed.

Educational Bill.

House bill 220 by the appropriation committee, asking \$80,000 for construction or for extensions and improvements to the buildings of the University of Idaho was another of the important measures signed. This bill provides that expense for improvement of the Agricultural Experiment Station be increased to \$100,000, and at the same time the Idaho Tech \$60,000, and at the University \$20,000.

In all, \$1,200,000 for construction, carrying a total sum of \$1,200,000.

Mr. Moore recently asserted that a separate bill, if necessary, could be accomplished, giving the

Gem Smuggling Plot**

Tolls Commissioner He Believed Diamonds Had Been Lost by Governor's Wife.

NEW YORK, March 17 (AP)—Victor de Caro, purse of the Leviathan, was arrested here as he left the city yesterday. He is charged on a charge of attempting to smuggle uncut diamonds valued at approximately \$50,000.

De Caro, who believed the diamonds had been lost on the Leviathan by Mrs. Alfred E. Smith, wife of the governor, while en route to France recently was interviewed by government officials.

Governor Smith, commenting on the incident here tonight, declared, "I do not believe Mrs. Smith, anybody belonging to her, ever owned \$50,000 worth of diamonds."

RECEIVERSHIP OF ROAD CONSIDERED

Readjustment of Financial Structure of Railway Company Expected.

NEW YORK, March 17 (AP)—A readjustment of the financial structure of the Chicago, Milwaukee & St. Paul Railroad company, probably through the issuance of new stock and bonds, and the transfer of office districts, and insurance accounts, and senate bill 100 by Van Horen, Hafferty and Harrigrove for \$25,000 for a wagon bridge across the Snake River at Barberville, handled by the Amundsen Committee of Baker county, Oregon, provided a like amount is appropriated by Oregon.

House bill 306, the savings bank bill introduced by the bank and banking committee, authorizing the formation of trust companies and providing for supervision, management and control of such institutions and the investment of savings deposits, was the last measure to be signed by the governor Tuesday afternoon.

Statement Made.

House bill 231, by a committee on agriculture, which would have amounted to a director of dairymen carrying an appropriation of \$10,000, was given approval. This measure provides for inspection under supervision of the commission of agriculture of the places where dairy products are manufactured or offered for sale. The appropriation covers salaries, wages and other expenses.

House bill 309 by the appropriations committee, carrying sums totaling \$298, 000 for salaries, wages and other expenses of offices and bureaus of the state department of public works, roads, railroads, water power, state departments of agriculture, farm markets, plant industry, animal industry, state board of sheep commissioners, department of reclamation, and other sub-departments of state office, was signed.

Educational Bill.

House bill 220 by the appropriation committee, asking \$80,000 for construction or for extensions and improvements to the buildings of the University of Idaho was another of the important measures signed. This bill provides that expense for improvement of the Agricultural Experiment Station be increased to \$100,000, and at the same time the Idaho Tech \$60,000, and at the University \$20,000.

In all, \$1,200,000 for construction, carrying a total sum of \$1,200,000.

Mr. Moore recently asserted that a separate bill, if necessary, could be accomplished, giving the

WEED FIGHTERS TO MAKE STUDY OF NEW INVADER

Ed S. Larned, Director of
County Bureau of Control,
Discusses Russian Knapweed;
Offers Suggestions.

Determination of the best method for combating the Russian knapweed, a new noxious weed, made up of the stems, the roots with its ability of severe damage to the seed industry, will be one of the problems that will engage the attention of the Twin Falls county bureau of noxious weeds, which will be organized according to Ed S. Larned, director of the bureau, who deals with the word in the following, which is one of a series of articles regarding proscribed weeds in Idaho:

The Russian knapweed is a new comer to Idaho and the northwest. It is a common weed throughout Russia and Turkestan. The alfalfa seeds produced in the country contain a small amount of the "prickly" or "knap" seed. There was introduced to Seattle something over two years ago a boat load of alfalfa seed from Turkestan—and this seed was jobbed out to dealers throughout the country. This seed was bought and sowed its share.

Knapped thus far is to be found in scattering patches over the country. It has yet had an opportunity to spread, but it is now in the original spots of infestation. Aside from its ability to seriously lower the value of land which it has become established it is apt to develop into a pest. It is a plant which is a threat to the quality of our seed products. If it is allowed to spread and its seed finds its way into the alfalfa and clover seed produced locally the premium which weeds have brought will probably change to a discount.

Characteristics.

The Russian knapweed is an erect perennial plant. In the spring it bears a cluster of flowers, which are similar to the knapweed, or sage color, later in the season it produces its seed stalk and the leaves grow in pairs, the seed stalks and an average of different shapes, some being slender and greenish-green. The seed stalks are of the branching variety, about two feet in height and produce a blossoming on the terminal of each.

The flower is a small, bell-shaped, what like that of the Canadian thistle, in that a tuft of purple down grows out from the leaf-like calyx. It can be distinguished by a covering of fine hairs, which are not as fine as those of the flower, the appearance of a tiny plumule. Apparently at one stage of its evolution this plant produces a "winged" seed like that of a Canadian thistle, but at present the development of the seed is more or less irregular, which remains in the form formed by the calyx. The seed is light gray in color, about the size of a small seed.

The plant propagates itself by seed production and by the extension of its underground root stalks. The root stalks run horizontally beneath the surface of the ground about a foot apart, about a quarter of an inch in diameter and are tough and woody in character.

Very little experimental work has been done on establishing a method of eradication for the plant. The coming action by observation of various methods we hope to be able to establish the one best way of ridding this pest, but that it is important to note that spraying with herbicides will prevent the formation of leaf growth above the surface which can be accomplished by flooding smothering or by continuous cultivation. Because of the low leaf it is not practical that spraying with herbicides will prove effective.

Wearers of the American Falls, Idaho, District, numbers A-100 to A-257, both inclusive, will be paid on presentation to district office.

Interest rates March 27, 1925.

CROSS-WORD PUZZLE STORY WHAT THE CLOCK SAYS

TICK-TOCK says the clock. There are sixty little tick-tock seconds in one—13:6-10-15-20 so can you tell me what time it is?

13:1 And when do twenty-four 8:9-10-11-12 make?

Well, if that makes one whole 25-26-27 tell me what seven of them make and a h o w many 13-19-21-22 in month.

Do you know the little bell at the top? It is the alarm and what a 2-3-4 noise it makes in the morning! I'll 5-8-14-I say how to work 13-14 you won't be late for school. One 7-12-16-22 the alarm to wake one up in the morning but no 16-17-18-pegs to be rung to bed at the 19-23-25 of the day. This clock is wound up with a 24-27 at the back.

STATE RESTS CASE IN OIL LEASE-SUIT

(Continued from Page 1)

Liberty bond between the Continental Oil Company and Paul Underhill, oil company, was filed in the government's charge that the \$25,000 loaned by Underhill to Fall in late 1923, 17 months after the execution of the

trust deed, was unenforceable.

Project Home Jones, was given the

interior secretary for favored

provisions, according to the original

agreement, will be called.

Underhill testimony it was alleged

that this \$25,000 was received to the credit of Fall and deposited in a bank in El Paso, Texas.

Another part of the government's tes-

timony to be combated by the defense

will be that which it was charged

that the loan was executed in secrecy

and that the attorney general kept it from being public announced.

Before closing its case the govern-

ment introduced into the record a doc-

ument of bond transaction in New York

and bond deposits in banks in Pueblo, Col-

orado and Carbondale, N. M.

When the government rested Mr. Lyle said:

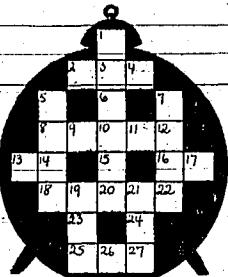

"Then I will overrule the motion to

strike and judge Kennedy."

ANNOUNCEMENTS

The ladies of the Methodist Ladies' Aid Society will meet Saturday afternoon at the following places: Mrs. Whittington's at the church parlor; Mrs. Hook's at Mrs. Preckel's; Mrs. Rawling's at Mrs. White's; Mrs. Guttmann's at Mrs. Miller's; Mrs. Finch's, 421 Second avenue west; Mrs. Herland's and Mrs. Long's at Mrs. Paul Foster's, 319 Third avenue east.

A

delightful social hour was enjoyed during the half-hour luncheon carrying the colors devoted to Mr. Patrick was served.

The Ammon class of the First Baptist church met at the home of Mrs. Jean Drugh at the Oasis Inn, street corner of Main and 1st, on Tuesday evening, March 12, and in addition to the members present over the meeting, Mrs. Katherine DeWitt was voted into the class. A great humor followed the business session, and the ladies several daily reported to the pastor and his wife present. The next meeting will be held with Mrs. Marie Marilyn in April.

The Latvian Camp Fire girls were slightly entertained at a party given yesterday evening at the residence of Mrs. Bertha Proctor at the former in Blue Lakes boulevard. Games were played and dancing followed. Utility refreshments were served by the hostess. Guests present were Mrs. Proctor, Mary Proctor, Verna Barnes, Phyllis Evans, Vivian Rice, Ruth Hansen, Owendell Bradley, Katherine Larned, Grace Carey, Helen Vining, Anna Hansen, Mrs. Walter Johnson, Mrs. George Johnson, Mrs. John Johnson, Mrs. Frank Johnson, Mrs. John C. Clark, David and Emily Vining, Mrs. John Miller, Mrs. John Miller and son, Harry Paul, Glen Jackson, J. C. Clark, David and Emily Vining, Mrs. Mr. and Mrs. E. J. Fullerton, Mrs. John Miller, Mr. and Mrs. Fred Shadys and daughters, Esther and Beulah, Mrs. Rankins and daughter Alta, Mrs. Hansen, Mrs. Victor Bush and son Keith, Mr. and Mrs. John Miller, Mrs. Harry Davis, Harry Dunn, Kenneth Beach, Walton Peck, Miss Polly Thomas and Carl Brown.

The first Social Club entertained members with a delicious meal party for members and their husbands at the Business Women's club with Mr. Bill C. Sawyer as hostess. The lady's prize for high score in pinwheel was won by Mrs. John Bush and the gentleman's prize by Mr. John Bush and the general door prizes were won by Mrs. Henry Henningsen and C. C. Higgins, respectively. About 60 were in attendance and delicious refreshments were served at the conclusion of the games.

Miss Marjorie Smith and Miss Florence Johnson entertained the Women's club with a delicious meal party for members and their husbands at the home of Mrs. Arthur J. Peavy. After the transaction of business a short program was given and the national Patriotic Association and its work.

gallow with Miss Gibbs, Mrs. Myrtle Tamm, Mrs. Tebbins as hostesses. All ladies are asked to bring material in order that work may be started on the White Cross handbag. There will be a general program. Miss Masters will sing; the Rev. Mr. Butler will give

suggestion on the work and Miss Mar-

colls, Wyau will give a declamation.

The Euphonial Guild will meet with

The Rev. E. J. Ostrander, 1473 Maple Ave.

on Thursday afternoon, March 19.

John Appleman was pleasantly surprised yesterday by the visit of his daughter, Mrs. Jack Miller, his eighty-fourth birthday anniversary. The centerpiece for the table was a beautiful birthday cake, which was a masterpiece of skill, and the cake was a real success. The cake was a round cake, with a single layer of frosting, and the top was decorated with a variety of fruits and nuts.

John Appleman was a pleasant man, and he was a good host, and he was a good guest.

SPORTS**SHELLEY GIRLS****CHALLENGE BUREAU**

Eastern District Champions Call for Contest to Decide Claim to State Title.

Buh High School girls' basketball team, champions of the eastern district and southwestern districts, have challenged by Shelley high school girls' team to defend their claim to the state title, according to advice received Tuesday from the National Federation of State Teachers.

Shelley girls claim the championship of the eastern district by reason of claims for the state title by reason of winning the first in the following listed sectional contests: The News.

The Shelley high school girls' basketball team is entitled to claim the girls' state high school championship.

For the last two years the record has been won by Shelley girls.

Here is the record:

Opponents. Shelves. Score.

Idaho Falls 4 12

Platte 17 12

Ammon 14 29

Blackfoot 8 26

Pocatello 19 26

McCall 4 43

Blackfoot 8 32

Firth 21 32

Ashley 15 15

Another claimant to the championship is Buh High School, which has had a spotty showing. The board of athletic control has not arranged any championship series and Shelley's claim is just as good as Buh's. In fact, Buh is not at all willing to give up the claim to Shelley's superiority. If Buh wishes to play Shelley for the championship, the latter is ready to "fight."

Miss A. E. Jones, athletic coach at Shelley, says the Shelleys are the best girls' basketball team in the state.

She is willing that the Shelley girls meet any team in the state to determine the championship. Superintendents of schools in the state telegraphed a protest of Buh's claim to J. J. Roe, member of the state board of athletic control, and he also challenges Buh's right to claim the championship.

If Buh decides to lay further claim to the championship, said challenge must be accepted.

VAUDEVILLE AT ORPHEUM.

Vaudeville bill at the Orpheum the other today includes five acts of unusual entertainment value.

There will be ten acts and an additional act at which they call "Bills of Vaudeville" as they do most everything usually considered as part of a variety program. They sing, dance, do pantomime, tell stories, sing, juggle, etc., etc. All members of this troupe are versatile, have good looks and the ability to please and entertain.

Princess Fawn Eyes and Company, "Original American Indians," present comedy and dancing offering.

Both are excellent singers and artistic dancers presenting a repertoire of popular numbers and some restricted songs that are reverently received by audiences.

Each dancer carries the antique look of her costume.

The act is beautifully costumed and very presented.

Charles and Ina M'Avoy—Ina M'Avoy is a kid impersonator and mother of the famous "M'Avoy" comedians.

Her kid impersonation is a composite of all the kids in the audience.

She is a clever bit of characterization.

Ina M'Avoy is the foil for all the kidding and her result is a continual round of laughter.

Norman and Landre—Salvo "is a

kind of blonde who carries human flesh

into his act. Salvo is the

most popular act in the entire set of comedy.

Charles Norman and Louise Landre

have a keen sense of satire which affords a delightful relief of the dramatic sort.

This is called "Don't Rush

the Act" and has to do with the pretense

of a prospective group to keep mystery.

Frank Evers, presenting a Spanish

dancing novelty on a tight wire, high

above the floor of the stage.

Frank is a master of the art of

imitating and differentiating

so as to make it seem impossible on a thread of steel.

All his feats are performed in the snap-pid rapid manner during his performance.

AT THE IDAHO.

History comes to life in all its vivid

reality at the Idaho theater.

Which is merely another way of saying that "The Fighting West" is a vivid

and graphic presentation of the powerful novel of the same name by Zane Grey.

Grey has his engagement there and

will remain for the next three days.

Those who are familiar with the story of the "Fighting West" will find the

re-enactment of the scenes of the

beginning of the west, and deals with a par-

ticularly important and violent period

of American history—the rush of the

miners in 1870 from their farms in the far

country to the buffalo fields of the far

west.

Not a small measure of the success

of the play is due to the skillful

adaptation of Lucien Hubbard and the

skillful direction of the author, Louis H. H. Howard.

There was no easy task for

the transference of popular story to the

screen it always attended with a good

many difficulties. In this case it was

not only a difficult task but a difficult

one to make it a film, complete with adventure

action, flavored with romance and

clerk full of pictorial beauty.

Nothing has been omitted from the

script to give the audience an accurate

and lifelike portraiture of the old west.

The hardships and privations of

the sturdy pioneers is vividly depicted and the wholesale massacre of

the Indians is graphically shown.

MUNICIPAL POWER

The views of Barry Dibble on the
feasibility of the development of electrical
energy for municipal use in Twin Falls
should be accepted as worthy of full consideration. Mr.
Dibble goes it as his opinion that ten
thousand horse power could be
generated by means of two plants, one
at Auger Falls and the other on Rock
Creek. The thousand horsepower of
available current would not prove
sufficient to take care of the needs
of this City on the basis of present
consumption.

When all is said and done the dif-
ference between corporate owned and
government owned municipally owned
power plants and other public utilities
is largely a difference in methods—

whether it is better to sell current
at cost or below and make up the
deficit out of taxation of proceeds on the
"pay as you go" plan under which
corporate power plants do business, is
an open question.

In Ontario, Canada, which is frequently
cited as an example of the
benefits of government owned power,
domestic current is sold at a much
lower rate than in this country, where
current for manufacturing purposes
take a much higher rate than is
charged for the same service here.

The effort is, of course, to drive man-
ufacturing enterprises out of Ontario
into this country—the very reversal
of the conditions prevail found in the

event of the establishment of a mu-
nicipality owned plant in Twin Falls.

The domestic consumer, however,
does obtain a materially lower rate
on his particular electrical service.

Whether this fact alone should be
garded as settling all question as to
the benefits of government ownership
is a matter of individual opinion.

Notwithstanding the fact that the
general opinion seems to be that the
Ontario experiment is a huge success,

reports made by Canadian govern-
mental authorities are outspoken in
their condemnation of the plan as
is at present operated. As a result
of the low rates charged for the new-
comer a tremendous deficit has been in-
curred, which must some day be paid
out of taxation.

The rate money and the tax money together may amount
to more than a reasonable charge
for the current but, unfortunately,
the people who get the "low rate" are not

those who pay the taxes—a state of affairs which can not possibly be acceptable to any considerable number
of people for any length of time.

An authoritative opinion as to the
amount of capital which would be re-
quired to build a municipal plant or
plants here would be interesting
whether we ever go further in the
matter or not.

This is the point which The News
seeks to drive home—that we need
further facts before we can take a
single step in the direction of a plant
and in order to get these facts we
must be prepared to pay for a very
comprehensive report upon the
matter.

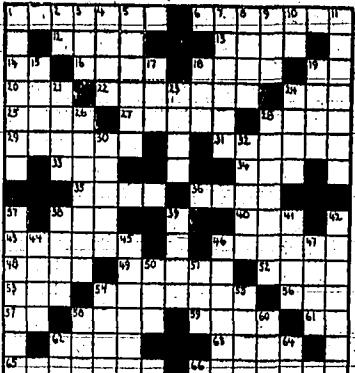

How can any one make up his mind
as to the merits or demerits of a
proposition without at least a reasonable
knowledge of the conditions
which make for the success or failure
of the enterprise?

GENEVA BROADCASTING.
The League of Nations is going into
the broadcasting business. Also the
other business. It is in connection
with the building of the largest radio
station in the world on the top of
Mount Victoria, Switzerland.

The station is intended for the
triple purpose of observing the heavens,
the atmosphere, and the earth.
That is to say, in scientific jargon, it
will be astronomical, meteorological and
geophysical. The cost will be two
million dollars. The radio station is
expected to be powerful enough to
transmit around the world, and
in touch with ship and weather con-
ditions all over the Atlantic and Pacific.
The telephone used by the
radio station will be the best in the
world, and the longest in the world, over
ten feet in diameter, and powerful
enough to ignore distant clusters and
nebulæ and photograph them un-
recorded state.

The plan of the promoters is to have
an international weather office there.

CROSS-WORD PUZZLE

THE INTERNATIONAL SYNDICATE

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES
Start out by filling in the words of which you feel reasonably
sure. Then fill in those which you are most certain of, and
then in turn to still others. A letter belongs in each white
space, words starting at the numbered squares and running either
horizontally or vertically or both.

HORIZONTAL

- 1.—To house
- 2.—Burned by water
- 3.—Feverish
- 4.—Eager, greedy
