The jury finally sworn in, after monotonous days of questioning, charging and reading, consisted of nine men and three women. Both of the alternates are women. TRAFFIC AGENT OUTLINES VIEW ON WOOL RATES

Southern Pacific Railroad Company Official Occupies Stand During Day at Portland Commission Hearing.

PORTLAND, Ore., March 27 (AP) - An opportunity to promote substitution of Australia and New Zealand wool for the domestic trade was seen in the movement of the Boston Wool Trade Association to obtain preferential joint rail and steamship rates on wool from the interior of the Pacific coast states to the Atlantic seaboard.

He said the movement of wool from producing regions along the Southern Pacific lines to Pacific ports is of insufficient volume to justify commodity rates when compared with the volume of other traffic carried. The light car loading of raw wool makes it bulky and costlier in transportation than soured wool.

Dispos of Plants Klein told how San Francisco wool scouring plants might be put out of business by reason of a preferential rail and water rate on wool consigned to Boston or Philadelphia. He said the rate would encourage wool scouring on the Atlantic coast rather than on this coast. He cited an example of how the assignment of wool of lamb counts from Wilmington, Nevada, would have to pay \$242 if carried only to San Francisco, but if through the port of Boston via steamship the rate charge would be \$170.

Nothing could have been more courteous than Troyce's manner when he got over the shock of her sudden appearance and made up his mind to accept the inevitable. The girl looked up at him with timid gratitude and blushed in the most charming manner.

World's Greatest Tunnel
In the Shingler tunnel under the Alps, which is by far the greatest tunnel in the world, the quantity of water flowing out of the southern end, from the many caves encountered in the heart of the mountain, amounted to 15,000 gallons a minute, and furnished sufficient power to compress the air by which the drills were worked, and to refrigerate the tunnel. The necessity for refrigeration may be judged from the fact that the heat in the deeper parts of the tunnel rose at high altitudes to 100 degrees Fahrenheit and was naturally reduced. Observance of a cleanup day in Twin Falls in connection with Boy Scout Citizenship week to be observed here within the next three weeks, is to be urged by Twin Falls city planning commission, according to a resolution reached by members of the commission at a regular meeting Friday evening in the chamber of commerce offices.

Desirability of a method of water delivery to encourage use of sufficient water to maintain and preserve lawns, trees and shrubbery was another matter which claimed the attention of the city planners at this meeting. Several suggestions were advanced and considered but no definite conclusion was reached.

It was agreed that an effort of water service was to encourage use of sufficient water to maintain and preserve lawns, trees and shrubbery in some instances payment of lawn water charges has brought about situations where lawns have been permitted to die out.

The city planners also discussed at some length recommendations looking toward adoption of zoning restrictions in Twin Falls to prevent location of objectionable business establishments in residence districts, and to set out recognized warehouse districts.

LIQUOR CASES OCCUPY COURT

Jury Convict Two of Three Defendants Charged With Illegal Possession.

Two out of three defendants on trial in district court here Friday on charges of illegal possession of liquor were found guilty by two juries which returned their verdicts during the day's session.

Lorenza Selway, house proprietor of a lodging house here, charged with possession of three pots found by deputy sheriffs in a store room at his place of business, was convicted by a jury that returned its verdict at 2:30 p. m. after 45 minutes deliberations. Judgment is to be pronounced by Judge W. A. Babcock next Monday.

Clarence E. Porter, 24, was found guilty of illegal possession of about three quarts of liquor discovered by deputy sheriffs in a dwelling house on Fourth street north, while his co-defendant, Frank Hester, 24, was found guilty by the jury which returned its verdict late Friday evening after deliberations extending over a period of about four hours.

Neither of the defendants testified in his own behalf, but both relied on the testimony of Miss Maud, 22, who was originally the third defendant in the case. Her testimony was unimpaired, accepted, and responsibility for the liquor and wine is being assigned involving two months jail term and \$100 fine.

Malone testified that he had been at the dwelling in which the liquor was found and where Porter and Hester were found asleep when the officers raided the place on March 4, last. He said that he had furnished food and room to Porter for about a week before the arrest and that Porter had followed him here from Salt Lake, both expecting to spend the winter here and secure employment in American Falls or elsewhere in the spring. Hester, he said, was a resident of Twin Falls, but had been a occasional guest at Malone's dwelling.

The prosecution in both cases introduced as witnesses only members of the sheriff's office who had been present at the arrests and the statements of defendants.

The cases for the state were conducted by Prosecuting Attorney E. V. Larson, who was assisted by Assistant Attorney E. V. Larson.
