# VICO MOTOR OIL

## Stands up under Heat

Excessive heat is the mortal enemy of most lubricating oils. They haven't the "body" to withstand the combined pressure and heat of long drives—hence burned-out bearings and scored-cylinder walls.

But Vico, refined from high-grade paraffin base crude oil, possesses the necessary "body" to retain its lubricating qualities long after most oil break down.

Drain your crankcase—refill with Vico and notice the increased smoothness and power of your motor. Vico costs no more than other oil.
