STEAMSHIP LANDS FORBIDDEN CARGO AND IS CAPTURED

Two Thousand Top Boat Taken by Customs Officers After Quarter of Million in Liquor Gets Ashore.

(By The Associated Press) NEW YORK, July 27.—The 2000-ton ship... by customs officers in the Hudson river off Dyckman street today, after the ship had run the gauntlet of the rum censors and their crew unharmed and disposal of a cargo of liquor worth \$250,000 at a landing there, leaving only 1000 barrels short. The crew of 24 men was arrested and the captain admitted having barred the liquor cargo over to "retailers" for distribution.

This is the first known case since the eastward blockade started that a ship of such size has successfully eluded the rum censors and slipped into the harbor.

As the ship was being towed to the barge office, Assistant Collector Barnes of the legal division of the customs service, held a preliminary hearing aboard the vessel, examining Charles Wilson, acting captain, and others of the crew.

Custom officials said that the operators of the Augusta were the most active in the history of the customs and prohibition laws. None of the officers had a license, it was charged, no log was kept and there was no "ship's articles" giving the names of the crew.

Officials Get Tip. The seizure of the Augusta came after cautious officials had received a tip that liquor was to be imported from the ship by the customs officers. Boarded the freighter, but found that of its cargo of 2500 cases of liquor, only 1500 were aboard, the rest only 125 bottles remained aboard in the quarters of the officers.

Assistant Collector Barnes was unable to find the names of the owners of the Augusta, but a contract found among Wilson's papers indicated that the ship was owned by a New York man from a resident of Miami, Fla., for the sum of \$1 and \$1000000.

The contract stated that the ship was to be engaged exclusively in the trade of rum and cognac. The vessel from a suspected rum runner came to New Orleans.

The Augusta, a freighter, is worth about \$250,000.

(By The Associated Press) NEW YORK, July 27.—An unoccupied "radio automobile," controlled by the telegraph key of a wireless transmitter in another car, zigzagged a tortuous path through Fifth avenue's dense traffic today after narrowly avoiding numerous collisions—swung into a parked car near 47th street, it struck head-on for the show window of a candy shop when the driver, jumped to the wheel and halted.

The inventor blamed a nervous radio operator for the accident but declared the experiment a success. Police warned him to conduct his experiments in a more secluded spot.

COOLIDGE GETS REPORT ON FARM

Ranking Member of Agricultural Committee Gives President Opinion of Crops.

(By The Associated Press) BARNSTABLE, Mass., July 27.—A report on the condition of the nation's crops generally was made to President Coolidge today by Representative Farnham, republican of Indiana, ranking member of the agriculture committee.

Mr. Farnham joined with Senator Capper of Kansas in introducing a bill which would give government assistance, in his belief, would help agriculture on a substantial basis.

Mr. Farnham said that the crop situation in Indiana is generally good, but that the wheat crop is somewhat below the average. He also mentioned the condition of the corn, soybean, and other crops.

Mr. Farnham also mentioned the condition of the livestock industry, noting that there is a shortage of feed for the animals.

Mr. Farnham also mentioned the condition of the cotton crop, noting that it is generally good, but that there is a shortage of labor for the harvest.

Mr. Farnham also mentioned the condition of the sugar crop, noting that it is generally good, but that there is a shortage of labor for the harvest.

Mr. Farnham also mentioned the condition of the tobacco crop, noting that it is generally good, but that there is a shortage of labor for the harvest.

GRAIN COMPANY WILL QUOTE AT EARLY DATE

Twenty-Six Million Dollar Cooperative Concern at End of 12 Months Finds Itself Getting Rid of Assets.

(By The Associated Press) CHICAGO, July 27.—Tomorrow, end of the first year of operation of the Grain Marketing company, 26,000,000 cooperative agricultural enterprise, will find the project bringing its affairs to a close as possible. Tomorrow was the date set for the company to begin to liquidate its assets.

The liquidation of the company will be a long process, as it has a large amount of assets to dispose of. The company was formed to help farmers market their grain more effectively.

The company's assets include land, buildings, and equipment. It also has a large amount of grain on hand, which it will have to sell at a loss.

The company's failure is a result of several factors, including a drop in grain prices and a lack of support from farmers. The company was unable to cover its operating expenses.

The company's liquidation will be supervised by a court-appointed receiver. The receiver will have to sell the company's assets and distribute the proceeds to the farmers.

The company's failure is a significant blow to the cooperative movement in agriculture. It shows that such enterprises are not always successful.

The company's failure is also a result of poor management. The company was unable to attract enough farmers to make it profitable.

The company's failure is also a result of a lack of government support. The government should have provided more assistance to such enterprises.

The company's failure is also a result of a lack of market demand. There was simply not enough demand for the company's services.

The company's failure is also a result of a lack of competition. There were other companies in the market that were more successful.

Bryan's Last Words on Evolution Reply to Son of Scientist

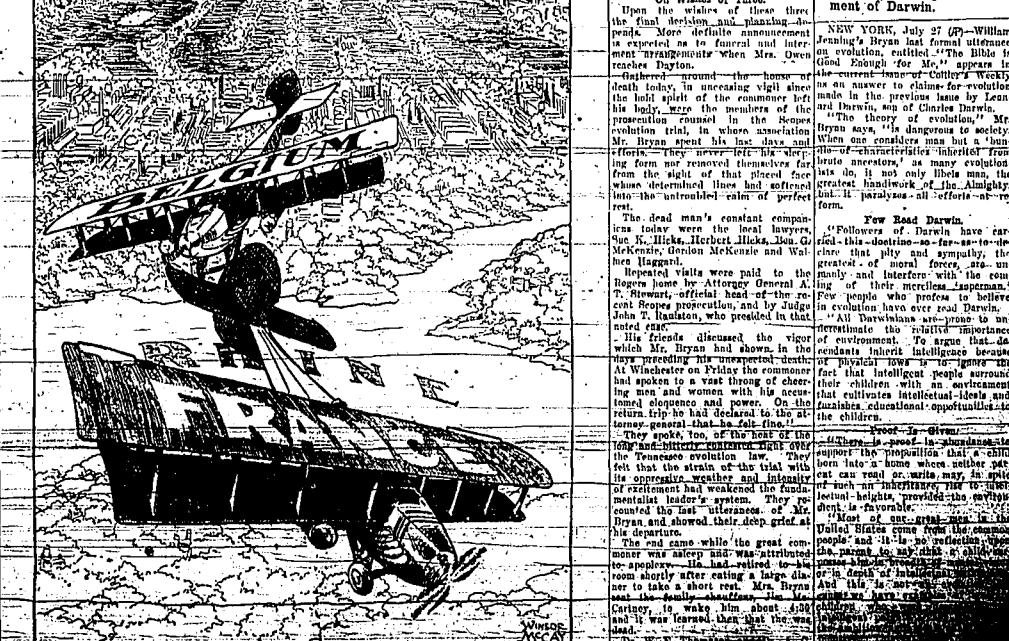

"The Bible is Good Enough for Me," Title of Article Appearing in Defense Against Statement of Darwin.

(By The Associated Press) NEW YORK, July 27.—(AP)—William Jennings Bryan last formal utterance on evolution, entitled "The Bible is Good Enough for Me," appears in the current issue of "Collier's" magazine as an answer to claims for evolution in the previous issue by Leonard Darwin, son of Charles Darwin.

"The theory of evolution," Mr. Bryan says, "is dangerous to society, when one considers man but a mere animal, a creature that has inherited from his ancestors, as many evolutionists say, the same mind and the same great handiwork of the Almighty. It paralyzes all efforts to reform."

Few Read Darwin. "Followers of Darwin have carried this doctrine as far as to the great of moral forces, the unmanly and interfere with the common sense of their mothers' support. Few people are able to believe in evolution have ever read Darwin.

The Baptist team of the church league last night at Lincoln field won a slow game from the Methodist team. The score was 6 to 1. King's trip in the fourth inning was the long long hit of the contest, the rest being either short hits or hits that were not touched due to slow work on the part of the fielders. Klug whiffed after the opposing batter, while Taylor, the Methodist tasser, retired two by the strikeout method.

The Baptists started the scoring in the first, when two errors and a sacrifice brought in a run. In the first of the fourth the Methodist team brought across their only score—Baker, first man up—knocked in the first clean hit of the game.
