FACTIONS STILL FAR APART IN ENGLISH STRIFE

Neither Government Nor Trade Unionists Show Signs of Giving Ground; House of Commons Backs Baldwin

LONDON, May 6.—The British government and the trade union congresses are still far apart. Neither has shown signs of giving way in the general strike now entering upon its fourth day, that has caused the greatest industrial upheaval the British Isles has ever experienced.

Premier Baldwin still insists that general strike orders must be withdrawn before he will enter into new negotiations. Labor leaders reply with an emphatic "No," and declare themselves ready to go into conference with the government with a free hand.

The prime minister has the backing

of the house on measures undertaken to control the strike situation. A labor amendment seeking to modify a clause in the permanent bill for protection of the property was defeated by a large majority.

Want No Violence.

Exemplary conduct on the part of the strikers is again called for by union leaders, and they are obeying orders in a rather unexpected way, for only at two places in Scotland, have any serious disorders occurred. At Glasgow, where about 10,000 men are on strike, the police were roughly handled, and some of the rioters were arrested.

In a message addressed to all workers, the trades union council says:

The council wishes to emphasize the fact that this is an industrial dispute, it expects every member taking part in it to be exemplary in his conduct and not to give any opportunity for police interference. The council asks pickets especially to avoid obstruction, and to confine themselves strictly to their legitimate duties."

EVERYBODY BUSY.
LONDON, May 6, 69.—Everybody from King George to his humblest subject is busier in England than before

the strike. Transportation is so disorganized that strikers on their way to meetings and workers on their way to work put in most of their time walking or wriggling through motor traffic.

Society women, under the leadership of Mrs. Stanley Baldwin, wife of the prime minister, have organized a motor transport corps which is affording transportation for working women in

High Wind Fans Flames That Sweep Little Lumber-Mill Town; Schoolhouse, Mill and Dwellings Burn.

RENO, Nev., May 4. (AP)—Fanned by a gale that reached the velocity of 40 or 50 miles an hour, flames swept the little lumber mill town of Verdi, 11 miles west of Reno and nearly on the

Nevada-California line, starting at noon today and destroyed the lumber mill of the Verdi Lumber company, several million feet of lumber, nine houses and the village school house.

The damage is estimated at \$200,000;

partially covered by insurance. Only the fact that the houses in the Verdi cluster in groups which are scattered over a considerable area saved the entire town.

damaged and the box factory and machine shop also escaped. The fire also damaged the telephone and telegraph wires.

The fire started in the engine room of the mill when the high wind blew the flower-jack down the smokestack flooding the room with fire. It was but a moment until the entire building was a mass of flames and several persons were killed.

The wind scattered embers in the drying stacks and from these lumber piles

SPORTS AT IDAHO U

By Lee Robinson.

South Idaho will send four men in each event to the state meet at Moscow, May 14, according to present plans, the state athletic board having approved the protest of southern schools that two winners of the all-Iowa meet at Caldwell next week were not eligible in comparison with the representation from the north, but with the state board allowing four men in each event, the winner will have to be re-elected.

Joseph McMillan, athletic director of the state, said the university probably would hold the original plan of paying the expenses of two men and that the extra two competitors would have to attend at their own expense.

The Moscow chapter of commerce has backed the meet to the extent of \$2000, to take care of railway fares for the 10 athletes and coaches expected from the south under the original arrangement.

Kellogg and Sandpoint appear to be the strongest teams in the north, while in the north central district Lewiston, Grangeville and Nez Perce are outstanding. Lewiston is backing him on the grounds of better in the hurdles and in the 220 and 440 yard dashes, and upon a half mile which is bidding close to the two minute mark. District meets in the north will be held May 10, the year has at Vernal and the central Idaho at Lewiston.

Outstanding teams in the south include Idaho Falls, Pocatello, Twin Falls, Piler and Boise. All district teams are being held this week, and the all-Iowa meet is slated for May 14 at the College of Idaho at Caldwell. The winner of this latter meet will probably have a good chance to cup the state event.

Why, After The Wonderful Relief This Medicine Has Brought Me, I Just Have A The Faith In It Says Former City Clerk Of Boise, Idaho.

"This Karak is the greatest medicine I ever heard of and I wouldn't be without it if it cost \$25 a bottle. My wife, Emily L. Love, of 1014 Francis Ave., Portland, Ore., was Former City Clerk in Boise, Idaho, from 1909 to 1915, and lived in Portland for 22 years.

"The past seven or eight years it has been a constant source of trouble to me. I suffered with sharp pains through my back and had severe nervous troubles in my head. I couldn't hold on to sleep a night without sitting down to rest.

"And my stomach was simply in dreadful condition. I was just

BYRD'S ARCTIC EXPEDITION WILL CLOSELY FOLLOW-PEARY'S PATH

KING'S BAY, Spitzbergen, May 6. (AP)—Of all the exploring parties now seeking to reach the north pole through the air, the expedition of Commander Richard E. Byrd, more than any other, resembles the heroic and finally successful efforts of Admiral Robert E. Peary.

Byrd selected Peary Land as his base for his attempted flight to the pole. Then, too, the commander set sail from New York on April 6, the anniversary date of Peary's discovery of the pole in 1895.

For their base, Captain Byrd and his crew have chosen King's Bay, while Captain George H. Wilkins decided upon Point Barrow, Alaska, neither of which Peary ever used.

In connection with all the expeditions it is known that in his last years Peary believed in air craft as the best means of navigating the Arctic. Peary-Byrd devoted 23 years to reaching the pole, one of the greatest expeditions now do it in a few weeks.

Peary Land received its name from the fact that in 1909 Peary went up its previously unexplored coast to the northern part of Greenland. At the end of land he named the point Cape Morris E. Jessup, of which or nearby Byrd hopes to establish his operating base.

Peary made this march in 1899, despite the loss of all his team when his feet were frozen. He had set out on an attempt to reach the pole, but was forced to turn back. As a result, however, he obtained information which gave important guidance in early attempts.

In 1902, Peary reached 81 degrees, 47 minutes north of the coast of Greenland. This he did by the route through Reclusen channel and with his party worked up part of the coast of Peary Land and then headed straight for the pole. But after weeks of marching and untold hardships, he was compelled to turn back. April 23, when only 171 miles from his goal. The successful expedition, in 1909, headed off the coast of Greenland, just below Peary Land.

The distance to the pole from the point on Peary Land, from which Byrd is to start his march, was approximately 300 miles. Byrd plans to operate from a base near to the north, about 100 miles from his goal.

Easy Figuring.

"See how I count, mamma," said little Artie. "My left foot, that's one. There's my right foot, that's two. And in one minute, three. Three feet make a yard, and I want to go out and play it now."—Boston Transcript.

HUMAN HYPONOTISM THROUGH POSTURE IS BEING STUDIED

Professor H. H. Severin of the University of California is studying the possibility of inducing hypnosis of human beings through posture.

Professor Severin explaining this method of hypnotizing animals, said: "When an animal is held on its back the instinct is for it to fight. Prevented from doing so, the animal's muscles become tense and it quickly assumes a state paralleling hypnosis. It is devoid of feeling and reacts to only one or two simple impulses. A rabbit, for instance, reacts only to the smell of food. A hen will follow animals with its eyes but otherwise remains motionless."

"The only animals I have found that cannot thus be hypnotized are cats and dogs. They are immune because they have been handled so much by humans."

POWDER RIVER FITTING NAME FOR ODD STREAM

ARVADA, May 6. (AP)—Powder River is a fitting name for the stream which passes through the northern section of Wyoming—it fits.

"During winter," said a local farmer on the river where natural gas is found bubbling up through water. Some bubbles will ignite when a match is applied.

During the winter peculiar formations are caused by the gas seeps. When the river is frozen over, gas accumulates under the ice and as the pressure gathers, it forces thin sprays of water through the weaker spots in the ice and these sprays freeze in various formations of arches and pillars.

The gas does not make the water unsuitable for drinking. In Arvada there is a drinking fountain, the water of which can be set on fire at any time.

Pitchers in Final Game.

Pocatello, May 6 (AP)—Idaho Falls romped rough shod over Pocatello today, taking the final game of the spring series here, 16 to 3. Pocatello used three pitchers in a vain attempt to stop the visitors, while Cronin for Idaho Falls pitched steady ball and kept hits scattered.

Manager Bonner, Pocatello, protested a decision at first base, and his continued protestations caused umpire Spencer to send him off the field.

Winners who started for the locals was wild and allowed frequent hits, and errors helped the Spuds to pile up the score. Hansen and Delaney who followed, were ineffective and the scoring by the visitors continued throughout the game. The official box score:

Loses Hundreds of Dollars

I am sorry I did not hear of MAYNE'S a few years ago, as it would have saved me several hundred dollars. Five years I suffered from indigestion and severe bloating. I grew older all the time. My doctor said an operation would be all that could save me. I took a course of MAYNE'S instead and for the past year have been entirely well. It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allows the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will relieve or money refunded. At all druggists.—Adv.

If you think that the surgeon's knife is the only method of escape from the misery of piles, it's because you haven't heard of the new treatment—Kamm's Dr. Leondhardt's PILE CURE.

This Doctor's treatment is internal. By "expelling" for years long hidden poisons from the blood, he has recovered the exact cause of piles and then went further and compounded a remedy that would remove the cause, cure the piles, and prevent them from returning by his discovery and so that there will be no shedding or drying. Schramm-Johnson Drug Co. and all druggists authorized to sell (H.C.M.) RUDH with guarantee that it will do as stated or money back.

Do that hemorrhoid haunts every sufferer should secure a package of Dr. Leondhardt's HEM-RUDH today.—Adv.

HOFF MAY BE BARRED

LOS ANGELES, May 6 (AP)—The western trip of Charlie Hoff appeared tonight to be at an end.

Unless the Norwegian plate vaunter appears at San Francisco Saturday he will be barred from further competition in the country. Late today the vaunter, visiting here for the day, was informed of New York A. A. U. officials' decision to this effect. "In reply he reiterated his statement that he would not appear at San Francisco, the reason, he said, being poor condition."

Later, however, he modified this statement, saying he "would withhold his final decision until he has received the official's wire."

ATHLETIC COMMISSIONER
WOULD DECLARE TITLE OF
JACK DEMPSEY VACATED

NEW YORK, May 6 (AP)—Only by declaring Jack Dempsey's heavy weight title vacated and elevating Harry Wills to championship recognition in default of acceptance of the serge's long standing challenge can the New York state athletic commission open a way for Dempsey to battle Gene Tunney at the Yankee stadium in September. Otherwise Tex Rickard will be compelled to take the bout to his Jersey City arena, Baylis's Thirty Acres.

This ancient starting proposition came today from George E. Brower, member of the boxing commission. Brower, it is rumored, holds the key to the situation because of the deadlock between Chairman Farley and Commissioner Mulholland. Farley insists that Wills be given a title battle while Mulholland supports Tunney.

So far as frequenting Wills as the leading challenger is concerned, Brower today definitely aligned himself with Farley.

HELT LAKE CITY, May 6 (AP).—Meeting of directors at the Utah Idaho league has been indefinitely postponed. It was announced here tonight by President Fred M. Nye. The league executive said that he and the other chiefs of the three Idaho teams to set a date that will be convenient to themselves.

The special session was called at the request of Idaho Falls and Twin Falls. The northernmost cities are anxious to have Friday's game in Salt Lake and Ogden and play doubleheaders on Sundays.

This change would also consider the money to the Idaho cities in transportation as they plan to use automobile buses if the directors sanction this request.

NEWS OF THE DAY AS CAUGHT BY THE CAMERA

ANOTHER WHITE HOUSE DEATH—The President and Mrs. Coolidge were photographed as they left the home of the late Mrs. Maud Downs Rogers, veteran White House employee, who died recently.

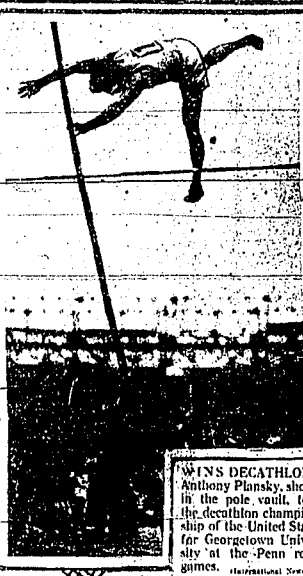

AMERICA'S FAIREST—Twice chosen "Miss America," twice "Miss New York," now Miss Dorothy Hughes, of Brooklyn, is called "America's loveliest woman" by Joseph Cummings Chase, artist.

FOREST FIRES IN SOUTH—Maryland is the latest State to be swept by forest and grass fires. Here are volunteers fighting the flames in Anne Arundel County.

YOUNGEST DELEGATE—Miss Anne Pearson Chapman, five years old, of Baltimore, was the youngest person to attend the annual G. A. R. convention in the National Capital.

WIN'S DECATHLON—Anthony Plansky, shown in the pole vault, took the decathlon championship of the United States for Georgetown University at the Penn relay games.

BOXER'S FUNERAL—Attended by several prize fighters and their managers, the last rites for "Clever" Seneca, the latest Filipino to die of injuries in the ring, were held in Milwaukee.

ANOTHER FAIR-BADE RUTH—Maggie Riley, of New York City, claims the championship of "women baseball players." She is illustrating her prowess in first base.

DEATH PLUNGE—This was what remained of the automobile of William F. Best, Washington Federal employee, after it took him to his death, falling 200 feet down an embankment.

SOLVE OIL FIRE, MENACE—Ever since Mrs. O'Leary's cow kicked over the kerosene lamp, burning up most of Chicago, the Windy City has feared oil blazes. The fire department has adopted a foamy extinguisher which smothers flames of this type, as shown in the test pictured above.

SWALLOWED SAFETY PIN—The life of Albert Muck, ten months old, was saved by Dr. Joseph Larkin, of Washington, D. C., when he thrust his finger down the baby's throat, allowed the pin to pierce his finger and drew it out.

COMMENCEMENT DATES ADVANCE

Exercises at University of Idaho Will Begin on June 5, Instead of June 12.

UNIVERSITY OF IDAHO, Moscow, May 6.—Exercises of the thirty-first annual university commencement, which will be held on June 5, 1926, and not on June 12, 13 and 14 as previously announced. This statement corrects a previous mistaken announcement made through the university press service.

Plans for the exercises are now virtually complete. Saturday afternoon, June 5, ceremonies incident to the installation of a chapter of Phi Beta Kappa, national scholastic society, will be held.

Several events are scheduled for Saturday evening. They include an alumni dinner and business meeting, the Phi Beta Kappa installation banquet, the annual alumni reunion, and the university play, "Honor's Day."

Sunday morning, June 6, Bishop Edward M. Cross of Spokane, head of the Episcopal diocese of Washington, will deliver the commencement sermon. At 2:30 o'clock the R. O. T. C. military band will give a concert on the campus, and at 4 o'clock the university women's club will be at hand in Hildenhall hall to relatives and friends of graduates.

The commencement exercises will begin at 10 o'clock Monday morning, June 7, in the university auditorium. Dr. Vanhook will deliver the address.

Following the ceremonies a luncheon and informal reception for guests, seniors, alumni, and faculty will be held.

Baccalaureate degrees will be conferred upon 253 students. Twenty-eight students will receive masters degrees.

MOVIES WITHOUT SUBTITLES

IN AIR OF GERMAN DIRECTOR

BERLIN, May 6. (AP)—Frederick Murnau, the German motion picture director, who goes to America this month to join the Fox Film staff, has been the most significant director in the movies in the making of photo plays without the necessity of subtitles.

"We should tell the story in pictures," he said, "so that everybody understands it."

Asked if artistic direction could be made profitable, he replied:

"In the long run, artistic direction alone will be profitable, because only the artistic picture will be of lasting value and have lasting impressions."

Patient Hand Worker

Replaced by Machine

In centuries past all ornamental iron work was wrought by hand with no better tools than a forge, a hammer, an anvil and a cold chisel.

The worker in iron was a true artist. He probably spent days in working over bars to make a small candleholder.

When it came to making up a large ornamental gate—why, that was labor for months. Now, however, machine tools are doing the work.

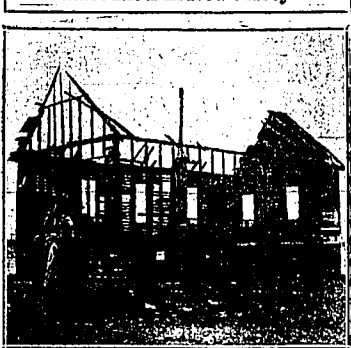

There have been several changes, and we are not alone in the hand-on wrought work of the past. In fact, there are still many men who can duplicate it, but they are few and far between.

Most of us do not care to spend a hundred dollars for a hand-wrought candleholder or bridge lamp and yet we do for these in period design.

Fortunately, we are not required to possess such objects. An easy-to-get wedding and cutting set in the hands, not of a hand-wrought artist, but of a highly trained craftsman, but rather just a practical operator, will greatly cut the time and cost of producing the most beautiful of ornamental iron products. All the worker needs is a photograph or sketch to work from.

where they will spend two weeks, returning here to make their home. Funeral services were conducted Monday by the Rev. A. C. Lathrop of the Baptist church for Thomas Atwood Potts, 75, who died here Saturday at the home of his daughter, Mrs. W. E. Potts, following a long illness. He was born June 8, 1850, in Polk county, Missouri, and was married January 6, 1874, to Lou M. Daniel. Eleven children were born to this union, nine daughters and two sons, two daughters dying in infancy. Mr. Potts died 27 years ago. He came to Buhl 10 years ago from Colorado and has since made his home with his daughter. Besides his nine surviving children he leaves 26 grandchildren—and several great grandchildren. But four children were present at the funeral, a son, Charles Potts of Buhl, Mrs. Fannie Wiersick of Hamilton, Colorado, and Mrs. Florence Hamilton of Buhl, Colorado. Burial was made in the Buhl cemetery.

Mrs. J. J. Greenhow received the news of the sudden death of a brother-in-law in Kansas from telegram. Mrs. Greenhow recently visited at the home of the deceased.

HUSBAND'S APPROVAL NEEDED FOR ACTORS GOING TO OUBA

BAYANA, May 6. (AP)—As a result of the standing of about 20 members of a musical comedy company brought here from New York, Commissioner of Immigration demands that inspectors in the act of enforcing the decree regulating the landing of foreign actors and actresses.

The decree provides that a bond must be furnished the department for the protection of the artist, and in the case of women artists, legal permission of their husbands. If they are under age and single, legal permission of their parents or guardians is required. Single actresses, 21 years of age or over, do not have to furnish permission to land.

Spelling Lesson

Once upon a time there was a stubborn student who refused to learn to spell.

But always the teacher pleaded with the student and often said:

"If you will suffer some great inconvenience, if not actual tragedy, some day, I will teach you to spell."

Yet still the student was obstinate, and said "No."

One day, after the obstinate student had grown to manhood, he poisoned himself eating oysters in "Oregon."

And when the teacher, who had now grown old and toothless, was speaking of "Oregon," he said:

"Oh, huh! I told him so."

DRY WEATHER HELPS PRICES

Kansas Reports Serious Crop Damage Due to Lack of Moisture; Values Higher.

CHICAGO, May 6, 1926.—Serious crop damage reported from Kansas and from spring wheat territory today tended to increase prices of the wheat market here. Closing quotations were given at 1.86 to 1.96 net advance, May new 1.20 5/8 to 1.30 3/4, and June 1.20 3/8 to 1.40, with corn 1.06 to 1.16 off, oats showing an equal decline, and provisions 15 to 40 up.

A leading authority said word that from Hays, Kansas, to Great Bend, Kansas, the wheat crop has gone about the limit of development, and some fields are brown and dry, that if irremediable damage has been done by drought, wind and heat. From other sources came word that 1,000,000 acres of winter wheat in northwestern and northern Kansas are badly in need of moisture.

Dry in Other Sections.

Almost unpropitious efficiency of accumulated and current moisture was meanwhile shown by official figures from the two Dakotas and Nebraska. At only one point in the three states did April bring as much as three-quarters of an inch of rain. Late reports of showers in parts of Nebraska, Kansas, and Oklahoma, however, had some effect as a counter balance.

Higher quotations at Liverpool, London and other foreign markets, and export buying of May and July delivery at Winnipeg had considerable influence. In the latter city, expected shipments from Chicago were liberal and big shipments from Duluth by lake were expected.

Favorable weather for corn planting eased the corn and oats markets.

Provisions responded to the upward trend of hog values.

A NEW and BETTER GASOLINE

The New Low 400 End Point

A low end point, assured through the more accurate fractionating control of the gasoline runs, checked frequently by the volatility tests, leaving no heavy ends, promotes complete vaporization and burning of each cylinder charge.

Less Crankcase Dilution

—better cylinder lubrication, more perfect piston seal and greater mileage before the changing of crankcase oil becomes necessary.

The Low Initial Boiling Point

With the low boiling point, due to regulation of the still operations to retain the lighter fractions of the crude oil in the gasoline runs, the new Texaco provides a "high test" gasoline of greater volatility.

Easier Starting

—less load on the storage battery, and more power with below-normal engine temperature.

Anti-Knock Qualities

Successfully producing certain desirable aromatic and naphthene hydrocarbons in the final new Texaco, the Holmes-Manley Process produces an exceptional gasoline with combustion characteristics in the finished product which give it exceptional non-detonating qualities.

Smooth Engine Operation

—and more power, better hill work without retarded spark, and a quicker pick-up.

A Balanced Distillation Range

The distillation range, controlled by the Holmes-Manley proportioning of intermediate boiling fractions, provides a volatile fuel with a combustion rate balanced to engine requirements. The new Texaco works best on a lean mixture.

Maximum Acceleration

—quicker pick-up and more power on the hills. The new Texaco takes the acceleration load.

The New Volatile Range

By shortening the distillation range, the new Texaco Gasoline provides a higher volatility, which gives the maximum acceleration with a leaner mixture while the engine is warming up.

Greater Mileage

—no unburned heavy ends, greater gasoline economy (more air, less gas), and lower cost per mile.

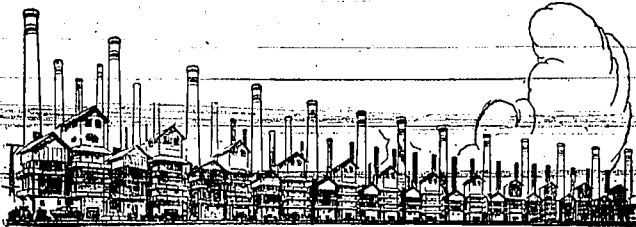

THE TEXAS COMPANY, always active and aggressive in the development of high grade petroleum products, now offers the American motoring public a new gasoline with a combination of qualities never before attained in a motor fuel.

It is a product of perfectly balanced distillation range, more volatile, and vaporizes to a dry gas.

The new gasoline is made possible through the Holmes-Manley Gasoline Process, owned and controlled by The Texas Company, representing an investment of millions of dollars and many years' efforts of refinery experts.

The new and better Texaco Gasoline has *all* the good qualities of any gasoline or motor fuel, *regardless of price*. It contains no chemicals. It needs none. Over two million barrels of this new product are now on hand.

Stop at the first Texaco pump you see. All tanks and pumps now supplied with the new product. Fill with Texaco Gasoline; and Texaco Motor Oil, the clean, clear, golden oil, known everywhere for its quality, full body and purity. You will note with pleasure the improved operation and condition of your engine.
