President Coolidge Attaches No
Special Significance to Home
coming of Ambassador Shef-
field in Near Future.

(By The Associated Press)

PAUL SMITH'S, N. Y., Aug. 10.—President Coolidge attaches no special significance to the homecoming of Ambassador Shefield, who, it was learned last night, when he arrived in New York from Mexico, will come to the United States this summer; he does not assume that the ambassador is coming to make any direct report which would bring him immediately into the office of the State Department.

Mr. Coolidge, it was said at the executive office today, has no direct or definite information concerning Mr. Shefield's return, but it was understood that the state department had been informed that the state delegation at Washington has dispatched any note to Mexico City in the immediate past on the land question.

General Policy Outlined

Directions for a general policy, it was explained, have been laid down by the president for the guidance of the state department in accordance with instructions given him by the United States-Mexico commission which was assembled there—quarantine of the latter country three years ago, and rules are set as conditions arise requiring that the state department has been sent recently to the president the question, when it was indicated, it was not of a character requiring special instructions from the White House.

The views of Mr. Coolidge concerning the Mexican situation were known during a visit of the chief executive to the executive office where he attended to a number of routine matters that had accumulated during his absence at Princeton, Vt. He was accompanied by Senator Ernest Gruening, Kentucky, who was his guest at White Pine camp last night, and left today for his home state by way of Washington to enter the campaign in which he is seeking reelection.

SENATOR BORAH ANSWERS LETTER OF FORMER PREMIER CLEMENCEAU REGARDING CANCELLATION OF DEBT

Baltimore Residents Flee to Safety When Flames Sweep Plant

Fire Gets Beyond Control Among Huge Oil Storage Tanks; Two Firemen Hurt.

BALTIMORE, Md., Aug. 10. (AP)—Residents were ordered to flee their homes in the Homestead street section of Baltimore late today when fire, sweeping the huge storage plant of the American Oil company, got beyond control.

Paul Smith, spokesman for the foreign affairs committee, today answered the letter of former Premier Clemenceau of France, demanding the debt cancellation as impossible of fulfillment. The senator declined demands for cancellation of the debt should be for the sake of the future, and not for the sake of the present.

Two firemen, injured in the blaze, were taken to hospital.

Fifteen tanks, each holding 40,000 barrels of oil, were reported burning. Six tank cars, holding 20,000 gallons capacity, were within the burning region, which is but 200 feet from the plant of the Consolidated Oil company where a large quantity of gasoline is stored.

Although the fire was burning in the Wells and Wilder street oil plant, firemen believe there was no loss of life due to the bursting of the tanks shortly after the fire started.

Firemen worked to run down the streets. Firemen devoted their efforts to preventing spread of the language of a traitor.

Charges Abundant

"To charge that we are seeking to undermine the independence of France or that somebody wants to pull France into the war is to do us a great disservice," said Mr. Borah.

He said that the cancellation of a separate treaty is in fact to fulfill our duty.

We had either to make a separate treaty or not to make a separate treaty for all nations, he said.

He said that the Versailles treaty,

which was signed by the members of the Versailles treaty, a treaty which in its vindictive and destructive terms retarded the development of Europe 30 years, and which was signed upon the basis of the harsh conditions for which the world said it was to sacrifice and suffer. One can only explain such a thing by attributing them to that love for his country which is the basis of every sense of gratitude. If there is any basis for cancellation of these debts, it must be for the sake of the future and not because of any possible benefit to us.

He said that the cancellation of the debts of the United States for things that are past.

Cancel All Debts

"If they want to cancel these debts, let them include all debts still欠付 and show that benefit of the cancellation will be to humanity and to the betterment of the masses of Europe and not to the benefit of the non-communist elements which are now ruling the life of people who were in no active responsibility for this war. Cancellation can not be based upon any just demand upon the part of the debtor nation against the United

CELEBRATION TO MARK MILESTONE IN NEW INDUSTRY

Corn, Oats and Hay Fall to Overcome Early-Season Set-

backs; All Other Products Near Ten-Year Average.

WASHINGTON, Aug. 10. (AP)—General improvement shown in crop conditions during month; production prospects brighter

at Idaho State Prison To Relieve Congestion

Construction Begins on Much Needed Building at Boise Pen; Inmates Crowded.

BORAH, Aug. 10. (AP)—Construction of a new "jailhouse" ward at the Idaho state prison started today to relieve overwrought conditions. The new punishment house, 17 by 50 feet and constructed from timber imported from Canada, will provide

improvement attributed to better moisture conditions in the latter part of the month, bringing the August 1 composite condition of all crops to within 42 per cent of the ten-year average, and forecasting yields 25 per cent above those of last year.

The condition in corn is much below the ten-year August average, with indications of a decline in production.

Tomato production is up, while egg production is down, and the potato crop is up.

Not only will the celebration point to the accomplishments of an almost

united front in the

country, but it will also mark a milestone in the growth and industrialization

of the poultry and egg business in a

state that three years ago brought every egg into the state for consumption, and in all the years prior to that time, the eggs sold outside the state were shipped to the east.

Today after three years of intensive, systematic and united effort, the egg industry is well established, and the production value of the poultry industry is carried to every big marketing center in the country.

OFFICE EXHIBIT PRICES

Over \$400 is offered as prizes for the egg exhibit and in addition, firms whose products have "native" worth, distribution, have placed exhibit offices which combine value in excess of \$125.

Many features, designed to make egg day an outstanding attraction in the northwest, will be put into effect, the northwest will be put into effect.

Yield rates are forecast at 200,000,000 bushels below last year's, which would indicate a heavy loss in egg production.

Many factors, including weather, have affected this year's crop.

SMALL HAY CROP

The smallest hay crop since 1913 is in prospect, indications pointing to 77,000,000 tons of hay and about 10,000,000 tons of alfalfa hay.

Prospects for potato production during July in nearly all the eastern states but Colorado, will be smaller than last year. It is of higher quality than for many years, being reported in 100 per cent of a high condition grade.

The 1926 potato crop will be larger than last year, the preliminary estimate being 204,382,000 bushels.

Spring wheat production is indicated at 207,19,000 bushels, a gain of 13,000,000 bushels over last year. Considering the winter wheat crop, total estimated wheat production is placed at 329,000,000 bushels, or 73,000,000 bushels more than last year and 37,000,000 bushels above the five-year average.

Many features, designed to make egg day an outstanding attraction in the northwest, will be put into effect, the northwest will be put into effect.

Tobacco conditions improved during the month, with a total production of 200,000,000 pounds, a gain of about 20,000,000 pounds less than last year in prospect.

MEXICAN ARMS EMBARGO

For some years the United States
government has maintained an embarg-
o on the shipment of arms from
this country to Mexico. This was done
in the interest of peace, for the benefit
of both countries. Recently there
has been a disposition to lift the
embargo on the ground that the
growing strength of the Mexican
regime and the restoration of order
in Mexico had made such a move
unnecessary.

Now, because of the flare-up of
religious troubles in Mexico, the
matter has been reconsidered, and the
government at Washington is disposed
to continue the embargo.

This is obviously the wise thing to
do, and the American thing. Either
on humanitarian grounds or on the
grounds of traditional policy, a gov-

ernment that has always kept aloof
from religious controversy in its own
country cannot properly interfere in
such controversy in a neighboring
country, or do anything calculated to
promote religious warfare there. The
situation in Mexico is bad enough
without the United States taking a
hand in it.

AIR RELIABILITY

Twenty-one manufacturers have en-
tered 27 planes in the second annual
commercial airplane reliability tour,
which starts from Detroit. Ernest
Greenwood, special assistant to Herbert Hoover, has been named to ac-
company the tour on the government's
part.

Such announcements as this have
become almost routine in character.

Yet, when one casts an eye back over
the very short period of years since
human flying began, these cannot help
but be a romantic and adventurous
thought.

With distance abolished, what is left
for man to do? Yet that is the question
asked after every crude invention
which promises a different aspect.
Life keeps on assuming new—and
temporary—aspects. Eventually, it
remains the same. Trains are no
matter of fact, automobiles—much
so. Airplane transportation is on the
way to a dull everydayness.

But "the world is all before us," who
is to choose? And beyond—the
world, the universe. . .

ONLY OFFICE BUILDINGS

American skyscrapers, says Profes-
sor William A. Horing of the Columbia
University School of Architecture,
are very bad.

"A skyscraper in stone would be
a great wonder, but in steel, now
that we know the science of it, he says,
is not a difficult achievement." He says,
"We could build an office building
ten times as high as the tower of
Babel. The real reason why it looks
marvelous to us is because we com-
pare the steel structure with monu-
mental buildings of the same height. What
is difficult is how to make it beau-
tiful."

One building, contracted with
those of any Spanish-American com-
try, are feeble expressions of architec-
ture. We, also, certain refinements
they do not possess, but old democratic
architecture, hard, thin bladders
and uninteresting in conception com-
pared with the sturdy masonry build-
ings of, say, Cohn or Mexico."

This is a jolt to American public
opinion, but it is well-timed. It
affirms all the complimentary things said
about our building achievements in
recent years. Some foreign archi-
tects, and many native ones, insist that
the American architecture now leads the
world that it is more vital, original
and beautiful than any other. This
is held to be especially true in houses
and public buildings. Surely sky-
scrapers should not be qualified after-
ward from such a proud claim.

Granted, most skyscrapers are ugly,
fearful because they are built square,
plain and cold, stony-piled on story
upon story, like a mighty, but such
a wall, the Woolworth building
being the only one that may be de-
emed a work of art.

with this characteristically American
idea of tall office buildings. Many
critics consider that the most beautiful
building in America. If office build-
ings of general would adopt the same
towering Gothic effect as they rise,
the critics would soon have a differ-
ent story to tell.

GLASS COMPANY
COMES TO CITY

Salt Lake Men Will Open Third
Plant of Its Kind in Idaho
Next in Two Weeks.

Under management of D. A. Hamil-
ton, J. P. Kline of Salt Lake, the
Twins Falls Glass and Glass Company
will open a third plant in the city
next month, north, in the building
which a number of years ago was ne-
cessitated by the Heubley Heating
and Supply company. Remodeling
and expansion of the plant will be
done in connection with the new
plant, and machinery will be
brought in from the old plant.

Mr. Hamilton, president of the firm and their
associates, the Heubley Heating
and Supply company, have spent
more than 20 years following their
present trade. J. P. Kline has for
many years been head of the Fuller
Revolving and Silvering plant in Salt
Lake.

FINE MANNERS? AT IDAHO

At least that is what Gloria Warren
has been writing for Gloria with
Eugene O'Brien, as leading man in
"Fine Manners," a luxury love drama
at the Idaho theatre today. Gloria, 21,
had been invited to the opening of the
play, and while attending, she
met Maurice Shaw, a young man
with whom she has been in love for
several weeks. She was greatly
impressed by his manner of speak-
ing, and his good breeding.

Young Gloria had the following to
say about him:

"He is a fine young man. I
have been writing for Gloria with
Eugene O'Brien, as leading man in
'Fine Manners,' a luxury love drama
at the Idaho theatre today. Gloria, 21,
had been invited to the opening of the
play, and while attending, she
met Maurice Shaw, a young man
with whom she has been in love for
several weeks. She was greatly
impressed by his manner of speak-
ing, and his good breeding.

Having reached this point in
his reflections, he rose. Why de-
lay? Perhaps he could find the right
moment to tell her. He was
fully conscious of the fact that
she was looking at him with admiration
and admiration.

He had promised his next brother-in-law,
Bob Warren, to keep an eye on
Gloria's sister while Warren and Barbara
were in Japan, and Laurel had
kept the promise with religious
zeal and single-mindedness. He
had merely lied and admitted Mrs. Ordway
that he was all there was to it.

He, Laurel, would have to wait for
another encounter. Meantime he
might run around to the club and
for an hour. He had been going to
the club to meet his friends. A
boy with McDonald, the club trainee,
would do him good. Or, by Joe, he'd
go and see Louise Ordway!

He had promised his next brother-in-law,
Bob Warren, to keep an eye on
Gloria's sister while Warren and Barbara
were in Japan, and Laurel had
kept the promise with religious
zeal and single-mindedness. He
had merely lied and admitted Mrs. Ordway
that he was all there was to it.

Tom and Dally Bennett are a
charming couple presenting a protein
feeling called "Youth and Age." It
is a play with songs, character
impressions and a few simple
and witty remarks.

Beryl and Shirl have a vehicle full
of comedy, nicknamed "Personality
Plus," which consists of stylized
imitations of famous people.

The Winklins, bicyclists supreme,
are an exceedingly clever pair of enter-
tainers who present an offering
with many new tricks and will prove
wonderful in all, the pride that has
been bestowed upon them.

SALESMAN CONFESSES
TO RESISTING-OFFICER

Charles J. Fitzpatrick, indicted for
attempted murder, failed guilty in
trial court here Tuesday to charges
of resisting an officer, and was sent-
enced by Judge W. A. Baldegg to
serve 30 days in jail and pay \$25
fine. Jail sentence, the court stated,
was imposed in view of his plea of
guilty.

Fitzpatrick was accused of striking
Sheriff M. E. Finch when the sheriff
undertook to arrest him on charges of
being drunk on the public highway
in a country home, about two weeks ago.
He has been in jail since that time.

INSTALLATION OF ORGAN
AT IDAHO TO START SOON

Mechanics will be sent to Twin
Falls within the next few days from
Denver by the Rudolph Wurlitzer
Organ company of Tonawanda, New
York, to install a new organ in the
newly-reopened Idaho Falls Opera
House, the Idaho theatre, according to
word received by Joe Kunkel, manager
of the Idaho, from George A. Levy,
theatre manager, Thursday.

The organ was received by Mr.
Fitzpatrick, who is serving a 30-day
sentence for resisting an officer, and
will be especially true in homes
and public buildings. Surely sky-
scrapers should not be qualified after-
ward from such a proud claim.

Granted, most skyscrapers are ugly,
fearful because they are built square,
plain and cold, stony-piled on story
upon story, like a mighty, but such
a wall, the Woolworth building
being the only one that may be de-
emed a work of art.

BLACK LEADS FIELD

BIRMINGHAM, Ala., Aug. 10. (AP)—
Return from 237 of 1900 prelates
which were believed by neutral poli-
tical parties to be pro-German, and
degree of severity the total was in
today's democratic primary, gave
Hugo L. Black, candidate for the
United States senate, a commanding
lead over four opponents.

WHEAT PRICES CLIMB HIGHER

Grain Prices Influenced by Incorrect Crop Reports From Washington.

CHICAGO, Aug. 10.—(AP)—Wheat prices climbed today, influenced by incorrect general belief that the crop report from Washington would indicate a smaller yield than private experts had predicted. Closing quotations on wheat were: Feb. 1, \$1.10; Sept. 1, \$1.00 higher. Corn 5-8¢ to 13-8¢, up 5 cents or 10-12¢ down. Oats 7-8¢ advance and futures unchanged to 17-18¢ down.

It will be noted almost from the start today that wheat was all out and all had become anxious about their market position and had determined to even up their accounts ahead of the issuance of the government report. Municipal millers were also active and the Canadian government crop report would likewise turn out to be considerably under recent unofficial figures. A good deal of notice was taken of assertions that magazine writers were not to be believed by publishing for big bankers, chain stores and others who know beforehand what prices they are likely to get through the year.

At first the government crop figures from Washington received little attention but came to an end were much larger than had been generally expected today; the average of private estimates being for 18,000,000 bushels of wheat, while the official estimate, east, proved to be 62,482,000 bushels. Unofficial estimates of spring wheat averaged 21,217,000 bushels compared with 21,217,000 bushels officially. Estimates were based largely on opinion that the government figures would not show the full increase in wheat yield that threshing returns are indicating.

On the other hand, Canadian government figures received after the close were in line with trade expectation here, and in some quarters were regarded as a complete offset to the harsh forecast from Washington.

Thus, wheat prices closed at a new record for the season, with hot dry weather southwest chiefly responsible. Besides a bullish crop report was expected. Oats反映了 with corn values. Provisions reflected weakness of hog values.

CHICAGO, Aug. 10.—High—Wheat 140-142; corn 100-102; oats 100-102; barley 120-122; rye 100-102; corn 100-102; oats 100-102; barley 120-122; rye 100-102.
