KNOW FOR BEAUTY

Says a foot observer of the times
where you least expect it, it is going to be the big movement in American life and business the next two or three years.

Recently we have been standing
and looking at the feet of the women of the world.

There are plenty of stunts in that
direction. Automobiles, for example, look at all the variations in models and finish to give smartness, distinction and individuality to the race.

Instead of "style," perhaps we should
the word "art." For this sort of thing means nothing less than artistic development along many lines, aiming to beauty and enrich the common life.

It is one of the finest signs of the
time. And it is natural, as a part of our national evolution. There is the art, usually, in a pioneer sense, of the day.

Another generation it may lead the
world in beauty.

CHAPTER V
I fully expected that after the preliminary investigation of the body of the girl, the doctor would find that she had been killed by a black and white man.

My chief suspicion of the murderer was that he was a black and white man. I had seen him in the street at the time of the murder.

Without varying the interval, with my hand on the door, I opened it and stepped out into the street.

The first twelve words were what we call central, that is, they had no connection, so far as we know, with the crime, the mystery or the suspect.

But the thirteenth word was Louisa and the fourteenth was Pipe. The association was almost immediate.

GASOLINE ALLEY—THE BIG EVENT DRAWS NEAR

RAPID GROWTH OF CORN LOWERS PRICE

Reports, Indicating Rapid Progress of Crop, Bring About World of Selling on Market.

CHICAGO, July 15.—Reports indicating rapid progress of the corn crop brought about a world of selling in the corn market today, and prices underwent a sharp retreat. Closing quotations on corn were unlisted 2 1/2 to 3 1/2 cts. net lower, with near 1 1/2 to 1 3/4 cts. down, and 1/2 to 1 cts. off, and provisions varying from a decline to a rise of 2 cts.

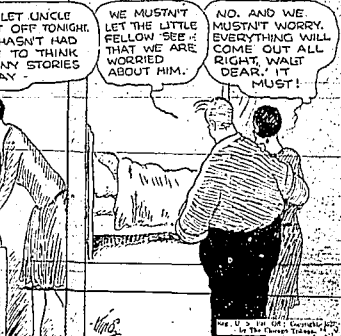

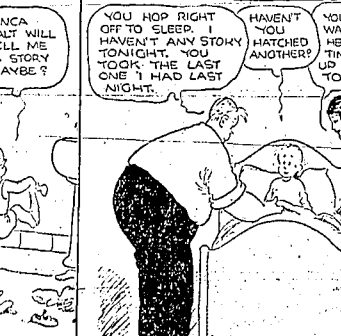

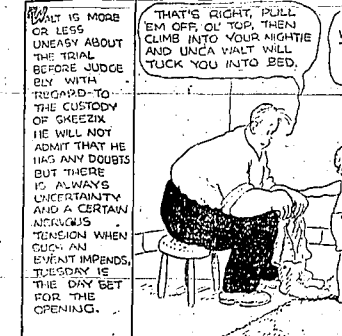

In addition to opportune weather and warmth, a factor which has been cited as one of the reasons for the rapid growth, was the likelihood that the government August crop report will show a higher estimate of the corn harvest, not only because of better field conditions, but because of an increase in the government percentage of corn used for stock purposes.

Wholesale prices for corn today are available for immediate use was harder to buy. As a result, cash corn prices were strong at 1 1/2 to 1 3/4 cts. net, but the new crop of relatively small volume and had little effect on futures. Reports current showed that Argentina continues to ship enormous quantities of corn having a reported 1,000,000,000 bushels to the United States.

What was influenced by corn weakness and by unlisted for downward in Liverpool, and which has been improved weather in Europe was noted. Meanwhile, black nut northwest advanced to making no progress and export demand today for wheat from North America was slack. Oats gave way with other grains and on account of better favorable weather.

In the provision market the effect of higher hog values was more or less counterbalanced by the action of corn. Wheat—Open High Low Close July—14 1/2, 14 1/2, 14 1/2, 14 1/2. Sept.—13 3/4, 14, 13 3/4, 13 3/4. Dec.—14 1/2, 14 1/2, 14 1/2, 14 1/2.
